I suggest, Mr. President, that the amendment may or may not belong on this bill. It has been offered. So it is here. But the thrust, certainly, of, I think, all arguments that will lodge against this come down to simply the efficacy of the testing methods, and the gravity of the human concerns that are involved. Those are a very different set of concerns than concerns about cosmetics or about the products that do not affect the health and safety of individuals.

Mr. President, I rise in opposition to the amendment, and I am hopeful it will not be included as part of the farm bill. It clearly is a subject that will occupy the attention of thoughtful Americans for many years to come. Hopefully, those funds and resources, and the originality of topflight scientists will be devoted to ways in which these tests might proceed to a nonanimal type in a broad gamut of methods. But we are not yet at that point, in my judgment.

The intent of the Senator from Nevada may be to stimulate research, and to jog the thoughts of people who may be able to come up with alternatives. But that is clearly something else than mandating 1 year after the time of enactment the LD50 tests can no longer be taken as a part of the background of testing on things that may vitally affect our health and safety.

Mr. President, I yield the floor.

Several Senators addressed the Chair.

The PRESIDENT pro tempore. The Senator from Nevada.

Mr. REID. Thank you very much, Mr. President.

I respond to the manager of the bill for the minority on this matter, this important farm bill, that statements made by the Senator, with all due respect, are not in keeping with the testimony that has been rendered before committees of this Congress by administration officials.

For example, late last year Victor Kimm, who is the leader of the Office of Pesticides and Toxic Substances of the Environmental Protection Agency, testified that basically the LD50 test is not necessary. I will speak specifically to what he said. I give you a general statement. But he said specifically: "In 1984 we revised our position and"—this is his word—"renounced classical LD50 tests that utilize a large number of animals for a singular purpose, the calculation of a median lethal dose. Instead, we suggested a cured approach that results in the saving of animal lives."

That is what this amendment is all about. Yes, it does do away with the classical LD50 test. But that is all it does because it sets up, as the Senator from Indiana has indicated, in the second section of the bill a program that the Federal Government will look into to make a determination if, in fact, there are alternatives available so that you do not need to use animals.

This bill does not outlaw animal testing. It does not even come close. In fact, the language of the amendment allows for, in effect, animal testing if the Federal Government says there are no alternatives. It is as simple as that.

The legislative intent should clearly apply and state that the term "LD50 test" means the classical LD50 test or one in which the calculated dose of a substance is measured to cause the death of 50 percent of an entire defined population. It does not include tests such as the limit test, multiple end point test, the up and down method, or the approximate lethal dose test, which are other scientific methods that are used that are, in effect, not as cruel to animals. Some of these may be unnecessary, but that is up to the Federal Government to decide. This legislation does not outlaw those tests.

I further submit that on a hearing of this bill, again in November of last year, before the Commerce Committee, at that time the Assistant Secretary for Health in the Department of Health and Human Services, Dr. James O. Mason, testified. He testified at great length about the need for animal testing.

Without debating those statements that he made, because we would all recognize that there is some validity in his statement that progress has been made as a result of some of the testing done on animals in the past—without debating that at this time as to whether or not it is necessary, and repeating that this legislation does not prevent animal testing, I submit that Senator BRYAN, who was chairman of that subcommittee and was conducting the hearing, said: "May I conclude from that at this time there is no particular type of research in which LD50 would be absolutely, in your judgment, necessary to do a proper job of research, but that your fear or apprehension is that there may come a time in the future in which there is a test in which LD50 may be necessary? Is that the thrust of it?"

He said: "I think you are very close to it."

So, in effect, what Victor Kimm has said is that the classical test is not necessary, and what Dr. Mason has said is that they do not have any use for the test right now. They may have a use for it sometime in the future.

I respectfully submit to the manager of this bill that we do not in this amendment stop, prevent, slow down in anyway animal testing if a Federal agency thinks it is important. We do away with the classical LD50 test, lethal dose 50, and we have done it based upon not only technology assessment, but there are other witnesses who testified on this. In addition to that, what the Government agencies have said is that it simply is not necessary. We have Victor Kimm's statement and we have that of Dr. James Mason.

Mr. CONRAD addressed the Chair.

The PRESIDENT pro tempore. The Senator from North Dakota [Mr. CONRAD].

Mr. CONRAD. Mr. President, on this side we would like to commend Senator REID for introducing this legislation. It certainly merits serious consideration. The legislation, we believe, would require and urge that alternatives to animals be used in research, wherever possible. Obviously, we should eliminate unnecessary testing on animals, wherever that is practicable.

However, Mr. President, on behalf of the committee, I want to register objection to this amendment for jurisdictional reasons. This is not a bill that has been examined by the Agriculture Committee. Rather, it is legislation that has been referred to the Commerce Committee. Senator REID, in referring to hearings and witnesses, is referring to testimony that was made not before the Agriculture Committee, but before the Commerce Committee. The Agriculture Committee, therefore, has never had an opportunity to review the testimony of those witnesses, to have a chance to question them, to have a chance to review this legislation, to be able to be certain that it has the sort of limited effect that the Senator from Nevada is suggesting here.

On behalf of the committee, we recommend that the Senator work this bill through the members of the Commerce Committee that are the ones that have had the benefit of the hearings, the testimony, and the legislative process.

With that, Mr. President, I yield the floor.

Mr. REID addressed the Chair.

The PRESIDING OFFICER (Mr. ROBB). The Chair recognizes the Senator from Nevada [Mr. REID].

Mr. REID. Mr. President, I have been in Congress almost 8 years now, and I am disturbed every day by this jurisdictional matter. I understand if

in fact a bill was just introduced, there can be jurisdictional disputes over it. But remember, this legislation has been kicking around for 5 years. Are we going to wait another 5 years and have another million animals killed as a result of this test?

There comes a time when you have to cut people a little slack. I think in this instance we have cut about all the slack that should be cut. I think that in this instance, there has been enough done. There has been legislation introduced now in three Congresses—the 99th, the 100th, and the 101st Congress.

We are winding to a close with the 101st, and now we are going to say we need not only have the Commerce Committee keep it bottled up in their committee, but now we are going to put it over to another committee and bottle it up there for a while.

I think the evidence is very clear that it is time to stop killing these animals unnecessarily. This amendment does not affect medical research. This amendment does not affect animal testing with medical research, if in fact there is a reason for it.

What we are saying is, as Avon and other companies have said, there is no reason for it any more. What we are saying is the same thing Victor Kimm says, who is head of the Office of Pesticides and Toxic Substances. In effect, he is saying that we have done enough. We do not need the classical LD50 test. Let us have the other tests. That is where we have a second section of this amendment, which allows all the other testing to go on, if the Government can show there is a reason for it.

So I submit to my colleagues of the Senate, let us not get hung up on jurisdictional matters. We are talking about humane treatment. We are talking about animals being killed, not by scores, or by the hundreds or thousands, but by the tens of thousands. It is simply unnecessary.

The classical LD50 test does just what it says—lethal dose 50. When you have a number of these animals together, half of them die, you stop the test.

We do not need to do that. We are a civilized society. I repeat for the fifth time, this amendment does not interfere with or slow down medical research in any manner. If there are animals that are necessary to be used in medical testing, the Government simply has to show that it is necessary, that there are not other tests that exist. I submit that this amendment should be adopted overwhelmingly by this body.

Mr. LUGAR addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from Indiana.

Mr. LUGAR. Let me reiterate that no Senator wants the unnecessary slaughter of animals. Every Senator, I think, has to act in a prudent manner. And all the distinguished Senator from Nevada has pointed out is that his amendment has been around in one form or another for 5 years, and the Commerce Committee has had several opportunities to have hearings to discuss it.

The fact is, they have not taken action. One reason they have not, I submit, is that high level officials in the Department of Commerce, FDA and EPA, do not want to see action on this amendment. They do not want to see action, because they believe that they would be precluded from utilizing tests that are important for the health and safety of human beings.

That is a very important consideration for all of us. No Senator wants to see the slaughter of animals, but most Senators, in a prudent manner, would say that given the scientific evidence, scientific procedures, the sorts of tests that apparently are required to make certain that a pesticide and insecticide, agricultural chemicals—and I gather that is one reason the amendment comes into our purview at all, as opposed to being strictly a Commerce Committee jurisdiction are suitable for human use. But let us accept on face that there is at least a portion of agricultural jurisdiction, even if a narrow one, at least the aggregate of those in EPA, that have consulted with our committee and are not prepared to see adoption of this amendment.

Therefore, Mr. President, I conclude, as has the Senator from North Dakota, the distinguished comanager of the bill right now has said, that it would have been better if the motion was based in hearings. We have not had hearings. We have been approaching this amendment on the floor of the Senate because it has not made headway in the Commerce Committee after a hearing, after Senators have seen a great deal more testimony than we have.

But we have consulted with relevant agencies of our Government, and they oppose the amendment. They oppose it because they believe that it is a broad brushstroke, and certainly the alternative testing methods simply are not available in the force and number that are required.

Therefore, Mr. President, I repeat again that it seems to me that this is an amendment whose time has not yet come, whatever the jurisdiction or whatever the venue in which the discussion occurs. This is an important amendment in the sense of spurring consideration of alternative means, and humaneness with regard to animal testing.

I join the distinguished Senator from North Dakota in commending the Senator from Nevada for his interest. But at the same time, I must oppose the amendment and advise Senators I think it should not be part of this farm bill.

Mr. REID addressed the Chair.

The PRESIDING OFFICER. The chair recognizes the Senator from Nevada [Mr. REID].

Mr. REID. I think that the time has come to stop going back and forth, but I do feel it is important to bring out testimony that was rendered before the Commerce Committee. This was a statement of Dr. Martin Stephens, a representative of the Humane Society of the United States. I think it is very probative to listen to what he said:

> The goal of this bill is to make testing more humane, and certainly that is the goal shared by the American public. I had many remarks to make on the LD50 test, but it seems that there is no opposition to eliminating the LD50 test.

The administration testified; Dr. Kimm, Dr. Mason, both testified, and Dr. Stephens responded to their testimony and said "As I have said, it seems that there is no opposition to eliminating the LD50 test. Both Dr. Kimm and Dr. Mason agreed that the test had seen better days. They talked about the need for continued animal testing on modification of the LD50 test.

This bill does not prohibit those modifications, which include the approximate lethal dose test, the limit test, the up-and-down method, and others. These still involve animals but far fewer animals, and in some cases there is less suffering per animal. I think Dr. Mason was under the mistaken impression that this bill would not allow those modifications."

He goes on to say Dr. David Rall, Director of the National Toxicology Program, head of the Department of Health and Human Services called the test an anacronism.

He went on, "I do not think that the LD50 test provides much useful information about the health hazards to humans from chemicals," and this from the head of the agency that tests chemicals for components, FDA, NIH, and the Centers for Disease Control. He also stated that the National Toxicology Program itself does not use the LD50 test. The International Scientific Journal states it is now widely recognized among toxicologists and regulators that the precise LD50 value is an unattainable vision.

Dr. Gerhard Zbinden, of the University of Missouri, called the LD50 test a ritual mass execution of animals. And he states, "I could go on."

Mr. President, I could go on and on. There is simply no basis for not supporting this amendment. The only basis is one of this vague illusionary things we chase around here and I have seen for 8 years, this thing called jurisdiction, which is meaningless. What we need to do is do something to

stop unnecessary suffering and in the process we will make this country a better and more humane society.

The PRESIDING OFFICER. The Chair recognizes the Senator from North Dakota [Mr. CONRAD].

Mr. CONRAD. Mr. President, I ask unanimous consent to add Senator LEAHY as an original cosponsor of the Reid amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CONRAD. Mr. President, I would also like to commend to Senator REID on behalf of Senator LEAHY that he would be willing and eager to work with the Senator in order to achieve some of the goals that have been outlined by the Senator from Nevada and to further indicate that Senator LEAHY and the committee believes that while there is much merit in the amendment from the Senator from Nevada that it is inappropriate for this amendment to be added to this bill.

Again, often people hide behind jurisdiction in this body. But in this case we have a situation in which there have been hearings held before another committee, witnesses have been called before another committee, in which the expertise that has been generated in this Congress really resides somewhere else.

Therefore, again on behalf of the committee we would resist the amendment.

Mr. REID. Mr. President, I ask for the yeas and nays on this amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The Chair recognizes the Senator from Indiana [Mr. LUGAR].

Mr. LUGAR. Mr. President, during the course of this debate others in Washington have been listening to our words and I have received a memo from Secretary Sullivan of the Department of Health and Human Services in which he and his department made the following comments with regard to this amendment.

He points out that the amendment has never been voted out of any committee, whether it be Agriculture or Commerce, and it is strongly opposed by the administration. The Assistant Secretary of Health stressed that biomedical medical research and drug development programs will be adversely affected by this amendment.

This is a disastrous amendment. It would wreak havoc on biomedical research and drug development, because it places restrictions on the choice of scientific methods and creates sizable administrative burdens for justifying the use for each type of toxicity testing.

The amendment outlaws the test for establishing product safety; while it is true that this test is used less and less frequently, it is still available as an option when science demands it.

A particularly damaging portion of the amendment, as the Secretary points out, is the requirement that all agencies review regulations and guidelines concerning the use of any animal toxicity testing of products that may go onto the market. The agencies concerned with product safety already go to great lengths to assure that the test involving animals are conducted humanely and with the minimum number of animals. The amendment would require an unacceptable amount of unproductive work to continue using these test methods.

Finally the thoughts of the Secretary, and I quote:

> The products potentially affected by this bill are not just additional soaps or deoderants or cosmetics but include life-saving and life-sustaining commodities such as new drugs and medical devices. We do not want to hamstring our scientists as they try to develop safe and effective drugs, vaccines, and other treatments for persons in this Nation.

I make these additional points, Mr. President, prompted by the interest of the Department of Health and Human Services.

Mr. President, at the time that the distinguished Senator from Nevada or others are completed with their debate and therefore we know the debate is at an end I will be asked to be recognized to table the amendment of the distinguished Senator from Nevada, but I am withholding that motion, seeing he is on his feet and wishes to proceed with the debate.

Mr. President, I ask unanimous consent that a letter from Dr. Louis Sullivan, Secretary of Health and Human Services, be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF HEALTH
AND HUMAN SERVICES,
Washington, DC, July 23, 1990.

DEAR SENATOR: I am writing out of concern that the provisions of S. 891 may be offered by Senator Reid as an amendment to the farm bill, currently under discussion on the Senate floor.

The Administration, and this Department in particular, is strongly opposed to the adoption of this amendment. S. 891 would seriously curtail the use of animal toxicity testing of products to be introduced into the American marketplace. One such test, the LD50 test, would be completely outlawed by this measure; while this test, in fact, is being employed less and less frequently, it does play an important role in some situations and should remain available when the scientific circumstances demand it. A particularly damaging aspect of the Reid amendment is the requirement that all Federal agencies review and justify any animal toxicity testing that they utilize or require. In fact, Federal agencies already go to great lengths to assure that animal testing is conducted humanely as possible and is designed to involve a minimum number of animals. The proposed amendment would require that a great deal of effort be committed to justifying the continued use of testing methods that seem to be working quite well. This would be government waste of taxpayers money, pure and simple.

The products affected by this bill include life-saving and life-sustaining commodities such as new drugs and vaccines, such as those that might be targeted toward cancer and AIDS. We should not hamstring our scientists and doctors as they try to develop safe and effective products for our nation's people.

I hope you will join me in opposing the incorporation of the provisions of S. 891 into the farm bill. The future health and well being of our citizens may well depend on a firm rejection of this amendment.

Sincerely,

LOUIS W. SULLIVAN, M.D.,
Secretary.

Mr. KENNEDY. Mr. President, I am opposed to this amendment. It is clear, on the basis of testimony given by the Assistant Secretary for Health, Dr. Mason, that reliable alternatives to these tests do not now exist in all conditions. Although all of us wish to minimize injury to animals, we must not do this by placing human beings at risk. NIH has informed me that there are a number of potentially life-saving cancer drugs that cannot be administered safely to human beings without animal testing of the kind this amendment would prohibit.

This is a complicated matter. It has not yet been thoroughly reviewed by any committee. It is clearly inappropriate to adopt an amendment based on conflicting and disputed scientific arguments without a thorough committee review.

Mr. REID. Mr. President, I have a brief statement to make before the Senator seeks recognition to ask for a motion to table.

I submit that Dr. Sullivan, and I respect his interest to this body, should determine what his own people had to say. I have related what Dr. Mason has said, and I have stated what another agency has had to say, namely the Environmental Protection Agency.

I repeat now for the sixth time, this amendment does not affect any type of medical research. It does outlaw a test that even the administration officials have stated is an anachronism. It is time to do away with this test. I do state I do appreciate the kind offer of the chairman of the Agriculture Committee, Senator LEAHY, and his interest to look into this but I think the time has come that we should vote on this amendment.

I now yield to the Senator from Indiana.

The PRESIDING OFFICER. The Chair recognizes the Senator from Indiana [Mr. LUGAR].

Mr. LUGAR. Mr. President, I thank the distinguished Senator from Nevada.

I move to table the amendment and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. LUGAR. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. LUGAR. Mr. President, is it the opinion of the Chair that the vote on this will occur after 6 p.m. this evening per the order under which we are debating today?

The PRESIDING OFFICER. There is no formal order that establishes when the votes will occur. There has been an informal understanding.

Mr. LUGAR. Mr. President, then in line with the informal understanding, I ask unanimous consent that the vote occur after 6 p.m. this evening.

The PRESIDING OFFICER. Without objection, it is so ordered.

The vote on the motion to table the amendment of the Senator from Indiana will occur after 6 p.m. this evening.

Mr. LUGAR. I thank the Chair.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BURNS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BURNS. Mr. President, I take this time, as we have now started the second full day of debate, on what I consider probably the most important legislation that will come before this body, and that is the redoing of a Food and Agriculture Act.

I would like to premise this just a little bit because I think a lot of times the American people have been misguided that this is a farm welfare bill. We are talking around an outlay of $50 billion a year out of a budget of $1.2 trillion. Now that does not sound like very much. In fact, it is less than 1 percent of the total outlay of tax dollars that this Government will spend.

It has been done for a very specific reason. It is not done to guarantee an income to our farmers and ranchers, the people that live on our ranches and farms that produces the food and fiber for this country. It is done because the American society as a society made a commitment that they want a stable, healthy, nutritional supply of food, and also fiber. It touches the lives of every one of us.

Every day people go to the grocery store. Foreign visitors when they come to this country do not marvel at our transportation system and they sometimes do not marvel at our communications system. They do not marvel at the big buildings that we have built. They marvel at our supermarkets.

Right here in the Washington area, I think, last year was a prime example, when the wife of a Russian hockey player for the first time visited an American supermarket. She filled up two pushcarts full of meat. She had never seen that much meat in a grocery store in her life. Because over there you spend 2 hours standing in line to make a selection of 19 items, and most of the time there is no meats involved. She had both of those carts full because she did not think tomorrow there would be any there, until she was told otherwise. Foreign visitors marvel at our supermarkets.

So basically what we are talking about here—and we are going to batter around in this body trying to justify outlays and dollars into the agricultural community at the production level. Let us understand this budget just a little bit. We are talking about $50 billion. Half of that budget goes to food stamps, to help our less fortunate feed themselves—school lunch programs; food to nursing homes and convalescent centers; a whole array of programs that are sponsored by this Government that provides food and nutrition and, yes, fiber for clothing to some of our less unfortunate. Only $11 billion in this budget actually gets to the farmer and rancher. If you want to take the percentage on that, I think that would be all right.

I do not have any problems dealing with the money that this Government spends to ensure the supply of food.

I asked a man one time, "Do you buy insurance on your car?" Sure, he does.

"What do you spend for it?"

"$1,000 a year, couple of cars."

"How about insurance on your house?"

"You bet."

"How about insurance on your life?"

"You bet."

"Health insurance?"

"Yes."

I said, "What if I could provide you with an insurance policy that would guarantee you that you could spend all of your hours in the day dealing with your chosen vocation. I do not care what you do. I do not know what your line of work is. I do not care what your line of work is. What if I could guarantee that you would never have to plant, prepare a seedbed, hoe, harvest, process, freeze, and do all those things it takes in to lay a food supply for the winter, if I could guarantee you would never have to do that or any of your family would have to do that so that you could contribute all of your time to your chosen vocation? Would you buy an insurance policy like a that?"

He said, "You bet. It is worth quite a lot to me."

How much is it worth?

Right now the average family spends $129 a year for that insurance policy. That is not very much. That is not very much, guaranteeing them that any time of day, 7 days a week and in a lot of areas 24 hours a day, You can come to the grocery store and get from, yes, soup to nuts, fresh meats, any amount that you want, processed in any manner that you want; you want it canned, frozen, dried, however; a little bit or a lot of it. But it is for sale.

This society called the United States spends less of its disposable income for food than any other citizen of any other nation in this world. Think about that for a little bit. Here is what we are doing with these programs. We are insuring America that there will always be something in the grocery store. It is only costing you $129 a year. That is not a bad deal.

You look at health and human services, I think something like $172 billion a year. That does not count Social Security that amounts $227 billion; defense $294 billion. And I agree it is important.

It is important. We spend $21 billion for education. We are talking about $11 billion, in this Government, to ensure that those people who know how to make land produce and produce very efficiently can do it. Keep those people on the land. Keep them producing.

Agriculture does not want a welfare program. They want to be able to produce. They want to be able to get their paycheck at the marketplace. They should have that freedom to do so. They should have the freedom to put on an acre of lands whatever they think they can make a profit at. These programs, some of them, do not allow you to do that.

Back to the old story about two good friends of mine; they were two brothers and they used to go down in Mississippi and buy watermelons for 50 cents apiece and haul them all the way back to Montana and sell them for 49 cents apiece. Cecil looked at Leonard and said, "We are not making any money." Leonard said, "I know it. We have to get a bigger truck."

It is not going to happen that way. We cannot do it by volume.

The people who want to limit production on one side are the same people who, for environmental reasons, want to shut it down altogether, production agriculture. That makes it pretty tough.

It is the role of this body, of this Government, the Department of Agriculture, to start taking a look at what their real role is, and that is representing the producer, taking care of those people who produce, and also ensuring this country of a safe supply of food. That is what we are talking about here.

We will kick around a lot of amendments and some of them will mean something. I know I have 16 or 17 here I will be offering. We are still dealing with them. They do not mean much.

But we will make great speeches on how we are going to get the farm vote and all of this.

Basically what we are talking about, America, this is a consumer bill. This is a bill that makes sure you have fiber in the store to protect you against weather. This makes sure you have food in those grocery stores. Because we all use it, most of us more than three times a day. I show the effects of that. Maybe some of us only two times a day. But the first thing we do in this life is eat. You will not miss it until it is not there.

So, as we go down the road and we start talking about this farm bill, do not forget what the priorities are in this Nation. It is the largest industry there is in this Nation. I expect half of all the trucks rolling up and down the interstates have something to do with food and fiber. It is our largest export.

If you want to know how bad our balance of payments could be, just imagine if agriculture was not in the black. We can sell it, but we have to be allowed to sell it. We need policy that allows us to sell it.

If we want to do something for the farmer, let us take a look at the grain standards. If we are going to grow and develop a quality product, let us give our customers a quality product. Take a look at that.

This is a consumer bill. This ensures that we will have food on the table and that it is readily available. Make no mistake about it, America, we are going to pay for this food one way or another.

I venture to say there are a lot of folks in this body, if you gave them a ranch or a farm, they could not make it go. They could not make a profit on it.

I can tell you about the poor times. I was born right in the middle of the Depression; 160 acres, two rocks and some dirt, in northwest Missouri—I will tell you about the hard times, folks. We did not know what ties were, and fancy shirts. But those people hung on, they stayed on their farms and they farmed them and they built a nation, and it was their spirit that did it.

As we look at these bills we can argue about a lot of things, whether they are germane or not germane or whatever. I do not think agriculture is looking for a welfare check. It is unique. We can go into a manufacturing line and they can say—well, take the automobile industry—this model is not selling, shut that line down. This one is, increase that one. Agriculture does not work that way. We cannot turn it on and turn it off in a year's time. It cannot be done. So we need a policy, something that keeps us going, and keeps the people in place that know how to make it produce.

Mr. President, as we look into this, we are not looking at budget busters. Sure, money has to be some sort of constraint. I agree with that. But keep in mind, agriculture has made a commitment to this society and society has made a commitment to agriculture. We do not want to violate that commitment.

As the debate goes on we will be speaking on some amendments and some we will not; some we will oppose and some we will support, and offer our own. But what we have to look at is a Department of Agriculture that truly reflects the desires of the producers and is based on providing a food supply that is healthful, wholesome, and safe.

The PRESIDING OFFICER (Mr. LIEBERMAN). The Chair recognizes the Senator from Vermont [Mr. LEAHY].

Mr. LEAHY. Mr. President, first I thank the distinguished Senator from Indiana [Mr. LUGAR] who has been holding down the fort here, Senator CONRAD of North Dakota, who filled in for me, and Senator BOREN who did prior to Senator CONRAD. I was returning by air to Washington today and got back a little later than I had anticipated. I do want to thank the Senators who helped move the bill along.

I know staff has been working hard throughout the weekend and during the day today to find those amendments that might be cleared for action. I know there is a vote that will occur after 6 today—that is my understanding—on the Reid amendment. I also note there will be other votes tomorrow, beginning with the sugar amendment.

I do not know if there will be more than this one vote tonight. But tomorrow there will be many. It will be very busy. We will be going well into the evening tomorrow because of the nature of those amendments that will be debated and will require rollcall votes.

I say this, Mr. President, to urge any of my colleagues who have amendments they think may receive enthusiastic responses from the managers of the bill, that this might not be a bad time to come over because the traffic situation may be a tad congested tomorrow. Whereas today, it is a pleasant day on the floor; the mood of the managers, while always serious, and always with concern for the best order of the country, is probably in the best frame it will be this week. So I urge my colleagues to come forth and see what happens. The result might be better than it will be tomorrow.

With that, Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LEAHY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2332

(Purpose: To modify the processor-funded milk promotion program)

Mr. LEAHY. Mr. President, I have an amendment on behalf of Mr. BOSCHWITZ which I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Vermont [Mr. LEAHY], for Mr. BOSCHWITZ, proposes an amendment numbered 2332.

Mr. LEAHY. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 35, line 15, strike "129(b)" and insert "128(b)".

Beginning on page 36, strike line 22 and all that follows through page 38, line 14, and insert the following:

SEC. 124. AUTHORITY TO ISSUE ORDERS.

The Secretary—

On page 39, line 3, strike "126" and insert "125".

On page 39, lines 4 and 5, strike "sections 125(a) and 135" and insert "section 135".

On page 39, line 9, strike "may" and insert "shall".

On page 39, line 15, strike "127" and insert "126".

On page 39, lines 16 and 17, strike "After notice and opportunity for public comment are given," and insert "Not later than 90 days after publication of the proposed order,".

On page 39, line 17, strike "126" and insert "125".

On page 39, line 25, strike "135" and insert "134".

On page 40, line 1, strike "128" and insert "127".

On page 40, line 5, strike "129" and insert "128".

On page 40, strike lines 15 through 25 and insert the following:

(2) SERVICE TO THE ENTIRE INDUSTRY.—In carrying out this subtitle, the Board shall carry out programs and projects that will provide maximum benefit to the fluid milk industry and promote only Class I fluid milk products. The Board shall, to the extent practicable, ensure that advertising coverage in each region is proportionate to the funds collected from each region.

(3) REGIONS.—The Secretary shall establish not less than 10 nor more than 25 regions in order to ensure appropriate geographic representation on the Board.

On page 41, line 4, strike "marketing".

On page 43, line 6, strike "131" and insert "130".

On page 44, line 14, strike "131" and insert "130".

On page 44, line 24, before the period, insert the following: ", except that this subsection shall not preclude the Board from offering its programs and projects for use by commerical parties, under such terms and conditions as the board may prescribe".

On page 50, between lines 12 and 13, insert the following new subsection:

(l) EXEMPTIONS.—The order shall exempt Class I fluid milk products exported from the United States.

On page 50, line 13, strike "(l)" and insert "(m)".

On page 50, line 16, strike "130" and insert "129".

On page 50, strike lines 20 through 25.

On page 51, line 1, strike "(c)" and insert "(b)".

On page 51, line 6, strike "(d)" and insert "(c)".

On page 51, line 17, strike "(e)" and insert "(d)".

On page 51, line 21, strike "(f)" and insert "(e)".

On page 52, line 4, strike "(g)" and insert "(f)".

On page 52, line 8, strike "131" and insert "130".

On page 54, line 4, strike "137(b)" and insert "136(b)".

On page 54, line 6, strike "132" and insert "131".

On page 55, line 20, strike "133" and insert "132".

On page 55, line 21, strike "133" and insert "132".

On page 59, line 1, strike "134" and insert "133".

On page 60, line 9, strike "135" and insert "134".

On page 62, line 1, strike "136" and insert "135".

On page 62, line 10, strike "135(a)" and insert "134(a)".

On page 63, line 2, strike "135" and insert "134".

On page 63, line 4, strike "137" and insert "136".

On page 63, line 11, strike "135(a)" and insert "134(a)".

On page 63, line 20, strike "131(e)" and insert "130(e)".

On page 64, line 2, strike "135" and insert "134".

On page 64, line 4, strike "138" and insert "137".

On page 64, line 22, strike "139" and insert "138".

On page 56, strike lines 13, through 21 and insert the following new paragraph:

(1) CIVIL PENALTIES.—Any person who violates any provision of this subtitle or a regulation issued under this subtitle may be assessed—

(A) a civil penalty by the Secretary of not less than $500 nor more than $5,000 for each such violation; or

(B) in the case of a willful failure or refusal to pay, collect, or remit any assessment or fee duly required of the person under this subtitle or a regulation issued under this subtitle, a civil penalty by the Secretary of not less than $10,000 nor more than $100,000 for each such violation.

Each violation shall be considered as a separate offense.

On page 60, line 22, after "products", insert the following: "represented in the referendum".

On page 63, lines 21 through 24, strike "class I processors voting in the referendum who represent, as determined by the Secretary, 60 percent or more of the volume of class I fluid milk products" and insert "class I processors representing 60 percent or more of the volume of class I fluid milk products represented by the processors voting in the referendum ".

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Minnesota.

The amendment (No. 2332) was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

NOMINATION OF JUDGE SOUTER

Mr. LEAHY. Mr. President, I understand that the President has nominated Judge Souter of the first circuit for a position on the U.S. Supreme Court.

Mr. President, I hope that we will not see a rush of Senators saying that they will vote automatically for him, or automatically vote against him.

I remind my colleagues that we should have a full confirmation hearing where everybody can be heard. The President deserves to have his nominee looked at seriously. If we are going to fulfill the constitutional requirements of advice and consent, then we should be prepared to consider the nomination carefully.

The President will state what he sees as the strong reasons for his nominee. The Senate will consider them, read the opinions the judge wrote both on the New Hampshire Supreme Court and on the First Circuit Court of Appeals, and then honestly make up our minds.

The President has said he did not use litmus tests in selecting this nominee, and the U.S. Senate will not use litmus tests. Instead we will follow the normal constitutional—advice and consent. Senators should listen to the evidence, make up their minds, then declare their positions. Not the other way around.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

FOOD, AGRICULTURE, CONSERVATION, AND TRADE ACT OF 1990

The Senate continued with the consideration of the bill.

Mr. BOSCHWITZ. Mr. President, I have gone through my State of Minnesota many years and have made hundreds of onfarm visits. Starting with the drought in 1988, I did so very systematically. I made 62 onfarm stops that year in 62 different counties throughout our State, all the counties that were affected by the drought.

One of the things that I said as I proceeded along there is that I am going to come back next year, and see whether or not the drought package that we passed was adequate so that you can attend the meeting next year. The drought package that we passed did not enrich the farmer, but nevertheless allowed him to get through what was a very, very difficult year.

It was a sad thing to see the farms and the crisis that occurred that year. What a difference this year is. Minnesota is all in bloom. Minnesota's crops look as beautiful as I have ever seen them. There is a feeling of buoyancy just as there was a feeling of despondency in 1988 when everything was just dry as a bone.

So I had gone from farm to farm back in 1989, and have been back to many of them in 1990. In 1989, and again this year, we talked about the 1990 farm bill. At each stop I would ask, "What do the farmers want? What do they seek in the 1990 farm bill?"

They would, almost without exception say—certainly there were some exceptions, if you get three or four farmers together, they seem to have quite a variety of views—but it really was certainly with a much larger majority than usual that people would say, "Why do you not just continue the 1985 farm bill?"

There were many who felt that in the event this whole procedure of trying to pass a new 5-year farm bill fell upon too great a contention we would indeed just continue the 1985 farm bill. It would have been a very popular act in rural Minnesota, and all of rural America.

What was there about the 1985 farm bill that made it so successful? If there was a very successful element to that farm bill, is that element in the 1990 farm bill?

One of the principal elements that was in the 1985 farm bill was the ability of the Secretary of Agriculture to establish competitive loan rates. Loan rates really are the market floor. Loan rates are the price that the farmer will get in any event. He makes a loan from the Federal Government, and in the event that the market is lower than that loan rate, he simply surrenders the crop to the Government and is excused from repaying the loan and the interest on that loan.

So the loan rate, plus the interest that is accumulated, really is the base of the market. Make that loan rate high, and you will encourage producers to produce more. Make that loan rate high, and you will encourage producers not only in the United States but in other parts of the world. And indeed, the loan rates during my stay in the Senate have often been so high that they began to farm further and further out on the Outback of Australia, closer and closer to the Arctic Circle in Canada. Production increased throughout Europe, and other parts,

particularly in South America. Crops were planted because of the incentive they were given because the world market has a low point. It is the American loan rate.

In the 1985 farm bill the formula was established that the loan rate would be 75 to 85 percent of the market price in the preceding 5 years, taking out the high year and the low year, and averaging the other three.

That is a sensible approach. You have them take out the low year because this might have been a bumper crop that drove down the price. You have to take out the high year because you can have a drought like in 1988 when there was a very short crop when crop prices do not have any semblance of normalcy.

So taking out the high and the low year makes sense.

Averaging the other 3 years makes sense. Then the Secretary of Agriculture can take 75 to 85 percent of that 3-year average, and say that this is the loan rate.

The Secretary of Agriculture has always taken the 75-percent route. In this farm bill there has been a change. The same formula exists, but a minimum, a floor is put in, and that floor is the 1990 loan rate. Even if the Secretary of Agriculture could, under the formula, lower the loan rate under this bill, he could not because there is a floor to the loan rate.

I do not want low prices in agriculture but I want competitive loan rates so that production around the world will not start up, so that our products will be competitive on the world market, and so that the other very fruitful programs, the EEP, the Export Enhancement Program that we instituted in the 1985 farm bill can operate and not be too expensive.

The amendment that I will offer on this farm bill, but will not offer at this moment, is that the loan rates continue to be established as they were under the 1985 farm bill. It is an important amendment. It is at the crux of the success of the 1985 farm bill. As a result it is important that we continue it in this farm bill as well.

The 1985 farm bill is widely regarded in rural America as having been a most successful effort. It alone did not create the return of prosperity to rural America. A good rain very often is more important than the farm bill, and certainly we see now throughout my State and throughout most States that we have good moisture. Without good moisture it almost does not matter what is in the farm bill.

The trade balances in the world are very affected by the economic conditions of many nations. The trade balance of the United States is very much impacted by the rate of exchange of the dollar. When the dollar is very expensive, a farm bill is not enough of a cure. When the dollar is very expensive, then our grains are very expensive and our competitors enter into the picture. But the farm bill is a factor. These other things are factors as well.

The farm bill is an announcement. It announces to all the world what the minimum price of a commodity will be. That is why it is important that the Secretary of Agriculture continue to have the ability to establish a loan rate in a competitive manner.

That is what I will seek to restore to this farm bill, and what I argued for in committee.

The farmer continues to be protected, however, because of the deficiency payments. There is a target price and a loan rate. The difference between them is the deficiency payment.

If the market price goes up, then the deficiency payment is a small one. If the market price hovers around the loan rate, then the deficiency payment can be the entire difference between the loan rate and the target price. Only when the market price goes above the target price does the market reward the farmer. If the market is to reward the farmer, when indeed, we have to have trade throughout the world, and if we are to do that, we have to have competitive loan rates.

So my amendment will, again, return the basic loan rate to the 1985 formula. It will do a couple of other things, as well. It will eliminate the advance Findley payment, which is an interest-free loan, which is designed to make it more difficult for the Secretary of Agriculture to use the Findley adjustment. It will also eliminate the requirement that the Secretary of Agriculture submit a report before using the Findley provision. Finally, it will make marketing loans discretionary rather than mandatory.

Once again, Mr. President, this is a constructive amendment. If we were to go out and ask farmers, "Should we pass a new farm bill?" The vast majority of them would say why fool with a good thing, why fix something that is not broken. The 1985 farm bill has performed so well. It has performed so well, Mr. President, because of the ability to establish competitive loan rates.

So that is an amendment that I will offer. I will offer it tomorrow. I suggest to Senators that they look at a "Dear Colleague" letter that I have sent to their office which outlines this amendment and some other amendments, as well. This will be an amendment that will be well received in rural America, well received by the farmers of our country, and for good reason, Mr. President, because it has worked well in the last 5 years.

I yield the floor.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that I may proceed for not to exceed 6 minutes as in morning business.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered.

The Senator from Minnesota is recognized.

Mr. BOSCHWITZ. I thank the Chair.

(The remarks of Mr. BOSCHWITZ pertaining to the introduction of S. 2889 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. BOSCHWITZ. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. KERREY). Without objection, it is so ordered.

AMENDMENT NO. 2333

(Purpose: To provide for the establishment of a Sustainable Agricultural Research and Education Program.)

Mr. GRASSLEY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Iowa [Mr. GRASSLEY] proposes an amendment numbered 2333.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Beginning on page 732, line 3 all through page 759, line 3 and insert in lieu thereof the following:

"Subtitle C—Sustainable Agricultural Research and Education Program

"SEC. 1461. DEFINITIONS.

"For purposes of this subtitle:

"(1) AGRIBUSINESS.—The term 'agribusiness' includes a producer or organization engaged in an agricultural enterprise with a profit motive.

"(2) EXTENSION.—The term 'extension' shall have the same meaning given to the term by section 1404(7) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3103(7)).

"(3) NONPROFIT ORGANIZATION.—The term 'nonprofit organization' means an organization, group, institute, or institution that—

"(A) has a demonstrated capacity to conduct agricultural research, demonstration, education, or information delivery on sus-

tainable agricultural practices or systems; and

"(B) is exempt from tax under section 501 of the Internal Revenue Code of 1986.

"(4) SECRETARY.—The term 'Secretary' means the Secretary of Agriculture.

"(5) STATE.—The term 'State' means each of the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands of the United States, American Samoa, the Commonwealth of the Northern Mariana Islands, or the Trust Territory of the Pacific Islands.

"(6) STATE AGRICULTURAL EXPERIMENT STATIONS.—The term 'State agricultural experiment stations' shall have the meaning given to the term by section 1404(13) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3101(13)).

"(7) SUSTAINABLE AGRICULTURE.—The term 'sustainable agriculture' means an agricultural system that is economically viable and environmentally sound over short and long terms.

"SEC. 1462. FINDINGS.

"Congress finds that—

"(1) to be sustainable, any system must be environmentally sound and economically profitable over short and long terms;

"(2) highly productive and efficient agricultural systems and sound conservation practices are essential to ensure the long-term agricultural sustainability of farms and ranches in the United States;

"(3) sustainable agriculture can embrace methods included in systems known as alternative, low-input, ridge-, no- and minimum tillage, regenerative, biological, organic, ecological, and conventional agriculture that meets the economic and environmental criteria to achieve short and long term sustainability;

"(4) United States farmers and the nonfarm public want a sustainable agricultural system that will continue through time to be productive and profitable, conserve natural resources, protect the environment, protect the health and safety of agricultural workers, provide safe and ample food and nonfood products, and compete efficiently in global markets;

"(5) improved management of all inputs, increased diversification among enterprises, and increased global understanding are essential to ensure the sustainability of the American agriculture system;

"(6) agricultural research and technology transfer activities of the Secretary (including activities of the Extension Service, the Agricultural Research Service, and the Cooperative State Research Service), State cooperative extension services, land grant and other colleges and universities, and State agricultural experiment stations—

"(A) have contributed greatly to innovation in agriculture; and

"(B) have a continuing role to play in improving agricultural sustainability;

"(7) the annual irretrievable loss of an estimated 3 billion tons of topsoil through wind and water erosion reduces agricultural sustainability;

"(8) farmers and ranchers have demonstrated an interest in participating directly in research and extension efforts, a practice that improves farming methods and benefits research and extension programs;

"(9) many farmers and ranchers are dependent on nonrenewable production inputs and natural resources for agricultural production;

"(10) public funding of a properly planned and balanced agricultural research and education program is essential to improving efficiency in agricultural production and conservation practices; and

"(11) the expansion or redirection, or both, of agricultural research and extension efforts are needed to assist farmers, ranchers, and other persons engaged in agribusiness to—

"(A) improve agricultural sustainability;

"(B) implement soil, water, and energy conservation practices;

"(C) manage chemical, genetic, capital, labor, machinery, and other resources to optimize the economic and environmental results of their operations;

"(D) diversify their enterprises and practices to more effectively manage risk;

"(E) understand and compete in the global economy;

"(F) reduce nonrenewable production inputs when feasible and practicable and optimize the use of onfarm resources; and

"(G) protect the health of farmers, farmworkers, and consumers.

"SEC. 1463. PURPOSES.

"It is the purpose of this subtitle to—

"(1) facilitate and promote scientific investigation and education in order to—

"(A) enhance agricultural sustainability;

"(B) maintain the productivity of land, labor, capital, and technology;

"(C) reduce soil erosion and loss of water and plant nutrients;

"(D) conserve energy and natural resources;

"(E) improve competitiveness of agriculture producers and processors in global (domestic and foreign) markets; and

"(F) protect the health of farmers, farmworkers, and consumers through safe practices that provide safe food; and

"(2) facilitate the conduct of research and extension projects in order to—

"(A) study agricultural production, marketing, and management systems that are located, to the extent practicable, in areas that possess various soil, climatic, and physical characteristics;

"(B) study farms that have been, and will continue to be, managed using farm production practices that rely on a variety of conservation practices;

"(C) take advantage of experience and expertise of farmers and ranchers through their direct participation and leadership in projects;

"(D) promote a partnership between farmers, nonprofit organizations, agribusiness, and public and private research and extension institutions; and

"(E) transfer practical, reliable, and timely information to farmers and ranchers on sustainable farming systems and practices.

"SEC. 1464. INFORMATION ASSESSMENT AND UTILIZATION.

"(a) IN GENERAL.—Subject to section 1468, the Secretary shall inventory and classify by subject matter all studies, reports, and other materials developed by any person or governmental agency with the participation or financial assistance of the Secretary, that could be used to promote the purposes of this subtitle.

"(b) DUTIES.—In carrying out subsection (a), the Secretary shall—

"(1) identify, assess, and classify existing information and research reports that will further the purposes of this subtitle, including information and research relating to—

"(A) production practices;

"(B) marketing strategies for existing products;

"(C) globalization of American agriculture;

"(D) application of sustainable natural ecosystem principles to agroecosystems;

"(E) environmentally sound cropping, livestock, tillage, nutrient management, pest management, water conservation, and alternative energy systems;

"(F) the social, global competitiveness, economic, and environmental effects of alternative production and marketing systems and technologies; and

"(G) the role of public policies and programs in fostering and hindering the purposes of this subtitle;

"(2) identify which of the reports provides useful information and make the useful reports available to farmers and ranchers, and other agribusiness persons; and

"(3) carry out educational programs to facilitate the systematic application of information generated from research.

"SEC. 1465. RESEARCH, EDUCATION, AND TECHNOLOGY TRANSFER PROJECTS.

"(a) IN GENERAL.—Subject to section 1468, in cooperation with Federal and State research and extension agencies and agricultural producers, the Secretary shall conduct such research and education projects as are needed to obtain data, draw conclusions, and demonstrate technologies necessary to promote the purposes of this subtitle. The Secretary shall ensure that—

"(1) the projects are open for public observation at specified times; and

"(2) the Stevenson-Wydler Technology Innovation Act of 1980 (15 U.S.C. 3701 et seq.) is observed in the development and conduct of the projects.

"(b) BROAD REPRESENTATION.—In carrying out subsection (a), the Secretary shall conduct projects and studies in areas that are broadly representative of United States agriculture.

"(c) AREAS OF LAND.—In carrying out subsection (a), the Secretary may conduct research projects involving crops, soils production methods, and weed, insect, and disease pests on individual fields or other areas of land.

"(d) ONFARM RESEARCH.—In carrying out subsection (a), the Secretary shall conduct onfarm research.

"(e) STUDIES.—In carrying out subsection (a), the Secretary shall conduct studies on the national and regional economic, global competitiveness, and social and environmental implications of adoption of sustainable agriculture systems and practices.

"(f) SEQUENCE OF CROPS.—In the case of a research project conducted under this section that involves the planting of a sequence of crops, the Secretary shall conduct the project for a term that is appropriate to the sequence involved.

"(g) SELECTION OF PROJECTS.—In carrying out subsection (a), the Secretary shall select projects on the basis of the relevance of the project to the purposes of this subtitle, the appropriateness of the design of the project, the feasibility of obtaining the objectives of the project, and the scope of the potential applicability of the findings and outcomes. Priority shall be given to those projects that—

"(1) closely coordinate research and extension programming, including extensive farmer input and feedback and specific plans for making findings readily useable;

"(2) maximize the involvement and cooperation of farmers, including onfarm research and demonstrations;

"(3) involve an interdisciplinary systems approach; and

"(4) involve cooperation between farmers, nonprofit organizations, colleges and universities, agribusinesses, and government agencies.

"(h) NATIONAL INFORMATION AND COMMUNICATION SYSTEM.—In coordination with the Extension Service, State cooperative extension services, private information delivery systems, and farmers, the Secretary may implement a national sustainable agriculture information and communication system using the cooperative extension service to ensure that farmers and ranchers and other agribusiness persons are aware of sources of information identified within section 1464 and projects conducted under this section, including—

"(1) demonstrations of components and systems through field days, tours, workshops, conferences, and short courses; and

"(2) multimedia information sources including publications, videotapes, broadcasts, computer information systems, and other technologies.

"SEC. 1466. COORDINATION.

"(a) IN GENERAL.—The Secretary may—

"(1) establish regional administrative councils that include representatives of—

"(A) the Cooperative State Research Service;

"(B) the Agricultural Research Service;

"(C) the Extension Service and State cooperative extension services;

"(D) State agricultural experiment stations;

"(E) the Soil Conservation Service;

"(F) State Departments of Agriculture;

"(G) nonprofit organizations involved with research, demonstration, education, or information delivery on sustainable agriculture systems and practices;

"(H) farmers utilizing sustainable agriculture systems and practices;

"(I) agribusinesses; and

"(J) other persons knowledgeable about sustainable agriculture and the impact of sustainable agriculture on the environment, the economy, and rural communities;

"(2) establish a national advisory council that includes representatives of—

"(A) the Agricultural Research Service;

"(B) the Agricultural Marketing Service;

"(C) the Farmers Home Administration;

"(D) the Agricultural Cooperative Service;

"(E) the Cooperative State Research Service;

"(F) the Extension Service;

"(G) the State cooperative extension services;

"(H) the State agricultural experiment stations;

"(I) the Soil Conservation Service;

"(J) the Economic Research Service;

"(K) the National Agricultural Library;

"(L) State Departments of Agriculture;

"(M) nonprofit organizations involved with research, demonstration, education, or information delivery on sustainable agriculture systems and practices; and

"(N) farmers utilizing sustainable agriculture systems knowledgeable about sustainable agriculture and the impact of sustainable agriculture on the environment, the economy, and rural communities; and

"(3) in conjunction with the regional administrative councils, develop criteria to identify the individuals, organizations, or other entities capable of assisting the Secretary and the land grant universities in carrying out this subtitle.

"(b) DUTIES OF REGIONAL ADMINISTRATIVE COUNCILS.—The regional administrative councils shall—

"(1) appoint regional technical committees consisting of—

"(A) scientists with expertise in a wide cross-section of disciplines;

"(B) Extension specialists or agents, or both;

"(C) farmers who use sustainable agriculture systems and practices;

"(D) members of nonprofit organizations involved with research, demonstration, education, or information delivery on sustainable agriculture systems and practices;

"(E) agribusiness persons; and

"(F) other persons knowledgeable about sustainable agriculture and the impact of sustainable agriculture on the environment, the economy, and the viability of rural communities;

"(2) promote the program at the regional level;

"(3) recommend goals and criteria for selection of projects within the region;

"(4) review and take action on the recommendations of the technical committee; and

"(5) provide an annual report on funded projects and an evaluation of project activity.

"(c) DUTIES OF TECHNICAL COMMITTEES.—The technical committees established under subsection (b)(1) shall—

"(1) evaluate project proposals;

"(2) submit recommendations for funding; and

"(3) assess further research and education needs.

"(d) DUTIES OF NATIONAL ADVISORY COUNCIL.—The responsibilities of the national advisory council established under subsection (a)(2) shall include—

"(1) promoting the program at the national level;

"(2) advising Department of Agriculture agencies relative to activities funded by the program;

"(3) recommending general procedures for awarding and administering funds within the regions;

"(4) coordinating recommendations for improving the program;

"(5) exploring opportunities for increased integration among programs in sustainable agriculture, water quality, integrated pest management, alternative agriculture, food safety, and other related programs; and

"(6) providing an annual report to the Secretary.

"SEC. 1468. AGREEMENTS.

"The Secretary shall carry out sections 1464 and 1465 through agreements with land-grant colleges or universities, other universities, State agricultural experiment stations, nonprofit organizations, for-profit organizations, or Federal or State governmental entities, that have demonstrated appropriate expertise in agricultural research and technology transfer and in commercialization of new processes and products to and from agriculture.

"SEC. 1469. DISSEMINATION OF DATA.

"The Secretary may—

"(1) make available through the Extension Service and State cooperative extension services and via the outreach of the cooperative extension system through other public and private agencies—

"(A) the information and research reports identified under section 1464; and

"(B) the information and conclusions resulting from any research project conducted under section 1465; and

"(2) otherwise take such steps as are necessary to ensure that the material is made available to the public.

"SEC. 1470. AUTHORIZATION OF APPROPRIATIONS.

"There are authorized to be appropriated each fiscal year up to $40,000,000 to carry out this chapter, to remain available until expended.".

(b) CONFORMING AMENDMENT TO TABLE OF CONTENTS.—The table of contents for subtitle C of title XIV of the Food Security Act of 1985 (Public Law 99-198; 99 Stat. 1359) (as affected by subsection (a) of this section) is amended to read as follows:

"Subtitle C—Sustainable Agricultural Research and Education Program

"Sec. 1461. Definitions.
"Sec. 1462. Findings.
"Sec. 1463. Purposes.
"Sec. 1464. Information assessment and utilization.
"Sec. 1465. Research, education, and technology transfer projects.
"Sec. 1466. Coordination.
"Sec. 1468. Agreements.
"Sec. 1469. Dissemination of data.
"Sec. 1470. Authorization of appropriations.".

Mr. GRASSLEY. Mr. President, this amendment that I propose deals with the subject of the low-input sustainable agriculture subtitle of the legislation that is before us. This amendment deals with a very popular part of the bill, and I know the committee has worked long and hard on this subtitle.

As I offer an amendment that modifies part of the subtitle and only part of the subtitle, I suggest to the Agriculture Committee and to the respective staffs, I commend all efforts toward sustainable agriculture and the promotion of that concept.

I commend particularly the part that includes the National Training Program in sustainable agriculture, the Extension Service Pesticide Application Service, and the biotechnology risk assessment research sections in this legislation. These provisions will help us get to the goals of sustainable agriculture.

I offer an amendment to the research title. Just in case there is any doubt about what my amendment deals with, it deals with just the portion of the bill that is the first chapter of the sustainable agriculture section, and it leaves all of the previous-cited sections I mentioned untouched.

If I were to consider a general categorization of what Senator LEAHY and the Senate Agriculture Committee is trying to do with their legislation, they are very definitely trying to broaden the understanding of sustainable agriculture and encourage it, and legitimately so.

My fear in the approach that is used in this section we are spending a great deal of time preaching to the choir, people who have worked long and hard on the subject of sustainable agriculture, both from the standpoint of people preaching it as well as those

practicing it. And most of the time they are one and the same.

My effort is directed at what to do with all the research that is going to be done. Are we going to be able to involve enough people who are not part of the choir to accomplish our goals of getting a broad base of acceptance of the concept of sustainable agriculture?

As a practicing farmer myself, I have to say I have an awful lot to learn in this whole process of low-input sustainable agriculture. Even though I read and my family reads a great deal about it, we have a long ways to go in practicing the essence of sustainable agriculture. I spend a majority of my time away from the farm, so my son is really the farmer in my family. But whether it is this generation or whether it was his grandfather or great-grandfather, we have all been farmers. I do not pretend to be any different than any of the other Members of this body who can point back to succeeding generations of being involved with agriculture in America. Any of my colleagues could point out the handing down from one generation to another of practices in agriculture. Every one of my colleagues who is involved in agriculture could be talking about crop rotations and the utilization of animal manure for fertilizer as always being part of the farming operation. That is very elementary.

For generations, these principles, which are now referred to as sustainable agriculture, have been among the first farming lessons passed on from one generation to another. Today, we also have the benefits of technology and science in farming. Crop yields have soared with the introduction of chemical fertilizers and pesticides. To a degree, chemicals have reduced the need for traditional crop rotation.

But also we have Government program that lock producers into planting crops on the basis of their given crop base. This has further limited traditional crop rotation. I do not know it is realized as we talk about farm programs here, but there are an awful lot of bureaucratic and political decisions made in Washington, DC. Those decisions put an economic penalty upon farmers practicing some of the things that over a long period of time have been considered very wise decisions in farming. Things that today we would call sustainable agriculture because there is emphasis upon uses other than pesticides and commercial fertilizers.

By overemphasizing a corn base, we have encouraged people to plow up a lot of land that should never have been planted in row crops. Once that corn base is built up and we have not allowed enough flexibility in the farm programs, requiring a planting of every acre to certain specified crops, like corn, to maintain crop bases. In my State, we have discouraged the rotation of crops that are integral to a lot of sustainable agricultural approaches. We must encourage farmers to combine responsible stewardship of natural resources with farm profitability, but we cannot ignore the bottom line in agriculture any more than you can ignore the bottom line in any business.

So that brings me to this amendment. I am concerned that language currently in this farm bill will move sustainable agriculture away from this goal into areas that may dramatically reduce farm productivity through reduction of chemical usage. There is more to sustainable agriculture than reducing chemicals.

In my home State of Iowa, we have a reputation for being leaders in sustainable agriculture. There is even a definition in Iowa law put there, of course, by the legislature. This legal definition reads this way, defining sustainable agriculture:

> Appropriate use of crop and livestock systems and agricultural imports supporting those activities which maintain economic and social viability while preserving the high productivity and quality of Iowa's land.

I feel that the amendment I am offering will help American farmers to achieve these goals set forth in Iowa's legal definition of sustainable agriculture. Both the committee bill and my amendment emphasize the environment, conservation, and ground-water concerns. They both include the establishment of the national sustainable councils on farm research and competitive research programs. Although the differences between the current language and that of my amendment may appear subtle, there are significant differences.

First, the definition chosen for the committee bill emphasizes the reduction of inputs. So I am proposing a definition closer to the definition that has achieved positive results in my State and also a definition suggested by the U.S. Department of Agriculture. Their definition:

> An agricultural system that is economically viable and environmentally sound over the short term and the long term.

I feel strongly that all types of classifications of farming need to be recognized as we work for truly sustainable agriculture using the definition that I have in my amendment.

Sustainable agriculture can and should embrace methods in systems known as alternative, low input, no till, ridge till, minimum tillage, regenerative, biological, organic, ecological, and conventional farming, if those methods meet the economic envirionmental criteria to achieve short- and long-term sustainability.

The committee also included the term "alternative" and "low-input livestock" in their amendment. The committee's reference to this raises a lot of questions in my mind. There is no definition provided in the committee bill of what the committee means by alternative and low-input livestock. For as long as I can recall and as far as I know, long before I even remember, there has been only one kind of livestock farming and they all require the same amount of inputs.

I have a letter from 10 agricultural groups representing the Nation's livestock and poultry producers, including the American Farm Bureau Federation, the American Sheep Industry Association, the National Broiler Council, the National Cattlemen's Association, the National Pork Producers Council, the National Turkey Federation, the United Egg Association, and the United Egg Producers. Their concerns mirror my own.

So I ask unanimous consent, Mr. President, to have printed in the RECORD a copy of this letter that was sent to me.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

JUNE 25, 1990.

Hon. CHARLES GRASSLEY,
U.S. Senate, Hart Senate Office Building, Washington, DC.

DEAR SENATOR GRASSLEY. The 10 national groups signed below, representing the nation's livestock and poultry producers and industries which serve them, are generally supportive of action taken by the Senate Agriculture Committee to increase funding and broaden the scope of U.S. Department of Agriculture research efforts. We fully recognize the need for a strong Farm Bill research title in maintaining a competitive agriculture economy. However, we have several concerns.

In reviewing amendments to traditional research programs and as part of the Senate's intent to increase funding for "sustainable agriculture," we are troubled by language used throughout the bill that implies there is sufficient concern with current livestock and poultry production systems and practices as to need "alternatives" in the pursuit of "animal welfare" or "well-being."

In Title XIV, "Findings," Sec. 1402 (15)(B), page 9, current law is amended by discussing "continuing or increased" efforts under traditional research programs to include ". . . development, of new animal alternatives and alternative animal rearing systems, animal husbandry and welfare . . ."

In the absence of report language describing the Senate's confidence in current production practices, this language does not describe what an "animal alternative" might be, nor why "alternative animal rearing systems, animal husbandry and welfare" would be necessary, unless it is the consensus of the committee that current systems do not adequately address "welfare." The groups signed below strongly disagree if that is the assumption.

Interestingly, there is no similar language under "Purposes" Sec. 1403A, unless under Sec. 1403A (c)(1) page 17, "tak(ing) greater advantage of natural processes and beneficial onfarm biological interactions so as to sustain and enhance interactions for use in agronomic and livestock farm management . . ." is supposed to apply.

We have included the relevant sections from the House Agriculture Committee's version of the research title that we strongly believe show a pragmatic approach to broadened livestock and poultry production research. We urge the Senate to take a similar approach so that behavioral and physiological animal needs are researched in the context of production efficiency and animal well-being. We believe this to be the proper balance of these factors in maintaining producer efficiency and competitiveness.

Similarly, under Subtitle C, Sec. 1461 (a)(F), page 211, in the findings and purposes for sustainable agriculture research, there is now the need to "explore alternative livestock production systems that lead to low-input livestock production * * *" and Sec. 1461(b)(5) that contends one purpose of this research is to "promote animal wellbeing (sic)"

We question why researching "alternative systems" is preferable to studying methods by which current systems can be adapted to sustainable priorities, and why an "alternative" automatically means better animal care, unless the Senate believes current systems somehow ignore "well-being." The fact that under current LISA programs, similar research is already being funded does not mean this section is automatically "harmless."

We urge the Senate to also consider the potential anti-competitive implications of federal research dollars going to demonstration projects conducted on working farms, especially in the context of sustainable agriculture priorities.

Currently, there are producers in every segment of livestock and poultry production involved in the commercial raising of animals marketed as "chemical free" "organic", etc. In many cases, such contemplated demonstration projects—especially if cooperating producers are to be indemnified for any loss due to participation—could create automatic, government subsidized competition for these private producers, individuals who have invested money and time in developing their niche market operations.

We urge the Senate to either indemnify current commercial operators if unfair competition can be documented, or take steps to mitigate potential anti-competitive results of such projects.

Our final concern with the research title as currently drafted is the role of the "nonprofit organizations," both as they are eligible for research dollars and their role on various advisory boards, etc. The statutory definition limits "nonprofit" to only those organizations demonstrating agricultural expertise which qualify as 501(c)(3) organizations under the Inernal Revenue Code of 1986.

A 501(c)(3) is a charitable designation. This restriction is unreasonably narrow, and would preclude any recognized producer organization or trade association from participating either in legitimate research or in the oversight functions described in the program. We strongly urge the Senate to broaden this requirement to include all 501(c) organizations.

Thank you for your consideration of our concerns.

Sincerely,

American Farm Bureau Federation, American Feed Industry Association, American Agri-Women, American Sheep Industry Association, National Broiler Council, National Cattlemen's Association, National Pork Producers Council, National Turkey Federation, United Egg Association, United Egg Producers.

Mr. GRASSLEY. Mr. President, I will also highlight for the immediate concern of my colleagues this statement from the letter.

* * * in the findings and purposes for sustainable agricultural research, there is now the need to "explore alternative livestock production systems that lead to low-input livestock production. . . " and Sec. 1461(b)(5) that contends one purpose of this research is to "promote animal wellbeing (sic)".

The letter goes on to say that "We," meaning the 10 groups that signed the letter:

We question why researching "alternative systems" is preferable to studying methods by which current systems can be adapted to sustainable priorities, and why an "alternative" automatically means better animal care, unless the Senate believes current systems somehow ignore "well-being."

It is not clear what the committee meant. But it is very possible that this can be read into the language since there is not any definition.

Since the beginning of our history, America has often been touted as the land of plenty. Everyone, including farmers, is just now fully understanding the sensitivity of our natural resources, the inter-reaction of everything within the ecosystem, the dependency of one part of it on another.

Obviously, there is more that needs to be done. I do not question that. The committee shows its leadership in the language they brought before us, but I think we need to bring more people under the umbrella. I think we need to make sure that we can involve as many people in the process of all the research possible on sustainable agriculture.

I hope in doing this we understand that no one wants to be told they must radically change how they make their livelihoods, especially when those changes may dramatically reduce their income. So there is a parallel between what changes farmers make and the bottom line of their operation. The process of educating people about low-input sustainable agriculture means bringing them along.

It does not mean only for those who are already sold on the project, making those people more committed to it. They do not have to be more committed to it. I know a lot of people who, for probably a couple decades, have been involved in the movement of sustainable agriculture. They would be the first to admit to you that every year they are learning more, but they are sold on the movement.

I think a problem we have is how do you bring more people into the movement. The thrust of my amendment is to get more people involved so that what has been good for a few thousand people in the United States and good for the entire country will mean more food for the entire country—as we bring more people under that umbrella, to move them along slowly, to change traditional farming practices, to emphasize sustainable agriculture, but to do it in a way that is economically sound.

The approach that I am suggesting will show farmers how they can incorporate alternative methods in their current farming practices that will protect the environment while maintaining their current income; alternatives that allow farmers to maintain our competitive position in the marketplace. In fact, many sustainable practices actually reduce farm input costs while maintaining income levels. That is a worthy goal.

The Federal Government must be more than a mandator of change. It must become an active partner in discovering avenues and workable solutions that allow us to achieve sustainable agriculture, a partner with sensitivity to both the environment and economic ramifications on all facets that make up the agriculture industry. That is in what we ought to be involving the Federal Government. A unified front will evolve from the farming community, the environmental community, and consumers, if the move from conventional practices offers alternatives that maintain high quality and volumes of products in an economically viable manner.

We must remember our success will be mitigated if any one action is not in concert with the efforts of the group. I hope that a unified front will evolve and that a truly sustainable agriculture will become commonplace in all areas of the United States very soon. I hope Senators will join me and many of the national agriculture and commodity organizations in support of this amendment.

I yield the floor.

Mr. LEAHY. Mr. President, I apologize to the Senator from Iowa because I have been in a number of discussions, primarily on the Senate schedule. Has the Senator from Iowa sent his amendment to the desk?

The PRESIDING OFFICER. Yes.

Mr. LEAHY. I thank the Chair.

Mr. President, I have, as the Senator knows, a sense of friendship with the Senator from Iowa. With regard to his amendment, I hope he understands that it does not reflect anything on that friendship when I must say I oppose his amendment. I might also say that I suspect that the Senator from Iowa is probably not taken by surprise.

We have worked very hard on the issue of sustainable agriculture. The committee met a number of times, the staff has met, and individual Senators have met to forge a compromise on sustainable agriculture with which we could feel comfortable to pass out of committee.

The proponents of sustainable agriculture and those who have reservations about it each had to compromise to get where we are now. The amendment of the distinguished Senator from Iowa would give too much to the opponents. It would take out some major new initiatives that we have included in the farm bill.

The farm bill includes a new program to assist States in developing sustainable agricultural programs through Federal-State matching grants. It is my understanding that the amendment of the distinguished Senator would delete this program. The bill also includes the requirement to develop technical guides for farmers in order to provide them with the latest information on sustainable agriculture with this amendment. That, too, would be gone.

In the bill, we also have a definition of sustainable agriculture developed by the National Academy of Sciences. I think it is a good definition. It includes lower chemical use, which is deleted by this amendment. It is replaced with vague language that ignores the chemical question in farming. That is not what farmers want.

The Farm Bureau released a survey last week. They found that 78 percent of farmers support research leading to reduced pesticide use. Three out of four farmers, in fact, think that too many chemicals are used on U.S. farms. We have gone over this title very carefully, Mr. President. The language was developed by a broad coalition. It had representatives of the Department of Agriculture, sustainable agricultural groups, farmers, environmental organizations and others. The final language in the committee bill reflects countless hours of negotiation. The distinguished Presiding Officer of the Senate was included in those negotiations. Other Senators on the floor—the Senator from Indiana, the Senator from North Dakota, the Senator from Alabama and others who were on the floor were also a part of the negotiations.

Let me talk about some of the compromises. We made adjustments to the definition of sustainable agriculture that retained the low input language in the National Academy of Sciences definition for the research component of the title, substituting more general language for the extension service training section.

We are really talking about a research program. We are not requiring farmers to do things that they do not want to do. We are authorizing research to provide farmers with the information they seek to farm without harm to their health, to their children's health, to the environment, or to their own pocketbooks.

I do not think there is anything controversial about the committee's approach. I would also mention that we worked on this title hearings and meetings, but now we see that we have a 17-page substitute for an entire title in the farm bill. There have not been any hearings on this amendment. There has not been any debate, and there has been no compromise. Are we saying that we should take a chapter of the farm bill that has been worked on for months and voted on and just throw it out?

I would hope that we would not do that. I would urge all Members to oppose Senator GRASSLEY's proposal, and support the committee bill that Senator LUGAR and I worked carefully to craft.

Mr. HEFLIN addressed the Chair.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. HEFLIN. Mr. President, I want to speak in opposition to the Reid amendment dealing with the Consumer Products Safe Testing Act. It is my understanding that the U.S. Public Health Service, including the Food and Drug Administration, the Environmental Protection Agency, the National Academy of Sciences, and Congressional Office of Technology Assessment, and the Society of Toxicology all agree that now and for the foreseeable future the use of laboratory animals is an essential element of product safety evaluation.

This amendment would require all Federal agencies involved in regulating safety testing of any product, be it drugs, pesticides, chemicals, cosmetics, households or other products to promulgate rules mandating nonanimal tests be used instead of animal tests unless it can be proven in limited cases the nonanimal test is less valid.

I believe we all agree that the best available scientific methods should be used to assure public health and safety. The Commerce, Science, and Transportation Committee has a responsibility pertaining to Senator REID's proposal but has not made a report. Because it sounds as though we have significant conflicting opinions on the advisability of approving a major policy change of this type, I urge that Senator REID's amendment be tabled until such time as we have a recommendation from the Commerce Committee.

I yield the floor.

Mr. LUGAR addressed the Chair.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Mr. President, I will speak in support of the Grassley substitute on sustainable agricultural research. I do so mindful of the points our chairman has made that this is an area that the committee has discussed at some length, and able staff on both sides of the aisle have been involved in a number of compromises.

The language in the bill that Senator GRASSLEY seeks to change with this substitute, the language we have now, is a reasonable set of propositions. But I support the Grassley substitute not only because I support the thinking of the distinguished Senator from Iowa but the substitute is substantially the language that I offered originally in a comprehensive farm bill. Further the chapter of my bill that dealt with this subject is in fact the basis of the Grassley amendment.

So it is only logical that I would see value in that language, and I want to support it once again recognizing that a great, great deal of work has proceeded in the current legislation.

Many in the Department of Agriculture, farmers outside the department, agriculture scientists, extension field agents, many of my colleagues on the committee and in the Senate believe that "low-input" sustainable agriculture is only a part of the direction that production agricultural research needs to explore.

"Input efficient" agriculture is the goal that needs to be achieved. I underline that point, Mr. Chairman. It is input efficiency that we need to be emphasizing, not low-input per se, or necessarily an overall reduction of inputs.

Many farmers, consumers, and members of the agriculture science community, have reservations about low-input sustainable agricultural research as it currently stands. In many cases low-input farmers are not reducing their inputs. They are exchanging one input for another.

For example, a low-input farmer may use less herbicides to control weeds but then perhaps till more often using more fuel and mechanical expense, and increasing the chance of soil erosion.

This is simply using more efficient inputs that are available at the time and with less expense. The most efficient use of inputs is the goal that science and farmers are trying to achieve and the goal the Grassley sustainable substitute proposes.

Unfortunately the low input research directives as written in the research title, suggest that producers must "reduce" inputs to be sustainable. But sustainable agriculture is much more. It involves efficient use of inputs while maintaining productivity.

Sustainable agriculture is not a new science or even a new philosophy. Rather, sustainable agriculture is a collection of various farming practices that have been used in conventional agriculture on a site-specific basis for decades. Sustainable agriculture focuses on farming practices such as crop rotation, nutrient management, integrated pest management, conservation tillage, and crop variety selection, all recommended components of conventional agriculture.

I support sustainable agriculture. I agree that agriculture must be sustain-

able not only for our soil, water, and natural resources but also for our consumers and farmers.

The Grassley subsitute realizes that important concept, allowing researchers and producers the flexibility to make the most efficient use of inputs, whether commercial or organic—I underline that, "whether commercial or organic"—so that the best economic, agronomic, and environmental results can be achieved from those mixtures.

Sustainability is a goal that our Nation's agriculture production system can and must achieve. But keep in mind it must not stop there. Agriculture's challenge is not only to produce as much as it does today more efficiently; the challenge has been and will continue to be to produce more with less tomorrow.

Since 1945, agriculture production activity in this country has grown 230 percent. Allowing Americans to use only 12 percent of their disposable income for food and the remainder for housing, clothing, automobiles, education, and possessions makes our Nation's standard of living one of the highest, if not the highest, in the world.

The same agriculture productivity that has been asked to feed the world's 1.2 billion people today, and will be asked to feed the planet's estimated 10 billion people in the year 2025, is in fact the product of sustainable agriculture. To feed those 10 billion people, American agriculture cannot be content with sustaining just current production levels. Sustainable agriculture is not a alternative to conventional agriculture, it is a part of conventional agriculture that will help guide the most efficient use of chemical and organic inputs to minimize soil and water contamination, while at the same time increasing productivity and farmer profitability.

In summary, Mr. President, the differences between the Grassley substitute—the amendment we are considering—and the existing language in the bill before us, are very subtle, but they are important. I will try to underline them for the consideration of my collegues.

The Grassley amendment prioritizes sustainable agriculture as an economically viable and environmentally sound system which can include a reduction of inputs—it can include a reduction—but it is primarily focusing on maintaining the farm productivity and competitiveness that we have come to value.

The existing language in the bill defines sustainable agriculture as a reduction of inputs—and there the emphasis lies on "reduction of inputs," as well as including low-input livestock and alternative production systems.

The Grassley amendment would remove references to low-input livestock and production systems that promote animal well-being, and includes low input as part of a sustainable agricultural method.

Therefore, Mr. President, subtle though it may be, there is a difference. Let me simply state that I appreciate the emphasis on lowering the use of inputs. By and large, the tough time that agriculture in America has faced in the past 8 years has required farmers to take a look at each input very carefully, to measure out the dollars required for putting that input into the mix of an agricultural operation.

So I value the idea of economy. And I believe—as the chairman pointed out—American farmers are very thoughtful about the use of fertilizers and pesticides, and any other purchased inputs. They have to be, if they are to be successful and stay alive in the agricultural situation.

But having said that, there is value in limiting input, and that is not the emphasis that I place least upon our agricultural future. I look at sustainable as meaning a reduction of inputs, wherever possible and wherever useful, but only as a part of a combination of those things which are found to be conventionally successful. As we have boosted agricultural productivity by almost three times in only four decades, we are challenged to do that in the future.

We are not talking strictly about an agricultural picture of our own, we are talking about leadership in which literally we have the basis to feed the hungry of the world for many years to come, as we reduce at the same time that portion of our own gross national product that is used for food and allow our standard of living to continue to grow, as has been our history.

For these reasons, I support the amendment of the distinguished Senator from Iowa, even while recognizing the very great value of the language for which this substitute is offered.

I yield the floor.

The PRESIDING OFFICER. Is there further debate on the amendment?

Mr. DASCHLE addressed the Chair.

The PRESIDING OFFICER. The Senator from South Dakota is recognized.

Mr. DASCHLE. Mr. President, I rise in opposition to the amendment. I do so with great respect for the author. He and I have been on the same side of a number of farm issues, and it is with some reluctance that I rise at all. But I must say I share the views expressed by the chairman of the committee, the manager of the bill, that the current language is a compromise. I say, in addition, the manager on the other side has made a number of very good points that no one can dispute. He is right in many of the comments he made in defense of the amendment.

So every one understands what the amendment does, the amendment eliminates, for all intents and purposes, our opportunity to devote research to sustainable agriculture. We have a $1.2 billion research budget in this year's farm bill. $4.5 million dollars of that $1.2 billion is dedicated to sustainable agriculture. That is, fourtenths of 1 percent of the entire research budget is devoted to sustainable agriculture. That is hardly an amount which threatens research and production methods, which rely upon more intensive chemical applications.

Let there be no mistake, I do not think anybody on the committee says that somehow this year there ought to be a watershed, the change in direction we make with regard to research in productive agriculture. We understand the importance of traditional agricultural methods. We understand the need to continue to move in the direction we have for many years, but we also understand that there are things that are changing in agriculture today.

There is a realization that we need a lot more information than we have had in the past. As we look to the next 5 years, many of the questions that are being raised today simply cannot be answered, given the kind of information we have available to us within the Department of Agriculture or, frankly, anywhere else.

As we are called upon to make policy, as we are called upon to make some decisions here in the Senate with regard to the direction we take in productive agriculture, this minor amount of money, this four-tenths of 1 percent could be some of the best research investment that we are going to make in the entire $12 billion research budget this year.

So it eliminates the goal of reducing chemical application for farming, and eliminates the Federal-State matching programs designed to help States promote sustainable agriculture.

And just so everyone understands, the Farm Bureau recently did a poll asking its members, "What do you think about the need for research in sustainable agriculture? Do you think it is an important goal?" More than 78 percent, three-fourths of those who responded, said there ought to be a research program for sustainable agriculture; there ought to be an opportunity to get the information necessary; there ought to be the kind of minute budget that we have in research this year to give us the facts and to give us the flexibility.

If we are talking about flexibility in agriculture, if we are talking about an opportunity to apply new techniques to ensure that farmers have greater flexibility in the future, then clearly this minuscule amount of money is

one of the best investments we can make.

The legislation before us provides that. That is, the farm bill itself provides us with that flexibility. It provides an option of using the guidelines set forth by the National Academy of Sciences here. It does not mandate that anybody use that.

I am simply giving the opportunity for them to avail themselves of this research program. Nobody is mandated to do anything. I hope as we consider what this small program can do, when we consider what small amount of money it actually means in the research budget, when we consider the need for maximum flexibility, then certainly we have to consider this amendment, as well intended as I know the Senator from Iowa is in offering it, as one that simply does not merit the support of the majority of the Senate. So I urge at the appropriate time the amendment be defeated.

I yield the floor.

The PRESIDING OFFICER (Mr. GRAHAM). The Senator from Iowa.

Mr. GRASSLEY. Mr. President, I would like to ask the Senator from South Dakota not in the form of a question but just to consider in opposition to one statement he made about the elimination of the research. We specifically on page 9, line 4, establish research education and technology transfer projects. We also have $40 million in our amendment just as in the original bill.

I think the key thing you want to remember about our approach is the use of the Extension Service well grounded in every county in the United States for the dissemination of information. I know that there is a very good organization of people in low-input agriculture trying to get their information out. I think they do a pretty good job of it.

If the intention of the committee's bill is to help them get their information out even better than they are presently doing, I do not find fault with that. That is a very worthy goal.

But how can you deny that the Extension Service, of all the organizations in rural America, is better prepared to get information disseminated than any other organization? It seems to me like we ought to take that strong and rural America and build on it, and that is what my amendment does.

Also, I wish to make very clear the organizations in low input agriculture in trying to get their information out. Just this summer in my State several of these farmers held field days where people from all over the State of Iowa or I guess from any place that could come on a specific day on a specific farm and see how low-input agriculture was working on that specific farming operation. These were staggered in different parts of the State on a different day. So that any farmers who wanted to take advantage of seeing what was involved could actually see demonstrations. I appreciate that.

But you cannot beat the Extension Service for disseminating information as well. I think we ought to make use of that.

Mr. DASCHLE. Mr. President, will the Senator yield?

Mr. GRASSLEY. I am glad to stop and listen to the Senator's point of view, Mr. President, or even glad to respond to a question.

The PRESIDING OFFICER. The Senator from Iowa yields to the Senator from South Dakota.

Mr. DASCHLE. Mr. President, I apologize for interrupting. I only say this. I think I am after the same thing. I want to be sure we understand one another as we discuss the Extension Service. The Extension Service is authorized in the legislation to utilize the broad definition of sustainable agriculture as it applies to research authority as on page 760 of the bill it says:

> The Secretary shall establish a National Training Program in Sustainable Agriculture to provide education and training for Extension Service agents and other professionals involved in the education and transfer of technical information concerning sustainable agriculture to develop understanding, competence, and ability to teach and communicate the concepts of sustainable agriculture to Extension Service agents and to farmers and urban residents needing information on sustainable agriculture systems.

The point the distinguished Senator from Iowa makes is a good one. No one is more qualified to provide better information on a broad range of agricultural techniques than is the Extension Service. Clearly in the bill, and I do not know how much clearer we can make it, we designate the authority to utilize this program to the very people that he and I both agree ought to have this responsibility.

I thank the Senator for yielding.

Mr. GRASSLEY. Again, Mr. President, I do not think we have any fight. Part of what the Senator from South Dakota refers to we do not change in our legislation whatsoever. We only change chapter 1. I want to emphasize that. I think the other section he refers to is the Development Technical Guides, which allows anyone to come in and give direction to the Extension Service. We use the Extension Service for the dissemination of this information.

In other words, the Extension Service would do as they traditionally do. My amendment will provide the extension with additional materials and resources.

I think in final analysis, and maybe we are being too friendly here, too appreciative of each other's positions, too respectful of each other's positions on this, and I do not want to detract from that because that is a good environment for us to be working in. However, I sense that when I come along and I include low imput with a lot of other approaches to agriculture, than I am like the skunk at the Sunday afternoon picnic, not very welcome in the debate. I am working to change agriculture, so it is environmentally and economically sound.

No one should understate or have any doubt about my appreciation of alternative agriculture. I will draw just a little bit of a picture, if I could, for the Senator on a farm in Boone County, IA. The Thompsons in Boone County, IA, are very well known in low-input sustainable agriculture. On the occasion of our visiting their farm, as part of a tour that I have every other year I remember particularly 1988 when there was a drought in Iowa. There was only a very small section in the State of Iowa that was not by August 31, very brown all over.

We visited the Thompson farm in Boone County, and it was just like an oasis in the middle of the desert in the sense that everything, without irrigation everthing on the Thompson farm was green and growing when everything else in Iowa was mature and dry because of the drought.

You do not have to be in agriculture to appreciate the fact that that farmer was doing something different than any of his other neighbors for mile after mile after mile.

The difference was low-input sustainable agriculture practices used on his farm, that received no more rain than his neighbor. It was still green because of his farming operations that basically gave the soil the ability to soak up and absorb every inch of rain that fell, and at that particular time there was only about 50 percent of normal rainfall for that year had fallen.

So I hope that Senator LEAHY, any other opponents of my amendment, do not think that those of us supporting this amendment, come in here to gut what the committee is trying to do.

What we are trying to do is get more people involved so that the fruits of the labor of all the missionaries involved in low-input sustainable agriculture will be received and used and have the most benefit from their efforts. And we see the heavy emphasis just upon low input as driving people that would otherwise be interested away, and not encouraging enough farmers to come under the umbrella and not getting the information out as readily as we can through the Extension Service.

Our goal is to see that the research done is received by more farmers than presently being done in low-input sustainable agriculture. When you have organizations like the American Farm

Bureau Federation, American Feed Industry Association, Association of American Agri-Women, American Sheep Industry Association, National Broiler Council, National Cattlemen's Association, the National Pork Producers Council, National Turkey Federation, United Egg Association, United Egg Producers, United Pork Producers, United Cattlemen's Association, and probably a lot of other farming organizations that are interested in this, I hope you understand they speak for a lot of farmers; they appreciate the approach of low-input sustainable agriculture, but they want to be involved with a program that will help disseminate the information and involve more people in the process instead of less people.

I guess maybe the best way to say it is that we want more people brought under the umbrella and not less.

I yield the floor.

Mr. KERREY. Mr. President, I would like to speak on this particular amendment, but I wonder if the distinguished Senator from Iowa will yield for a question or will answer a question in regard to a change that the Senator is apparently making, and I want to make it clear that he is making the change; that I do not quite connect the details of your 17-page amendment with the underlying bill itself.

Mr. GRASSLEY. Mr. President, I will yield.

Mr. KERREY. If you have a copy of the bill.

The PRESIDING OFFICER. The Senator from Iowa has yielded to the Senator from Nebraska.

Mr. KERREY. On page 743 of the bill, it appears where we are talking about the definitions of sustainable agriculture, under part B, as I understand the distinguished Senator from Iowa is concerned about the definitions of sustainable agriculture, and one of the definitions has to be with part B, which is reduction of input, and is referring to the fact that sustainable agriculture is not just reduction in input.

I totally agree with that, that sustainable agriculture is not just an option where you are saying to producers that you must reduce inputs. However, this particular language I find in the current bill to be quite acceptable because it goes on to say it is reduction of inputs with potential to harm significantly the environment or the farmer or the consumer.

And it just seems to me that we are talking about a rather reasonable, broadly defined, as a matter of fact, definition of these inputs, and that we are not proscribing in any way that a farmer must select in all cases, if sustainable agriculture is the alternative used, a farmer must select in any way an automatic reduction of inputs.

I guess the question for the distinguished Senator from Iowa is what do you find objectionable in the language that says:

The reduction in the use of inputs with potential to harm significantly the environment or the health of the farmer and consumer.

Mr. GRASSLEY. Well, it is not just the paragraph that the Senator from Nebraska refers to. It is taken in the whole, the definition. And we want to make sure, as in our definition, a connection is made between the economic benefits and the environmental benefits. It seems to me like that is missing in the definition in the original bill. We want to emphasize a broad range of farming system, not just low inputs but all inputs in the process. That is what we do in our amendment.

Mr. KERREY. It seems to me that it does do more than that. My concern is it narrows it down rather than broadening it. In fact, the amendment itself is restrictive in the definition of inputs. It seems to me in the compromise language that we reached in the bill, we were attempting to make certain we were not going to restrict sustainable agriculture so much that what we were doing was forcing producers who wanted to try sustainable agriculture to always reduce inputs. That is why the definition included the potential to harm significantly the environment or the health of the farmer and consumer.

I would just make some comments about the sustainable agriculture portion of the bill. I find it to be reasonable.

I do appreciate both the arguments that the distinguished Senator from Iowa and the distinguished Senator from Indiana make. Both of those individuals understand production agriculture very well. I do not question that at all.

My concern is that we are getting behind the curve on environmental issues related to agriculture. I have spoken in fact last week with my Farm Bureau representatives who were in town. I have talked to my chemical people in Nebraska as well who were almost vehement at times in their concerns about sustainable agriculture.

One only has to mention the acronym LISA and it produces an immediate response that I am trying to force or mandate someone to use a particular practice when they are farming, when in fact neither the legislation in the farm bill or, for that matter, the amendment the distinguished Senator from Iowa is offering does any such thing.

We are fighting against the clock, I fear. The administration last year when they presented their budget did not provide any funds to sustainable agriculture. They argued that $4.5 million was being spent. Actually,. I believe it is 30 times or so in other programs. They came to a list of other things they designed as sustainable agriculture.

I accept the fact that we are in our budget, particularly in our research areas, as the distinguished Senator from Iowa mentioned, we are spending money on sustainable agriculture and in other areas. But I fear we are getting behind the curve because our consumers out there are not just consumers. They are not just people that are buying large quantities of grain. It is not just the elevators.

Consumers have become customers. And our customers are increasingly concerned about residues in their food. We can say we ought to have only a scientific basis about which we evaluate that concern. But the fact of the matter is most people, when they purchase food, have a significant emotional contact with that purchase. They have emotional involvement. It seems to me that we are playing far more defense on this sustainable agriculture input than is advisable for mainstream agriculture.

I have told the Farm Bureau in Nebraska, as I have told other farm organizations in Nebraska that are concerned about the potential for mandates, that if they want to avoid customers requiring and mandating even more stringent language than we have in this bill, then they need to embrace the sustainable agriculture, make sure it becomes exactly what the Senator from Iowa and the Senator from Indiana are describing, whereby they can learn how to reduce their costs, not have some Federal bureaucracy mandating what they do. To avoid that very mandate, they need to embrace it; make it their own; make sure the extension in fact is provided with the research they need to make a good decision. Typically, they do not have the information available to them.

It is a risky proposition. Any time you change the inputs that you are farming with, it is a risky proposition. You may not get the yields.

It is important, I think, for us to listen, as a consequence of that, to the distinguished Senator from Iowa and the distinguished Senator from Indiana, who understand what it means to be making decisions when you are producing what could be adverse to your capacity to sustain yourselves economically.

We do have the knowledge that sustainable agriculture ought to be first and foremost one of economic sustainability. But those of us who are concerned about production agriculture and providing an environment where it can prosper I think have to say to our producers and farmers who are trying to avoid the mandate that our customers are concerned about environmental sustainability.

They are coming at us increasingly with concern about it, and they are making emotional decisions. I have had an opportunity to get into discussions in the past with producers who say we have to have some scientific way, rather than having these Alar scares and other things like that that might produce a reaction that is adverse to our economic interests.

I urge my colleagues to reject this amendment. I believe the language of the bill itself is altogether reasonable. It contains a significant effort to compromise the concerns that we will be mandating that farmers adopt certain procedures.

I urge, as well, my colleagues to consider that we have a long ways to go, I believe, until we can comfortably say we have reached a balance between legitimate consumers' concerns about environmental conditions and legitimate producers needs to sustain themselves economically on the farm.

The PRESIDING OFFICER. The Senator from Iowa is recognized.

Mr. HARKIN. Mr. President, it is with some reluctance but with firm conviction that I rise to oppose the amendment offered by my colleague and good friend from Iowa.

Mr. CHAFEE. I wonder if, before the Senator starts, I could ask a quick question of the managers of the bill?

Mr. HARKIN. If I can get my time after the Senator is finished, certainly.

Mr. CHAFEE. I thank the Senator from Iowa very much.

Can we get some indication of what the voting situation is here? Originally there were to be no votes on Monday; then there would be some votes on Monday. Here it is 7:30, or close to it, and we have not had our first vote. It would be helpful if somebody could give us an indication of where we are going here, timewise.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. LEAHY. Mr. President, if I hear of anyone giving such an indication I will tell the Senator from Rhode Island immediately, posthaste, with glee and with great satisfaction.

I can take a stab at it, however, and that is to say we have a tabling motion that was put off until after 6 this evening. I believe it is a motion to table made by the distinguished Senator from Indiana of an amendment by the distinguished Senator from Nevada [Mr. REID].

Mr. CHAFEE. That is the Reid amendment which has been debated and is ready for a vote.

Mr. LEAHY. We are now awaiting the Grassley amendment, which also will require a rollcall vote at the completion of the debate on that. There is an effort to bring yet a third amendment up by the distinghished Senator from Maine [Mr. COHEN], which would require a vote.

It is my understanding that the leadership—I speak now of the leadership of the Senate, not of this committee—would like to have those votes go in a row, all three of them. In other words, complete the debate on the Grassley amendment and the debate on the Cohen amendment, and then go to vote on all three.

I wish I could tell my good friend from Rhode Island. I always try to cooperate with those from the Southern States any time I can; we northerners feel that way. I wish I could tell him when it is going to be, but I do not know.

Mr. CHAFEE. Are there any time agreements on either the Grassley amendment or the Cohen amendment?

Mr. LEAHY. No.

Mr. CHAFEE. Is there any chance of getting a time agreement on the Grassley amendment?

Mr. LEAHY. Certainly there is a chance of getting it. I should state neither the Senator from Iowa [Mr. GRASSLEY] nor the Senator from Iowa [Mr. HARKIN] nor the Senator from Vermont nor anybody else involved in this has done anything at all to delay it. I think everybody who has spoken has only spoken really for a matter of a very few minutes.

It is a very important amendment. It is a very complicated amendment, and many people want to speak on it.

Mr. CHAFEE. Do not discourage them from having a time agreement.

Mr. LEAHY. I want to make sure everybody has a chance to speak. But nobody has spoken, really, at length.

I have been up since 4 o'clock this morning. I would like to go home and go to bed; too; go home and have supper; go home and have lunch, even. But we are looking at a while longer.

Mr. CHAFEE. Could somebody ask for a time agreement? I will ask.

Is there any chance for a time agreement?

Mr. LEAHY. If the Senator from Rhode Island will yield yet again, I believe it was Hotspur in the discussion with Glendower, Glendower spoke of calling the "spirits from the vasty deep," saying he could do that. The response was: 'Why, so can I, or so can any man; But will they come when you do call for them?"

So, of course, the Senator from Rhode Island or anybody else is free to ask for a time agreement.

The PRESIDING OFFICER. The Senator from Iowa has yielded to the Senator from Rhode Island for a series of questions to the managers.

Does the Senator from Indiana have further illumination on this issue?

Mr. LUGAR. May I raise a question to the Senator from Rhode Island, if the Chair will allow that? I do not wish to enter beyond where anybody would want to go at this point, but it appears to me the Senator from Rhode Island might have a point. I respectfully ask the chairman of the committee whether perhaps we might ask for a time agreement at this point of 20 minutes more debate, 10 minutes on a side, with a vote on this amendment to follow that 20 minutes?

Mr. LEAHY. I might say, Mr. President, if I can also step in and have the floor, I have no objection to that. We still have the problem with the Cohen amendment, and I hope we might still be able to stack votes. But as far as debate on this is concerned, I would have no objection to such a unanimous consent.

Mr. LUGAR. If the chairman will yield, perhaps during this 20 minutes of time we could clarify the status of the Cohen amendments. Either they will be voted on tonight or they will not be. At the end of that time either we would have two votes or we would go on to the Cohen amendment for debate.

Mr. CHAFEE. Could I make another suggestion to the distinguished managers, since I seem to be on a roll here? I suggest that they suggest to Senator COHEN that he debate his amendment tonight and we vote on it tomorrow. I do not know what the majority leader's views are on all this.

It seems to me we could have two votes tonight, on the Reid amendment and the Grassley amendment—that is a pretty good day's work for a Monday—and go on to the Cohen amendment tomorrow.

As I say, I do not know what the majority leader's views are.

The PRESIDING OFFICER. The Senator from Iowa has the floor. Does the Senator from Rhode Island have any further questions?

Mr. CHAFEE. That completes my suggestions.

Mr. HARKIN. I would like to pick up the cudgel here, if I might. I am willing to put my remarks in the RECORD. It seems that the Grassley amendment has been debated enough. I only have 2 minutes more I would like to speak. I do not know why we cannot vote on the Grassley amendment 5 minutes from now and have a vote on the Reid amendment, which I guess is going to come after that, have a vote on those two and we will be done by 8.

Mr. LEAHY. If the Senator will yield, Mr. President, I ask unanimous consent there be no more than 20 minutes further debate on the Grassley amendment, divided in the usual fashion, 10 minutes to a side, and that no amendments be in order to the Grassley amendment, and reserve the right to a tabling motion, although it is not my intent at this point to do so.

The PRESIDING OFFICER. Is there objection?

Mr. HARKIN. Reserving the right to object, I wonder if the distinguished

chairman would add to that, that as soon as the vote on the Grassley amendment is finished, we proceed immediately without any intervening action, motion, or debate to vote on the Reid amendment.

Mr. LEAHY. Mr. President, if the Senator yields, does he mean to proceed to a vote in relation to the Reid amendment?

Mr. HARKIN. Yes, tabling or whatever it might be.

The PRESIDING OFFICER. The Chair informs the Senator that, based on previous action, immediately upon the vote on the Grassley amendment, we will proceed to vote on a motion to table the Reid amendment.

Mr. LEAHY. With that understanding, Mr. President, I have no objection to that.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request stated by the Senator from Vermont? Without objection, it is so ordered.

Twenty minutes equally divided. Who yields time?

Mr. HARKIN. If I can have a couple of minutes?

The PRESIDING OFFICER. Who yields time?

Mr. LEAHY. I yield such time of my 10 minutes as the Senator from Iowa [Mr. HARKIN] needs.

Mr. HARKIN. Thank you, Mr. President.

I started a few minutes ago. I have worked very closely with Senator GRASSLEY over the years on many matters of importance to agriculture in our State, and I respect his knowledge and judgment on agriculture. However, this amendment represents a step backward for farmers, for agriculture research and agricultural States like Iowa. Farmers have a tremendous interest in ensuring that farming practices they use are safe for themselves, their families, consumers, and the environment.

Last year, I conducted a mail survey of Iowa farmers to learn their views on farm policy. I received over 6,000 responses from Iowa farmers; 93.6 percent of them said they were concerned that some modern farming practices may have harmful effects on human health, the environment, and natural resources; 89.3 percent said they would be willing to change some of their farming practices to help protect and conserve ground and surface waters, soils and other natural resources.

Various other surveys, more scientifically designed than mine, reach the same conclusions.

As a Senator from Iowa these survey results do not surprise me. Because I have watched as farmers themselves have worked to develop farming practices that protect the environment and that maintain productivity, profitability and efficiency.

These farming methods are given various names: Low-input sustainable agriculture [LISA], alternative agriculture, sustainable agriculture. Unfortunately, the labels too often get in the way; to some it may sound like these farmers are radicals, or organic hippie farmers. In truth, these farming methods simply build on the basic knowledge of farming accumulated over the years. It is just that additional considerations, including the environment and cutting costs of production, now receive greater emphasis.

Nowhere are farmers accomplishing more in this effort than in Iowa. One group in Iowa that has done excellent and valuable work is named the Practical Farmers of Iowa. They are so named because their efforts focus on practical, profitable farming methods that are also friendly to the environment. Through onfarm research and demonstrations, they have shown that farmers can both protect the environment, cut costs and improve their bottom line.

In addition, the State of Iowa has taken the lead in research and education on farming methods that are environmentally and economically sound. With the Landmark Ground Water Protection Act of 1987 and the establishment of the Leopold Center at Iowa State University, Iowa is the preeminent State in this kind of research.

Unfortunately, farmers in Iowa and elsewhere have had to develop these farming methods and conduct their own on-farm research with virtually no help from the Federal Government—despite the huge research apparatus at USDA.

At field hearings held by the Agriculture Committee in Iowa—as Chairman LEAHY well knows—farmers said clearly that they need more research, education, and extension on the kinds of farming methods encompassed by this chapter of the bill.

In my survey of Iowa farmers, 49.9 percent of the respondents said they did not have enough information available to evaluate so-called low-input sustainable agriculture practices and adopt some of them on their farms.

That is why I was very pleased to sponsor this legislation with Chairman LEAHY.

So I urge my colleagues not to reverse the progress we have made in this bill, not to stand in the way of the vital agricultural research and education that this bill provides.

I want to reemphasize that farmers are very concerned about the soil, and water, and the environment, and they want to make changes in their farming practices. Quite frankly, though, they are caught on a treadmill. They often do not have the information. They do not have the outreach and the services they need to make wise decisions on how to reduce some of the inputs and how to operate on a more sustainable basis. That is what this bill does and that is what this section of the bill does.

Quite frankly, I do not have too much of a problem with Senator GRASSLEY's changing of the definition. Definitions are definitions. I do not see a lot there that bothers me one way or the other with his definition. But two other parts of Senator GRASSLEY's amendment do bother me and that is, one, it eliminates the Federal-State matching grant program. I think that is most important because we want to encourage and assist in the creation of State-sustainable agriculture research, extension, and education programs to complement those at the Federal level. States may know better what is best for their individual circumstances rather than have the Secretary of Agriculture decide that. That is why we have this Federal-State matching program in the bill. I would hate to see it eliminated. The Grassley amendment eliminates that.

Also, I think it is important to have technical guides available to farmers. The committee bill requires USDA to develop these technical guides that foster sustainable agricultural systems and make the guides available to farmers.

This is an important step in getting the research off the shelf and into the hands of farmers. Again, I point out that the Grassley amendment eliminates this requirement. I think that is unwise.

For those reasons, I will have to oppose the amendment offered by my distinguished colleague.

I have heard some comments about language in the bill stating that one of the purposes of the chapter is to "promote animal well-being." That is, one of the purposes is "to encourage research designed to increase our knowledge concerning agricultural production systems that promote animal well-being."

I have heard some suggestions that this language may promote animal rights and all the animal rights activists. That certainly was not our intention when we put that language in the bill, that language was put in to encourage farmers to help promote the well-being of animals because that will make them more profitable. For example, I think the average now—my colleague can correct me on this; he probably knows it better than I do—but I think the average now is about eight or nine pigs per litter that are saved. I know some farmers who are saving 10 and 11 pigs per litter because of the way they take care of their sows, the way they treat their animals.

A lot of farmers do not have that information. That is what we are seeking to do here, to promote animal well-being so that farmers make more

money from the animals they produce. I want to lay that concern about the language of the bill to rest because I heard some talk that it had to do with animal rights; nothing could be further from the truth.

Mr. President, I just wanted to make those points and to point out why I believe the compromise we worked out and the language we have in the bill is the best we can do. It promotes the Federal-State matching grant program and gets the technical assistance out to the farmers that they need to help them make the wisest and best decisions so that they do not lose money when they want to make changes from the systems they are now using to more sustainable agricultural programs and practices. I yield the floor.

The PRESIDING OFFICER. Who yields time? The Senator from Iowa controls 9 minutes 15 seconds.

Mr. GRASSLEY. I yield myself such time as I may use.

Mr. KOHL. Mr. President, I rise in opposition to this amendment.

As an original cosponsor of S. 2334, the Sustainable Agriculture Research and Education Act, I was pleased to see most of this bill included by the Agriculture Committee in the 1990 farm bill. The Grassley amendment would weaken key provisions of that bill.

The amendment before us eliminates one of the bill's most valuable features—the development by USDA of technical guides to help farmers reduce their agricultural chemical use. Let me explain why these guides are so important.

Earlier this month, the Wisconsin Department of Agriculture proposed a ban on most uses of Atrazine—a popular weed killer—in nine Wisconsin counties. The department took this action in response to the detection of Atrazine in one-third to one-half of the wells tested in these nine counties.

Should this ban become effective, farmers in these counties will have lost their traditional means of controlling weeds. They will need help in developing alternative means of weed control. And that is the purpose of these technical guides—to help farmers adopt less chemically intensive, yet economically viable, farming practices. These guides will become all the more important as States move to ban the use of certain pesticides or fertilizers because of ground water pollution problems.

This amendment also eliminates the bill's Federal-State matching grant program in sustainable agriculture—one of the most cost-effective programs in this legislation. Many States, including the State of Wisconsin, have strong State programs in sustainable agriculture. We would be very foolish not to make use of these State programs to leverage our limited Federal funding in this area.

Mr. President, sooner or later, we are going to have to face the environmental costs of our current agricultural practices. We can either recognize that now, while there is still time to help farmers find alternative, economically viable ways of producing crops—or we can continue to stall, as the Senator from Iowa's amendment would do, which will ultimately hurt the very farmers the Senator seeks to protect. Not offering our farmers the means to adapt to the inevitable—the limitations on chemical use that are already, and will become ever more commonplace—will only cost them money in the long run.

I commend the Agriculture Committee for its foresight in including a strong sustainable agriculture program in this legislation, and urge my colleagues to oppose this amendment.

Mr. President, I yield the floor.

Mr. DOLE. Mr. President, I rise in support of the amendment offered by the distinguished Senator from Iowa, which contains language originally proposed in committee by the distinguished ranking Republican on the Senate Agriculture Committee. This amendment more appropriately addresses the research needs of a modern agriculture which must provide for a rapidly growing world.

The concept of low-input agriculture has generated much debate throughout the farm bill proceedings this year. The bottom line is that most farmers, consumers, and members of the scientific community have justifiable concern about directing the emphasis of research toward a low-input agenda.

The suggested intent of a low-input research initiative seems practical; researching alternative production methods which reduce the need for chemical and other inputs. The emphasis here is on the reduction and potential elimination of certain inputs which some have deemed unnecessary in light of alternative farming practices.

The existing language of the research title misses the mark. The driving force of agricultural research is to increase input efficiency, not the limitation of inputs. Farmers utilize the necessary productive inputs to the extent that they fit their own financial as well as time constraints. If a farmer reduced one input, it is necessary to offset that by a corresponding rise in other inputs. In agriculture, like any other industry, a producer simply cannot reduce his optimum input mix and maintain productivity unless there is a corresponding rise in efficiency. Improving upon that efficiency is the goal of agricultural research, and should not be undermined by an initiative which rejects that basic premise.

The Grassley amendment focuses upon productivity and economic stability. The amendment recognizes that the dominance of American agriculture is based upon our tremendous efficiency and productivity. It is a commonsense approach to the research needs of a modern agriculture. For today's agriculture, we need to focus upon our productive efficiency rather than low-input systems which will be quickly outpaced by a growing world demand.

This amendment will prevent the existing language from establishing a precedent for research which does not provide for the long-term interests of farmers and U.S. agriculture. Our agricultural producers will always be free to try alternative farming practices, but it would be dangerous to mandate that those practices become our primary goal. Limiting inputs is not the answer to future agricultural production, but a continuing effort to expand upon our input efficiency will preserve our preeminence in the field of agriculture.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. GRASSLEY. Mr. President, at this point debate is summary and repetition for people who have just returned to town or started to pay attention to the debate. I will try to summarize my approach, except to comment on one thing my distinguished colleague from Iowa said. It is not that he is wrong, but I do want to emphasize that we have not left States out of this process. He made an accurate statement as to the specific Matching Grant Program. But States are part of the administrative council, so States are a very integral part of the process. Then State organization may make application for a grant as well.

We do not intend to keep States out of the process. They are very much a part of the process. I want to emphasize that because I believe that States ought to be a very important part of the process.

I want to remind my colleagues again of a letter from several farm organizations supportive of this amendment. I want to remind my colleagues the distinguished Republican leader on the Agriculture Committee spoke very eloquently and authoritatively about my amendment, in support of the amendment, and particularly to emphasize what he said, that it was part of his original farm bill that he introduced.

These farm organizations have expressed some concern about chapter 1 of the committee's language, and I emphasize to the body that I am only changing chapter 1. All the rest of the committee's provisions dealing with the sustainable agriculture are left intact. But these organizations have much concern: The American Farm Bureau Associations, the American Feed Industry Association, American

Agri-Women, American Sheep Industry Association, National Broiler Council, National Cattleman's Association, the National Pork Producers Council, the National Turkey Federation, United Egg Association and the United Egg Producers, along with other organizations that have expressed some interest.

Research is important, Mr. President. I do not detract from that emphasis on research, but it is important that the research completed must serve all 2.5 million American farmers, not just a few. So the whole emphasis of my amendment is to bring more farmers into the educational process that is going to come as a result of the education being done under this subtitle.

We need to provide alternatives so that more farmers want to try, and I think in this respect, the committee's approach is just too narrow. My approach broadens it showing farmers how to use alternative tillage methods and lower costs through lowering some inputs. This is all part of the process. But you have to get more farmers involved in that process.

I think the point that needs to be made is that the purpose of this legislation is to research and not to mandate a certain type of agriculture.

I am concerned also about consumer reaction. If we want widespread acceptance of sustainable practices for the consumer, then we are going to have to involve as many farmers as possible and get them interested. Research is important, but it is important that we get as many farmers as possible involved in the process, and that is what my amendment does. If nobody wants to speak and Senator LEAHY wants to yield back his time, I will be glad to yield back my time.

The PRESIDING OFFICER. Who yields time?

Mr. LEAHY. Mr. President, how much time do I have?

The PRESIDING OFFICER. The Senator from Vermont has 48 seconds.

Mr. LEAHY. I will just take 1 minute, Mr. President. That, with all due respect, is a 17-page amendment. It replaces a whole chapter. It would eliminate the research goal of reducing chemical inputs in farming, places very vague language, ignores a research program that farmers throughout this country want. It ignores the ability to do something for those farmers who want to change.

The agriculture bill mandates nothing but at least makes some real alternatives available to people who want low inputs and sustainable agriculture. I hope the Senate will defeat the amendment.

Mr. President, I am prepared to yield back all time if the Senator from Iowa is so willing.

The PRESIDING OFFICER. Is the Senator from Iowa prepared to yield back the remainder of his time?

Mr. GRASSLEY. Yes, I yield back the remainder of my time.

Mr. LEAHY. I yield back time.

The PRESIDING OFFICER. The Senator from Iowa and the Senator from Vermont have yielded back the time. The Chair observes that the yeas and nays have not been requested on this amendment.

Is there further debate?

Mr. GRASSLEY. I ask for the yeas and nays.

The PRESIDING OFFICER. The yeas and nays are requested by the Senator from Iowa. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. MITCHELL. I announce that the Senator from California [Mr. CRANSTON], the Senator from Louisiana [Mr. JOHNSTON], and the Senator from Rhode Island [Mr. PELL] are necessarily absent.

I also announce that the Senator from Maryland [Ms. MIKULSKI] is absent because of illness.

I further announce that, if present and voting, the Senator from Rhode Island [Mr. PELL] would vote "nay."

Mr. DOLE. I announce that the Senator from Utah [Mr. GARN], the Senator from Wyoming [Mr. SIMPSON], and the Senator from California [Mr. WILSON] are necessarily absent.

I further announce that the Senator from South Dakota [Mr. PRESSLER] is absent due to a death in the family.

I further announce that, if present and voting, the Senator from Wyoming [Mr. SIMPSON] would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 32, nays 60, as follows:

[Rollcall Vote No. 164 Leg.]

YEAS—32

Armstrong	Gorton	Murkowski
Bond	Gramm	Nickles
Boschwitz	Grassley	Packwood
Burns	Hatch	Sanford
Coats	Helms	Sasser
Cochran	Lott	Specter
Cohen	Lugar	Stevens
Danforth	Mack	Symms
Dole	McCain	Thurmond
Domenici	McClure	Wallop
Durenberger	McConnell	

NAYS—60

Adams	Burdick	Fowler
Akaka	Byrd	Glenn
Baucus	Chafee	Gore
Bentsen	Conrad	Graham
Biden	D'Amato	Harkin
Bingaman	Daschle	Hatfield
Boren	DeConcini	Heflin
Bradley	Dixon	Heinz
Breaux	Dodd	Hollings
Bryan	Exon	Humphrey
Bumpers	Ford	Inouye
Jeffords	Levin	Robb
Kassebaum	Lieberman	Rockefeller
Kasten	Metzenbaum	Roth
Kennedy	Mitchell	Rudman
Kerrey	Moynihan	Sarbanes
Kerry	Nunn	Shelby
Kohl	Pryor	Simon
Lautenberg	Reid	Warner
Leahy	Riegle	Wirth

NOT VOTING—8

Cranston	Mikulski	Simpson
Garn	Pell	Wilson
Johnston	Pressler	

So the amendment (No. 2333) was rejected.

Mr. LEAHY. I move to reconsider the vote.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

VOTE ON AMENDMENT NO. 2331

The PRESIDING OFFICER. The question is on agreeing to the motion to table the amendment of the Senator from Nevada.

The yeas and nays have been ordered. The clerk will call the roll.

The bill clerk called the roll.

Mr. MITCHELL. I announce that the Senator from California [Mr. CRANSTON], the Senator from Louisiana [Mr. JOHNSTON], the Senator from Georgia [Mr. NUNN], and the Senator from Rhode Island [Mr. PELL] are necessarily absent.

I also announce that the Senator from Maryland [Ms. MIKULSKI] is absent because of illness.

Mr. DOLE. I announce that the Senator from Utah [Mr. GARN], the Senator from Wyoming [Mr. SIMPSON], and the Senator from California [Mr. WILSON] are necessarily absent.

I further announce that the Senator from South Dakota [Mr. PRESSLER] is absent due to a death in the family.

I further announce that, if present and voting, the Senator from Wyoming [Mr. SIMPSON] would vote "yea."

The PRESIDING OFFICER (Mr. BRYAN). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 62, nays 29, as follows:

[Rollcall Vote No. 165 Leg.]

YEAS—62

Armstrong	Exon	Mack
Baucus	Ford	McCain
Bentsen	Glenn	McClure
Bond	Gore	McConnell
Boren	Gorton	Metzenbaum
Boschwitz	Gramm	Murkowski
Breaux	Grassley	Nickles
Bumpers	Harkin	Packwood
Burdick	Hatch	Pryor
Burns	Hatfield	Riegle
Chafee	Heflin	Robb
Coats	Helms	Rockefeller
Cochran	Hollings	Rudman
Conrad	Kassebaum	Sanford
D'Amato	Kasten	Shelby
Danforth	Kennedy	Simon
Daschle	Kerrey	Symms
Dixon	Kerry	Thurmond
Dole	Leahy	Wallop
Domenici	Lott	Warner
Durenberger	Lugar	

NAYS—29

Adams	Fowler	Mitchell
Akaka	Graham	Moynihan
Biden	Heinz	Reid
Bingaman	Humphrey	Roth
Bradley	Inouye	Sarbanes
Bryan	Jeffords	Sasser
Byrd	Kohl	Specter
Cohen	Lautenberg	Stevens
DeConcini	Levin	Wirth
Dodd	Lieberman	

NOT VOTING—9

Cranston	Mikulski	Pressler
Garn	Nunn	Simpson
Johnston	Pell	Wilson

So the motion to table the amendment (No. 2331) was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. MITCHELL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

INDIAN EXTENSION AGENT PROVISION IN THE 1990 FARM BILL

Mr. McCAIN. Mr. President, I would like to express my strong support for the provisions in the 1990 farm bill which reestablishes agricultural extension agents on Indian reservations. In testimony before the Senate Select Committee on Indian Affairs, we heard from tribal witnesses, the Bureau of Indian Affairs, and the Department of Agriculture that agriculture is the largest single contributor to the economic and social well being of the reservation communities. Additionally, tribal governments rely heavily on agricultural enterprises to fund basic government services. Unfortunately, American Indians and Alaska Natives have been largely excluded from the past farm programs due to a multitude of barriers including governmental indifference and statutory barriers.

A joint hearing was held in February of this year, by the Select Committee on Indian Affairs and the Committee on Agriculture, Nutrition, and Forestry which reinforced the critical need for reservation extension agents. The presence of Agents on Indian reservations is the first step in removing the barriers to full Indian participation in national farm programs.

Cooperative extension agents provide the link between new agriculture technologies developed by the land grant colleges and the application of these developments by the Nation's farmers and ranchers. They also serve a liaison function with other USDA programs, such as FmHA, assist in developing farm plans for financial institutions, provide training in farm and ranch business management and recordkeeping, supervise youth activities such as 4-H, and coordinate special training programs such as food storage techniques, nutrition, and subsistence gardening. With the absence of this information flow to the reservations, Indians are falling further and further behind in agriculture technologies.

Reservation residents all too often do not have access to existing county extension agents. The reason most frequently given is that Indian trust lands are not under county and State jurisdiction and therefore do not directly contribute to the county or State tax rolls. This leads to pressures from the local county governments or Agriculture Stabilization Conservation Service boards on the local extension agents to exclude services to Indian farmers and communities.

We have worked closely with Indian tribes and USDA officials to develop a proposal to reestablish agents on the larger Indian reservations which would provide $6.5 million to be earmarked from appropriations for the Department of Agriculture's Extension Service for the reservation extension agents. Authorizing language for this purpose has been included in the research and extension title of the 1990 farm bill. This proposal is not a new idea, in the early 1970's, $10 million was appropriated to the Bureau of Indian Affairs to provide extension services on Indian reservations. Over the years, funding has fallen to slightly more than $400,000 per year, effectively denying extension services to all but a few Indian communities. I believe that the proposal to earmark $6.5 million in the Department of Agriculture for extension services on Indian reservations is extremely modest, but the benefits to our Nation's first citizens will be substantial.

I want to thank my friends, Senator LEAHY and Senator LUGAR for their assistance on this matter. I hope that these provisions of the farm bill mark the beginning of a new era for Indians in the programs of the Department of Agriculture.

FARMER-TO-FARMER PROGRAM

Mr. SIMON. Mr. President, the farm bill we are now considering contains a provision called "Farmer-to-Farmer." It was begun in the 1985 farm bill, and its use was encouraged in the SEED I legislation we passed last year for Poland and Hungary. It's a good program and deserves our support.

The program is administered by VOCA, Volunteers in Overseas Cooperative Assistance, a private voluntary organization that has done outstanding work in 87 developing countries since 1970. Farmer-to-Farmer sends American volunteers to help farmers in Africa, Latin America, Asia and the Middle East—and now Eastern Europe—increase their production and improve their standard of living. The focus is rightly on private farmers.

And here I would like to commend some Illinoisans who have recently participated in Farmer-to-Farmer: Hilmer Albrecht of Sparta, IL, volunteered in Colombia; Armin Grossman of Cambridge, IL, went to Honduras; Roy Harrington of Moline, IL, went to Burundi; Wanda and Leonard Slotkowski of Glen Ellyn, IL, went to Poland; John Temple of Springfield, IL, went to Honduras; Robert Von Der Ohe of Rockford, IL, went to Ecuador; and Ernest Winnings of Monticello, IL, went to the West Bank.

In Poland, for example, 23 volunteers have already lent a hand to help Polish farmers set up private cooperatives and help convert state-owned farms to private farms. In the next year, more than 100 American farmers will go to Poland to help that country shift to a free market economy in agriculture.

I mentioned the Slotkowskis of Glen Ellyn. For many years, they owned the Slotkowski Sausage Co. in Chicago. When they were in Poland, they undertook a feasibility study for establishing a small meatpacking plant. I know that their advice will be put to good use.

Mr. President, I urge my colleagues to support section 209 of title XI of S. 2830 which continues the Farmer-to-Farmer Program and expands its authority to operate in Poland and other East European countries.

MORNING BUSINESS

Mr. MITCHELL. Mr. President, I ask unanimous consent that there be a period for morning business with Senators permitted to speak therein.

The PRESIDING OFFICER. Without objection, it is so ordered.

CIVIL RIGHTS ACT OF 1990

Mr. DOLE. Mr. President, last week, I spent a good deal of time on the floor arguing that the so-called Civil Rights Act of 1990 would distort, not restore, the civil rights vision that has served this country well for more than 25 years. I also argued that the bill would alter the careful balance of title VII by allowing sky's-the-limit jury awards—unlimited compensatory damages, unlimited punitive damages, and unlimited opportunities for the plaintiff's bar to make a killing in the courtroom.

Apparently, I am not alone in this view.

In an op-ed piece appearing in today's Washington Post, Attorney Zachary Fasman points out that lawsuits for compensatory and punitive damages—lawsuits which the so-called Civil Rights Act of 1990 would allow, if not actively encourage—will "benefit no one but lawyers."

Not title VII plaintiffs. Not those who are the real-life victims of employment discrimination.

But the lawyers of this country.

No wonder the American Bar Association put the full weight of its lobbying muscle behind this bill. It could

see the pot of gold beyond the civil rights rainbow.

Mr. Fasman also points out that compensatory and punitive damages will promote litigation, not conciliation and settlement, which has always been one of the fundamental premises underlying title VII.

Mr. Fasman writes that:

An employer's economic incentive to settle is largely destroyed if compensatory and punitive damages become available. Six-figure liability automatically will increase settlement costs in most individual cases beyond the employer's projected litigation costs, and thus employers will have an economic incentive to litigate rather than to settle.

Six-figure liability and endless litigation. That's the Senate's new vision of the civil rights for the 1990's.

Mr. President, I ask unanimous consent that the text of the op-ed be printed in the RECORD at this point in my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

PRACTICAL PROBLEMS OF THE CIVIL RIGHTS ACT

(By Zachary D. Fasman)

The quota issue continues to dominate debate about the Civil Rights Act of 1990, obscuring several serious practical problems presented by the bill. Foremost among these is the proposal to allow compensatory and punitive damages under Title VII of the Civil Rights Act of 1964. The omnibus federal employment discrimination statute, Title VII currently allows monetary relief for economic injuries alone. An employee improperly discharged because of his race can be reinstated to his job and recover lost wages and benefits; a woman wrongfully refused promotion because of her sex can obtain the lost promotion and back pay as well. Neither can recover damages for mental anguish or pain and suffering, nor can either obtain punitive damages. The Civil Rights Act of 1990 would change this, and allow their claims to be tried before a jury rather than before a judge.

This proposal to create a federal tort law system for employment discrimination cases is likely to benefit no one but lawyers. Authorizing recovery of compensatory and punitive damages will lead to a dramatic increase in Title VII litigation, with accompanying judicial delays. At present, Title VII emphasizes obtaining full economic redress quickly and without litigation. Discrimination charges must be filed promptly, the Equal Employment Opportunity Commission is supposed to investigate expeditiously and if reasonable cause exists to believe that the statute has been violated, the EEOC must attempt to conciliate prior to suit.

Early in the process, even full recompense for an employee's economic injury is relatively slight in comparison to the employer's projected litigation costs, to say nothing of the plaintiff's legal fees that the employer will incur in the event of a loss. While some cases involve matters of principle, most cases are resolved early in the process because the employer has strong economic incentives to settle rather than to litigate.

An employer's economic incentive to settle is largely destroyed if compensatory and punitive damages become available. Experience in state worngful discharge litigation reveals that compensatory and punitive damage awards regularly average in the hundreds of thousands of dollars. Six-figure liability automatically will increase settlement costs in most individual cases beyond the employer's projected litigation costs, and thus employers will have an economic incentive to litigate rather than settle. In cases where an employer believes he has a reasonable chance of prevailing, the proverbial reasonable person would choose litigation on the basis of economics alone contrary to the current situation.

Such an increase in litigation is not justified by the claim that Title VII remedies are inadequate. Title VII's remedial structure certainly is not unique. Congress repeatedly has concluded that employment principally is an economic relationship and that employment injuries do not require tort remedies. Almost every federal statute addressed specifically to the employment relationship—the National Labor Relations Act and ERISA spring to mind—provides relief for economic injuries alone rather than pain and suffering or punitive damages. These statutes, like Title VII, long have been regarded as successful. The multimillion-dollar Title VII class actions that have resulted in redesign of so many employment pracitces have not required the enhanced remedial scheme envisioned by the Civil Rights Act of 1990.

Our tort system, long renowned for its unfairness and glacial pace, has little to recommend it in employment discrimination cases. It is ironic that a majority of the Senate and at least 180 representatives apparently support creating a new federal tort system for employment discrimination cases at the same time that legislators on both the federal and state levels actively are seeking alternatives to the tort system itself in areas such as products liability and medical malpractice.

This irony is even more pronounced given the increasing congestion in the federal courts, evidenced by the recent Report of the Federal Courts Study Commission, which concluded that the "recent surge in federal criminal trials . . . is preventing federal judges in major metropolitan areas from scheduling civil trials, especially civil jury trials, of which there is a rapidly growing backlog." That report recommended arbitration rather than federal litigation of individual employment discrimination cases.

Proponents of the Civil Rights Act of 1990 argue that compensatory and punitive damages and jury trials already are available to blacks under the Civil Rights Act of 1866 and that the new law merely seeks to preserve parity among groups by making such remedies available to all victims of employment discrimination. But this argument does not address whether it makes practical sense to extend tort remedies any further. The Civil Rights Act of 1866 initially was extended to employment discrimination by a Supreme Court decision in 1976, more than a century after its passage, and there is no evidence that Congress (either in 1866 or subsequently) ever debated the wisdom of applying the statute to the workplace.

More thoughtful proponents of the bill claim that certain injuries actionable under Title VII have no economic component. In 1986, the Supreme Court held that pervasive racial or sexual harassment in the workplace was actionable under Title VII even absent an economic injury. Shouldn't there be some financial remedy for this conduct?

Perhaps so. But even assuming it is appropriate to create a greater financial remedy for harassment in the workplace, surely this limited lacuna in the law does not justify creating a federal tort system that would apply to almost every employment discrimination case.

That certainly is the purport of this legislation. Courts traditionally distinguish between disparate treatment cases—in which an individual claims to have been treated less favorably because of his race or her sex—and disparate impact cases, which generally involve systemic barriers to equality. The Civil Rights Act of 1990 would provide compensatory relief in all disparate treatment cases, not just those involving egregious intentional misconduct. Thus a run of the mill absenteeism discharge, in which a black or a woman claims that his or her absenteeism record was not as bad as that of another employee who was retained, would fall within the ambit of compensatory relief even though there was no direct evidence of race or sex animus in the workplace. So would broadly based class actions that allege that the employer engages in a "pattern or practice" of discrimination, thus inveigling juries in adjudicating sophisticated statistical issues with millions in compensatory and punitive damages hanging in the balance.

The monumental delays and the inordinate expense involved in litigating such cases before juries are daunting. Only lawyers would want to multiply this type of litigation by making settlements less likely or making it normal to introduce psychiatric testimony attempting to quantify the pain and suffering of an employee who has been discharged. The remedial provisions of the Civil Rights Act of 1990 need to be amended if the bill is to benefit anyone but members of the bar.

Mr. DOLE. Mr. President, an article also appeared in today's Washington Post highlighting the fact that the so-called Civil Rights Act of 1990 has more to do with the "politics of race" than with racial justice and equal opportunity.

According to the article, the bill "may hold pitfalls for Democrats." The article even quotes one Democratic operative as warning that "it's in the best interests of the Democrats to have President Bush sign this bill" to prevent the GOP from "playing the race card."

Well, President Bush does not have a "race card" in his deck, and he does not seek to divide this Nation by playing the cheap game of racial politics.

But the cards are on the table: President Bush will not sign a bill that will force employers to hire by the numbers. And he will not sign a bill that is a lawyers' bonanza, guaranteeing the plaintiffs' bar full employment for decades to come.

As currently drafted, the Civil Rights Act of 1990 is a quota bill, pure and simple, and the American people will not be fooled.

Mr. President, I ask unanimous consent that the text of the article be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, July 23, 1990]

CIVIL RIGHTS BILL MAY HOLD PITFALLS FOR DEMOCRATS

(By Thomas B. Edsall)

While public attention has focused on President Bush's anguish over the Civil Rights Bill of 1990, the legislation highlights one of the difficulties Democratic presidential candidates have experienced in trying to maintain the support of blacks as well as working- and lower-middle-class whites.

"In the long run, the bill could place us in the position once again of choosing between loyal blacks and Reagan Democrats," one Democratic congressional strategist said. "It depends on how the bill plays out and, if it becomes law, how much it is seen as forcing racial preferences."

"It [the 1990 bill] is not a free lunch for Democrats," said Robert Beckel, a Democratic political strategist who, as manager of Walter F. Mondale's 1984 campaign, experienced the full brunt of the defection of once-loyal white Democrats. "It's in the best interests of the Democrats to have Bush sign this bill" to prevent the GOP from "playing the race card," he said.

"Democrats are trying to say to the middle class, 'We care about you. You are our primary concern,'" said Democratic pollster Stan Greenberg. "What affirmative action says is that poor people, disadvantaged minorities, have primacy. That limits the ability of the Democrats to be credible as the party that works for the middle class."

In a series of focus groups held in 1985 in Macomb County—white, working-class suburbs of Detroit once dominated by the Democratic Party—Greenberg found a deep hostility to a Democratic Party seen as favoring blacks. "The special status of blacks is perceived by almost all these individuals as a serious obstacle to their personal advancement," Greenberg said of his findings from the focus groups. "Indeed, discrimination against whites has become a well-assimilated and ready explanation of their status, vulnerability and failures."

Democratic pollster Ed Reilly found similar racial conflict, also working to the severe disadvantage of the Democratic Party, in a post-1988 election study. And in the current election, the opening salvo in the bid of Sen. Pete Wilson (R-Calif.) for the governorship is an attempt to portray Democratic nominee Diane Feinstein as an advocate of racial quotas.

Voters who are moved by the issues of affirmative action and quotas, Beckell said, "are the swing voters, the Central Valley in California, the white working class, the working-class suburbs of Oakland County."

As passed by the Senate and sent to the House last week, the civil rights measure would effectively set federal employment discrimination and affirmative action policy so as to strengthen the hand of employees claiming discrimination. Proponents contend that the measure would not prompt business to hire on the basis of quotas, the charge leveled by some administration officials, conservative groups and much of the business community.

Democratic pollster Harrison Hickman, while arguing that the bill does not pose significant liabilities for the Democratic Party, said Bush has gained control of "the definition of the bill. Any bill he signs will be a civil rights bill and any bill he vetos will be a quota bill."

Polls show blacks and whites are severely divided on the questions of quotas, preferential hiring and special government intervention in behalf of blacks. "When we hold focus groups, if the issue of affirmative action comes up, you can forget the rest of the session. That's all that's going to get talked about," said Natalie Davis, an Alabama Democratic national committeewoman and pollster.

"There is a perception on the part of whites—working-class whites, ethnic groups, white southerners—that the Democratic Party is the party of the blacks," Rep. John Lewis (D-Ga.), who is black, said in an earlier interview. "I think there is in some cases a perception that blacks are taking jobs away . . . making it impossible for white males, working-class whites, to advance, to be promoted."

For blacks, Lewis said, affirmative action "is important. In the black community, people are not prepared to throw that chip in. . . . When it comes to the black community, it's not negotiable."

In private, a number of Democratic strategists noted that the issues of affirmative action and racial preference embodied in the complex language of the 1990 bill have the potential to split the presidential and congressional wings of the Democratic Party.

House Democrats can generally avoid racially polarizing issues by declaring support for civil rights, a position widely backed by the public, one strategist noted. Democratic presidential candidates and the national party, in contrast, are more closely associated with racial preferences and consequently have more to lose from legislative conflicts that draw sharp distinctions between the parties on these issues, he said.

Lewis, a former civil rights leader, described the political problem of affirmative action this way:

"Whites perceive it as a less-qualified black, woman or some other minority getting a position or advancing to a certain level, not because of qualification, but simply because of race—that it is taking something away from them. I think black voters see it as affirming, as compensating for the wrongs of the past, and that is something that society must do. It is a moral obligation."

ROSE KENNEDY: 100 YEARS OF COURAGE AND CONTRIBUTION

Mr. DOLE. Mr. President, every year at this time I am reminded that I share my July 22 birthdate with a very distinguished American, a woman revered for her grace and devotion to family.

I am talking about Rose Kennedy. This weekend, she reached a remarkable milestone with the celebration of her 100th birthday.

As the mother of two U.S. Senators and a President, Mrs. Kennedy has helped make the Kennedy name synonymous with dedication to public service.

Although she has endured terrible personal tragedies that would have buckled most people, Rose Kennedy has done far more than survive. She has remained a buoyant, loving woman of faith and endurance who continues to inspire us all. She is one of America's most remarkable mothers, grandmothers and great grandmothers—and I salute her.

I know all of my colleagues join me in wishing a happy birthday to Rose Kennedy. America admires her century of courage and contribution.

CYPRUS

Mr. D'AMATO. Mr. President, the 20th of July marks the 16th anniversary of the brutal Turkish invasion of Cyprus. Sadly, in this year of great political upheaval and progress, we are no closer to resolving the Cyprus dispute today than we were a year ago. Thirty-five thousand Turkish troops, armed with United States military equipment, continue to illegally occupy Cyprus, while the Turkish Cypriot leader, Mr. Rauf Denktash, continues his unproductive separatist policies. Still, the Greek Cypriots have not given up hope and continue to take steps aimed at benefiting all of Cyprus.

On July 4, the Republic of Cyprus announced that they had applied for full membership to the European Economic Community. This historic step by the Government in Nicosia illustrates its commitment to cooperation, unity and concern for both Greek and Turkish Cypriots, as full membership in the EC will provide long-term political and economic stability for the entire country. I commend Cyprus President George Vassiliou for taking this bold step forward, and encourage the EC to act favorably.

The Turkish Cypriot leadership responded to the EC application in the most irresponsible way. Instead of joining President Vassiliou in this bold step forward, Mr. Denktash threatened to colonize the occupied Greek Cypriot town of Famagusta with Turkish settlers. Famagusta, once a beautiful coastal tourist resort, has been a ghost town since the Turkish invasion of 1974.

Despite numerous calls by the Congress and the entire international community, the Turkish Cypriots have refused to allow the Greek Cypriot inhabitants of Famagusta to return to their homes. In fact, Mr. Denktash's threat to settle Famagusta is contrary to U.N. Security Council Resolution 550 of 1984 which considers any attempts to settle any part of the city by people other than its inhabitants as inadmissible and calls for the transfer of the area to the administration of the United Nations.

Mr. Denktash's threat to settle Famagusta is irresponsible and cannot be tolerated by the Congress. The settlement of Famagusta by Turkish Cypriots will greatly heighten tensions of Cyprus and prolong the current delay in the negotiations. The Congress and the administration must use its best

efforts to see that Mr. Denktash does not act on his threats.

At the same time, we must let the Government in Turkey know that the status quo on Cyprus is unacceptable and that we are serious about resolving the Cyprus dispute. The presence of Turkish troops on Cyprus is intolerable and must end.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Kalbaugh, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the Committee on Agriculture, Nutrition, and Forestry.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

ENROLLED JOINT RESOLUTIONS SIGNED

At 1:35 p.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the Speaker has signed the following enrolled joint resolutions:

S.J. Res. 75. Joint resolution relating to NASA and the International Space Year, and

H.J. Res. 591. Joint resolution designating the third Sunday of August of 1990 as "National Senior Citizens Day."

The enrolled joint resolutions were subsequently signed by the President pro tempore [Mr. BYRD].

At 3:58 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 3468. An act to amend the act entitled "An Act to extend the Wetlands Loan Act," to provide for the expansion of the Stewart B. McKinney National Wildlife Refuge, and

H.R. 5257. An act making appropriations for the Departments of Labor, Health and Human Services, and Education, and related agencies for the fiscal year ending September 30, 1991, and for other purposes.

MEASURES REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated:

H.R. 3468. An act to amend the act entitled "An act to extend the Wetlands Loan Act," to provide for the expansion of the Stewart B. McKinney National Wildlife Refuge; to the Committee on Environment and Public Works, and

H.R. 5257. An act making appropriations for the Departments of Labor, Health and Human Services, and Education, and related agencies for the fiscal year ending September 30, 1991, and for other purposes; to the Committee on Appropriations.

ENROLLED JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that on today, July 23, 1990, he had presented to the President of the United States the following enrolled joint resolution:

S.J. Res. 75. Joint resolution relating to NASA and the International Space Year.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. JOHNSTON, from the Committee on Energy and Natural Resources, with an amendment in the nature of a substitute and an amendment to the title:

S. 639. A bill to establish a Hydrogen Research and Development Program (Rept. No. 101-385).

H.R. 4521. A bill to establish a Hydrogen Research and Development Program (Rept. No. 101-386).

By Mr. HOLLINGS, from the Committee on Commerce, Science, and Transportation, with an amendment in the nature of a substitute:

S. 1067. A bill to provide for a coordinated Federal research program to ensure continued United States leadership in high-performance computing (Rept. No. 101-387).

H.R. 3000. A bill to require that certain fasteners sold in commerce conform to the specifications to which they are represented to be manufactured, to provide for accreditation of laboratories engaged in fastener testing, to require inspection, testing, and certification, in accordance with standardized methods, of fasteners used in critical applications to increase fastener quality and reduce the danger of fastener failure, and for other purposes (Rept. No. 101-388).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. LAUTENBERG (for himself, Mr. KASTEN, Mr. PELL, and Mr. DIXON):

S. 2887. A bill to amend the Caribbean Basin Economic Recovery Act, the generalized system of preferences, and section 301 of the Trade Act of 1974 to require countries to maintain certain environmental standards, and for other purposes; to the Committee on Finance.

By Mr. DASCHLE:

S. 2888. A bill relating to Indian health care; to the Select Committee on Indian Affairs.

By Mr. BOSCHWITZ:

S. 2889. A bill to establish a National Commission charged with considering the causes of the failure of the savings and loan system and to consider proposals to prevent future failures of this type; to the Committee on Banking, Housing, and Urban Affairs.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. MOYNIHAN (for himself, Mr. D'AMATO, Mr. GLENN, Mr. METZENBAUM, Mr. LEVIN, Mr. RIEGLE, Mr. LUGAR, Mr. COATS, Mr. KOHL, Mr. KASTEN, Mr. LAUTENBERG, Mr. JEFFORDS, Mr. LEAHY, Mr. BRADLEY, Mr. SPECTER, Mr. GRASSLEY, Mr. SIMON, Mr. BIDEN, Mr. SARBANES, Mr. BURDICK, Mr. KENNEDY, Mr. KERRY, Mr. DIXON, Mr. CHAFEE, Mr. HEINZ, Mr. PELL, Mr. LIEBERMAN, and Mr. BOSCHWITZ):

S. Res. 312. A resolution to express the sense of the Senate regarding the need to develop a zebra mussel research and control program through the Great Lakes Fishery Commission; to the Committee on Environment and Public Works.

By Mr. KENNEDY (for himself, Mr. SIMON, Mr. PELL, Mr. KERRY, Mrs. KASSEBAUM, Mr. CRANSTON, and Mr. DODD):

S. Con. Res. 141. A concurrent resolution expressing the sense of the Congress regarding the deteriorating human rights situation in Kenya; to the Committee on Foreign Relations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. LAUTENBERG (for himself, Mr. KASTEN, Mr. PELL, and Mr. DIXON):

S. 2887. A bill to amend the Caribbean Basin Economic Recovery Act, the generalized system of preferences, and section 301 of the Trade Act of 1974 to require countries to maintain certain environmental standards, and for other purposes; to the Committee on Finance.

GLOBAL ENVIRONMENTAL PROTECTION AND TRADE EQUITY ACT

● Mr. LAUTENBERG. Mr. President, I rise on behalf of myself, Senator KASTEN, Senator PELL, and Senator DIXON to introduce a revised version of the Global Environmental Protection and Trade Equity Act. This bill is essentially the same as S. 2553, the original bill we introduced on April 23, 1990, but with two technical changes.

The first change is simply the addition of a title for the bill, which we have named the Global Environmental Protection and Trade Equity Act.

The second change makes the bill language reflect our original stated intent that the U.S. Trade Representative be given the option to refuse to pursue a section 301 unfair trade practice case against a polluter country in either of two instances. He or she may decline to pursue a section 301 case if the country accused of unacceptable efforts against pollution is making progress toward achieving effective, generally observed environmental standards, or has environmental standards commensurate with its level of economic development. Due to a

technical drafting error, that option was not provided in the original legislation, although we intended it to be.

I ask unanimous consent that a copy of the revised bill be included following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2887

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Global Environmental Protection and Trade Equity Act".

SEC. 2. CARIBBEAN BASIN.

Section 212(b) of the Caribbean Basin Economic Recovery Act (19 U.S.C. 2702(b)) is amended—

(1) by striking "and" at the end of paragraph (5),

(2) by striking the period at the end of paragraph (6), and inserting "; and",

(3) by inserting immediately after paragraph (6) the following new paragraph:

"(7) if such country does not have effective natural resource protection and effective pollution abatement and control standards to protect air, water, and land or if such country's standards are generally not observed.", and

(4) by striking "and (5)" in the last sentence and inserting "(5), and (7)".

SEC. 3. GENERALIZED SYSTEM OF PREFERENCES.

Section 502(b) of the Trade Act of 1974 (19 U.S.C. 2462(b)) is amended—

(1) by striking "and" at the end of paragraph (6),

(2) by striking the period at the end of paragraph (7), and inserting "; and",

(3) by inserting immediately after paragraph (7) the following new paragraph:

"(8) if such country does not have effective natural resource protection and effective pollution abatement and control standards to protect air, water, and land or if such country's standards are generally not observed.", and

(4) by striking "and (7)" in the last sentence and inserting "(7), and (8)".

SEC. 4. DEFINITION OF UNREASONABLE ACT OR POLICY.

(a) IN GENERAL.—Section 301(d)(3)(B) of the Trade Act of 1974 (19 U.S.C. 2411(d)(3)(B)) is amended—

(1) by striking "or" at the end of clause (ii),

(2) by striking the period at the end of subclause (V) of clause (iii) and inserting ", or", and

(3) by adding at the end of the following new clause:

"(iv) constitutes a failure to establish effective natural resource protection and effective pollution abatement and control standards to protect air, water, and land.".

(b) DETERMINATION BY TRADE REPRESENTATIVE.—Subparagraph (C)(i) of section 301(d)(3) is amended by striking "subparagraph (B)(iii)" each place it appears and inserting "subparagraph (B) (iii) or (iv)".●

By Mr. BOSCHWITZ:

S. 2889. A bill to establish a national commission charged with considering the causes of the failure of the savings and loan system and to consider proposals to prevent future failures of this type; to the Committee on Banking, Housing, and Urban Affairs.

NATIONAL FINANCIAL INSTITUTIONS INQUIRY COMMISSION ACT

Mr. BOSCHWITZ. Mr. President, I rise today to introduce legislation calling for the creation of a National Commission on Savings and Loans. It will be comprised of five persons, and the Commission would be charged with examining the causes of the current crisis in the savings and loan industry, and to consider proposals to prevent future failures of this type.

By now, all of us have heard from constituents who are wondering how the S&L crisis came about. They are entitled to an answer to those queries.

Recently, both political parties have begun pointing fingers to blame one another in order to avoid the political fallout in the upcoming November elections. The American people deserve better than that.

It is for this reason that I have concluded that a national commission, comprised of individuals who understand the financial services industry, should be convened to conduct an objective and scholarly review. Such a review not only can help us gain a better understanding of all of the factors which contributed to the current dilemma but, perhaps even more important, it would help identify similar difficulties yet to be encountered.

By now, we are all generally aware of some of the factors which contributed to the decline of the S&L industry. But allow me briefly to review the history, Mr. President.

As you know, through the 1970's, the thrift industry was highly regulated and very restricted in terms of market opportunities. It was very regulated and restricted as to what it could do. Thrifts were allowed to make long-term mortgage loans and to accept short-term deposits, on which the amount of interest they can pay was limited.

Everything was fine, because housing during the 1950's, 1960's, and 1970's went up in an unabated manner, and so the security of the S&L's was very sound. Interest rates were quite level, so that they were in a position of having to lend long and borrow short, but in the lending long, the interest rates in the marketplace did not exceed even those long-term loans, the interest on those long-term loans.

When the Nation was hit with record inflation and skyrocketing interest rates, thrifts found themselves unable to compete. As interest rates rose, depositors pulled their money out of S&L's and put their money into money market funds and other investments paying much higher returns. We had what we spoke about at that time as disintermediation of money flight from the S&L's.

In 1980, fearing a collapse of the thrift industry, Congress passed legislation to deregulate the industry. Among other things, the legislation phased out interest rate limits on deposits, permitted thrifts to engage in new banking services, and raised deposit insurance levels from $40,000 to $100,000. We look back on some of that stuff, we regret it, but at that time, it seemed the right thing to do.

In spite of this legislative effort, most savings and loans continued to lose money, though they lost less than they did before. While thrifts were free to pay market interest rates on deposits, long-term notes paid relatively low rates.

During the period, the Nation's thrifts lost nearly two-thirds of their capital base. In response, Congress adopted new legislative remedies, giving thrift regulators expanded authority over troubled thrifts, but also allowing federally chartered thrifts to make loans in new and unfamiliar areas.

At almost the same time, a number of States—particularly those in the Southwest, such as Texas—granted their State-chartered thrifts broader powers, including the authority to make direct equity investments. In hindsight, this action may have been the most significant one in terms of the losses which have occurred thus far.

By 1987, it was clear we were not out of the woods. Thrifts were still losing money. It was estimated that between $16 billion and $27 billion in taxpayer assistance was going to be necessary to keep the thrift insurance fund solvent. The Reagan administration requested $15 billion to shut down insolvent S&L's. Unfortunately, both the House and Senate Banking Committees were unwilling to meet the administration's request. Finally, after months of delay, a $10 billion recapitalization plan was adopted by Congress.

Frankly, all of the changes I have described above probably were factors in creating the crisis in the thrift industry. It is my sincere hope that a panel of experts can help us sift through the evidence, not so much to assign blame as to help us understand where we could have acted differently and, more important, what policies should be adopted to keep a crisis of this magnitude from recurring.

I urge my colleagues to carefully consider my proposal. I plan to offer it as an amendment to the next piece of banking legislation considered by the Senate. I welcome the support and cosponsorship of my colleagues.

Mr. President, I ask unanimous consent that my bill be printed in the RECORD in its entirety.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

39-059 O-91-17 (Pt. 13)

S. 2889

Be it enacted by Senate and the House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Financial Institutions Inquiry Commission Act."

ESTABLISHMENT

SECTION 1. There is established the National Commission on Savings and Loans.

DUTIES OF THE COMMISSION

SEC. 2. (a) The Commission shall—

(1) advise the Congress, the President, and Federal agencies on policies and programs which may have contributed to the problems in the savings and loan industry and such policies and programs which may be needed to prevent future problems of this type.

(2) prepare the report required by subsection (b).

(b) Within 6 month after the date of enactment of this Act, the Commission shall prepare and transmit to the President and the Congress a report describing the activities of the Commission and containing such recommendations as the Commission considers appropriate for legislative and administrative actions.

MEMBERSHIP OF THE COMMISSION

SEC. 3. (a) The Commission membership shall be determined in the following manner: the Speaker of the House of Representatives, the Majority Leader of the Senate and the Minority Leaders of the House and of the Senate shall each be allowed to select one member. The President of the United States shall select the final member who shall serve as the Commission Chairman.

(b)(1) The members of the Commission described in subsection (a) shall be appointed within 30 days after the date of enactment of this Act.

(2) In appointing members of the Commission under subsection (a), the President and the leadership of the House and the Senate shall ensure that the members of the Commission have knowledge and technical expertise in the areas of responsibility specified for the Commission.

(c) A vacancy in the Commission shall be filled in the same manner as the original appointment was made. A vacancy in the Commission shall not affect its powers.

(d) Except as provided in paragraph (2), members shall be appointed for the life of the Commission.

(e) Three members of the Commission shall constitute a quorum, but a lesser number may hold hearings.

(f) The Commission shall hold its first meeting on a date specified by the President, which shall not be later than 60 days after the date of enactment of this Act. Thereafter, the Commission shall meet at the call of the Chairman or a majority of its members, but shall meet at least three times during the life of the Commission.

(g)(1) Each member of the Commission shall be compensated at a rate equal to the daily equivalent of the annual rate of basic pay prescribed for grade GS-18 of the General Schedule under section 5332 of title 2, United States Code, for each day (including travel time) during which such member is engaged in the actual performance of duties as a member of the Commission. Each member of the Commission who is an officer or employee of the United States shall receive no additional compensation.

(2) While away from their homes or regular places of business in the performance of duties for the Commission, all members of the Commission shall be allowed travel expenses, including per diem in lieu of subsistence, at the rates authorized for employees of agencies under sections 5702 and 5703 of title 5, United States Code.

DIRECTOR AND STAFF AND COMMISSION

SEC. 4. (a) The Commission shall appoint an Executive Director who shall be compensated at a rate not to exceed the rate of basic pay prescribed for level V of the Executive Schedule under section 5316 of title 5, United States Code.

(b) With the approval of the Commission, the Executive Director may appoint and fix the compensation of such additional personnel as the Executive Director considers necessary to carry out the duties of the Commission.

(c) The Executive Director and the additional personnel of he Commission referred to in subsection (b) may be appointed without regard to the provisions of title 5, United States code, governing appointments in the competitive service, and may be paid without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classifications and General Schedule pay rates.

(d) Subject to such rules as may be prescribed by the Commission, the Executive Director may procure temporary or intermittent services under section 3109(b) of title 5, United States Code, at rates for individuals not to exceed $200 per day.

(e) Upon request of the Commission, the head of any Federal agency is authorized to detail, on a reimbursable basis, any of the personnel of such agency to the Commission to assist the commission in carrying out its duties under this Act.

(f) The Administrator of General Services shall provide to the Commission on a reimbursable basis such administrative and support services as the Commission may request.

POWERS OF COMMISSION

SEC. 5. (a) For the purpose of carrying out this Act, the Commission may hold such hearings, sit and act as such times and places, take such testimony, and receive such evidence, as the Commission considers appropriate. The Commission may administer oaths or affirmation to witnesses appearing before the Commission.

(b) Any member or employee of the Commission may, if authorized by the Commission, take any action which the Commission is authorized to take by this section.

(c) The Commission may secure directly from any Federal agency such information as may be necessary to enable the Commission to carry out this Act. Upon request of the Chairman of the Commission, the head of such agency shall furnish such information to the Commission.

DEFINITIONS

SEC. 6. For purposes of this Act—

(1) the term "Commission" means the National Commission on Savings and Loans established by section 1; and

(2) the term "Federal agency" has the meaning given to the term "agency" in section 551(1) of title 5, United States Code.

AUTHORIZATION OF APPROPRIATIONS

SEC. 7. For fiscal years beginning after September 30, 1990, here are authorized to be appropriated such sums as may be necessary to carry out this Act.

TERMINATION

SEC. 8. The Commission shall terminate 90 days after the date on which the Commission transmits the report required under section 2(b) to the President and the Congress.

ADDITIONAL COSPONSORS

S. 15

At the request of Mr. JEFFORDS, his name was added as a cosponsor of S. 15, a bill to amend the Public Health Service Act to improve emergency medical services and trauma care, and for other purposes.

S. 160

At the request of Mr. THURMOND, the name of the Senator from Hawaii [Mr. AKAKA] was added as a cosponsor of S. 160, a bill to require the construction of a memorial on Federal land in the District of Columbia or its environs to honor members of the Armed Forces who served in World War II and to commemorate United States participation in that conflict.

S. 1577

At the request of Mr. BOREN, the name of the Senator from Wyoming [Mr. WALLOP] was added as a cosponsor of S. 1577, a bill to amend the Internal Revenue Code of 1986 to provide that charitable contributions of appreciated property will not be treated as an item of tax preference.

S. 1850

At the request of Mr. CONRAD, the name of the Senator from Missouri [Mr. BOND] was added as a cosponsor of S. 1850, a bill to require sequestration for a fiscal year if the actual deficit for the preceding fiscal year exceeds the target by more than $10,000,000,000.

S. 1880

At the request of Mr. DANFORTH, the name of the Senator from Rhode Island [Mr. PELL] was added as a cosponsor of S. 1880, a bill to amend title VI of the Communications Act of 1934 to ensure carriage on cable television of local news and other programming and to restore the right of local regulatory authorities to regulate cable television rates, and for other purposes.

S. 1890

At the request of Mr. THURMOND, the name of the Senator from Delaware [Mr. ROTH] was added as a cosponsor of S. 1890, a bill to amend title 5, United States Code, to provide relief from certain inequities remaining in the crediting of National Guard technician service in connection with civil service retirement, and for other purposes.

S. 1942

At the request of Mr. ROCKEFELLER, the name of the Senator from Alabama [Mr. SHELBY] was added as a cosponsor of S. 1942, a bill to provide for home and community care as optional statewide service, and for other purposes.

S. 2186

At the request of Mr. MCCONNELL, the name of the Senator from Missouri [Mr. BOND] was added as a cosponsor of S. 2186, a bill to repeal the provisions of the Revenue Reconciliation Act of 1989 which require the withholding of income tax from wages paid for agricultural labor.

S. 2214

At the request of Mr. PACKWOOD, the name of the Senator from South Carolina [Mr. HOLLINGS] was added as a cosponsor of S. 2214, a bill to provide incentives to health care providers serving rural areas, to eliminate the Medicare reimbursement differential between hospitals located in rural and urban areas, and for other purposes.

S. 2319

At the request of Mr. GARN, the name of the Senator from Louisiana [Mr. JOHNSTON] was added as a cosponsor of S. 2319, a bill to amend the Federal Deposit Insurance Act and the Federal Credit Union Act to protect the deposit insurance funds, to limit the depository institutions, credit unions, and other mortgage lenders acquiring real property through foreclosure or similar means, or in a fiduciary capacity, and for other purposes.

S. 2384

At the request of Mr. BOREN, the name of the Senator from Nebraska [Mr. EXON] was added as a cosponsor of S. 2384, a bill to amend the Internal Revenue Code of 1986 with respect to the treatment of certain real estate activities under the limitations on losses from passive activities.

S. 2438

At the request of Mr. BAUCUS, the name of the Senator from Wyoming [Mr. SIMPSON], was added as a cosponsor of S. 2438, a bill to amend title XVIII of the Social Security Act to make certain modifications in the Medicare Program with respect to payments made under such program to hospitals located within rural areas with 50 beds or fewer, to improve the delivery of health services to individuals residing in rural areas, and for other purposes.

S. 2584

At the request of Mr. BOREN, the name of the Senator from Mississippi [Mr. COCHRAN], was added as a cosponsor of S. 2584, a bill to amend the Internal Revenue Code of 1986 to provide that the deduction for State and local income and franchise taxes shall not be allocated to foreign source income.

S. 2591

At the request of Mr. BAUCUS, the names of the Senator from Alaska [Mr. STEVENS], the Senator from Wyoming [Mr. SIMPSON], the Senator from Wyoming [Mr. WALLOP], the Senator from Colorado [Mr. WIRTH], the Senator from Virginia [Mr. WARNER], the Senator from Louisiana [Mr. JOHNSTON], the Senator from North Dakota [Mr. BURDICK], and the Senator from Georgia [Mr. FOWLER] were added as cosponsors of S. 2591, a bill to amend title XVIII of the Social Security Act to provide relief from certain regulations relating to physicians' services

S. 2601

At the request of Mr. INOUYE, the name of the Senator from Minnesota [Mr. BOSCHWITZ], was added as a cosponsor of S. 2601, a bill to amend the Internal Revenue Code of 1986 to allow individuals who do not itemize deductions a deduction for charitable contributions to the extent in excess of $100 per year.

S. 2605

At the request of Mr. PRYOR, the name of the Senator from Vermont [Mr. JEFFORDS], was added as a cosponsor of S. 2605, a bill to amend title XIX of the Social Security Act to provide mechanisms to control Medicaid drug prices while assuring that beneficiaries receive quality medical care, physicians' prerogative to prescribe is protected and the role of pharmacists is enhanced.

S. 2616

At the request of Mr. DASCHLE, the name of the Senator from Illinois [Mr. SIMON], was added as a cosponsor of S. 2616, a bill to amend title XVIII of the Social Security Act to provide coverage under such title for certain chiropractic services authorized to be performed under State law, and for other purposes.

S. 2640

At the request of Mr. DASCHLE, the name of the Senator from Vermont [Mr. JEFFORDS], was added as a cosponsor of S. 2640, a bill to amend title XVIII of the Social Security Act to prevent fraud and abuse and encourage competition in the sale of medicare supplemental insurance.

S. 2649

At the request of Mr. KENNEDY, the name of the Senator from Hawaii [Mr. AKAKA], was added as a cosponsor of S. 2649, a bill to provide for improved drug abuse treatment and prevention.

S. 2677

At the request of Mr. LAUTENBERG, the name of the Senator from Minnesota [Mr. BOSCHWITZ], was added as a cosponsor of S. 2677, a bill to extend for 2 years the operation of sections 599D and 599E of the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1990.

S. 2736

At the request of Mr. SIMON, the name of the Senator from Michigan [Mr. LEVIN], was added as a cosponsor of S. 2736, a bill to amend the Follow Through Act, and for other purposes.

S. 2761

At the request of Mr. D'AMATO, the name of the Senator from Louisiana [Mr. BREAUX], was added as a cosponsor of S. 2761, a bill to deem certain interests to be reasonably incidental to the operation of a gas utility company for the purpose of the Public Utility Holding Company Act of 1965.

S. 2807

At the request of Mr. MCCAIN, the names of the Senator from Arizona [Mr. DECONCINI], the Senator from New Jersey [Mr. BRADLEY], the Senator from Pennsylvania [Mr. HEINZ], and the Senator from Washington [Mr. GORTON] were added as cosponsors of S. 2807, a bill to direct the Secretary of the Interior to establish and implement power operating criteria at Glen Canyon Dam, to protect the environmental and recreational resources of Grand Canyon National Park, and for other purposes.

S. 2886

At the request of Mr. GLENN, the name of the Senator from Alaska [Mr. STEVENS] was added as a cosponsor of S. 2886, a bill to amend the Stewart B. McKinney Homeless Assistance Act to clarify requirements regarding the use of unutilized, underutilized, surplus, and excess Federal buildings and real property to assist the homeless, and for other purposes.

SENATE JOINT RESOLUTION 277

At the request of Mr. LUGAR, the name of the Senator from Virginia [Mr. ROBB] was added as a cosponsor of Senate Joint Resolution 277, a joint resolution designating October 6, 1990, as "German-American Day."

SENATE JOINT RESOLUTION 284

At the request of Mr. BYRD, the name of the Senator from Indiana [Mr. COATS] was added as a cosponsor of Senate Joint Resolution 284, a joint resolution to designate the week beginning September 16, 1990, as "National Give the Kids a Fighting Chance Week."

SENATE JOINT RESOLUTION 305

At the request of Mr. THURMOND, the names of the Senator from Mississippi [Mr. COCHRAN], the Senator from Iowa [Mr. GRASSLEY], the Senator from South Carolina [Mr. HOLLINGS], the Senator from Ohio [Mr. METZENBAUM], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from California [Mr. WILSON], the Senator from Utah [Mr. HATCH], the Senator from Vermont [Mr. JEFFORDS], the Senator from North Carolina [Mr. SANFORD], and the Senator from Hawaii [Mr. AKAKA] were added as cosponsors of Senate Joint Resolution 305, a joint resolution to designate the month of September 1990, as "National Awareness Month of Children with Cancer."

SENATE JOINT RESOLUTION 337

At the request of Mr. SIMON, the name of the Senator from Maine [Mr. COHEN] was added as a cosponsor of Senate Joint Resolution 337, a joint resolution designating Labor Day weekend, September 1 through 3,

1990, as "National Drive for Life Weekend."

SENATE JOINT RESOLUTION 339

At the request of Mr. DECONCINI, the name of the Senator from Nebraska [Mr. EXON] was added as a cosponsor of Senate Joint Resolution 339, a joint resolution to designate August 1, 1990, as "Helsinki Human Rights Day."

SENATE JOINT RESOLUTION 351

At the request of Mr. BYRD, the names of the Senator from California [Mr. WILSON], the Senator from Indiana [Mr. COATS], the Senator from North Dakota [Mr. BURDICK], and the Senator from West Virginia [Mr. ROCKEFELLER] were added as cosponsors of Senate Joint Resolution 351, a joint resolution to designate the month of May 1991, as "National Trauma Awareness Month."

SENATE RESOLUTION 288

At the request of Mrs. KASSEBAUM, the name of the Senator from Vermont [Mr. LEAHY] was added as a cosponsor of Senate Resolution 288, a resolution expressing the sense of the Senate regarding the reopening of universities in the West Bank and Gaza without delay.

SENATE CONCURRENT RESOLUTION 141—RELATIVE TO HUMAN RIGHTS IN KENYA

Mr. KENNEDY (for himself, Mr. SIMON, Mr. PELL, Mr. KERRY, Mrs. KASSEBAUM, Mr. CRANSTON, and Mr. DODD) submitted the following concurrent resolution; which was referred to the Committee on Foreign Relations:

S. CON. RES. 141

Whereas the United States and Kenya have enjoyed friendly relations based on their mutual respect for human rights and democratic freedoms;

Whereas Kenya has been an important and politically stable ally to the United States in Africa;

Whereas Kenya is one of the largest recipients of United States aid in sub-Saharan Africa;

Whereas such aid has been offered to encourage democatic freedoms, human rights, and political stability in Kenya;

Whereas the Government of Kenya has been waging a campaign of repression designed to eliminate criticism and dissent;

Whereas the Government of Kenya has compromised the independence of the Kenyan judiciary and increasingly restricted freedom of the press;

Whereas government security forces have harassed and detained government critics, including former Cabinet Members and others advocating multi-party democracy, and assaulted their families and co-workers;

Whereas government security forces have targeted human rights attorneys by interfering with their work and arresting and detaining them;

Whereas the government crackdown compelled Gibson Kamau Kuria, one of the world's foremost human rights attorneys and the recipient of the Robert F. Kennedy Human Rights Award in 1988, to seek refuge in the United States Embassy in Nairobi for five days, and forced his partner, human rights attorney Paul Muite, into hiding;

Whereas the Government of Kenya has resorted to the use of force against demonstrators calling for multi-party democracy and peaceful political change;

Whereas at least 1,500 peaceful demonstrators have been arrested and detained by government security forces during the first two weeks of July;

Whereas the Government of Kenya's ongoing campaign against its citizens violates basic standards of international law with respect to human rights and fundamental freedoms; and

Whereas Kenya's political stability is threatened by the government's crackdown on individual rights and democratic freedoms and intolerance of political dissent: Now, therefore, be it

Resolved, That—

(1) the Senate (the House of Representatives concurring)—

(A) condemns the arrest and detention of Kenyan citizens for the peaceful expression of their political views and the recent violence against unarmed civilians by Kenyan security forces;

(B) condemns the Government of Kenya's disregard of human rights and fundamental freedoms;

(C) calls upon the Government of Kenya to end the intimidation and harassment of those who are critical of government policies, particularly individuals within the church, the press, and the legal and academic communities; and

(D) calls upon the Government of Kenya to implement effective safeguards to ensure unrestricted freedom of the press and the independence of the judiciary and to guarantee due process and other fundamental civil rights and human rights for individuals imprisoned or otherwise detained by the government; and

(2) it is the sense of the Congress that the President of the United States should suspend all military assistance and economic support fund assistance to the Government of Kenya until that government—

(A) restores basic human rights and fundamental freedoms, including the rights of free speech, free press, and free association;

(B) releases all detainees and persons arrested for the peaceful expression of their political views;

(C) ends the harassment and detention of its political opponents and human rights lawyers by security forces; and

(D) enables the Kenyan people to determine whether they want to pursue a multiparty democratic system.

Mr. KENNEDY. Mr. President, during the past few weeks, government security forces in Kenya arrested, detained, assaulted, and killed peaceful advocates of human rights and democratic reforms. This escalating cycle of violence and repression in Kenya is a deep concern to all friends of democracy.

The United States should not be backing governments that deny the most basic rights to their citizens. If we are true to our heritage, we should stand with the forces of freedom, not those who deny it.

Therefore, I am introducing legislation calling on the administration to suspend military and economic assistance to the Government of Kenya. The resumption of this assistance would be conditioned on the restoration of democratic freedoms and the release of all persons arrested and detained for the peaceful expression of their views.

Kenya was once a model of political stability in Africa. But today, its constitution and its democratic tradition are threatened by the government's repression of the rights of its citizens.

President Moi has mounted a harsh campaign against those who speak out against the government, who oppose the nation's single-party system, or who call for free expression. The President has emphasized his opposition to a pluralistic democracy. He has vowed to hunt down political dissidents "like rats."

In recent weeks, the repression has intensified. Security forces have arrested and detained more than 1,500 people. Hundreds of people were injured, and at least 22 were killed, when security forces fired into crowds and used clubs against demonstrators protesting the government crackdown. down.

Among those detained are two former Cabinet Ministers and the editor of a publication that criticized President Moi.

The government crackdown compelled Gibson Kuria, one of the world's most courageous champions of human rights, to seek refuge in the U.S. Embassy in Nairobi. Although the Kenyan Government permitted Mr. Kuria to leave the country after a few days, his leadership is needed by his fellow countrymen. His forced exile is a distressing commentary on the tragic situation in his native land. We look forward to working with him to bring about the day when he can return home to a free and democratic Kenya.

Kenya is the largest recipient of United States aid in sub-Saharan Africa. It is scheduled to receive $46 million in aid this year, including $11 million in military assistance. The administration has requested $42 million in aid for Kenya in 1991, $16 million of which is in military aid and economic assistance.

Americans should not send these tax dollars to a government that denies its citizens their basic rights. It is time to suspend all military and economic assistance to the Government of Kenya, until it restores fundamental civil and human rights.

Gibson Kuria and other brave Kenyans at the forefront of democratic and human right reforms are entitled to the individual freedoms guaranteed under the Constitution of Kenya. I urge Congress to ask the administration to support them in their cause.

SENATE RESOLUTION 312—RELATIVE TO THE ZEBRA MUSSEL

Mr. MOYNIHAN (for himself, Mr. D'AMATO, Mr. GLENN, Mr. METZENBAUM, Mr. LEVIN, Mr. RIEGLE, Mr. LUGAR, Mr. COATS, Mr. KOHL, Mr. KASTEN, Mr. LAUTENBERG, Mr. JEFFORDS, Mr. LEAHY, Mr. BRADLEY, Mr. SPECTER, Mr. GRASSLEY, Mr. SIMON, Mr. BIDEN, Mr. SARBANES, Mr. BURDICK, Mr. KENNEDY, Mr. KERRY, Mr. DIXON, Mr. CHAFEE, Mr. HEINZ, Mr. PELL, Mr. LIEBERMAN, and Mr. BOSCHWITZ) submitted the following resolution; which was referred to the Committee on Environment and Public Works:

S. RES. 312

Whereas the zebra mussel (Dreissena polymorpha) is a filter feeding mollusk able to filter approximately a quart of water a day, and in doing so substantially reduce the quantity of phytoplankton essential to a health fishery;

Whereas the zebra mussel is native to temperate freshwater habitats of the Black, Caspian, and Azov Seas in Southern Asia, and canals built during the late 18th century allowed the species to expand into Western Europe by the 1830's;

Whereas the zebra mussel is believed to have arrived in North America in the ballast water of a ship arriving from Europe in the summer of 1986, and discharged into the Great Lakes system at Lake St. Clair and the St. Clair River;

Whereas by the year 1990 this infestation has spread eastward through Lakes Erie and Ontario into the St. Lawrence River, and westward into Green Bay, Lake Michigan, and Duluth Harbor, Laker Superior;

Whereas it is likely that within the coming two decades, if left unchecked, the zebra mussel will have infested the majority of the surface water system of the United States and Canada; and that this migration is irreversible and cannot be quarantined;

Whereas the United States Fish and Wildlife Service has estimated that the zebra mussel in the Great Lakes will cost $5,000,000,000 over the next ten years in environmental and economic losses; and

Whereas the Great Lakes Fishery Commission was established in 1955 by Convention between the United States and Canada to develop and coordinate fishery research and management, and to advise governments on measures to improve the fisheries: Now, therefore, be it

Resolved, That it is the sense of the Senate that—

(1) the zebra mussel, if left unchecked, may devastate the fisheries of the Great Lakes; and

(2) the President of the United States should direct the Secretary of State to negotiate with the Government of Canada to establish a program of zebra mussel research and control, through the auspices of the Great Lakes Fishery Commission. This program shall be coordinated with other research and control activities taking place within and outside the Great Lakes Basin.

SEC. 2. The Clerk of the United States Senate shall transmit a copy of this resolution to the President of the United States with the request that the President further transmit a copy to the Secretary of State.

● Mr. MOYNIHAN. Mr. President, I rise today to submit a Senate resolution concerning zebra mussels. The measure, cosponsored by 27 Senators, is a simple request to the President. And that being, to instruct the Secretary of State to begin negotiations with Canada through the Great Lakes Fishery Commission on a program of zebra mussel control. To my friends and colleagues who have yet to hear or experience the effects of this foreign mollusk which is presently working its way through the surface water system of our Nation, I encourage you to take notice.

The zebra mussel is a dangerous new infestation. It presents a threat to our entire surface water system and ultimately will affect the way we live and work.

The zebra mussel—the scientific name is *Dreissena polymorpha*—is not indigenous to North America. It is native to the Black, Caspian, and Azov Seas of Soviet Central Asia. It has been in Europe for more than 150 years, and now it is here.

Unlike other infestations, this one is irreversible. The zebra mussel is here to stay. It cannot be quarantined or eradicated. Within 20 years time it will have spread through the entire surface water system of North America. How this occurred and what it will mean is worthy of our attention.

The zebra mussel is native to the fresh waters of Southern Asia. It was first identified there in 1771. Canals built during the late 18th century allowed the species to expand its range. It took less than a century for the mussel to spread over much of Europe—by the 1830's, zebra mussels had reached the British Isles.

Infestations of *Dreissena* created difficulties for the water supplies in Hamburg in 1886 and in Rotterdam in 1887 by clogging intake pipes. In 1895, Berlin's waterworks were closed for 27 days due to fouling of pipes by thousands of decaying mussels. In 1921, a hydroelectric plant in northern Germany closed because a 1.5 meter thickness of mussels severely restricted water flow.

But still, as of only 5 years ago, the zebra mussel had not reached North America. Or perhaps it had, but if so, it had not survived.

Nonetheless, it is believed that in the summer of 1986, zebra mussels arrived in North America in the ballast water of a ship arriving from Europe, and that this event or series of similar events has led to the infestation we now face. It is thought that ballast water taken on in a European port contained immature zebra mussels, that these mussels survived the 5- to 7-day trip that is now commonplace, and that this water was released into Lake St. Clair, which lies north of Detroit between Lake Huron and Lake Erie.

The first confirmed sighting of the zebra mussel in the Great Lakes was in the Canadian waters of Lake St. Clair on June 1, 1988. Zebra mussels now have been found throughout the entire Great Lakes system. As far west as Duluth, MN, and as far east as the St. Lawrence River in New York.

The mussel can move between different bodies of water in several ways. The larvae—called veligers—can be transported downstream or downwind by water currents. Mussels attach to the hulls of boats, and larvae can survive for up to a week in the cooling water of boat engines. They can be carried by the feet of water birds and other wildlife.

Some advocate using natural predators of the zebra mussel to control its population. Diving ducks prey upon the mussel. In Lake Erie, where the zebra mussel is abundant, observers are reporting an increase in the diving duck population. Unfortunately, there are limits to the ability of the duck to control this organism. Wetland habitat in the Great Lakes may be too small to support the duck population needed to control this infestation.

Mr. President, the Senate Committee on Environment and Public Works has held three hearings in the last 3 months concerning the zebra mussel and the effects it will have on infrastructure and fishery habitats. The picture is rather grim. The U.S. Fish and Wildlife Service has estimated that the zebra mussel in the Great Lakes will cost $5 billion over the next 10 years in environmental and economic losses. As the zebra mussel moves throughout the surface water system of our Nation this figure will surely rise dramatically.

In 1955, the United States and Canada created by convention, the Great Lakes Fishery Commission. The Commission was created to develop and coordinate fishery research and management, and to advise governments on measures to improve the fisheries. Not since the sea lamprey have our fisheries been at such peril. We have in place a Commission which, if given the directive, could begin research tomorrow. That we do this, working with our friends to the North, seems only reasonable.

Mr. President, there are currently three separate measures under consideration in the Senate concerning zebra mussels. In time, they will become law. However, we cannot wait. We must act now.

Although only a resolution, a request to the President by 28 Members of the U.S. Senate is no small matter. I encourage the President to begin negotiations immediately.●

● Mr. GLENN. Mr. President, I rise today in support of Senate Resolution 312, to express the sense of the Senate that dialog with Canada begin immediately regarding the role of the Great Lakes Fishery Commission in zebra mussel research and control. I have long supported an active role for the

Great Lakes Fishery Commission in addressing the zebra mussel problem. This organization will be a key player in organizing that joint effort of the United States and Canada much as they have done for the sea lamprey. My bill S. 2244, the Non-Indigenous Aquatic Nuisance Act of 1990, invites the participation of the Great Lakes Fishery Commission on the Great Lakes Regional Commission for aquatic nuisance species and mandates international cooperation in cases where an aquatic nuisance species occurs in waters shared with a foreign country. This resolution furthers the goals of this bill and starts the negotiation process with Canada, and that is why I am proud to be a cosponsor of Senate Resolution 312.

Mr. President, we must coordinate the efforts of all agencies and individuals active in solving the problem of zebra mussels and other aquatic nuisance species. I would hope that all research initiated by a binational organization such as the Great Lakes Fishery Commission would encompass those agencies and individuals that are best capable of carrying out the tasks. This would include the U.S. Fish and Wildlife Service, the National Oceanic and Atmospheric Administration, university researchers, and the Canadian counterparts. We must bring all of our knowledge and resources forward cooperatively so that we can most efficiently address this problem.●

AMENDMENTS SUBMITTED

FOOD, AGRICULTURE, CONSERVATION, AND TRADE ACT OF 1990

DASCHLE (AND GLENN) AMENDMENT NO. 2325

Mr. DASCHLE (for himself and Mr. GLENN) proposed an amendment to the bill (S. 2830) to extend and revise agricultural price support and related programs, to provide for agricultural export, resource conservation, farm credit, and agricultural research and related programs, to ensure consumers an abundance of food and fiber at reasonable prices, and for other purposes, as follows:

On page 661, line 2, insert after "1995" the following: ", and not later October 1, 1993, and for each fiscal year thereafter, not less than 20 percent of the amount appropriated in each such fiscal year under this subsection shall be used for research that has the goal of increasing the demand or utilization of farm or forest products, with special emphasis on the development of new nonfood uses for traditional commodities and the development of alternative farm and forest products.".

BAUCUS AMENDMENT NO. 2326

Mr. BAUCUS proposed an amendment to the bill S. 2830, supra, as follows:

On page 429, between lines 2 and 3, insert the following paragraph:

"(6) WOOD AND PROCESSED WOOD PRODUCTS.—The term 'wood and processed wood products' includes logs, lumber (such as boards, timber, millwork, molding, flooring, and siding), veneer, panel products (such as plywood, particle board, and fiberboard), utility and telephone poles, other poles and posts, railroad ties, wood pulp, and wood chips.".

On page 445, between lines 19 and 20, insert the following new subsection:

"(n) CONDITIONS FOR WOOD AND PROCESSED WOOD PRODUCTS.—The Secretary shall make guarantees available under subsections (a) and (b) for wood and processed wood products under terms and conditions that are comparable to the terms and conditions that apply to guarantees provided with respect to other agricultural commodities under such subsections.".

LEAHY (AND BOREN) AMENDMENT NO. 2327

Mr. LUGAR (for Mr. LEAHY, for himself and Mr. BOREN) proposed an amendment to the bill S. 2830, supra, as follows:

On page 415, (section 403(b))—

(a) line 12 strike "or".

(b) line 16 strike the period and insert "; or"; and

(c) between lines 16 and 17 insert:

"(4) if such an agreement, program or facility is not in effect, the country is pursuing national economic policy reforms that would promote democratic, market-oriented, and long-term economic development.".

MOYNIHAN AMENDMENT NO. 2328

Mr. BOREN (for Mr. MOYNIHAN) proposed an amendment to the bill S. 2830, supra, as follows:

On page 857, between lines 20 and 21, insert the following new chapter:

CHAPTER 6—NEW YORK-NEW JERSEY HIGHLANDS

SEC. 1545. STUDY CONCERNING NEW YORK-NEW JERSEY HIGHLANDS.

(a) IN GENERAL.—The Secretary of Agriculture shall conduct a study of the region known as the "New York-New Jersey Highlands", located in New York, New Jersey, and Pennsylvania, including the Sterling Forest in Orange County, New York (hereinafter referred to in this section as the "region").

(b) SCOPE OF STUDY.—The study authorized under subsection (a) (hereinafter referred to in this section as the "study") shall include an identification and assessment of—

(1) the physiographic boundaries of the region referred to in subsection (a);

(2) forest resources of the region, including timber and other forest products, fish and wildlife, lakes and rivers, and recreation;

(3) historical land ownership patterns in the region and projected future land ownership, management, and use, including future recreational demands and deficits and the potential economic benefits of recreation to the region;

(4) the likely impacts of changes in land and resource ownership, management, and use on traditional land use patterns in the region, including economic stability and employment, public use of private lands, natural integrity, and local culture and quality of life;

(5) alternative conservation strategies to protect the long-term integrity and traditional uses of lands within the region; and

(6) the impact of forestland conversion to alternative uses on the surrounding area and any threats that this may pose.

(c) ALTERNATIVE CONSERVATION STRATEGIES.—The alternative conservation strategies referred to in subsection (b)(5) shall include a consideration of—

(1) sustained flow of renewable resources in a combination that will meet the present and future needs of society;

(2) public access for recreation;

(3) protection of fish and wildlife habitat;

(4) preservation of biological diversity and critical natural areas; and

(5) new local, State, or Federal designations.

(d) PUBLIC PARTICIPATION.—In conducting the study, the Secretary shall provide an opportunity for public participation.

(e) TIME LIMIT.—The study shall be complete not later than 12 months after the date on which funds are appropriated under subsection (f).

(f) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $250,000 to carry out this section.

LEAHY AMENDMENT NO. 2329

Mr. BOREN (for Mr. LEAHY) proposed an amendment to the bill S. 2830, supra, as follows:

On page 1079, in section 1943, line 8, after "Secretary of Agriculture" insert ", in consultation with the Secretary of Energy,".

CONRAD (AND OTHERS) AMENDMENT NO. 2330

Mr. CONRAD (for himself, Mr. BURDICK, Mr. BAUCUS, and Mr. BURNS) proposed an amendment to the bill S. 2830, supra, as follows:

On page 329, between lines 5 and 6, insert the following new subsection:

(c) REPAYMENT REQUIREMENTS.—

(1) IN GENERAL.—Notwithstanding any other provision of law, effective only for producers on a farm who received an advance deficiency payment for the 1988 or 1989 crop of a commodity and are otherwise described in paragraph (2), the Secretary of Agriculture—

(A) shall not charge an annual interest rate for any delinquent refund for the advance deficiency payment in excess of 9 percent;

(B) shall withhold no more than one third in each of the next three years of farm program payments to the producers as a result of any delinquency in providing the refund; and

(C) shall permit the producers to make the refund in three equal installments during each of the crop years 1990, 1991, and 1992, if the producers enter into an agreement to obtain multiperil crop insurance for each of the crop years to the extent the Secretary determines is similar to section 107 of the Disaster Assistance Act of 1989 (7 U.S.C. 1421 et seq.).

(2) APPLICATION.—This subparagraph shall apply in the case of producers on a farm if—

(A) the producers received an advance deficiency payment for the 1988 or 1989 crop of a commodity under section 107C(a) of the Agricultural Act of 1949 (7 U.S.C. 1445b-2(a);

(B) the producers are required to provide a refund under subparagraph (G) or (H) of section 107C(a)(2) of such Act with respect to the advance deficiency payment; and

(C) the total quantity of the 1988 or 1989 crop of the commodity that the producers were able to harvest is less than the result of multiplying 65 percent of the farm program payment yield established by the Secretary for the crop by the sum of the acreage planted for harvest and the acreage prevented from being planted (because of natural disaster, as determined by the Secretary) for the crop.

On page 329, line 6, strike "(c)" and insert "(d)".

REID (AND LEAHY) AMENDMENT NO. 2331

Mr. REID (for himself and Mr. LEAHY) proposed an amendment to the bill S. 2830, supra, as follows:

At the end of the bill add the following:

SEC. . FINDINGS AND POLICY.

(a) FINDINGS.—The Congress finds that—

(1) The LD50 test is an acute toxicity test on animals which has been shown to be inaccurate, misleading, and unnecessary in product testing;

(2) other tests have been developed which are less costly, more humane, and more accurate;

(3) nonanimal alternatives have been developed for other acute toxicity tests using animals;

(4) the Federal Government has encouraged the use of the LD50 test and other animal acute toxicity tests through regulations which mandate their use, encourage their use, or do not prescribe other less costly, more accurate and humane alternatives;

(5) private industry is reluctant to use other tests without encouragement from the Federal Government; and

(6) private industry and the consumer will benefit from the promotion of alternative methods of testing when these alternatives are more accurate and humane than animal tests.

(b) POLICY.—Federal departments and agencies shall encourage the development and use of product testing procedures which accurately reflect human reactions to products, including consumer products and products containing hazardous or toxic substances, but which do not rely upon animal models.

SEC. . FEDERAL ACTION.

(a) PROHIBITION OF USING LD50 Test for Product Safety, Labeling, and Transportation Requirements.—Effective 1 year after the date of enactment of this Act, Federal department or agency heads may not consider LD50 test results when determining product safety, labeling, or transportation requirements for the purposes of Federal regulation.

(b) REGULATIONS CONCERNING TESTS OTHER THAN ANIMAL TOXICITY TESTS.—(1) Not later than 1 year after the date of enactment of this Act, each Federal department or agency head shall—

(A) review and evaluate any regulation, guideline, or recommendation issued by that department or agency which requires or recommends the use of an animal toxicity test for the purpose of pre-market evaluation of the relative acute toxicity of a product; and

(B) promulgate regulations which specify that nonanimal toxicity tests be used instead of animal toxicity tests, unless that Federal department or agency head determines that in certain limited cases the nonanimal toxicity test has less validity than the animal toxicity test.

(2) If a determination is made that a specific nonanimal toxicity test is less valid than an animal toxicity test, the appropriate Federal department or agency head shall publish in the Federal Register an explanation of all options considered and the justification for continuing the animal toxicity test, which shall be subject to public comment before a final regulation is promulgated.

(c) PERIODIC REVIEW OF ANIMAL TOXICITY TESTING REGULATIONS.—At least every 2 years (beginning 3 years after the date of enactment of this Act), each Federal department or agency head, after considering the most recent technological advances available, shall determine whether continued use of any animal toxicity test is justified. If a Federal department or agency head determines that such a use is justified, then that Federal department or agency head shall publish in the Federal Register an explanation and justification of such continued use, which shall be subject to public comment.

SEC. . DEFINITIONS.

For purposes of this Act—

(1) ANIMAL.—The term "animal" means any vertebrate.

(2) ANIMAL TOXICITY TEST.—The term "animal toxicity test" means an animal model acute toxicity test including (but not limited to) the Draize eye or skin irritancy test, approximate lethal dose test and the limit test.

(3) FEDERAL DEPARTMENT OR AGENCY HEAD.—The term "Federal department or agency head" means the head of a Federal department or agency who—

(A) has authority to promulgate regulations, guidelines, and recommendations with respect to procedures to be used in the testing of products, including consumer products, veterinary products, and products containing hazardous or toxic substances; or

(B) licenses or approves products, labeling requirements for products, or the transportation of products based on the results of these tests.

(4) NONANIMAL TOXICITY TEST.—The term "nonanimal toxicity test" means a nonanimal model acute toxicity test including (but not limited to) cell culture, computer modeling, protein alteration, and chorioallantoic membrane techniques.

BOSCHWITZ AMENDMENT NO. 2332

Mr. LEAHY (for Mr. BOSCHWITZ) proposed an amendment to the bill S. 2830, supra, as follows:

On page 35, line 15, strike "129(b)" and insert "128(b)".

Beginning on page 36, strike line 22 and all that follows through page 38, line 14, and insert the following:

SEC. 124. AUTHORITY TO ISSUE ORDERS.

The Secretary—

On page 39, line 3, strike "126" and insert "125".

On page 39, lines 4 and 5, strike "sections 125(a) and 135" and insert "section 135".

On page 39, line 9, strike "may" and insert "shall".

On page 39, line 15, strike "127" and insert "126".

On page 39, lines 16 and 17, strike "After notice and opportunity for public comment are given," and insert "Not later than 90 days after publication of the proposed order,".

On page 39, line 17, strike "126" and insert "125".

On page 39, line 25, strike "135" and insert "134".

On page 40, line 1, strike "128" and insert "127".

On page 40, line 5, strike "129" and insert "128".

On page 40, strike lines 15 through 25 and insert the following:

(2) SERVICE TO THE ENTIRE INDUSRY.—In carrying out this subtitle, the Board shall carry out programs and projects that will provide maximum benefit to the fluid milk industry and promote only Class I fluid milk products. The Board shall, to the extent practicable, ensure that advertising coverage in each region is proportionate to the funds collected from each region.

(3) REGIONS.—The Secretary shall establish not less than 10 nor more than 25 regions in order to ensure appropriate geographic representation on the Board.

On page 41, line 4, strike "marketing".

On page 43, line 6, strike "131" and insert "130".

On page 44, line 14, strike "131" and insert "130".

On page 44, line 24, before the period, insert the following: ", except that this subsection shall not preclude the Board from offering its programs and projects for use by commerical parties, under such terms and conditions as the board may prescribe".

On page 50, between lines 12 and 13, insert the following new subsection:

(l) EXEMPTIONS.—The order shall exempt Class I fluid milk products exported from the United States.

On page 50, line 13, strike "(l)" and insert "(m)".

On page 50, line 16, strike "130" and insert "129".

On page 50, strike lines 20 through 25.

On page 51, line 1, strike "(c)" and insert "(b)".

On page 51, line 6, strike "(d)" and insert "(c)".

On page 51, line 17, strike "(e)" and insert "(d)".

On page 51, line 21, strike "(f)" and insert "(e)".

On page 52, line 4, strike "(g)" and insert "(f)".

On page 52, line 8, strike "131" and insert "130".

On page 54, line 4, strike "137(b)" and insert "136(b)".

On page 54, line 6, strike "132" and insert "131".

On page 55, line 20, strike "133" and insert "132".

On page 55, line 21, strike "133" and insert "132".

On page 59, line 1, strike "134" and insert "133".

On page 60, line 9, strike "135" and insert "134".

On page 62, line 1, strike "136" and insert "135".

On page 62, line 10, strike "135(a)" and insert "134(a)".

On page 63, line 2, strike "135" and insert "134".

On page 63, line 4, strike "137" and insert "136".

On page 63, line 11, strike "135(a)" and insert "134(a)".

On page 63, line 20, strike "131(e)" and insert "130(e)".

On page 64, line 2, strike "135" and insert "134".

On page 64, line 4, strike "138" and insert "137".

On page 64, line 22, strike "139" and insert "138".

On page 56, strike lines 13 through 21 and insert the following new paragraph:

(1) CIVIL PENALTIES.—Any person who violates any provision of this subtitle or a regulation issued under this subtitle may be assessed—

(A) a civil penalty by the Secretary of not less than $500 nor more than $5,000 for each such violation; or

(B) in the case of a willful failure or refusal to pay, collect, or remit any assessment or fee duly required of the person under this subtitle or a regulation issued under this subtitle, a civil penalty by the Secretary of not less than $10,000 nor more than $100,000 for each such violation.

Each violation shall be considered as a separate offense.

On page 60, line 22, after "products", insert the following: "represented in the referendum".

On page 63, lines 21 through 24, strike "class I processors voting in the referendum who represent, as determined by the Secretary, 60 percent or more of the volume of class I fluid milk products" and insert "class I processors representing 60 percent or more of the volume of class I fluid milk products represented by the processors voting in the referendum ".

GRASSLEY AMENDMENT NO. 2333

Mr. GRASSLEY proposed an amendment to the bill S. 2830, supra, as follows:

Beginning on page 732, line 3 all through page 759, line 3 and insert in lieu thereof the following:

"Subtitle C—Sustainable Agricultural Research and Education Program

"SEC. 1461. DEFINITIONS.

"For purposes of this subtitle:

"(1) AGRIBUSINESS.—The term "agribusiness" includes a producer or organization engaged in an agricultural enterprise with a profit motive.

"(2) EXTENSION.—The term 'extension' shall have the same meaning given to the term by section 1404(7) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3103(7)).

"(3) NONPROFIT ORGANIZATION.—The term 'nonprofit organization' means an organization, group, institute, or institution that—

"(A) has a demonstrated capacity to conduct agricultural research, demonstration, education, or information delivery on sustainable agricultural practices or systems; and

"(B) is exempt from tax under section 501 of the Internal Revenue Code of 1986.

"(4) SECRETARY.—The term 'Secretary' means the Secretary of Agriculture.

"(5) STATE.—The term 'State' means each of the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands of the United States, American Samoa, the Commonwealth of the Northern Mariana Islands, or the Trust Territory of the Pacific Islands.

"(6) STATE AGRICULTURAL EXPERIMENT STATIONS.—The term 'State agricultural experiment stations' shall have the meaning given to the term by section 1404(13) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3101(13)).

"(7) SUSTAINABLE AGRICULTURE.—The term 'sustainable agriculture' means an agricultural system that is economically viable and environmentally sound over short and long terms.

"SEC. 1462. FINDINGS.

"Congress finds that—

"(1) to be sustainable, any system must be environmentally sound and economically profitable over short and long terms;

"(2) highly productive and efficient agricultural systems and sound conservation practices are essential to ensure the long-term agricultural sustainability of farms and ranches in the United States;

"(3) sustainable agriculture can embrace methods included in systems known as alternative, low-input, ridge-, no- and minimum tillage, regenerative, biological, organic, ecological, and conventional agriculture that meets the economic and environmental criteria to achieve short and long term sustainability;

"(4) United States farmers and the nonfarm public want a sustainable agricultural system that will continue through time to be productive and profitable, conserve natural resources, protect the environment, protect the health and safety of agricultural workers, provide safe and ample food and nonfood products, and compete efficiently in global markets;

"(5) improved management of all inputs, increased diversification among enterprises, and increased global understanding are essential to ensure the sustainability of the American agriculture system;

"(6) agricultural research and technology transfer activities of the Secretary (including activities of the Extension Service, the Agricultural Research Service, and the Cooperative State Research Service), State cooperative extension services, land grant and other colleges and universities, and State agricultural experiment stations—

"(A) have contributed greatly to innovation in agriculture; and

"(B) have a continuing role to play in improving agricultural sustainability;

"(7) the annual irretrievable loss of an estimated 3 billion tons of topsoil through wind and water erosion reduces agricultural sustainability;

"(8) farmers and ranchers have demonstrated an interest in participating directly in research and extension efforts, a practice that improves farming methods and benefits research and extension programs;

"(9) many farmers and ranchers are dependent on nonrenewable production inputs and natural resources for agricultural production;

"(10) public funding of a properly planned and balanced agricultural research and education program is essential to improving efficiency in agricultural production and conservation practices; and

"(11) the expansion or redirection, or both, of agricultural research and extension efforts are needed to assist farmers, ranchers, and other persons engaged in agribusiness to—

"(A) improve agricultural sustainability;

"(B) implement soil, water, and energy conservation practices;

"(C) manage chemical, genetic, capital, labor, machinery, and other resources to optimize the economic and environmental results of their operations;

"(D) diversify their enterprises and practices to more effectively manage risk;

"(E) understand and compete in the global economy;

"(F) reduce nonrenewable production inputs when feasible and practicable and optimize the use of onfarm resources; and

"(G) protect the health of farmers, farmworkers, and consumers.

"SEC. 1463. PURPOSES.

"It is the purpose of this subtitle to—

"(1) facilitate and promote scientific investigation and education in order to—

"(A) enhance agricultural sustainability;

"(B) maintain the productivity of land, labor, capital, and technology;

"(C) reduce soil erosion and loss of water and plant nutrients;

"(D) conserve energy and natural resources;

"(E) improve competitiveness of agriculture producers and processors in global (domestic and foreign) markets; and

"(F) protect the health of farmers, farmworkers, and consumers through safe practices that provide safe food; and

"(2) facilitate the conduct of research and extension projects in order to—

"(A) study agricultural production, marketing, and management systems that are located, to the extent practicable, in areas that possess various soil, climatic, and physical characteristics;

"(B) study farms that have been, and will continue to be, managed using farm production practices that rely on a variety of conservation practices;

"(C) take advantage of experience and expertise of farmers and ranchers through their direct participation and leadership in projects;

"(D) promote a partnership between farmers, nonprofit organizations, agribusiness, and public and private research and extension institutions; and

"(E) transfer practical, reliable, and timely information to farmers and ranchers on sustainable farming systems and practices.

"SEC. 1464. INFORMATION ASSESSMENT AND UTILIZATION.

"(a) IN GENERAL.—Subject to section 1468, the Secretary shall inventory and classify by subject matter all studies, reports, and other materials developed by any person or governmental agency with the participation or financial assistance of the Secretary, that could be used to promote the purposes of this subtitle.

"(b) DUTIES.—In carrying out subsection (a), the Secretary shall—

"(1) identify, assess, and classify existing information and research reports that will further the purposes of this subtitle, including information and research relating to—

"(A) production practices;

"(B) marketing strategies for existing products;

"(C) globalization of American agriculture;

"(D) application of sustainable natural ecosystem principles to agroecosystems;

"(E) environmentally sound cropping, livestock, tillage, nutrient management, pest management, water conservation, and alternative energy systems;

"(F) the social, global competitiveness, economic, and environmental effects of alternative production and marketing systems and technologies; and

"(G) the role of public policies and programs in fostering and hindering the purposes of this subtitle;

"(2) identify which of the reports provides useful information and make the useful reports available to farmers and ranchers, and other agribusiness persons; and

"(3) carry out educational programs to facilitate the systematic application of information generated from research.

"SEC. 1465. RESEARCH, EDUCATION, AND TECHNOLOGY TRANSFER PROJECTS.

"(a) IN GENERAL.—Subject to section 1468, in cooperation with Federal and State research and extension agencies and agricultural producers, the Secretary shall conduct such research and education projects as are needed to obtain data, draw conclusions, and demonstrate technologies necessary to promote the purposes of this subtitle. The Secretary shall ensure that—

"(1) the projects are open for public observation at specified times; and

"(2) the Stevenson-Wydler Technology Innovation Act of 1980 (15 U.S.C. 3701 et seq.) is observed in the development and conduct of the projects.

"(b) BROAD REPRESENTATION.—In carrying out subsection (a), the Secretary shall conduct projects and studies in areas that are broadly representative of United States agriculture.

"(c) AREAS OF LAND.—In carrying out subsection (a), the Secretary may conduct research projects involving crops, soils production methods, and weed, insect, and disease pests on individual fields or other areas of land.

"(d) ONFARM RESEARCH.—In carrying out subsection (a), the Secretary shall conduct onfarm research.

"(e) STUDIES.—In carrying out subsection (a), the Secretary shall conduct studies on the national and regional economic, global competitiveness, and social and environmental implications of adoption of sustainable agriculture systems and practices.

"(f) SEQUENCE OF CROPS.—In the case of a research project conducted under this section that involves the planting of a sequence of crops, the Secretary shall conduct the project for a term that is appropriate to the sequence involved.

"(g) SELECTION OF PROJECTS.—In carrying out subsection (a), the Secretary shall select projects on the basis of the relevance of the project to the purposes of this subtitle, the appropriateness of the design of the project, the feasibility of obtaining the objectives of the project, and the scope of the potential applicability of the findings and outcomes. Priority shall be given to those projects that—

"(1) closely coordinate research and extension programming, including extensive farmer input and feedback and specific plans for making findings readily useable;

"(2) maximize the involvement and cooperation of farmers, including onfarm research and demonstrations;

"(3) involve an interdisciplinary systems approach; and

"(4) involve cooperation between farmers, nonprofit organizations, colleges and universities, agribusinesses, and government agencies.

"(h) NATIONAL INFORMATION AND COMMUNICATION SYSTEM.—In coordination with the Extension Service, State cooperative extension services, private information delivery systems, and farmers, the Secretary may implement a national sustainable agriculture information and communication system using the cooperative extension service to ensure that farmers and ranchers and other agribusiness persons are aware of sources of information identified within section 1464 and projects conducted under this section, including—

"(1) demonstrations of components and systems through field days, tours, workshops, conferences, and short courses; and

"(2) multimedia information sources including publications, videotapes, broadcasts, computer information systems, and other technologies.

"SEC. 1466. COORDINATION.

"(a) IN GENERAL.—The Secretary may—

"(1) establish regional administrative councils that include representatives of—

"(A) the Cooperative State Research Service;

"(B) the Agricultural Research Service;

"(C) the Extension Service and State cooperative extension services;

"(D) State agricultural experiment stations;

"(E) the Soil Conservation Service;

"(F) State Departments of Agriculture;

"(G) nonprofit organizations involved with research, demonstration, education, or information delivery on sustainable agriculture systems and practices;

"(H) farmers utilizing sustainable agriculture systems and practices;

"(I) agribusinesses; and

"(J) other persons knowledgeable about sustainable agriculture and the impact of sustainable agriculture on the environment, the economy, and rural communities;

"(2) establish a national advisory council that includes representatives of—

"(A) the Agricultural Research Service;

"(B) the Agricultural Marketing Service;

"(C) the Farmers Home Administration;

"(D) the Agricultural Cooperative Service;

"(E) the Cooperative State Research Service;

"(F) the Extension Service;

"(G) the State cooperative extension services;

"(H) the State agricultural experiment stations;

"(I) the Soil Conservation Service;

"(J) the Economic Research Service;

"(K) the National Agricultural Library;

"(L) State Departments of Agriculture;

"(M) nonprofit organizations involved with research, demonstration, education, or information delivery on sustainable agriculture systems and practices; and

"(N) farmers utilizing sustainable agriculture systems knowledgeable about sustainable agriculture and the impact of sustainable agriculture on the environment, the economy, and rural communities; and

"(3) in conjunction with the regional administrative councils, develop criteria to identify the individuals, organizations, or other entities capable of assisting the Secretary and the land grant universities in carrying out this subtitle.

"(b) DUTIES OF REGIONAL ADMINISTRATIVE COUNCILS.—The regional administrative councils shall—

"(1) appoint regional technical committees consisting of—

"(A) scientists with expertise in a wide cross-section of disciplines;

"(B) Extension specialists or agents, or both;

"(C) farmers who use sustainable agriculture systems and practices;

"(D) members of nonprofit organizations involved with research, demonstration, education, or information delivery on sustainable agriculture systems and practices;

"(E) agribusiness persons; and

"(F) other persons knowledgeable about sustainable agriculture and the impact of sustainable agriculture on the environment, the economy, and the viability of rural communities;

"(2) promote the program at the regional level;

"(3) recommend goals and criteria for selection of projects within the region;

"(4) review and take action on the recommendations of the technical committee; and

"(5) provide an annual report on funded projects and an evaluation of project activity.

"(c) DUTIES OF TECHNICAL COMMITTEES.—The technical committees established under subsection (b)(1) shall—

"(1) evaluate project proposals;

"(2) submit recommendations for funding; and

"(3) assess further research and education needs.

"(d) DUTIES OF NATIONAL ADVISORY COUNCIL.—The responsibilities of the national advisory council established under subsection (a)(2) shall include—

"(1) promoting the program at the national level;

"(2) advising Department of Agriculture agencies relative to activities funded by the program;

"(3) recommending general procedures for awarding and administering funds within the regions;

"(4) coordinating recommendations for improving the program;

"(5) exploring opportunities for increased integration among programs in sustainable agriculture, water quality, integrated pest management, alternative agriculture, food safety, and other related programs; and

"(6) providing an annual report to the Secretary.

"SEC. 1468. AGREEMENTS.

"The Secretary shall carry out sections 1464 and 1465 through agreements with land-grant colleges or universities, other universities, State agricultural experiment stations, nonprofit organizations, for-profit organizations, or Federal or State governmental entities, that have demonstrated appropriate expertise in agricultural research and technology transfer and in commercialization of new processes and products to and from agriculture.

"SEC. 1469. DISSEMINATION OF DATA.

"The Secretary may—

"(1) make available through the Extension Service and State cooperative extension services and via the outreach of the cooperative extension system through other public and private agencies—

"(A) the information and research reports identified under section 1464; and

"(B) the information and conclusions resulting from any research project conducted under section 1465; and

"(2) otherwise take such steps as are necessary to ensure that the material is made available to the public.

"SEC. 1470. AUTHORIZATION OF APPROPRIATIONS.

"There are authorized to be appropriated each fiscal year up to $40,000,000 to carry out this chapter, to remain available until expended.".

(b) CONFORMING AMENDMENT TO TABLE OF CONTENTS.—The table of contents for subtitle C of title XIV of the Food Security Act of 1985 (Public Law 99-198; 99 Stat. 1359) (as affected by subsection (a) of this section) is amended to read as follows:

"Subtitle C—Sustainable Agricultural Research and Education Program
"Sec. 1461. Definitions.
"Sec. 1462. Findings.
"Sec. 1463. Purposes.
"Sec. 1464. Information assessment and utilization.
"Sec. 1465. Research, education, and technology transfer projects.
"Sec. 1466. Coordination.
"Sec. 1468. Agreements.
"Sec. 1469. Dissemination of data.
"Sec. 1470. Authorization of appropriations.".

ADMIRALTY ISLAND NATIONAL MONUMENT LAND MANAGEMENT ACT

JOHNSTON AMENDMENT NO. 2334

Mr. MITCHELL (for Mr. JOHNSTON) proposed an amendment to the amendments of the House to the bill (S. 666) to enroll 20 individuals under the Alaska Native Claims Settlement Act, as follows:

On page 2, line 22, strike "101" and insert "201."

On page 5, after line 2, insert the following new sentence: "Nothing in subparagraphs (C) or (D) shall create a right or cause of action by Kootznoowoo, Incorporated, or any other party against the United States.".

On page 5, lines 19 and 20, strike the word "Cooper" each time it appears and insert in lieu thereof, "Cooper".

On page 6, line 5, strike "8756;" and insert "3756;".

On page 6, line 9, strike "876.60" and insert "376.60".

On page 6, line 13, strike "876.60" and insert "376.60".

On page 6, line 14, strike "8756," and insert "3756,".

ADDITIONAL STATEMENTS

PERSONAL FINANCIAL DISCLOSURE OF SENATOR DENNIS DeCONCINI

● Mr. DeCONCINI. Mr. President, pursuant to longstanding belief that all public officials should make full financial disclosure, I am submitting for the RECORD this date a financial report dated December 31, 1989, for Dennis and Susan DeConcini.

The report follows:

TIZZARD PLOTKIN,
KNUTTINEN & DONNELLY, P.C.,
Tucson, AZ, May 11, 1990.

DENNIS AND SUSAN DeCONCINI,
Washington, DC.

We have reviewed the accompanying statement of financial condition of Dennis and Susan DeConcini as of December 31, 1989, in accordance with standards established by the American Institute of Certified Public Accountants. All information included in this financial statement is the representation of Dennis and Susan DeConcini.

A review of personal financial statements consists principally of inquiries of the individuals whose financial statements are presented and analytical procedures applied to financial data. It is substantially less in scope than an examination in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying statement of financial condition in order for it to be in conformity with generally accepted accounting principles.

The historical cost/basis information in the accompanying statement of financial condition is presented only for supplementary analysis purposes and has been subjected to the inquiry and analytical procedures applied in the review of the basic financial statement. We did not become aware of any material modification that should be made to the supplementary information.

RODERIC D. TIZZARD, C.P.A.
DAVID PLOTKIN, C.P.A.
1965-87
DAVID C. KNUTTINEN, C.P.A.
JOANE E. DONNELLY, C.P.A.
G. JAMES WRIGHT, C.P.A.

DENNIS AND SUSAN DeCONCINI STATEMENT OF FINANCIAL CONDITION DEC. 31, 1989

	Estimated current value	Historical cost basis
Assets:		
Cash, checking and savings accounts	$141,494	$141,494
Certificates of deposit	886,114	886,114
Miscellaneous receivables arising from rental properties	11,082	11,082
Notes receivable (note 2)	559,264	559,264
Investments:		
Marketable securities (note 3)	100,245	63,486
Real estate (note 4)	4,477,975	1,495,616
Monterey Water Company (note 5)	345,181	3,000
Partnerships, closely held (note 6)	5,573,846	155,665
Partnerships and S-corporations, not closely held (note 7)	331,653	140,696
Annuity	42,962	22,573
Vested interest retirement plans:		
Individual retirement accounts (IRA's)	50,943	
Civil service retirement fund	49,532	
Cash value of life insurance (note 8)	100,527	100,527
Residence (note 9)	470,000	195,657
Personal property (note 9)	165,000	65,000
	13,305,818	3,840,174
Liabilities:		
Miscellaneous payables arising from rental properties	12,125	12,125
Deferred gain (note 2)	213,927	213,927
Income taxes—current year balance	201,782	201,782
Morgages:		
Wraparound mortgages (note 2)	361,914	361,914
Real estate investments (note 4)	910,732	910,732
Residence (note 9)	96,505	96,505
	1,796,985	1,796,985
Income taxes: Estimated on the difference between the estimated current values of the assets and the estimated current amounts of liabilities and their tax bases (note 10)	3,126,663	
Net worth	8,385,170	2,043,189

DENNIS AND SUSAN DeCONCINI STATEMENT OF FINANCIAL CONDITION DEC. 31, 1989—Continued

	Estimated current value	Historical cost basis
Total	13,305,818	3,840,174

Note.—See accountants' review report.

NOTES TO FINANCIAL STATEMENT

Note 1—Basis of accounting: The accompanying financial statement includes the assets and liabilities of Dennis and Susan DeConcini. Assets are stated at their estimated current values and liabilities at their estimated current amounts.

Note 2—Note receivable, 4-D properties:

	Receivable	Mortgage
In 1985 a residence on Crystal Drive, San Diego, California was sold to 4-D Properties with the note receivable being "wrapped around" the underlying mortgage for the same terms and amount. The monthly receivable/payable is $589 per month including interest at 11 percent	$41,914	$41,914
In 1989 a shopping center at Cave Creek & Bell Road, Phoenix, Arizona was sold to an unrelated party. The note receivable is for monthly payments of $7,168 including interest at 10 percent; the note receivable matures April, 1999. The note payable is for monthly payments of $7,996 including interest at 9.5 percent; the note payable matures December, 1991. Deferred gain on this installment sale is $213,927	517,350	320,000
Total	559,264	361,914

Note 3—Marketable securities: The estimated current values of marketable securities are either (a) their quoted closing prices or (b) for securities not traded on the financial statement date, amounts that fall within the range of quoted bid and asked prices. Marketable securities consist of the following:

	Number of shares or bonds	Estimated current values
Stocks:		
Fidelity Trend Mutal Fund	312	$13,782
First National Corporation	1,743	24,568
James Madison Bank	200	1,175
Lasertechnics, Inc.	1,000	1,500
Liberty Corp	100	4,338
National Education Corp	50	344
Pacific Telesis	200	10,075
Southern Arizona Bancorp of Yuma, Inc	3,150	25,200
The Price Co	200	9,250
Valley National Corp	700	9,245
Bonds:		
State of Israel	1	1,000
Total marketable securities		100,245

Note 4—Real estate: The estimated current values were determined by use of assessed value for property taxes, inquiries of realtors familiar with similar properties in similar areas, acquisition price of recently acquired properties and appraisals of some properties. Ownership is 100 percent unless otherwise noted:

Property description	Estimated current value	Mortgage balance	Mortgage terms		
			Monthly payment including interest	Interest rate	Maturity
Joint interests:					
Alpha Beta Shopping Center, 44th & Broadway, Phoenix, AZ (50 percent interest)	$414,625	$380,540	$7,854	9%	1995
Avra Valley/Pioneer Trust, unimproved land, Pima County, AZ (3.125 percent interest)	5,630				
Grant/Oracle Circle K, Ground lease, Pima County, AZ (10.89 percent interest)	132,730				
St. Mary's & Silverbell Road, Ground lease, Pima County, AZ (10.89 percent interest)	180,000				
Investment properties:					
Casas Adobe Vistas, Lots 17 & 18, vacant land, Tucson, AZ	100,000				
1122 S. 6th, vacant land (formerly Victory Outreach), Tucson, AZ	25,000				
Rancho Sin Vaca, Lot 64, vacant land, Tucson, AZ	86,000	50,000	[1] 8,000	10	1995
12th & Michigan, vacant land (Serrano land), Tucson, AZ	52,000				
12th & Ajo, Nat'l City Annex, Lot 23, Block A, behind Circle K, vacant land, Pima County, AZ	13,200				
Commercial properties:					
Action Suds & Circle K, 3812/3816 S. 12th, Tucson, AZ	106,440				
Drachman Building, 2345 E. Broadway, Tucson, AZ	150,000				
L & L Furniture, 1140–1150 S. 6th, 1133–1135 S. Russell, Tucson, AZ	112,000				
Tijuana Taco, 615 S. 6th Avenue, Tucson, AZ	100,000				
Pizza Hut 12th & Ajo, 605 W. Ajo, Tucson, AZ	162,850				
39 cent Hamburger, 625 S. 6th Avenue, Tucson, AZ	125,000				
Residential properties:					
Canyon View Apartments, 381 Cedar Lane, Sedona, AZ	340,000	338,078	3,602	10.25	2018
House: Alta & San Carlos Street, Carmel By The Sea, CA	300,000				
House: 5686 Dolphin Street, La Jolla, CA	600,000				
House: 1901 N. George Mason Drive, Arlington, VA	150,000	100,920	934	10.5	2117
Condo: 303 Helopen, Rehobeth Beach, DE	200,000				
Salem Court Apartments: 705 Salem Court, Mission Beach, CA	800,000				
Sunset Cliff Apartments: 1961 Sunset Cliff, Ocean Beach, CA	322,500	41,194	554	9	1992
Total	4,477,975	910,732			

[1] Annual payment plus interest.

Note 5—Monterey Water Co.: 30 shares of a total of 430 shares outstanding (7%) were owned as of December 31, 1989. The Company primarily holds real estate investments. The estimated current value is based upon appraisal. Net income of the Company for 1989 was $284,399. The balance sheet of Monterey Water Co. at December 31, 1989 is prepared on the accrual basis and is summarized below.

Cash	$183,579
Other current assets	2,666
Notes receivable	118,536
Investment, partnership	627,541
Depreciable property	122,777
Accumulated depreciation	(7,891)
Land	481,943
Other assets	16,310
Total assets	1,545,461
Other current liabilities	240,463
Stockholder loans	413,624
Notes payable	270,111
Other liabilities	10,810
Capital stock	41,300
Capital in excess of par	10,750
Retained earnings	558,403
Total liabilities and equity	1,545,461

Note 6—Partnerships, closely held: Interests in the listed partnerships are as a general partner. Partnership activities are primarily in the area of real estate. The estimated current value of the partnerships is based upon their assessed value for property taxes, or inquiries of realtors familiar with similar properties in similar areas, or acquisition price of recently acquired properties and appraisals of some properties. Following are the condensed historical cost balance sheets and the net income or (loss) for the year ended December 31, 1989 for each partnership. The income tax method of accounting is used by the partnerships.

	2–D Properties	3–D Properties	4–D Properties	Total
Cash	$5,016	$(4,264)	$88,178	$88,930
Receivables/loans	99,224		125,167	224,391
Other current assets		223,110	339,271	562,381
Investments		88,661	6,403,383	6,492,044
Depreciable property	41,524	2,085,484	6,912,017	9,039,025
Accumulated depreciation	(15,455)	(717,934)	(2,074,331)	(2,807,720)
Land	21,726	168,320	9,937,466	10,127,512
Intangibles		41,465	194,835	236,300
Accumulated amortization		(8,040)	(54,612)	(62,652)
Other assets		10,272	42,391	52,663
Total assets	152,035	1,887,074	21,913,765	23,952,874
Other current liabilities	143	28,252	480,396	508,791
Loans		1,205,089	10,244,750	11,449,839
Deferred gains	86,969		60,018	146,987
Other liabilities		6,439	28,516	34,955
Capital	64,923	647,294	11,100,085	11,812,302
Total Liabilities and equity	152,035	1,887,074	21,913,765	23,952,874
Net income (loss) for the year ended Dec. 31, 1989	149,892	7,249	166,216	323,357
Percent ownership of Dennis and Susan DeConcini	50	33	20	NA
Estimated current value of Dennis and Susan DeConcini's partnership interests	165,196	394,429	5,014,221	5,573,846

Note 7—Partnerships and S-corporations, not closely held:

Haras Sonoita, Ltd.—25 percent interest in an S-Corporation owning a race horse. Managing officer estimated the net realizable value of the horse $2,500

Pinacle Peak North Investors—2 percent interest in a real estate general partnership. Estimated current value was based upon the managing partner's estimated value of the undeveloped land 183,600

Roadrunner Radio & Television—4.07 percent interest in a limited partnership collecting a note receivable. Estimated current value based upon percent ownership of the note 15,323

Southwest Radio & Television, Ltd.—2.44 percent interest in a limited partnership collecting a note receivable. Estimated current value based upon percent ownership of the note 23,165

Tonopah Partners I General Partnership—16.67 percent ownership in a real estate general partnership. Estimated current value was based upon a realtor's estimated value of the undeveloped land 82,312

Tonopah Partners II General Partnership—same as Tonopah I 12,090

W.M. Investments Partnership—13.33 percent ownership in a real estate general partnership. Estimated current value was based upon the general partner's estimated value of the apartment and commercial buildings owned by the partnership 12,663

Total 331,653

Note 8—Life insurance: The face value of thirteen whole life policies is $604,494. These policies have a cash surrender value of $100,527.

Note 9—Residence/personal property: The estimated current value was determined by the good faith estimates of Dennis and Susan DeConcini. The residence mortgage is payable in monthly installments of $906 including interest at 8.5 percent through 2006.

Note 10—Income taxes: Estimated income taxes have been provided on the excess of the estimated current values of assets over their tax bases as if the estimated current values of the assets had been realized on the statement date, using applicable tax laws and regulations. The provision will probably differ from the amounts of income taxes that eventually might be paid because those amounts are determined by the timing and the method of disposal or realization and

the tax laws and regulations in effect at the time of dispoal or realization.

Note 11—Other related party disclosures: Other family members and closely held businesses had the following amounts receivable from or payable to the following entities at December 31, 1989:

	3-D Properties	4-D Properties
Individuals:		
Receivable	$25,000	
Payable	40,974	$338,554
Closely held business:		
Receivable	22,757	
Payable		22,757

Note.—The notes all bear interest at prevailing interest rates.

Note 12—Future interests: Remainder interests in trusts have not been presented because the rights are not fixed or determinable amounts.●

PUERTO RICO PROCLAMATION OF EQUALITY

● Mr. SIMON. Mr. President, I rise today to bring to the attention of our colleagues a proclamation in support of Puerto Rican equality of rights, opportunities, obligations, participation, privileges, and responsibilities. This proclamation, initiated by former Puerto Rico Governors Luis Ferre and Carlos Romero Barcelo, was signed by a number of distinguished citizens and residents of Puerto Rico at Ponce on March 10, 1990.

Since being granted U.S. citizenship 73 years ago, the people of Puerto Rico have enjoyed most but not all of the honor, liberties, and freedoms associated with being U.S. citizens. However wonderful those freedoms are, the Puerto Rican people are deprived of voting representation in the U.S. Congress. they are subject to Federal laws which govern trade, commerce, labor relations, wages, and the environment. But they are denied representation in the development and implementation of these laws.

Puerto Ricans have a strong sense of loyalty to the United States and to democracy. They have fought alongside their fellow U.S. citizens in wars and have sacrificed their lives to serve democracy and to serve their Nation even while they have not had a vote or voice in congressional declarations of war and in foreign policy.

Mr. President, they have earned their right to political equality. Equality of rights, obligations, privileges, responsibilities, opportunity, and participation are what the Puerto Rican people actively strive for. We are "one nation, indivisible," committed to "liberty and justice for all." We can do no better to live up to that pledge than by passing S. 712, the Johnston-McClure bill I have cosponsored for a 1991 plebiscite vote on Puerto Rico status. I ask that the proclamation previously referred to be printed in full immediately following my remarks.

The proclamation follows:

PROCLAMATION OF EQUALITY

Four Hundred and Ninety Seven years ago, the first European set foot on our island and soon thereafter we became a colony of Spain;

Ninety Two years ago, as a result of the Spanish American War, we were ceded to the United States and became a colony thereof;

Seventy Three years ago, Congress granted United States citizenship to all the inhabitants of Puerto Rico;

Since then, we have been blessed with many of the Liberties and Freedoms guaranteed to each of its citizens by the world's greatest democracy;

Nevertheless, we continue to be denied representation; we remain disenfranchished citizens who are deprived of equality in our voting rights and our economic rights;

In order to maintain tax privileges which benefit only the wealthiest of corporations and individuals, our poor and our workers are deprived of equal minimum wages and equal economic benefits;

Without representation in their enactment, we are subject to federal laws which govern our trade and commerce, our labor relations, our wages, our environment, and foreign immigration to our homeland; likewise, we are subject to laws which establish crimes and punishments, and which impose customs duties and other federal taxes, even though we lack participation in their adoption and subsequent amendment;

Although called "Commonwealth" we are, undeniably and unequivocally, a colony of the United States. Indeed, ours is the oldest colony in the world!

Yet, is spite of these and other disadvantages, through five centuries of valiant struggle we have formed and forged a People;

A People which has overcome disease, proverty, catastrophe, scarcity of natural resources, and the perennial yokes of civic injustice and political inequality, to create a society of exceptional dynamism, productivity, and promise;

Having overcome so much to achieve so much, we are today a proud People; a People offended by the unequal responsibilities and obligations which ostensibly justify our disenfranchisement and our unequal economic participation;

We have, however, looked beyond the political and economic discrimination: with our faith placed in the true meaning of American citizenship, our People's loyalty to the United States of America and to democracy has steadily intensified throughout Ninety Two years of Federal Sovereignty;

This loyalty has been manifested to the maximum in two World Wars, in Korea, in Vietnam, in Lebanon, in Libya and wherever else Puerto Ricans have been called to sacrifice their lives to serve their Nation;

Our sons have died on battlefields alongside their fellow citizens from the States of the union.

In time of war, we have been equal in death—in time of peace, we want to be equal in life!

We have earned our right to participate as equals in our Nation's democracy;

We have earned our right to political and economic equality;

A century of international torment and violence is at its end, as events in Europe, Africa and Latin America herald the advent of a New Millennium in which tyranny, bigotry and colonialism shall be banished from this Earth.

Just as East Germans tore down a wall of stone which symbolized totalitariansim and repression, so must we, the American citizens of Puerto Rico, tear down a wall of shame—that invisible but insidious wall which confines us in a colonial relationship with our Nation, depriving us of our political rights and shutting us out of the economic mainstream;

Conscious of these Truths, impatient with disenfranchisement and inequality, and with unyielding faith in our Creator, we do now solemnly proclaim—as American citizens assembled at Ponce, Puerto Rico on this Tenth Day of March in the Year 1990—that our lives, our fortunes and our sacred honor are hereby pledged to the cause of Equality for our People—for ourselves, for our children, and for our children's children.

Dignity, Decency and Democracy demand Equality;

Equality of Rights. Equality of Obligations. Equality of Privileges. Equality of Responsibilities. Equality of Opportunity. Equality of Participation;

These fundamental principles of civilization shall apply in full to the United States citizens of Puerto Rico. That is our solemn vow.

Equality now! Equality forever!

CARLOS ROMERO BARCELO,
Former Governor of Puerto Rico.
LUIS A. FERRE,
Former Governor of Puerto Rico.●

FEDERAL LEAVE SHARING PROGRAM

● Mr. DOMENICI. Mr. President, I rise to share with my colleagues some preliminary results of the Federal Leave Sharing Program.

In 1988, Congress enacted the Federal Leave Sharing Act. I consider this program to be the good deed legislation of the 100th Congress because it allows Federal employees to donate vacation leave to fellow coworkers in need—those workers experiencing seri-

ous illnesses or extreme family emergencies.

The concept of leave sharing recognizes that life comes with no guarantees. It takes into account the unpredictable, yet inescapable, fact of life that every once in awhile a coworker is faced with losing his or her job because he or she has used up all of his or her leave time. Often, that person has been a fine employee and, given the opportunity, would add to the work force again.

The Federal agencies have now had a year's experience in administering the Leave Sharing Program, which was implemented in April 1989 on a Governmentwide basis. The Office of Personnel Management is compiling information about leave sharing from all Federal agencies that will be reported to Congress on October 31. I am anixous to see the results of this report, and I am pleased to share information from an informal survey of eight large Federal agencies or installations in New Mexico.

These 8 agencies have approved a total of 122 leave recipients for participation in the voluntary Leave Transfer Program. To date, 2,447 fellow employees have generously donated 44,481 hours of annual leave to these recepients—an average of 365 hours per recipient.

One of the recipients, Carolyn Miller, works as a buying agent at Kirkland Air Force Base buying everything from nuts and bolts to aircraft parts and parachutes. Carolyn is a handicapped employee and is wheelchair bound. In August 1988, Carolyn developed an infection in her hip that led to two surgeries to remove her infected hip bone.

Her accumulated sick leave and annual leave were depleted in the months that she was off work recovering. Carolyn was approved as a leave recipient under the fiscal year 1988 Temporary Leave Transfer Program and then as a recipient of the current Leave Transfer Program in 1989. She received a total of 936 hours of donated annual leave from her fellow employees—enough to cover an absence of almost 6 months.

As Carolyn describes the donated leave, it was "such a godsend, such a big help." Prior to becoming ill Carolyn had just bought a house. The infection hit right after she had moved into her new house. As a single breadwinner, this shared leave kept a medical crisis from also becoming a financial crisis.

I know there are many other such cases where the Leave Sharing Program has benefited valued members of our Federal work force, and I look forward to reviewing the results of the report that the Office of Personnel Management is preparing on the Governmentwide implementation of this program.●

NO MORE GAMBLING

● Mr. SIMON. Mr. President, recently, Mortimer B. Zuckerman, editor-in-chief of U.S. News & World Report, had a column about our fiscal problems and the need to face our problems.

While I do not agree with every sentence in the report, the fundamental call for us to face our problems and do something about them and not continue to drift is an admonition that we greatly need.

I urge my colleagues in the House and Senate to read his comments and consider them thoughtfully.

I ask that they be printed in the RECORD at this point.

The column follows:

[From U.S. News & World Report, July 2, 1990]

NO MORE GAMBLING

(By Mortimer B. Zuckerman)

Are you concerned that the slowdown in the economy may lead to a slump or that the value of your home is diminishing? You are not alone. Sixty percent of the public feels the country has gotten off track. There is no sense of national crisis as in the '70s, but there is a deep unease about the economy and our social ills of drugs and urban crime and rotting infrastructure. The tide is coming in and we are tied to a stake: The budget deficit.

The deficit stems from the Reagan tax cut of 1981, which the then Senate Republican majority leader called "a riverboat gamble." The bet was that tax cuts would bring more savings, investment and productivity, and hence increased federal revenues. We lost the bet. In relative terms, all went down. But up went consumption, the national debt and real interest. An how! Interest absorbs all the taxes of everybody west of the Mississippi. Their money does not go to solving problems. It only pays for past excesses. Reagan's program was a demand-side success, but a supply-side failure.

Five years ago, in the face of the cowardice of both Republicans and Democrats, we had the Gramm-Rudman-Hollings law (GRH) that was supposed to trigger automatic spending cuts if budget targets were not met. Our politicians responded in typical form with every fudge and gimmick imaginable to suggest the deficit was being reduced. Don't believe it. If one excludes money from trust funds like Social Security, the non-trust-fund budget deficit at $276 billion in 1989 is greater than its counterpart in 1985 when it was $266 billion.

But now the party's over. The estimated deficit for fiscal 1991, beginning in October, is so far above the $64 billion target mandated by GRH that congressional inaction threatens calamitous cutbacks. Air-traffic controllers would be laid off, national parks closed, state services slashed, food inspection reduced, the war on drugs abandoned, toxic dumps left as they are.

Everybody in Washington now wakes up every morning hoping that overnight a fairy godmother has left a present on the doorstep, a bundle of budget solutions achieved by immaculate conception and miraculous consensus, all tied up in blue ribbon, so that no one will be blamed for the one essential fact of any serious program—increased taxes. It does not take genius to see that this is the only way out. Every major Western industrial democracy functions with higher top income-tax rates than our 28 percent and with gas prices at least double our own. Yet countries like Germany and Japan outproduce us, outsave us, outinvest us and outgrow us. No, the paralysis is political.

There is one central fact in any tax program. It will have to be made fairer than it is, and that means that a part of any program will increase taxes on the rich. It was the rich who benefited most from the tax cuts of the 1980s, and it is the rich who made so much money in the '80s that they are going to have to bear a fair share of the burdens of the '90s. As political analyst Kevin Phillips points out in his new book, the share of national income going to the wealthiest 1 percent rose from 8.1 percent in 1981 to 14.7 percent in 1986, and it is still rising. The average after-tax, inflation-adjusted family income of the top 1 percent gained a whopping 74.2 percent over the decade, while that of the bottom 40 percent fell during this period. So here is part of the program.

One. Burst the so-called bubble, whereby the truly rich pay a lower rate (28 percent) than the not quite rich (33 percent). This would raise $42 billion over five years.

Two. Raise the percentage that retirees earning more than $25,000 are taxed on their Social Security benefits from 50 to 75 percent. This would raise another $60 billion over the next five years.

Three. Increase energy taxes so that gasoline costs are the same after inflation as they were in 1981. Every penny raises a billion dollars a year and encourages conservation.

The leadership for a credible multiyear budget reduction to put us on a path of steady economic growth must come from the President. Alas, Bush's entire domestic strategy has been to duck and dodge, to avoid any conceivable risk in popularity. He wants to be known as the Education President and the Environment President. He cannot be either until he is the Balanced Budget President.●

THE 16TH ANNIVERSARY OF THE TURKISH INVASION OF CYPRUS

● Mr. BIDEN. Mr. President, the last year has seen remarkable changes in Central and Eastern Europe, changes that were simply unimaginable just 12 months ago. The nations of Eastern Europe have broken free from Soviet domination. Germany, divided for nearly half a century, will soon be united. Unfortunately, some areas on the periphery of Europe—such as Ireland and Cyprus—remain unaffected by the remarkable changes in the European landscape; on these islands, division, not unity, remains a sad fact of life.

Today I want to take a moment to remind my colleagues about the situation on Cyprus, which 16 years ago—July 20, 1974—was invaded by Turkish forces, an invasion which cost thousands of lives, drove thousands more from their homes, and divided the country in two. For over a decade and a half, Greek Cypriots have suffered this injustice, an injustice which has been exacerbated by the establish-

ment of an illegal government in the northern section of the island.

For 16 years, the United States, the United Nations, and others have worked to bring peace to this troubled land, to little avail. The prospect for the immediate future, unfortunately, is not very bright. U.N.-sponsored intercommunal talks broke down in March, after the Turkish Cypriot leader, Rauf Denktash, worked to frustrate the efforts of the U.N. Secretary-General in creating an outline for a settlement of the Cyprus issue.

The President's Special Coordinator for Cyprus, Ambassador Nelson Ledsky, recently traveled to the region in an effort to restart the peace process. He is a very able diplomat, and I wish him well. But quite frankly, I am not very hopeful that his efforts will succeed unless the administration elevates this issue on its foreign policy agenda. In April, 23 Senators, including myself, wrote the President and urged him to direct Secretary of State Baker to take a personal role in seeking a Cyprus settlement. Regrettably, our plea seems to have fallen on deaf ears.

Fortunately, the heads of state in Europe have paid close attention to this cause. At the European Community summit in June, the European Council declared that "the Cyprus problem affects EC-Turkey relations," a signal to Ankara that Turkey's application to join EC will be linked to the resolution of the Cyprus question.

Mr. President, as chairman of the Subcommittee on European Affairs, I have consistently worked to pressure the Turkish Government to end its illegal occupation. Although my colleagues and I have had some success at passing measures to send strong signals to the Turkish Government—the 7 to 10 aid ratio between Greece and Turkey is now a fixture of our foreign aid bill—we have had no success in extinguishing the illegal presence on the island of Cyprus.

That does not mean we should abandon our effort. The stakes are too high. At stake are the very basic issues of international law and morality, which a series of U.N. resolutions have underscored. At stake is a small country's right to govern itself—free from outside pressure and occupation. At stake is the relationship of two NATO allies, Greece and Turkey.

And at stake, as the Senate considers foreign aid and military assistance levels, is my belief that American aid should serve American interests, values and principals—none of which are served by the illegal occupation of Cyprus.

Mr. President, for 16 years, the people of Cyprus have waited for an end to the unnatural division of their island. We must continue to do whatever we can to bring an end to this horrible tragedy.●

ADMIRALTY ISLAND NATIONAL MONUMENT LAND MANAGEMENT ACT

Mr. MITCHELL. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 666, the Alaska Native Claims Settlement Act.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 666) entitled "An Act to enroll twenty individuals under the Alaska Native Claims Settlement Act," do pass with the following amendments:

Page 1, after line 2, insert: Title I

Page 1, line 3, strike out [That notwithstanding], and insert: SEC. 101. Notwithstanding

Page 2, after line 13, insert:

TITLE II

SECTION 201. TITLE AND PURPOSE.

(a) TITLE.—This title may be cited as the "Admiralty Island National Monument Land Management Act of 1990".

(b) PURPOSE.—The purpose of this title is to improve Federal management of lands on Admiralty Island, Alaska, as provided herein.

SEC. 202. FINDINGS.

The Congress hereby finds that—

(1) Admiralty Island National Monument, Alaska, is an area of unparalleled natural beauty containing multiple values including but not limited to, fish and wildlife, forestry, recreational, subsistence, educational, wilderness, historical, cultural, and scenic values of enduring benefit to the Nation and the Native peoples residing therein; and

(2) land management and Federal administration of Admiralty Island National Monument may be enhanced by Federal land acquisitions, through land exchanges or otherwise, and by cooperative agreements between the Federal Government and the indigenous residents of the island, the people of the city of Angoon and the Native Village Corporation, Kootznoowoo, Incorporated.

SEC. 203. LAND ACQUISITION AND EXCHANGE.

(a) Section 506(a) of the Alaska National Interest Lands Conservation Act (Public Law 96-487, as amended) is hereby amended by adding at the end thereof the following new paragraph:

"(9)(A) The Secretary is authorized and directed to enter into such cooperative agreements and agreements for land acquisitions, through exchange or otherwise, with Kootznoowoo as are deemed necessary by the Secretary to carry out the purposes specified in section 101 and 503 of this Act and to improve the management of Federal lands on Admiralty Island.

"(B) The Secretary shall make every effort to complete agreements within eighteen months of the date of enactment of this paragraph.

"(C) The Secretary shall report to Congress before the end of such eighteen-month period on the status and results of negotiations with Kootznoowoo. The report shall include, but not be limited to, any Kootznoowoo properties proposed to be acquired by the United States, any Federal land or other compensation to be offered in exchange, and the text of any proposed or executed agreements.

"(D) Any lands on Admiralty Island acquired by the United States pursuant to this paragraph shall be added to and incorporated within the Admiralty Island National Monument.

"(E) The inability of the Secretary and Kootznoowoo to reach agreement shall not preclude subsequent negotiations at any time for the purposes of land exchanges or other matters.

"(F) Enactment of this paragraph shall not create any right or cause of action by Kootznoowoo, Incorporated, or any other party against the United States.".

SEC. 204. LAND SELECTION CONSOLIDATION.

(a) Section 506(a)(5) of the Alaska National Interest Lands Conservation Act (Public Law 96-487, as amended) is hereby amended by adding at the end thereof the following new subparagraphs:

"(C) In order to consolidate Federal land ownership and improve management of all land and timber resources in the area, the lands between such sale area and lands lying to the east of such sale area which have been or may be conveyed to Kootznoowoo pursuant to this paragraph shall be made available by the Secretary for an exchange between the Federal Government and Kootznoowoo, Incorporated, pursuant to the terms of section 1302(h) of this Act. If such sale is voluntarily terminated, or is canceled or forfeited in accordance with applicable law and regulations, then the lands within the sale area shall also be made available for exchange. The availability of the lands within the sale area for exchange shall continue for one year following the date the sale is completed and closed, or for one year following its termination, cancellation, or forfeiture, whichever is later. Nothing in this section shall affect valid land selections which the State of Alaska has filed with the Federal Government pursuant to Public Law 85-508, nor shall this section cause these lands to be removed from entry pursuant to the Mining Law of 1872.

"(D) Subject to lode mining claims, known as KAEL 1-216 inclusive, and valid existing rights, the subsurface estate in the lands conveyed to Kootznoowoo, Incorporated, pursuant to subparagraph (C) shall be granted to Sealaska, Incorporated.".

SEC. 205. ADMINISTRATIVE PROVISIONS.

(a) Section 703(a)(1) of the Alaska National Interest Lands Conservation Act is amended by deleting the words "Admiralty Island National Monument Wilderness" and inserting in lieu thereof "Kootznoowoo Wilderness".

(b)(1) All rights, title, and interests to that portion of the approximately seventeen and thirty-four one-hundredths acres comprising the Angoon Administrative Site which, pursuant to paragraph (b)(2) of this section, the Secretary dedicates for uses related to the administration of the Tongass National Forest, are hereby confirmed in the United States, said parcel being a valid existing Federal administrative site as referenced in section 506(a)(3)(A) of the Alaska National Interest Lands Conservation Act (Public Law 96-487, as amended). Said administrative site is located on Admiralty Island in township 50 south, range 68 east, section 31, Cooper River Base and Meridian and township 50 south, range 67 east, section 36, Cooper River Base and Meridian.

(2) Within one year of enactment of this paragraph, the Secretary of Agriculture shall adjust, and resurvey as necessary, the boundaries of the Angoon Administrative

Site to include only that portion of the site described as follows:

(A) Those lands which lie within the following described boundaries, comprising four and sixty-eight one-hundredths acres more or less:

Beginning at corner 1, also corner 9 of United States survey numbered 8756;

Thence north 45 degrees 30 minutes west, 540.79 feet to corner 2;

Thence north 45 degrees 00 minutes east, 876.60 feet to corner 3;

Thence south 45 degrees 30 minutes east, 540.79 feet to corner 4;

Thence south 45 degrees 00 minutes west, 876.60 feet to corner 1, also corner 9 of United States survey numbered 8756, the point of beginning.

(B) Those lands which lie within that area adjoining the northeastern boundary of the four and sixty-eight one-hundredths acre tract and the mean high tide line of Kootznoowoo Inlet, subject to a perpetual public easement for the existing Angoon-Killisnoo Road.

(C) An easement for road and utility access to the four and sixty-eight hundredths acre tract from the western or southern boundary of the seventeen and thirty-four one-hundredths acre site. To the maximum extent feasible, the Secretary shall locate said easement to connect and follow the existing right-of-way for Relay Road, which lies between lots 1 and 6 of the Samuel G. Johnson subdivision. Said eastment shall be at a precise location and of dimensions which the Secretary determines are reasonably necessary for present and projected Federal uses of the site related to administration of the Tongass National Forest. Said easement shall be subject to any valid existing rights except those of Kootznoowoo, Incorporated: *Provided*, That the easement shall not be located on any lands conveyed by Kootznoowoo, Incorporated, to a third party prior to June 1, 1988, without the express consent of such party: *Provided further*, That the Secretary shall exclude from the lands so retained those lands which were occupied on June 1, 1988, by structures and improvements that were not constructed by or for the United States including easements related thereto, or which were constructed by or for the United States but which the Secretary determines are not reasonably necessary for present or projected Federal uses related to the administration of the Tongass National Forest: *Provided further*, That the Secretary shall not exclude from the four and sixty-eight one-hundredths acre tract any lands occupied by existing power or utility lines or poles, and the lands so occupied shall be subject to an easement to allow for their continued use, maintenance, and repair.

(3) Title to all lands within the seventeen and thirty-four one-hundredths acre administrative site which are not included by the Secretary in the adjusted area provided by paragraph (b)(2) shall be conveyed by the Secretary of Agriculture by quitclaim deed to Kootznoowoo, Incorporated.

(4) The provisions of paragraphs (b)(2) and (b)(3) are subject to the condition precedent that Kootznoowoo, Incorporated, executes an appropriate written agreement acceptable to the United States attorney for the District of Alaska to dismiss, with prejudice, the pending litigation entitled Kootznoowoo, Incorporated, versus United States Department of Agriculture, Forest Service, Civil Numbered A84-575, in the United States District Court for the District of Alaska, and agrees therein that Kootznoowoo, Incorporated, and the United States shall each bear their respective costs of said litigation, including attorneys' fees.

TITLE III

Section 301. Subsection (d) of section 37 of the Alaska Native Claims Settlement Act is amended by—

(1) inserting the words "and such resolution is not validly rescinded pursuant to paragraph (2)(B)(ii)" before the period at the end of paragraph (1)(A);

(2) by redesignating paragraph (2)(B) as paragraph (2)(B)(i); and

(3) by adding the following new clauses to paragraph (2)(B):

"(ii) In lieu of approving the amendment to the articles of incorporation described in clause (i) and submitting such amendment to a vote of the shareholders, at any time prior to January 1, 1991, the board of directors of a Native Corporation that has approved a resolution described in paragraph (1)(A) may approve a new resolution rescinding that prior resolution. Upon approval of the new resolution rescinding a resolution described in paragraph (1)(A), the latter resolution shall be void and alienability restrictions on the Settlement Common Stock of such corporation shall continue subsequent to December 18, 1991, until such time as the alienability restrictions are terminated pursuant to the procedure described in subsection (b).

"(iii) Notwithstanding any other provision of law, a civil action that challenges the constitutionality of any provision in clause (ii) shall be barred unless it is filed within one year after the date of the vote of the board of directors approving a resolution to rescind a prior opt-in election under paragraph (1)(A). Any such civil action shall be filed in accordance with section 16(b) of the Alaska Native Claims Settlement Act Amendments of 1987 (101 Stat. 1813-1814).".

AMENDMENT NO. 2334

Mr. MITCHELL. Mr. President, I move that the Senate concur in the House amendments with an amendment which I now send to the desk on behalf of Senator JOHNSTON.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Maine [Mr. MITCHELL] for Mr. JOHNSTON, proposes an amendment numbered 2334.

Mr. MITCHELL. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection it is so ordered.

The amendment is as follows:

On page 2, line 22, strike "101" and insert "201".

On page 5, after line 2, insert the following new sentence:

"Nothing in subparagraphs (C) or (D) shall create a right or cause of action by Kootznoowoo, Incorporated, or any other party against the United States.".

On page 5, lines 19 and 20, strike the word "Cooper" each time it appears and insert in lieu thereof, "Copper".

On page 6, line 5, strike "8756;" and insert "3756;".

On page 6, line 9, strike "876.60" and insert "376.60".

On page 6, line 13, strike "876.60" and insert "376.60".

On page 6, line 14, strike "8756," and insert "3756,".

Mr. JOHNSTON. Mr. President, with the addition of several minor amendments which I will offer to this legislation, I strongly support the enactment of S. 666 as amended by the House of Representatives. The additional provisions added to this bill by the House will help to resolve several longstanding issues regarding the management of certain lands on Admiralty Island and also fix a problem with the legislation the Congress enacted in 1988 dealing with the ownership of lands and corporate stock by Alaska Natives pursuant to the Alaska Native Claims Settlement Act. I commend the House for its action on this measure and am pleased that this bill gives us an opportunity to deal with these issues.

Mr. President, I am offering 7 amendments to the House-passed version of S. 666. Six of these amendments are technical and correct a section cross-reference, erroneous survey identification numbers and incorrect distances contained in a land description in title II regarding the Kootznoowoo, land consolidation provisions. The other amendment adds a provision, also in title II concerning Kootznoowoo, which will help to ensure that any exchange which might ultimately result from negotiations between Kootznoowoo and the Forest Service is one mutually agreed upon by both parties.

Mr. President, I urge my colleagues to join with me in approving this important measure.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

Mr. MITCHELL. Mr. President, I move to reconsider the vote.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THE CALENDAR

Mr. MITCHELL. Mr. President, I ask unanimous consent the Senate proceed to the immediate consideration en bloc of Calendar Nos. 682 and 686; the bills be deemed read a third time and passed; the motion to reconsider the passage of these bills be laid on the table and any statements relating to these items appear in the RECORD at the appropriate place and the consideration of these bills appear individually in the Record.

The PRESIDING OFFICER. Without objection, it is so ordered.

TUMACACORI NATIONAL HISTORICAL PARK

The bill (H.R. 2843) to establish the Tumacacori National Historical Park

in the State of Arizona, was considered, ordered to a third reading, read the third time, and passed.

RELIEF OF CONWELL F. ROBINSON AND GERALD R. ROBINSON

The bill (S. 2606) for the relief of Conwell F. Robinson and Gerald R. Robinson, was considered, ordered to be engrossed for a third reading, read the third time, and passed; as follows:

S. 2606

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. RIGHT OF USE AND OCCUPANCY OF A CERTAIN LAND TRACT IN GLACIER NATIONAL PARK.

(a) RIGHT OF USE AND OCCUPANCY.—The Secretary of the Interior (hereinafter referred to as the "Secretary") shall grant Conwell F. Robinson and Gerald R. Robinson a right of use and occupancy for the property described in subsection (c) for a term ending on the date of the death of Conwell F. Robinson or Gerald R. Robinson, whichever is later.

(b) TERMS AND CONDITIONS.—The right granted pursuant to subsection (a)—

(1) shall be for the reasonable use of the property;

(2) shall be subject to such terms and conditions as the Secretary may prescribe (including termination) to insure that such right does not unreasonably diminish the scenic, historic, and other values for which Glacier National Park was established; and

(3) shall vest upon payment of an administrative fee of $941.13.

(c) DESCRIPTION OF PROPERTY.—The property described in this subsection is parcel of land containing approximately 3 acres, in Government Lot 7, Section 9, Township 35 North Range 21 West, and more particularly described in the United States Department of the Interior Special Use Permit numbers 2-117-59, 2-117-110, and SP1430-9-0068.

REREFERRAL OF S. 15

Mr. MITCHELL. Mr. President, I ask unanimous consent the Calendar No. 551, S. 15, Emergency Medical Services and Trauma Care Improvement Act, be referred to the Senate Commerce Committee for a period of 24 hours in order for the committee to review sections 5 and 6(b) which are under its jurisdiction; and that the bill then be automatically discharged and returned to the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR STAR PRINT—S. 2465

Mr. MITCHELL. Mr. President, I ask unanimous consent that bill S. 2465 be star printed to reflect the changes which I send to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR TUESDAY, JULY 24, 1990

Mr. MITCHELL. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until 9 a.m. on Tuesday, July 24; that following the prayer, the Journal of the proceedings be deemed approved to date; that the time for the two leaders be reserved for their use later in the day; that upon reservation of the two leaders' time there be a period for morning business, not to extend beyond 9:30 a.m., with Senators permitted to speak therein for up to 5 minutes each; that during the period for morning business, Senator NUNN be recognized for up to 15 minutes; that upon resuming the farm bill at 9:30 a.m., there be 1 hour for debate on the Bradley amendment No. 2314 with the time controlled in the usual form and no amendments be in order to the Bradley amendment; that at 10:30 a.m., the Senate proceed to vote on or in relation to the Bradley amendment.

I further ask unanimous consent that immediately following the vote on the Bradley amendment, Senator COHEN be recognized to offer an amendment relating to restrictions on flexible acres; that the Cohen amendment be considered under a 40-minute time limitation, equally divided in the usual form; that no amendments to the Cohen amendment be in order; that upon the use or yielding back of time, the Senate proceed without any intervening action or debate to vote on or in relation to the Cohen amendment.

I further ask unanimous consent that the Senate stand in recess from 12:30 p.m. to 2:15 p.m. tomorrow in order to accommodate the respective party conferences.

The PRESIDING OFFICER. Is there objection? The Chair hears none. The request propounded by the majority leader is agreed to.

Mr. MITCHELL. Mr. President, for the information of Senators, then, there will be a vote on the Bradley amendment at 10:30 a.m. Following that, there will be 40 minutes of debate equally divided on the Cohen amendment, and a vote on that, therefore, should occur at about 11:30 a.m.

I thank my colleagues, particularly the managers, for their assistance in this regard.

I now yield the floor.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum having been suggested, the clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 9 A.M. TOMORROW

Mr. MITCHELL. Mr. President, if the distinguished acting Republican leader has no further business and if no other Senator is seeking recognition, I now ask unanimous consent that the Senate stand in recess under the previous order until 9 a.m. tomorrow, Tuesday, July 24, 1990.

There being no objection, the Senate, at 8:30 p.m., recessed until Tuesday, July 24, 1990, at 9 a.m.

NOMINATIONS

Executive nominations received by the Senate July 23, 1990:

FARM CREDIT ADMINISTRATION

THE FOLLOWING-NAMED PERSONS TO BE MEMBERS OF THE FARM CREDIT ADMINISTRATION BOARD, FARM CREDIT ADMINISTRATION, FOR THE TERMS INDICATED:

FOR THE TERM EXPIRING OCTOBER 13, 1994:

BILLY ROSS BROWN, OF MISSISSIPPI, VICE JIM R. BILLINGTON, RESIGNED.

FOR THE TERM EXPIRING MAY 21, 1996:

JOHN C. DATT, OF VIRGINIA, VICE MARVIN DUNCAN, TERM EXPIRED.

HOUSE OF REPRESENTATIVES—July 23, 1990

The House met at 12 noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Our prayer, gracious God, is for direction and purpose in daily living. May the abilities of Your people discover true meaning in their tasks so their work and witness can find satisfaction and be of service to people everywhere. May Your spirit, O God, so touch each life that goodness and mercy will follow and all will anticipate the joy and wonder of each new day. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER. Will the gentleman from Michigan [Mr. UPTON] please come forward and lead the House in the Pledge of Allegiance?

Mr. UPTON led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Lundregan, one of its clerks, announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 647. An act to amend the Federal securities laws in order to provide additional enforcement remedies for violations of those laws;

S. 1747. An act to provide for the restoration of Federal recognition to the Ponca Tribe of Nebraska, and for other purposes; and

S. 2104. An act to amend the Civil Rights Act of 1964 to restore and strengthen civil rights laws that ban discrimination in employment, and for other purposes.

THE 21ST RUNNING OF PEACHTREE ROAD RACE

(Mr. JONES of Georgia asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JONES of Georgia. Mr. Speaker, on the morning of July 4, Atlanta, GA celebrated our Nation's independence with the 21st running of the Peachtree Road Race.

A half-million Atlantans lined Peachtree Street to cheer for the 40,000 runners in the world's biggest 10 kilometer footrace. Since the first race in 1970, when 110 runners took part, the Peachtree has grown to become America's premier 10K. It is a celebration of life and a festival of fitness.

This year's race was won by Dionicio Ceron of Mexico, but on July 4, everyone was a winner. Finishing some 20 minutes later, I won my eighth coveted Peachtree T-Shirt, and became the envy of my block.

The Peachtree is organized by the Atlanta Track Club, and sponsored by the Atlanta Journal-Constitution. The 1990 race required 3,000 volunteers who, among other duties, dispensed 100,000 gallons of water in 365,000 paper cups to runners who burnt 24,800,000 calories on the 6.2 mile course.

This year's race was a marvel of cohesion and coordination, a tribute to the remarkable talents of Julia Emmons, executive director of the Atlanta Track Club and race director for the Peachtree.

Mr. Speaker, the Peachtree Road Race reflects the spirit of America and the personality of Altanta: young, energetic, ambitious, confident, funloving, and always ready for a challenge.

HURRICANE HUNTER PLANES WILL FLY THROUGH 1997

(Mr. LEWIS of Florida asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEWIS of Florida. Mr. Speaker, I come before this House today to tell my coastal colleagues some good news. This morning, I received a commitment from Secretary of Defense Cheney that the hurricane hunter planes will be flown through this hurricane season and through 1997.

This commitment comes directly on the heels of my conversation with the Secretary on Friday where I stressed the importance of these planes, and the inadequacy of the satellites.

In addition, the planes will be modified and serviced so that they will be better able to serve their mission. This is a sign that the Secretary is serious about his commitment.

For the past 3 years we have fought to keep this program alive and our effort has paid off. Never before have we received such a long-term commitment directly from the Secretary.

I would like to thank my coastal colleagues—31 of whom signed onto my most recent letter to Secretary Cheney—for their strong support for this program.

This program is vital to the safety of millions of coastal Americans * * * and I am pleased that our work has paid off that the hurricane hunters will continue to perform their important mission. I also personally want to thank Secretary Cheney.

GUN BAN IN AMERICA MUST BE STRENGTHENED, NOT RELAXED

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TRAFICANT. Mr. Speaker, the President really put his foot down. He had banned imported machineguns, and he said unless they made some changes, he would not let them into this country. By putting his foot down, they made those changes, and he lifted the ban.

Mr. Speaker, they took off the grenade launchers and the bayonets. My goodness, we may not even have to bolt our doors any longer.

But what about the controversy with the hunters? After they shoot the rabbit 30 times and it still does not die, what will they do without their bayonet? And what about those tricky deer, Mr. Speaker? When they hide in those clumps of bushes, what will our hunters do without a grenade launcher? I mean, what is happening here? May the President go so far that he may stop the hunting of pheasants with heat-seeking missiles someday?

Mr. Speaker, this is not funny. America has become the killing fields of the world. You cannot change the stripes on a zebra, and you cannot disguise a machinegun.

The American Congress and the White House cannot serve two masters. We either serve the American people or the gun lobbies. I say, Mr. Speaker, not only should all imported AK-47's and Uzis be banned, but the American-made models should be banned as well, before our streets begin to look like shooting galleries.

HOUSE SHOULD GET MOVING ON CLEAN AIR ACT AMENDMENTS

(Mr. BOEHLERT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BOEHLERT. Mr. Speaker, the American people want Congress to get moving on the Clean Air Act amendments. Let me point out to Members that on June 12, 1989, President Bush launched the most significant environmental legislative activity of this session of Congress, when he asked Congress to approve major amendments to the Clean Air Act to deal with such very volatile and sensitive areas as acid rain, toxic emissions, and urban smog.

The House of Representatives and the Senate both responded. We passed sweeping legislation called for by President Bush. Then the conferees from the House and Senate were appointed to develop a compromise. Then we had our first meeting, Mr. Speaker, of the conferees. That first meeting was July 13, at which time the Senate put on the table two significant proposals. Since then there has been a deafening silence from the House.

□ 1210

Mr. Speaker, the American people want us to get moving. I would urge the House conferees to come back with their response to the Senate initiative. We must deal with clean air, we must clean up the acid rain, the urban smog, and the toxic emissions.

Get moving, House of Representatives.

NATIONAL GUARD AND RESERVES ARE IMPORTANT TO THE NATIONAL DEFENSE

(Mr. MONTGOMERY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MONTGOMERY. Mr. Speaker, we are getting ready to mark up the Committee on Armed Services authorization bill for the next fiscal year.

I just want to point out to my colleagues again how important the National Guard and Reserves are in the defense of this country.

Of all the combat missions of the Army 50 percent now are in the Army National Guard. About 70 percent of the support missions of the Army are in the Army Reserve. In other words, the Army cannot move without the Army National Guard or the Army Reserve.

Of all the combat air missions of the Air Force 35 percent are now in the Air National Guard.

So as we look at ways to save money I think it is very, very important that we think about turning over more missions to the Reserve forces. We need to think about giving the Reserves better equipment and fair incentives. If we do that they can do the job.

SENATOR ARTHUR V. WATKINS: PUBLIC SERVANT

(Mr. NIELSON of Utah asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. NIELSON of Utah. Mr. Speaker, one of the more unfortunate traits of the human character is the tendency to discount or even forget the significance of contributions made by an individual as time goes by. The accumulation of months and years tends to cloud our remembrance and diminish our appreciation.

We in Congress occasionally have the opportunity to memorialize these contributions, to in a small way acknowledge the value and significance of service rendered by individuals on behalf of their communities, their States and our Nation. Today, I am introducing legislation to do just that.

Senator Arthur Vivian Watkins, born in the small town of Midway, Wasatch County, rose to prominence and prestige as an elected public servant of the great State of Utah. As a U.S. Senator, he served with dignity and distinction, continually confounding the cynics with the balance of his convictions and the firmness of his judgment.

During his 12 years in the Senate, Watkins served as the chairman of the Joint Congressional Committee on Immigration and National Policy and was a member of the Judiciary, Interior and Insular Affairs and Public Works Committees, as well as the joint committees on Economic Report and on Navajo-Hopi Indian Administration.

Perhaps his most notable role was as chairman of the Select Committee on the Censure of Joseph McCarthy.

Mr. Speaker, it is a personal honor to introduce legislation to memorialize the many contributions and valuable service rendered by one of Utah's most distinguished native sons: Senator Arthur Vivian Watkins. My bill would name the U.S. Post Office Building in Orem, UT the "Arthur V. Watkins Post Office." It is but a small gesture in recognition of his selfless service to this community, his State and his Nation.

Time magazine once described Senator Watkins as "a man little know in the past who should be long remembered into the future . * * *" I could not agree more, and invite my colleagues to review my extended remarks on this remarkable public servant and to support this legislation.

JAPANESE TREATMENT OF AMERICAN INVESTORS

(Mr. BURTON of Indiana asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BURTON of Indiana. Mr. Speaker, I think everyone in the United States knows how easy it is for the Japanese and Japanese industry to invest in the United States of America. Recently a Japanese conglomerate bought Columbia Pictures with no trouble. The Mitsubishi Estate Co., Japan's largest real estate company, acquired controlling interest in the Rockefeller Center. A Japanese group headed by Mori Building Development bought 85 percent of the Four Oaks Palace, a Houston building complex, for $300 million.

So they can invest in the United States without any problem.

Mr. T. Boone Pickens owns 26 percent of a company called Kyoto and he cannot even get representation on the board of directors.

Now they just had a board meeting in Japan about a week ago and they made the American investors sit on one side of the room and the Japanese investors sit on the other side of the room, and I want to read to you some of the comments that they made.

They screamed and hollered at the Americans across the room, the American investors.

They said, No. 1, "Go ahead, suit yourself in the U.S. Congress, see if we care. We are not afraid of the U.S. Congress." They said, "Remember Pearl Harbor." And I hope we do.

They said, "Japan has already defeated America in the economic war." They said, "Yankee, go home, go home Yankee, go home."

They said, "Americans have no business in the Japanese industry or Japanese companies." They said, "Return to America. You're just too ignorant to do business here." Then they said to a female interpreter, a female stockholder there, "What is wrong with you? What is your job? Are you a stripper?" They were demeaning this woman who was there.

Then they used expletives, they used foul language at the Americans there who own stock in that company.

All they asked for was representation on that board of directors. Now we need to pass legislation in this body demanding reciprocity in investment. If they are going to invest in Buy America, then by golly we ought to have the same rights over there, we ought to have the same rights in trade as well.

FARM SUBSIDIES: WITH APOLOGIES TO LEWIS CARROLL

(Mr. CONTE asked and was given permission to address the House for 1

minute and to revise and extend his remarks.)

Mr. CONTE. Mr. Speaker, knowing how poetry inspires us to action, I give to you some thoughts in verse on farm subsidy payment limits—with apologies to Lewis Carroll:

"The time has come," the Congress said, "to speak of subsidies, for cotton, rice, for wheat, and corn, for sheep, and honeybees, and how it is they can surpass two-fifty grand a piece."

"How is it so, I want to know," a colleague did inquire, "Can they evade the cap we set, so payments can soar higher?"

"That's just the case," I said in turn, "the situation's dire."

"A loophole in the law permits a doubling of the take, to twice the limit Congress set the last time Congress spake. So now the fat-cat farmer can both have and eat his cake."

It isn't right, I say to you, to keep the huge loophole, of hundred-thousand dollar checks per individual. A billion dollars can be saved, now that should be our goal.

An honest cap, the Members know, Is what we chiefly need to stop abuse, and waste besides, on that we are agreed. Amend the bill the Conte way, That would be good, indeed.

THE 1990 FARM BILL

(Mr. DE LA GARZA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DE LA GARZA. Mr. Speaker and my colleagues, today we will begin the process of discussing what we call the farm bill, farm legislation.

I would ask all of my colleagues to work with us in order that we might evolve in the end and craft legislation worthy to be remembered and that we do the responsible thing in this House.

Unfortunately and regretfully, for no other reason perhaps than media coverage, we have painted ourselves into a corner dealing solely with one item.

What you will be talking about, what we will be discussing when we discuss the farm bill is the food chain, food supply, who eats what, when they eat it, how they eat it, what amount of disposable income is available.

Mr. Speaker, we are the best fed people in the world, in the history of the world, for the least amount of disposable income per family.

As a matter of fact, not that we do no have hunger in America, but that never has been the fault of the farmer. So, pointing the finger at this farmer or that farmer or how you are going to balance the budget is not the most important factor. The most important factor is: Are we as a nation able to provide for all the people of this great country of ours at a reasonable price, a good-quality food? That is what we will be discussing, not poetry or rhyme or who got what; but rather is the food available and are we the best fed in the world?

That will be the discussion and hopefully it will evolve into a triumph for this House, that consensus will prevail and, with civility and some degree of humor, we may arrive at a reasonable and satisfactory solution to all Members and to all the people of the United States of America.

A PROMPT SUMMIT AGREEMENT IS DESIRABLE

(Mr. GINGRICH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GINGRICH. Mr. Speaker, your commitment that the House will recess on August 3 highlights the pressure on the budget summit. If we are to get a summit agreement and pass the legislation before the August recess we must reach initial agreements this week.

The President has taken the risk of calling the summit and agreeing to Democratic leadership demands that taxes must be on the table. Now it is up to the Democratic leadership. Are the Democrats prepared to offer real discretionary spending cuts? So far they have offered none. Are the Democrats prepared to offer real budget reforms? So far they have offered none.

This week may be our last chance to forge a bipartisan agreement to control spending, reduce the deficit and increase economic growth.

□ 1220

I hope the Democratic leadership will work with Members to achieve such an agreement. If the budget summit collapses, the President will be forced to veto appropriations bills and to appeal to the country.

For nearly 3 months the President has been trying to work with the Democratic leaders in Congress. If the summit fails, it will be clear the country must choose between spending cuts and massive tax increases because the current Congress will have proven it cannot do its job.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. MONTGOMERY). Pursuant to the provisions of clause 5 of rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

However many recorded votes ordered on suspensions debated prior to consideration of House Resolution 439 will be taken after the vote on House Resolution 439. Any rollcall votes ordered on suspensions debated after the vote on House Resolution 439 will be taken on Tuesday, July 24, 1990.

DISABILITIES PREVENTION ACT OF 1990

Mr. WAXMAN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 4039) to amend the Public Health Service Act to establish a program for the prevention of disabilities, and for other purposes.

The Clerk read as follows:

H.R. 4039

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Disabilities Prevention Act of 1990".

"SEC. 2. ESTABLISHMENT OF PROGRAM FOR PREVENTION OF DISABILITIES.

Part B of title III of the Public Health Service Act (42 U.S.C. 243 et seq.) is amended by inserting after section 314 the following new section:

"SEC. 315. PREVENTION OF DISABILITIES.

"(a) IN GENERAL.—The Secretary, acting through the Director of the Centers for Disease Control, may make grants to public and nonprofit private entities for the purpose of carrying out programs for the prevention of disabilities and for the prevention of secondary conditions resulting from disabilities.

"(b) CERTAIN AUTHORIZED ACTIVITIES.—With respect to the prevention of disabilities and conditions described in subsection (a), activities for which the Secretary may make a grant under such subsection include—

"(1) coordinating activities for the prevention of disabilities;

"(2) conducting demonstrations and interventions;

"(3) conducting surveillances and studies;

"(4) educating the public; and

"(5) educating and training health professionals (including allied health professionals) and conducting activities to improve the clinical skills of such professionals.

"(c) REPORTS TO SECRETARY.—The Secretary may not make a grant under subsection (a) unless the applicant for the grant agrees to submit to the Secretary such reports as the Secretary may require with respect to the grant.

"(d) PRIORITIES.—The Secretary shall consult with the National Council on Disabilities in setting priorities to carry out this section.

"(e) REQUIREMENT OF APPLICATION.—The Secretary may not make a grant under subsection (a) unless an application for the grant is submitted to the Secretary and the application is in such form, is made in such manner, and contains such agreements, assurances, and information as the Secretary determines to be necessary to carry out this section.

"(f) LIMITATION WITH RESPECT TO EDUCATION OF HEALTH PROFESSIONALS.—In making grants under subsection (a), the Secretary may not, for activities described in subsection (b)(5), obligate more than 10 percent of the amounts appropriated under subsection (i) for any fiscal year.

"(g) TECHNICAL ASSISTANCE.—The Secretary may provide training, technical assistance, and operation of any program for the prevention of disabilities and for the prevention of secondary conditions resulting from such disabilities.

"(h) PROVISION OF SUPPLIES AND SERVICES IN LIEU OF GRANT FUNDS.—

"(1) IN GENERAL.—Upon the request of a grantee under subsection (a), the Secretary may, subject to paragraph (2), provide supplies, equipment, and services for the purposes of aiding the grantee in carrying out such subsection and, for such purpose, may detail to the grantee any officer or employee of the Department of Health and Human Services.

"(2) CORRESPONDING REDUCTION IN PAYMENTS.—With respect to a request described in paragraph (1), the Secretary shall reduce the amount of payments under subsection (a) to the grantee by an amount equal to the costs of detailing personnel (including pay, allowances, and travel expenses) and the fair market value of any supplies, equipment, or services provided by the Secretary. The Secretary shall, for the payment of expenses incurred in complying with such request, expend the amounts withheld.

"(i) EVALUATIONS AND REPORTS.—

"(1) EVALUATIONS.—The Secretary shall, directly or through contracts with public or private entities, provide for evaluations of programs carried out pursuant to subsection (a).

"(2) REPORTS.—The Secretary shall, not later than January 31, 1991, and annually thereafter, submit to the Committee on Energy and Commerce of the House of Representatives, and to the Committee on Labor and Human Resources of the Senate, a report summarizing evaluations carried out pursuant to paragraph (1) during the preceding fiscal year. The Secretary shall provide a copy of each such report to the National Council on Disability.

"(j) AUTHORIZATION OF APPROPRIATIONS.—For the purpose of making grants and contracts under this section, there are authorized to be appropriated $10,000,000 for fiscal year 1991, $15,000,000 for fiscal year 1992, and $20,000,000 for fiscal year 1993.".

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from California [Mr. WAXMAN] will be recognized for 20 minutes and the gentleman from Illinois [Mr. MADIGAN] will be recognized for 20 minutes.

The Chair recognizes the gentleman from California [Mr. WAXMAN].

GENERAL LEAVE

Mr. WAXMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include therein extraneous material on H.R. 4039, the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. WAXMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 4039, the Disability Prevention Act of 1990, introduced by our colleague, SILVIO CONTE and cosponsored by Congressman MADIGAN, Congressman TAUKE, and myself. This legislation would authorize a program of disability prevention based at the Centers for Disease Control.

Mr. Speaker, one of the cornerstones of public health is prevention. When we talk about the need for prevention, disability as a human condition is no different than heart disease or measles. Most people know that a vaccine can prevent getting measles. And most people know that a good diet and regular exercise can help prevent heart disease.

But not as much is generally known about disabilities or how to prevent them. There are many kinds of disabilities: mental retardation, hearing or vision impairment—even hip fractures and arthritis can be limiting disabilities. And the causes for disability can vary widely—from lead poisoning to substance abuse during pregnancy, to genetic or environmental factors.

We spend close to $62 billion in Federal funds each year for acute care and long-term services for persons with disabilities. But because disabilities can't be lumped into one category, information collection on disabilities—and the programs to prevent them—are often not coordinated and sometimes unknowingly duplicated.

This legislation would authorize a program of disabilities prevention at CDC and allow CDC to form cooperative agreements with public and nonprofit private entities to support prevention and evaluation activities, to provide technical assistance, and to collect data necessary to plan for and review programs. The legislation would authorize $10 million in fiscal year 1991, $15 million in 1992, and $20 million in fiscal year 1993.

I ask all Members to support H.R. 4039.

Mr. MADIGAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I yield myself such time as I may consume.

H.R. 4039 is a small step to help improve the lives of Americans with disabilities and to help prevent more people from becoming disabled. In 1988, the Centers for Disease Control began a national program to address these issues. While CDC has done an admirable job, prevention activities across the country are often disparate and uncoordinated. H.R. 4039 provides funds to better coordinate prevention activities.

H.R. 4039 also recognizes the serious problem of secondary disabilities in persons with disabilities. This focus on the prevention of complications and secondary disabilities will help alleviate the devastating problems caused by these complications and improve the lives of the disabled.

I urge my colleagues to support H.R. 4039.

Mr. Speaker, I yield to the gentleman from Massachusetts [Mr. CONTE], a supreme agriculturist and the principal sponsor of this bill.

Mr. CONTE. Mr. Speaker, I rise in strong support of this bill, H.R. 4039, the Disabilities Prevention Act of 1990. I want to thank my good friends, HENRY WAXMAN, ED MADIGAN, and TOM TAUKE for cosponsoring this excellent legislation with me.

The Congress, after long and careful deliberation, passed the landmark Americans With Disabilities Act. The ADA is the Declaration of Independence for all disabled Americans. President Bush will be signing that bill very shortly. I was an original cosponsor of that bill. I, along with many of my colleagues who helped pass the bill, are looking forward to the special Rose Garden signing ceremony.

Now we have before us a bill which will go a quantum leap further. This legislation will protect people who are now disabled from acquiring further disabilities. It will also promote new ways to prevent disabilities from happening to all people.

Prevention is the unsung hero of American medicine today. Sadly, so much of our health care system is reactive rather than pro-active. Our Government spends billions and billions of hard-earned taxpayers' dollars treating disease after it happens. Not enough is being done to prevent costly illnesses and disabilities before it happens.

And when it comes to physical disabilities, prevention gives us the biggest bang for the public buck. The cost of disabilities is truly staggering: $120 billion per year. That doesn't take into account the emotional suffering by the patients and their families over many years, even decades for some. Prevention of disabilities will clearly be one of the most cost-effective investments we can make with our precious health care dollar.

When I heard about the tremendous burden that disabilities impose upon our society and our budget, I decided to take action. From my perch as the ranking member of the Appropriations Committee, I started the Disability Prevention Program at the Centers for Disease Control in 1987 with a little bit of seed money. It was enough to start several State programs and to increase public awareness of disability prevention.

Last year, we reached the $4½ million mark.

The track record so far has been impressive. Nine States now have cooperative agreements with the CDC and several more are getting ready to set up their own programs. CDC has done a remarkable job in coordinating all the State programs.

In my home State of Massachusetts, the Office of Disability Prevention has

been pioneering some very innovative projects in disability prevention. Several quality projects are already underway. One community project looks at the incidence of spinal instabilities in persons with Down's syndrome. Another project promotes health and fitness among disabled individuals at an independent learning center. Still another project is looking at ways to improve home safety for disabled children.

Even with the substantial gains we have made, disability prevention deserves a much higher priority. With so many people vulnerable to further injury, especially the elderly, children, the bedridden, the mentally ill, minorities, low-income individuals, and many more—the need for prevention is almost overwhelming. That's why I, along with my friends, HENRY, ED, and TOM, decided to launch this initiative.

It would create a new program at CDC specifically geared for disability prevention. It would authorize additional money for the program and expand the range of activities in the field.

The bill authorizes $10 million for fiscal year 1991, $15 million for fiscal year 1992, $20 million for fiscal year 1993, which is enough to provide strong measured growth. Our goal is to have disability prevention programs in all 50 States. I'm confident that we will attain that goal within the next 10 years.

In fact, I'm so confident that I decided to give this bill a big welcoming present. In the Labor-HHS appropriations bill that this House passed on Thursday, I made sure that the full $10 million was there. I also thank Chairman BILL NATCHER for his help and support on my initiative.

The $10 million in this year's bill more than doubles this program. This boost will expand current programs, substantially increase the number of States participating and strengthen CDC coordination of all State programs.

The CDC is the world's premier institution on disease and injury prevention. Their work has been nothing short of outstanding.

I want to cast my vote of confidence behind their new director, Dr. Bill Roper, who I know shares my enthusiasm for disability prevention. I also want to thank Sandy Perrino, the Chair of the National Council on Disability, for her support and guidance. And I want to thank all those who chimed in with their visits, letters, calls, and faxes.

Mr. Speaker, I devote this legislation to the millions of disabled Americans whose quality of life will be protected and enhanced. I urge all my colleagues to join me in support of this important bill. Let's make the spirit of the ADA bill a living, breathing reality.

□ 1230

Mr. Speaker, in closing, let me say again that I just cannot thank our subcommittee chairman, the gentleman from California [Mr. WAXMAN] and the gentleman from Illinois [Mr. MADIGAN] enough for their consideration. They have been super not only in their leadership, but what a pleasure it has been to work with those two gentlemen.

Mr. WAXMAN. Mr. Speaker, after those comments, there is nothing else to be said. I yield back the balance of my time.

Mr. MADIGAN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. MONTGOMERY). The question is on the motion offered by the gentleman from California [Mr. WAXMAN] that the House suspend the rules and pass the bill, H.R. 4039.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

VACCINE AND IMMUNIZATION AMENDMENTS OF 1990

Mr. WAXMAN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 4238) to amend the Public Health Service Act to extend various programs with respect to vaccine-preventable diseases, as amended.

The Clerk read as follows:

H.R. 4238

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Vaccine and Immunization Amendments of 1990".

SEC. 2. EXTENSION OF PROGRAM OF GRANTS FOR IMMUNIZATIONS.

Section 317(j)(1) of the Public Health Service Act (42 U.S.C. 247B(j)(1)) is amended—

(1) in subparagraph (A), by striking "there are authorized" and all that follows in the first sentence and inserting the following: "there are authorized to be appropriated $185,000,000 for fiscal year 1991, and such sums as may be necessary for each of the fiscal years 1992 through 1995.";

(2) in subparagraph (B), by striking "after the date" and all that follows and inserting the following: "after October 1, 1990, there are authorized to be appropriated such sums as may be necessary."; and

(3) by striking subparagraph (C).

SEC. 3. SUPPLY OF VACCINES.

(a) IN GENERAL.—The Secretary of Health and Human Services, acting through the Director of the Centers for Disease Control, shall acquire and maintain a supply of vaccines sufficient to provide vaccinations throughout a 6-month period. Any proceeds received by the Secretary from the sale of vaccines from such supply shall be available to the Secretary for the purpose of purchasing vaccines for the supply. Such proceeds shall remain available for such purpose until expended.

(b) AUTHORIZATION OF APPROPRIATIONS.—For the purpose of carrying out subsection (a), there are authorized to be appropriated $5,000,000 for fiscal year 1991, and such sums as may be necessary for each of the fiscal years 1992 through 1995.

SEC. 4. EXTENSION OF NATIONAL VACCINE PROGRAM.

Section 2106 of the Public Health Service Act (42 U.S.C. 300aa-6) is amended—

(1) in subsection (a), by striking "there are authorized" and all that follows and inserting the following: "there are authorized to be appropriated $4,000,000 for fiscal year 1991, and such sums as may be necessary for each of the fiscal years 1992 through 1995."; and

(2) in subsection (b), by striking "there are authorized" and all that follows and inserting the following: "there are authorized to be appropriated $30,000,000 for fiscal year 1991, and such sums as may be necessary for each of the fiscal years 1992 through 1995.".

SEC. 5. TECHNICAL AMENDMENTS.

(a) SECTION 2111.—Section 2111 of the Public Health Service Act (42 U.S.C. 300aa-11) is amended—

(1) in subsection (a)(5)(A), by striking out "without prejudice" the second time it occurs,

(2) in subsection (d), by striking "(d) except as provided in paragraph (3)," before "(d) ADDITIONAL INFORMATION", and

(3) in subsection (e), by striking "(e)" before "(e) SCHEDULE".

(b) SECTION 2113.—Section 2113(c) of the Public Health Service Act (42 U.S.C. 300aa-13(c)) is amended by inserting "the" after "special masters of".

(c) SECTION 2115.—Section 2115 of the Public Health Service Act (42 U.S.C. 300aa-15) is amended—

(1) in subsection (e)(2), by striking out "the Program," the second time it occurs and all that follows through "limited to the costs" and inserting the following: "the Program, in awarding compensation on such petition the special master or court may include an amount of compensation limited to the costs",

(2) in subsection (f)—

(A) in paragraph (2), in the second sentence, by striking out "section 2121(b)" and inserting "section 2121(a)", and

(B) in paragraph (4)(B), in the last sentence, by striking out "subsection (i)" and inserting "subsection (j)", and

(3) in subsection (j), by inserting "and" after "1992,".

(d) SECTION 2121.—The last sentence of section 2121(a) of the Public Health Service Act (42 U.S.C. 300aa-21(a)) is amended to read as follows: "If a person elects to receive compensation under a judgment of the court or is deemed to have accepted the judgment of the court, such person may not bring or maintain a civil action for damages against a vaccine administrator or manufacturer for the vaccine-related injury or death for which the judgment was entered.".

SEC. 6. EFFECTIVE DATES.

The amendment made by section 5(d) shall take effect as if such amendment had been included in section 6601(n) of Public Law 101-239. This Act and the amendments made by this Act shall otherwise take effect upon the date of the enactment of this Act.

The SPEAKER pro tempore. Is a second demanded?

Mr. MADIGAN. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from California [Mr. WAXMAN] will be recognized for 20 minutes, and the gentleman from Illinois [Mr. MADIGAN] will be recognized for 20 minutes.

The Chair recognizes the gentleman from California [Mr. WAXMAN].

GENERAL LEAVE

Mr. WAXMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the legislation under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. WAXMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as presented to the House today, H.R. 4238 is designed to achieve three goals. First, it would reauthorize the Childhood Immunizations Program of the Centers for Disease Control. Second, the bill would reauthorize—at current levels—the National Vaccine Program which conducts and coordinates Federal vaccine development. Third, the legislation would make technical corrections to the National Vaccine Injury Compensation Program.

As Members well know, Mr. Speaker, the Childhood Immunization Program provides grants to States for the purchase of vaccine against preventable diseases such as polio, measles, and pertussis. It also provides for the administration of State childhood immunization programs.

H.R. 4238 would provide for a 5-year extension of this program and would set an authorization level of $185 million for fiscal year 1991. This amount is needed to address a number of financial shortfalls that the program would otherwise face in the coming year, including: First, funds for a second measles shot that CDC is now recommending for all children; second, funds to provide emergency immunization services in areas that are undergoing outbreaks of measles; third, funds to provide hepatitis B vaccine for women and newborns; and fourth, funds to assist States in the operation of their own childhood immunizations programs.

For each of fiscal years 1992 through 1995, H.R. 4238 would establish an authorization level of "such sums as may be necessary".

The provisions included in this legislation relating to the National Vaccine Injury Compensation Program would correct drafting errors that were made last year when the program underwent substantial revision as part of Public Law 101-239. These technical corrections are meant to make the Vaccine Injury Compensation Program more easily understood, and, in one instance, to remedy a serious error that might result in additional litigation—a result which was never intended by the Congress.

Each of the programs addressed in this legislation, Mr. Speaker—the Childhood Immunizations Program, the National Vaccine Program, and the National Vaccine Injury Compensation Program—enjoys strong bipartisan support. I am pleased, therefore, that Mr. MADIGAN, the distinguished ranking Republican member of the subcommittee, as well as Chairman DINGELL and Congressman ROY ROWLAND, joined with me in introducing the original legislation under consideration today.

I ask all Members to support H.R. 4238, with an amendment.

Mr. Speaker, I reserve the balance of my time.

Mr. MADIGAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, since its establishment by the Vaccination Assistance Act of 1962, the Centers for Disease Control's Immunization Program has become one of the most successful prevention programs in public health. At present, approximately 50 percent of childhood vaccines are administered in the public sector. Currently nearly 98 percent of all children are immunized prior to entry into school. The high levels of immunization that the program has been able to achieve have led to reductions of at least 90 percent in each of the vaccine-preventable diseases. This has been a tremendously successful program that merits our support.

Despite these achievements, CDC still faces a number of challenges. Last year, we experienced unusual outbreaks of measles unlike anything seen in the recent past. As a result of those outbreaks, CDC recommended that children receive a second measles shot. H.R. 4238 will help CDC meet this challenge by authorizing an additional $25 million for this second round of shots.

H.R. 4238, as amended, also solves a number of technical problems that have arisen with respect to the implementation of the vaccine compensation program and the future of the vaccine stockpile.

For these reasons, I urge my colleagues to support H.R. 4238.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. WAXMAN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California [Mr. WAXMAN] that the House suspend the rules and pass the bill, H.R. 4238, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

HOME HEALTH CARE DEMONSTRATION PROJECTS EXTENSION ACT OF 1990

Mr. WAXMAN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 5112) to amend the Public Health Service Act to extend certain programs for health care services in the home, as amended.

The Clerk read as follows:

H.R. 5112

Be it enacted by the Senate and House of Representatives of the United States of American in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Home Health Care Demonstration Projects Extension Act of 1990".

SEC. 2. EXTENSION OF PROGRAMS FOR DEMONSTRATION PROJECTS FOR HEALTH CARE SERVICES IN THE HOME.

(a) GENERAL PROGRAM.—

(1) NUMBER OF GRANTS.—Section 395(a) of the Public Health Service Act (42 U.S.C. 280c(a)) is amended in the matter preceding paragraph (1) by striking "shall make" and all that follows through "grants" and inserting the following: "shall make not less than 3, and not more than 10, grants".

(2) SERVICES PROVIDED.—Section 395(a)(1) of the Public Health Service Act (42 U.S.C. 280c(a)(1)) is amended by striking "skilled" and all that follows and inserting the following: "skilled nursing care services, homemaker or home health aide services, or personal care services are provided in the homes of the individuals;".

(3) AGE OF RECIPIENTS OF SERVICES.—Section 395(b) of the Public Health Service Act (42 U.S.C. 280c(b)) is amended by striking "to ensure" and all that follows and inserting the following: "to ensure that—

"(1) not less than 25 percent of the grant is expended to provide services under such subsection to individuals who are between 65 and 84 years of age (inclusive); and

"(2) not less than 10 percent of the grant is expanded to provide such services to individuals who are not less than 85 years of age.".

(4) AUTHORIZATION OF APPROPRIATIONS.—Section 397(e) of the Public Health Service Act (42 U.S.C. 280c-2(e)) is amended—

(A) by striking "there is" and inserting "there are"; and

(B) by inserting before the period the following: ", $7,500,000 for fiscal year 1991, and such sums as may be necessary for each of the fiscal years 1992 and 1993".

(b) PROGRAM REGARDING ALZHEIMER'S DISEASE.—

(1) NUMBER OF GRANTS.—Section 398(a) of the Public Health Service Act (42 U.S.C. 280c-3(a)) is amended in the matter preceding paragraph (1) by striking "shall make" and all that follows through "grants" and inserting the following: "shall make not less than 3, and not more than 10, grants".

(2) COORDINATION OF SERVICES.—Section 398(a)(1) of the Public Health Service Act

(42 U.S.C. 280c-3(a)(1)) is amended by striking "by public and private organizations" and inserting "with public and private organizations".

(3) AUTHORIZATION OF APPROPRIATIONS.—Section 399A(e) of the Public Health Service Act (42 U.S.C. 280c-5(e)) is amended—

(A) by striking "there is" and inserting "there are"; and

(B) by inserting before the period the following: ", $7,500,000 for fiscal year 1991, and such sums as may be necessary for each of the fiscal years 1992 and 1993".

SEC. 3. EFFECTIVE DATE.

The amendments made by this Act shall take effect October 1, 1990, or upon the date of the enactment of this Act, whichever occurs later.

The SPEAKER pro tempore. Is a second demanded?

Mr. MADIGAN. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from California [Mr. WAXMAN] will be recognized for 20 minutes, and the gentleman from Illinois [Mr. MADIGAN] will be recognized for 20 minutes.

The Chair recognizes the gentleman from California [Mr. WAXMAN].

GENERAL LEAVE

Mr. WAXMAN. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days in which to revise and extend their remarks on the legislation now under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. WAXMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the purpose of H.R. 5112 is to reauthorize two Public Health Service Act home health care demonstration programs whose authorities expire at the end of fiscal year 1990.

The first program—the General Program—is designed to provide home health services to low-income individuals who, with the availability of such assistance, may avoid institutionalization or prolonged hospitalization. The second program is intended to provide similiar types of services to individuals with Alzheimer's disease. Both demonstrations provide grant funds directly to the States.

H.R. 5112 would reestablish these two programs for the next 3 fiscal year at authorization levels—for each program—of $7.5 million in fiscal year 1991 and at such sums as may be necessary in both fiscal years 1992 and 1993. In addition, H.R. 5112 would expend the number of States that would be eligible to receive grant awards under both demonstration authorities from 5 to 10. H.R. 5112 would also clarify that unskilled services such as homemaker and personal care services as well as skilled nursing services can be made available to individuals participating in the General Program. Finally, the legislation would specifically target a portion of the services provided under the General Program to those elderly Americans age 85 and older.

This legislation has bipartisan support. It was originally introduced by our colleague, Congressman BRUCE, along with Congressman WYDEN, Congressman RINALDO, and myself, as well as the chairman of the Aging Committee, Congressman ROYBAL. All of us are strong advocates of home care services for the frail and disabled and believe that the programs under consideration today can help get that care to those most in need.

I urge all Members to support H.R. 5112, with an amendment.

□ 1240

Mr. Speaker, I reserve the balance of my time.

Mr. MADIGAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I support the continuing efforts authorized by H.R. 5112 to provide funds for demonstration projects for home health care services to frail and disabled individuals, as well as those suffering from Alzheimer's disease. These services have been effective in limiting, postponing, and even preventing institutionalization of such individuals.

I think it is important that we continue to try to find the most cost-effective and humane way to provide medical care. I am particularly pleased that the bill requires the development of demonstration projects to meet the needs of a fast growing segment of our elderly population, the elderly over 85 years of age.

I hope my colleagues will join me in supporting this legislation.

Mr. BRUCE. Mr. Speaker, I first want to thank my fellow cosponsors, Mr. WAXMAN, Mr. WYDEN, Mr. ROYBAL, and Mr. RINALDO, for their support of these important grants. I also wanted to achknowledge and thank Mr. WAXMAN, Mr. RINALDO, and their staffs for their help in moving this legislation so quickly.

The home health care and Alzheimer's demonstration projects authorized in this legislation were first authorized in 1987 as part of the Older Americans Act. The home health care grants were made available to States to provide skilled medical services to low-income individuals who are uninsured and do not qualify for Medicaid or Medicare.

The bill reauthorizes and expands the existing Home Health Grants Program. Low-income individuals would continue to receive skilled nursing care and 25 percent of the funds would be directed to people over 65. When the bill was marked up in the Energy and Commerce Committee, Mr. BILIRAKIS offered an amendment to ensure that an additional 10 percent of the funding would go to recipients over 85 years.

The bill increases the types of services available by adding home health aide or personal care service, and the number of grants to States were increased to 10. The bill also expands the funding level to $7.5 million.

My fellow colleagues, home health care is a less expensive, more effective form of care, particularly for the elderly. When a person reaches a certain age, and their families aren't sure what the next step should be, an elderly person wants nothing more than to remain in their home. It is more familiar to them and in most circumstances the patient will react better to service provided in their home, as opposed to a nursing home.

The second section of H.R. 5112 was also part of the Older Americans Act of 1987, which will provide care and treatment for Alzheimer's victims and their families or caregivers.

Until recently, researchers estimated there were about 2.5 million Alzheimer's victims in the United States. Unfortunately, this is not the case. In November 1989, scientists at Boston's Bringham and Woman's Hospital found more than 10 percent of people over 65 and almost half over 85, were suffering from this terrible disease. The National Institute on Aging reports that by the year 2050, more than 14 million Americans will have the disease.

Even with these startling numbers, there are virtually no services available to help these people. There is nothing that can be done for the woman in Illinois who is the only child of parents who both have the disease, and there is nothing available for the woman whose husband has the disease and who is showing signs of the disease herself.

Some States, including Illinois, have developed demonstration projects, through different means, but by and large, no real services exist. This bill is a positive step toward making grants available to States to develop their own programs.

In 1987, the Alzheimer's grants were authorized but never funded. The outline of the program in H.R. 5112 would remain the same as the 1987 grants. The grants would be available for States to apply to coordinate the development and operation of various programs for individuals with Alzheimer's disease—or related disorders—and to the families and care providers of these victims.

The program would also continue to provide basic care to Alzheimer's patients in health facilities and to establish an informational network on available services and the legal rights of Alzheimer's patients.

Mr. MADIGAN. Mr. Speaker, I have no further requests for time and yield back the balance of my time.

Mr. WAXMAN. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. MONTGOMERY). The question is on the motion offered by the gentleman from California [Mr. WAXMAN] that the House suspend the rules and pass the bill, H.R. 5112, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended, and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

INJURY PREVENTION AND CONTROL AMENDMENTS OF 1990

Mr. WAXMAN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 5113) to amend the Public Health Service Act to revise and extend the program for the prevention and control of injuries.

The Clerk read as follows:

H.R. 5113

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Injury Prevention and Control Amendments of 1990".

SEC. 2. REVISION AND EXTENSION OF PROGRAM FOR PREVENTION AND CONTROL OF INJURIES.

(a) REQUIREMENT OF REPORT ON ACTIVITIES OF AGENCY.—Section 393 of the Public Health Service Act (42 U.S.C. 280b-2) is amended to read as follows:

"REPORT

"SEC. 393. By not later than September 30, 1992, the Secretary, acting through the Director of the Centers for Disease Control, shall prepare and submit to the Congress a report describing the activities conducted or supported under this part. The report shall include—

"(1) information regarding the practical applications of research conducted pursuant to subsection (a), including information that has not been disseminated under subsection (b); and

"(2) information on such activities regarding the prevention and control of injuries in rural areas, including information regarding injuries that are particular to rural areas.".

(b) AUTHORIZATION OF APPROPRIATIONS.—Section 394 of the Public Health Service Act (42 U.S.C. 280b-3) is amended—

(1) in the first sentence, by inserting before the period the following: ", $30,000,000 for fiscal year 1991, and such sums as may be necessary for each of the fiscal years 1992 and 1993"; and

(2) by striking the subsection designation, and by striking the second sentence.

SEC. 3. EFFECTIVE DATE.

The amendments made by this Act shall take effect October 1, 1990, or upon the date of the enactment of this Act, whichever occurs later.

The SPEAKER pro tempore. Under this rule, a second is not required on this motion.

The gentleman from California [Mr. WAXMAN] will be recognized for 20 minutes, and the gentleman from Illinois [Mr. MADIGAN] will be recognized for 20 minutes.

The Chair recognizes the gentleman from California [Mr. WAXMAN].

GENERAL LEAVE

Mr. WAXMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 5113.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. WAXMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I ask that the House suspend the rules and pass the bill, H.R. 5113, the Injury Prevention and Control Amendments of 1990.

Mr. Speaker, the purpose of H.R. 5113 is to reauthorize the Federal Injury Control Program whose authority expires at the end of fiscal year 1990.

The Injury Control Program, administered by the Centers for Disease Control, provides grants to State and local health departments and to academic institutions, for programs and research on the prevention and control of injuries. Grant projects include work on childhood injuries, trauma care, and spinal cord injury. The program has grown significantly since it was first established and is now supporting over 25 grants to State and local health departments, seven injury control research centers, and 38 other research projects.

H.R. 5113 would reauthorize the Injury Control Program at authorization levels of $30 million in fiscal year 1992 and "such sums as may be necessary" in both fiscal years 1992 and 1993. No other substantive changes would be made to the program.

This legislation has bipartisan support. It has been introduced by our distinguished colleague, Congressman BRUCE, along with myself and Congressman MADIGAN, the distinguished ranking Republican member of the Health Subcommittee.

I urge all Members to support H.R. 5113.

Mr. MADIGAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, for people under 44 years of age, injury is the leading cause of death. Tragically, nearly one in four Americans will be seriously injured this year and these injuries will be costly. The total lifetime costs of injuries sustained in 1985 was estimated at $158 billion—far more than for other diseases.

The centers for disease control's injury control program applies epidemiology and biomechanics to the prevention of injury and rehabilitation. The program provides grants for research on the causes of injuries, interventions to prevent injuries, and acute care and rehabilitation for when an injury is not prevented. The injury control program also provides grants to State and local health departments for injury control.

This program not only saves money by avoiding health care costs for treating injuries but saves lives and prevents needless pain and suffering.

I am pleased to be a cosponsor of H.R. 5113 and ask my colleagues to support this bill.

Mr. Speaker, I reserve the balance of my time.

Mr. BRUCE. Mr. Speaker, I would like to thank my fellow colleagues, Mr. WAXMAN and Mr. MADIGAN, for their cosponsorship of H.R. 5113, the Injury Prevention and Control Amendments of 1990. I would like to acknowledge their assistance in moving this important piece of legislation so quickly through both the subcommittee and full committee.

The Injury Control Program, administered by the centers for disease control, was developed 5 years ago because of a report called "Injury in America." The report estimated injury is he leading cause of death among people under the age of 44.

Health care costs in this country last year exceeded $600 billion, and are climbing every year. The total cost of injury, from motor vehicles to gunshot wounds to basic playground falls, exceeded $158 billion in 1985. Unfortunately we spend less on its research than any other health problems.

Rural areas have suffered greatly from injury, particularly in farm-related accidents. In 1988, motor vehicle accidents on farms accounted for 250,000 disabling injuries. That year also saw 800 deaths and 140,000 injuries in agricultural work. In 1990, five farmers will go to work every day and die because of serious injury.

Last year in the United States there were more fatalities in farming than in any other profession, but farm deaths have failed to draw national attention. This is alarming, considering that 400 out of 1,700 farm deaths last year were children. On March 8, 1990, the Subcommittee on Health and Environment held hearings on the programs and stressed the importance of studying injury in rural areas. A study of rural injuries became a part of this legislation.

Nationwide, more than 143,000 persons die each year of injuries. Annually, 5 million productive years are lost because of premature death resulting from injuries.

Death is only one part of the problem. At the March subcommittee hearing on the injury program one witness reported that 16 hospitalizations occur for every 1 injury death. Injuries account for 1 out of every 10 hospitalizations and for 1 of every 6 hospital days. Twenty-five percent of all emergency room visit are injury-related and over one-quarter of these are covered by public funds.

The Injury Prevention Control Program is little-known but very important. It has done studies that have saved millions of dollars for the U.S. Health Care System. Some of these studies are:

First, studying motor vehicle injuries—almost one-third of all injury deaths result from motor vehicle crashes. The program has sponsored research in biomechanics in which investigators scientifically examine why motor vehicle crashes occur.

Second, elderly injuries—researchers at Beth Israel Hospital in Boston and at Duke University have studied hip fractures and cervical spine injuries. Researchers have suggested padded clothing for elderly persons and changing designs on automobiles.

Third, playground injuries—a study in Atlanta of playground injuries was done to identify the problems on the playgrounds of 66 child care centers and to see whether these haz-

ards and injuries decrease after center directors are informed of these problems and possible ways to prevent injury.

Fourth, assaults—the Family and Intimate Assault in Atlanta project is investigating characteristics of criminals, their family background, and socioeconomic environment.

H.R. 5113 reauthorizes the program at $30 million for fiscal year 1991 and such sums as necessary in 1992 and 1993. This is an increase from $22 million in the previous year, and is a much-needed investment in Federal efforts to reduce injuries and their associated health care costs.

Mr. MADIGAN. Mr. Speaker, I yield back the balance of my time.

Mr. WAXMAN. Mr. Speaker, I have no further requests for time, and I yield back the balance of our time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California [Mr. WAXMAN] that the House suspend the rules and pass the bill, H.R. 5113.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended, and the bill was passed.

A motion to reconsider was laid on the table.

NATIONAL ORGAN TRANSPLANT PROGRAM EXTENSION ACT OF 1990

Mr. WAXMAN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 5146) to amend the Public Health Service Act to revise and extend the program regarding organ transplantation, as amended.

The Clerk read as follows:

H.R. 5146

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "National Organ Transplant Program Extension Act of 1990".

SEC. 2. ASSISTANCE FOR ORGAN PROCUREMENT ORGANIZATIONS.

(a) SECTION HEADING.—Section 371 of the Public Health Service Act (42 U.S.C. 273) is amended in the heading for the section by striking "assistance for".

(b) AUTHORITY REGARDING CERTAIN GRANTS.—

(1) SPECIAL PROJECTS.—Section 371(a)(3) of the Public Health Service Act (42 U.S.C. 273(a)(3)) is amended by striking "may make grants for special projects" and inserting the following: "may make grants to, and enter into contracts with, qualified organ procurement organizations described in subsection (b) and other nonprofit private entities for the purpose of carrying out special projects".

(2) CONSIDERATIONS IN MAKING CERTAIN GRANTS.—Section 371(a) of the Public Health Service Act (42 U.S.C. 273(a)) is amended—

(A) in paragraph (4), by striking subparagraphs (A) and (C); and

(B) in paragraph (4), as amended by subparagraph (A) of this paragraph—

(i) by striking "Secondary shall—" and all that follows through "special consideration" and inserting "Secretary shall give special consideration"; and

(ii) by striking "organization, and" and inserting "organization.".

(c) SERVICE AREA OF QUALIFIED ORGAN PROCUREMENT ORGANIZATIONS.—

(1) IN GENERAL.—Section 371(b)(1)(E) of the Public Health Service Act (42 U.S.C. 273(b)(1)(E)) is amended to read as follows:

"(E) has a defined service area that is of sufficient size to assure maximum effectiveness in the procurement and equitable distribution of organs, and that either includes an entire standard metropolitan statistical area (as specified by the Office of Management and Budget) or does not include any part of such an area,".

(2) ISSUANCE OF PERFORMANCE CRITERIA BY SECRETARY.—Section 371(b) of the Public Health Service Act (42 U.S.C. 273(b)) is amended—

(A) by redesignating paragraph (2) as paragraph (3); and

(B) by inserting after paragraph (1) the following new paragraph:

"(2) Not later than 180 days after the date of the enactment of the National Organ Transplant Program Extension Act of 1990, the Secretary shall issue performance criteria specifying the manner in which the Secretary determines whether the requirements established in paragraph (1)(E) have been met.".

(3) CONFORMING AMENDMENT.—Section 402(c)(3) of Public Law 100-607 (42 U.S.C. note), as amended by Public Law 101-274, is repealed.

(d) TECHNICAL CORRECTION REGARDING PUBLIC LAW 100-607.—Section 402(c)(2) of Public Law 100-607 (102 Stat. 3115) is amended by inserting "at the end" after "the comma".

SEC. 3. ORGAN PROCUREMENT AND TRANSPLANTATION NETWORK.

(a) IN GENERAL.—Section 372(a) of the Public Health Service Act (42 U.S.C. 274(a)) is amended by striking the last sentence.

(b) MINIMUM QUALIFICATIONS OF CONTRACTOR.—

(1) IN GENERAL.—Section 372(b)(1)(A) of the Public Health Service Act (42 U.S.C. 274(b)(1)(A)) is amended by striking "which is not engaged in any activity unrelated to organ procurement" and inserting "with expertise in organ procurement".

(2) EFFECTIVE DATE.—The amendment made by paragraph (1) shall take effect December 31, 1990.

(c) TECHNICAL CORRECTION.—Section 372(b)(2)(F) of the Public Health Service Act (42 U.S.C. 274(b)(2)(F)) is amended by striking "compatability" and inserting "compatibility".

SEC. 4. TRANSFER OF PROGRAM FOR BONE MARROW REGISTRY.

(a) IN GENERAL.—The Public Health Service Act (42 U.S.C. 201 et seq.) is amended—

(1) by striking section 373(b); and

(2) in subpart 2 of part C of title IV, by adding at the end the following new section:

"NATIONAL BONE MARROW DONOR REGISTRY

"SEC. 424. (a) The Secretary shall, by grant or contract, establish a registry of voluntary bone marrow donors.

"(b) In addition to any other amounts authorized to be appropriated for the purpose of carrying out subsection (a), there are authorized to be appropriated for such purpose $15,000,000 for fiscal year 1991, and such sums as may be necessary for each of the fiscal years 1992 and 1993.".

(b) CONFORMING AMENDMENT.—Section 373 of the Public Health Service Act, as amended by subsection (a) of this section, is amended—

(1) by striking the subsection designation; and

(2) in the heading for the section, by striking "AND BONE MARROW REGISTRY".

SEC. 5. GENERAL PROVISIONS RESPECTING GRANTS AND CONTRACTS.

Section 374 of the Public Health Service Act (42 U.S.C. 274b) is amended—

(1) in subsection (a), in the first sentence, by striking "No grant" and all that follows through "373" the second place such term appears and inserting the following: "No grant or contract may be made under this part";

(2) in subsection (b)—

(A) by striking paragraph (1) and redesignating paragraphs (2) and (3) as paragraphs (1) and (2), respectively;

(B) in paragraph (1) (as so redesignated), by striking "section 371" and inserting "section 371(a)(1)";

(C) in paragraph (2) (as so redesignated), in the first sentence, by striking "paragraphs (2) and (3) of section 371(a)" and inserting "section 371(a)(2)"; and

(D) by adding at the end the following new paragraph:

"(3) Grants or contracts under section 371(a)(3) may be made for not more than 3 years."; and

(3) in subsection (c)—

(A) in paragraph (1)—

(i) in the first sentence, by inserting "or contract" after "grant"; and

(ii) in the second sentence, by inserting "and contracts" after "grants" each place such term appears; and

(B) in paragraph (2), in subparagraphs (A) and (B), by inserting "or contract" after "grant" each place such term appears.

SEC. 6. ADMINISTRATION.

(a) IDENTIFIABLE ADMINISTRATIVE UNIT.—Section 375 of the Public Health Service Act (42 U.S.C. 274c) is amended in the matter preceding paragraph (1) by striking "1990," and inserting "1993,".

(b) STRIKING OF EXPIRED REQUIREMENT REGARDING CERTAIN REPORTS.—Section 375 of the Public Health Service Act (42 U.S.C. 274c) is amended—

(1) by striking paragraph (4); and

(2) by adding "and" after the comma at the end of paragraph (2), and by striking "transplants, and" at the end of paragraph (3) and inserting "transplants.".

SEC. 7. REPORT.

Section 376 of the Public Health Service Act (42 U.S.C. 274d) is amended in the first sentence by striking "The Secretary" and all that follows through "publish a report" and inserting the following: "Not later than February 10 of 1991 and of each second year thereafter, the Secretary shall publish a report".

SEC. 8. STUDY BY GENERAL ACCOUNTING OFFICE.

Part H of title III of the Public Health Service Act (42 U.S.C. 273 et seq.) is amended by adding at the end the following new section:

"STUDY BY GENERAL ACCOUNTING OFFICE

"SEC. 377. (a) The Comptroller General of the United States shall conduct a study for the purpose of determining—

"(1) the extent to which the procurement and allocation of organs have been equitable, efficient, and effective; and

"(2) the problems encountered in such procurement and allocation, particularly for racial and ethnic minorities.

"(b) Not later than January 7, 1992, the Comptroller General of the United States shall complete the study required in subsec-

tion (a) and submit to the Committee on Energy and Commerce of the House of Representatives, and to the Committee on Labor and Human Resources of the Senate, a report describing the findings made as a result of the study.".

SEC. 9. ESTABLISHMENT OF SINGLE AUTHORIZATION OF APPROPRIATIONS.

(a) IN GENERAL.—Part H of title III of the Public Health Service Act, as amended by section 8 of this Act, is amended by adding at the end the following new section:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 378. For the purpose of carrying out this part, there are authorized to be appropriated $5,000,000 for fiscal year 1991, and such sums as may be necessary for each of the fiscal years 1992 and 1993.".

(b) CONFORMING AMENDMENT.—Section 371 of the Public Health Service Act (42 U.S.C. 273) is amended by striking subsection (c).

SEC. 10. EFFECTIVE DATE.

Except as provided in section 3(b)(2), the amendments made by this Act shall take effect October 1, 1990, or upon the date of the enactment of this Act, whichever occurs later.

The SPEAKER pro tempore. Is a second demanded?

Mr. MADIGAN. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from California [Mr. WAXMAN] will be recognized for 20 minutes, and the gentleman from Illinois [Mr. MADIGAN] will be recognized for 20 minutes.

The Chair recognizes the gentleman from California [Mr. WAXMAN].

GENERAL LEAVE

Mr. WAXMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the legislation presently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. WAXMAN. Mr. Speaker, I yield myself such time as I my consume.

Mr. Speaker, the purpose of H.R. 5146 is to extend for 3 fiscal years the authorizations for expiring programs of the National Organ Transplant Program. The program is operated by the Division of Organ Transplantation within the Department of Health and Human Services. These activities include support of:

First, local organ procurement organizations;

Second, the national organ procurement and transplant computer network;

Third, the scientific registry for organ transplants; and

Forth, special projects to increase organ donations.

In fiscal year 1991, $5 million is authorized for these activities.

In addition, the legislation extends the funding authority for the National Bone Marrow Donor Registry to $15 million of fiscal year 1991, and transfers the authorization for this activity to the National Heart, Lung, and Blood Institute of the NIH where this contract is currently administered. This level of funding is estimated to be sufficient to achieve the goal of registering 250,000 marrow donors.

Mr. Speaker, this bill was reported from our committee with broad bipartisan support. It provides critical support for a national program to assist in the promotion of organ donation, coordination of the allocation of organs, and consolidation of data on organ transplant programs.

Much more needs to be done to encourage Americans, particularly minority Americans, to sign donor cards, become bone marrow donors, and give the gift of life.

I urge all Members to support H.R. 5146.

□ 1250

Mr. MADIGAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, in 1984, Congress enacted the National Organ Transplant Act. This statute was designed to address problems related to: The availability of organs; the coordination of ongoing organ procurement activities; the lack of awareness of the general public and health care professionals of the need for organ donation; and the financing of procurement, transplantation, and drug therapy. This act has proven to be successful in achieving some of these objectives, particularly in raising public consciousness about the need for organ donation.

I think H.R. 5146 which reauthorizes the Organ Transplant Act makes a number of useful changes to current law that I am pleased to support.

In particular, I believe that the decision to repeal the new standards for Medicare reimbursement that would have required the service areas served by organ procurement organizations to procure organs from 50 donors a year is a sound one. This requirement put the majority of organ procurement organizations in serious jeopardy of losing their Medicare certification. This is a result that would have served no one and would have seriously damaged the Organ Procurement Program in this country.

I urge my colleagues to join me in supporting this bill.

Mr. Speaker, I yield such time as he may consume to my distinguished colleague, the gentleman from Florida [Mr. YOUNG], who has been most active in promoting these kinds of activities.

Mr. YOUNG of Florida. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, I rise in strong support of H.R. 5146, the Organ Transplant Extension Act, which reauthorizes the tremendous work of the National Marrow Donor Program.

I want to commend the chairman, HENRY WAXMAN, the ranking member, ED MADIGAN, and the entire committee for their continuing support of this program and for incorporating into H.R. 5146 legislation Chairman WAXMAN and I introduced earlier this year to extend Federal oversight of the national registry.

Mr. Speaker, the chairman has had a long-term interest in the development of a national marrow donor registry and has held a number of hearings over the years at which I testified to document the need for such a program and to follow its rapid development and record of success. The National Marrow Donor Program was first established at the Navy with funds I included in fiscal year 1987 defense appropriations bill. At the direction of the Appropriations Subcommittee on Health, on which I also serve, and with Mr. WAXMAN's support, oversight of the national program was shifted in early 1989 to the National Institutes on Health.

The legislation before us today continues oversight of the registry by the National Heart, Lung, and Blood Institute and its Director, Dr. Claude Lenfant. The Appropriations Committee already has approved my request for more than $16 million in fiscal year 1991 for the operation of the registry, for tissue typing volunteer donors, and for research to perfect the typing and transplant techniques to improve the success rate of transplants and to expand the number of diseases that can be cured through this procedure.

Unrelated marrow transplantation is today's medical miracle. It is the cure for more than 60 previously terminal blood disorders. To be effective, however, we need to amass a large, ethnically diverse registry of volunteers who are willing when called upon to donate their marrow to a patient in need. Already, more than 150,000 Americans, including this Congressman and 40 other Members of this House, have had their blood typed to be included in the national registry. We cannot wait for the day when the call comes that our marrow is needed to save the life of another person. That call could come from anywhere in the world because the National Marrow Donor Program links similar registries on virtually every continent.

More still needs to be done, Mr. Speaker, to save the life of every American in need of a marrow transplant. Our goal is a national registry of 250,000 volunteers. We must ensure, though, that this registry is ethnically diverse enough to provide a good cross section of our population. Research

has found that because of genetics, compatible donors and patients are found within the same race or ethnic groups. In other words, a black donor will most likely match a black patient, an American Indian donor will most likely match an American Indian patient, and an Asian-American donor will most likely match an Asian-American patient. To date, however, less than 6 percent of the registered volunteers represent minority groups.

My amendment in April to the 1990 supplemental appropriations bill will provide $6 million this year to recruit and type 50,000 new volunteers for the national registry. This will enable community blood banks from around our Nation to type the many people who have expressed an interest in volunteering but who cannot afford the $75 per person lab fee for the blood test. Heavy emphasis also will be placed on the recruitment of minority donors.

A new program which I have worked with the Navy to initiate, will significantly increase the donor rolls by recruiting volunteers of the Department of Defense who want to be donors. It is expected that this will add 40,000 to 50,000 donors per year to our national program.

Mr. Speaker, the National Marrow Donor Program works. It saves lives every day. In the 2½ years since the first transplant utilizing the national registry took place on December 16, 1987, more than 400 miracle matches have taken place. Currently, 25 lives are being saved each month by bringing together donors and patients, but in order to fulfill the need of every one of the 9,000 Americans annually in need of an unrelated marrow transplant, we will have to complete 25 matches and transplants per day.

Much has been accomplished in the short history of this great program, and with the enactment of this legislation a long-term Federal commitment will be made so that we can achieve our goals to develop and maintain a large, ethnically diverse donor pool so that we can find matched donors for every patient in need of a life-saving marrow transplant.

Mr. WAXMAN. Mr. Speaker, I yield such time as he may consume to the gentleman from Illinois [Mr. DURBIN].

Mr. DURBIN. Mr. Speaker, I would like to first congratulate my colleagues from California and Illinois for this fine legislation. I know that the number of bills they have brought before the House of Representatives today represents not only sound legislation, but hope for many people. The whole question of organ donation and organ transplant 20 years ago was considered the stuff of science fiction. I can recall about that time the very first heart transplant and the fact that the whole world watched very closely to see the success of that effort. Now I guess it is improper to call it commonplace, but certainly more common. We are finding that organ donation and organ transplants are literally saving lives every day across America.

This important legislation will extend to those organizations who are seeking organ donors the wherewithal to do their job effectively; but in order for that job to be done effectively another step must be taken, even beyond this legislation.

I commend my good friend, the gentleman from Florida [Mr. YOUNG]. He has shown singular leadership in this House of Representatives on the whole question of bone marrow donation. He recently invited me to a press conference, followed by bone marrow typing where I sat down and had a simple blood sample taken from my arm that ultimately will be typed and sent to determine whether in fact I have bone marrow that might save someone's life at some point.

It is an amazing thing to believe that some donation like this which may cause a little discomfort to me could in fact save someone's life.

I say to the gentleman from Florida [Mr. YOUNG] that he has literally led the way in the House of Representatives, and we are so proud of the gentleman's efforts not only in his district, but across the Nation. I thank the gentleman for making the public aware of this.

But there is more for us to do and I am sure the gentleman from California and the gentleman from Illinois will join me in saying that Americans from one side of this Nation to the other must sit down and make a conscious personal decision as to whether if they lost their lives, would they be willing to donate an organ to save someone else's life.

In my home State of Illinois on the back of our driver's license is a simple form that we fill out when we apply for the license. This we carry with us at all times. In the unlikely event that something should occur, they know that permission has been granted that an organ can be donated perhaps to save someone's life.

I would like to suggest to my colleagues, too, that there is another step we might take. About 80 million Americans this year were fortunate enough to get a refund from the Internal Revenue Service. I was one of them. I took a look at it and noticed that there was a card enclosed with that refund that asked me to consider buying a commemorative coin from the Department of the Treasury. It was just a little card. Of course, if you wanted to do it you could, and there was no reason for you to feel coerced, but if that was your decision, you could step forward and do it.

I thought to myself, there is an opportunity for the Federal Government at a very limited expense to put these types of donation cards in the hands of 80 million Americans families, so that as you receive that refund you could then make a decision as to whether or not you wanted to sign up, as many people do on their driver's license today, to be an organ donor.

Now, the cost to the Federal Government of including that kind of a card with the income tax return would be $500,000 per year. I consider that a very small investment when you consider what it might mean in terms of saving someone's life and giving a family some hope.

Think of putting yourself in the shoes of those families who are waiting anxiously to know if perhaps there is an organ donor out there who might save a life of a child or a loved one in their families.

If each of us steps forward and makes sure that we have made a commitment, I think we can complement this fine legislation and make this a national campaign to extend organ donations to families all across the United States.

So I rise in strong support of this legislation. I thank my colleagues for introducing it and bringing it to the floor today, and I certainly hope that this Congress and future Congresses can move forward to alert the American people to the wonderful opportunities which each of us have if we will make a tiny personal sacrifice.

Mr. YOUNG of Florida. Mr. Speaker, will the gentleman yield?

Mr. DURBIN. I yield to the gentleman from Florida.

Mr. YOUNG of Florida. Mr. Speaker, I thank the gentleman for yielding to me, and I thank him for his very kind comments about this Member.

I would like our colleagues to know that on the day we had set for Members of Congress to have their marrow typed thru a simple blood test that our friend and colleague, the distinguished gentleman from Illinois [Mr. DURBIN] was the first one in line, the first one to sit in the chair and to have the blood test, and as he told me when he got up from the chair, "It didn't hurt a bit; nothing to it."

Mr. Speaker, I thank the gentleman for his support.

Mr. DURBAN. Mr. Speaker, that is very true, and I thank my colleague, the gentleman from Florida.

Mr. FAZIO. Mr. Speaker, I strongly support H.R. 5146, the Organ Transplant Reauthorization Act, legislation which I am cosponsoring. I commend Congressman HENRY WAXMAN, the author of this bill and chairman of the Health and the Environment Subcommittee, and Congressman EDWARD MADIGAN, the ranking member, for their efforts in quickly bringing this legislation to the floor.

H.R. 5146 is an extremely important bill which contains many critical provisions, including the reauthorization through fiscal year

1993 of the National Marrow Donor Program [NMDP]. The National Marrow Donor Program is operated by the National Heart, Lung and Blood Institute and coordinates efforts to recruit potential bone marrow donors and maintains the national registry.

I especially want to thank Congressman WAXMAN for largely incorporating in his bill, H.R. 4650, legislation which I introduced earlier this year that would authorize $15 million for the purposes of testing potential bone marrow donors. Although the national program has a goal of listing 250,000 potential bone marrow donors, a lack of funding has prevented the registry from realizing this goal and only approximately 135,000 individuals are currently listed. In fact, many of the names in the registry were added after the families of sick individuals conducted their own expensive searches when the registry failed to provide a match.

This reauthorization legislation, coupled with the fiscal year 1991 Labor-Health and Human Services-Education appropriations bill approved by the House of Representatives last week, sends a strong signal about our commitment to ensuring that NMDP is responsive to those in need of bone marrow transplants. I encourage my colleagues to support this worthwhile measure.

Mr. GEREN of Texas. Mr. Speaker, I rise in support of H.R. 5146, The Organ Transplant Program Reauthorization Act and I commend the members of the Subcommittee on Health and the Environment for their work on this bill.

H.R. 5146 authorizes $5 million in fiscal year 1991, and such sums as may be necessary in fiscal years 1992 and 1993, for the National Organ Transplant Program, which helps procure and match human organs and tissues used in transplants. The bill also contains a provision that will repeal the current requirement that qualified organ procurement organizations [OPO] be of sufficient size to procure not less than "50 donors each year." It instead requires the Health and Human Services Department to develop performance criteria to ensure maximum effectiveness in the procurement and equitable distribution of organs.

The bill also authorizes $15 million in fiscal year 1991, and such sums as may be necessary in fiscal years 1992 and 1993, for the National Bone Marrow Donor Program. The bill provides an increased authorization level in order to help the program reach its goal of registering 250,000 potential marrow donors.

Mr. Speaker, I must commend the Health Subcommittee chairman, Mr. WAXMAN, for taking the lead in repealing the 50-donor rule" and for moving this bill through the subcommittee and full committee in an expeditious manner.

On March 21, I introduced H.R. 4336, a bill to repeal the organ procurement organization size standard legislation that was included in Public Law 100–607 which set a minimum requirement of 50 donors per year for an OPO to maintain its certification with the Health Care Financing Administration of the Department of Health and Human Services. Over 57 Members cosponsored this bill.

Mr. Speaker, I believed that the 50-donor rule was an arbitrary number that was not supported by any evidence. This rule would have resulted in over 41 of the 72 certified OPO's, that serve this Nation being decertified. In fact, the information that we do have clearly shows that many of the smaller OPO's are more efficient in organ recoveries per capita than many of the larger OPO's.

The Tarrant County Organ Donor Program in the district I represent is an excellent example of an OPO that does not perform 50 transplants a year but yet is very efficient. The Tarrant County Organ Donor Program is located at the Harris Methodist Hospital in Fort Worth, TX. This program is ranked in the top percentile for most organ transplants and it could have been decertified had this 50-donor rule not been repealed. Additionally, of the top 10 OPO's in the United States, 5 of the OPO's, 50 percent do not do 50 donors per year. Yet, these OPO's are doing an outstanding job in organ recovery, providing quality service with outstanding track records.

We are currently experiencing a shortage of transplantable organs in this country and H.R. 5146 will prevent any OPO's from being cut. The OPO's are providing outstanding services to thousands of patients. The Organ Transplant Program as it exists is an effective health program that saves lives.

H.R. 5146 is a good bill and I hope that it will be sent to the President for his signature as soon as possible.

Mr. STARK. Mr. Speaker, as Congress prepares to reauthorize the National Organ Transplant Program, I would like to call your attention to certain aspects of our organ transplant system that I find troubling.

I am concerned with the fact that only 10 percent to 20 percent of the 20,000 potential organ donors actually donate. Furthermore, cadaveric kidney donations—which make up over half of all organ donations, and have been found to be the most cost efficient—decreased from 8,979 in 1988 to 8,886 in 1989, according to UNOS. When we consider this statistic with the fact that between 1985 and 1990, 44 States enacted legislation which requires that requests be made by hospital administrators for donation when death is pronounced or which direct hospitals to create policies to insure the option of donation is available, we must stop to ask whether our organ transplant program is working as it should be.

To be blunt, in the kidney sector, it is not working.

Some people look for a cop-out, arguing that seatbelt laws have contributed heavily to the decrease in available donors. But, if this is true, how can we explain the small percentage of potential donors that actually donate. Investigators may claim that low compliance with required request laws is a cause. A study by Arthur Caplan, director of the Center for Biomedical Ethics at the University of Minnesota, found compliance to be as low as 10 percent in some States. But perhaps requiring health care professionals, by law, to request donation has done more harm than good. It is difficult enough for a trauma surgeon to tell the parents of a 16-year-old that their son's car accident was fatal, but to follow that up with, "Can we have his liver? may be requiring too much by law. After all, organ donation request procedure is not a normal part of most medical school and residency curriculums. Perhaps we are seeing a kind of backlash from the medical community. Congress may actually want to consider repealing required requests laws, and concentrate on laws requiring physicians to be educated on how to make requests.

Organ procurement presents a unique problem for the health care field because it involves the ethical question of the rights of the deceased versus the rights of the recipient. Certainly, our Government cannot institute an implied consent policy, nor do I support payment incentives for organs.

Besides considering repeal of required request laws, I think that Congress should look at ways of encouraging volunteerism through education, publicity, and creating a better way for doctors to know if a deceased person has volunteered to donate. Education would begin with educating doctors on how to request organ donation. This type of education has already begun, and I support making it even more widespread. A study by Arthur Caplan found that "60 percent of those making requests said they would not be more likely to approach a family about donation when a donor card had been found, while 93 percent of requestors said that families were likely to consider the fact that the deceased had a donor card in making a decision about donation." Here it is obvious that physicians need to be better educated on how to make requests.

The public must also be better informed of their ability to donate and be shown, through the media, how their donation changes the lives of the recipients. For instance, Congress should encourage the media to report that in the 1980's, the success rate of cadaver-donor renal transplantation improved from 1-year graft survival rates of around 50 percent to rates of 75 percent to 85 percent, while, at the same time, patient survival rates also improved, with 1-year survival generally greater than 95 percent. Reporting statistics like these would let the public know that their donated organs are being used efficiently. Furthermore, the public may also be interested to know that age doesn't automatically exclude you from organ donation. According to Jay Siwek, M.D., "There are instances of people over age 100 donating their corneas and giving the gift of sight to another person."

Mr. Speaker, let's move quickly to encourage Americans to donate and help people like kidney patients get off of dialysis. Let's encourage volunteerism and improve the quality of life for tens of thousands of Americans in need of organs.

Mr. MADIGAN. Mr. Speaker, I yield back the balance of my time.

Mr. WAXMAN. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. MONTGOMERY). The question is on the motion offered by the gentleman from California [Mr. WAXMAN] that the House suspend the rules and pass the bill, H.R. 5146, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

CHILDREN'S TELEVISION ACT OF 1990

Mr. MARKEY. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1677) to require the Federal Communications Commission to reinstate restrictions on advertising during children's television, to enforce the obligation of broadcasters to meet the educational and informational needs of the child audience, and for other purposes, as amended.

The Clerk read as follows:

H.R. 1677

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Children's Television Act of 1990".

SEC. 2. FINDINGS.

The Congress finds that—

(1) it has been clearly demonstrated that television can assist children to learn important information, skills, values, and behavior, while entertaining them and exciting their curiosity to learn about the world around them;

(2) as part of their obligation to serve the public interest, television station operators and licensees should provide programming that serves the special needs of children;

(3) the financial support of advertisers assists in the provision of programming to children;

(4) special safeguards are appropriate to protect children from overcommercialization on television;

(5) television station operators and licensees should follow practices in connection with children's television programming and advertising that take into consideration the characteristics of this child audience; and

(6) it is therefore necessary that the Federal Communications Commission (hereinafter referred to as the "Commission") take the actions required by this title.

SEC. 3. STANDARDS FOR CHILDREN'S TELEVISION PROGRAMMING.

(a) RULEMAKING ON COMMERCIAL TIME REQUIRED.—The Commission shall, within 30 days after the date of enactment of this Act, initiate a rulemaking proceeding to prescribe standards applicable to commercial television broadcast licensees with respect to the time devoted to commercial matter in conjunction with children's television programming. The Commission shall, within 180 days after the date of enactment of this Act, complete the rulemaking proceeding and prescribe final standards that meet the requirements of subsection (b).

(b) REQUIREMENTS FOR STANDARDS.—Except as provided in subsection (c), the standards prescribed under subsection (a) shall include the requirement that each commercial television broadcast licensee shall limit the duration of advertising in children's television programming to not more than 10.5 minutes per hour on weekends and not more than 12 minutes per hour on weekdays.

(c) REVISION OF STANDARDS.—After January 1, 1993, the Commission—

(1) may review and evaluate the advertising duration limitations required by subsection (b); and

(2) may, after notice and public comment and a demonstration of the need for modification of such limitations, modify such limitations in accordance with the public interest.

(d) DEFINITION.—As used in this section, the term "commercial television broadcast licensee" includes a cable operator, as defined in section 602 of the Communications Act of 1934 (47 U.S.C. 522).

SEC. 4. CONSIDERATION OF CHILDREN'S TELEVISION SERVICE IN BROADCAST LICENSE RENEWAL.

(a) COMPLIANCE AND PROGRAMMING.—After the standards required by section 102 are in effect, the Commission shall, in its review of any application for renewal of a television broadcast license, consider the extent to which the licensee—

(1) has complied with such standards; and

(2) has served the educational and informational needs of children through the licensee's overall programming, including programming specifically designed to serve such needs.

(b) ADDITIONAL EDUCATIONAL AND INFORMATIONAL EFFORTS.—In addition to consideration of the licensee's programming as required under subsection (a), the Commission may consider—

(1) any special nonbroadcast efforts by the licensee which enhance the educational and informational value of such programming to children; and

(2) any special effforts by the licensee to produce or support programming broadcast by another station in the licensee's marketplace which is specifically designed to serve the educational and informational needs of children.

SEC. 5. PROGRAM LENGTH COMMERCIAL MATTER.

Within 180 days after the date of enactment of this Act, the Commission shall complete the proceeding known as "Revision of Programming and Commercialization Policies, Ascertainment Requirements and Program Log Requirements for Commercial Television Stations", MM Docket No. 83-670.

The SPEAKER pro tempore. Is a second demanded?

Mr. RINALDO. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Massachusetts [Mr. MARKEY] will be recognized for 20 minutes, and the gentleman from New Jersey [Mr. RINALDO] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Massachusetts [Mr. MARKEY].

Mr. MARKEY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 1677, the Children's Television Act of 1990. This consensus legislation is the result of bipartisan effort and cooperation. It represents the product of prolonged negotiations between public interest groups and broadcasters, and enjoys the strong support of pubic interest advocates, as well as many broadcasters.

During the 14 years that I have spent in Congress, and as a member of the Subcommittee on Telecommunications and Finance, one of the recurring issues of concern has been the status of children's television. For decades, the Federal Communications Commission and the courts recognized the importance of broadcaster service to the child audience. Unfortunately, during the deregulatory excesses of the FCC during the 1980's, many of the Commission's regulations affecting children, particularly those affording children special protections, were abolished. Children's advocates assert, and many studies confirm, that deregulation of children's television has caused an increase in the level of commericalization of children's television and declining levels of educational and informational children's programming. The Children's Television Act of 1990 addresses these problems.

Specifically, the legislation would reinstate commercial time guidelines for childern's television programming, applicable to both broadcasters and cable television operators. Such guidelines would limit commerical time during children's programming to 10.5 minutes per hour on weekends and 12 minutes per hour on weekdays. In light of our concern about the changing nature of the video marketplace, after January 1, 1993, the FCC, after notice, public comment, and a demonstration of the need for modification, could modify these time standards in accordance with the public interest.

The substitute also provides a congressional recognition, for the first time, that broadcasters' public interest responsibilities include a responsibility to provide educational and informational programing for children. The bill provides the Commission broad discretion, during the license renewal process, in reviewing a station's commitment to children's educational and informational programming. The legislation does not require the FCC to set quantitative guidelines for educational programming, but instead, requires the Commission to base its decision upon an evaluation of that station's overall service to children. Under the legislation, the FCC would consider the extent to which the licensee has complied with the Commission's commerical time restrictions and has served the educational and informational needs of children through the licensee's overall programming, including programming specifically designed to serve such needs. In its evaluation, the Commission also could consider any special nonbroadcast efforts by the licensee that enhance the educational and information value of programming for children.

Finally, the bill addresses the issue of program length commercials, which long has been a source of debate and contention. The legislation would require the Commission to complete its review of program length commercials within 180 days after the date of enactment of this act. Let me note that I

remain strongly opposed to practices that contribute to the commercial exploitation of children, and I will monitor closely the result of the Commission's proceeding on this issue.

For far too long, we have allowed children's television to be driven solely by commercial considerations. It is time to put the interests of children back into the equation. Passage of the Children's Television Act of 1990, once and for all, will provide broadcasters and children's program producers the necessary incentives to educate our Nation's children creatively, rather than to exploit them economically. Children's television should and can be the video equavalent of texbooks and the classics rather than the video equivalent of a "Toys-R-Us" catalog.

Passage of the Children's Television Act of 1990 would be the most important Congressional statement on children's television in a generation. The legislation is comprehensive and constructive and reflects an understanding of the potential benefits of television as an educator of our children as we face an increasingly competitive future.

President Bush repeatedly has stated that he wants to be the "education President," and that he wants to put education on the top of the national agenda. This bill accomplishes that goal. The legislation is tough but fair and flexible. Further, it won't cost the taxpayers a dime yet will pay huge dividends for years to come in terms of more and better programming for children. I hope and expect that President Bush will sign it into law.

This substitute is the product of the combined efforts of many members of the Committee on Energy and Commerce and the Subcommittee on Telecommunications and Finance. Particularly to be commended are Representatives BRYANT of Texas and BRUCE of Illinois for their continued leadership on the legislation.

I also especially want to thank the gentleman from New Jersey [Mr. RINALDO], the ranking minority member, with whom I have worked very closely over the last now 3 years in bringing the legislation to this stage. This legislation without question would not be here today without the hard work, the cooperation, and the insight of the gentleman from New Jersey [Mr. RINALDO].

I would also like to thank the chairman of the full committee, the gentleman from Michigan [Mr. DINGELL], for his guidance, his direction, and his complete support for this legislation and for the need for us to legislate in this area right from the beginning.

Finally, the national television networks, the National Association of Broadcasters, the Association of Independent Television Stations, and numerous public interest groups, particularly Action for Children's Television under the tireless leadership of Peggy Charren, deserve credit for this legislation.

Mr. Speaker, I urge Members to support this landmark initiative. We have worked long and hard. We are now at the point at which we can finally say that the House and Senate, Democrat and Republican, join together to bring to the American people a piece of legislation that we can all be proud of in this area.

Mr. Speaker, I reserve the balance of my time.

Mr. RINALDO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 1677, the Children's TV Act.

The telecommunications subcommittee has labored long and hard over children's TV legislation in the last 2 Congresses. In 1988, we produced a bill that passed both bodies overwhelmingly, only to see the bill pocket-vetoed.

Now, we are back with basically the same issues, and with a nearly identical piece of legislation, of which I am an original cosponsor. I am pleased that the Telecommunications Subcommittee has continued to make passage of children's TV legislation one of its highest priorities. I commend the subcommittee's chairman, the gentleman from Massachusetts [Mr. MARKEY], for his tireless efforts in this important area.

America's young people watch 20 hours of TV a week—and as much as 15,000 hours by the time they're 16 years old. There is little doubt that television can influence children in ways that can cause parents great concern. Unfortunately, in many cases, television competes with the family and the classroom for the attention of children.

Too often, the great potential of television to educate and entertain children has been lost. Although there are bright spots, much children's programming is commercially oriented to selling toys, games, and cereals. Since the FCC got rid of its commercial time guidelines 5 years ago, the number of commercials, aired during children's programs has increased noticeably.

Congressional concern with this situation has boiled over. The subcommittee concluded that Congress had to intervene to make sure that broadcasters' special obligation to their child audiences was being fulfilled.

The result of the subcommittee's effort is H.R. 1677, the legislation before the House today.

The underlying purpose of this legislation needs to be emphasized, so there is no doubt in the minds of Members of Congress or the affected industries about what it will accomplish. The bill reaffirms the essential obligations of broadcasters to serve children, not just entertain them.

The bill does not impose additional obligations on broadcasters. It is not a broad, sweeping solution to every deal or imagined problem with children's TV programming. The bill identifies particular problems with children's programming, and corrects them with a minimum of Government interference.

Broad children's TV legislation, dealing with subjects like program-length commercials and other subjects, has been discussed many times. That kind of legislation has not gone anywhere for a simple reason—there is not a record to support it. I hope that the industry shows us through its programming that further legislation will not be necessary. This bill should give TV stations, networks, and program producers ample incentive to improve children's TV programming in substantive ways.

The industry should not forget that more is at stake with children's TV than just entertainment. This programming has a profound effect on the development of this Nation's most precious resource—its children.

The amended bill before the House today makes minor changes in the committee-passed bill to reflect our agreement with changes made by the Senate. These changes are acceptable because they make clear that broadcasters can satisfy their obligations in a variety of ways. The Senate also has applied the commercial time limitations to children's programming on cable. This idea was first advanced by my colleague, the gentleman from Utah [Mr. NIELSON].

We have not included another amendment made by the Senate, which would create a federally funded endowment for children's TV programming.

Government funding of children's TV programming is a subject which the telecommunications subcommittee has never considered, and one about which there is likely to be a significant disagreement in this House.

Whatever the merits of the endowment idea, it is not a subject which Members should be asked to consider in the context of our ongoing negotiations over the budget deficit.

There is a vast, unexplored gap between childen's TV shows that are purely educational, and those which are purely entertainment. Bridging that gap—airing programs that are in good taste and which also have educational value—is an important challenge before the TV industry today. This legislation should give the TV industry the necessary push to improve children's TV programming.

I urge all Members of the House to support H.R. 1677, as amended.

□ 1310

Mr. Speaker, I reserve the balance of my time.

Mr. MARKEY. Mr. Speaker, I yield such time as he may consume to the gentleman from Washington [Mr. SWIFT].

Mr. SWIFT. I thank the gentleman for yielding.

Mr. Speaker, I would like to commend the gentleman from Massachusetts [Mr. MARKEY] and the gentleman from New Jersey [Mr. RINALDO] who have worked long and hard on this important piece of legislation.

I think we were all somewhat stunned as well as perplexed when, 2 days before the last election, President Reagan vetoed a measure that was essentially the same as this. In this Congress we are backing up and going to do it again.

What the bill does is really two basic things: First of all, it says we are not going to subject our children to program-length commercials. We had a considerable amount of testimony before the committee that indicated that particularly, not exclusively, but particularly syndicated programs aimed at children had become more and more and more a program-long commercial for some toy or other in an effort to encourage young Americans to go out and buy this toy or that toy.

This is inappropriate. We know it. It is my belief that the toy manufacturers know it. The television producers know it. Everybody apparently except President Reagan knew it, and it passed both the House and the Senate overwhelmingly.

Then after Congress was adjourned, not in town, there would not be any possibility of an override, the President stuck it in his pocket and vetoed it.

We are going to remedy that.

The other thing this bill does, importantly, is to suggest that local television stations, when they determine what it is they do to provide service to the community in which they are licensed, consider children as an important audience to which they must respond. It does not dictate specific amounts of time that will be devoted to children's programming; it does not dictate what kinds of programming must be used. It simply says, in making that judgment, which they have to do under the license that they get from the Federal Government, to determine how it is they are going to be dealing with the community in which they serve, how they are going to provide their public service time, that children be one of the audiences seriously considered in providing that programming.

These two things are so elemental, so simple, so fair, so just, so prudent and so necessary that it is difficult to understand why anyone would have any objection. Certainly there were very few in the House and very few in the Senate; only the President of the United States 2 days before an election, after Congress was out of town and could not override the veto.

I am confident this President, prior to an election, with the support of the House and the Senate, will not carry out the same legislative action of a veto, and this bill will in this Congress become law.

Mr. Speaker, again my commendation to both the gentleman from New Jersey [Mr. RINALDO] and the gentleman from Massachusetts [Mr. MARKEY] for their leadership on this issue. I have been proud to work with them.

Mr. MARKEY. Mr. Speaker, I yield such time as he may consume to the gentleman from Pennsylvania [Mr. WALGREN].

Mr. WALGREN. I thank the gentleman for yielding.

Mr. Speaker, as somebody who watches a lot of children's television, I want particularly to express my appreciation to the chairman of the subcommittee [Mr. MARKEY] and the chairman of the full Committee on Energy and Commerce [Mr. DINGELL] and the ranking minority members for their persistence in pursuing this legislation and bringing it back to the Congress, the gentleman from Washington outlined, in view of its recent history.

Mr. Speaker, I would like to offer my support today for the Children's Television Act of 1990 which would require the Federal Communications Commission to reinstate restrictions on advertising during children's television and to consider, upon the renewal of a broadcast license, whether the license has complied with FCC-prescribed standards concerning children's television programming.

Over the past 25 years, the FCC has been involved in setting regulations for "children's programming" based on the various Commissions beginning in 1960 that children represent one of several unique groups whose programming needs should be met by a licensee in order to satisfy public interest responsibilities. In 1974, the Commission held hearings that led to a formal policy statement on the matter whereby the industry would observe voluntary guidelines limiting the amount of commercial advertising during children's programming.

As the years passed, the membership of the Commission changed and, in 1984, the FCC adopted a deregulation order that eliminated children's programming quotas and commercial restrictions during children's television. Since that time, the amount of advertising during children's television has increased while the amount of informational and educational programming has declined. Clearly, that trend should be reversed.

The Children's Television Act of 1990 addresses the unique concerns of children's television. While the marketplace can adequately protect adult viewership—allowing only the amount of commercial advertisement that an adult audience is willing to sit through and will watch—children are not yet ready to distinguish between advertisement and programming. Therefore, it follows as night follows day that broadcasters' public interest responsibility to children must be met through some form of agreement.

This bill would impose reasonable limits on the amount of commercial advertising that can be aired during children's programming. These standards would limit commercial advertising to not more than 10.5 minutes per hour during the weekend and 12 minutes per hour on weekdays. I support this effort to promote quality television programming and to limit the amount of commercial advertisement that is viewed by the children of our Nation.

I just want to say, as somebody who has sat through a lot of children's programming, that certainly those limits should be met, and I want to commend in my own self-interest the work that the committees have done to bring the legislation to this point, and I urge all in the House of Representatives to support it.

□ 1320

Mr. RINALDO. Mr. Speaker, I have no further requests for time, and I reserve the balance of my time.

Mr. MARKEY. Mr. Speaker, I yield myself such time as I may consume.

In conclusion, I would like to thank especially the gentleman from Texas [Mr. BRYANT] who had the insight, several years ago, that we had to do something to control the number of minutes that advertisers would be able to consume in any hour of children's television that was broadcast in this country. At the same time that we would have to build into the renewal standard of all broadcasters in our country, the specific responsibility that they have served the informational and educational needs of the children within their viewing area as a condition of retention of their license.

He, along with the gentleman from Illinois [Mr. BRUCE] who, as well, has had this deep-seated concern for a very long time that we need to set high standards for our broadcasters to ensure that most important of all resources, in our country, the children of our country, are given the information, given the access to educational opportunities through a medium which is on in the average home for 6½ hours a day, that will serve our country well in the long run.

This legislation accomplishes that goal. I would like to compliment those Members, compliment the gentleman from Washington [Mr. SWIFT], the gentleman from Pennsylvania [Mr.

WALGREN] and compliment as well the chairman of the full committee, the gentleman from Michigan [Mr. DINGELL], the ranking minority member from New York [Mr. LENT], and to thank the past chairman of our subcommittee, TIM WIRTH, who over the years has been a consistent and dedicated and principled advocate of real standards being built into children's television in our country.

Finally, I want to thank my good friend, the gentleman from New Jersey [Mr. RINALDO] for his work in drafting this legislation. I think it is a real tribute to them that we have something of this quality.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. RINALDO. Mr. Speaker, I would like to associate myself with the remarks of the gentleman from Massachusetts in thanking all the people that he mentioned, but also I would like to point out that if it were not for the determination of the gentleman from Massachusetts [Mr. MARKEY] we would not be here with this bill today. Certainly he deserves the lion's share of the credit, and I commend him for his effort in that regard.

Mr. LENT. Mr. Speaker, I rise in support of H.R. 1677, the Children's TV Act.

I commend the work of the principal sponsors of this legislation, the gentleman from Texas, [Mr. BRYANT] and the ranking republican member of the telecommunications subcommittee, the gentleman from New York [Mr. RINALDO], for their hard work on this legislation.

I also wish to extend special thanks to the full committee chairman, the gentleman from Michigan [Mr. DINGELL] and the subcommittee chairman, the gentleman from Massachusetts [Mr. MARKEY]. Without their willingness to work on a bipartisan children's TV bill, this legislation would never have made it to the floor.

The provisions of this bill are not complex. It requires reasonable limits on commercial time during children's shows, and directs TV stations to comply with those limits.

The bill also directs the FCC to consider whether a TV station has served the educational and informational needs of children in its overall programming.

This is nothing new. TV stations already are required to serve their child audiences. But now, the FCC will be directed to gauge whether TV stations are actually meeting that obligation. While this may be a special provision, it is meant to improve programming to children, who unquestionably are a special audience with distinct programming needs.

This bill is not a cure all. It does not pretend to be. Rather, the committee has taken a hard look at children's TV in the last two congresses, and has tried to encourage sensible behavior toward children by television licensees. We can do no more and still be consistent with the first amendment.

Television is a pervasive medium. What comes out of the tube has a great impact on all who watch. That impact is measurably greater on children, who often lack the capability to appreciate that they are being sold as well as entertained.

The Bryant/Rinaldo bill, as amended today, provides a modest correction to excesses in children's TV advertising practices. It also strongly encourages TV stations to improve their children's programming.

I hope every member of the house would agree that these improvements are needed if TV programming for children is to live up to its potential.

Once again, I commend Mr. BYRANT and Mr. RINALDO, and everyone involved with this legislation for their efforts. I encourage my House colleagues to vote in favor of H.R. 1677.

Mr. BRYANT. Mr. Speaker, I am pleased that the Children's Television Act of 1990 is finally being considered by the House. I want to thank Energy and Commerce Committee Chairman JOHN DINGELL and Telecommunications Subcommittee Chairman ED MARKEY for their help in getting this bill to the floor.

I also want to acknowledge the assistance of so many of my colleagues, including Mr. RINALDO and Mr. BRUCE who joined me in sponsoring and fighting for legislation to ensure substantial improvement in the quality of children's television programming with a minimum of commercialization.

Unfortunately, we are here today because identical legislation, passed by the House and the Senate, was vetoed by President Reagan during the final days of the 100th Congress last year. That veto was a tragedy for American families and the future of our children, but our presence here is testimony to the importance and resilience of this issue.

The bill before us combines two important concepts: Reinstatement of the previous Federal Communications Commission [FCC] limitations on commercial advertising during children's programs to 10.5 minutes per hour during weekends and 12 minutes per hour during the week; and a requirement that the Commission consider, at license renewal, whether broadcast licensees have adequately committed to and served the educational and informational needs of children in its programming.

I have traditionally supported much stronger programming standards. I believe commercial broadcasters should—at a bare minimum—air 7 hours a week of educational and informational programming to meet the needs of children 12 years old and younger.

One theme which has been echoed time and again by parents, educators and child development specialists is that television is a powerful force in our society, a power most influential on our children.

While I do not expect the television broadcaster to fulfill the educational responsibility of parents and schools, broadcasters must not forget or ignore—even in this era of government's rush to deregulate—that, by virtue of their acceptance of a television broadcast license, they have agreed to an array of public trust responsibilities.

Foremost among these responsibilities to serve the public interest, I believe, is the clear obligation to provide relevant programming beneficial to our children's intellectual development, not just commercials, cartoons, and pabulum.

And, in order to protect our children from overcommercialization, we must strictly limit the amount of commercial time allowed during programs aimed at them. None of us wants our children to be used or taken advantage of whether it is by bullies in a schoolyard or advertisers on television.

Since today's FCC prefers to rely on clearly inadequate marketplace competition rather than rules or regulations to ensure that broadcasters meet their public interest obligations to kids, the legislation we reported from the Committee on Energy and Commerce is absolutely essential. It imposes the restraint that neither the current FCC nor many broadcasters have demonstrated on their own. The limits we propose are reasonable, necessitated by the overcommercialization of children's programming, including the advent of program-length commercials.

The public interest, rather than commercial interests, demands informative programming that turns on a child mind, not his or her sweet tooth—or desire for the latest fad toy.

While I am disappointed that specific daily programming requirements were dropped as a part of this compromise, I do recognize the importance of requiring the Federal Communications Commission to review a station's commitment to serving children's programming needs at license renewal time.

It is unfortunate that we must remind the FCC, by enacting legislation, that the public interest it is assigned to protect includes children.

The purpose of this legislation is to ensure that stations which fail to provide a reasonable amount of quality programming with strict advertising limits specifically for children should not only be in jeopardy of losing, but actually lose, their licenses at renewal.

On the whole, this legislation is a noble effort to improve children's television programming and prevent further commercialization, contrary to children's interest.

I trust that the support of the numerous groups which promote the education, physical, emotional, and mental health and general welfare of our children will persuade our President that this small step forward for quality children's television fits into his program as a kinder and gentler President who responds to family concerns that will build a kinder and gentler America.

Mr. BRUCE. Mr. Speaker, nearly 2 years ago, the House and Senate passed children's television legislation and sent it to President Reagan for what we hoped would be his signature.

After working with Mr. BRYANT, Mr. MARKEY, Mr. RINALDO, and others, the children's Television Act of 1988 was approved in the House by a vote of 328 to 78. Unfortunately, because of Senate delays in taking up the measure, the President was able to leave it on his desk until after the November election. Last week, the Senate passed similar legislation in an effort to avoid the same problem.

The reasons for President Reagan's veto 2 years ago are not convincing. In his veto message, the President claimed that "the bill simply cannot be reconciled with the freedom

of expression secured by our constitution." That same administration, however, did not agrue with a Federal Communications Commission decision to ban obscene shows during children's viewing hours. On the obscenity issue, the Reagan administration was right. On kids TV advertising, they were wrong.

The parallels between stopping children from exposure to obscenity and stopping children for manipulation by advertisers cannot be ignored. This country has historically moved to protect children from exploitation by adults, and this legislation follows the best traditions of that important government role.

I first introduced legislation to limit the amount of advertising during children's programming in 1987. In 1988, I joined Mr. BRYANT, Chairman MARKEY and Chairman DINGELL in sponsoring the legislation pocket vetoed by President Reagan. In 1989, Mr. RINALDO joined us as one of the chief sponsors of the measure on the floor today.

The legislation before us today is the result of a significant bipartisan compromise. With Senate passage completed, I urge my colleagues to move quickly in conference to iron out differences between the two bills so that we may move this legislation onto the President's desk. Then we may begin the process of protecting children from excessive and misleading advertising.

Mr. RINALDO. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. MONTGOMERY). The question is on the motion offered by the gentleman from Massachusetts [Mr. MARKEY] that the House suspend the rules and pass the bill, H.R. 1677, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. MARKEY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include therein extraneous material on H.R. 1677, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

SECURITIES ENFORCEMENT AND PENNY STOCK REFORM ACT OF 1990

Mr. MARKEY. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 5325) to amend the Federal securities laws in order to provide additional enforcement remedies for violations of those laws and to eliminate abuses in transactions in penny stocks, and for other purposes.

The Clerk read as follows:

H.R. 5325

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; TABLE OF CONTENTS; EFFECTIVE DATE.

(a) SHORT TITLE.—This Act may be cited as the "Securities Enforcement and Penny Stock Reform Act of 1990".

(b) TABLE OF CONTENTS.—

Sec. 1. Short title; table of contents; effective date.

TITLE I—AMENDMENTS TO THE SECURITIES ACT OF 1933

Sec. 101. Authority of a court to impose money penalties and to prohibit persons from serving as officers and directors.

Sec. 102. Cease-and-desist authority.

TITLE II—AMENDMENTS TO THE SECURITIES EXCHANGE ACT OF 1934

Sec. 201. Enforcement of title.
Sec. 202. Civil remedies in administrative proceedings.
Sec. 203. Cease-and-desist authority.
Sec. 204. Procedural rules for cease-and-desist proceedings.
Sec. 205. Conforming amendments to section 15B.

TITLE III—AMENDMENTS TO THE INVESTMENT COMPANY ACT OF 1940

Sec. 301. Civil remedies in administrative proceedings.
Sec. 302. Money penalties in civil actions.

TITLE IV—AMENDMENTS TO THE INVESTMENT ADVISERS ACT OF 1940

Sec. 401. Civil remedies in administrative proceedings.
Sec. 402. Money penalties in civil actions.
Sec. 403. Conforming amendment to section 214.

TITLE V—PENNY STOCK REFORM

Sec. 501. Short title.
Sec. 502. Findings.
Sec. 503. Definition of penny stock.
Sec. 504. Exclusion of sanctioned persons from participating in distributions of penny stock.
Sec. 505. Requirements for brokers and dealers of penny stocks.
Sec. 506. Development of automated quotation systems for penny stocks.
Sec. 507. Review of regulatory structures and procedures.
Sec. 508. Voidability of contracts in violation of section 15(c)(2).
Sec. 509. Restrictions on blank check offerings.
Sec. 510. Broker/dealer disciplinary history.

(c) EFFECTIVE DATES.—

(1) IN GENERAL.—Except as provided in paragraph (2) and title V of this Act, the amendments made by this Act shall be effective upon enactment.

(2) CIVIL PENALTIES.—No civil penalty may be imposed pursuant to the amendments made by this Act on the basis of conduct occurring before the date of enactment of this Act.

(3) ACCOUNTING AND DISGORGEMENT.—Paragraph (2) shall not operate to preclude the Securities and Exchange Commission from ordering an accounting or disgorgement pursuant to the amendments made by this Act.

TITLE I—AMENDMENTS TO THE SECURITIES ACT OF 1933

Sec. 101. AUTHORITY OF A COURT TO IMPOSE MONEY PENALTIES AND TO PROHIBIT PERSONS FROM SERVING AS OFFICERS AND DIRECTORS.

Section 20 of the Securities Act of 1933 (15 U.S.C. 77t) is amended by adding at the end thereof the following new subsections:

"(d) MONEY PENALTIES IN CIVIL ACTIONS.—

"(1) AUTHORITY OF COMMISSION.—Whenever it shall appear to the Commission that any person has violated any provision of this title, the rules or regulations thereunder, or a cease-and-desist order entered by the Commission pursuant to section 8A of this title, other than by committing a violation subject to a penalty pursuant to section 21A of the Securities Exchange Act of 1934, the Commission may bring an action in the United States district court to seek, and the court shall have jurisdiction to impose, upon a proper showing, a civil penalty to be paid by the person who committed such violation.

"(2) AMOUNT OF PENALTY.—The amount of the penalty shall be determined by the court in light of the facts and circumstances. For each violation, the amount of the penalty shall not exceed the greater of (A) $100,000 for an individual or $500,000 for any other person, or (B) the gross amount of pecuniary gain to such defendant as a result of the violation.

"(3) PROCEDURES FOR COLLECTION.—

"(A) PAYMENT OF PENALTY TO TREASURY.—A penalty imposed under this section shall be payable into the Treasury of the United States.

"(B) COLLECTION OF PENALTIES.—If a person upon whom such a penalty is imposed shall fail to pay such penalty within the time prescribed in the court's order, the Commission may refer the matter to the Attorney General who shall recover such penalty by action in the appropriate United States district court.

"(C) REMEDY NOT EXCLUSIVE.—The actions authorized by this subsection may be brought in addition to any other action that the Commission or the Attorney General is entitled to bring.

"(D) JURISDICTION AND VENUE.—For purposes of section 22 of this title, actions under this section shall be actions to enforce a liability or a duty created by this title.

"(4) SPECIAL PROVISIONS RELATING TO A VIOLATION OF A CEASE-AND-DESIST ORDER.—In an action to enforce a cease-and-desist order entered by the Commission pursuant to section 8A, each separate violation of such an order shall be a separate offense, except that in the case of a violation through a continuing failure to comply with such an order, each day of the failure to comply with the order shall be deemed a separate offense.

"(e) AUTHORITY OF A COURT TO PROHIBIT PERSONS FROM SERVING AS OFFICERS AND DIRECTORS.—In any proceeding under subsection (b), the court may prohibit, conditionally or unconditionally, and permanently or for such period of time as it shall determine, any person who violated section 17(a)(1) of this title from acting as an officer or director of any issuer that has a class of securities registered pursuant to section 12 of the Securities Exchange Act of 1934 or that is required to file reports pursuant to section 15(d) of such Act if the person's conduct demonstrates substantial unfitness to serve as an officer or director of any such issuer.".

SEC. 102. CEASE-AND-DESIST AUTHORITY.

The Securities Act of 1933 (15 U.S.C. 77 et seq.) is amended by inserting after section 8 the following:

"CEASE-AND-DESIST PROCEEDINGS

"SEC. 8A. (a) AUTHORITY OF THE COMMISSION.—If the Commission finds, after notice and opportunity for hearing, that any person is violating, has violated, or is about to violate any provision of this title, or any rule or regulation thereunder, the Commission may publish its findings and enter an order requiring such person, and any other person that is, was, or would be a cause of the violation, due to an act or omission such other person knew or should have known would contribute to such violation, to cease and desist from committing or causing such violation and any future violation of the same provision, rule, or regulation. Such order may, in addition to requiring a person to cease and desist from committing or causing a violation, require such person to comply, or to take steps to effect compliance, with such provision, rule, or regulation, upon such terms and conditions and within such time as the Commission may specify in such order. Any such order may, as the Commission deems appropriate, require future compliance or steps to effect future compliance, either permanently or for such period of time as the Commission may specify, with such provision, rule, or regulation with respect to any security, any issuer, or any other person.

"(b) HEARING.—The notice instituting proceedings pursuant to subsection (a) shall fix a hearing date not earlier than 30 days nor later than 60 days after service of the notice unless an earlier or a later date is set by the Commission with the consent of any respondent so served.

"(c) TEMPORARY ORDER.—

"(1) IN GENERAL.—Whenever the Commission determines that the violation or threatened violation specified in the notice instituting proceedings pursuant to subsection (a), or the continuation thereof, is likely to result in significant dissipation or conversion of assets, significant harm to investors, or substantial harm to the public interest, including, but not limited to, losses to the Securities Investor Protection Corporation, prior to the completion of the proceedings, the Commission may enter a temporary order requiring the respondent to cease and desist from the violation or threatened violation and to take such action to prevent the violation or threatened violation and to prevent dissipation or conversion of assets, significant harm to investors, or substantial harm to the public interest as the Commission deems appropriate pending completion of such proceeding. Such an order shall be entered only after notice and opportunity for a hearing, unless the Commission determines that notice and hearing prior to entry would be impracticable or contrary to the public interest. A temporary order shall become effective upon service upon the respondent and, unless set aside, limited, or suspended by the Commission or a court of competent jurisdiction, shall remain effective and enforceable pending the completion of the proceedings.

"(2) APPLICABILITY.—This subsection shall apply only to a respondent that acts, or, at the time of the alleged misconduct acted, as a broker, dealer, investment adviser, investment company, municipal securities dealer, government securities broker, government securities dealer, or transfer agent, or is, or was at the time of the alleged misconduct, an associated person of any of the foregoing.

"(d) REVIEW OF TEMPORARY ORDERS.—

"(1) COMMISSION REVIEW.—At any time after the respondent has been served with a temporary cease-and-desist order pursuant to subsection (c), the respondent may apply to the Commission to have the order set aside, limited, or suspended. If the respondent has been served with a temporary cease-and-desist order entered without a prior Commission hearing, the respondent may, within 10 days after the date on which the order was served, request a hearing on such application and the Commission shall hold a hearing and render a decision on such application at the earliest possible time.

"(2) JUDICIAL REVIEW.—Within—

"(A) 10 days after the date the respondent was served with a temporary cease-and-desist order entered with a prior Commission hearing, or

"(B) 10 days after the Commission renders a decision on an application and hearing under paragraph (1), with respect to any temporary cease-and-desist order entered without a prior Commission hearing,

the respondent may apply to the United States district court for the district in which the respondent resides or has its principal place of business, or for the District of Columbia, for an order setting aside, limiting, or suspending the effectiveness or enforcement of the order, and the court shall have jurisdiction to enter such an order. A respondent served with a temporary cease-and-desist order entered without a prior Commission hearing may not make application to the court for a hearing except after hearing and decision by the Commission on the respondent's application under paragraph (1) of this subsection.

"(3) NO AUTOMATIC STAY OF TEMPORARY ORDER.—The commencement of proceedings under paragraph (2) of this subsection shall not, unless specifically ordered by the court, operate as a stay of the Commission's order.

"(4) EXCLUSIVE REVIEW.—Section 9(a) of this title shall not apply to a temporary order entered pursuant to this section.

"(e) AUTHORITY TO ENTER AN ORDER REQUIRING AN ACCOUNTING AND DISGORGEMENT.—In any cease-and-desist proceeding under subsection (a), the Commission may enter an order requiring accounting and disgorgement, including reasonable interest. The Commission is authorized to adopt rules, regulations, and orders concerning payments to investors, rates of interest, periods of accrual, and such other matters as it deems appropriate to implement this subsection.".

TITLE II—AMENDMENTS TO THE SECURITIES EXCHANGE ACT OF 1934

SEC. 201. ENFORCEMENT OF TITLE.

Section 21 of the Securities Exchange Act of 1934 (15 U.S.C. 78u(d)) is amended—

(1) by redesignating subsection (d) as subsection (d)(1);

(2) by inserting after subsection (d)(1) the following new paragraphs:

"(2) AUTHORITY OF A COURT TO PROHIBIT PERSONS FROM SERVING AS OFFICERS AND DIRECTORS.—In any proceeding under paragraph (1) of this subsection, the court may prohibit, conditionally or unconditionally, and permanently or for such period of time as it shall determine, any person who violated section 10(b) of this title or the rules or regulations thereunder from acting as an officer or director of any issuer that has a class of securities registered pursuant to section 12 of this title or that is required to file reports pursuant to subsection (d) of section 15 of this title if the person's conduct demonstrates substantial unfitness to serve as an officer or director of any such issuer.

"(3) MONEY PENALTIES IN CIVIL ACTIONS.—

"(A) AUTHORITY OF COMMISSION.—Whenever it shall appear to the Commission that any person has violated any provision of this title, the rules or regulations thereunder, or a cease-and-desist order entered by the Commission pursuant to section 21C of this title, other than by committing a violation subject to a penalty pursuant to section 21A, the Commission may bring an action in a United States district court to seek, and the court shall have jurisdiction to impose, upon a proper showing, a civil penalty to be paid by the person who committed such violation.

"(B) AMOUNT OF PENALTY.—The amount of the penalty shall be determined by the court in light of the facts and circumstances. For each violation, the amount of the penalty shall not exceed the greater of (i) $100,000 for a natural person or $500,000 for any other person, or (ii) the gross amount of pecuniary gain to such defendant as a result of the violation.

"(C) PROCEDURES FOR COLLECTION.—

"(i) PAYMENT OF PENALTY TO TREASURY.—A penalty imposed under this section shall be payable into the Treasury of the United States.

"(ii) COLLECTION OF PENALTIES.—If a person upon whom such a penalty is imposed shall fail to pay such penalty within the time prescribed in the court's order, the Commission may refer the matter to the Attorney General who shall recover such penalty by action in the appropriate United States district court.

"(iii) REMEDY NOT EXCLUSIVE.—The actions authorized by this paragraph may be brought in addition to any other action that the Commission or the Attorney General is entitled to bring.

"(iv) JURISDICTION AND VENUE.—For purposes of section 27 of this title, actions under this paragraph shall be actions to enforce a liability or a duty created by this title.

"(D) SPECIAL PROVISIONS RELATING TO A VIOLATION OF A CEASE-AND-DESIST ORDER.—In an action to enforce a cease-and-desist order entered by the Commission pursuant to section 21C, each separate violation of such order shall be a separate offense, except that in the case of a violation through a continuing failure to comply with the order, each day of the failure to comply shall be deemed a separate offense.".

SEC. 202. CIVIL REMEDIES IN ADMINISTRATIVE PROCEEDINGS.

(a) The Securities Exchange Act of 1934 is amended by inserting after section 21A (15 U.S.C. 78u-1) the following:

"CIVIL REMEDIES IN ADMINISTRATIVE PROCEEDINGS

"SEC. 21B. (a) COMMISSION AUTHORITY TO ASSESS MONEY PENALTIES.—In any proceeding instituted pursuant to sections 15(b)(4), 15(b)(6), 15B, 15C, or 17A of this title against any person, the Commission or the appropriate regulatory agency may impose a civil penalty if it finds, on the record after notice and opportunity for hearing, that such person—

"(1) has willfully violated any provision of the Securities Act of 1933, the Investment Company Act of 1940, the Investment Advisers Act of 1940, or this title, or the rules or regulations thereunder, or the rules of the Municipal Securities Rulemaking Board;

"(2) has willfully aided, abetted, counseled, commanded, induced, or procured such a violation by any other person;

"(3) has willfully made or caused to be made in any application for registration or report required to be filed with the Commission or with any other appropriate regulatory agency under this title, or in any proceeding before the Commission with respect to registration, any statement which was, at the time and in the light of the circumstances under which it was made, false or misleading with respect to any material fact, or has omitted to state in any such application or report any material fact which is required to be stated therein; or

"(4) has failed reasonably to supervise, within the meaning of section 15(b)(4)(E) of this title, with a view to preventing violations of the provisions of such statutes, rules and regulations, another person who commits such a violation, if such other person is subject to his supervision;

and that such penalty is in the public interest.

"(b) MAXIMUM AMOUNT OF PENALTY.—The maximum amount of penalty for each such act or omission described in subsection (a) shall be $100,000 for a natural person or $500,000 for any other person.

"(c) DETERMINATION OF PUBLIC INTEREST.—In considering under this section whether a penalty is in the public interest, the Commission or the appropriate regulatory agency may consider—

"(1) whether the act or omission for which such penalty is assessed involved fraud, deceit, manipulation, or deliberate or reckless disregard of a regulatory requirement;

"(2) the harm to other persons resulting either directly or indirectly from such act or omission;

"(3) the extent to which any person was unjustly enriched, taking into account any restitution made to persons injured by such behavior;

"(4) whether such person previously has been found by the Commission, another appropriate regulatory agency, or a self-regulatory organization to have violated the Federal securities laws, State securities laws, or the rules of a self-regulatory organization, has been enjoined by a court of competent jurisdiction from violations of such laws or rules, or has been convicted by a court of competent jurisdiction of violations of such laws or of any felony or misdemeanor described in section 15(b)(4)(B) of this title;

"(5) the need to deter such person and other persons from committing such acts or omissions; and

"(6) such other matters as justice may require.

"(d) EVIDENCE CONCERNING ABILITY TO PAY.—In any proceeding in which the Commission or the appropriate regulatory agency may impose a penalty under this section, a respondent may present evidence of the respondent's ability to pay such penalty. The Commission or the appropriate regulatory agency may, in its discretion, consider such evidence in determining whether such penalty is in the public interest. Such evidence may relate to the extent of such person's ability to continue in business and the collectability of a penalty, taking into account any other claims of the United States or third parties upon such person's assets and the amount of such person's assets.

"(e) AUTHORITY TO ENTER AN ORDER REQUIRING AN ACCOUNTING AND DISGORGEMENT.—In any proceeding in which the Commission or the appropriate regulatory agency may impose a penalty under this section, the Commission or the appropriate regulatory agency may enter an order requiring accounting and a disgorgement, including reasonable interest. The Commission is authorized to adopt rules, regulations, and orders concerning payments to investors, rates of interest, periods of accrual, and such other matters as it deems appropriate to implement this subsection.".

(b) CONFORMING AMENDMENT.—The heading of section 21A of this title (15 U.S.C. 78u-1) is amended to read as follows:

"CIVIL PENALTIES FOR INSIDER TRADING"

SEC. 203. CEASE-AND-DESIST AUTHORITY.

The Securities and Exchange Act of 1934 is amended by adding after section 21B (as added by section 202 of this Act) the following new section:

"CEASE-AND-DESIST PROCEEDINGS

"SEC. 21C. (a) AUTHORITY OF THE COMMISSION.—If the Commission finds, after notice and opportunity for hearing, that any person is violating, has violated, or is about to violate any provision of this title, or any rule or regulation thereunder, the Commission may publish its findings and enter an order requiring such person, and any other person that is, was, or would be a causing of the violation, due to an act or omission the person knew or should have known would contribute to such violation, to cease and desist from committing or causing such violation and any future violation of the same provision, rule, or regulation. Such order may, in addition to requiring a person to cease and desist from committing or causing a violation, require such person to comply, or to take steps to effect compliance, with such provision, rule, or regulation, upon such terms and within such time as the Commission may specify in such order. Any such order may, as the Commission deems appropriate, require future compliance or steps to effect future compliance, either permanently or for such period of time as the Commission may specify, with such provision, rule, or regulation with respect to any security, any issuer, or any other person.

"(b) HEARING.—The notice instituting proceedings pursuant to subsection (a) shall fix a hearing date not earlier than 30 days nor later than 60 days after service of the notice unless an earlier or a later date is set by the Commission with the consent of any respondent so served.

"(c) TEMPORARY ORDER.—

"(1) IN GENERAL.—Whenever the Commission determines that the violation or threatened violation specified in the notice instituting proceedings pursuant to subsection (a), or the continuation thereof, is likely to result in significant dissipation or conversion of assets, significant harm to investors, or substantial harm to the public interest, including, but not limited to, losses to the Securities Investor Protection Corporation, prior to the completion of the proceedings, the Commission may enter a temporary order requiring the respondent to cease and desist from the violation or threatened violation and to take such action to prevent the violation or threatened violation and to prevent dissipation or conversion of assets, significant harm to investors, or substantial harm to the public interest as the Commission deems appropriate pending completion of such proceedings. Such an order shall be entered only after notice and opportunity for a hearing, unless the Commission determines that notice and hearing prior to entry would be impracticable or contrary to the public interest. A temporary order shall become effective upon service upon the respondent and, unless set aside, limited, or suspended by the Commission or a court of competent jurisdiction, shall remain effective and enforceable pending the completion of the proceedings.

"(2) APPLICABILITY.—This subsection shall apply only to a respondent that acts, or, at the time of the alleged misconduct acted, as a broker, dealer, investment adviser, investment company, municipal securities dealer, government securities broker, government securities dealer, or transfer agent, or is, or was at the time of the alleged misconduct, an associated person of any of the foregoing.

"(d) REVIEW OF TEMPORARY ORDERS.—

"(1) COMMISSION REVIEW.—At any time after the respondent has been served with a temporary cease-and-desist order pursuant to subsection (c), the respondent may apply to the Commission to have the order set aside, limited, or suspended. If the respondent has been served with a temporary cease-and-desist order entered without a prior Commission hearing, the respondent may, within 10 days after the date on which the order was served, request a hearing on such application and the Commission shall hold a hearing and render a decision on such application at the earliest possible time.

"(2) JUDICIAL REVIEW.—Within—

"(A) 10 days after the date the respondent was served with a temporary cease-and-desist order entered with a prior Commission hearing, or

"(B) with respect to any temporary cease-and-desist order entered without a prior Commission hearing, 10 days after the Commission renders a decision on an application and hearing under paragraph (1),

the respondent may apply to the United States district court for the district in which the respondent resides or has its principal place of business, or for the District of Columbia, for an order setting aside, limiting, or suspending the effectiveness or enforcement of the order, and the court shall have jurisdiction to enter such an order. A respondent served with a temporary cease-and-desist order entered without a prior Commission hearing may not make application to the court for a hearing except after hearing and decision by the Commission on the respondent's application under paragraph (1) of this subsection.

"(3) NO AUTOMATIC STAY OF TEMPORARY ORDER.—The commencement of proceedings under paragraph (2) of this subsection shall not, unless specifically ordered by the court, operate as a stay of the Commission's order.

"(4) EXCLUSIVE REVIEW.—Section 25 of this title shall not apply to temporary order entered pursuant to this section.

"(e) AUTHORITY TO ENTER AN ORDER REQUIRING AN ACCOUNTING AND DISGORGEMENT.—In any cease-and-desist proceeding under subsection (a), the Commission may enter an order requiring accounting and disgorgement, including reasonable interest. The Commission is authorized to adopt rules, regulations, and orders concerning payments to investors, rates of interest, periods of accrual, and such other matters as it deems appropriate to implement this subsection.".

SEC. 204. PROCEDURAL RULES FOR CEASE-AND-DESIST PROCEEDINGS.

Section 23 of the Securities Exchange Act of 1934 (15 U.S.C. 78w) is amended by

adding at the end thereof the following new subsection:

"(d) CEASE-AND-DESIST PROCEDURES.—Within 1 year after the date of enactment of this subsection, the Commission shall establish regulations providing for the expeditious conduct of hearings and rendering of decisions under section 21C of this title, section 8A of the Securities Act of 1933, section 9(f) of the Investment Company Act of 1940, and section 203(k) of the Investment Advisers Act of 1940.".

SEC. 205. CONFORMING AMENDMENTS TO SECTION 15B.

Section 15B(c)(6)(A) of the Securities Exchange Act of 1934 (15 U.S.C. 78o-4(c)(6)(A)) is amended—

(1) by striking "and the nature" and inserting ", the nature"; and

(2) by striking "proposed action and" and inserting "proposed action, and whether the Commission is seeking a monetary penalty against such municipal securities dealer or such associated person pursuant to section 21B of this title; and ".

TITLE III—AMENDMENTS TO THE INVESTMENT COMPANY ACT OF 1940

SEC. 301. CIVIL REMEDIES IN ADMINISTRATIVE PROCEEDINGS.

Section 9 of the Investment Company Act of 1940 (15 U.S.C. 80a-9) is amended—

(1) by redesignating subsection (d) as subsection (g);

(2) by inserting after subsection (c) the following new subsections:

"(d) MONEY PENALTIES IN ADMINISTRATIVE PROCEEDINGS.—

"(1) COMMISSION AUTHORITY.—In any proceeding instituted pursuant to subsection (b) against any person, the Commission may impose a civil penalty if it finds, on the record after notice and opportunity for hearing, that such person—

"(A) has willfully violated any provision of the Securities Act of 1933, the Securities Exchange Act of 1934, the Investment Advisers Act of 1940, or this title, or the rules or regulations thereunder;

"(B) has willfully aided, abetted, counseled, commanded, induced, or procured such a violation by any other person; or

"(C) has willfully made or caused to be made in any registration statement, application, or report required to be filed with the Commission under this title, any statement which was, at the time and in the light of the circumstances under which it was made, false or misleading with respect to any material fact, or has omitted to state in any such registration statement, application, or report any material fact which was required to be stated therein;

and that such penalty is in the public interest.

"(2) MAXIMUM AMOUNT OF PENALTY.—The maximum amount of the penalty for each such act or omission described in paragraph (1) shall be $100,000 for a natural person or $500,000 for any other person.

"(3) DETERMINATION OF PUBLIC INTEREST.—In considering under this section whether a penalty is in the public interest, the Commission may consider—

"(A) whether the act or omission for which such penalty is assessed involved fraud, deceit, manipulation, or deliberate or reckless disregard of a regulatory requirement;

"(B) the harm to other persons resulting either directly or indirectly from such act or omission;

"(C) the extent to which any person was unjustly enriched, taking into account any restitution made to persons injured by such behavior;

"(D) whether such person previously has been found by the Commission, another appropriate regulatory agency, or a self-regulatory organization to have violated the Federal securities laws, State securities laws, or the rules of a self-regulatory organization, has been enjoined by a court of competent jurisdiction from violations of such laws or rules, or has been convicted by a court of competent jurisdiction of violations of such laws or of any felony or misdemeanor described in section 203(e)(2) of the Investment Advisers Act of 1940;

"(E) the need to deter such person and other persons from committing such acts or omissions; and

"(F) such other matters as justice may require.

"(4) EVIDENCE CONCERNING ABILITY TO PAY.—In any proceeding in which the Commission may assess a penalty under this section, a respondent may present evidence of the respondent's ability to pay such penalty. The Commission may, in its discretion, consider such evidence in determining whether such penalty is in the public interest. Such evidence may relate to the extent of such person's ability to continue in business, and the collectability of a penalty, taking into account any other claims of the United States or third parties upon such person's assets and the amount of such person's assets.

"(e) AUTHORITY TO ENTER AN ORDER REQUIRING AN ACCOUNTING AND DISGORGEMENT.—In any proceeding in which the Commission may impose a penalty under this section, the Commission may enter an order requiring accounting and a disgorgement, including reasonable interest. The Commission is authorized to adopt rules, regulations, and orders concerning payments to investors, rates of interest, and such other matters as it deems appropriate to implement this subsection.

"(f) CEASE-AND-DESIST PROCEEDINGS.—

"(1) AUTHORITY OF THE COMMISSION.—If the Commission finds, after notice and opportunity for hearing, that any person is violating, has violated, or is about to violate any provision of this title, or any rule or regulation thereunder, the Commission may publish its findings and enter an order requiring such person, and any other person that is, was, or would be a cause of the violation, due to an act or omission the person knew or should have known would contribute to such violation, to cease and desist from committing or causing such violation and any future violation of the same provision, rule, or regulation. Such order may, in addition to requiring a person to cease and desist from committing or causing a violation, require such person to comply, or to take steps to effect compliance, with such provision, rule, or regulation, upon such terms and conditions and for such time as the Commission may specify in such order. Any such order may, as the Commission deems appropriate, require future compliance or steps to effect future compliance, either permanently or for such period of time as the Commission may specify, with such provision, rule, or regulation with respect to any security, any issuer, or any other person.

"(2) HEARING.—The notice instituting proceedings pursuant to paragraph (1) shall fix a hearing date not earlier than 30 days nor later than 60 days after service of the notice unless an earlier or a later date is set by the Commission with the consent of any respondent so served.

"(3) TEMPORARY ORDER.—

"(A) Whenever the Commission determines that the violation or threatened violation specified in the notice instituting proceedings pursuant to paragraph (1), or the continuation thereof, is likely to result in significant dissipation or conversion of assets, significant harm to investors, or substantial harm to the public interest, including, but not limited to, losses to the Securities Investor Protection Corporation, prior to the completion of the proceeding, the Commission may enter a temporary order requiring the respondent to cease and desist from the violation or threatened violation and to prevent dissipation or conversion of assets, significant harm to investors, or substantial harm to the public interest as the Commission deems appropriate pending completion of such proceedings. Such an order shall be entered only after notice and opportunity for a hearing, unless the Commission, notwithstanding section 40(a) of this title, determines that notice and hearing prior to entry would be impracticable or contrary to the public interest. A temporary order shall become effective upon service upon the respondent and, unless set aside, limited, or suspended by the Commission or a court of competent jurisdiction, shall remain effective and enforceable pending the completion of the proceedings.

"(B) This paragraph shall apply only to a respondent that acts, or, at the time of the alleged misconduct acted, as a broker, dealer, investment adviser, investment company, municipal securities dealer, government securities broker, government securities dealer, or transfer agent, or is, or was at the time of the alleged misconduct, an associated person of any of the foregoing.

"(4) REVIEW OF TEMPORARY ORDERS.—

"(A) COMMISSION REVIEW.—At any time after the respondent has been served with a temporary cease-and-desist order pursuant to paragraph (3), the respondent may apply to the Commission to have the order set aside, limited, or suspended. If the respondent has been served with a temporary cease-and-desist order entered without a prior Commission hearing, the respondent may, within 10 days after the date on which the order was served, request a hearing on such application and the Commission shall hold a hearing and render a decision on such application at the earliest possible time.

"(B) JUDICIAL REVIEW.—Within—

"(i) 10 days after the date the respondent was served with a temporary cease-and-desist order entered with a prior Commission hearing, or

"(ii) with respect to any temporary cease-and-desist order entered without a prior Commission hearing, 10 days after the Commission renders a decision on an application and hearing under subparagraph (A),

the respondent may apply to the United States district court for the district in which the respondent resides or has its principal place of business, or for the District of Columbia, for an order setting aside, limiting, or suspending the effectiveness or enforcement of the order, and the court shall have jurisdiction to enter such an order. A respondent served with a temporary cease-and-desist order entered without a prior Commission hearing may not make application to the court for a hearing except after hearing and decision by the Commission on the respondent's application under subparagraph (A) of this paragraph.

"(C) NO AUTOMATIC STAY OF TEMPORARY ORDER.—The commencement of proceedings

under subparagraph (B) of this paragraph shall not, unless specifically ordered by the court, operate as a stay of the Commission's order.

"(D) EXCLUSIVE REVIEW.—Section 43 of this title shall not apply to a temporary order entered pursuant to this section.

"(5) AUTHORITY TO ENTER AN ORDER REQUIRING AN ACCOUNTING AND DISGORGEMENT.—In any cease-and-desist proceeding under subsection (f)(1), the Commission may enter an order requiring accounting and disgorgement, including reasonable interest. The Commission is authorized to adopt rules, regulations, and orders concerning payments to investors, rates of interest, periods of accrual, and such other matters as it deems necessary to implement this subsection."; and

(3) in redesignated subsection (g), by striking "subsections (a) through (c) of".

SEC. 302. MONEY PENALTIES IN CIVIL ACTIONS.

Section 42 of the Investment Company Act of 1940 (15 U.S.C. 80a-41) is amended by adding at the end thereof the following new subsection:

"(e) MONEY PENALTIES IN CIVIL ACTIONS.—

"(1) AUTHORITY OF COMMISSION.—Whenever it shall appear to the Commission that any person has violated any provision of this title or the rules or regulations thereunder, or a cease-and-desist order entered pursuant to section 9(f) of this title, the Commission may bring an action in a United States district court to seek, and the court shall have jurisdiction to impose, upon a proper showing, a civil penalty to be paid by the person who committed such violation.

"(2) AMOUNT OF PENALTY.—The amount of the penalty shall be determined by the court in light of the facts and circumstances. For each violation, the amount of the penalty shall not exceed the greater of (A) $100,000 for a natural person or $500,000 for any other person, or (B) the gross amount of pecuniary gain to such defendant as a result of the violation.

"(3) PROCEDURES FOR COLLECTION.—

"(A) PAYMENT OF PENALTY TO TREASURY.—A penalty imposed under this section shall be payable into the Treasury of the United States.

"(B) COLLECTION OF PENALTIES.—If a person upon whom such a penalty is imposed shall fail to pay such penalty within the time prescribed in the court's order, the Commission may refer the matter to the Attorney General who shall recover such penalty by action in the appropriate United States district court.

"(C) REMEDY NOT EXCLUSIVE.—The actions authorized by this subsection may be brought in addition to any other action that the Commission or the Attorney General is entitled to bring.

"(D) JURISDICTION AND VENUE.—For purposes of section 44 of this title, actions under this paragraph shall be actions to enforce a liability or a duty created by this title.

"(4) SPECIAL PROVISIONS RELATING TO A VIOLATION OF A CEASE-AND-DESIST ORDER.—In an action to enforce a cease-and-desist order entered by the Commission pursuant to section 9(f), each separate violation of such order shall be a separate offense, except that in the case of a violation through a continuing failure to comply with such order each day of the failure to comply shall be deemed a separate offense.".

TITLE IV—AMENDMENTS TO THE INVESTMENT ADVISERS ACT OF 1940

SEC. 401. CIVIL REMEDIES IN ADMINISTRATIVE PROCEEDINGS.

Section 203 of the Investment Advisers Act of 1940 (15 U.S.C. 80b-3) is amended by adding at the end thereof the following new subsections:

"(i) MONEY PENALTIES IN ADMINISTRATIVE PROCEEDINGS.—

"(1) AUTHORITY OF COMMISSION.—In any proceeding instituted pursuant to subsection (e) or (f) against any person, the Commission may impose a civil penalty if it finds, upon the record after notice and opportunity for hearing, that such person—

"(A) has willfully violated any provision of the Securities Act of 1933, the Securities Exchange Act of 1934, the Investment Company Act of 1940, or this title, or the rules or regulations thereunder;

"(B) has willfully aided, abetted, counseled, commanded, induced, or procured such a violation by any other person;

"(C) has willfully made or caused to be made in any application for registration or report required to be filed with the Commission under this title, or in any proceeding before the Commission with respect to registration, any statement which was, at the time and in the light of the circumstances under which it was made, false or misleading with respect to any material fact, or has omitted to state in any such registration statement, application, or report any material fact which was required to be stated therein; or

"(D) has failed reasonably to supervise, within the meaning of section 203(e)(5) of this title, with a view to preventing violations of the provisions of this title and such rules and regulations, another person who commits such a violation, if such other person is subject to his supervision;

and that such penalty is in the public interest.

"(2) MAXIMUM AMOUNT OF PENALTY.—The maximum amount of the penalty for each act or omission described in paragraph (1) shall be $100,000 for a natural person or $500,000 for any other person.

"(3) DETERMINATION OF PUBLIC INTEREST.—In considering under this section whether a penalty is in the public interest, the Commission may consider—

"(A) whether the act or omission for which such penalty is assessed involved fraud, deceit, manipulation, or deliberate or reckless disregard of a regulatory requirement;

"(B) the harm to other persons resulting either directly or indirectly from such act or omission;

"(C) the extent to which any person was unjustly enriched, taking into account any restitution made to persons injured by such behavior;

"(D) whether such person previously has been found by the Commission, another appropriate regulatory agency, or a self-regulatory organization to have violated the Federal securities laws, State securities laws, or the rules of a self-regulatory organization, has been enjoined by a court of competent jurisdiction from violations of such laws or rules, or has been convicted by a court of competent jurisdiction of violations of such laws or of any felony or misdemeanor described in section 203(e)(2) of this title;

"(E) the need to deter such person and other persons from committing such acts or omissions; and

"(F) such other matters as justice may require.

"(4) EVIDENCE CONCERNING ABILITY TO PAY.—In any proceeding in which the Commission may impose a penalty under this section, a respondent may present evidence of the respondent's ability to pay such penalty. The Commission may, in its discretion, consider such evidence in determining whether such penalty is in the public interest. Such evidence may relate to the extent of such person's ability to continue in business and the collectability of a penalty, taking into account any other claims of the United States or third parties upon such person's assets and the amount of such person's assets.

"(j) AUTHORITY TO ENTER AN ORDER REQUIRING AN ACCOUNTING AND DISGORGEMENT.—In any proceeding in which the Commission may impose a penalty under this section, the Commission may enter an order requiring accounting and disgorgement, including reasonable interest. The Commission is authorized to adopt rules, regulations, and orders concerning payments to investors, rates of interest, periods of accrual and such other matters as it deems appropriate to implement this subsection.

"(k) CEASE-AND-DESIST PROCEEDINGS.—

"(1) AUTHORITY OF THE COMMISSION.—If the Commission finds, after notice and opportunity for hearing, that any person is violating, has violated, or is about to violate any provision of this title, or any rule or regulation thereunder, the Commission may publish its findings and enter an order requiring such person, and any other person that is, was, or would be a cause of the violation, due to an act or omission the person knew or should have known would contribute to such violation, to cease and desist from committing or causing such violation and any future violation of the same provision, rule, or regulation. Such order may, in addition to requiring a person to cease and desist from committing or causing a violation, require such person to comply, or to take steps to effect compliance, with such provision, rule, or regulation, upon such terms and conditions and within such time as the Commission may specify in such order. Any such order may, as the Commission deems appropriate, require future compliance or steps to effect future compliance, either permanently or for such period of time as the Commission may specify, with such provision, rule, or regulation with respect to any security, any issuer, or any other person.

"(2) HEARING.—The notice instituting proceedings pursuant to subsection (k)(1) shall fix a hearing date not earlier than 30 days nor later than 60 days after service of the notice unless an earlier or a later date is set by the Commission with the consent of any respondent so served.

"(3) TEMPORARY ORDER.—

"(A) IN GENERAL.—Whenever the Commission determines that the violation or threatened violation specified in the notice instituting proceedings pursuant to subsection (k)(1), or the continuation thereof, is likely to result in significant dissipation or conversion of assets, significant harm to investors, or substantial harm to the public interest, including, but not limited to, losses to the Securities Investor Protection Corporation, prior to the completion of the proceedings, the Commission may enter a temporary order requiring the respondent to cease and desist from the violation or threatened violation and to take such action to prevent the violation or threatened violation and to prevent dissipation or conversion of assets, significant harm to investors, or substantial

harm to the public interest as the Commission deems appropriate pending completion of such proceedings. Such an order shall be entered only after notice and opportunity for a hearing, unless the Commission, notwithstanding section 211(c) of this title, determines that notice and hearing prior to entry would be impracticable or contrary to the public interest. A temporary order shall become effective upon service upon the respondent and, unless set aside, limited, or suspended by the Commission or a court of competent jurisdiction, shall remain effective and enforceable pending the completion of the proceedings.

"(B) APPLICABILITY.—This paragraph shall apply only to a respondent that acts, or, at the time of the alleged misconduct acted, as a broker, dealer, investment adviser, investment company, municipal securities dealer, government securities broker, government securities dealer, or transfer agent, or is, or was at the time of the alleged misconduct, an associated person of any of the foregoing.

"(4) REVIEW OF TEMPORARY ORDERS.—

"(A) COMMISSION REVIEW.—At any time after the respondent has been served with a temporary cease-and-desist order pursuant to paragraph (3), the respondent may apply to the Commission to have the order set aside, limited, or suspended. If the respondent has been served with a temporary cease-and-desist order entered without a prior Commission hearing, the respondent may, within 10 days after the date on which the order was served, request a hearing on such application and the Commission shall hold a hearing and render a decision on such application at the earliest possible time.

"(B) JUDICIAL REVIEW.—Within—

"(i) 10 days after the date the respondent was served with a temporary cease-and-desist order entered with a prior Commission hearing, or

"(ii) with respect to any temporary cease-and-desist order entered without a prior Commission hearing, 10 days after the Commission renders a decision on an application and hearing under subparagraph (A),

the respondent may apply to the United States district court for the district in which the respondent resides or has its principal place of business, or for the District of Columbia, for an order setting aside, limiting, or suspending the effectiveness or enforcement of the order, and the court shall have jurisdiction to enter such an order. A respondent served with a temporary cease-and-desist order entered without a prior Commission hearing may not make application to the court for a hearing except after hearing and decision by the Commission on the respondent's application under subparagraph (A) of this paragraph.

"(C) NO AUTOMATIC STAY OF TEMPORARY ORDER.—The commencement of proceedings under subparagraph (B) of this paragraph shall not, unless specifically ordered by the court, operate as a stay of the Commission's order.

"(D) EXCLUSIVE REVIEW.—Section 213 of this title shall not apply to a temporary order entered pursuant to this section.

"(5) AUTHORITY TO ENTER AN ORDER REQUIRING AN ACCOUNTING AND DISGORGEMENT.—In any cease-and-desist proceeding under subsection (k)(1), the Commission may enter an order requiring accounting and disgorgement, including reasonable interest. The Commission is authorized to adopt rules, regulations, and orders concerning payments to investors, rates of interest, periods of accrual, and such other matters as it deems appropriate to implement this subsection.".

SEC. 402. MONEY PENALTIES IN CIVIL ACTIONS.

Section 209 of the Investment Advisers Act of 1940 (15 U.S.C. 80b-9) is amended by adding at the end thereof the following new subsection:

"(e) MONEY PENALTIES IN CIVIL ACTIONS.—

"(1) AUTHORITY OF COMMISSION.—Whenever it shall appear to the Commission that any person has violated any provision of this title or the rules or regulations thereunder, or a cease-and-desist order entered by the Commission pursuant to section 203(k) of this title, the Commission may bring an action in a United States district court to seek, and the court shall have jurisdiction to impose, upon a proper showing, a civil penalty to be paid by the person who committed such violation.

"(2) AMOUNT OF PENALTY.—The amount of the penalty shall be determined by the court in light of the facts and circumstances. For each violation, the amount of the penalty shall not exceed the greater of (A) $100,000 for a natural person or $500,000 for any other person, or (B) the gross amount of pecuniary gain to such defendant as a result of the violation.

"(3) PROCEDURES FOR COLLECTION.—

"(A) PAYMENT OF PENALTY TO TREASURY—A penalty imposed under this section shall be payable into the Treasury of the United States.

"(B) COLLECTION OF PENALTIES.—If a person upon whom such a penalty is imposed shall fail to pay such penalty within the time prescribed in the court's order, the Commission may refer the matter to the Attorney General who shall recover such penalty by action in the appropriate United States district court.

"(C) REMEDY NOT EXCLUSIVE.—The actions authorized by this subsection may be brought in addition to any other action that the Commission or the Attorney General is entitled to bring.

"(D) JURISDICTION AND VENUE.—For purposes of section 214 of this title, actions under this paragraph shall be actions to enforce a liability or a duty created by this title.

"(4) SPECIAL PROVISIONS RELATING TO A VIOLATION OF A CEASE-AND-DESIST ORDER.—In an action to enforce a cease-and-desist order entered by the Commission pursuant to section 203(k), each separate violation of such order shall be a separate offense, except that in the case of a violation through a continuing failure to comply with the order, each day of the failure to comply shall be deemed a separate offense.".

SEC. 403. CONFORMING AMENDMENT TO SECTION 214.

Section 214 of the Investment Advisers Act of 1940 (15 U.S.C. 80b-14) is amended—

(1) by inserting after "all suits in equity" the following: "and actions at law brought to enforce any liability or duty created by, or"; and

(2) by inserting after "Any suit or action" the following: "to enforce any liability or duty created by, or".

TITLE V—PENNY STOCK REFORM

SEC. 501. SHORT TITLE.

This Act may be cited as the "Penny Stock Reform Act of 1990".

SEC. 502. FINDINGS.

The Congress finds the following:

(1) The maintenance of an honest and healthy primary and secondary market for securities offerings is essential to enhancing long-term capital formation and economic growth and providing legitimate investment opportunities for individuals and institutions.

(2) Protecting investors in new securities is a critical component in the maintenance of an honest and healthy market for such securities.

(3) Protecting issuers of new securities and promoting the capital formation process on behalf of small companies are fundamental concerns in maintaining a strong economy and viable trading markets.

(4) Unscrupulous market practices and market participants have pervaded the "penny stock" market with an overwhelming amount of fraud and abuse.

(5) Although the Securities and Exchange Commission, State securities regulators, and securities self-regulators have made efforts to curb these abusive and harmful practices, the penny stock market still lacks an adequate and sufficient regulatory structure, particularly in comparison to the structure for overseeing trading in exchange-traded and national market system securities.

(6) Investors in the penny stock market suffer from a serious lack of adequate information concerning price and volume of penny stock transactions, the nature of this market, and the specific securities in which they are investing.

(7) Current practices do not adequately regulate the role of "promoters" and "consultants" in the penny stock market, and many professionals who have been banned from the securities markets have ended up in promoter and consultant roles, contributing substantially to fraudulent and abusive schemes.

(8) The present regulatory environment has permitted the ascendancy of the use of particular market practices, such as "reverse mergers" with shell corporations and "blank check" offerings, which are used to facilitate manipulation schemes and harm investors.

(9) In light of the substantial and continuing problems in the penny stock markets, additional legislative measures are necessary and appropriate.

SEC. 503. DEFINITION OF PENNY STOCK.

(a) AMENDMENT.—Section 3(a) of the Securities Exchange Act of 1934 (15 U.S.C. 78c(a)) is amended by adding at the end thereof the following new paragraph:

"(51)(A) The term 'penny stock' means any equity security other than a security that is—

"(i) registered or approved for registration and traded on a national securities exchange that meets such criteria as the Commission shall prescribe by rule or regulation for purposes of this paragraph;

"(ii) authorized for quotation on an automated quotation system sponsored by a registered securities association, if such system (I) was established and in operation before January 1, 1990, and (II) meets such criteria as the Commission shall prescribe by rule or regulation for purposes of this paragraph;

"(iii) issued by an investment company registered under the Investment Company Act of 1940;

"(iv) excluded, on the basis of exceeding a minimum price, net tangible assets of the issuer, or other relevant criteria, from the definition of such term by rule or regulation which the Commission shall prescribe for purposes of this paragraph; or

"(v) exempted, in whole or in part, conditionally or unconditionally, from the definition of such term by rule, regulation, or order prescribed by the Commission.

"(B) Notwithstanding clause (i) or (ii) of subparagraph (A), the Commission may, by rule, regulation, or order, designate any security or class of securities described in such clauses as within the meaning of the term 'penny stock' if such securities or class of securities are traded otherwise than on a national securities exchange or through an automated quotation system described in clause (ii) of subparagraph (A).

"(C) In exercising its authority under this paragraph to prescribe rules, regulations, and orders, the Commission shall determine that such rule, regulation, or order is consistent with the public interest and the protection of investors.".

(b) SCHEDULE FOR REGULATIONS.—The Commission shall prescribe rules or regulations to implement the amendment made by subsection (a) of this section within one year after the date of enactment of this Act.

SEC. 504. EXCLUSION OF SANCTIONED PERSONS FROM PARTICIPATING IN DISTRIBUTIONS OF PENNY STOCK.

(a) AMENDMENT.—Section 15(b) of the Securities Exchange Act (15 U.S.C. 780(b)) is amended by striking paragraph (6) thereof and inserting the following:

"(6)(A) The Commission, by order, shall censure or place limitations on the activities or functions of any person associated, seeking to become associated, or, at the time of the alleged misconduct, associated or seeking to become associated with a broker or dealer, or suspend for a period not exceeding 12 months or bar any such person from being associated with a broker or dealer, or from participating in a distribution of any penny stock, if the Commission finds, on the record after notice and opportunity for hearing, that such censure, placing of limitations, suspension, or bar is in the public interest and that such person has committed or omitted any act or omission enumerated in subparagraph (A), (D), or (E) of paragraph (4) of this subsection, has been convicted of any offense specified in subparagraph (B) of such paragraph (4) within 10 years of the commencement of the proceedings under this paragraph, or is enjoined from any action, conduct, or practice specified in subparagraph (C) of such paragraph (4). It shall be unlawful for any person as to whom such an order suspending or barring him from being associated with a broker or dealer or from participating in a distribution of any penny stock is in effect, without the consent of the Commission, willfully to become, or to be, associated with a broker or dealer, or to participate in a distribution of any penny stock. It shall be unlawful for any broker or dealer to permit such a person, without the consent of the Commission, to become, or remain, a person associated with him, and for any broker or dealer to participate in a distribution of any penny stock in which such a person is participating if such broker or dealer knew, or in the exercise of reasonable care should have known, of such order.

"(B) For purposes of this paragraph, the term 'participating in a distribution of any penny stock' includes acting as any promoter, finder, consultant, agent or other person who engages in activities with a broker, dealer, or issuer for purposes of the issuance of or trading in any penny stock, or inducing or attempting to induce the purchase or sale of any penny stock. The Commission may, by rule or regulation define such term to include other activities, and may by rule, regulation, or order exempt any person or class of persons, in whole or in part, conditionally or unconditionally, from such term.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) of this section shall be effective on the earlier of one year after the date of enactment of the Act or the effective date of rules or regulations prescribed by the Commission to implement section 3(a)(51) of the Securities Exchange Act of 1934, as added by this Act.

SEC. 505. REQUIREMENTS FOR BROKERS AND DEALERS OF PENNY STOCKS.

(a) AMENDMENT.—Section 15 of the Securities Exchange Act of 1934 (15 U.S.C. 78o) is amended by adding at the end thereof the following new subsection:

"(g) REQUIREMENTS FOR TRANSACTIONS IN PENNY STOCKS.—

"(1) IN GENERAL.—No broker or dealer shall make use of the mails or any means or instrumentality of interstate commerce to effect any transaction in, or to induce or attempt to induce the purchase or sale of, any penny stock by any customer except in accordance with the requirements of this subsection and the rules and regulations prescribed under this subsection.

"(2) RISK DISCLOSURE WITH RESPECT TO PENNY STOCKS.—Prior to effecting any transaction in any penny stock, a broker or dealer shall give the customer a risk disclosure document that—

"(A) contains a description of the nature and level of risk inherent in the market for penny stocks in both public offerings and secondary trading;

"(B) contains a description of the broker's or dealer's duties to the customer and of the rights and remedies available to the customer with respect to violations of such duties or other requirements of Federal securities laws;

"(C) contains a brief, clear description of a dealer market, including 'bid' and 'ask' prices for penny stocks and the significance of the spread between the bid and ask prices;

"(D) contains the toll free telephone number for inquiries on disciplinary actions established pursuant to section 15A(i) of this title;

"(E) defines significant terms used in the disclosure document or in the conduct of trading in penny stocks; and

"(F) contains such other information, and is in such form (including language, type size, and format), as the Commission shall require by rule or regulation.

"(3) COMMISSION RULES RELATING TO DISCLOSURE.—The Commission, by rule or regulation, shall adopt within one year after the date of enactment of this subsection additional standards for the disclosure by brokers and dealers to customers of information concerning transactions in penny stocks. Such rules—

"(A) shall require brokers and dealers to disclose to each customer, prior to effecting any transaction in, and at the time of confirming any transaction with respect to any penny stock, in accordance with such procedures and methods as the Commission may require consistent with the public interest and the protection of investors—

"(i) the bid and ask prices for such penny stock, or such other comparable information as the Commission may, by rule, require relating to the price of such stock, if bid and ask prices are not available;

"(ii) the number of shares to which such bid and ask prices apply, or such other comparable information as the Commission may, by rule, require relating to the depth and liquidity of the market for such stock; and

"(iii) the amount of any commission, and a description of any additional compensation, that the broker or dealer or associated person thereof will receive or has received in such transaction;

"(B) shall require brokers and dealers to provide, to each customer whose account with the broker or dealer contains penny stocks, a monthly statement indicating the market value of the penny stocks in that account or indicating that the market value of such stock cannot be determined because of the unavailability of firm quotes; and

"(C) may, as the Commission finds necessary or appropriate in the public interest or for the protection of investors, require brokers and dealers to disclose to customers such additional information concerning transactions in penny stocks as the Commission may require.

"(4) EXEMPTIONS.—The Commission, as it determines consistent with the public interest and the protection of investors, may by rule, regulation, or order exempt in whole or in part, conditionally or unconditionally, any person or class of persons, or any transaction or class of transactions, from the requirements of this subsection. Such exemptions shall include an exemption for brokers and dealers based on the minimal percentage of the broker's or dealer's commissions, commission-equivalents, and markups received from transactions in penny stocks.

"(5) REGULATIONS.—It shall be unlawful for any person to violate such rules and regulations as the Commission shall prescribe in the public interest or for the protection of investors or to maintain fair and orderly markets—

"(A) as necessary or appropriate to carry out this subsection; or

"(B) as reasonably designed to prevent fraudulent, deceptive, or manipulative acts and practices with respect to penny stocks.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) of this section shall be effective on and after one year after the date of enactment of this Act, except that the Commission shall prescribe rules or regulations to carry out such amendment within one year after the date of enactment of this Act.

SEC. 506. DEVELOPMENT OF AUTOMATED QUOTATION SYSTEMS FOR PENNY STOCKS.

The Securities Exchange Act of 1934 is amended by inserting after section 17A the following new section:

"AUTOMATED QUOTATION SYSTEMS FOR PENNY STOCKS

"SEC. 17B. (a) FINDINGS.—The Congress finds that—

"(1) the market for penny stocks suffers from a lack of reliable and accurate quotation and last sale information available to investors and regulators;

"(2) it is in the public interest and appropriate for the protection of investors and the maintenance of fair and orderly markets to improve significantly the information available to brokers, dealers, investors, and regulators with respect to quotations for and transactions in penny stocks; and

"(3) a fully implemented automated quotation system for penny stocks would meet the information needs of investors and market participants and would add visibility and regulatory and surveillance data to that market.

"(b) MANDATE TO FACILITATE THE ESTABLISHMENT OF AN AUTOMATED QUOTATION SYSTEMS.—

"(1) IN GENERAL.—The Commission is authorized and directed, therefore, having due

regard for the public interest, the protection of investors, and the maintenance of fair and orderly markets, to facilitate the widespread dissemination of reliable and accurate last sale and quotation information with respect to penny stocks in accordance with the findings set forth in subsection (a), with a view toward establishing, at the earliest feasible time, one or more automated quotation systems that will collect and disseminate information regarding all penny stocks.

"(2) CHARACTERISTICS OF SYSTEMS.—Each such automated quotation system shall—

"(A) be operated by a registered securities association or a national securities exchange in accordance with such rules as the Commission and these entities shall prescribe;

"(B) collect and disseminate quotation and transaction information;

"(C) except as provided in subsection (c), provide bid and ask quotations of participating brokers or dealers, or comparably accurate and reliable pricing information, which shall constitute firm bids or offers for at least such minimum numbers of shares or minimum dollar amounts as the Commission and the registered securities association or national securities exchange shall require; and

"(D) provide for the reporting of the volume of penny stock transactions, including last sale reporting, when the volume reaches appropriate levels that the Commission shall specify by rule or order.

"(c) EXEMPTIVE AUTHORITY.—The Commission may, by rule or order, grant such exemptions, in whole or in part, conditionally or unconditionally, to any class or classes of penny stocks from the requirements of paragraph (1) or (2)(C) of subsection (b) as the Commission determines to be consistent with the public interest, the protection of investors, and the maintenance of fair and orderly markets.

"(d) COMMISSION REPORTING REQUIREMENTS.—The Commission shall, in each of the first 5 annual reports (under section 23(b)(1)) submitted more than 12 months after the date of enactment of this section, include a description of the status of the penny stock automated quotation system or systems required by subsection (b). Such description shall include—

"(1) a review of the development, implementation, and progress of the project, including achievement of significant milestones and current project schedule; and

"(2) a review of the activities of registered securities associations and national securities exchanges in the development of the system.".

SEC. 507. REVIEW OF REGULATORY STRUCTURES AND PROCEDURES.

(a) REVIEW REQUIRED.—The Securities and Exchange Commission shall conduct a review of the rules, procedures, facilities, and oversight and enforcement activities of self-regulatory organizations under the Securities Exchange Act of 1934 with respect to penny stocks (within the meaning of section 3(a)(51) of such Act). Such review shall include an analysis of—

(1) the resources devoted by self-regulatory organizations to the detection, investigation, prosecution, and correction of fraud and abuse in the trading of such penny stocks;

(2) the methods and techniques used, and alternative methods which may be used, in those oversight and enforcement activities, including methods and techniques involving coordinated oversight and enforcement activities with other Federal and State authorities;

(3) the adequacy of the rules, procedures, and facilities of such self-regulatory organizations for the prevention of excessive spreads and markups, unscrupulous sales practices, and other conduct inconsistent with high standards of commercial honor and just and equitable principles of trade;

(4) any obstacles to or limitations on the authority of self-regulatory organizations that impair the conduct of those oversight and enforcement activities;

(5) the adequacy of current listing and maintenance requirements and procedures and the potential for erosion of such requirements and procedures due to issuer avoidance of penny stock designation and regulation; and

(6) such other matters as the Commission considers necessary or appropriate.

(b) REPORT.—Within one year after the date of enactment of this Act, the Commission shall submit a report on the review required by subsection (a). Such report shall include, in addition to a statement of findings with respect to each matter described in paragraphs (1) through (6) of such subsection, such recommendations as the Commission considers appropriate with respect to legislative or administrative changes.

SEC. 508. VOIDABILITY OF CONTRACTS IN VIOLATION OF SECTION 15(c)(2).

Section 29(b) of the Securities Exchange Act of 1934 (15 U.S.C. 78cc(b)) is amended—

(1) in clause (A), by striking "paragraph (2) or (3)" and inserting "paragraph (3)";

(2) in clause (B), by striking "paragraph (1)" and inserting "paragraph (1) or (2)"; and

(3) by adding at the end thereof the following new sentence: "The Commission may, in a rule or regulation prescribed pursuant to such paragraph (2) of such section 15(c), designate such rule or regulation, or portion thereof, as a rule or regulation, or portion thereof, a contract in violation of which shall not be void by reason of this subsection.".

SEC. 509. RESTRICTIONS ON BLANK CHECK OFFERINGS.

(a) AMENDMENTS.—Section 7 of the Securities Act of 1933 (15 U.S.C. 77g) is amended—

(1) by inserting "(a)" after "SEC. 7."; and

(2) by adding at the end thereof the following new subsection:

"(b)(1) The Commission shall prescribe special rules with respect to registration statements filed by any issuer that is a blank check company. Such rules may, as the Commission determines necessary or appropriate in the public interest or for the protection of investors—

"(A) require such issuers to provide timely disclosure, either prior to or after such statement becomes effective under section 8, of (i) information regarding the company to be acquired and the specific application of the proceeds of the offering, or (ii) additional information necessary to prevent such statement from being misleading;

"(B) place limitations on the use of such proceeds and the distribution of securities by such issuer until the disclosures required under subparagraph (A) have been made; and

"(C) provide a right of rescission to shareholders of such securities.

"(2) The Commission may, as it determines consistent with the public interest and the protection of investors, exempt any issuer or class of issuers from the rules prescribed under paragraph (1).

"(3) For purposes of paragraph (1) of this subsection, the term 'blank check company' means any development stage company that is issuing a penny stock (within the meaning of section 3(a)(51) of the Securities Exchange Act of 1934) and that—

"(A) has no specific business plan or purpose; or

"(B) has indicated that its business plan is to merge with an unidentified company or companies.".

(b) SCHEDULE FOR RULES.—The Commission shall prescribe rules to implement the amendment made by subsection (a) of this section within one year after the date of enactment of this Act.

SEC. 510. BROKER/DEALER DISCIPLINARY HISTORY.

Section 15A of the Securities Exchange Act 1934 (15 U.S.C. 78o-3) is amended by adding at the end the following:

"(i) A registered securities association shall (1) establish and maintain a toll-free telephone listing to receive inquiries from investors and the public regarding disciplinary actions involving its members and their associated persons, and (2) promptly respond to such inquiries in writing. Such association may charge persons, other than individual investors, reasonable fees for written responses to such inquiries. Such an association shall not have any liability to any person for any actions taken or omitted in good faith under this paragraph.".

The SPEAKER pro tempore. Is a second demanded?

Mr. RINALDO. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Massachusetts [Mr. MARKEY] will be recognized for 20 minutes and the gentleman from New Jersey [Mr. RINALDO] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Massachusetts [Mr. MARKEY].

Mr. MARKEY. Mr. Speaker, I rise in strong support of H.R. 5325, the Securities Enforcement and Penny Stock Reform Act of 1990. This bill combines the precise texts of H.R. 4497, the Penny Stock Reform Act of 1990, and H.R. 975, the Securities Law Enforcement Remedies Act of 1990, both of which were reported from the Committee on Energy and Commerce on June 27, 1990. The committee reports on those two bills, which have been filed today, constitute the legislative history for the bill before Members today. In their combined form, these two bills represent a powerful expansion of the enforcement weapons available to combat the problems of securities fraud in general and the penny stock market in particular.

The problems addressed in this legislation fall within a broader pattern of reckless greed and criminality which has left a dark stain on many of the superficially glossy financial success stories of the 1980's. From Boesky to Milken to the 1987 market crash to the stories of organized crime in the

penny stock market, the investing public has been pilloried with far too many horror stories. In response, we are now at the precipice of enacting a host of legislation which should amount to the most comprehensive reform of the securities laws since the 1930's. Alongside legislation on insider trading, market reform, international enforcement cooperation, and others, the bill before Members today will give the Securities and Exchange Commission the legal foundation to right the wrongs perpetrated over much of the last decade.

I would like to thank my good friend and colleague and ranking minority member of the Subcommittee on Telecommunications and Finance, Mr. RINALDO, for his help in bringing this merged measure to the floor, and note the extraordinary leadership of Chairman DINGELL, who introduced H.R. 975 and cosponsored H.R. 4497.

Without his persistent dedication to this particular area of national public policy, we would not be here today. I would also like to note the active and critical assistance of the gentleman from Oregon [Mr. WYDEN], on the penny stock bill. His persistent dedication and knowledge and insight on this subject has been invaluable in ensuring that the legislation which we are considering is out here on the floor today. This combined measure is also cosponsored by the gentleman from New Mexico [Mr. RICHARDSON], the gentleman from California [Mr. MOORHEAD], the gentleman from Maryland [Mr. MCMILLEN], the gentleman from Kansas [Mr. SLATTERY], and the gentleman from California [Mr. BATES], and all of these Members and many others deserve the complete thanks of the House and the American people.

As I noted above, the Committee on Energy and Commerce reported out title V of this legislation as H.R. 4497, the Penny Stock Reform Act of 1990. According to Susan Bryant, the president of the North American State Securities Administrators Association, there is in her words, "no other single piece of investment-related legislation before Congress today that would do more to protect so many individuals and their life savings."

Title V maintains all of the essential pieces which marked the foundation of H.R. 4497 as introduced: greatly enhanced disclosure for penny stock investors; movement towards a fully implemented automated quotation system for penny stocks; new SEC authority to keep recidivist criminals out of the penny stock business as promoters and consultants; and restrictions of the use of blank check offerings. It differs from H.R. 4497 as originally introduced in that it grants the SEC a greater degree of administrative flexibility in how it will implement the policy directives contained within this legislation.

This part of the legislation is targeted like a laser beam on a penny stock market which has failed the test of serving as a legitimate capital-raising arena for small business. Title V of the bill would require the SEC to adopt rules requiring brokers and dealers to provide investors with a number of specific types of information concerning the prices of stock they are purchasing and the inherent riskiness of the penny stock market. The Commission is also directed to promulgate rules regulating the issuance of blank check offerings. This section looks in particular to states like Utah as a model, by manadating timely disclosure of actual business plans, limiting the proceeds of blank checks until adequate disclosure is made, and providing shareholders with a right of rescission if that disclosure is deemed unacceptable.

□ 1330

The effect of such rules would hopefully be similar to that in Urah: the elimination of blank checks as an easy vehicle for penny stock fraud. All of these rules, in combination with sanctioning authority over promoters and consultants and the development of a penny stock automated quotation system, will ensure that institutionalization of a comprehensive regulatory farmework for the penny stock market.

Make no mistake: this legislation is far more than a hope for future regulatory action. It is a precise and unequivocal directive to the SEC to finish the job of clearing up the penny stock market. The legislation mandates that within the next year, the Commission must adopt new rules to restrict penny stock blank check offerings and broaden greatly the disclosure to penny stock investors, begin the establishment of a fully implemented automated quotation system and report back to Congress in a comprehensive review of the entire self-regulatory apparatus in the penny stock market.

The first four titles of this bill were previously reported out of the Energy and Commerce Committee as H.R. 975. They reflect the combined efforts of the SEC, which originally recommended this legislation to Congress, Chairman DINGELL, the gentleman from New Jersey, Mr. RINALDO, and the input of many others from the Senate, the securities industry and the bar. This segment of the legislation represents a fair balancing of the interests of a stronger, more effective SEC and the procedural rights of persons subject to investigation and sanction by the Commission.

The two key pieces of H.R. 975 as introduced remain. First, the authority to impose fines for violations of the securities laws. The SEC is limited under present law in its ability to craft civil remedies which are appropriate to the particular violation of law. For cases other than those involving insider trading, which has its own statutory directive on fines, the Commission would now have an effective alternative to the simple slap on the wrist represented by an injunction or the nuclear bomb represented by barring someone from the securities business. The Commission could impose fines for a myriad of violations including issuance of false or misleading prospectus information, market manipulation in penny stocks, stock parking, and short-selling on a downtick.

This legislation also expressly provides the SEC with the authority to seek through the courts the bar of securities law violators from serving as officers and directors of public corporations. This equitable remedy is essential to protect the investing public from corporate theft and corruption.

The bill also adds an important new cease and desist authority which was not in H.R. 975 as originally introduced. This new grant of authority would permit the Commission to issue both temporary and permanent orders through administrative action in order to prevent a significant dissipation or conversion of assets, significant harm to investors or substantial harm to the public interest. This cease and desist authority is similar to that granted the banking regulators in last year's savings and loan legislation and that currently used by the Federal Trade Commission. It would address an oft-stated concern by law enforcement officials that the SEC lacks the authority to move quickly in response to knowledge of ongoing or potential fraudulent activity. Due to the serious nature of the potential imposition of temporary orders, the SEC may only impose them against regulated persons such as broker/dealers and investment advisers, among others.

I am particularly pleased by the procedural protections which this legislation now contains regarding the original cease and desist provision. In addition to review of these orders in the courts, the legislation would now mandate that whenever the Commission issues a temporary cease and desist order without the benefit of notice to the alleged violator, the SEC is required to provide a hearing to that party and render a decision reviewing the initial order at the earliest possible time. This tracks the type of procedural protections built into rule 65 of the Federal Rules of Civil Procedure, which govern temporary restraining orders in the Federal courts.

Mr. Speaker, again this is a bill which has been worked out on a bipartisan basis. We have worked it out over the last year and a half between the House and the Senate, between Democrats and Republicans. The penny

stock initiative which was built into this legislation is something we are now going to have to work with the Senate on, but I think we have a good chance to reach an agreement with them on this subject. It is my hope that the House will see fit this afternoon to accept this legislation. We believe it is an adequate and necessary response to the fraud and abuse which the financial marketplace saw in these areas in the 1980s.

Mr. Speaker, I reserve the balance of my time.

Mr. RINALDO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 5325, a bill to amend the Federal securities laws to provide additional enforcement remedies, and to eliminate abuses in the penny stock market. H.R. 5325 merges H.R. 975, the Securities Law Enforcement Remedies Act and H.R. 4497, the Penny Stock Reform Act. The committee reports for those bills will constitute its legislative history. H.R. 5325, deserves the support of every Member of the Congress.

This bill ranks with the most important legislation we will consider this year. It will bring the longstanding national disgrace of an inadequately regulated penny stock market to a close. It mandates and authorizes the Securities and Exchange Commission to provide greater protection to investors in low priced securities.

This carefully crafted legislation drew on the collective expertise of the SEC, the National Association of Securities Dealers, the State securities commissioners and the firms of the securities industry itself. We worked hard to identify the problems of the penny stock market, and we have proposed solutions that will increase investor protection and not interfere with the ability of small businesses to raise capital.

This legislation addresses serious and longstanding problems that have eluded the ability of State regulators and others to control.

It is a sad fact that by the time penny stock fraud has been discovered, all the money is usually gone. Investors are then left with a right to sue that is meaningless. H.R. 5325 will combat this situation. It gives the SEC authority to adopt rules restricting the use of funds raised in a public offering of penny stocks, and to grant a right of recission as well.

The problem of recidivism by promoters of fraud is addressed similarly in this legislation. The SEC is authorized to adopt rules and to take whatever steps are necessary to insure that securities law violators are kept out of the penny stock market, permanently.

The provisions of H.R. 5325 do not only fight penny stock fraud. This bill also will improve the operation of the legitimate stock market in low priced securities.

Its provisions mandate the development of a trading information system that will improve the quality of information provided to penny stock investors. I predict that someday in the future, people will look at this provision as the most significant of the bill.

Mr. Speaker, I was an original sponsor of the Penny Stock Reform Act when it was introduced in April 1990. The speed with which we have moved underscores the depth of concern in Congress about this problem.

Similar statements must be made about the remaining sections of H.R. 5325, those that contain the provisions of the Securities Law Enforcement Remedies Act. This legislation adds weapons to the SEC's enforcement arsenal, broadening the spectrum of penalties that can be imposed upon securities law violators.

The most potent of the new powers gives the SEC authority to impose cease and desist orders. Today millions of dollars can be removed from bank accounts in a very short time. Hindering the ability of Federal regulators to restrain such transfers is a prescription for disaster. That is why Congress gave bank regulators cease and desist authority in the FIRREA. That is why the SEC should have similar authority.

An important supplement to cease and desist powers included in H.R. 975, is specific SEC authority to order a violator of the securities laws to disgorge illegally made profits, including interest. But merely giving back ill gotten gains is frequently not enough of a punishment. Consequently, under the provisions of H.R. 5325, the SEC may also petition a court to impose monetary fines on those who violate SEC cease and desist orders.

Taken together, the provisions of the Penny Stock Reform Act and the Remedies Act make a powerful statement that Congress will never allow the integrity of the securities markets to be compromised and that investors will be protected.

Mr. Speaker, I want to thank the chairman of the Subcommittee on Telecommunications and Finance, Mr. MARKEY, and the chairman of the full Energy and Commerce Committee, Mr. DINGELL, as well as Messrs. WYDEN, RICHARDSON, SLATTERY, MCMILLEN, and BATES for their sponsorship of this legislation and for their support of my efforts to see it passed. I particularly want to thank my colleague in the minority, my friend from California, Mr. MOORHEAD, for joining me in sponsoring the Penny Stock Reform Act.

Mr. Speaker, I urge all of my colleagues to support this important legislation.

□ 1340

Mr. Speaker, I reserve the balance of my time.

Mr. MARKEY. Mr. Speaker, I yield such time as he may consume to the gentleman from Oregon [Mr. WYDEN] who conducted in Portland, OR last Auguest the first hearing ever on the subject of penny stocks, and he has been an insistent, persistent, dedicated advocate for real reform in this area for several years.

Mr. WYDEN. Mr. Speaker and colleagues, I do not want to turn this into a bouquet-tossing contest, but the gentleman from Massachusetts [Mr. MARKEY] has just done an outstanding job along with the chairman of our full committee, the gentleman from Michigan [Mr. DINGELL] in putting together this legislation. I also want to commend the gentleman from New Jersey [Mr. RINALDO], my friend, and the gentleman from New York [Mr. LENT], the ranking minority member.

This, as the gentleman from New Jersey [Mr. RINALDO] said, is a truly bipartisan bill, and it reflects, I think, a great deal of credit to both the ranking members of both the committee and the subcommittee in moving forward with this legislation.

Mr. Speaker and colleagues, I would like to touch for just a moment on the penny stock legislation specifically because I think that this bill sends a particularly important message that Congress wants the small investor to get a fair shake in this country. All through the 1980's it seemed that regulation and efforts were built around the idea that we ought to make markets efficient for big investors. We saw that, unfortunately, embodied by the Boeskys and the Milkens, but it always seemed that, when it came to the topic of going to bat for small investors, that that subject got small shrift. I think, under the leadership of the gentleman from Massachusetts [Mr. MARKEY] and the gentleman from New Jersey [Mr. RINALDO] we have begun to right the scales, and we have begun to initiate a package of legislation that is going to give the small investor the attention and the importance that they deserve.

Mr. Speaker, I think my colleagues know that this is going to have to be a long-term effort. There is no question in my mind that these rougues and scoundrels who have been working out of boilerrooms and other facilities to rip off the elderly and the veterans, the kind of ripoffs we have heard about at our hearing in Portland; they are going to shift to other investments. I think there is evidence already that they are looking into going into Government securities, and I am concerned that we move carefully and quickly to examine this area as well. But I think, with this important legis-

lation, we are closing a door to the ripoff artists.

Mr. Speaker, the penny stock market really has been the ripoff vehicle of choice for some years now, and I am very pleased that we are moving forward with this very important legislation.

Now in committee there were a number of concerns raised. For example, the effect that this bill will have on the capital formation process. Some have said that perhaps stopping these ripoffs is going to dry up needed investment capital. I think quite the opposite. I think what is happening is that scarce capital, capital that ought to be going into small publicly held corporations, is being diverted by some of these ripoff operations. So, I think the legislation that we are advancing today is going to promote capital formation rather than retard it, and it will have a very beneficial effect on an important issue for all our small businesses, and that is access to credit and capital.

Mr. Speaker, I am also very pleased that, as we went forward with the legislation, the definition of a penny stock was strengthened. I raised the concern that some penny stocks had recently become exchange listed in an effort to escape SEC enforcement efforts, and under the gentleman from Massachusetts [Mr. MARKEY] and the gentleman from New Jersey [Mr. RINALDO] that particular loophole was closed, and I think it was an important one because it would have left us with a dodge on the book that might have continued some of these penny stock scams.

So, Mr. Speaker and colleagues, we are going forward with important legislation. The gentleman from Michigan [Mr. DINGELL] in moving both these bills forward deserves great credit, and I want to thank again the chairman of the subcommittee and the ranking minority member for the chance to team up with them. This was an effort that I had a chance to help launch in Portland, OR, about a year ago, and, as the gentleman from New Jersey [Mr. RINALDO] has said, it is really an example of how we ought to work in a bipartisan way to strengthen securities markets in this country and go to bat for small investors.

Mr. RINALDO. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. MARKEY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, let me conclude by saying this: The legislation would not have been possible without the bipartisan cooperation which the gentleman from Michigan [Mr. DINGELL] and the gentleman from New York [Mr. LENT] have shown on this legislation. Again, I continue to come back to the extraordinary leadership and the bipartisan cooperation that the gentleman from New Jersey [Mr. RINALDO] and I have had at the subcommittee level over the last 4 years, and this bill is yet another piece of legislation that reflects that. I would like to compliment again the gentleman from Oregon [Mr. WYDEN] for his work on the penny stock aspects of this legislation. His leadership has been invaluable and historic.

At the staff level, and in the same way that I have to mention the work of all of our staffs, meaning Larry Irving, and Herb Brown, and Sara Morris and Nancy Lee on the children's TV, then I also have to mention on this bill the work of also David Leach and Terry Haines on the children's television legislation. They just have to be mentioned. On this bill, Howard Homonoff has done absolutely first-rate work in ensuring that this bill comes to fruition, along with Herb Brown, Consuela Washington at the full committee level, Steve Blumenthal on the minority side, herculean efforts to make sure this legislation and the other legislation is, in fact, put into a form which we can bring out here to the floor. At the SEC I would like to compliment Chairman Richard Breeden for his work and his staff, especially Joe Goldstein, the chairman of the SEC Penny Stock Task Force, to the National Association of Securities Administrators, particularly Susan Bryant and John Perkins and Ralph Lambiase for their breadth of experience in this area which has been invaluable in the crafting of legislation, to the NASD, to members of the bar and to the industry who have commented very helpfully on both pieces of legislation which were merged here together in the securities area. I want to thank them for all of their work. It would not have been possible, and to all of the rest of the colleagues on the full committee and here in the Congress for their insight on this legislation.

Mr. DINGELL. Mr. Speaker, I rise in strong support of H.R. 5325 and I urge my colleagues to support its immediate passage. H.R. 5325 includes the text of two bills reported unanimously on June 20, 1990, by the Committee on Energy and Commerce: H.R. 975, the Securities Law Enforcement Remedies Act of 1990, which I introduced on February 9, 1989, at the request of the Securities and Exchange Commission, and H.R. 4497, the Penny Stock Reform Act of 1990, which I cosponsored. The committee reports for these bills were filed earlier today and shall constitute the legislative history for the respective provisions of H.R. 5325.

This legislation is designed to strengthen the enforcement powers of the Securities and Exchange Commission and provide the agency with a broader range of remedies to protect investors and maintain the integrity of the Nation's securities markets. H.R. 5325 addresses the disturbing levels of fraud, manipulation and other illegal activity in the U.S. securities markets in general, and the penny stock market in particular. I want to single out Representative MARKEY, Representative RINALDO, and Representative WYDEN and their staffs for special commendation in connection with their diligent and hard work in bringing this legislation before the House today. I also appreciate the cooperative efforts, constructive comments and valued technical assistance provided by the SEC, State securities administrators, exchanges and the NASD, the Securities Industry Association and members of the securities bar.

Victimized investors will lose confidence in and retreat from the marketplace. We cannot as a Nation afford that. Our markets are so vital to the creation of the businesses and jobs that will be needed in the 1990's to keep America competitive. H.R. 5325 will give the SEC greater authority and flexibility in the conduct of its law enforcement efforts and strengthen the Agency's ability to protect investors and maintain the honesty, integrity and liquidity of the U.S. securities markets.

I urge passage of this bill.

Mr. MARKEY Mr. Speaker, I yield back the balance of my time.

□ 1350

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Massachusetts [Mr. MARKEY] that the House suspend the rules and pass the bill, H.R. 5325.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

Mr. MARKEY. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 647) to amend the Federal securities laws in order to provide additional enforcement remedies for violations of those laws, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The Clerk read the Senate bill, as follows:00

S. 647

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; TABLE OF CONTENTS; EFFECTIVE DATE.

(a) SHORT TITLE.—This Act may be cited as the "Securities Law Enforcement Remedies Act of 1990".

(b) TABLE OF CONTENTS.—

Sec. 1. Short title; table of contents; effective date.

TITLE I—AMENDMENTS TO THE SECURITIES ACT OF 1933

Sec. 101. Authority of a court to impose money penalties and to prohibit persons from serving as officers and directors.

Sec. 102. Cease-and-desist authority.
TITLE II—AMENDMENTS TO THE SECURITIES EXCHANGE ACT OF 1934
Sec. 201. Enforcement of title.
Sec. 202. Civil remedies in administrative proceedings.
Sec. 203. Cease-and-desist authority.
Sec. 204. Conforming amendments to section 15B.
Sec. 205. Signature guarantees.
TITLE III—AMENDMENTS TO THE INVESTMENT COMPANY ACT OF 1940
Sec. 301. Civil remedies in administrative proceedings.
Sec. 302. Money penalties in civil actions.
TITLE IV—AMENDMENTS TO THE INVESTMENT ADVISERS ACT OF 1940
Sec. 401. Civil remedies in administrative proceedings.
Sec. 402. Money penalties in civil actions.
Sec. 403. Conforming amendment to section 214.
TITLE V—AMENDMENTS TO THE CRIMINAL CODE
Sec. 501. Grand jury secrecy.

(c) EFFECTIVE DATE.—The amendments made by this Act shall apply to any conduct occurring after the date of enactment of this Act.

TITLE I—AMENDMENTS TO THE SECURITIES ACT OF 1933

SEC. 101. AUTHORITY OF A COURT TO IMPOSE MONEY PENALTIES AND TO PROHIBIT PERSONS FROM SERVING AS OFFICERS AND DIRECTORS.

Section 20 of the Securities Act of 1933 (15 U.S.C. 77t) is amended by adding at the end thereof the following new subsections:

"(d) MONEY PENALTIES IN CIVIL ACTIONS.—

"(1) AUTHORITY OF COMMISSION.—Whenever it shall appear to the Commission that any person has violated any provision of this title, the rules or regulations thereunder, or a cease-and-desist order entered by the Commission pursuant to section 8A of this title, other than by committing a violation subject to a penalty under section 21A of the Securities Exchange Act of 1934, the Commission may bring an action in the United States district court to seek, and the court shall have jurisdiction to impose, upon a proper showing, a civil penalty to be paid by the person who committed such violation.

"(2) AMOUNT OF PENALTY.—

"(A) FIRST TIER.—The amount of the penalty shall be determined by the court in light of the facts and circumstances. For each violation, the amount of the penalty shall not exceed the greater of (i) $5,000 for a natural person or $50,000 for any other person, or (ii) the gross amount of pecuniary gain to such defendant as a result of the violation.

"(B) SECOND TIER.—Notwithstanding subparagraph (A), the maximum amount of penalty for each such violation shall not exceed the greater of (i) $50,000 for a natural person or $250,000 for any other person, or (ii) the gross amount of pecuniary gain to such defendant as a result of the violation, if the violation described in paragraph (1) involved fraud, deceit, manipulation, or deliberate or reckless disregard of a regulatory requirement.

"(C) THIRD TIER.—Notwithstanding subparagraphs (A) and (B), the maximum amount of penalty for each such violation shall not exceed the greater of (i) $100,000 for a natural person or $500,000 for any other person, or (ii) the gross amount of pecuniary gain to such defendant as a result of the violation, if—

"(I) the violation described in paragraph (1) involved fraud, deceit, manipulation, or deliberate or reckless disregard of a regulatory requirement; and

"(II) such violation directly or indirectly resulted in substantial losses or created a significant risk of substantial losses to other persons.

"(3) PROCEDURES FOR COLLECTION.—

"(A) PAYMENT OF PENALTY TO TREASURY.—A penalty imposed under this section shall be payable into the Treasury of the United States.

"(B) COLLECTION OF PENALTIES.—If a person upon whom such a penalty is imposed shall fail to pay such penalty within the time prescribed in the court's order, the Commission may refer the matter to the Attorney General who shall recover such penalty by action in the appropriate United States district court.

"(C) REMEDY NOT EXCLUSIVE.—The actions authorized by this subsection may be brought in addition to any other action that the Commission or the Attorney General is entitled to bring.

"(D) JURISDICTION AND VENUE.—For purposes of section 22 of this title, actions under this section shall be actions to enforce a liability or a duty created by this title.

"(4) SPECIAL PROVISIONS RELATING TO A VIOLATION OF A CEASE-AND-DESIST ORDER.—In an action to enforce a cease-and-desist order entered by the Commission pursuant to section 8A, each separate violation of such an order shall be a separate offense, except that in the case of a violation through a continuing failure to comply with such an order, each day of the failure to comply with the order shall be deemed a separate offense.

"(e) AUTHORITY OF A COURT TO PROHIBIT PERSONS FROM SERVING AS OFFICERS AND DIRECTORS.—In any proceeding under subsection (b), the court may prohibit, conditionally or unconditionally, and permanently or for such period of time as it shall determine, any person who violated section 17(a)(1) of this title from acting as an officer or director of any issuer that has a class of securities registered pursuant to section 12 of the Securities Exchange Act of 1934 (15 U.S.C. 781) or that is required to file reports pursuant to section 15(d) of such Act (15 U.S.C. 78o(d)) if the person's conduct demonstrates substantial unfitness to serve as an officer or director of any such issuer.".

SEC. 102. CEASE-AND-DESIST AUTHORITY.

The Securities Act of 1933 (15 U.S.C. 77 et seq.) is amended by inserting after section 8 the following:

"CEASE-AND-DESIST PROCEEDINGS

"SEC. 8A. (a) AUTHORITY OF THE COMMISSION.—If the Commission finds, after notice and opportunity for hearing, that any person is violating, has violated, or is about to violate any provision of this title, or any rule or regulation thereunder, the Commission may publish its findings and enter an order requiring such person, and any other person that is, was, or would be a cause of the violation, due to an act or omission such other person knew or should have known would contribute to such violation, to cease and desist from committing or causing such violation and any future violation of the same provision, rule, or regulation. Such order may, in addition to requiring a person to cease and desist from committing or causing a violation, require such person to comply, or to take steps to effect compliance, with such provision, rule or regulation, upon such terms and conditions and within such time as the Commission may specify in such order. Any such order may, as the Commission deems appropriate, require future compliance or steps to effect future compliance, either permanently or for such period of time as the Commission may specify, with such provision, rule or regulation with respect to any security, any issuer, or any other person.

"(b) HEARING.—The notice instituting proceedings pursuant to subsection (a) shall fix a hearing date not earlier than 30 days nor later than 60 days after service of the notice unless an earlier or a later date is set by the Commission with the consent of any respondent so served.

"(c) TEMPORARY ORDER.—

"(1) IN GENERAL.—Whenever the Commission determines that the violation or threatened violation specified in the notice instituting proceedings pursuant to subsection (a), or the continuation thereof, is likely to result in significant dissipation or conversion of assets, significant harm to investors, or substantial harm to the public interest, including, but not limited to, losses to the Securities Investor Protection Corporation, prior to the completion of the proceedings, the Commission may enter a temporary order requiring the respondent to cease and desist from the violation or threatened violation and to take such action to prevent the violation or threatened violation and to prevent dissipation or conversion of assets, significant harm to investors, or substantial harm to the public interest as the Commission deems appropriate pending completion of such proceeding. If the Commission determines that notice of the temporary order would be impracticable or contrary to the public interest, such order shall become effective upon service upon the respondent and, unless set aside, limited, or suspended by the Commission or a court of competent jurisdiction, shall remain effective and enforceable pending the completion of the proceedings.

"(2) APPLICABILITY.—This subsection shall apply only to a respondent that acts, or, at the time of the alleged misconduct acted, as a broker, dealer, investment adviser, investment company, municipal securities dealer, government securities broker, government securities dealer, or transfer agent, or is, or was at the time of the alleged misconduct, an associated person of any of the foregoing.

"(d) REVIEW OF TEMPORARY ORDER.—

"(1) JUDICIAL REVIEW.—Within 10 days after a respondent has been served with a temporary cease-and-desist order entered pursuant to subsection (c), the respondent may apply to the United States district court for the district in which the respondent resides or has its principal place of business, or for the District of Columbia, for an order setting aside, limiting, or suspending the effectiveness or enforcement of the order, and such court shall have sole jurisdiction to enter such an order.

"(2) COMMISSION REVIEW.—At any time after a respondent has been served with a temporary cease-and-desist order pursuant to subsection (c), the respondent may apply to the Commission to have the order set aside, limited, or suspended, and the Commission may enter such an order.

"(3) NO AUTOMATIC STAY OF TEMPORARY ORDER.—The commencement of proceedings under paragraph (1) of this subsection shall not, unless specifically ordered by the court, operate as a stay of the Commission's order.

"(4) EXCLUSIVE REVIEW.—Section 9(a) of this title shall not apply to a temporary order entered pursuant to this section.

"(e) AUTHORITY TO ENTER AN ORDER REQUIRING AN ACCOUNTING AND DISGORGEMENT.—In any cease-and-desist proceeding under subsection (a), the Commission may enter an order requiring accounting and disgorgement, including reasonable interest. The Commission is authorized to adopt rules, regulations and orders concerning payments to investors, rates of interest, periods of accrual, and such other matters as it deems appropriate to implement this subsection.".

TITLE II—AMENDMENTS TO THE SECURITIES EXCHANGE ACT OF 1934

SEC. 201. ENFORCEMENT OF TITLE.

Section 21 of the Securities Exchange Act of 1934 (15 U.S.C. 78u(d)) is amended—

(1) by redesignating subsection (d) as subsection (d)(1);

(2) by inserting after subsection (d)(1) the following new paragraphs:

"(2) AUTHORITY OF A COURT TO PROHIBIT PERSONS FROM SERVING AS OFFICERS AND DIRECTORS.—In any proceeding under paragraph (1) of this section, the court may prohibit, conditionally or unconditionally, and permanently or for such period of time as it shall determine, any person who violated section 10(b) of this title or the rules or regulations thereunder from acting as an officer or director of any issuer that has a class of securities registered pursuant to section 12 of this title or that is required to file reports pursuant to subsection (d) of section 15 of this title if the person's conduct demonstrates substantial unfitness to serve as an officer or director of any such issuer.

"(3) MONEY PENALTIES IN CIVIL ACTIONS.—

"(A) AUTHORITY OF COMMISSION.—Whenever it shall appear to the Commission that any person has violated any provision of this title, the rules or regulations thereunder, or a cease-and-desist order entered by the Commission pursuant to section 21C of this title, other than by committing a violation subject to a penalty pursuant to section 21A, the Commission may bring an action in a United States district court to seek, and the court shall have jurisdiction to impose, upon a proper showing, a civil penalty to be paid by the person who committed such violation.

"(B) AMOUNT OF PENALTY.—

"(i) FIRST TIER.—The amount of the penalty shall be determined by the court in light of the facts and circumstances. For each violation, the amount of the penalty shall not exceed the greater of (I) $5,000 for a natural person or $50,000 for any other person, or (II) the gross amount of pecuniary gain to such defendant as a result of the violation.

"(ii) SECOND TIER.—Notwithstanding clause (i), the maximum amount of penalty for each such violation shall not exceed the greater of (I) $50,000 for a natural person or $250,000 for any other person, or (II) the gross amount of pecuniary gain to such defendant as a result of the violation, if the violation described in subparagraph (A) involved fraud, deceit, manipulation, or deliberate or reckless disregard of a regulatory requirement.

"(iii) THIRD TIER.—Notwithstanding clauses (i) and (ii), the maximum amount of penalty for each such violation shall not exceed the greater of (I) $100,000 for a natural person or $500,000 for any other person, or (II) the gross amount of pecuniary gain to such defendant as a result of the violation, if—

"(aa) the violation described in subparagraph (A) involved fraud, deceit, manipulation, or deliberate or reckless disregard of a regulatory requirement; and

"(bb) such violation directly or indirectly resulted in substantial losses or created a significant risk of substantial losses to other persons.

"(C) PROCEDURES FOR COLLECTION.—

"(i) PAYMENT OF PENALTY TO TREASURY.—A penalty imposed under this section shall be payable into the Treasury of the United States.

"(ii) COLLECTION OF PENALTIES.—If a person upon whom such a penalty is imposed shall fail to pay such penalty within the time prescribed in the court's order, the Commission may refer the matter to the Attorney General who shall recover such penalty by action in the appropriate United States district court.

"(iii) REMEDY NOT EXCLUSIVE.—The actions authorized by this paragraph may be brought in addition to any other action that the Commission or the Attorney General is entitled to bring.

"(iv) JURISDICTION AND VENUE.—For purposes of section 27 of this title, actions under this paragraph shall be actions to enforce a liability or a duty created by this title.

"(D) SPECIAL PROVISIONS RELATING TO A VIOLATION OF A CEASE-AND-DESIST ORDER.—In an action to enforce a cease-and-desist order entered by the Commission pursuant to section 21C, each separate violation of such order shall be a separate offense, except that in the case of a violation through a continuing failure to comply with the order, each day of the failure to comply shall be deemed a separate offense.".

SEC. 202. CIVIL REMEDIES IN ADMINISTRATIVE PROCEEDINGS.

(a) The Securities Exchange Act of 1934 is amended by inserting after section 21A the following:

"CIVIL REMEDIES IN ADMINISTRATIVE PROCEEDINGS

"SEC. 21B. (a) COMMISSION AUTHORITY TO ASSESS MONEY PENALTIES.—In any proceeding instituted pursuant to section 15(b)(4), 15(b)(6), 15B, 15C, or 17A of this title against any person, the Commission or the appropriate regulatory agency may impose a civil penalty if it finds, on the record after notice and opportunity for hearing, that such person—

"(1) has willfully violated any provision of the Securities Act of 1933 (15 U.S.C. 77a et seq.), the Investment Company Act of 1940 (15 U.S.C. 80a-1 et seq.), the Investment Advisers Act of 1940 (15 U.S.C. 80b-1 et seq.), or this title, or the rules or regulations thereunder, or the rules of the Municipal Securities Rulemaking Board;

"(2) has willfully aided, abetted, counseled, commanded, induced, or procured such a violation by any other person;

"(3) has willfully made or caused to be made in any application for registration or report required to be filed with the Commission or with any other appropriate regulatory agency under this title, or in any proceeding before the Commission with respect to registration, any statement which was at the time and in the light of the circumstances under which it was made false or misleading with respect to any material fact, or has omitted to state in any such application or report any material fact which is required to be stated therein; or

"(4) has failed reasonably to supervise, within the meaning of section 15(b)(4)(E) of this title, with a view to preventing violations of the provisions of such statutes, rules and regulations, another person who commits such a violation, if such other person is subject to his supervision;

and that such penalty is in the public interest.

"(b) MAXIMUM AMOUNT OF PENALTY.—

"(1) FIRST TIER.—The maximum amount of penalty for each act or omission described in subsection (a) shall be $5,000 for a natural person or $50,000 for any other person.

"(2) SECOND TIER.—Notwithstanding paragraph (1), the maximum amount of penalty for each such act or omission shall be $50,000 for a natural person or $250,000 for any other person if the act or omission described in subsection (a) involved fraud, deceit, manipulation, or deliberate or reckless disregard of a regulatory requirement.

"(3) THIRD TIER.—Notwithstanding paragraphs (1) and (2), the maximum amount of penalty for each such act or omission shall be $100,000 for a natural person or $500,000 for any other person if—

"(A) the act or omission described in subsection (a) involved fraud, deceit, manipulation, or deliberate or reckless disregard of a regulatory requirement; and

"(B) such act or omission directly or indirectly resulted in substantial losses or created a significant risk of substantial losses to other persons or resulted in substantial pecuniary gain to the person who committed the act or omission.

"(c) DETERMINATION OF PUBLIC INTEREST.—In considering under this section whether a penalty is in the public interest, the Commission or the appropriate regulatory agency may consider—

"(1) whether the act or omission for which such penalty is assessed involved fraud, deceit, manipulation, or deliberate or reckless disregard of a regulatory requirement;

"(2) the harm to other persons resulting either directly or indirectly from such act or omission;

"(3) the extent to which any person was unjustly enriched, taking into account any restitution made to persons injured by such behavior;

"(4) whether such person previously has been found by the Commission, another appropriate regulatory agency or a self-regulatory organization to have violated the federal securities laws, state securities laws, or the rules of a self-regulatory organization, has been enjoined by a court of competent jurisdiction from violations of such laws or rules, or has been convicted by a court of competent jurisdiction of violations of such laws or of any felony or misdemeanor described in section 15(b)(4)(B) of this title;

"(5) the need to deter such person and other persons from committing such acts or omissions; and

"(6) such other matters as justice may require.

"(d) EVIDENCE CONCERNING ABILITY TO PAY.—In any proceeding in which the Commission or the appropriate regulatory agency may impose a penalty under this section, a respondent may present evidence of the respondent's ability to pay such penalty. The Commission or the appropriate regulatory agency may, in its discretion, consider such evidence in determining whether such penalty is in the public interest. Such evidence may relate to the extent of such person's ability to continue in business and the collectability of a penalty, taking into account any other claims of the United States

or third parties upon such person's assets and the amount of such person's assets.

"(e) AUTHORITY TO ENTER AN ORDER REQUIRING AN ACCOUNTING AND DISGORGEMENT.—In any proceeding in which the Commission or the appropriate regulatory agency may impose a penalty under this section, the Commission or the appropriate regulatory agency may enter an order requiring accounting and a disgorgement, including reasonable interest. The Commission is authorized to adopt rules, regulations and orders concerning payments to investors, rates of interest, periods of accrual and such other matters as it deems appropriate to implement this subsection.".

(b) CONFORMING AMENDMENT.—The heading of section 21A of this title (15 U.S.C. 78u-1) is amended to read as follows:

"CIVIL PENALTIES FOR INSIDER TRADING"

SEC. 203. CEASE-AND-DESIST AUTHORITY.

The Securities and Exchange Act of 1934 is amended by adding after section 21B the following new section:

"CEASE-AND-DESIST PROCEEDINGS

"SEC. 21C. (a) AUTHORITY OF THE COMMISSION.—If the Commission finds, after notice and opportunity for hearing, that any person is violating, has violated, or is about to violate any provision of this title, or any rule or regulation thereunder, the Commission may publish its findings and enter an order requiring such person, and any other person that is, was, or would be a cause of the violation, due to an act or omission the person knew or should have known would contribute to such violation, to cease and desist from committing or causing such violation and any future violation of the same provision, rule, or regulation. Such order may, in addition to requiring a person to cease and desist from committing or causing a violation, require such person to comply, or to take steps to effect compliance, with such provision, rule or regulation, upon such terms and within such time as the Commission may specify in such order. Any such order may, as the Commission deems appropriate, require future compliance or steps to effect future compliance, either permanently or for such period of time as the Commission may specify, with such provision, rule or regulation with respect to any security, any issuer, or any other person.

"(b) HEARING.—The notice instituting proceedings pursuant to subsection (a) shall fix a hearing date not earlier than 30 days nor later than 60 days after service of the notice unless an earlier or a later date is set by the Commission with the consent of any respondent so served.

"(c) TEMPORARY ORDER.—

"(1) IN GENERAL.—Whenever the Commission determines that the violation or threatened violation specified in the notice instituting proceedings pursuant to subsection (a), or the continuation thereof, is likely to result in significant dissipation or conversion of assets, significant harm to investors, or substantial harm to the public interest, including, but not limited to, losses to the Securities Investor Protection Corporation, prior to the completion of the proceedings, the Commission may enter a temporary order requiring the respondent to cease and desist from the violation or threatened violation and to take such action to prevent the violation or threatened violation and to prevent dissipation or conversion of assets, significant harm to investors, or substantial harm to the public interest as the Commission deems appropriate pending completion of such proceedings. If the Commission determines that notice of the temporary order would be impracticable or contrary to the public interest, such order shall become effective upon service upon the respondent and, unless set aside, limited, or suspended by the Commission or a court of competent jurisdiction, shall remain effective and enforceable pending the completion of the proceedings.

"(2) APPLICABILITY.—This subsection shall apply only to a respondent that acts, or, at the time of the alleged misconduct acted, as a broker, dealer, investment adviser, investment company, municipal securities dealer, government securities broker, government securities dealer, or transfer agent, or is, or was at the time of the alleged misconduct, an associated person of any of the foregoing.

"(d) REVIEW OF TEMPORARY ORDER.—

"(1) JUDICIAL REVIEW.—Within 10 days after a respondent has been served with a temporary cease-and-desist order entered pursuant to subsection (c), the respondent may apply to the United States district court for the district in which the respondent resides or has its principal place of business, or for the District of Columbia, for an order setting aside, limiting, or suspending the effectiveness or enforcement of the order, and such court shall have sole jurisdiction to enter such an order.

"(2) COMMISSION REVIEW.—At any time after a respondent has been served with a temporary cease-and-desist order pursuant to subsection (c), the respondent may apply to the Commission to have the order set aside, limited, or suspended, and the Commission may enter such an order.

"(3) NO AUTOMATIC STAY OF TEMPORARY ORDER.—The commencement of proceedings under paragraph (1) of this subsection shall not, unless specifically ordered by the court, operate as a stay of the Commission's order.

"(4) EXCLUSIVE REVIEW.—Section 25 of this title shall not apply to temporary order entered pursuant to this section.

"(e) AUTHORITY TO ENTER AN ORDER REQUIRING AN ACCOUNTING AND DISGORGEMENT.—In any cease-and-desist proceeding under subsection (a), the Commission may enter an order requiring accounting and disgorgement, including reasonable interest. The Commission is authorized to adopt rules, regulations and orders concerning payments to investors, rates of interest, periods of accrual, and such other matters as it deems appropriate to implement this subsection.".

SEC. 204. CONFORMING AMENDMENTS TO SECTION 15B.

Section 15B(c)(6)(A) of the Securities Exchange Act of 1934 (15 U.S.C. 78o-4(c)(6)(A)) is amended—

(1) by striking "and the nature" and inserting ", the nature"; and

(2) by striking "proposed action and" and inserting "proposed action, and whether the Commission is seeking a monetary penalty against such municipal securities dealer or such associated person pursuant to section 21B of this title; and ".

SEC. 205. SIGNATURE GUARANTEES.

Section 17A(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78q-1(d)(4)) is amended by adding at the end the following:

"(5) A registered transfer agent may not, directly or indirectly, engage in any activity in connection with the guarantee of a signature of an endorser of a security, including the acceptance or rejection of such guarantee, in contravention of such rules and regulations as the Commission may prescribe as necessary or appropriate in the public interest, for the protection of investors, to facilitate the equitable treatment of financial institutions which issue such guarantees, or otherwise in furtherance of the purposes of this title.".

TITLE III—AMENDMENTS TO THE INVESTMENT COMPANY ACT OF 1940

SEC. 301. CIVIL REMEDIES IN ADMINISTRATIVE PROCEEDINGS.

Section 9 of the Investment Company Act of 1940 (15 U.S.C. 80a-9) is amended—

(1) by redesignating subsection (d) as subsection (g);

(2) by inserting after subsection (c) the following new subsections:

"(d) MONEY PENALTIES IN ADMINISTRATIVE PROCEEDINGS—

"(1) COMMISSION AUTHORITY.—In any proceeding instituted pursuant to subsection (b) against any person, the Commission may impose a civil penalty if it finds, on the record after notice an opportunity for hearing, that such person—

"(A) has willfully violated any provision of the Securities Act of 1933 (15 U.S.C. 77a et seq.), the Securities Exchange Act of 1934 (15 U.S.C. 78a et seq.), the Investment Advisers Act of 1940 (15 U.S.C. 80b-1 et seq.), or this title, or the rules or regulations thereunder;

"(B) has willfully aided, abetted, counseled, commanded, induced, or procured such a violation by any other person; or

"(C) has willfully made or caused to be made in any registration statement, application, or report required to be filed with the Commission under this title, any statement which was at the time and in the light of the circumstances under which it was made false or misleading with respect to any material fact, or has omitted to state in any such registration statement, application, or report any material fact which was required to be stated therein;

and that such penalty is in the public interest.

"(2) MAXIMUM AMOUNT OF PENALTY.—

"(A) FIRST TIER.—The maximum amount of penalty for each act or omission described in paragraph (1) shall be $5,000 for a natural person or $50,000 for any other person.

"(B) SECOND TIER.—Notwithstanding subparagraph (A), the maximum amount of penalty for each such act or omission shall be $50,000 for a natural person or $250,000 for any other person if the act or omission described in paragraph (1) involved fraud, deceit, manipulation, or deliberate or reckless disregard of a regulatory requirement.

"(C) THIRD TIER.—Notwithstanding subparagraphs (A) and (B), the maximum amount of penalty for each such act or omission shall be $100,000 for a natural person or $500,000 for any other person if—

"(i) the act or omission described in paragraph (1) involved fraud, deceit, manipulation, or deliberate or reckless disregard of a regulatory requirement; and

"(ii) such act or omission directly or indirectly resulted in substantial losses or created a significant risk of substantial losses to other persons or resulted in substantial pecuniary gain to the person who committed the act or omission.

"(3) DETERMINATION OF PUBLIC INTEREST.—In considering under this section whether a penalty is in the public interest, the Commission may consider—

"(A) whether the act or omission for which such penalty is assessed involved fraud, deceit, manipulation, or deliberate or

reckless disregard of a regulatory requirement;

"(B) the harm to other persons resulting either directly or indirectly from such act or omission;

"(C) the extent to which any person was unjustly enriched, taking into account any restitution made to persons injured by such behavior;

"(D) whether such person previously has been found by the Commission, another appropriate regulatory agency or a self-regulatory organization to have violated the Federal securities laws, State securities laws, or the rules of a self-regulatory organization, has been enjoined by a court of competent jurisdiction from violations of such laws or rules, or has been convicted by a court of competent jurisdiction of violations of such laws or of any felony or misdemeanor described in section 203(e)(2) of this Act;

"(E) the need to deter such person and other persons from committing such acts or omissions; and

"(F) such other matters as justice may require.

"(4) EVIDENCE CONCERNING ABILITY TO PAY.—In any proceeding in which the Commission may assess a penalty under this section, a respondent may present evidence of the respondent's ability to pay such penalty. The Commission may, in its discretion, consider such evidence in determining whether such penalty is in the public interest. Such evidence may relate to the extent of such person's ability to continue in business, and the collectability of a penalty, taking into account any other claims of the United States or third parties upon such person's assets and the amount of such person's assets.

"(e) AUTHORITY TO ENTER AN ORDER REQUIRING AN ACCOUNTING AND DISGORGEMENT.—In any proceeding in which the Commission may impose a penalty under this section, the Commission may enter an order requiring accounting and a disgorgement, including reasonable interest. The Commission is authorized to adopt rules, regulations and orders concerning payments to investors, rates of interest, periods of accrual, and such other matters as it deems appropriate to implement this subsection.

"(f) CEASE-AND-DESIST PROCEEDINGS.—

"(1) AUTHORITY OF THE COMMISSION.—If the Commission finds, after notice and opportunity for hearing, that any person is violating, has violated, or is about to violate any provision of this title, or any rule or regulation thereunder, the Commission may publish its findings and enter an order requiring such person, and any other person that is, was, or would be a cause of the violation, due to an act or omission the person knew or should have known would contribute to such violation, to cease and desist from committing or causing such violation and any future violation of the same provision, rule, or regulation. Such order may, in addition to requiring a person to cease and desist from committing or causing a violation, require such person to comply, or to take steps to effect compliance, with such provision, rule or regulation, upon such terms and conditions and for such time as the Commission may specify in such order. Any such order may, as the Commission deems appropriate, require future compliance or steps to effect future compliance, either permanently or for such period of time as the Commission may specify, with such provision, rule or regulation with respect to any security, any issuer, or any other person.

"(2) HEARING.—The notice instituting proceedings pursuant to paragraph (1) shall fix a hearing date not earlier than 30 days nor later than 60 days after service of the notice unless an earlier or a later date is set by the Commission with the consent of any respondent so served.

"(3) TEMPORARY ORDER.—

"(A) Whenever the Commission determines that the violation or threatened violation specified in the notice instituting proceedings pursuant to paragraph (1), or the continuation thereof, is likely to result in significant dissipation or conversion of assets, significant harm to investors, or substantial harm to the public interest, including, but not limited to, losses to the Securities Investor Protection Corporation, prior to the completion of the proceeding, the Commission may enter a temporary order requiring the respondent to cease and desist from the violation or threatened violation and to prevent dissipation or conversion of assets, significant harm to investors, or substantial harm to the public interest as the Commission deems appropriate pending completion of such proceedings. If the Commission determines that notice of the temporary order would be impracticable or contrary to the public interest, notwithstanding section 40(a) of this title, such order shall become effective upon service upon the respondent and, unless set aside, limited, or suspended by the Commission or a court of competent jurisdiction, shall remain effective and enforceable pending the completion of the proceedings.

"(B) This paragraph shall apply only to a respondent that acts, or, at the time of the alleged misconduct acted, as a broker, dealer, investment adviser, investment company, municipal securities dealer, government securities broker, government securities dealer, or transfer agent, or is, or was at the time of the alleged misconduct, an associated person of any of the foregoing.

"(4) REVIEW OF TEMPORARY ORDER.—

"(A) JUDICIAL REVIEW.—Within 10 days after a respondent has been served with a temporary cease-and-desist order entered pursuant to paragraph (3), the respondent may apply to the United States district court for the district in which the respondent resides or has its principal place of business, or for the District of Columbia, for an order setting aside, limiting, or suspending the effectiveness or enforcement of the order, and such court shall have sole jurisdiction to enter such an order.

"(B) COMMISSION REVIEW.—At any time after a respondent has been served with a temporary cease-and-desist order pursuant to paragraph (3), the respondent may apply to the Commission to have the order set aside, limited, or suspended, and the Commission may enter such an order.

"(C) NO AUTOMATIC STAY OF TEMPORARY ORDER.—The commencement of proceedings under subparagraph (A) of this paragraph shall not, unless specifically ordered by the court, operate as a stay of the Commission's order.

"(D) EXCLUSIVE REVIEW.—Section 43 of this title shall not apply to a temporary order entered pursuant to this section.

"(5) AUTHORITY TO ENTER AN ORDER REQUIRING AN ACCOUNTING AND DISGORGEMENT.—In any cease-and-desist proceeding under subsection (f)(1), the Commission may enter an order requiring accounting and disgorgement, including reasonable interest. The Commission is authorized to adopt rules, regulations and orders concerning payments to investors, rates of interest, periods of accrual, and such other matters as it deems necessary to implement this subsection."; and

(3) in redesignated subsection (g), by striking "subsections (a) through (c) of".

SEC. 302. MONEY PENALTIES IN CIVIL ACTIONS.

Section 42 of the Investment Company Act of 1940 (15 U.S.C. 80a-41) is amended by adding at the end thereof the following new subsection:

"(e) MONEY PENALTIES IN CIVIL ACTIONS.—

"(1) AUTHORITY OF COMMISSION.—Whenever it shall appear to the Commission that any person has violated any provision of this title or the rules or regulations thereunder, or a cease-and-desist order entered pursuant to section 9(f) of this title, the Commission may bring an action in a United States district court to seek, and the court shall have jurisdiction to impose, upon a proper showing, a civil penalty to be paid by the person who committed such violation.

"(2) AMOUNT OF PENALTY.—

"(A) FIRST TIER.—The amount of the penalty shall be determined by the court in light of the facts and circumstances. For each violation, the amount of the penalty shall not exceed the greater of (i) $5,000 for a natural person or $50,000 for any other person, or (ii) the gross amount of pecuniary gain to such defendant as a result of the violation.

"(B) SECOND TIER.—Notwithstanding subparagraph (A), the maximum amount of penalty for each such violation shall not exceed the greater of (i) $50,000 for a natural person or $250,000 for any other person, or (ii) the gross amount of pecuniary gain to such defendant as a result of the violation, if the violation described in paragraph (1) involved fraud, deceit, manipulation, or deliberate or reckless disregard of a regulatory requirement.

"(C) THIRD TIER.—Notwithstanding subparagraphs (A) and (B), the maximum amount of penalty for each such violation shall not exceed the greater of (i) $100,000 for a natural person or $500,000 for any other person, or (ii) the gross amount of pecuniary gain to such defendant as a result of the violation, if—

"(I) the violation described in paragraph (1) involved fraud, deceit, manipulation, or deliberate or reckless disregard of a regulatory requirement; and

"(II) such violation directly or indirectly resulted in substantial losses or created a significant risk of substantial losses to other persons.

"(3) PROCEDURES FOR COLLECTION.—

"(A) PAYMENT OF PENALTY TO TREASURY.—A penalty imposed under this section shall be payable into the Treasury of the United States.

"(B) COLLECTION OF PENALTIES.—If a person upon whom such a penalty is imposed shall fail to pay such penalty within the time prescribed in the court's order, the Commission may refer the matter to the Attorney General who shall recover such penalty by action in the appropriate United States district court.

"(C) REMEDY NOT EXCLUSIVE.—The actions authorized by this subsection may be brought in addition to any other action that the Commission or the Attorney General is entitled to bring.

"(D) JURISDICTION AND VENUE.—For purposes of section 44 of this title, actions under this paragraph shall be actions to enforce a liability or a duty created by this title.

"(4) SPECIAL PROVISIONS RELATING TO A VIOLATION OF A CEASE-AND-DESIST ORDER.—In an action to enforce a cease-and-desist order entered by the Commission pursuant to section 9(f), each separate violation of such order shall be a separate offense, except that in the case of a violation through a continuing failure to comply with such order each day of the failure to comply shall be deemed a separate offense.".

TITLE IV—AMENDMENTS TO THE INVESTMENT ADVISERS ACT OF 1940

SEC. 401. CIVIL REMEDIES IN ADMINISTRATIVE PROCEEDINGS.

Section 203 of the Investment Advisers Act of 1940 (15 U.S.C. 80b-3) is amended by adding at the end thereof the following new subsections:

"(i) MONEY PENALTIES IN ADMINISTRATIVE PROCEEDINGS.—

"(1) AUTHORITY OF COMMISSION.—In any proceeding instituted pursuant to subsection (e) or (f) against any person, the Commission may impose a civil penalty if it finds, upon the record after notice and opportunity for hearing, that such person—

"(A) has willfully violated any provision of the Securities Act of 1933 (15 U.S.C. 77a et seq.), the Securities Exchange Act of 1934 (15 U.S.C. 78a et seq.), the Investment Company Act of 1940 (15 U.S.C. 80a-1 et seq.), or this title, or the rules or regulations thereunder;

"(B) has willfully aided, abetted, counseled, commanded, induced, or procured such a violation by any other person;

"(C) has willfully made or caused to be made in any application for registration or report required to be filed with the Commission under this title, or in any proceeding before the Commission with respect to registration, any statement which was at the time and in the light of the circumstances under which it was made false or misleading with respect to any material fact, or has omitted to state in any such registration statement, application, or report any material fact which was required to be stated therein; or

"(D) has failed reasonably to supervise, within the meaning of section 203(e)(5) of this title, with a view to preventing violations of the provisions of this title and such rules and regulations, another person who commits such a violation, if such other person is subject to his supervision;

and that such penalty is in the public interest.

"(2) MAXIMUM AMOUNT OF PENALTY.—

"(A) FIRST TIER.—The maximum amount of penalty for each act or omission described in paragraph (1) shall be $5,000 for a natural person or $50,000 for any other person.

"(B) SECOND TIER.—Notwithstanding subparagraph (A), the maximum amount of penalty for each such act or omission shall be $50,000 for a natural person or $250,000 for any other person if the act or omission described in paragraph (1) involved fraud, deceit, manipulation, or deliberate or reckless disregard of a regulatory requirement.

"(C) THIRD TIER.—Notwithstanding subparagraphs (A) and (B), the maximum amount of penalty for each such act or omission shall be $100,000 for a natural person or $500,000 for any other person if—

"(i) the act or omission described in paragraph (1) involved fraud, deceit, manipulation, or deliberate or reckless disregard of a regulatory requirement; and

"(ii) such act or omission directly or indirectly resulted in substantial losses or created a significant risk of substantial losses to other persons or resulted in substantial pecuniary gain to the person who committed the act or omission.

"(3) DETERMINATION OF PUBLIC INTEREST.—In considering under this section whether a penalty is in the public interest, the Commission may consider—

"(A) whether the act or omission for which such penalty is assessed involved fraud, deceit, manipulation, or deliberate or reckless disregard of a regulatory requirement;

"(B) the harm to other persons resulting either directly or indirectly from such act or omission;

"(C) the extent to which any person was unjustly enriched, taking into account any restitution made to persons injured by such behavior;

"(D) whether such person previously has been found by the Commission, another appropriate regulatory agency, or a self-regulatory organization to have violated the Federal securities laws, State securities laws, or the rules of a self-regulatory organization, has been enjoined by a court of competent jurisdiction from violations of such laws or rules, or has been convicted by a court of competent jurisdiction of violations of such laws or of any felony or misdemeanor described in section 203(e)(2) of this title;

"(E) the need to deter such person and other persons from committing such acts or omissions; and

"(F) such other matters as justice may require.

"(4) EVIDENCE CONCERNING ABILITY TO PAY.—In any proceeding in which the Commission may impose a penalty under this section, a respondent may present evidence of the respondent's ability to pay such penalty. The Commission may, in its discretion, consider such evidence in determining whether such penalty is in the public interest. Such evidence may relate to the extent of such person's ability to continue in business and the collectability of a penalty, taking into account any other claims of the United States or third parties upon such person's assets and the amount of such person's assets.

"(j) AUTHORITY TO ENTER AN ORDER REQUIRING AN ACCOUNTING AND DISGORGEMENT.—In any proceeding in which the Commission may impose a penalty under this section, the Commission may enter an order requiring accounting and disgorgement, including reasonable interest. The Commission is authorized to adopt rules, regulations and orders concerning payments to investors, rates of interest, periods of accrual, and such other matters as it deems appropriate to implement this subsection.

"(k) CEASE-AND-DESIST PROCEEDINGS.—

"(1) AUTHORITY OF THE COMMISSION.—If the Commission finds, after notice and opportunity for hearing, that any person is violating, has violated, or is about to violate any provision of this title, or any rule or regulation thereunder, the Commission may publish its findings and enter an order requiring such person, and any other person that is, was, or would be a cause of the violation, due to an act or omission the person knew or should have known would contribute to such violation, to cease and desist from committing or causing such violation and any future violation of the same provision, rule, or regulation. Such order may, in addition to requiring a person to cease and desist from committing or causing a violation, require such person to comply, or to take steps to effect compliance, with such provision, rule or regulation, upon such terms and conditions and within such time as the Commission may specify in such order. Any such order may, as the Commission deems appropriate, require future compliance or steps to effect future compliance, either permanently or for such period of time as the Commission may specify, with such provision, rule or regulation with respect to any security, any issuer, or any other person.

"(2) HEARING.—The notice instituting proceedings pursuant to subsection (k)(1) shall fix a hearing date not earlier than 30 days nor later than 60 days after service of the notice unless an earlier or a later date is set by the Commission with the consent of any respondent so served.

"(3) TEMPORARY ORDER.—

"(A) IN GENERAL.—Whenever the Commission determines that the violation or threatened violation specified in the notice instituting proceedings pursuant to subsection (k)(1), or the continuation thereof, is likely to result in significant dissipation or conversion of assets, significant harm to investors, or substantial harm to the public interest, including, but not limited to, losses to the Securities Investor Protection Corporation, prior to the completion of the proceedings, the Commission may enter a temporary order requiring the respondent to cease and desist from the violation or threatened violation and to take such action to prevent the violation or threatened violation and to prevent dissipation or conversion of assets, significant harm to investors, or substantial harm to the public interest as the Commission deems appropriate pending completion of such proceedings. If the Commission determines that notice of the temporary order would be impracticable or contrary to the public interest, notwithstanding section 211(c) of this title, such order shall become effective upon service upon the respondent and, unless set aside, limited, or suspended by the Commission or a court of competent jurisdiction, shall remain effective and enforceable pending the completion of the proceedings.

"(B) APPLICABILITY.—This paragraph shall apply only to a respondent that acts, or, at the time of the alleged misconduct acted, as a broker, dealer, investment adviser, investment company, municipal securities dealer, government securities broker, government securities dealer, or transfer agent, or is, or was at the time of the alleged misconduct, an associated person of any of the foregoing.

"(4) REVIEW OF TEMPORARY ORDER.—

"(A) JUDICIAL REVIEW.—Within 10 days after a respondent has been served with a temporary cease-and-desist order entered pursuant to paragraph (3), the respondent may apply to the United States district court for the district in which the respondent resides or has its principal place of business, or for the District of Columbia, for an order setting aside, limiting, or suspending the effectiveness or enforcement of the order, and such court shall have sole jurisdiction to enter such an order.

"(B) COMMISSION REVIEW.—At any time after a respondent has been served with a temporary cease-and-desist order pursuant to paragraph (3), the respondent may apply to the Commission to have the order set aside, limited, or suspended, and the Commission may enter such an order.

"(C) NO AUTOMATIC STAY OF TEMPORARY ORDER.—The commencement of proceedings under subparagraph (A) of this paragraph shall not, unless specifically ordered by the

court, operate as a stay of the Commission's order.

"(D) EXCLUSIVE REVIEW.—Section 213 of this title shall not apply to a temporary order entered pursuant to this section.

"(5) AUTHORITY TO ENTER AN ORDER REQUIRING AN ACCOUNTING AND DISGORGEMENT.—In any cease-and-desist proceeding under subsection (k)(1), the Commission may enter an order requiring accounting and disgorgement, including reasonable interest. The Commission is authorized to adopt rules, regulations and orders concerning payments to investors, rates of interest, periods of accrual, and such other matters as it deems appropriate to implement this subsection.".

SEC. 402. MONEY PENALTIES IN CIVIL ACTIONS.

Section 209 of the Investment Advisers Act of 1940 (15 U.S.C. 80b-9) is amended by adding at the end thereof the following new subsection:

"(e) MONEY PENALTIES IN CIVIL ACTIONS.—

"(1) AUTHORITY OF COMMISSION.—Whenever it shall appear to the Commission that any person has violated any provision of this title or the rules or regulations thereunder, or a cease-and-desist order entered by the Commission pursuant to section 203(k) of this title, the Commission may bring an action in a United States district court to seek, and the court shall have jurisdiction to impose, upon a proper showing, a civil penalty to be paid by the person who committed such violation.

"(2) AMOUNT OF PENALTY.—

"(A) FIRST TIER.—The amount of the penalty shall be determined by the court in light of the facts and circumstances. For each violation, the amount of the penalty shall not exceed the greater of (i) $5,000 for a natural person or $50,000 for any other person, or (ii) the gross amount of pecuniary gain to such defendant as a result of the violation.

"(B) SECOND TIER.—Notwithstanding subparagraph (A), the maximum amount of penalty for each such violation shall not exceed the greater of (i) $50,000 for a natural person or $250,000 for any other person, or (ii) the gross amount of pecuniary gain to such defendant as a result of the violation, if the violation described in paragraph (1) involved fraud, deceit, manipulation, or deliberate or reckless disregard of a regulatory requirement.

"(C) THIRD TIER.—Notwithstanding subparagraphs (A) and (B), the maximum amount of penalty for each such violation shall not exceed the greater of (i) $100,000 for a natural person or $500,000 for any other person, or (ii) the gross amount of pecuniary gain to such defendant as a result of the violation, if—

"(I) the violation described in paragraph (1) involved fraud, deceit, manipulation, or deliberate or reckless disregard of a regulatory requirement; and

"(II) such violation directly or indirectly resulted in substantial losses or created a significant risk of substantial losses to other persons.

"(3) PROCEDURES FOR COLLECTION.—

"(A) PAYMENT OF PENALTY TO TREASURY—A penalty imposed under this section shall be payable into the Treasury of the United States.

"(B) COLLECTION OF PENALTIES.—If a person upon whom such a penalty is imposed shall fail to pay such penalty within the time prescribed in the court's order, the Commission may refer the matter to the Attorney General who shall recover such penalty by action in the appropriate United States district court.

"(C) REMEDY NOT EXCLUSIVE.—The actions authorized by this subsection may be brought in addition to any other action that the Commission or the Attorney General is entitled to bring.

"(D) JURISDICTION AND VENUE.—For purposes of section 214 of this title, actions under this paragraph shall be actions to enforce a liability or a duty created by this title.

"(4) SPECIAL PROVISIONS RELATING TO A VIOLATION OF A CEASE-AND-DESIST ORDER.—In an action to enforce a cease-and-desist order entered by the Commission pursuant to section 203(k), each separate violation of such order shall be a separate offense, except that in the case of a violation through a continuing failure to comply with the order, each day of the failure to comply shall be deemed a separate offense.".

SEC. 403. CONFORMING AMENDMENT TO SECTION 214.

Section 214 of the Investment Advisers Act of 1940 (15 U.S.C. 80b-14) is amended—

(1) by inserting after "all suits in equity" the following: "and actions at law brought to enforce any liability or duty created by, or"; and

(2) by inserting after "Any suit or action" the following: "to enforce any liability or duty created by, or".

TITLE V—AMENDMENTS TO THE CRIMINAL CODE

SEC. 501. GRAND JURY SECRECY.

(a) IN GENERAL.—Chapter 215 of title 18, United States Code, is amended by adding after section 3322 the following new section:

"§ 3323. Disclosure of certain matters occurring before grand jury for use in enforcing securities laws

"(a)(1) Upon motion of an attorney for the government, a court may direct disclosure of matters occurring before a grand jury during an investigation of conduct that may constitute a violation of any provision of the securities laws, as defined in section 3(a)(47) of the Securities Exchange Act of 1934 (15 U.S.C. 78c(a)(47)), to identified personnel of the Securities and Exchange Commission for use in relation to any matter within the jurisdiction of the Securities and Exchange Commission.

"(2) A court may issue an order under paragraph (1) only upon a finding of a substantial need in the public interest.

"(b) A person to whom a matter has been disclosed under this section shall not use such matter other than for the purpose for which such disclosure was authorized.

"(c) As used in this section, the terms 'attorney for the government' and 'grand jury information' have the meanings given to those terms in section 3322 of this title.".

(b) CLERICAL AMENDMENT.—The table of sections at the beginning of chapter 215 of title 18, United States Code, is amended by adding after the item relating to section 3322 the following:

"3323. Disclosure of certain matters occurring before grand jury for use in enforcing securities laws.".

MOTION OFFERED BY MR. MARKEY

Mr. MARKEY. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MARKEY moves to strike out all after the enacting clause of the Senate bill, S. 647, and to insert in lieu thereof the provisions of H.R. 5325, as passed by the House.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title of the Senate bill was amended so as to read: "An act to amend the Federal securities laws in order to provide additional enforcement remedies for violations of those laws and to eliminate abuses in transactions in penny stocks, and for other purposes."

A motion to reconsider was laid on the table.

A similar House bill (H.R. 5325) was laid on the table.

GENERAL LEAVE

Mr. MARKEY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include therein extraneous material on H.R. 5325, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

FLORIDA KEYS PROTECTION ACT

Mr. HERTEL. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3719) to establish the Florida Keys National Marine Sanctuary, and for other purposes as amended.

The Clerk read as follows:

H.R. 3719

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Florida Keys Protection Act".

SEC. 2. FINDINGS AND PURPOSE.

(a) FINDINGS.—Congress finds:

(1) The marine environment adjacent to the Florida Keys supports diverse biological communities possessing extensive recreational, commercial, ecological, historical, cultural, research, educational, and aesthetic values which give this area special national significance.

(2) This marine environment is subject to damage and loss of its ecological integrity from a variety of onshore and offshore disturbances.

(3) Many serious threats to the living marine resources and water quality of the Florida Keys exist inside and outside the Keys which have not been successfully managed by existing State and Federal efforts.

(4) Congress should take action to protect the Florida Keys through domestic law and through other practices which are consistent with generally recognized principles of international law.

(5) The State of Florida and the Federal Government must jointly develop and implement a comprehensive program to reduce pollution in the waters offshore the Florida Keys to protect and restore the water quality, coral reefs, and other living marine resources of this environment.

(b) PURPOSE.—The purpose of this Act is to protect the living marine and other re-

sources of the Florida Keys by establishing a Florida Keys National Marine Sanctuary and by creating an Area to be Avoided by certain vessel traffic in the vicinity of the Florida Keys.

SEC. 3. POLICY.

It is the policy of the United States to protect the living marine and other resources of the Florida Keys.

TITLE I—FLORIDA KEYS NATIONAL MARINE SANCTUARY

SEC. 101. DESIGNATION OF SANCTUARY.

(a) DESIGNATION.—The area described in subsection (b) is designated as the Florida Keys National Marine Sanctuary (hereinafter "Sanctuary") under title III of the Marine Protection, Research, and Sanctuaries Act of 1972 (16 U.S.C.. 1431 *et seq.*). The Sanctuary shall be managed in compliance with, and regulations issued under, title III of the Marine Protection, Research, and Sanctuaries Act of 1972 as if the Sanctuary had been designated under that Act.

(b) SANCTUARY BOUNDARIES.—The Sanctuary designated in subsection (a) shall consist of all submerged lands and waters, including living marine and other resources within and on those lands and waters, from the baseline from which the territorial sea is measured and the U.S. Route 1 bridges seaward to the 300-foot isobath and bounded by the following coordinates—

(1) Latitude 25 degrees, 20.5 minutes north by Longitude 80 degrees, 15.1 minutes west.

(2) Latitude 25 degrees, 20.1 minutes north by Longitude 80 degrees, 14.6 minutes west.

(3) Latitude 25 degrees, 20.1 minutes north by Longitude 80 degrees, 12.6 minutes west.

(4) Latitude 25 degrees, 19.45 minutes north by Longitude 80 degrees, 12 minutes west.

(5) Latitude 25 degrees, 16.2 minutes north by Longitude 80 degrees, 8.7 minutes west.

(6) Latitude 25 degrees, 7.5 minutes north by Longitude 80 degrees, 12.5 minutes west.

(7) Latitude 25 degrees north by Longitude 80 degrees, 17 minutes west.

(8) Latitude 24 degrees, 56 minutes north by Longitude 80 degrees, 21 minutes west.

(9) Latitude 24 degrees, 48 minutes north by Longitude 80 degrees, 35 minutes west.

(10) Latitude 24 degrees, 42 minutes north by Longitude 80 degrees, 45 minutes west.

(11) Latitude 24 degrees, 36 minutes north by Longitude 80 degrees, 1 minute west.

(12) Latitude 24 degrees, 30 minutes north by Longitude 81 degrees, 22 minutes west.

(13) Latitude 24 degrees, 26 minutes north by Longitude 80 degrees, 44 minutes west.

(14) Latitude 24 degrees, 24.5 minutes north by Longitude 81 degrees, 53 minutes west.

(15) Latitude 24 degrees, 24.5 minutes north by Longitude 81 degrees, 10 minutes west.

(16) Latitude 24 degrees, 23 minutes north by Longitude 82 degrees, 27.8 minutes west.

(17) Latitude 24 degrees, 34.5 minutes north by Longitude 82 degrees, 37.5 minutes west.

(18) Latitude 24 degrees, 43 minutes north by Longitude 82 degrees, 26.5 minutes west.

(19) Latitude 24 degrees, 38.3 minutes north by Longitude 81 degrees, 54.1 minutes west.

(20) Latitude 24 degrees, 33.5 minutes north by Longitude 81 degrees, 48.5 minutes west.

(c) BOUNDARY MODIFICATION.—The Secretary of Commerce, in consultation with the Governor of Florida, if appropriate, may make minor boundary modifications to the Sanctuary to ensure efficient management and enforcement of the comprehensive management plan for the Sanctuary.

(d) AREAS WITHIN STATE OF FLORIDA.—The designation in subsection (a) shall not take effect for any area located within the waters of the State of Florida if, no later than 45 days after the date of enactment of this Act, the Governor of the State of Florida objects in writing to the Secretary of Commerce.

SEC. 102. IMPLEMENTATION.

(a) IN GENERAL.—Consistent with this Act, the Secretary of Commerce shall hold public hearings and issue a comprehensive management plan and regulations under section 304 of the Marine Protection, Research, and Sanctuaries Act of 1972 (16 U.S.C. 1434) for the Sanctuary.

(b) CONTENTS OF COMPREHENSIVE MANAGEMENT PLAN.—The management plan prepared under this section shall include provisions which—

(1) incorporate existing national marine sanctuaries offshore Florida within the Sanctuary with minimum disruption to current users;

(2) identify sources of harmful environmental impacts on Sanctuary resources from inside and outside the Sanctuary.

(3) identify alternative sources of revenue to support the management of the Sanctuary and to supplement appropriations pursuant to section 313 of the Marine Protection, Research, and Sanctuaries Act of 1972 (16 U.S.C. 1444), as amended by this Act; and

(4) incorporates regulations necessary to enforce elements of the water quality program under section 104 which affect matters within the jurisdiction of the Secretary.

(c) CONSIDERATION OF ADVISORY COUNCIL VIEWS.—(1) The Secretary of Commerce shall give full consideration to the views of the Advisory Council established under section 103 of this Act in the development and implementation of the comprehensive management plan for the Sanctuary.

(2) The Secretary of Commerce shall respond in writing to any recommendations made by the Advisory Council.

(d) VESSEL DAMAGE PROHIBITION.—Pending completion of the comprehensive management plan, a person operating a vessel shall not strike or otherwise damage the natural resources of the Sanctuary. The Secretary of Commerce shall enforce this subsection pursuant to title III of the Marine Protection, Research, and Sanctuaries Act of 1972 (16 U.S.C. 1431 *et seq.*).

SEC. 103. ADVISORY COUNCIL.

(a) ESTABLISHMENT.—There is established an Advisory Council to assist in the development of a comprehensive management plan for the Sanctuary, to advise the Secretary of Commerce in the implementation of this management plan, to advise on the development of the water quality protection program under section 104, and to provide a continuing forum to assist the Secretary to resolve conflicts among users of Sanctuary resources.

(b) MEMBERSHIP OF ADVISORY COUNCIL.—(1) The Advisory Council shall have 15 members, including representatives of appropriate commercial and recreational users of the marine environment of the Florida Keys, conservation organizations, the marine scientific and educational community, and Federal, State and local governments. The Advisory Council shall be comprised of—

(A) 5 representatives of the Federal Government, with 1 each from the National Oceanic and Atmospheric Administration, the Environmental Protection Agency, the U.S. Coast Guard, the U.S. Fish and Wildlife Service, and the National Park Service;

(B) 1 representative of the South Atlantic Regional Fishery Management Council;

(C) 3 representatives from the State of Florida, with 1 each from the Florida Department of Environmental Regulation, the Florida Department of Natural Resources, and the Florida Department of Community Affairs; and

(D) 6 individuals, with 3 appointed by the Board of County Commissioners of Monroe County, and 3 appointed by the Governor of Florida.

(2) Initial appointments to the Advisory Council made under subparagraph (1)(D) shall be staggered so that 1 representative appointed by the Board of County Commissioners of Monroe County and 1 representative appointed by the Governor of Florida shall be eligible for reappointment or replacement every two years. Other appointments shall be made for a term of six years.

(3) Vacancies on the Advisory Council shall be filled in the same manner as the original appointment.

(c) FEDERAL ADVISORY COMMITTEE ACT.—Section 14 of the Federal Advisory Committee Act (Sanctuary U.S.C. App. 2) shall not apply to the Advisory Council.

SEC. 104. FLORIDA KEYS WATER QUALITY.

(a) WATER QUALITY PROTECTION PROGRAM.—(1) Within 30 months of the date of enactment of this Act, the Governor of the State of Florida, the Secretary of Commerce, and the Administrator of the Environmental Protection Agency shall develop a water quality protection program for the Sanctuary. The purposes of the program shall be to—

(A) limit the introduction of pollutants from point and nonpoint sources to protect and restore the water quality, coral reefs, and other living marine resources of the Sanctuary; and

(B) assign responsibilities for the implementation of the program among the Governor, the Secretary and the Administrator in accordance with applicable Federal and State laws.

(2) In developing and implementing the program the Governor shall consult with appropriate State and local officials.

(3) The comprehensive water quality program required by this section shall provide under applicable Federal and State laws for measures to achieve the purposes of subsection (a), including—

(A) adoption or revision under applicable Federal and State laws by the State and the Administrator of applicable water quality standards for the Sanctuary, based on water quality criteria which may utilize biological monitoring or assessment methods, to assure protection and restoration of the water quality, coral reefs, and other living marine resources of the Sanctuary;

(B) adoption under applicable Federal and State laws by the Secretary, the Administrator, and the State, respectively, of enforceable pollution control measures (including water quality based effluent limitations and best management practices) and methods to eliminate or reduce pollution from point and nonpoint sources;

(C) establishment of a comprehensive water quality monitoring program to (i) determine the sources of pollution causing or contributing to existing or anticipated pol-

lution problems in the Sanctuary; (ii) evaluate the effectiveness of efforts to reduce or eliminate those sources of pollution; and (iii) evaluate progress towards achieving and maintaining water quality standards, and protecting and restoring the coral reefs and other living marine resources of the Sanctuary;

(D) provision of adequate opportunity for public participation in all aspects of developing and implementing the program; and

(E) identification of funding for implementation of the program, including appropriate Federal and State cost sharing arrangements.

(b) COMPLIANCE AND ENFORCEMENT.—The Governor of the State of Florida, the Secretary of Commerce, and the Administrator of the Environmental Protection Agency shall ensure compliance with the program required by this section, consistent with title III of the Marine Protection, Research, and Sanctuaries Act of 1972 (16 U.S.C. 1431 et seq.) and other applicable laws.

SEC. 105. AUTHORIZATION OF APPROPRIATIONS.

Section 313(2) of the Marine Protection, Research, and Sanctuaries Act of 1972 (16 U.S.C. 1444(2)) is amended by striking "(C) $3,000,000 for fiscal year 1991; and (D) $3,250,000 for fiscal year 1992" and inserting "(C) $3,750,000 for fiscal year 1991; and (D) $4,000,000 for fiscal year 1992".

TITLE II—PROHIBITION ON CERTAIN VESSEL TRAFFIC

SEC. 201. AREA TO BE AVOIDED.

(a) PROHIBITION.—Consistent with generally recognized principles of international law, a person may not operate a tank vessel (as the term is defined in secton 2101 of title 46, United States Code) or a vessel greater than 50 meters in length in the Area to Be Avoided described in the Federal Register notice of May 9, 1990 (55 Fed. Reg. 19418-19419).

(b) MODIFICATION.—The prohibition in subsection (a), including the area to which the prohibition applies, may be modified by regulations issued jointly by the Secretary of the Department in which the Coast Guard is operating and the Secretary of Commerce.

(c) EFFECTIVE DATE.—Subsection (a) shall be effective the earliest of—

(1) six months from date of enactment of this Act;

(2) publication of a notice to mariners consistent with this section; or

(3) publication of new nautical charts consistent with this section.

SEC. 202. PENALTIES.

Any person or vessel subject to the jurisdiction of the United States who violates this title shall be considered to have violated title III of the Marine Protection, Research, and Sanctuaries Act of 1972 (16 U.S.C. 1431 et seq.) and will be subject to the penalties, enforcement procedures, and liabilities for damages in that Act.

TITLE III—MISCELLANEOUS

SEC. 301. PROHIBITION.

No leasing, exploration, development, or production of minerals or hydrocarbons shall be permitted within the Florida Keys National Marine Sanctuary.

The SPEAKER pro tempore. Is a second demanded?

Mr. GOSS. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Michigan [Mr. HERTEL] will be recognized for 20 minutes, and the gentleman from Florida [Mr. Goss] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Michigan [Mr. HERTEL].

Mr. HERTEL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in support of H.R. 3719, the Florida Keys Protection Act.

The coral reefs lying offshore the Florida Keys are the most extensive reef tracts in North America.

Coral reefs are the marine equivalent of tropical rainforests in the sense that they support a teeming variety of life that includes many species found nowhere else in the world.

The reefs of the Florida Keys are a scenic wonder, and an invaluable fishery habitat and recreational resource.

But these reefs are threatened, Mr. Speaker, threatened by vessel groundings, water pollution, commercial overexploitation, and unintentional damage from some people who do not fully understand the fragility of the living reef.

My colleagues DANTE FASCELL and WALTER JONES introduced H.R. 3719 last fall to preserve and protect the marine resources of the Florida Keys.

H.R. 3719 designates the Florida Keys national marine sanctuary and restricts vessel traffic in the vicinity of the keys to help to prevent ship groundings on the reefs.

The bill provides for development and implementation of a comprehensive management plan for the sanctuary and allows ample public input into this process.

H.R. 3719 also prevents oil and gas exploration and development within the sanctuary.

I would like to thank our colleagues from the Interior Committee, MO UDALL and GEORGE MILLER, for working with us to achieve this protection for the keys.

Protecting the coral reefs of the Florida Keys will ensure that this national treasure is available for the benefit and enjoyment of the American people for generations to come.

The Merchant Marine and Fisheries Committee supports this bill wholeheartedly and we urge the endorsement of the House for this important environmental legislation.

Mr. Speaker, I yield 5 minutes to the gentleman from Texas [Mr. LAUGHLIN].

Mr. LAUGHLIN. Mr. Speaker, this bill contains a provision for the development by the Governor of the State of Florida. The Secretary of Commerce, and the Administrator of the Environmental Protection Agency of a Water Quality Protection Program for the Florida Keys National Marine Sanctuary. The purpose of the program is to limit the introduction of pollutants from point and nonpoint sources to protect the sanctuary. The program is to provide for the development and implementation under applicable Federal and State law of control measures such as water quality criteria and standards and point and nonpoint source pollution controls.

It is my understanding that it is not the intent of the provision to provide any authority to the agencies for implementation of these measures which they do not possess under other applicable laws, such as the Clean Water Act, the Marine Protection, Research, and Sanctuaries Act, or the Coastal Zone Management Act, and that it is the intent of the provision that the implementation measures will be carried out by the State and Federal agencies in accordance with applicable State and Federal laws. Does the gentleman concur with this understanding?

Mr. HERTEL. Mr. Speaker, if the gentleman will yield, the gentleman is correct. It is intended that the various agencies carry out the implementation plans in accordance with the laws which each of them administers.

Mr. LAUGHLIN. I also note that the provision falls within the water quality jurisdiction of the Committee on Public Works and Transportation. We have reviewed it, and have concurred in its inclusion in order to permit this important bill to move ahead without undue delay.

Mr. HERTEL. I appreciate the gentleman's cooperation, and concur in the jurisdictional point he has raised.

Mr. LAUGHLIN. Mr. Speaker, I thank the gentleman. While I do support the bill and hope that the Senate accepts it as passed by the House, should a conference be necessary, I want to state for the record that it would be my intent to request that the Committee on Public Works and Transportation be appointed conferees on this matter.

Mr. GOSS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in strong support of H.R. 3719, the Florida Keys Protection Act. This legislation would begin the process for offering genuine protection of the Florida Keys Coral Reef, which is truly one of the world's natural wonders.

Our colleague, the gentleman from Florida [Mr. FASCELL] deserves special congratulations and thanks not only for authoring this legislation, but also for his leadership in the effort to protect this resource. I would also like to congratulate the leadership of the Merchant Marine Committee, and most especially Chairman JONES for his personal interest in this legislation. I thank Senator GRAHAM in the other body for his companion bill.

H.R. 3719 would provide for immediate designation of the Florida Keys Coral Reef as a national marine sanctuary. While the State of Florida and its citizens will no doubt benefit from this legislation, the bill's benefits will not be limited to the State.

Millions of people from around the world fish and scuba dive in the waters of the reef. Coral reefs have been called the oceans' rainforests because of the diversity and spectacular nature of their marine life, and as the world's third-largest, the keys reef is a unique national treasure.

Such status carries with it a special stewardship responsibility; unfortunately, this stewardship responsibility is not currently being met. A June 1988 workshop convened by the National Oceanic and Atmospheric Administration concluded that the reef is in serious trouble. The daily barrage of toxic runoff, tanker groundings, anchor damage, pollution discharge, diver negligence, and oil spills has seriously wounded the reef and its ecosystem. Without timely action, we could face its permanent loss.

H.R. 3719 would provide immediate help, not just for the Federal Government, but from all levels of government and citizens groups alike. Upon becoming law, the Florida Keys Protection Act would require NOAA to begin the management process for the approximately 200 miles of reef stretching from Key Biscayne to Rebecca Shoal. It would ban oil and gas drilling and channelize commercial traffic away from the reefs by codifying the Coast Guard's designated area to be avoided. Perhaps most importantly, the management plan would include the development of a water quality plan to protect the reef against its greatest threat: water pollution.

The bill is a model of cooperative governing. It allows ample opportunity for public comment, and it has the strong support of the State government, including a commitment of State funds for the development of the water quality program. Moreover, the bill establishes an advisory council composed of Federal, State, and local officials and user groups to help prepare and implement the management plan.

Just yesterday the Coast Guard discovered a 22-mile long oil slick of unknown origins heading toward the reef. Far from being an aberration, such an incident is all too common off the Florida Keys reef. The time to act is now. Rather than watching its destruction, we can help preserve the coral reef's vitality. I urge my colleagues to support the bill.

□ 1400

Mr. Speaker, I yield 5 minutes to the gentleman from Minnesota [Mr. STANGELAND].

Mr. STANGELAND. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, I rise to address provisions in H.R. 3719, the Florida Keys Protection Act of 1990.

I recognize the hard work of the gentleman from Florida [Mr. FASCELL], members of the Merchant Marine and Fisheries Committee, the Foreign Affairs Committee, and others to develop and move this legislation. Various provisions should help protect this valuable natural resource.

However, I feel compelled to express concerns about the committee amendment relating to water quality and included in the moton to suspend the rules. This is a matter clearly within the jurisdiction of the Public Works and Transportation Committee. As described in the colloquy between the leadership of the Public Works and Transportation Committee and Merchant Marine and Fisheries Committee, we are willing to allow a water quality amendment to move forward so as not to cause any possible delay for the bill as a whole. This should be construed as a gesture of cooperation, however, and not as any indication of waiving our jurisdiction over this issue.

In fact, some of us continue to have concerns about the substance of the amendment and we would reserve our right to work closely on this issue as the bill proceeds through Congress. Admittedly, the Merchant Marine and Fisheries Committee and the gentleman from Florida have worked with us over the last couple of days to address some of these concerns, and we appreciate that.

One of the changes incorporated into the amendment involves the relation to existing laws such as the Federal Water Pollution Control Act. Nothing in the bill provides authority inconsistent with or in addition to existing authority under the Federal Water Pollution Control Act. For example, we are not giving EPA or NOAA any new authority to regulate point source and nonpoint source pollution not already addressed in Federal law. This is not a mandate for Federal land use planning.

Unfortunately, another concern has not been adequately addressed. Marine water quality criteria may make sense in certain instances. However, I share the administration's concerns about this bill's mandate for provisions on site-specific criteria. H.R. 3719 does not and should not be construed as setting a precedent for such an approach at other specific water bodies or regions.

Mr. Speaker, I appreciate the opportunity to make these comments and commend the sponsors for their commitment to protecting the Keys. I look forward to working with them throughout the legislative process.

Mr. GOSS. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. HERTEL. Mr. Speaker, I yield such time as he may consume to the gentleman from Florida [Mr. FASCELL], the chairman of the Committee on Foreign Affairs, the sponsor of the legislation and the Member in whose district the Keys Sanctuary will reside.

Mr. FASCELL. Mr. Speaker, I rise in support of H.R. 3719, legislation which I introduced with our colleague, Chairman WALTER JONES. I want to thank Chairman JONES and the chairmen of the two subcommittees which shared jurisdiction on this bill. DENNIS HERTEL and GERRY STUDDS, for moving to address this important matter with such promptness. I also want to commend the able staff of the committee and subcommittees whose hard work and cooperation has allowed us to take substantial steps to protect the reefs.

Three commercial freighter groundings on the coral reefs in the Florida Keys last year brought the threats of endangering the vitality of the reefs into focus. The tanker groundings, while the most dramatic threat, do not cause as much damage as careless users of the resource and degradation of water quality. This bill, with the inclusion of the committee amendment on water quality, will address each of these threats by creating the Florida Keys National Marine Sanctuary and codifying an "area to be avoided" proposal currently pending before the International Maritime Organization.

This bill is a realization of the fact that a resource management policy is needed for the coral reef ecosystem in the Florida Keys. The reefs are not only a vital component of the local economy, but they are also one of the most beautiful ecosystems known to man and are only rivaled by tropical rain forests in terms of biological diversity. This measure will provide needed protection to North America's only living coral reef tract, which is a resource of national significance.

This legislation calls for the development and implementation of a comprehensive management plan which will allow compatible uses of the resource as long as such uses are not detrimental to the health of the reefs. Many people have commented that this management plan should be similar to the zoned usage concept employed to protect Australia's Great Barrier Reef. I agree that zoned usage has a role and, if used, should be applied as Australia does so that those who depend on the reefs for their livelihoods can continue to earn a living. I urge the National Oceanic and Atmospheric Administration [NOAA] to study this approach, and hope it will meet with any group that has an interest in the development of the management plan.

One of the most important aspects of this legislation is the advisory council it creates. The impetus behind this is to bring the Federal and State agencies with jurisdiction over various programs in the area together with commercial, recreational, conservation, and scientific interests, to assist with the development and implementation of the management plan and provide ongoing advice on the management of the sanctuary. There is a clear need to bring government agencies together because of the potential duplication and conflict of their management agendas.

The economy of the Florida Keys is directly tied to the health of the reefs, and I am pleased that the bill provides for local input on the advisory board. If this sanctuary is going to be effective, it must have the support of the residents of the Florida Keys and this can only be done if they have a place at the table. Further, it is also important that the council includes members of the conservation and scientific community, which is provided.

Addressing the water quality problem and eliminating careless use of the resource will take a good deal of hard work, but this legislation creates a framework to address these issues. I am indebted to our colleagues on the Public Works and Transportation Committee and the Water Resources Subcommittee for their assistance in this regard, particularly Chairman GLENN ANDERSON and Chairman HENRY NOWAK, JOHN PAUL HAMMERSCHMIDT, and ARLEN STANGELAND.

This legislation will put an end to the dangerous practice of gulf-bound vessels hugging the coral reefs in order to avoid the Gulf Stream current. The reefs are placed in direct danger as these large vessels skirt the reefs to save a little time and money. We obviously do not read about the close calls and the near misses. There is a great outcry only when there is a grounding—like the three last year.

The original version of this bill called on the Coast Guard to submit an "area to be avoided" proposal for the Florida Keys to the IMO. Since such a proposal has already been submitted and is currently pending before that body, this legislation seeks to codify it in order to provide domestic enforcement authority to keep vessels out of the "area to be avoided." Properly adhered to and stringently enforced, this provision will keep these vessels several miles off the reefs.

Finally, the bill prohibits all mining and oil and gas activities within the sanctuary. For this, I am particularly grateful to our colleague, GEORGE MILLER, chairman of the Subcommittee on Water, Power, and Offshore Energy Resources, and the members of the subcommittee for their cooperation and valuable assistance.

I am pleased to say that this legislation has the support of the Governor of Florida, and I would like to include a letter from Governor Martinez for the RECORD. The State of Florida recognizes the benefits and importance of this legislation to the mutual interest of the State and Federal Government and has been extremely helpful in working with us in the development of this legislation.

STATE OF FLORIDA,
Tallahassee, FL, July 23, 1990.

Hon. DANTE FASCELL,
Rayburn House Office Building,
Washington, DC 20515

DEAR CONGRESSMAN FASCELL: I am writing to express my support of H.R. 3718, which you are sponsoring to create a unified Florida Keys National Marine Sanctuary. The Sanctuary would include all the waters east of the Keys from Key Largo Marine Sanctuary southwest to Rebecca Shoal seaward to the 300 ft. depth. This legislation would support and complement state objectives to protect the magnificent Florida Keys coral reef and surrounding marine environment from shipping traffic and other threats.

As you know, I have worked with the Coast Guard to establish an internationally recognized buffer zone off the Florida Keys reef tract to reduce the threat of groundings from oil tankers and other vessels which daily threaten this irreplaceable resource. I am very encouraged that your legislation would essentially incorporate the Coast Guard's pending proposal to establish an "area to be avoided" seaward of the reef. Inclusion of appropriate vessel restrictions under your legislation would also provide additional incentives for vessels to avoid this sensitive area by subjecting violators to civil penalties and possible seizure or forfeiture of their vessels.

I am also pleased that under this legislation mining, oil and gas activities would be expressly prohibited within the sanctuary. It is important to seize every available opportunity to prevent such activities which are incompatible with protection of this fragile and unique marine environment.

Development of a comprehensive management plan for the sanctuary will be important to determine specific resource management needs which are critical to the long-term protection of these waters. A healthy marine environment is absolutely vital to a healthy Keys' economy. The management plan should include consultation with commercial and recreational interests as well as state and local officials to ensure effective management of the sanctuary.

Development of water quality protection strategies for the sanctuary will be a major challenge. We would particularly welcome a partnership with the federal government to identify and address water quality protection needs, with targeted federal funding and expertise. I look forward to working closely with you and the other members of our Congressional Delegation to develop such a partnership.

Sincerely,

BOB MARTINEZ,
Governor.

This is a good bill which responds to a growing environmental problem. Florida has one of the most sensitive environments in the Nation, and the Florida Keys may be the most sensitive area in the State. The economic importance and national significance of the reefs mandate that we begin to commit the necessary resources to protect them. This legislation is not a Band-Aid approach; it is a comprehensive attempt to bring all the interested parties together to work toward a solution before the problem gets too large. This is an important first step which provides needed protections, and I urge our colleagues to support the protection of the coral reefs.

Mr. HERTEL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I thank the chairman.

Mr Speaker, we have the highest percentage of Michigan residents and tourists visiting and residing in Florida, and they appreciate very much that we are to preserve this.

What we have done is taken something, the coral reefs, something unique, and fragile, and we simply have said no, no to oil drilling, no to gas exploration, no to development within that sanctuary to protect it for future generations.

I thank the committee and the staff who have worked on this for so very long. I thank the minority for their advice and counsel on the questions that came up, and we are hopeful that this will pass quickly in the Senate also, because it is important that we accomplish this this year to preserve what is necessary for the future.

Mr. JONES of North Carolina. Mr. Speaker, I would like to offer my strongest support for H.R. 3719, the Florida Keys Protection Act. My colleague DANTE FASCELL and I introduced this bill last fall in the wake of several ship groundings in the keys which destroyed large areas of live coral. However, ship groundings are not the only threat to the vitality of the coral reefs.

Those who know the Florida Keys National Marine Sanctuary agree that declining water quality is a threat to the reefs of equal or greater magnitude than actual physical damage from groundings. Overfishing and damage caused by divers and boat anchoring are also frequently cited as detrimental to the reefs.

The coral reefs offshore the Florida Keys are a resource of great national significance. The reefs form the basis of a complex and productive ecosystem and provide a vital fisheries habitat. Because the reefs of the keys are the largest reef tract in North America, they comprise a nationally and even globally significant marine environment worthy of our protection and restoration.

The bill reported from the Merchant Marine and Fisheries Committee represents comprehensive legislation to protect and restore the water quality, coral reefs, and other living marine resources of the Florida Keys. Under title III of the Marine Protection, Research, and Sanctuaries Act, the Secretary of Commerce has broad authority to develop and implement a management plan and to regulate any activities and uses as necessary to provide comprehensive protection of sanctuary resources. Therefore, establishment of the Florida Keys National Marine Sanctuary is a

giant step toward protection of the coral reefs, marine waters, fisheries, and other resources encompassed within this area.

Included in the bill is a ban on oil, gas, and mineral exploration and development within the sanctuary. I would like to thank my colleagues from the Committee on Interior and Insular Affairs, Mr. UDALL and Mr. MILLER, for working with Mr. FASCELL and me to protect the coral reefs of the Florida Keys from offshore oil and gas activities while allowing the bill to move forward in an expeditious manner.

The bill also requires development of a comprehensive Water Quality Protection Program which will be applicable to marine waters within the sanctuary. With cooperation from the Committee on Public Works and Transportation, particularly Mr. ANDERSON and Mr. NOWAK, we have developed provisions calling for a collaborative effort between the Department of Commerce, the Environmental Protection Agency, and the State of Florida.

I would also like to thank the chairman of the two subcommittees who handled this bill in committee, DENNIS HERTEL and GERRY STUDDS, for their speedy but thorough consideration of the legislation.

I urge the House to support this important bill to protect and preserve the nationally significant marine environment offshore the Florida Keys for generations to come.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. MONTGOMERY). The question is on the motion offered by the gentleman from Michigan [Mr. HERTEL] that the House suspend the rules and pass the bill, H.R. 3719, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended, and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. HERTEL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 3719, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

COMPREHENSIVE U.S. OCEANS AND GREAT LAKES POLICY

Mr. HERTEL. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 69) to urge the development and implementation of a comprehensive U.S. oceans and Great Lakes policy.

The Clerk read as follows:

H. CON. RES. 69

Whereas the oceans and the Great Lakes are a source of ecological, economic, social, aesthetic, and military significance second to none in the United States and the world;

Whereas how the United States uses the oceans and the Great Lakes profoundly affects the Nation's economy, national security, transportation needs, international trade, food resources, energy and raw material needs, and environmental quality;

Whereas current Federal oceans and Great Lakes programs are administered by numerous departments and agencies, resulting in fractured and overlapping jurisdictions over oceans and Great Lakes resources;

Whereas because Federal fiscal resources are expected to be severely limited at least to the end of this century, a reexamination of the Nation's oceans and Great Lakes activities is needed; and

Whereas a new coordinated and comprehensive policy based on that reexamination must be developed in order to maximize current resources and to utilize the oceans and Great Lakes in a balanced fashion: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That the Congress—

(1) urges the President to work with the Congress to identify and establish a comprehensive national oceans and Great Lakes policy and to revitalize existing Federal agencies and programs to achieve this goal;

(2) urges the Federal and State and local governments, private industry, coastal and environmental organizations, and the general public to share their expertise to preserve, protect, and responsibly utilize the oceans and the Great Lakes; and

(3) urges the President to dedicate appropriate funding, including innovative financing, to implement the national oceans and Great Lakes policy referred to in paragraph (1) through coordinated and cooperative programs which protect the ecological, economic, social, aesthetic, and military interests of the United States with respect to the oceans and the Great Lakes.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Michigan [Mr. HERTEL] will be recognized for 20 minutes, and the gentlewoman from Rhode Island [Ms. SCHNEIDER] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Michigan [Mr. HERTEL].

Mr. HERTEL. Mr. Speaker, I yield myself such time as I may consume.

Mr. SPEAKER. I rise in support of House Concurrent Resolution 69.

House Concurrent Resolution 69 urges the President to work with the Congress on the development and implementation of a comprehensive U.S. oceans and Great Lakes policy. This policy is needed and sorely lacking.

The late 1960's was the last time the United States examined its oceans and coastal policies in any comprehensive way. As a result, the National Oceanic and Atmospheric Administration, or NOAA, was created and several new laws, including the Coastal Zone Management Act of 1972, were enacted. But, we have stagnated since then and lack a comprehensive framework within which to pass new ocean and coastal legislation.

The oceans, Great Lakes, and our near-shore waters are critical to life as we know it. The ocean influences our climate and makes life bearable. The Great Lakes and coastal waters support all of our fisheries resources. Finally, like lemmings, we are all moving closer to the ocean because of its appeal to our esthetic senses. These critical elements demand and need a comprehensive oceans and Great Lakes policy.

I support this concurrent resolution and recommend that it pass.

□ 1410

Ms. SCHNEIDER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, we have all been hearing continuing stories of devastating oilspills, dolphin die offs, and beach closings, and all Congress ever seems to do is to react to these events. Haven't we had enough! This resolution seeks to establish a comprehensive national oceans and Great Lakes policy, which will put us in a preventive rather than a reactive mode. Our oceans and Great Lakes are in trouble, and it is time for us to address those troubles.

The National Oceanic and Atmospheric Administration [NOAA], in its fiscal year 1990 budget submission to Congress stated:

The degradation of coastal resources is reaching crisis proportions: fisheries are highly variable and may be declining due to human activities; pollution in major estuaries has led to widespread prohibitions of fishing and swimming and restriction of the sale of fish and shellfish; and severe storms and other natural hazards are increasingly endangering lives and destroying valuable coastal property.

Despite this recognition of the many problems facing our oceans and Great Lakes, the United States still does not have any cohesive policy to deal with them. The first step in defining and eventually coming to terms with any problem is to set an agenda. The United States, however, has not had an oceans agenda since 1969 when the Stratton Commission issued its report. The recommendations in that report provided the blueprint for our oceans policy of the 1970's, which included the creation of NOAA and the passage of landmark legislation such as the Clean Water Act; the Coastal Zone Management Act; the Ocean Dumping Act;, the Magnuson Fishery Conservation and Management Act; and the Marine Mammal Protection Act.

The 1980's saw new challenges facing our oceans and Great Lakes, but the United States never developed a coordinated national agenda to address them. These challenges have been exacerbated by soaring budget deficits, but have also included the proclamation of a 200-mile exclusive economic zone and the newly declared 24-mile territorial sea; dramatically increased degradation caused by coastal and estuarine pollution; an increase in beach closings and unexplained

marine mammal deaths; a rash of major oilspills; and the depletion of our fishery resources.

As we enter the 1990's we must change our approach—the United States must adopt a comprehensive and coordinated agenda for the proper management and utilization of this Nation's most important natural resource, our oceans and Great Lakes. This concurrent resolution does just that: It directs the President to work with Congress in formulating a national oceans and Great Lakes policy for the coming decade. This policy should be based on a close examination of our past efforts, our current trends, and our future needs and expectations.

Now is the time to examine, and to assess the status of this Nation's coastal and marine concerns. Are we content with the rate of progress developed in response to the Stratton Commission 20 years ago? I for one am not. I strongly urge all of my colleagues to support this important resolution.

Mr. HERTEL. Mr. Speaker, I yield 5 minutes to the gentleman from Texas [Mr. LAUGHLIN].

Mr. LAUGHLIN. Mr. Speaker, I rise in support of the resolution and to ask the distinguished chairman of the Oceanography and Great Lakes Subcommittee a question.

Mr. Speaker, I would ask the committee chairman; the Committee on Public Works and Transportation has jurisdiction over Great Lakes water quality issues. Precedents and bill referrals support this. In addition, we have held numerous hearings on this matter. In fact, next week we will be marking up the Great Lakes Water Quality Improvement Act of 1990.

Recognizing this, does the gentleman acknowledge the jurisdiction of the Committee on Public Works and Transportation with respect to House Concurrent Resolution 69 as it addresses Great Lakes water quality issues?

Mr. HERTEL. Mr. Speaker, if the gentleman will yield, the gentleman's point is well taken. The Committee on Public Works and Transportation has jurisdiction over Great Lakes water quality improvement issues and House Concurrent Resolution 69 to the extent that these issues are addressed in the resolution.

Mr. LAUGHLIN. Mr. Speaker, I thank the gentleman. While I do support the resolution and am hopeful that the Senate accepts it as passed by the House, should a conference be necessary, I want to state for the record that it would be my intent to request that the Public Works Committee be appointed equal conferees on House Concurrent Resolution 69 in order to adequately and properly address our concerns.

Ms. SCHNEIDER. Mr. Speaker, I yield 5 minutes to the gentleman from New Jersey [Mr. SAXTON], a very active member on this committee.

Mr. SAXTON. Mr. Speaker, I rise in strong support of House Concurrent Resolution 69. House Concurrent Resolution 69 states in part that a new coordinated comprehensive policy based on reexamination must be developed in order to maximize current resources and to utilize the oceans and Great Lakes in a balanced fashion.

Mr. Speaker, one only need look at the hodgepodge of legislation that this House and the other body find necessary to address various problems that have to do with the ocean, to recognize why it is that the resolution of the gentlewoman from Rhode Island [Ms. SCHNEIDER] is so necessary. I have worked with the gentlewoman on many of these issues, over the last 6 years on all of the issues, and I must say, Mr. Speaker, that the resolution of the gentlewoman from Rhode Island [Ms. SCHNEIDER] is very well-founded. In fact, I cannot think of anything we need to do more than to work in this way with the administration and with the other Members of this House and with the many groups of people who are so concerned about the issues that we deal with on almost a daily basis that have to do with the ocean environment.

Mr. Speaker, not long ago the gentlewoman from Rhode Island [Ms. SCHNEIDER] and I joined with the gentleman from New Jersey [Mr. HUGHES] in working on the Subcommittee on Fish and Wildlife on a bill that has to do with standards of pollution or water quality standards for the ocean waters which would be consistent throughout the coastal areas of the United States.

Mr. Speaker, while we were there working on that bill, I asked myself why it is that we have to pass legislation like this year after year. The answer to that question is that we have been playing catchup, much as the gentlewoman from Rhode Island [Ms. SCHNEIDER] suggested, for many years, with regard to policies that have to do with ocean quality.

Mr. Speaker, think about the many subjects that we deal with right here on this floor. Oil spill legislation following the *Valdez* incident. Certainly that was catchup policy. Certainly we should have been able to recognize as a body and as a society that legislation to prevent oil spills was necessary, but we did not. Then we had to react.

The issue of sewer sludge dumping off the New Jersey coast was one of the first issues that I dealt with when I came to this House. Still today many communities in the Northeastern part of the United States, including communities from New York and New Jersey, continue to dump sludge in the ocean. Thankfully it will become illegal in another year or so, but it is an issue we had to play catchup on.

Medical waste in the ocean, an issue we again dealt with in a reactive fashion. We reacted to plastic in the ocean by expanding and putting in place legislation to put the MARPOL Treaty into effect in our House.

Combined sewer overflows and other plastic types of products that end up in the ocean still cry out for reaction from this House. Wetlands protection. For many, many years we have looked at wetlands as not so much a resource, but as something to be used for development. We know today we can no longer do that. It has an effect on the ocean.

Offshore exploration, often the subject of legislation in our House. Dolphin die-offs was a subject of activity by the Committee on Merchant Marine and Fisheries. A study was done, and today, still today, in the Gulf of Mexico dolphins continue to die. Red tides, what makes them, are they dangerous. The effect of nitrates and phosphates and the process of nutrification in the ocean and coastal waters are all issues we need to address.

Mr. Speaker, I believe as this resolution points out, that this resolution provides, and as the gentlewoman from Rhode Island [Ms. SCHNEIDER] has so aptly articulated, we need a coordinated policy for the ocean environment. I commend the gentlewoman for offering this amendment today, and certainly ask Members from both sides of the aisle to offer their strong support as well.

Mr. HERTEL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this truly is a national responsibility. As the gentlewoman from Rhode Island [Ms. SCHNEIDER] said, during the 1980's we had a very, very hard time because the Reagan administration tried to cut the environmental programs. They tried to cut the NOAA budget. So we are trying to collect information on our oceans and the problems of pollution. We had to constantly fight the administration week in and week out.

Mr. Speaker, I am happy to say that the current administration has increased the NOAA budget 35 percent in their request this year. We hope that will hold true in the entire budgetary process.

□ 1420

There is nothing more important to the people of Michigan than the Great Lakes, its water quality, the ability to have recreational facilities to go boating, fishing, bring families together, and protect that for future generations.

I think by including the Great Lakes in this legislation, of U.S. oceans and Great Lakes policy, that we can move ahead and have more information and better planning for the future.

Mr. DAVIS. I rise in support of House Concurrent Resolution 69, authored by Congresswoman CLAUDINE SCHNEIDER. She should be commended for her global thinking and leadership on this issue and her explicit recognition of the Great Lakes. We must remember that our fourth coast suffers from the same problems as our marine coasts, including coastal pollution, dredge disposal, wetland loss, and coastal erosion. In fact, in some ways the Great Lakes are much more fragile than the oceans: The Great Lakes operate as a closed system wihtout the natural flushing caused by ocean tides so that pollution like oil spills persist. In addition, the lakes provide drinking water for millions of United States and Canadian citizens. When formulating national coastal policy, the "Sweetwater Seas" deserve our consideration and our protection.

With the 20th anniversary of Earth Day celebrated not too long ago, this resolution calling for a national ocean and Great Lakes policy could not be more timely. I applaud Congresswoman SCHNEIDER's initiative and ask my colleagues to suppcrt her.

Mr. JONES of North Carolina. Mr. Speaker, I also rise in support of House Concurrent Resolution 69.

This bill expresses my strongly held view that it is time for the administration and the Congress to work together to review and develop a comprehensive national policy for our oceans and Great Lakes.

The resolution states the sense of the Congress that a comprehensive oceans policy is needed and needed now. Unfortunately, the resolution does not specify a mechanism for developing this policy. I have previously advocated the established of a new National Oceans Policy Commission to carry out this task. An independent Commission could provide recommendations to both the President and the Congress on the current state of our existing policies, identify gaps in those policies, and set forth an oceans policy framework for the remainder of this century and into the next.

This resolution lacks a Commission, and after years of trying to get the Senate to accept an Oceans Policy Commission, I am reluctant to urge its passage one more time. Although the resolution does not contain a specific mechanism for the development of a comprehensive national oceans policy, this does not mean that, if the administration would join us, we could not find common ground for identifying one.

With blinders on, the administration has indicated their view that no new national oceans policy is needed. They point to existing interagency policy and working groups as evidence that a policy already exists. Unfortunately, only administration officials belong to these groups. No Members of the Congress participate in their sessions and help to formulate policy. Nor is the public adequately represented on these groups. We can hardly hope to develop a comprehensive national oceans policy in such a vacuum.

Why is a comprehensive oceans and Great Lakes policy needed? In the first place, a review of existing laws and policies is needed because it has been more than 20 years since a similar review was undertaken. From time to time we need to step back and see what our existing laws have accomplished and do some looking toward the future. The last time we took an enlightened view of our oceans affairs was in the late 1960's when the Commission on Marine Science, Engineering and Resources, better known as the Stratton Commission, was created.

The Stratton Commission recommended the establishment of a new and independent oceans agency which would pull together existing oceans programs and give the President advice on all oceans issues. We have implemented many of the Stratton Commission's recommendations, but not all of them.

For example, the National Oceanic and Atmospheric Administration, or NOAA, was created by reorganization plan No. 4 in 1970, at the same time the Environmental Protection Agency was established. Many new ocean and coastal legislative initiatives, including the Coastal Zone Management Act of 1972, the Marine, Protection, Research, and Sanctuaries Act of 1972, and the National Sea Grant College Program Act of 1972 were enacted as a result of the Commission's recommendations.

We have not evaluated in any comprehensive way the successes and failures brought about by these laws. Nor have we conducted an objective evaluation whether NOAA has fulfilled the goals of the Stratton Commission. NOAA is currently located in the Commerce Department, but some observers question whether this is the appropriate department in which NOAA should be housed, and wonder whether NOAA should be made an independent agency. All these issues bear examination.

Second, numerous international events have transpired that make a review of U.S. oceans policy timely and important. For example, in 1982, the United States decided not to sign the Law of the Sea Convention because of fundamental objections to the mining provisions. Although the United States is not a signatory to the Law of the Sea [LOS] Convention, it has decided to adhere to those LOS principles which reflect customary international law, including extensions of coastal State jurisdiction. It is time to review how well this approach is working to advance and protect our strategic and navigational interests.

Consistent with the precepts of the Law of the Sea Convention, in 1983, the United States proclaimed a 200-mile exclusive economic zone [EEZ], and, in 1988, the United States extended its territorial sea from 3 to 12 nautical miles. Yet, aside from fishing laws, which predated the EEZ proclamation, we have failed to adopt any comprehensive policies for managing the resources of these new areas of U.S. jurisdiction. We also have failed miserably at creating a good Federal-State partnership for managing our near-shore and coastal regions. The issues of coastal pollution, leasing of our Outer Continental Shelf, and any mining of hard minerals in the EEZ can only be resolved if the States are provided a full say in their resolution.

Third, leaving aside these legalistic concerns, it has become increasingly apparent that the oceans have a vital role to play in our understanding and response to global climate change. The oceans are a sink for harmful air pollutants and could serve to ameliorate the effects of global climate change. At the same time, the phytoplankton in the oceans' surface layer are very sensitive to ozone depletion. Extreme global climate changes could lead to sea level rise which could threaten our coastal regions. If we do not safeguard our oceans, the planet's existence could be threatened.

The United States is also increasingly becoming a true coastal Nation. According to a recent report from NOAA, by the year 2010, coastal population in the United States will have grown from 80 million to more than 127 million, an increase of nearly 60 percent. This trend has to be recognized in the development of any new oceans and Great Lakes policies. The symptoms of our coastal growth are evident everywhere. From zebra mussel infestations to red tides to dolphin die-offs and closed beaches, the health of our coasts is providing an alarming signal that more needs to be done to protect these vital habitats and regions. Only a comprehensive review of existing laws and policy can bring these problems to light and start to redress them.

Last, I note that the Bush administration is a gentler and kinder administration. This administration actually acknowledges that our oceans exist. It has supported, much to my gratification, the reauthorization of the Coastal Zone Management Act and the National Sea Grant College Program Act. They have installed a good management team at NOAA which also appreciates the importance of the oceans. I hope that this administration can find a way to work with the Congress on the development of a comprehensive national oceans and Great Lakes policy.

I wish to acknowledge the fine contribution of two members of the Merchant Marine and Fisheries Committee who work diligently on all ocean policy issues and who have helped to bring this bill to the floor today. They are Congressman DENNIS HERTEL, chairman of the Oceanography and Great Lakes Subcommittee, and Congresswoman CLAUDINE SCHNEIDER, the ranking member of the Oversight and Investigations Subcommittee and the original sponsor of House Concurrent Resolution 69.

I urge my colleagues to support this bill.

Ms. SCHNEIDER. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. HERTEL. Mr. Speaker, I have no further requests for time, and I yield back the balance of the time.

The SPEAKER pro tempore (Mr. MONTGOMERY). The question is on the motion offered by the gentleman from Michigan [Mr. HERTEL] that the House suspend the rules and agree to the concurrent resolution (H. Con. Res. 69).

The question was taken; and (two-thirds having voted in favor thereof), the rules were suspended and the concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. HERTEL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous matter on House

Concurrent Resolution the concurrent resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

REGARDING THE EMIGRATION RIGHTS OF THE PEOPLE OF HONG KONG

Mr. SOLARZ. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 227) concerning the establishment of a multilateral initiative to promote confidence among the people of Hong Kong, as amended.

The Clerk read as follows:

H. CON. RES. 227

Whereas the Sino-British Joint Declaration on the Future of Hong Kong provides for the reversion of Hong Kong to China on July 1, 1997, after which Hong Kong will become a Special Administrative Region of the People's Republic of China;

Whereas the Joint Declaration states that the People's Republic of China will provide that the Hong Kong Special Administrative Region will retain its economic and social system for at least 50 years after 1997, have a "high degree of autonomy", and have executive, legislative, and independent judicial power (including the power of final adjudication);

Whereas the Joint Declaration further provides that the laws of Hong Kong, which are based on a foundation of equity and common law principles and provide substantial protections for individual rights, will remain basically unchanged for at least 50 years after 1997;

Whereas the Basic Law of the Hong Kong Special Administrative Region of the People's Republic of China provides that freedoms of speech, assembly, and association are to be maintained in Hong Kong after 1997;

Whereas the United States, with about $6,000,000,000 in direct foreign investment and bilateral trade estimated at $16,000,000,000 has a strong interest in a stable and economically prosperous Hong Kong after 1997;

Whereas the United Kingdom and other industrialized nations also have strong interests in a stable and economically prosperous Hong Kong, which is now the 11th largest trading entity in the world;

Whereas the Joint Declaration provides that Hong Kong Special Administrative Region "may on its own maintain and develop economic and cultural relations and conclude relevant agreements with states, regions, and relevant international organizations," and "will retain the status of an international financial centre";

Whereas measures to enhance this status, including efforts to establish the offices of major public international organizations in the Special Administrative Region, would help to promote confidence in the future of Hong Kong;

Whereas the stability necessary for ensuring prosperity in Hong Kong will be best secured if the citizens of Hong Kong are confident that their basic freedoms will be maintained after 1997;

Whereas confidence in the future of Hong Kong was severely eroded by the Chinese Government's June 1989 suppression of the prodemocracy movement in China;

Whereas the suppression of the prodemocracy movement has heightened concerns that the political situation in Hong Kong could seriously deteriorate after 1997 and that Hong Kong residents might be deprived of their basic freedoms;

Whereas the erosion of confidence in the future of Hong Kong threatens to lead to large scale emigration from Hong Kong, including emigration of civil servants, professionals, skilled workers, and other members of the population who are essential for the economic and social development of Hong Kong; and

Whereas Hong Kong residents would be less likely to attempt to leave Hong Kong prior to 1997 if they believed they could leave Hong Kong after 1997 should the guarantees contained in the Joint Declaration and the Basic Law not be honored: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That the Congress—

(1) welcomes the decision of the Government of the United Kingdom to implement a program to provide specified Hong Kong residents with a right of abode outside Hong Kong without their having to leave the territory prior to 1997 to retain that right, and urges the Government of the United Kingdom to expand the numbers of Hong Kong residents who will benefit from the program;

(2) welcomes the efforts of the Government of the United Kingdom to encourage other nations to develop national initiatives designed to provide a substantial and significant number of Hong Kong residents with a right of abode outside Hong Kong without their having to leave the territory prior to 1997 to retain that right;

(3) urges the executive branch to work with the Government of the United Kingdom in discussing with members of the European Community, Canada, Australia, Japan, and other willing nations the development of such national initiatives as well as other measures, consistent with the Sino-British Joint Declaration, to encourage stability in Hong Kong; and

(4) urges the executive branch to support efforts to enhance Hong Kong's status as an international financial center as described by the Sino-British Joint Declaration, including efforts to establish major public international organizations in Hong Kong.

The SPEAKER pro tempore. Is a second demanded?

Mr. LEACH of Iowa. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from New York [Mr. SOLARZ] will be recognized for 20 minutes, and the gentleman from Iowa [Mr. LEACH] will be recognized for 20 minutes.

The Chair recognizes the gentleman from New York [Mr. SOLARZ].

Mr. SOLARZ. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, amidst the profound transformations which have taken place over the course of the last year in Eastern Europe and the Soviet Union, as well as the resolution of a number of regional disputes from southern Africa through Central America, there has been a tendency on the part of many in our country to overlook the plight and problems of a number of countries and territories throughout the world which still face daunting difficulties in solving the underlying challenges which confront them.

One such place is Hong Kong, a territory in which the United States has some very important economic and political interests. We have at the present time $16 billion of trade with Hong Kong. There are over 900 American firms that have a corporate presence in Hong Kong, 16,000 Americans live in Hong Kong. There are over $6 billion in American investments in the territory.

The transformation of Hong Kong from a sleepy backwater into a dynamic entrepot in Asia is first and foremost a tribute to the people of Hong Kong. It is a tribute to their dynamism, to their hard work, to their passion for progress. But it is also a tribute to the free enterprise policies upon which the success of Hong Kong has been founded.

Yet, for all of the progress Hong Kong has made, the fact is that as a result of the brutal and bloody crackdown by the Chinese authorities in Tiananmen Square in June of 1989, the people of Hong Kong are experiencing increased trepidation about the transfer of authority over Hong Kong from Britain to the People's Republic of China in 1997.

As a consequence of the uncertainties and anxieties which have been generated by the policy of repression still being pursued by the gerontocracy which has seized power in Biejing, the people of Hong Kong are leaving the territory in increasing numbers.

Last year, for example, approximately 50,000 Hong Kong residents left for other lands. There is every reason to believe that this exodus will not only continue but even intensify. This brain drain of some of the best and brightest of the Hong Kong people has further exacerbated the crisis of confidence over the future of Hong Kong.

While ultimately the future of Hong Kong will be determined primarily by what happens in Beijing and by the attitude adopted by the rulers in Beijing with respect to Hong Kong, there is something which we and other Western countries can do to help facilitate a restoration of confidence in Hong Kong. Such a restoration of confidence is certainly a necessary, if not a sufficient, condition for a successful transition in 1997, including the preservation of important American interests in the territory.

The resolution before us now, which was introduced by Congressman JOHN PORTER and myself, and cosponsored by a number of our colleagues, has the

support of my very good friend, the ranking minority member of the Subcommittee on Asian and Pacific Affairs, the gentleman from Iowa [Mr. LEACH]. It also has the support of that distinguished apostle of bipartisanship, the great statesman from the State of Michigan, Mr. BROOMFIELD. It is not opposed by the administration.

This resolution welcomes the decision of the United Kingdom to implement a program to provide specified Hong Kong residents with the right of abode outside of Hong Kong without their having to leave the territory prior to 1997 in order to retain that right.

It urges the Government of the United Kingdom to expand the number of Hong Kong residents who will benefit from that program. It welcomes the efforts of Great Britain to encourage other nations to develop their own national initiatives designed to provide such rights to substantial and significant numbers of Hong Kong residents. Furthermore, it urges the executive branch of our own government to work with other countries in considering the establishment of what I would characterize as an international immigration insurance policy for the people of Hong Kong.

I recently returned from a trip to Hong Kong during the July recess, Mr. Speaker, and I discovered in my discussions with the political and commercial leaders of the territory that the overwhelming majority of the Hong Kong people would like to remain in Hong Kong if they could have some assurance that they will be able to leave if the situation should take a turn for the worse at some time in the future.

Unfortunately, right now the immigration policy of our own country and of other nations is generally based on the proposition that once you receive a visa to enter our country or other countries, as the case may be, you have to either use that visa within a matter of months or you lose your ability to use it at all.

□ 1430

That puts those Hong Kong people who receive such visas in a position where if they do not use them right away they will forfeit their opportunity to move to another country. Consequently virtually everybody who receives such visas departs Hong Kong shortly thereafter.

I am very pleased to say that the Subcommittee on Immigration, Refugees, and International Law of the Committee on the Judiciary voted some time ago to incorporate in the immigration bill a provision which I fervently hope will soon be taken up by the full Committee on the Judiciary, and then reported to the House for its consideration this provision would not only increase the number of visas for which Hong Kong is eligible from 5,000 to 20,000, but would also make Hong Kong recipients of family unification visas and other specified visas eligible to use those visas until the year 2002, 5 years after the transfer of authority to Beijing has taken place.

I want to say to my colleagues that I have absolutely no doubt whatsoever that if that provision is ultimately enacted into law that many of the Hong Kong people who receive our visas will, in fact, choose to remain in Hong Kong so long as they can because that is what they would prefer to do. By virtue of enacting such a provision we will give them the sense of confidence they need to remain and thereby contribute to the stability of a territory which has contributed greatly to the prosperity of Asia and to the economic well-being of our country as well.

Therefore, I believe, this resolution comes before Members at a timely moment. It expresses the sense of Congress that we should move forward, hopefully in concert with the United Kingdom and other countries, in developing such national initiatives. If we do so, Mr. Speaker, I believe we will have made a significant contribution to the preservation of stability and to the economic welfare and well-being of Hong Kong, of Asia, and of the world.

Mr. LEACH of Iowa. Mr. Speaker, let me just say that it has been an honor to work with the gentleman from New York [Mr. SOLARZ], who this body has come to know as the Lafayette of the Philippines, the Kossuth of Cambodia, the Laotse of the United States Congress.

Before commenting further, Mr. Speaker, I yield such time as he may consume to the distinguished ranking member of the Committee on Foreign Affairs, the Bismarck of that committee, the gentleman from Michigan [Mr. BROOMFIELD].

Mr. BROOMFIELD. Mr. Speaker, this resolution, which has been carefully developed with the Department of State, supports the 1984 Sino-British Joint Declaration regarding Hong Kong. It also acknowledges the concern that exists in Hong Kong as it approaches incorporation into the People's Republic of China in 1997.

With approximately $6 billion in direct United States investment and an estimated $16 billion in bilateral trade, the United States certainly has an interest in the economic and political stability of Hong Kong.

That could best be achieved by the British and the Chinese taking steps to faithfully implement the 1984 joint declaration. The declaration contains many provisions suggesting that life in Hong Kong will not significantly change after the 1997 reversion. Under the provisions of the joint declaration, Hong Kong will substantially retain its economic and social system for at least 50 years after the reversion.

However, the suppression of internationally recognized human rights in the People's Republic of China has made many Hong Kong residents anxious about their future. We have already seen a considerable flight of funds from Hong Kong. Continued erosion of confidence in Hong Kong's future could trigger a migration of people whose talent, skills, and experience are essential for future economic and social development.

This resolution emphasizes the importance of the joint declaration and welcomes British efforts to work with other nations in providing a safety net for Hong Kong's residents, should the Chinese ignore their commitments after the 1997 reversion. Such a safety net could help reduce anxiety in Hong Kong and encourage its residents to stay and keep this important area prosperous.

Mr. Speaker, I congratulate Chairman FASCELL, Congressmen SOLARZ and PORTER, for their diligent work in bringing this resolution before us in a form acceptable to the administration. I encourage our colleagues to support its passage and send a message to those in Hong Kong that they will not be abandoned or forgotten.

Mr. LEACH of Iowa. Mr. Speaker, let me say at the outset I am sorry that the distinguished gentleman from Illinois [Mr. PORTER] cannot be here as he is one of the leaders in the human rights movement in Congress, and one of the architects of this particular measure. Let me also say that this measure has been considered by four subcommittees of the Committee on House Foreign Affairs. It has been amended during the committee and subcommittee markup, and changes have been made to take into consideration the administration's concerns. At this time, the administration does not object to this resolution.

We all should bear in mind that, of course, the country that is most responsible for the foundering confidence in Hong Kong is the People's Republic of China, and in this regard it is the hope of the United States that Beijing will come back into the community of nations in terms of its attitude toward certain human rights concerns and will scrupulously respect Hong Kong's political, economic, and judicial integrity after its reversion to China in 1997.

Ever since the open door policy of a century ago of the United States of America, we have had a long special relationship with the Chinese people, especially the people of Hong Kong. This special relationship is in part trade- and security-oriented, but of more important measure, it is people to people, a common respect for a common heritage of endeavor on the

Asian land mass as well as on our own shores. This special relationship implies that the United States of America shares concern for individual people and their future, not just to pocketbook and trade issues. That is the underpinning of this particular measure, and in the terms of the gentleman from Michigan [Mr. BROOMFIELD], our great leader on the Republican side, this is one of the reasons that we want to stay committed to the people of Hong Kong in the most powerful and thoughtful way we can. For these reasons, I urge adoption of this particular measure.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. SOLARZ. Mr. Speaker, I think everything that needs to be said has been said. As always, after listening to my good friend from Iowa [Mr. LEACH] and my good friend from Michigan [Mr. BROOMFIELD], there is nothing left for me to say because I agree with everything they have already said.

I am pleased to know that we have the benefit of their support on this resolution. I have no doubt that those of our colleagues who are aware that Mr. LEACH and Mr. BROOMFIELD have endorsed this resolution will conclude that if they are for it, it cannot be all bad and must have at least some redeeming features.

Mr. FASCELL. Mr. Speaker, I rise in support of House Concurrent Resolution 227, as amended. The future of Hong Kong after the reversion to China on July 1, 1997 is of vital interest to the United States, the European Community, the Pacific Rim countries. This resolution speaks to two important issues: The protection of the human rights of the citizens of Hong Kong, in particular their right to emigrate after 1997, and the status of Hong Kong as an international financial center as agreed to by the Sino-British joint declaration.

While the reversion agreement is first and foremost an agreement between the United Kingdom and the People's Republic of China, its implementation will have an impact far beyond those two countries. As the resolution points out, the United States has about $6 billion in direct foreign investment in Hong Kong and a total bilateral trade estimated at $16 billion. Therefore, the United States interest in a stable and economically prosperous Hong Kong after 1997 is palpable.

I would like to take this opportunity to commend the distinguished chairman and ranking member of the Subcommittee on Asian and Pacific Affairs for their diligence in bringing this measure before the House. I would also like to commend my colleague from Illinois, Mr. PORTER, for his longstanding interest and efforts to protect the rights of the citizens of Hong Kong.

Mr. Speaker, this resolution deserves the unanimous support of this House and I urge its adoption.

Mr. PORTER. Mr. Speaker, I thank you for this opportunity to express my strong support for this resolution.

After the events in Tiananmen Square and the repression that has followed, China's citizens find themselves in the throes of a harsh crackdown. While the rest of the world moves toward freedom, China cements repression. And tragically, China's current policies threaten to bring down Hong Kong, the bastion of capitalism and free markets that the rest of the world currently strives to emulate.

With the 1997 reversion of the colony to China on the horizon, when Li Peng and Deng Xiaoping used tanks to crush the democratic aspiration of the Chinese people, the message was undoubtedly heard loudest by Hong Kong's 5.7 million residents. The massacre in Beijing together with the ongoing crackdown, obviously raise serious questions about the Chinese Government's willingness to fulfill the promises of freedom and autonomy for Hong Kong and its citizens contained in the Sino-British joint declaration.

I believe that the transfer of 5.7 million people to the control of a government that would so ruthlessly kill its own citizens is a human rights concern for the United States and the rest of the world. We must reject the Chinese claim that such matters, including the Tiananmen massacre, are internal. They are, or should be, concerns of every person in this world. Confidence in the future of Hong Kong in view of China's ongoing repression is at an all time low.

A survey conducted before the weekend of June 4, 1989, showed that 40 percent of Hong Kong residents were not confident about the future of the colony. The growing lack of confidence has already begun to take its toll. As of May, one-third of Hong Kong citizens were planning to emigrate before 1997: 45,000 left the colony in 1988; 45,000 more last year, and 55,000 are expected to leave this year, and 60,000 next year. The net loss for Hong Kong between now and 1997 could be as high as 600,000 to 700,000 people. A recent study indicates that a full one-third of Hong Kong's 1.55 million households are making plans to emigrate.

What has Beijing done to restore this lost confidence? In a word, Mr. Speaker, nothing. With regard to the massacre, they have covered up the facts and institutionalized the big lie. The leaders in China have now gone so far and so low as to blame the United States for involvement in the demonstrations and said that it is United States actions that have frozen relations between the two countries.

Some argue that China needs Hong Kong too much to ruin it. China is now Hong Kong's No. 1 trading partner, and Hong Kong is China's. China is the largest market for Hong Kong's reexports, and second largest for the colony's domestic exports. In addition, Hong Kong provides over 40 percent of the mainland's direct investment, providing it with essential foreign capital.

Yet, based on its decision to use tanks and guns against its own students and intellectuals, and the stifling of any true economic reforms, the current leadership appears willing to sacrifice the country's economic future for its own ideological survival.

It is now less than 7 years until China takes over. But, even that short period of time is misleading. If, in 1995, for example, the situation is still bad, the legal date of July 1, 1997 will have very little practical significance. We must act now.

Since there is very little the international community can do to alter policy in China toward Hong Kong, the emphasis must shift to what the community can do by itself. This resolution takes us in that direction. Simply put, in order to ensure that Hong Kong continues to work, the people of Hong Kong must remain in the colony. They are the ones who have made it the economic envy of the world. Yet fears about the future have precipitated the brain drain which threatens the colony today.

Hong Kong residents need assurance. Confidence is at rockbottom; many seek to leave. But if they were given an insurance policy against future injustice, they might well choose to stay. Public opinion polls clearly show that most want to do so.

The bill Mr. SOLARZ and I introduced calls on Great Britain to lead an international effort to develop a multilateral initiative designed to provide Hong Kong residents the right of abode in 1997 that would remain valid for at least several years after 1997. The European Community, Canada, Australia, Japan, Singapore, Taiwan, and other countries as well as the United States, must participate if this plan is to work. In addition, the legislation seeks to reinforce Hong Kong's status as an international financial center.

The United States, Mr. Speaker, itself, must act soon to provide special visas to Hong Kong residents exercisable at any time up to the year 2002 as envisioned by the Frank amendment, to the emigration authorizations which has already been adopted in subcommittee. We must also raise the number of legal immigrants from Hong Kong as soon as possible to at least 50,000 per year, 10 times the current number, and I have also introduced legislation to this effect.

Our country, and all places in the world which value human freedom, must intervene in behalf of the people of Hong Kong who will be the first to be transferred from an open society to a closed one since the Iron Curtain descended on Europe after World War II. A safety net envisioned by this legislation, will allow the people of Hong Kong to stay. Ongoing free world oversight leading up to and after 1997, is also needed to keep the Chinese Government in Beijing honest and living up to the letter and spirit of the 1984 accord.

This resolution, Mr. Speaker, represents a balanced, thoughtful, and practical approach to reassuring the people of Hong Kong that people of our country and elsewhere in the free world care deeply about them and their future. I comment the House Foreign Affairs Committee and its chairman, Mr. FASCELL, as well as Mr. SOLARZ, for their fast action in supporting Hong Kong and sending this message to China that the United States of America is watching, concerned, and taking action to ensure the future freedom of Hong Kong's 6 million people.

Mr. FALEOMAVAEGA. Mr. Speaker, I rise today in strong support of House Concurrent Resolution 227. This resolution calls for the establishment of a multilateral initiative to promote confidence among the people of Hong Kong. Mr. Speaker, the Sino-British Joint Dec-

laration on the future of Hong Kong provides for the reversion of Hong Kong to China on July 1, 1997, after which Hong Kong will become a region of the Peoples Republic of China.

Since the signing of this declaration, thousands of Hong Kong residents have left this region. Last year alone, approximately 50,000 Hong Kong residents left in mass exodus. Current figures estimate that approximately a thousand people a day are leaving Hong Kong. The suppression of last spring's prodemocracy movement in Tiananmen Square, and throughout China, further exacerbated the mass emigration.

This resolution recognizes and offers Hong Kong residents the right of abode outside Hong Kong without having to leave the territory prior to 1997 to retain that right. Its passage will certainly ensure the Hong Kong residents that their freedoms will be protected ater 1997.

Its passage will also promote the stability and confidence in the 16,000 Americans in Hong Kong, and the over 900 American firms conducting business there. Its passage will further secure the over $16 billion of trade the United States has with Hong Kong.

Mr. Speaker, I strongly support House Concurrent Resolution 227 and I urge my colleagues in the House to pass this measure.

Mr. SOLARZ. Therefore, Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. MONTGOMERY). The question is on the motion offered by the gentleman from New York [Mr. SOLARZ] that the House suspend the rules and agree to the concurrent resolution (H. Con. Res. 227) as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution, as amended, was agreed to.

The title of the concurrent resolution was amended so as to read: "Concurrent resolution concerning the establishment of national initiatives to promote confidence among the people of Hong Kong.".

A motion to reconsider was laid on the table.

□ 1540

GENERAL LEAVE

Mr. SOLARZ. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the concurrent resolution just considered and agreed to.

The SPEAKER pro tempore (Mr. MONTGOMERY). Is there objection to the request of the gentleman from New York?

There was no objection.

TRIBALLY CONTROLLED COMMUNITY ASSISTANCE ACT OF 1978 AND NAVAJO COMMUNITY COLLEGE ACT EXTENSIONS

Mr. WILLIAMS. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 5040) to extend the authorizations of appropriations for the Tribally Controlled Community Assistance Act of 1978 and the Navajo Community College Act, as amended.

The Clerk read as follows:

H.R. 5040

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. TRIBALLY CONTROLLED COMMUNITY COLLEGE ASSISTANCE.

(a) TITLE I PROGRAMS.—Section 110(a) of the Tribally Controlled Community College Assistance Act of 1978 (25 U.S.C. 1810(a)) is amended by striking "and 1990" each place it appears in paragraphs (1), (2), and (3) and inserting "1990, 1991, and 1992".

(b) TITLE III PROGRAM.—Section 306(a) of such Act (25 U.S.C. 1836(a)) is amended by striking "and 1990" and inserting "1990, 1991, and 1992".

SEC. 2. NAVAJO COMMUNITY COLLEGE ACT.

Section 5(a)(1) of the Navajo Community College Act (25 U.S.C. 640c-1(a)(1)) is amended by striking "and 1990" and inserting "1990, 1991, and 1992".

The SPEAKER pro tempore. Is a second demanded?

Mr. HILER. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Montana [Mr. WILLIAMS] will be recognized for 20 minutes, and the gentleman from Indiana [Mr. HILER] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Montana [Mr. WILLIAMS].

Mr. WILLIAMS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 5040 is a straight 2-year reauthorization of the Tribally Controlled Community College Assistance Act and the Navajo Community College Act.

The gentleman from Missouri [Mr. COLEMAN] has joined me in introducing this legislation and it is our intent to bring reauthorization in line with the Higher Education Act which will be before the postsecondary subcommittee next session.

H.R. 5040 extends at current levels of authorization these two acts until the time of higher education reauthorization—at which time we will take a more comprehensive look at changes that may need to be made.

The 24 colleges are increasingly being responsible for tribes turning the corner toward a better life for Indian people. The first college started in 1968; and today there are 24 tribal colleges with several more tribes exploring starting their own colleges. In 1981, there were 1,689 students attending tribal colleges. Today the tribal colleges' enrollment is about 4,200; with approximately 7,000 students graduating in the past 5 years and more than 25 percent transferring to 4-year institutions.

Mr. Speaker, I point out again that the purpose of the simple reauthorization is to bring these two acts into line with the higher education reauthorization, which will take place in the next Congress.

Mr. HILER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the ranking Republican Member is not here, and I am filling the space for him until he arrives. If the gentleman from Montana [Mr. WILLIAMS] has other speakers on this legislation, I would reserve the balance of my time.

Mr. WILLIAMS. Mr. Speaker, since the gentleman from Indiana has reserved the balance of his time while he is waiting for the gentleman from Pennsylvania [Mr. GOODLING], I yield myself such time as I may consume.

Let me, while I have these few additional but unexpected minutes, quote from a special report which has been issued called "Tribal Colleges Shaping the Future of Native America." This was produced by the Carnegie Foundation for the advancement of teaching, and I will read a foreword by a noted American educator, Mr. Earnest Boyer. The work is primarily the work of Paul Boyer, who is an instructor of journalism at California State University at Sacramento and who, by the way, was kind enough to come to a hearing which we held on this topic and which was held on the Salish Kootenai Flathead Reservation in Montana. Let me quote from the foreward in this book:

Twenty years ago in Arizona, Native Americans created a new institution—the first tribally controlled college. Today twenty-four higher learning institutions, founded and controlled by Indians, are serving Native communities from Michigan to Washington State. While most of these colleges are no more than a decade old—a blink in time for higher education—they have undergone dramatic growth, expanding and gaining recognition in spite of conditions others would regard as impossible.

Researchers from the Carnegie Foundation for the Advancement of Teaching spent two years studying these remarkable institutions. We reviewed the federal government's past attempts to "educate" the Indians and discovered how, in the desert left by a long history of failed policies, the Navajos in 1968 created Navajo Community College, inspiring a movement that now offers to Native Americans a door of hope.

Viewed by the numbers alone, tribal colleges add up to only a small fraction of the total higher education picture—the equivalent perhaps of a small branch of a single state university. But using conventional yardsticks to measure these colleges misses the significance of their work. Tribally controlled colleges can be understood only in

the historical context of Indian education and in the spiritual role they play in bringing renewal to their people. When viewed from these perspectives, tribal colleges assume a mission of great consequence to Native Americans and to the nation.

With that, Mr. Speaker, I reserve the balance of my time.

Mr. HILER. Mr. Speaker, I yield such time as he may consume to the gentleman from Pennsylvania [Mr. GOODLING], the ranking Republican member.

Mr. GOODLING. Mr. Speaker, I rise in support of this bill, H.R. 5040. The act we are considering today originally became law in 1978. The funding it has provided is vital to the growth and survival of tribally controlled colleges. With that growth also came academic improvements. Today, 19 of the 24 tribally controlled colleges are either fully accredited or in various stages of candidacy for accreditation.

These colleges are the primary resource in the economic and social development of these reservations. For example, a recent survey found that a total of 1,575 Indian people graduated from six tribally controlled colleges between 1983 and 1989. Of this number, 210 earned 1 year vocational certificates, 1,198 earned associate degrees, 158 earned bachelor's degrees, while 9 earned master's degrees in education. An average of one-third continued their education following graduation. The conclusions that can be drawn from this information are that these colleges have a major impact on Indian peoples employability and further education.

H.R. 5040 is a clean simple extension of these programs to bring them into sync with the rest of higher education. After this extension, these programs will be reviewed in the context of all the higher education amendments. I agree with this strategy and encourage my colleagues to support this bill.

Mr. RICHARDSON. Mr. Speaker, I rise today to express my strong support for H.R. 5040, the Native American Community College Assistance Act. Not only is this legislation vitally important to the continuation of all tribally controlled community colleges but also the continuation of the Navajo Community College in Arizona.

Navajo Community College was established to meet the education needs of the Navajo people—specifically, to develop the character of individual students; to prepare students for jobs and further studies; to promote and perpetuate the Navajo language and its culture; and provide community services and research. New Mexico is fortunate to have one of the main campuses of Navajo Community College located in Shiprock, NM.

The current president of Navajo Community College, Laurence Gishey said,

Just as society places an enormous pressure on its students and educational institutions to excel, the Navajo people also demand Navajo Community College to meet and maintain high standards. Among other things, the success of the college is judged by the number of graduates who transfer and graduate successfully from four-year institutions. More importantly, the college strives to meet high standards in its goal to instill pride and self-respect in its graduates.

Mr. Speaker, I believe that Navajo Community College has done an excellent job in providing an educational facility that meets the needs of the Navajo people. Additionally, the Navajo people as well as all Native Americans, deserve to have a facility that incorporates the importance of their native heritage into their studies. Mr. Speaker, I believe this is a vitally important bill to many tribally controlled community colleges and I hope my colleagues will join me in supporting it.

Mr. HILER. Mr. Speaker, I yield back the balance of my time.

Mr. WILLIAMS. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Montana [Mr. WILLIAMS] that the House suspend the rules and pass the bill, H.R. 5040, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The title of the bill was amended so as to read: "A bill to extend the authorizations of appropriations for the Tribally Controlled Community College Assistance Act of 1978 and the Navajo Community College Act.".

A motion to reconsider was laid on the table.

□ 1450

GENERAL LEAVE

Mr. WILLIAMS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 5040, the bill just passed.

The SPEAKER pro tempore (Mr. MONTGOMERY). Is there objection to the request of the gentleman from Montana?

There was no objection.

CONGRESSIONAL AWARD AMENDMENTS OF 1990

Mr. OWENS of New York. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 5275) to amend the Congressional Award Act to temporarily extend the Congressional Awards Board, and to otherwise revise such act, as amended.

The Clerk read as follows:

H.R. 5275

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Congressional Award Amendments of 1990".

SEC. 2. TEMPORARY EXTENSION OF CONGRESSIONAL AWARD BOARD.

Section 9 of the Congressional Award Act (2 U.S.C. 808) is amended to read as follows:

"FUNDING

"SEC. 9. (a)(1) There are authorized to be appropriated such sums as may be necessary for each of the fiscal years 1991 and 1992 to cover the costs associated with the provision of all medals and certificates under this Act, and the costs associated with the annual Award ceremony authorized for recipients of Gold Awards under section 7(b)(2)(F).

"(2) Funds appropriated under paragraph (1) shall be disbursed by the Clerk of the House upon submission of vouchers approved by the Chairman of the Board, or another member of the Board, as delegated by the Chairman.

"(3) Funds appropriated under this section shall remain available until expended.

"(b) The Board shall terminate October 1, 1992.".

SEC. 3. ANNUAL REPORT.

Section 3(e) of the Congressional Award Act (2 U.S.C. 802(e)) is amended in the first sentence by striking "March 1" and inserting "April 1".

SEC. 4. DERIVATION OF APPOINTMENT.

Section 4(a) of the Congressional Award Act (2 U.S.C. 803(a)) is amended by adding at the end the following new paragraph:

"(4) For the purpose of determining the derivation of the appointment of any person appointed to the Board under this section, if there is a change in the status of majority and minority between the parties of the House and Senate, each person appointed by the leadership position set out in subsection (a)(1) of the party of the individual who made the initial appointment of such person.".

SEC. 5. TERMS OF APPOINTMENT.

Section 4(b) of the Congressional Award Act (2 U.S.C. 803(b)) is amended—

(1) by inserting "(1)" after the subsection designation;

(2) in paragraph (1) (as so designated), by striking "but (unless" and all that follows and inserting the following: "and (unless reappointed under paragraph (3)) shall serve for a term of 4 years."; and

(3) by adding at the end the following new paragraphs:

"(2) For the purpose of adjusting the terms of Board members to allow for staggered appointments, the following distribution of Board terms shall take effect at the first meeting of the Board occurring after the date of the enactment of the Congressional Award Amendments of 1990:

"(A) Those members who have served 10 years or more, as of the date of such meeting, shall have an appointment expiring on a date 2 years from October 1, 1990.

"(B) Those members who have served for 6 months or less, as of the date of such meeting, shall have an appointment expiring on a date 6 years from October 11, 1990.

"(C) All other members shall apportion the remaining Board positions between equal numbers of 2 and 4 year terms (providing that if there are an unequal number of remaining members, there shall be a predominance of 4 year terms), such apportionment to be made by lot.

"(3)(A) Subject to the limitations in subparagraphs (B) and (C) of this paragraph, members of the Board may be reappointed, provided that no member may serve more than 2 consecutive terms.

"(B) Members of the Board covered under paragraph (2)(A) of this section shall not be eligible for reappointment to the Board. Members of the Board covered under subparagraphs (B) and (C) of paragraph (2) of this section may be reappointed for 1 additional consecutive 4 year term.

"(C) Members of the Board who serve as chairman of the Board shall not have the time during which they serve as chairman used in the computation of their period of service for purposes of this paragraph and paragraph (2).".

SEC. 6. REMOVAL FROM BOARD.

Section 4 of the Congressional Award Act (2 U.S.C. 803) is amended by adding at the end the following new subsection:

"(j) Any member of the Board who fails to attend 4 consecutive Board meetings scheduled pursuant to the bylaws of the Board and for which proper notice has been given under such bylaws, or to send a designee of such member (approved in advance by the Board under provisions of its bylaws), is, by operation of this subsection, removed, for cause, from the Board as of the date of the last meeting from which they are absent. The Chairman of the Board shall take such steps as are necessary to inform members who have 3 absences of this subsection. The Chairman shall notify the House and the Senate, including the approporiate committees of each body, whenever there is a vacancy created by the operation of this subsection.".

SEC. 7. TECHNICAL AMENDMENT, STATEWIDE COUNCILS, ACCEPTANCE OF FUNDS AND RESOURCES.

(a) TECHNICAL AMENDMENT.—Section 7 of the Congressional Award Act (2 U.S.C. 806) is amended by inserting "(a)" after the section designation.

(b) STATEWIDE COUNCILS.—Section 7 of the Congressional Award Act (2 U.S.C. 806) is amended—

(1) in subsection (b)(2)—

(A) in subparagraph (C)—

(i) by striking "conducting" and inserting "conduct"; and

(ii) by striking "State and";

(B) by redesignating subparagraphs (D) through (G) as subparagraphs (E) through (H), respectively, and by inserting after subparagraph (C) the following new subparagraph:

"(D) in addition to those activities authorized under subparagraph (C), conduct of outreach activities to encourage, where appropriate, the establishment and development of Statewide Congressional Award Councils;"; and

(C) in subparagraph (F) (as redesignated by subparagraph (B) of this paragraph), by striking "conducting" and inserting "conduct"; and

(2) by redesignating subsections (c) through (h) as subsections (d) through (i), respectively, and by inserting after subsection (b) the following new subsection:

"(c)(1) In carrying out its functions with respect to Statewide Congressional Award Councils (hereinafter in this subsection referred to as Statewide Councils) under subsection (b), the Board shall develop guidelines, criteria, and standards for the formation of Statewide Councils. In order to create a Statewide Council, Members of Congress and Senators from each respective State are encouraged to work jontly with the Board.

"(2) The establishment of Statewide Councils is intended to—

"(A) facilitate expanded public participation and involvement in the program; and

"(B) promote greater opportunities for involvement by members of the State congressional delegation.

"(3) The duties and responsibilities of each Statewide Council established pursuant to this section shall include, but not be limited to, the following:

"(A) promoting State and local awareness of the Congressional Award Program;

"(B) review of participant records and activities;

"(C) review and verification of information on, and recommendation of, candidates to the national board for approval;

"(D) planning and organization of bronze and silver award ceremonies;

"(E) assisting gold award recipients with travel to and from the national gold award ceremony; and

"(F) designation of a Statewide coordinator to serve as a liaison between the State and local boards and the national borad.

"(4) Each Statewide Council established pursuant to this section is authorized to receive public monetary and in-kind contributions, which may be made available to local boards to supplement or defray operating expenses. The Board shall adopt appropriate financial management methods in order to ensure the proper accounting of these funds.

"(5) Each Statewide Council established pursuant to this section shall comply with the standard charter requirements of the national board of directors.".

(c) ACCEPTANCE OF FUNDS AND RESOURCES.—Section 7(e) of the Congressional Award Act, as redesignated by subsection (b)(2) of this section, is amended to read as follows:

"(e)(1) Subject to the provisions of paragraph (2), the Board may seek and accept funds and other resources to carry out its activities. The Board may not accept any funds or other resources which are—

"(A) donated with a restriction on their use unless such restriction merely provides that such funds or other resources be used in furtherance of the Congressional Award Program or a specific regional or local program; and

"(B) donated subject to the condition that the identify of the donor of the funds or resources shall remain anonymous.

The Board may permit donors to use the name of the Board of the name 'Congressional Award Program' in advertising.

"(2) Except as other wise provided in this Act, the Board may not receive any Federal funds or resources. The Board may benefit from in-kind and indirect resources provided by Offices of Members of Congresss or the Congress. Further, the Board is not prohibited from receiving indirect benefits from efforts or activities undertaken in collaboration with entities which receive Federal funds or resources.".

SEC. 8. GENERAL ACCOUNTING OFFICE AUDITS.

Section 8 of the Congressional Award Act (2 U.S.C. 807) is amended—

(1) in subsection (a), in the first sentence—

(A) by striking "section 7(h)" and inserting "section 7(i)"; and

(B) by striking "at least biennially" and inserting "annually"; and

(2) by striking subsections (b) through (d) and inserting the following:

"(b) The Comptroller General shall submit to appropriate officers, committees, and subcommittees of the Congress, by May 15 of each calendar year, a report on the results of the audit of the financial records and on any such additional areas as the Comptroller General determines deserve or require evaluation.".

The SPEAKER pro tempore. Is a second demanded?.

Mr. BARTLETT. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objections, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from New York [Mr. OWENS] will be recognized for 20 minutes, and the gentleman from Texas [Mr. BARTLETT] will be recognized for 20 minutes.

The Chair recognizes the gentleman from New York [Mr. OWENS].

Mr. OWENS of New York. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, Government support for volunteer activity is at an all-time high level. The partnership between Government and ordinary citizens is being buttressed more and more by Presidentially financed support and incentives. The call for a National Youth Service Program, combined with the President's proposals to give numerous awards to high-performance schools and organizations which nurture his "thousand points of light," have created a new era of voluntarism.

I am pleased to bring today a bipartisan bill that reflects the issues addressed in our hearing on the Congressional Award Program. H.R. 5275 reauthorizes the Congressional Award Program and represents changes that will strengthen and improve the stability of the program so that it will continue to be a catalyst for involving the youth of our country in volunteer efforts.

Our recent hearing revealed that while the program is now guided by sound management, some of the local district councils need help with the provision of medals, certificate, and travel money for their recipients. Last year, the Congressional Award Program conferred 630 medals to volunteers ranging in age from 14 to 23, representing a minimum of 184,000 volunteer hours. Unfortunately, 13 of the gold award recipients representing California, Missouri, Louisiana, and Washington State were unable to attend the Washington, DC ceremony due to an inability to pay travel expenses. Therefore, this reauthorization recognizes that the partnership between the Congress and the Congressional Award Program, in order to be successful, must be more than symbolic.

Since its reauthorization 2 years ago, the Congressional Award Program has made great strides and is now on sound footing. The burden of debt has been cleared, new board members have helped to reinvigorate the work of the

National Foundation, and there is clear evidence of solid growth in the number of local district councils that have been established. The program recently received a $50,000 grant to develop the first inner-city Congressional Award Program model. This progress has been achieved through active congressional oversight, as well as the dedication and determination of the program's new national director and board members.

We have made three basic changes to this program. First, clarifications have been made to specify the conditions of board appointments and to allow for the smooth transition of board members.

Second, the board has been directed to establish guidelines for the creation of statewide councils.

Third, Congress will, in its partnership role, pay for medals, certificates, and the costs associated with sending gold award recipients to Washington, DC.

Today, we are embarking on a 2-year reauthorization of the Congressional Award Program with the hope that the changes we make will allow the board to direct its energies to long-range planning.

It is intention of the ranking member of the Subcommittee on Select Education, Mr. BARTLETT, and myself to seek a commitment from the leadership for space in either the House or Senate buildings, other than the Capitol, for the Congressional Award Program National Office. This will allow for a much needed, enhanced visibility for the program on Capitol Hill.

This proposal has been accomplished through true bipartisan negotiation and hard work. I believe that H.R. 5275 will demonstrate the commitment of the Subcommittee on Select Education to build upon a strong foundation and add initiatives in the area of demonstrated needs. I again commend the staff for their hard work in developing a program that will work in the 1990's. I urge my colleagues to support the passage of this bill by unanimous vote.

Mr. Speaker, I reserve the balance of my time.

Mr. BARLETT. Mr. Speaker, I yield such time as he may consume to the gentleman from Pennsylvania [Mr. GOODLING], the ranking member of the full committee.

Mr. GOODLING. Mr. Speaker, today we are considering H.R. 5275, a bipartisan bill to reauthorize the Congressional Award Program which was created in 1979. It is the only award given by Congress in recognition of youth leadership in the areas of public service, personal development, and physical fitness.

The program is administered by the Congressional Award Board which has the authority to use the congressional seal, but the program's activities are not directed by Congress. While the program has achieved substantial success at the local level, the National Board which administers the program nationwide has not. The Board is composed of 22 members who are committed to the program but unfortunately they have not been able to achieve an acceptable level of success at the national level. Since 1979 only 73 local Congressional Award Councils have been established, of which 5 are statewide councils.

When the program was established, Congress intended that it be funded and operated through private sources. However, while local and State councils have been extremely successful in raising funds to operate the program at the local level, the national Board has not. The Board has operated at a deficit since 1985 and only within the past few months has the Board operated in the black. However, the GAO has certified to the Congress that since June 1990, the Congressional Award Program has retired all of their old debts and is capable of meeting their current expenses.

H.R. 5275 makes several changes to ensure that the National Board maintains financial stability while increasing student and congressional participation. First, it makes several changes to the Board so that members of the Board will be actively involved in the future of the program. Second, it requires the General Accounting Office to conduct an annual audit to ensure that the program is operating in a fiscally sound manner. And, third, it increases the commitment by Congress by authorizing funds to pay fo all medals, certificates, and expenses incurred by gold award recipients who come to Washington for the annual gold award ceremony.

While I am encouraged that this Board has made significant improvements in the operation of the program by retiring all of its old debt, I cannot support additional Federal funding beyond what H.R. 5275 authorizes for medals and the gold award ceremony. The Congressional Award Program was never intended to be a federally funded program and I do not believe providing Federal funds to this program is a solution to their fiscal problems. Better private national fundraising and a stronger commitment from Congress are what is needed to make this program successful.

H.R. 5275 ensures that those goals are met. It is my hope that when we reauthorize this program in 2 years, this combination of a private-public partnership will have worked and the National Board will have succeeded in securing private contributions to fund this program.

Therefore, Mr. Speaker, I will support H.R. 5275 since it is a congressional award and not a Presidential award.

Mr. BARTLETT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today to support H.R. 5275, the reauthorization of the Congressional Award Act, which provides an award given by Congress in recognition of youth leadership in the areas of public service, personal development, and physical fitness. I believe H.R. 5275 makes changes that will strengthen the National Board and allow them to increase student and congressional participation in the program while increasing their private fundraising activities.

H.R. 5275 makes several changes to the National Board by limiting the number of terms each Board member serves, staggering the length of terms and providing a mechanism so that inactive Board members can be removed. In addition, H.R. 5275 requires the General Accounting Office to conduct an annual audit of the program so that the Congress can ensure that the program is meeting its financial obligations and not incurring debts.

When we reauthorized this program in 1988, it was in the spirit of giving the National Board a chance to work out their financial difficulties and make a fresh start. The GAO has informed the Congress that the program has retired all of their old debts and is operating in the black and capable of meeting their current expenses. The Board has raised $150,000 in private funds so far this year with a projection of another $100,000 to be raised by the end of the year. This is indeed an accomplishment because the Congressional Award Program has operated at a deficit for the past 5 years even with the $189,000 unauthorized Federal appropriation it received in 1987. While this Board has made significant improvements since the last reauthorization by retiring the debt, I do not believe we should rush to provide Federal dollars to administer this program.

I am convinced that the Congress needs to demonstrate a stronger commitment to the program and I support providing funds to pay for the limited expenses of the congressional medals, certificates, and to cover the costs for Gold Award recipients to come to the Washington Gold Medal Award ceremony. I am supporting H.R. 5275 because it addresses those concerns without providing significant Federal funds to this program.

I am particularly sensitive to the need to provide congressional office space to the national office so that the program can reach more congressional offices and encourage Members to have a Congressional Award Program in their districts. After all, this is a congressional program and while not

federally funded, I believe Congress needs to show its commitment to this program by providing in-kind office space. By providing congressional in-kind office space, private fundraisers will recognize that their contributions will not go toward office expenses but for increasing the number of young people who can benefit from the program. I intend to work with the chairman and the House leadership to provide that assistance.

The Congressional Award Program was never intended to be a federally funded program. It is a public-private partnership to encourage those in the private sector to recognize and commend our Nation's youth. Federal funding is not an option as a solution to the Congressional Award's problems. Better private fundraising efforts at the national level must be pursued if this program is expected to continue. I believe we should stick to that commitment by adopting these changes, which will make that goal possible and by providing a stronger commitment from Congress to make this program successful.

H.R. 5275 accomplishes that goal and, hopefully, in 2 years when the program is reauthorized there will be no need to discuss additional Federal funding because private contributions will be able to fund the program, as was originally intended.

□ 1500

Mr. OWENS of New York. Mr. Speaker, in closing, I want again to thank the ranking minority leader on the subcommittee and also the gentleman from Pennsylvania [Mr. GOODLING], the ranking minority leader on the Education and Labor Committee. I associate myself with his remarks with respect to the President's awards versus congressional awards.

I said at the beginning that we are in a new era of voluntarism. Voluntarism means the Government meets the volunteers part of the way. It is sometimes a ratio of one part versus the other nine parts that are provided by volunteers. This program is a model of that kind and it is sponsored by the Congress.

Mr. BARTLETT. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. OWENS of New York. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. MONTGOMERY). The question is on the motion offered by the gentleman from New York [Mr. OWENS] that the House suspend the rules and pass the bill, H.R. 5275, as amended.

The question was taken, and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The title of the bill was amended so as to read: "A bill to amend the Congressional Award Act to temporarily extend the Congressional Award Board, and to otherwise revise such Act.".

A motion to reconsider was laid on the table.

CONGRESSIONAL GOLD MEDAL FOR MESSRS. CAPRA, STEWART, AND ZINNEMANN

Mr. GONZALEZ. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1699) to award Congressional Gold Medals to Frank Capra, James Stewart, and Fred Zinnemann.

The Clerk read as follows:

H.R. 1699

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CONGRESSIONAL GOLD MEDAL.

(a) PRESENTATION AUTHORIZED.—The President is authorized to present, on behalf of the Congress, a gold medal of appropriate design, to each of the following individuals in recognition of their outstanding contributions to our Nation's cultural heritage:

(1) Frank Capra.

(2) James Stewart.

(3) Fred Zinnemann.

(b) DESIGN AND STRIKING.—For purposes of the presentation referred to in subsection (a), the Secretary of the Treasury shall strike gold medals with suitable emblems, devices, and inscriptions to be determined by the Secretary. The Secretary shall design a different gold medal for each individual referred to in subsections (a) (1)–(3).

(c) AUTHORIZATION OF APPROPRIATION.—Effective October 1, 1989, there are authorized to be appropriated not to exceed $60,000 to carry out this section.

SEC. 2. DUPLICATE MEDALS.

(a) STRIKING AND SALE.—The Secretary of the Treasury may strike and sell duplicates in bronze of the gold medals struck pursuant to section 1 under such regulations as the Secretary may prescribe, at a price sufficient to cover the cost thereof, including labor, materials, dies, use of machinery, and overhead expenses, and the cost of the gold medals.

(b) REIMBURSEMENT OF APPROPRIATION.—The appropriation used to carry out section 1 shall be reimbursed out of the proceeds of sales under subsection (a).

SEC. 3. NATIONAL MEDALS.

The medals struck pursuant to this Act are national medals for purposes of chapter 51 of title 31, United States Code.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Texas [Mr. GONZALEZ] will be recognized for 20 minutes, and the gentleman from Indiana [Mr. HILER] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Texas [Mr. GONZALEZ].

Mr. GONZALEZ. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the bill H.R. 1699 authorizes the awarding of Congressional Gold Medals to Frank Capra, James Stewart, and Fred Zinnemann. Only Gold Medal bills that have more than 218 cosponsors can be considered by this committee. This cosponsorship requirements was imposed to assure that only those individuals whose lives have made a significant, lasting contribution to our country are honored with this special award.

In the over 200-year history of our country, only 103 pieces of legislation authorizing Gold and National Medals have been enacted. Congressional and National Medals are indeed truly special awards. The first Congressional Medal was awarded to George Washington to express the gratitude of the Congress, for itself and on behalf of the 13 united colonies, for wise and spirited conduct in the siege of Boston.

The purpose of the Congressional Gold Medal has changed through our history from one of being an honor of military heroism to one that recognizes the diverse contributions of our most distinguished citizens.

Today we have before us a bill to honor three very gifted Americans who have contributed much to our modern cultural heritage through their motion pictures: Mr. Frank Capra, Mr. James Stewart, and Mr. Fred Zinnemann. Mr. Capra's and Mr. Stewart's movies, "Mr. Smith Goes to Washington" and "It's a Wonderful Life," and Mr. Zinnemann's movies "From Here to Eternity" and "High Noon," are most certainly cultural landmarks, created in one of the few uniquely American art forms—filmmaking.

Mr. HILER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of H.R. 1699, a bill to award a Congressional Gold Medal to Frank Capra, Jimmy Stewart, and Fred Zinneman for their contributions to the motion picture industry.

Initially, I want to commend the gentleman from New York [Mr. MRAZEK] for his hard work complying with the Banking Committee's Consumer Affairs and Coinage Subcommittee rules that require a minimum of 218 cosponsors before we consider commemorative medal legislation. I also want to commend my good friend Senator COATS, the Senate sponsor of this legislation, and am sure he will work to have the other body consider this bill in an expeditious fashion.

The individuals we honor with these gold medals have made valuable contributions to our Nation's cultural heritage. Frank Capra, and Jimmy Stewart teamed up to produce several unforgettable movies such as "It's a Wonderful Life" and "Mr. Smith Goes to Washington." Lessons from these films are as timely today as they were when they first appeared. Fred Zinneman produced several films that highlight questions about character and

conscience such as "High Noon" and "From Here to Eternity." Congressional Gold Medals were a fitting tribute for the important life's work of each of these gentleman.

H.R. 1699 has three sections. Section 1 authorizes a Congressional Gold Medal for Frank Capra James Stewart, and Fred Zinneman with the design to be determined by the Secretary of the Treasury. Appropriations not to exceed $60,000 are authorized for the production of the medals.

Section 2 authorizes the Secretary of Treasury to strike bronze duplicates of the gold medals and sell them at a price sufficient to cover the costs of producing the duplicates and the gold medals themselves.

Section 3 designates the medals as national medals.

In closing I would like to say that I believe that the individuals we are honoring through these gold medals are truly deserving of this congressional award. I strongly support H.R. 1699 and urge my colleagues to join me in promptly passing this legislation.

Mr. GONZALEZ. Mr. Speaker, I yield such time as he may consume to the gentleman from New York [Mr. MRAZEK].

Mr. MRAZEK. Mr. Speaker, I rise today to call on my colleagues to join me in voting for H.R. 1699, which honors three extraordinary Americans, Frank Capra, Fred Zinnemann, and James Stewart, for their outstanding contributions to our Nation's cultural heritage. The life work of these three men represents an immense contribution to a truly unique and American form of art—the motion picture. Millions of Americans have had their attitudes, their beliefs and, indeed, their very lives shaped and molded by the stories and characters created by these men. I would like to briefly summarize a few of the accomplishments of these distinguished individuals:

FRANK CAPRA

In the words of Jimmy Stewart: "No director ever opened the window to America like Frank Capra. He got above writing, above directing, above acting, to something that was actually happening." The leading man of such classic Capra films as You Can't Take It With You, Mr. Smith Goes to Washington, and It's a Wonderful Life was praising the director's unique ability. As a director he combined energy, warmth, and the sincere decency of the American character in his pictures. Never forgetting his immigrant roots, Capra himself embodied the American dream, describing his particular style of directing as "very, very simple—the love of people, add the freedom of each individual and the equal important of each individual and you have the principle on which I've based each of my films."

Credited with creating the genre of the romantic comedy, Capra lightened the Depression for the "little guys" represented in such films as Lady for a Day (1933), Mr. Deeds Goes to Town (1936), Mr. Smith Goes to Washington (1939), and Meet John Doe (1941). Drawing on his own personal immigrant experience as the son of illiterate Sicilian parents, the boy who refused to leave school managed to portray the sense of wonder and enchantment with America as a land where miracles do happen, and the underdog can triumph. Capra's fervent faith in the goodness of man and his deep-rooted pride in his adopted country is wonderfully communicated by Jimmy Stewart's performance in Mr. Smith Goes to Washington, in which the naive, but honest-to-the-core Senator Jefferson Smith ultimately triumphs over a system riddled with corruption.

Perhaps Capra's greatest cinematic triumph is his own favorite film, It's a Wonderful Life. Capra again teamed up with Jimmy Stewart in creating this classic tale of a man from small-town America whose dreams of escape and adventure have been frustrated at every turn by family obligation and civic duty. As he contemplates his life's worth on Christmas eve, an angel descends from Heaven (perhaps plunges is a better word) to save the despairing George Bailey (played by Stewart) by showing him what the world would be like if he had never been born. It's an ingenious device employed by Capra to show how each and every one of us touch the lives of so many. The ending of the film, where everyone who has ever known George Bailey gathers at his home to help him in his time of need, is classic Capra and quintessentially American in its optimism and faith in the basic goodness of man.

This resilient faith in the righteousness of man, and of Americans in particular, is evident in the "Why We Fight" series that Capra produced and directed for the U.S. Government during World War II. The "Why We Fight" series was a sophisticated endeavor filling an important gap in the country's effort to enable our soldiers to fully comprehened the reasons we were at war. Through a powerful combination of direct narration, emotionally charged images—including scenes of Hitler addressing huge Nazi rallies—and skillful editing, Capra succeeded in producing and directing the most stirring and effective Allied Forces documentary of the war. The film series succeeded in promoting Secretary of War Stimson's hope that the American flag be "recognized throughout the world as a symbol of freedom on one hand * * * and of overwhelming power on the other." As a direct result of Capra's "Why We Fight" series, those who fought were reminded of the American values and principles they were striving to preserve and the moral necessity of their service. Winston Churchill called the film series "the most powerful statement of our cause" he had ever encountered, and for his project Capra was honored by Army Chief of Staff General George C. Marshall with our Nation's highest noncombat award, the Distinguished Service Medal.

On the night Frank Capra was awarded the American Film Institute's Life Achievement Award, Claudette Colbert, star of Capra's 1934 picture "It Happened One Night," which brought him the first of his three Academy Awards and was the first film to win all five major Academy honors, paid this tribute to the director: "Frank made magic out of a very simple story, one you could tell in a small paragraph. He is that rare artist, a storyteller who makes you believe every word."

The values of family, hope, integrity, and the importance of the individual are the embodiment of the life's work of Frank Capra. It is the very essence of his genius that allows us a glimpse of the world as it should be. Frank Capra's work celebrates the basic goodness of the American spirit, and for this we should pay tribute by awarding him the Congressional Gold Medal.

FRED ZINNEMANN

Just as the work of Frank Capra has at times been criticized as being overly sentimental, the films of Fred Zinneman have at times been criticized for their frank reality—a sin not easily overlooked by Hollywood producers. Often called a "maverick director," Zinnemann's career has been a constant struggle to maintain his independence and artistic integrity in the face of his industry's overwhelming commercialism. Fortunately for us, his battle has been an astounding success.

When asked to express the overarching theme of his life's work, Zinnermann likes to quote the ancient Hebrew philosopher and teacher, Hillel: "If I am not myself, who will be for me? And if I am only for myself, what am I? And if not now, when?" With quiet eloquence, Fred Zinnemann's films examine these universal questions of identity and conscience, providing his audience with many examples of individuals who must face a crisis that forces them to plumb the very depths of their souls. His films have repeatedly demonstrated to American audiences that the individual can and must summon the courage and fortitude necessary to overcome personal weakness and fear.

There is an unyielding, maverick quality to most of Mr. Zinnemann's films, a refusal to pander to the audience with reassuring cliches, pop formulas, or contrived moralistic cant. Instead, he elevated the level of American culture, creating some of the greatest and most powerful American

movies including "Member of the Wedding," "The Wave," "The Seventh Cross," "Julia," "The Men, "The Search," "The Nun's Story," "From Here to Eternity," "A Man for All Seasons," and his most famous film "High Noon."

Zinnemann's social-realist style first gained critical acclaim in 1948 with "The Search," which starred Montgomery Clift in his film debut as an American GI stationed in Germany who befriends a lost and mute Czech boy, gradually winning his trust and teaching him to speak again. Using narrowing footage of real war orphans in UNRRA camps, "The Search," although a work of fiction, dramatized in a highly realistic way the plight of countless displaced people in post war Europe.

In "The Men," released in 1950, Zinnemann brought to the American public the problems of thousands of paraplegic veterans. Starring Marlon Brando in his cinematic debut, the film examines complex relationships of families, friends, and fellow veterans struggling to come to terms with the protagonist's disabled condition. This was hardly the kind of fluff the American public was used to seeing in their neighborhood movie theater.

Most film critics would agree that Fred Zinnemann's masterpiece is "High Noon." It is my personal opinion that "High Noon" is not only Fred Zinneman's greatest film, but the greatest film ever made. It has been a constant source of inspiration to me, and I have no doubt that it has inspired countless others, whether directly or indirectly as a result of its theme and message becoming deeply ingrained in the American conscience. If Fred Zinneman never directed another film except for this one, he should be honored with Congress' highest award.

Working in the distinctly American genre—the Western, Zinneman created a film that transcends the genre—and forever changing it—to become a classic tale of a man who, in his commitment to duty, is able to triumph over his own strongest fears. The film is so rich in its texture, plot and theme that it still stirs considerable debate over its true meaning: a modern day "every man," a parable of McCarthyism, or of international politics, an anti-Western. Gary Cooper stars as the small-town sheriff, Will Kane, who on the day of his retirement and marriage to a Quaker woman, Grace Kelly, chooses to face a killer seeking revenge. Desperately trying to rally the town citizens to band together to confront the returning Frank Miller and his gang, he soon realizes that he must face alone the fears that the townspeople choose to ignore. With consummate skill, Fred Zinnemann has pulled together all the elements of great filmmaking—its haunting theme song, "Do Not Forsake Me," the stark, black-and-white cinematography, its tension-building editing and superior acting—to produce a cinematic tour de force.

Fred Zinnemann's extraordinary contributions to American file have earned him recognition as one of the most honored of postwar directors. He has won four Academy Awards for directing—including for "From Here to Eternity" and "A Man for All Seasons," and for the two earlier documentaries. The New York Film Critic's Circle has honored him as best director four times, and the Directors Guild has conferred upon him the coveted D.W. Griffith Award for lifetime artistic achievement.

In his soberly authetic protrayals of human conscience, Fred Zinnemann has reflected the enduring American value of principled individualism. His films have served as inspiration to millions. In light of Fred Zinnemann's enduring contribution to the art of the motion picture and the cultural heritage of our Nation. Congress should bestow it highest honor, the Congressional Gold Medal, as a fitting tribute and expression of gratitude for his life's work.

□ 1510

JIMMY STEWART

If ever there was a movie star worthy of public adoration, it is Jimmy Stewart. He has become a living icon of all that is true and good in America. In this era of media hype, in which public image so often belies the private reality, Jimmy Stewart's public persona as a man of innate goodness and decency is truly the real thing.

Jimmy Stewart is so universally beloved in America and around the world, that one would be extremely hard-pressed to find a single person who does not like him. Expressing sentiments undoubtedly shared by many, Harry Truman once declared: "If Bess and I ever had a son, we'd want him to be just like Jimmy Stewart." Ronald Reagan expressed his feelings for Stewart by saying: "If I were marooned on a desert island and could choose a buddy to keep me company, there's never been any doubt who I'd pick. Jimmy Stewart knows when to talk, when to keep quiet, when to laugh and when to appear. I've been his friend for a long time and it's a privilege."

In a film career spanning 43 years, Jimmy Stewart has played a wide variety of roles—Charles Lindbergh in *"The Spirit of St. Louis,"* Glen Miller in *"The Glenn Miller Story,"* the pixilated Elwood P. Dowd in *"Harvey,"* the naive and idealistic Jefferson Smith in *"Mr. Smith Goes to Washington,"* Deputy Tom Destry opposite Marlene Dietrich in *"Destry Rides Again,"* the self-loathing reporter in *"The Philadelphia Story"* for which he won an Acadamy Award, the peeping Tom in Hitchcock's *"Rear Window,"* and the rich-man's son in love with the daughter of a lovably eccentric family in *"You Can't Take It With You"* are just a few of his characters out of dozens of starring roles that have become a part of all of our lives.

Perhaps Stewart's greatest role, however is that of George Bailey in the Frank Capra classic, *"It's a Wonderful Life."* Stewart's own favorite movie, his characterization of George Bailey represents the archetype of the Jimmy Stewart role—honest to the core, sincere, decent, hard-working, dedicated to his family, a man of ambition and unbridled optimism. He is the man every mother wants her son to grow up to become. When it was originally released, the film had only modest success. Over the years it has become a Christmas-time classic.

When he first agreed to take the part of George Bailey, Stewart had just returned from the war and was actually a bit unsure whether he could still act. Unlike many actors at the time who went into the Armed Forces and were given public relations jobs stateside, Jimmy Stewart was a genuine war hero. Against the objection of MGM studio head Louis B. Mayer, Jimmy Stewart requested combat duty in Europe as a pilot. As an Army Air Corps bomber pilot—and later squadron leader—Stewart flew more than 30 missions over Germany, and was awarded the Distinguished Flying Cross, the Air Medal with Oak Leaf Cluster and the Croix de Guerre by the French Government. Typical of Jimmy Stewart's modesty and sensitivity, he demanded that his studio contract following the war explicitly prohibit the use of his war record in promoting his films.

Through both the characters he has played over the years and the lifestyle he has led, Jimmy Stewart has come to embody the American spirit. Congress would be doing itself a great honor in awarding its Congressional Gold Medal to such a deserving American as Jimmy Stewart.

Mr. HILER. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. GONZALEZ. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I think the record ought to show we are grateful to the gentleman from New York [Mr. MRAZEK] for his leadership in this legislation and acknowledge his very hard work done in acquiring the 219 cosponsors that are required by the committee for commemorative coin legislation.

Mr. Speaker, this is a noncontroversial bill. It has bipartisan support. The bill was reported by the House Sub-

committee on Consumer Affairs and Coinage without dissent.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. MURTHA). The question is on the motion offered by the gentleman from Texas [Mr. GONZALEZ] that the House suspend the rules and pass the bill, H.R. 1699.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GONZALEZ. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and include extraneous material, on H.R. 1699, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

PROVIDING FOR CONSIDERATION OF H.R. 3950, FOOD AND AGRICULTURAL RESOURCES ACT OF 1990

Mr. HALL of Ohio. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 439 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 439

Resolved, That any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3950) the "Food and Agricultural Resources Act of 1990", and the first reading of the bill shall be dispensed with. All points of order against consideration of the bill are hereby waived. After general debate, which shall be confined to the bill and the amendments made in order by this resolution and which shall not exceed three and one-half hours with two hours to be equally divided and controlled by the chairman and ranking minority member of the Committee on Agriculture, with thirty minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Foreign Affairs, with thirty minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means, and with thirty minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Education and Labor, the bill shall be considered for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Agriculture now printed in the bill, as modified by the amendments printed in section one of the report of the Committee on Rules accompanying this resolution, as an original bill for the purpose of amendment under the five-minute rule, said substitute, as modified, shall be considered by titles instead of by sections and each title shall be considered as having been read, and all points of order against said substitute, as modified, are hereby waived. No amendment to said substitute, as modified, shall be in order unless printed in the "Amendments" portion of the Congressional Record on or before July 20, 1990, except for pro forma amendments for purposes of debate and amendments offered pursuant to the authorities contained hereafter in this resolution. It shall be in order for Representative de la Garza of Texas: (1) after consultation with Representative Madigan of Illinois, to offer at any time during consideration of each title an amendment or amendments en bloc to that title, including modifications in the text of any amendments printed in the Congressional Record which are germaine thereto; and (2) after the disposition of all other amendments, to offer amendments en bloc, which may include amendments to portions of the bill already read for amendment. It shall be in order to Representative Gejdenson of Connecticut to offer an amendment to title XII and all points of order against said amendment are hereby waived. It shall be in order to consider the amendments printed in section two of the report of the Committee on Rules en bloc. Any amendments en bloc made in order by this resolution shall not be subject to a demand for a division of the question in the House or in the Committee of the Whole. After the disposition of all other amendments except for the amendments specified in (2) above, it shall be in order to consider the amendment printed in section three of the report of the Committee on Rules, said amendment shall not be subject to amendment except an amendment offered by Representative Panetta and pro forma amendments for debate, and all points of order against the amendment printed in section three are hereby waived. No amendment shall be in order in the House or in the Committee of the Whole which affects the subject of title XIX of the substitute, as modified. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the amendment in the nature of a substitute made in order as original text by this resolution. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. (Mr. MONTGOMERY). The gentleman from Ohio [Mr. HALL] is recognized for 1 hour.

Mr. HALL of Ohio. Mr. Speaker, for purposes of debate only, I yield 30 minutes to the gentleman from Tennessee [Mr. QUILLEN], pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 439 is an open rule providing for the consideration of H.R. 3950, the Food and Agricultural Resources Act of 1990.

The rule provides for 3½ hours of general debate to be divided in the following way: 2 hours to be equally divided and controlled by the chairman and ranking minority member of the Committee on Agriculture; 30 minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Foreign Affairs; 30 minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means; and, 30 minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Education and Labor. The rule waives all points of order against consideration of the bill.

The rule also makes in order the Agriculture Committee amendment in the nature of a substitute now printed in the bill, as modified by the amendments printed in section 1 of the report accompanying this resolution, as an original text for the purpose of amendment under the 5-minute rule. It shall be considered for amendment, by titles, instead of by sections, with each title considered as having been read. The rule waives all points of order against the substitute, as modified.

Mr. Speaker, this rule permits amendments, which have been printed in the CONGRESSIONAL RECORD on or before July 20, 1990. The rule permits Chairman DE LA GARZA, after consultation with Representative MADIGAN, to offer an amendment or en bloc amendments at any time during consideration of each title. This includes modifications in the text of any amendments printed in the CONGRESSIONAL RECORD which are germane. Chairman DE LA GARZA may also offer en bloc amendments after the disposition of all other amendments, including amendments to portions of the bill already read for amendment.

In addition, under the rule, Representative GEJDENSON may offer an amendment to title XII and all points of order against the amendment are waived. The rule allows en bloc amendments printed in section 2 of the accompanying report. These amendments, to be offered by Mr. DORGAN, have to do with targeting certain agricultural price supports. Any amendments en bloc made in order by this resolution shall not be subject to a demand for a division of the question in the House or in the Committee of the Whole.

After the disposition of all other amendments, except for the de la Garza en bloc amendments, the rule allows the amendments printed in section 3 of the accompanying report. This amendment, to be offered by Mr. SYNAR, has to do with pesticides and food safety. All points of order are waived against the amendment. It is amendable, by an amendment by Mr.

PANETTA and by pro forma amendments for debate.

Finally, Mr. Speaker title XIX of the substitute, as modified, is not amendable in the Committee of the Whole or in the House. This addresses the subject of shipping and certain Great Lakes concerns.

Finally, the rule provides for one motion to recommit, with or without instructions.

Mr. Speaker, I am glad that we are able to bring this bill up before the House. This is the most significant farm bill since 1985. It is designed to reauthorize and redefine the Nation's agricultural policy for the next 5 years. It also has extremely significant improvements in our food and nutrition programs that reach people suffering from poverty.

As chairman of the House Select Committee on Hunger, I had a particular interest in many programs included in this comprehensive bill. I am particularly pleased that an agreement was reached between the Committees on Agriculture and Foreign Affairs on the issue of food aid to reduce hunger and malnutrition. I would like to commend my colleagues, Chairman DE LA GARZA and Chairman FASCELL for their excellent work in crafting this compromise. I expect to be supporting this compromise which will be offered by my colleague, Representative GEJDENSON. The Gejdenson amendment will dramatically improve our efforts to use food grown by American farmers to improve the lot of millions of poor, hungry people around the world, from Bangladesh to Peru.

I would also like to commend my colleagues from the Agriculture Committee for improving and extending programs which help our hungry people in this country. This includes food stamps, the Temporary Emergency Food Assistance Act, known as TEFAP, and the various commodity donation programs. Also included is a bill I authored to establish a national gleaning clearinghouse to allow USDA to help private citizens, farmers, and community groups to organize local gleaning programs. Gleaning is the salvaging of leftover crops that would otherwise to wasted, for donation to the poor.

Mr. Speaker, H.R. 3950 is the result of hearings and careful consultations. I am pleased that we have an open rule, and I urge my colleagues to adopt it.

□ 1520

ANNOUNCEMENT RELATIVE TO SUBMISSION OF AMENDMENTS ON H.R. 4825, ARTS, HUMANITIES, AND MUSEUMS AMENDMENTS OF 1990

(By unanimous consent, Mr. MOAKLEY was allowed to proceed out of order.)

Mr. MOAKLEY. Mr. Speaker, the Rules Committee is planning to meet on Tuesday, July 24, to consider H.R. 4825, the Arts, Humanities, and Museums Amendments of 1990. The committee sent out a notice on Monday, July 16 which required that any Members wishing to offer amendments to this bill must submit them to the Rules Committee by 5 p.m. today, July 23.

It has come to my attention that there may be a technical modification in the bill which may require amendments to be rewritten to conform to the change in the text. However, as long as Members have the actual language of their amendments to the Rules Committee by 5 p.m. today, it will not matter—in terms of Rules Committee consideration—if they need to be redrafted to conform to the new text.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to commend the chairman and the ranking Republican member of the Committee on Agriculture, the gentleman from Texas [Mr. DE LA GARZA], and the gentleman from Illinois [Mr. MADIGAN] for their leadership in bringing this bill to the floor.

In a bill of this magnitude and complexity, it is not possible to please everybody, but they have done a good job of balancing competing interests.

I would also like to commend the chairman of the House Committee on Rules for his hard work in making this rule possible so that we could bring the agriculture bill to the floor.

The bill as reported by the Agriculture Committee is over 1,000 pages long, and that product was ultimately referred to four other committees for consideration of provisions falling within their jurisdiction.

The provisions of the rule have been fully explained by the gentleman from Ohio [Mr. HALL], and it would be redundant for me now to repeat what he said. There are a couple of points I would like to make, however. There is nothing in this bill which deals with tobacco.

And yet when the Rules Committee met, the gentleman from Illinois [Mr. DURBIN], accompanied by two other Members appeared with antitobacco amendments. One of the amendments as originally drafted would have been subject to a possible point of order, but I understand it has now been redrafted so that it would not require a waiver.

Mr. Speaker, I represent a district where many small farmers depend on tobacco to put food on the table. These are not big, rich, corporate farms. These are little farms, where growing an acre or two of tobacco is the difference between paying the bills and not paying the bills. Growing tobacco is not easy work. I was born a sharecropper's son, and I worked in tobacco while I was growing up. If you take tobacco away from many of the small farmers in my part of the country, there is nothing to replace it.

I have heard all the arguments about health, and I am in favor of good health. But being hungry is not conducive to good health, and if tobacco is taken away from small farms in my part of the country, there are going to be a lot of families who are not going to be able to pay the food bills.

I just hope Members will keep this in mind if we are forced to vote on amendments which hurt small tobacco growers.

Mr. Speaker, another difficult area in this bill is the extension of the cargo preference set-aside for Great Lakes ports added by the Foreign Affairs Committee. The addition of this provision threatens to open up a whole new fight on cargo preference, an issue which was not even in the bill reported by the Committee on Agriculture. The able chairman of the Committee on Merchant Marine and Fisheries, the gentleman from North Carolina [Mr. JONES], worked out a compromise on the Great Lakes set-aside which extends it but phases it out over 5 years. Mr. Speaker, this rule makes that compromise in order, and makes it nonamendable.

Mr. Speaker, we all know how important agriculture is to this Nation of ours and to the world. This bill is a fine bill and should be adopted by the House. I would like to see this rule passed overwhelmingly so that we can have the general debate on the bill today.

Mr. Speaker, I support this rule and I support the basic thrust of the agriculture bill.

Mr. Speaker, I yield 5 minutes to the gentleman from Texas [Mr. FIELDS].

Mr. FIELDS. Mr. Speaker, since coming to Congress in 1981, I have rarely requested time to speak on a particular rule. However, this rule is so patently unfair to my constituents and those living in 18 other States that I am compelled to rise in strong opposition to House Resolution 439.

While House Resolution 439 provides an open rule for those provisions reported by the House Agriculture Committee, it prohibits all amendments to title 19. In fact, this is the only section of H.R. 3950 which is not open for any modifications or improvements.

This title, the so-called shipping provisions, incorporates language exclusively beneficial to four Great Lakes ports at the expense of some 41 ports on the east coast, west coast, gulf coast, and inland river system.

The language in title 19 has never been subject to a congressional hearing nor has it ever been reported from

any congressional committee. In fact, 1 week ago this language did not even exist and has nothing—nothing—to do with the underlying purpose of the farm bill. It is nongermane, extraneous and, frankly, has no place in H.R. 3950. It is a one-sided compromise written for and by the proponents of the set-aside.

While the Merchant Marine and Fisheries Committee, of which I am a member, conducted a hearing on one provision of title 19—the Great Lakes cargo set-aside—the committee took no further action on this issue. Why? Because it is clear that an overwhelming majority of our committee is firmly opposed to reestablishing this onerous giveaway program.

In addition, the House Agriculture Committee, which has primary jurisdiction over H.R. 3950, did not include any of the language of title 19 within its reported version.

By way of background, the Great Lakes Cargo Set-Aside Program was first established as part of the Food Security Act of 1985. It was approved in the Senate and was reluctantly accepted by the House/Senate conference committee. There has never been a vote on the set-aside in the House of Representatives. Sadly, this rule will continue that legacy by refusing to allow an up or down vote on this issue.

As my colleagues from the Great Lakes know, this set-aside program was established for a limited period of time. No other coastal range or port has ever been given nor has requested guaranteed cargo under food aid or any other Government program.

The set-aside was designed to help the Great Lakes adjust to the gradual increase in the amount of Public Law 480, title II, food aid cargo carried on U.S.-flag vessels. It provided that help by guaranteeing that 240,000 metric tons or 20 percent of the Public Law 480, title II, cargo would be shipped from Great Lakes ports regardless of their handling costs.

This transition period is over and, by law, the set-aside expired on December 31, 1989. It should not be reestablished.

While I can understand that Great Lakes ports would want to reestablish this program, after all, they are no more competitive today than they were in 1985. It is said that they are so afraid to allow a debate on this issue that they have hidden this language within this rule.

It is also sad that the taxpayers of this Nation will be forced to pay some $2 million a year in additional handling costs to ship Government cargo from Great Lakes ports.

In addition to the set-aside, title 19 also allows certain foreign ships to be reflagged United States and to be immediately eligible to carry Government cargo. This language also mandates that the Secretary of Transportation will be forced to provide operating differential subsidy [ODS] payments to the owners of these vessels.

Mr. Speaker, this ODS language is unprecedented and will mean a government expenditure of at least $3 million per vessel per year. This represents some $90 million over the next 5 years or $270 million over the course of these contracts.

Mr. Speaker, I think it is totally inappropriate to be establishing this new Government commitment, without debate, at a time of massive deficits and budget negotiations.

While the gentleman from Wisconsin [Mr. OBEY] has repeatedly objected to subsidies for the U.S. maritime industry, interestingly he has no such objection to those subsidies when they are provided for vessels using Great Lakes ports.

To repeat, neither the ship reflagging nor mandated ODS payments have ever been the subject of a congressional hearing or markup session.

While Great Lakes ports do have problems because of the physical limitations of their port system, their 9-month shipping season, and their unattractiveness to most vessels, those living on the east coast, west coast, gulf coast, and along our rivers should not be penalized, because of those problems. The solution to the problems facing the Great Lakes ports must not be solved by diverting Government cargo from our port ranges.

While I cannot quantify the impact of the set-aside on each of the 41 ports which compete for Public Law 480, title II, cargo, I do know that the port of Houston is the lifeblood of Houston's economy. It provides jobs for one out of every three Houstonians and it provides economic benefits for 160,000 Texans.

In addition, from testimony we know that the set-aside caused severe economic losses for ports like Corpus Christi, TX; Pascagoula, MS; Pensacola, FL; and Lake Charles, LA. In fact, in the case of Lake Charles, that port lost more than half of its cargo because of the set-aside. While 15,000 metric tons of grain may not seem like a lot, to ports like Lake Charles it means jobs for 40 to 50 longshoremen for 8 to 10 weeks. Reinstating the set-aside program will destroy these ports, just as they are beginning to recover form the previous 4 years of set-asides.

While I will spare the House the litany of reasons why the set-aside should not be reestablished, I want my colleagues to know that when our gulf ports suffered hard economic times, they did not come running to Congress demanding special breaks, Government guarantees, or mandated cargo. What our ports did was reduce their handling costs, cut their wages, and become competitive. Sadly, Great Lakes ports have decided that if they complain loud enough and have their elected representatives threaten to destroy the U.S. maritime industry, they will receive cargo without having to compete for it.

Mr. Speaker, what our ports expect it that all Government cargo be allocated on an open, fair, and competitive basis. That is exactly how the system has worked for nearly 40 years, except for the period when the set-aside was in existence.

Mr. Speaker, for the record, the Great Lakes Cargo Set-Aside Program is strongly opposed by the Bush administration, the Gulf Ports Association, the Inland River Ports and Terminals Association, the Northwest Marine Terminal Association, the National Marine Engineers' Beneficial Association, the International Organization of Masters, Mates and Pilots, the 140-member congressional sunbelt Caucus, and ports in the States of Alabama, Arkansas, California, Florida, Georgia, Iowa, Kentucky, Louisiana, Mississippi, Missouri, North Carolina, Oklahoma, Oregon, South Carolina, Tennessee, Texas, Virginia, and Washington.

In fact, my colleagues should know who are the winners and losers of the language in section 19. The winners are the Great Lakes ports of Milwaukee, Duluth, Chicago, and Burns Harbor, IN. The losers are the ports of Newport News, VA; Norfolk, VA; Charleston, SC; Moorehead, NC; Wilmington, NC; Savannah, GA; Brunswick, GA; Jacksonville, FL; Pensacola, FL; Mobile, AL; New Orleans, LA; Baton Rouge, LA; Lake Charles, LA; Pascagoula, MS; Gulfport, MS; Orange, TX; Houston, TX; Beaumont, TX; Galveston, TX; Freeport, TX; Corpus Christi, TX; Port Arthur, TX; Panama City, FL; Tampa, FL; Oakland, CA; Long Beach, CA; Sacramento, CA; Portland, OR; Seattle, WA; Olympia, WA; Tacoma, WA; Longview, WA; Grays Harbor, WA; Rivergate, TN; Midsouth, TN; Pine Bluff, AR; Helena, AR; Fort Smith, AR; Little Rock, AR; Mount Vernon, AR; and Tulsa, OK.

Finally, Members of the House are precluded from deleting the set-aside from title 19 even though this program is, in all likelihood, a blatant violation of the port preference clause of our Constitution. Article I, section 9, clause 6, states that "no Preference shall be given by Regulation of Commerce or Revenue to the Ports of one State over those of another."

The senior Senator from Alabama, HOWELL HEFLIN, who is a constitutional scholar and former chief justice of the Alabama Supreme Court, has stated that "clearly, the set-aside arbitrarily awards tonnage to the Great Lakes region, while all other ports must compete based on cost, violating the meaning of the port preference clause."

Mr. Speaker, in conclusion, I ask my colleagues to join with me in voting "no" on this rule so that we can eliminate this blatant and unfair effort to assist four Great Lakes ports at the expense of 41 other ports on the east coast, west coast, gulf coast, and the inland river system.

Your vote against this rule will have no impact on the farm bill since this provision has no business being in the farm bill.

I urge you to vote "no" on this rule so that we can strip out this nongermane, extraneous, and highly discriminatory language contained in title 19. If we are going to guarantee Government cargo to one port range to the detriment of all others and if we are going to create a whole new Federal shipping entitlement program exclusively for the Great Lakes, then we should at least have a debate and "up or down" vote on this issue.

Vote "no" on House Resolution 439.

□ 1530

Mr. HALL of Ohio. Mr. Speaker, I yield 2 minutes to the gentleman from Louisiana [Mr. HUCKABY].

Mr. HUCKABY. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I rise today as a strong supporter of the agriculture bill as reported out by the Committee on Agriculture. However, I find myself in a position of having to speak against and oppose the rule that is before us today concerning the sugar title of this legislation.

The bill as reported out by the Committee on Agriculture had what we refer to as a reexport provision, whereas we would purchase sugar, half a million tons a year, from the Caribbean nations and nations that have a per capita income of less than $1,500. We would pay them a 7-cents-per-pound premium for the sugar, they enter the United States, we refine it, and reexport it.

We are having to do this because the European Economic market supports sugar at 30 cents per pound, we in the United States support it at 18 cents; the Common Market dumps their surplus sugar and they destroy the world market. It has significantly hurt the economies of the Caribbean nations.

Every nation in the Caribbean supports this initiative. Each Member of Congress received a letter from all of the Ambassadors. Not only did the Committee on Rules strip this provision from the bill, they refused to waive points of order to allow me to offer an amendment to reinstate it, to allow the Members a choice.

Let me point also that this cost was to be borne by the corn and the sugar sweetener industries themselves.

It is a shame we have let an opportunity slip through our hands to provide millions and millions of dollars to those less needy, those unfortunate.

Mr. QUILLEN. Mr. Speaker, I yield 5 minutes to the gentleman from Florida [Mr. SHAW].

Mr. SHAW. Mr. Speaker, I today stand in strong opposition to House Resolution 439, which will be the rule for H.R. 3950, the Food and Agricultural Resources Act of 1990.

The reason I ask my colleagues to defeat the rule is because it does not allow any amendments to title XIX of H.R. 950—the title which resurrects the noncompetitive, unfair, unconstitutional and burdensome Great Lakes set-aside. In fact, this is the only section of the farm bill which is closed off for amendments under this rule.

The Great Lakes set-aside was originally established as a Senate amendment to the 1985 farm bill. The set-aside was intentionally designed by its authors to be a temporary measure when the amount of Food for Peace cargo carried on U.S.-flag ships increased from 50 to 75 percent. That transition period expired last year. Now the Great Lakes ports say they need another temporary "transition" period, this time lasting until 1995. As history often repeats itself, Members from States who have been hurt by this set-aside should ask themselves if in another 5 years, the Great Lakes ports will again ask for another transition period. And if you are a Member who represents a coastal or inland river district in the Sunbelt or Pacific Northwest region, your ports have been hurt by the Great Lakes set-aside.

The constitutionality of the Great Lakes set-aside is also highly questionable, and is sure to be challenged if it becomes law. Allow me to quote from our Constitution, a document we have taken oaths to uphold. Article I, section 9 states, "No preference shall be given by any regulation of commerce or revenue to the ports of one State over those of another." Clearly the Federal Government will be favoring the Great Lakes ports over other ports under this provision, as no other port has ever had cargo guaranteed to them under any government program.

Mr. Speaker, I find it highly ironic that at a time in history when nations from around the world are moving away from command economies, and moving toward market-driven economies, we in Congress insist on having the Government dictate who gets how much Food for Peace cargo instead of having the market determine where the cargo is shipped. Even Mr. Davis Helberg, chairman of the International Association of Great Lakes Ports, agrees that the set-aside is bad public policy. He has stated, and I quote, "The set-aside simply hasn't worked. It was a sop to the Great Lakes to wean us off the Government program. Gulf ports have been highly critical of the set-aside. We agree."

The Great Lakes set-aside also hurts the people the Food for Peace Program was supposed to help: The hungry of the world. Approximately $5.9 million in increased shipping costs due to the noncompetitive handling of Great Lakes ports was spent when the set-aside was in effect. That $5.9 million is money that could have been saved by using more competitive, cost-efficient ports. And of course, more money saved on this program means more food for the hungry of the world—the original intent of the Food for Peace Program.

The Great Lakes set-aside is also strongly opposed by the Bush administration, and its inclusion in the farm bill will give the President another reason to veto this already bloated bill.

Finally, the full House has never voted on, nor debated the Great Lakes Set-Aside Program on its merits. A program of this size deserves to be debated and voted on, not to be hidden behind a rule. I urge my colleagues to defeat the rule. We need a rule which is fair to all regions of the country.

□ 1540

Mr. ANTHONY. Mr. Speaker, will the gentleman yield?

Mr. SHAW. I yield to the gentleman from Arkansas.

Mr. ANTHONY. Mr. Speaker, I would like to associate myself with the gentleman from Florida's [Mr. SHAW] words and comments. The subsidy under the cargo preference is one thing, but this is an additional directive that says that cargo has to go through a certain body of water. It is punitive to the farmers in my region, if we have one set aside for transportation, then it seems to me every major navigation system in the country ought to enjoy the same thing.

I hope the rule goes down for that reason.

Mr. SHAW. Mr. Speaker, I thank the gentleman for his comments.

Mr. HALL of Ohio. Mr. Speaker, I yield 4 minutes to the gentleman from Wisconsin [Mr. OBEY].

Mr. OBEY. Mr. Speaker, I simply rise to correct some of the previous statements being made about the Great Lake set aside.

I happen to chair the committee that provides for foreign aid assistance around the world. One of the problems I face as I take a look at these programs is that I see that the cargo preference provisions in the compromise which was established 5 years ago, raised the cost of foreign food aid by about $150 million. I think the whole story needs to be told.

About 5 years ago in the farm bill, an effort was made which was successful to increase from 50 to 75 percent, the percentage of cargo under food aid programs which would be required to

be shipped under cargo preference provisions, which means on American bottoms. A gentleman a while ago indicated that the Constitution forbids favoring one port over another. The fact is that that provision which was established 5 years ago does just that because the fact is that American bottoms are too large to get through the locks on the Great Lakes, and that means that when we raise from 50 to 75 percent the percentage of American food aid cargo, which is subject to cargo preference requirements, we, in fact, are freezing out an entire section of the country from any participation in any export at all.

To overcome that geographical discrimination which occurs because of an engineering anomaly, the compromise was established 5 years ago. It said, "OK, if you raise from 50 to 75 percent the cargo preference requirements, then we will see to it that that does not have an aberrational effect on the Great Lakes." That is what that compromise said 5 years ago.

Now those who got the increase from 50 to 75 percent would like to continue only one-half the deal. It seems to me that that is not correct. That is why I went to the Committee on Rules and I said that I wanted to be able to offer an amendment to take Members back to the rule that they existed before that so-called compromise was set, because under those rules only 50 percent of the cargo under food aid would be subject to cargo preference, and we would be costing the taxpayer far less. I wanted to offer that amendment because I thought that was the only fair thing to do. The chairman of the committee, the gentleman from North Carolina [Mr. JONES], in an effort to try to avoid an unnecessary controversy, suggested the compromise language which we now have in the legislation today. I happen to think that while that is not what I would have preferred, and Mr. Helberg was quoted a while back. That is not what he would have preferred either. He would have preferred a more fair resolution of this problem as far as Great Lake ports was concerned. I think if he is going to be quoted, he ought to be quoted in context, not out of context.

The fact is that the proposal in the rule right now is the only method by which this body is going to avoid a total opening up of the cargo preference issue, because if those who got the cargo preference percentage increase from 60 to 75 percent 5 years ago, if they want to keep that, then they have an obligation to keep the other side of the bargain. It seems to me that if we want to bring down the rule, then we better be prepared to support a rule which allows Members to offer an amendment to get at the basic problem, which is the cargo preference requirement. If Members want to do that, we can. I predict eventually they will lose that fight.

I am willing to support the compromise here today, but I am not willing to support one section of the country being excluded from all cargo shipments, as would be the case without this language.

Mr. QUILLEN. Mr. Speaker, I yield 3 minutes to the gentleman from Texas [Mr. DELAY].

Mr. DELAY. Mr. Speaker, I rise in strong opposition to the rule granted on the 1990 Omnibus Farm and Welfare Resources Act. This side of the aisle is tired of being the bearer of bad news, but today we are bringing you yet another exceedingly anticompetitive rule. The rule says once again, "let's spend millions of dollars on special interests at the cost of the American taxpayer."

Debate on the rule does not hinge on a partisan issue, such as whether or not we should be subsidizing farm programs, it hinges on an issue that is totally unrelated to American agriculture. The rule does not allow Members, be they Democrat of Republican, the opportunity to strip a Great Lakes set-aside provision from the bill which has cost American taxpayers at least $5.9 million in increased shipping costs due to the noncompetitive prices of Great Lake ports. This is the only title of the farm bill which is unamendable. After giving the Great Lakes shipping industry 4 years to integrate, cargo preference should be a moot issue.

It is ludicrous and outright shameful that the Committee on Rules is trying to say with one hand, "We want to help the American farmer be move competitive," while the other hand is slashing their competitiveness by not allowing all ports to bid on cargo in the Food for Peace Program. The Great Lakes set-aside reserves 20 percent of the Public Law 480 processed and bagged agricultural commodities for few ports. The Committee on Rules is rewarding Great Lake ports for not being competitive. This rule can only be considered fair to a few shipping companies centered around the Great Lakes. Special interests slipped by the Rules Committee, what Congress said last session should not be law. We are inching ever closer to becoming a body that is increasingly susceptible to special interests over national interests.

Lately, I have been receiving letters from the Agriculture Committee telling me not to listen to my urban colleagues who would legislate what they call a disastrous farm policy. I have been hearing a lot of talk about making farm programs more market oriented, more competitive. Where is the Agriculture Committee on this provision which drives up the price of shipping Public Law 480 commodities overseas? The farm sector will be able to withstand a cut in farm handouts. The American economy will not be able to withstand congressional mandates from the Rules Committee.

While many of my colleagues do not agree on farm subsidies, I think they will join me in the belief that farm exports will be the biggest contribution to sustaining the rural economy over the next 5 years. This provision cuts into that economy. A vote against the rule will be a vote for a market-oriented farm bill. This rule is absolutely and unequivocally noncompetitive for the American farmer.

I want to make it quite clear to the Members of this body what they will be voting for. They will be voting for special interests. They will be voting for bad public policy. They will be voting against the constitution. They will be voting against the taxpayer. A vote for the rule is a vote against our American farmers.

□ 1550

Mr. HALL of Ohio. Mr. Speaker, I yield 2 minutes to the gentleman from Texas [Mr. ANDREWS].

Mr. ANDREWS. Mr. Speaker, I reluctantly rise in opposition to this rule because it is so prejudicial to my part of the country and to those States in this country that have ports other than along the Great Lakes.

The Great Lakes set-aside, established as part of the Food Security Act of 1985 and expired in December 1989, was designed to be a temporary measure. Now, because the Rules Committee voted a closed rule on this provision of the farm bill, the set-aside program has been revived.

This is a competitiveness issue:

The Great Lakes ports have been overly compensated for cargo preference, according to the Department of Agriculture. The set-aside gave them three times more business than they would have received without cargo preference.

Sun Belt ports have been paying the price. The set-aside has taken away 75 percent of the Sun Belt's Food for Peace exports.

Despite this, Sun Belt ports have invested in high-technology equipment to become more efficient. Why should these ports work hard to improve their competitiveness, if the set-aside continues to undermine their efforts?

This is a poverty issue:

The set-aside provision in this bill goes farther than ever before. New subsidies would cost nearly $300 million. This money could feed 11 million children worldwide.

This is a constitutional issue:

The set-aside program violates the port preference clause of our Constitution which states: "No preference shall be given to the ports of one state over another." No one has challenged the set-aside yet because it was temporary. If this program is extended again, a

constitutional challenge would surely occur.

I urge you to oppose this rule because it means less food for hunger programs and discourages competitiveness.

Mr. QUILLEN. Mr. Speaker, I yield myself as much time as I may use.

Mr. Speaker, I think we are overlooking an important fact in this debate today. We have had a great deal of debate about the compromise language on the cargo preference for Great Lakes ports. The reason this role prohibits amendments to that compromise is to prevent opening up the whole issue of cargo preference on this bill. Preserving cargo preference is important because it means shipping agricultural products by Americans and not opening up the market to the foreign elements that are such great competitors of this Nation of ours.

We must preserve our merchant marine. I served in World War II, and I know that the merchant marine was the lifeblood of this country of ours. It was the second greatest asset this Nation had, ranking after our military operation. I have seen it go down and down and down, and now here we are arguing that this is not a good rule.

I do not agree with the logic of those who would oppose this rule. I think they are looking at it entirely from a regional point of view and not an American point of view. I think it is important that we adopt this rule and get down to the business of making agriculture grow.

Mr. Speaker, I yield 3 minutes to the gentleman from Wisconsin [Mr. ROTH].

Mr. ROTH. Mr. Speaker, I thank the gentleman for yielding this time to me.

Mr. Speaker, I want to associate myself with the remarks of my colleague, the gentleman from Wisconsin [Mr. OBEY], because I think he was right on the mark when he spoke.

In our Committee on Foreign Affairs we looked at this issue in great detail, and the truth of the matter is that if we add up all the 5 years of the set-asides under the compromise, the Great Lakes get only about 2 percent of the peace cargo, and the gulf coast, including the State of our good friend, the gentleman from Texas, gets 60 percent. But they want everything. Well, there is such a thing as being too greedy, I say to my friends.

I am for this particular rule because I want to protect the compromise that we agreed to. That is all to the good. If we are interested in helping the taxpayers, as many Members say they are, if we are interested in the poor, then we should support this rule, because this is going to save the taxpayers money in title XI, and it is also going to give more and cheaper food at the cost of the taxpayers to the poor of this country.

This looks like a regional fight to me. Some people say this is special interest, and one of the speakers was saying it is prejudiced against Texas. If we look at the S&L crisis that we have today, I suggest we do not have a problem in the Midwest and we do not have a problem in Wisconsin, and we are sending $3.5 billion to Texas.

We talk about regionalism. How much food are we talking about here? We are talking about 1.9 billion tons. How much is going through the Great Lakes? It is only 245,000 tons. That is 1 out of 8 tons that goes through the Great Lakes, but most of the food is produced in the Great Lakes region.

Why not ship the food from the place where it is produced? There is a lot of smoke being blown around here this afternoon. One Member got up and talked about the Constitution and preference. We have given nothing but preference to Texas and Florida, if they want to talk about preference.

Mr. Speaker, let us stick with the compromise. As the ranking member on our side of the Rules Committee said, this should be an American effort, not a regional effort. I think that is right, and I think we ought to vote for the adoption of this rule.

Mr. DELAY. Mr. Speaker, will the gentleman yield?

Mr. ROTH. I yield to the gentleman from Texas.

Mr. DELAY. Mr. Speaker, the gentleman referred to $3.5 billion going to Texas S&L's. I get a little weary and I have getting more weary in the past few weeks about people saying that all the money for the S&L problem is going to Texas. Does the gentleman realize where a lot of that money is going? We are studying it now to find out where that money is going, and does he realize that a lot of that money is going——

Mr. ROTH. Mr. Speaker, I will take back the balance of my time. I will answer his question. Yes, most of the money is going to Texas, because that is where the biggest part of the problem occurred.

Mr. DELAY. Mr. Speaker, will the gentleman let me finish my statement? Will the gentleman yield?

Mr. ROTH. Yes, I yield to the gentleman from Texas.

Mr. DELAY. Mr. Speaker, I appreciate the gentleman's yielding.

Does the gentleman realize that a lot of that money is going to people from other parts of the country that were chasing high interest rates from the S&L's in Texas and California?

Mr. ROTH. There is no State that gets more S&L money than Texas.

Mr. Speaker, I thank the gentleman.

Mr. HALL of Ohio. Mr. Speaker, I yield 3 minutes to the gentleman from North Carolina [Mr. JONES].

Mr. JONES of North Carolina. Mr. Speaker, the last thing the farm bill needs is a bitter debate over cargo preference.

The House had to endure such a debate 5 years ago. We should prevent it from happening this time around.

You will recall that ultimately there was a historic compromise between agricultural and maritime interests in 1985.

Just about everyone would lose if we allowed that historic compromise to be challenged on the House floor.

We need to pass a farm bill this week. It's going to be hard enough as it is. If we get diverted into a cargo preference debate, it's going to be even harder.

As ranking Democrat on the Agriculture Committee, I want to do all I can to get the farm bill passed.

As chairman of the Merchant Marine and Fisheries Committee, I want to make sure that the House doesn't deal with floor amendments that are within our exclusive jurisdiction and which we have not considered.

Today's rule accomplishes this goal.

I went to the Rules Committee and asked for a provision like this. I thank the committee and Chairman MOAKLEY for responding.

I know that some Members are dissatisfied with the Great Lakes set-aside language protected by this rule. But there is no practical way to respond to their concerns without opening up the whole debate on cargo preference again.

Let us remember what our main objective is this week: To pass a farm bill. This rule will help us do that.

I ask all Members to join me to support this rule.

□ 1600

Mr. HALL of Ohio. Mr. Speaker, I yield 2 minutes to the gentleman from North Dakota [Mr. DORGAN].

Mr. DORGAN of North Dakota. Mr. Speaker, I thank the gentleman from Ohio [Mr. HALL] for yielding this time to me.

Mr. Speaker, the rule is a pretty good rule, and I am going to support the rule. It provides for a lot of amendments to be offered. We will have a pretty full debate on farm policy.

Mr. Speaker, I wanted to speak today simply to say that I have been listening to some of the discussion. I heard once again a friend of mine say that the subsidies for the farmers are in this bill, and it occurred to me that, when we get involved in a substantial debate on the farm program, maybe we can really define who is being subsidized in this country.

I had a call the other night from a young farmer who farms down near my hometown, and he said that he can raise wheat for less money than most people, but he said it costs him about

$3.65 because he leases the land from his dad. Mr. Speaker, the target price is $4, but he does not get $4 target price out there because of transportation and other differences. So, he gets a support price that is below his cost of production, and he will not be able to farm too much longer. Like a lot of farmers, he is losing.

Mr. Speaker, when we take arithmetic in school, we learn that, if one gets for his product less than it costs him to produce the product, he will lose money.

Some people say that this farm bill we have in this country works like a charm, almost perfect. I ask my colleagues, "If it is working so well, why does it look so bad in farm country? You go to any community in my State, and turn on Main Street, and ask yourself, 'Is this town living, or is it dying? Are the farmers making it, or are they failing?' "

Mr. Speaker, the answer is: The town is dying, and the farmers are failing. This farm policy does not work, and we need to change it.

Hopefully in the next day, when we have this debate, we can talk about the enormous subsidies to the consumers of this country who have the best quality food for the lowest percent of disposal income for any people in the world, whether that policy can be made to work for those who produce the food. I ask my colleagues, "Why can't we produce a price for those family farmers that develops a philosophy in the farm bill that says, 'We want them to be able to make it?' "

Mr. Speaker, this is a program without a philosophy, and we need to attach a philosophy to it that says we want support prices for family-sized farms that give them a chance to make a decent living. If we do that, we will succeed.

Mr. HALL of Ohio. Mr. Speaker, I yield 4 minutes to the gentleman from Wisconsin [Mr. MOODY].

Mr. MOODY. Mr. Speaker, I appreciate the time.

Mr. Speaker, I would remind our friends on both sides of the aisle who are opposing the rule that we are only talking about 2 percent of the cargo, 2 percent. We are not asking for much in the Midwest. A little equity, please. Two percent is not too much to ask.

Second point: What we have today before us, yes, it is a closed rule for this section. Why? Because it is a compromise, a delicately crafted compromise that has been put together.

I say to my colleagues, "You open up any compromise, and you know what happens? You start ripping it apart."

Mr. Speaker, it is a compromise. It is not what we like. We have had to swallow it. We have had to swallow it in the Midwest, and we are willing to do our share. But do not rip it open and start changing it now after all the careful negotiations that are so important.

In addition, bear in mind, my friends who are opposing this rule, that this compromise scales the cargo preference down every single year, and now it is down to zero. It phases out. That is not what we want, but that is what we have had to accept.

Third point, the one the gentleman from Texas [Mr. DELAY] raised about competitiveness. As my colleagues know, if we really want to be competitive, let us just get rid of the U.S. cargo requirement. We in the Great Lakes will do fine then because we have foreign-ship owners, foreign-flag ships, coming to our region. I say, "You let that carry the food for peace, and we're in great shape."

Mr. Speaker, that is not what we are doing. We are insisting on U.S. cargo which is not competitive. It is anticompetitive, I say to the gentleman from Texas [Mr. DELAY], to insist on U.S. cargo. Flag it? Do my colleagues want to do that? Fine, but that is what is causing us the problem. It is a noncompetitive agreement that we will not allow foreign carriers to carry the food that makes us at a disadvantage because we only have non-U.S. carriers.

I say to my colleagues, "If you want to argue the competitive argument, fine. Then let's go all the way."

However, Mr. Speaker, that is not what is at stake here. People do not want to scrap U.S.-flag carriers, but, if my colleagues want to keep it, then do not disadvantage us distinctly, as that is what would be done if we took away this.

We are talking about competitiveness and cost. Remember cargo preference costs $150 million, the cargo preference feature, the U.S.-flag carriers. We are talking about 6 million out of 150 million. Let us put this in proportion.

Finally, Mr. Speaker, I have heard regional arguments here. It is painful for me to see my friend from Texas in some of the gulf areas that have had a lot of problems with financial institutions. Yes, it is not all their money, but a lot of it is. It is painful for me to see them who have the super collider, which we support, the S&L bailout, which we support, to stand on the floor and say they do not want us to have 2 percent of the cargo because of the preference for U.S.-flag barriers that we did not create.

Mr. FIELDS. Mr. Speaker, will the gentleman yield?

Mr. MOODY. I yield to the gentleman from Texas.

Mr. FIELDS. Mr. Speaker, the gentleman from Wisconsin [Mr. MOODY] is not talking strictly about Texas. He is talking about 18 States, 42 ports, that are not able to compete for 20 percent of the Public Law 480 cargo, not 2 percent, 20 percent, that has been set aside for the Public Law 480 Food for Peace Program. That is what we are talking about.

Mr. MOODY. Mr. Speaker, I agree with the gentleman from Texas [Mr. FIELDS] that it is not just Texas. I say that it is painful for me to see my Texas friends get up and do this. I did not say there were no other States involved. It is painful for me to see my friend from Texas make this case when we all understand that a lot of money is going to have to go to Texas to bail out the S&L's.

Mr. Speaker, competitiveness is a board with many dimensions to it. We are competitive, and if my colleagues took away the special fees we have had to pay because of the St. Lawrence Seaway; if the St. Lawrence Seaway were an open sea, as is available to the Gulf States and other States, we would be very competitive. We are extremely competitive in the cost of shipping and loading cargo within the port. It is that extra set of charges that we have to pay because, to get at the fourth coast, the Great Lakes coast, which puts us at a disadvantage. So, do not saddle us with extra disadvantages when, in fact, it is the cargo preference for U.S. carriers which puts us in this predicament in the first place.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, those opposing the rule are using smoke and mirrors. What they really want is the defeat of this rule to open up the issue of cargo preference to amendment. I think it is just absolutely asinine to scuttle a farm bill and be here 2 or 3 days extra, if they win.

Mr. Speaker, I urge support of the rule so we can get down to debate on the farm bill.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. HALL of Ohio. Mr. Speaker, I yield 2 minutes to the gentleman from Wisconsin [Mr. KLECZKA].

Mr. KLECZKA. Mr. Speaker, I thank the gentleman from Ohio [Mr. HALL] for yielding this time to me.

Mr. Speaker and Members, I rise in strong support of this rule and especially the Great Lakes set-aside provision contained therein.

As has been discussed today, the bill will provide specified amounts of commodities donated under the Food for Peace Program to be shipped through the Great Lakes ports. This provision expired in 1989. Since then the ports have had no shipments whatsoever. As indicated by the gentlemen from Wisconsin Mr. MOODY, Mr. ROTH, and Mr. OBEY, they were talking about a very small portion of the Food for Peace Program, some 240 tons. The provision reinstates this set-aside which was in-

cluded, as I indicated, in the 1985 farm bill.

Presently, cargo preference provisions require 75 percent of Federal food aid to be carried on U.S.-flag vessels. Due to the lack of regularly scheduled international service by U.S.-flag ships in the Great Lakes, cargo preference requirements severely limit ports in Wisconsin and elsewhere on the Great Lakes from participating.

Making matters worse for Great Lakes, under current cargo preference provisions relating to food aid, foreign vessels which have changed to U.S.-flag ships must wait 3 years before being eligible to carry cargo reserved for U.S.-flag vessels. Fortunately for Food for Peace cargo, H.R. 3950 also waives this 3-year waiting requirement.

Mr. Speaker, eliminating the 3-year wait for newly flagged American vessels will allow more food aid cargo to be shipped through the Great Lakes ports. In addition, once U.S.-flag vessels are operating in the Great Lakes, future set-asides should be unnecessary to allow ports there to compete for food aid cargoes.

Mr. Speaker, Food for Peace cargo is important to the economies of the Great Lakes States. It means jobs and business for these areas. The Great Lakes have shown their desire and ability to participate in this shipping. They deserve to be allowed to do so.

Mr. Speaker, I urge my colleagues to support, not only the rule, but also the set-aside provision of the rule.

□ 1610

Mr. HALL of Ohio. Mr. Speaker, I yield 2 minutes to the gentleman from Minnesota [Mr. OBERSTAR].

Mr. OBERSTAR. Mr. Speaker, I thank the gentleman for yielding this time to me.

Mr. Speaker, this Nation, this great Nation of ours, was built on comity, not on one region of the country fighting against another.

In the Committee on Merchant Marine and Fisheries, although I am on leave and have been for the last 4 years while I serve on the Budget Committee, I will be coming back in the next 2 years, I voted for the title XI guarantees to be used for oil drill rigs in the gulf, when other members of the committee were voting vigorously against it, and we passed it.

I supported protection for the shrimp fishermen in the gulf when it did not do anything to benefit the people in my region, and I supported the 75-percent cargo preference, even though that would not do anything for the Great Lakes.

Mr. Speaker, this is not an argument of one coastal range against another. This is an argument of U.S. flags against foreign flags, in which our two coasts are caught, and because the U.S.-flag operators refused to serve the Great Lakes ports. The longshoremen who are out of work in the Great Lakes ports are members of the same unions as those who serve the east, the gulf and the west coasts, and the seafarers of the Great Lakes who are out of work because we do not get those cargoes are the same members of the same union who are working on the east and the gulf coasts.

When we reached a compromise in the 1985 farm bill that there would be 75-percent cargo set-aside for U.S. flags, they said, "We will serve the Great Lakes," and they did not, except for one season when Lykes came into the lake for one season.

Now we have fashioned another proposal, and all of us should benefit, all regions of the country should benefit from this shipment. On a declining basis, over 5 years building down to zero, the set-asides that have been in place will cease to exist.

It is the same tonnage as in 1985, 5 years ago. We do not grow. We do not increase. Our ports do not get a larger share of the cargoes. It is on a declining basis.

I want to tell my colleagues from the gulf and the east coast that if the Great Lakes ports and interests cannot under the terms of the language in this bill develop a U.S.-flag service to the Great Lakes, this Member will not be back in the Merchant Marine and Fisheries Committee or on the floor or in any other forum arguing for a preference, because they will have shown that they cannot deliver.

All we are asking in the interim is for a little bit of equity, and that is all we ask.

Mr. ORTIZ. Mr Speaker, I rise in opposition to the rule and wish to express my opposition to the Great Lakes set-aside. I do, however, continue to strongly support cargo preference laws for the merchant marine.

Mr. HUTTO. Mr Speaker, I strongly object to the rule allowing consideration of the Food and Agricultural Resources Act. This rule does not allow the proper House debate on the addition of a 5-year Great Lakes cargo set-aside program. The addition of set-aside language to the farm bill bypasses the will of the majority of the House Merchant Marine and Fisheries Committee members.

This rule protects a so-called compromise on the Great Lakes cargo set-aside by not allowing debate or amendment to H.R. 3950 on this issue. No member opposed to a Great Lakes set-aside has agreed to this compromise; therefore, no compromise has been reached. As a member of the Merchant Marine and Fisheries Committee, I have been denied the right to express my opposition to the Great Lakes cargo set-aside at either the committee level or in this Chamber.

I represent two ports on the Gulf of Mexico who ask nothing more than to compete on a level playing field with all other U.S. ports for cargo. My ports do not ask for any assistance or set-asides, just the right to compete. Furthermore, the Great Lakes cargo set-aside program has in the past cost the American taxpayers million of dollars in increased shipping costs.

I object to the rule allowing consideration of the 1990 farm bill due to the restrictions protecting a Great Lakes cargo set-aside program.

Mr. HALL of Ohio. Mr. Speaker, I have no further requests for time. I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. FIELDS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 283, nays 80, not voting 69, as follows:

□ 1634

The Clerk announced the following pairs:

On this vote:

Mr. McNulty for, with Mr. Craig against.

Mr. Pashayan for, with Mr. Packard against.

Messrs. FLIPPO, LENT, BROWDER, COLEMAN of Texas, BEVILL, BRYANT, McCRERY, DICKINSON, and STEARNS changed their vote from "yea" to "nay."

Mr. GALLO and Mr. PARRIS changed their vote from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. DIXON. Mr. Speaker, I regret that I could not be here today to vote on the rule on the Food and Agriculture Resources Act of 1990, H.R. 3950. I was in Los Angeles with several of my colleagues participating at a field hearing on Economic Adjustment, Diversification, Conversion and Stabilization—an issue that is important to the Los Angeles area given the cutbacks in defense spending and the termination of weapons programs.

If I had been here, I would have voted for the rule on the Food and Agriculture Resources Act, which is a 5-year authorization that would provide vital funding for programs ranging from nutrition to crop subsidy.

PERSONAL EXPLANATION

Mr. MORRISON of Connecticut. Mr. Speaker, I was unavoidably absent and missed rollcall vote No. 257, which occurred on House Resolution 439, the rule on the 1990 farm bill. Had I been present, I would have voted "yea."

PERSONAL EXPLANATION

Mr. NELSON of Florida. Mr. Speaker, had I been present I would have voted "yea" on rollcall No. 257.

PERSONAL EXPLANATION

Mr. TORRES. Mr. Speaker, I was unavoidably absent on official business during rollcall vote 257. Had I been present on the House floor I would have voted "aye" on House Resolution 439, the rule providing for consideration of the farm programs reauthorization legislation.

PERMISSION FOR COMMITTEE ON THE JUDICIARY TO SIT DURING 5-MINUTE RULE ON TUESDAY, JULY 24, 1990, AND WEDNESDAY, JULY 25, 1990

Mr. BROOKS. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be permitted to sit during the 5-minute rule tomorrow and the next day.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mrs. VUCANOVICH. Mr. Speaker, reserving the right to object, I yield to the gentleman from Texas [Mr. Brooks] to ask if this had been cleared by the minority.

Mr. BROOKS. Mr. Speaker, it has been cleared by the ranking Republican on the Committee on the Judiciary.

Mrs. VUCANOVICH. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore, (Mr. MONTGOMERY). Is there objection to the request of the gentleman from Texas?

There was no objection.

FOOD AND AGRICULTURAL RESOURCES ACT OF 1990

The SPEAKER pro tempore. Pursuant to House Resolution 439 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 3950.

□ 1637

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3950) entitled the "Food and Agricultural Resources Act of 1990," with Mr. BONIOR in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the bill is considered as having been read the first time.

The gentleman from Texas [Mr. DE LA GARZA] will be recognized for 1 hour; the gentleman from Illinois [Mr. MADIGAN] will be recognized for 1 hour; the gentleman from Florida [Mr. FASCELL] will be recognized for 15 minutes; the gentleman from Wisconsin [Mr. ROTH] will be recognized for 15 minutes; the gentleman from Florida [Mr. GIBBONS] will be recognized for 15 minutes; the gentleman from Illinois [Mr. CRANE] will be recognized for 15 minutes; the gentleman from Michigan [Mr. FORD] will be recognized for 15 minutes; and the gentleman from Pennsylvania [Mr. GOODLING] will be recognized for 15 minutes.

The Chair recognizes the gentleman from Texas [Mr. DE LA GARZA].

□ 1640

Mr. DE LA GARZA. Mr. Chairman and my colleagues, this is the third opportunity that I have had to present to my colleagues in the House of Representatives a farm bill since becoming chairman in 1981.

It is also the first opportunity for me to tell my colleagues that this is perhaps the most comprehensive, progressive, forward looking piece of legislation that our Committee on Agriculture has ever handled.

I find myself in a very awkward situation, though, Mr. Chairman and my colleagues, for whatever reason major media have portrayed what we do here today or what we begin today as a very small "yes or no" question and they have ignored the entirety or the immensity of what this legislation is all about.

It is being reduced only to, "Are you going to help the big guy or the little guy?" Or, "Are you going to give money to the big farmer, the undeserving?"

That seems to be the issue that brings us here, and it is not.

We have in this bill 18 titles. If I could, I would like to give you the anatomy of a farm bill.

It began 2 years ago. We began 2 years ago, our subcommittees, going out to the people. It has been said here, by a Member, unbelievable as it may seem, that we sit there and we divide and we throw a bit here and we throw a bit there.

Mr. Chairman, we went to the people. This is grassroots legislation.

The subcommittees held over 30 hearings. We went throughout the country. I went to as many as I could. So did the chairmen of the subcommittees, the members of the committees, ad hoc committees, we went out there 2 years ago, and we heard.

We heard from the farmers, ranchers, from implement dealers, from automobile dealers, from bankers, from conservationists, from environmentalists, from consumers, from segments of the agribusiness sector. We heard from all of them.

Then we came back to Washington. We had hearings here in Washington, and we asked anyone that was interested in coming.

Then we began the process of drafting or crafting what we bring you here today. It is a very comprehensive bill. It goes to the depth of the food and fiber needs of this country. It is, indeed, for the best interests of our national security.

Mr. Chairman, we are the best fed people in the world, in the history of the world, for the least amount of disposable income per family, of all the major industrialized countries in the world.

Not that there is not hunger in America. There is. But it never has been the fault of the farmer. The food has been there.

We will hear about foreign assistance, taking food to hungry people, from the taxpayers' money. We will give, from your money, the product of our blood and sweat tears as we have done throughout the history of our country, to bring food to those who suffer.

We lost one of our Members, our former colleague Mickey Leland of Texas. Do you know what he was doing out there in Africa? He was negotiating between competing factions and tribal factions, so that they would allow us to bring the bounty from our country to the needs of people out there.

That is our commitment. That is our commitment, and his commitment. Little did he know when he made it. A child died in his arms of hunger and malnutrition—and he said he was committing his life to aid those. Little knowning that he would, not too long thereafter, be giving his life.

We have incorporated his commitment into this legislation.

Also, we have problems. There is a saying in south Texas, an old Spanish saying, "If you go on the land and you don't feel the vibration, forget it, it is not going to grow for you. You don't belong." That is what farming is all about.

Some of my colleagues ask: Why does someone stay in farming when year after year he loses, when he does not make a crop? In part of my congressional district, it has been the fourth year without rain. It is their commitment to making things grow that keeps them on the land.

Should Government intervene or in any way intercede? Of course it should. I think the basic answer is that we have a moral responsibility to see that the people of the United States are fed, properly so, at the least cost possible.

Supply and demand is not going to do that, we already know.

Now they will be aiming at this piece of legislation about what it is we are doing, for whom it is we are doing it, and cost.

First let me show this chart. Almost 50 percent, all of that area here, is feeding the hungry. All of that, almost 50 percent, is feeding the elderly; school lunch, and the Women, Infants, and Children Program. This is spending for the whole Department of Agriculture. If you would just shut down the Department of Agriculture, 50 percent would be assistance to the needy and the hungry.

Only this part here is what we deal with, with farmers, about 17 percent.

Now here is where we fit in with government. It is almost embarrassing that we who feed all of the people of this great country of ours have enough left to sell abroad.

You know that we have an unfavorable balance of trade except in agriculture? They are not buying what we manufacture except for some very high technology items. They are only buying what we produce. That is the only thing bringing money back from abroad. But where do we fit in Government spending priorities? Defense, Social Security, and so forth, they have already spent 99 percent of the budget by the time they get to agriculture.

Let Mr. Darman see that, let our friends in the summit see that. It is almost embarrassing that 99 percent is already spent by the time you get to agriculture. And we feed everyone, we feed the hungry around the world and we help bring money back from abroad.

Now let me show you the shocker, because there will be some debate about the high cost of the programs and that you are giving it to some farmers not to plant.

That is not the issue. We will address that when the amendments are offered.

But the totality of what we do and the efficiency and dedication and commitment of American agriculture, small or medium or large, whatever the income, their commitment is to see that we have the food and fiber available.

How much of an impact do they have on the total Federal budget? The graph shows you, $1.23 trillion, $1 trillion plus. This is what we will be discussing here and what amendments will be offered and the arguments will be made that "This fellow shouldn't be getting money," or, "That fellow shouldn't be getting that much. You are throwing taxpayers' money away."

But we forget that we are the best-fed people in the world, in the history of the world for the least amount of disposable income per family.

What is it that we do? What impact do we have on the budget? Well, there it is. See that little black line at the bottom? That, my friends, is your taxpayers' money that goes to the producers of America who participate in our programs, 0.63 percent, six-tenths of 1 percent of the total Federal budget.

□ 1650

Six-tenths of 1 percent of the total Federal budget. We will later get to it, but that lady from HUD, and that lady from California, and Mr. whatever his name is in New York, I could point the finger at many people who took more money than that during the lunch hour, from your taxpayers' money. It is sad that we would be in a situation where the major question is going to be the cost to the Government. There is your cost to the Government from USDA, according to the Congressional Budget Office figures. No one can challenge that. That is the cost.

Now, someone may embellish it. Well, yes, we have an income tax. We have this. We have that. There it is. Right there. I want Members to keep in mind, as we debate this legislation, and there are issues discussed as to cost, keep in your mind that is what we are speaking about, 0.63 percent.

Now, dear friends, let me say later we will articulate the issues and dis-

cuss the issues. We will be discussing cotton and wool and mohair, and we will be discussing peanuts, and we will be discussing sugar. This bill is very progressive and enviornmentally sound. We have involved ourselves in protecting the ecosystem. We have added environmentally progressive sections to this legislation that will put this Congress down in history, should it be finally approved, as the most progressive environmentally oriented group ever, since we began concerning ourselves with the environmental issues. We have done that.

Trade, we have told and we have sent the message to our competitors that we want a level playing field. Now, whatever they do at Geneva and the GATT, that is for them to do. Here we are, doing what we need to for the reason that we need to do them here. Later, we will put them together, and we will see where they come out, and we wish them well in Geneva, for we need a level playing field. We have sent the message to our competitors, "We will do what you do and go you one better." No question about that. But even then it has not cost all that much. We will have programs to feed the elderly. We will have planting flexibility. We will meet our responsibility to the budget problem, I can assure Members. Friends, this is a most responsible bill, budgetwise. We are below budget. We are below baseline. If we would be, we would see that we were. We have been fiscally responsible. We will continue being fiscally responsible.

I would say at this time that this legislation merits our support. We will discuss it. Perhaps it could be better. That is the process that we will follow, but as of now, we bring Members a bill that is fiscally responsible, and one that meets the concerns and needs of the American people, and this great country of ours.

Mr. Chairman, this is one of the most important pieces of legislation we will consider this year, the Food and Agricultural Resources Act of 1990.

Most of us know this bill as the agricultural bill or the farm bill. But this legislation—which we generally take up every 4 or 5 years—has been much more than a farm bill for quite some time.

In reality, all Americans are touched by the provisions contained in this legislation.

The proposed policies and programs contained in H.R. 3950 affect virtually every aspect of the Nation's well-being: food and fiber production, farm income protection, resource conservation and environmental quality, human nutrition, export promotion and overseas food aid, agricultural research, and domestic food assistance.

We have named this bill the Food and Agricultural Resources Act to reflect what we believe should be the primary thrust of this legislation; namely, a commitment to protect the basis of food production in our country.

Our Nation's food and agricultural resources make up a national asset that Americans cannot afford to take for granted or ignore.

Other countries—in Western Europe, the Soviet Union, Japan, and China—all look with envy on our productive and efficient agricultural sector.

All American consumers benefit from the success of the U.S. agricultural system. American families spend less than 12 percent of their disposable income on food, the lowest in the world and half of what was spent 50 years ago.

What does it cost us to be the best-fed people for the lowest price with the best quality, the safest food supply in the world?

It costs us less than 1 percent of the Federal budget. I submit to you that the American people are getting a very good deal.

Mr. Chairman, H.R. 3950 has many specific objectives, but as stated in the report to accompany the bill, it has one primary goal:

To foster an economic climate in which the largest possible number of efficient American farmers can survive, prosper, and produce—in an environmentally prudent manner—a safe, adequate, and affordable supply of food and fiber for American consumers and millions of others around the world.

BUDGET

Members of the Agriculture Committee are very conscious of the budget constraints our Nation faces.

The committee has made a great effort to keep the cost of these programs within the budget targets as specified in the House and Senate budget resolutions and the Congressional Budget Office baseline estimates.

This was not an easy task. During committee consideration, we made a number of painful choices to drop subcommittee-approved measures that would have provided for indexing of target prices to inflation.

On top of that, we adopted other measures to reduce spending in a number of areas in our final committee action on the bill.

At the time the committee reported the bill, unofficial estimates by the Congressional Budget Office put us $1 million under baseline spending for fiscal 1991 farm spending by the Commodity Credit Corporation [CCC].

Now that they have had time to look at things more closely, CBO estimates CCC spending is about $11 million under the baseline for next year. This is for the Agriculture Committee reported bill.

However, as amended by the Committee on Ways and Means, the CCC spending is now $73 million over the baseline.

Mr. MADIGAN and I will, if necessary, offer additional amendments at the appropriate time to reduce the costs of this bill further and bring us closer to the CBO baseline target.

DAIRY BUDGET BASELINE

The Agriculture Committee has adopted, with the concurrence of the House Budget Committee chairman, the Senate's budget resolution baseline for agriculture spending with respect to the Dairy Program.

Under the CBO baseline, the assumption is that the dairy price support level would continue to decline $8.60 by 1995. We are currently at $10.10 per hundredweight. Quite frankly, a lower dairy price support level would ruin thousands of dairy producers across the country.

The Senate budget baseline and the Senate farm bill includes an increase in spending over the CBO baseline levels to accommodate a dairy price support floor of $10.10 through 1995. This results in approximately $1.5 billion in additional spending above the CBO baseline.

This accommodation keeps dairy on an equitable basis with the other commodity programs which are having their support levels frozen in this bill. And it will allow us to make equitable cuts across commodity lines once a budget agreement and spending reductions are agreed to by Congress.

FARM BILL TIMING

Some people in the administration and here in Congress have expressed an opinion that maybe we should wait for the budget summit before we finalize this farm bill.

Others have said that with the General Agreement on Tariffs and Trade negotiations scheduled to conclude later this year maybe we should pass a 1- or 2-year bill in anticipation of a GATT agreement.

We are all aware of the possibility that the current budget summit negotiations may result in instructions to achieve further spending reductions beyond what the House and Senate budget resolutions call for.

We are all aware that the Uruguay Round of GATT may result in a trade agreement that, if approved by the Senate, may result in a need to change agricultural policy next year.

But we have no idea whether a budget agreement will be reached next week, next month, or the month after that. Nor do we have any idea of what programs will be affected and how much may have to be cut.

Since 1981, the Agriculture Committee has reduced projected spending over $32 billion. We on the Agriculture Committee stand ready, as we have done in the past, to meet the reconciliation target adopted by the Congress.

Nor do we have a crystal ball to predict the outcome of the GATT talks. We wish our trade negotiations in Geneva the best. We hope they are able to forge a trade agreement that is fair and reasonable for American agriculture.

But we don't know if a GATT agreement will happen, and we cannot predict how the next Congress will respond. It's because of these uncertainties that Congress must pass a farm bill as soon as possible.

We cannot hold farmers hostage by the budget summit or the GATT talks. A farmer's crops cannot wait to be planted for decisions that are being made here in Washington or over in Geneva.

Farmers need to have some idea of the kind of farm programs they can expect to see available for the next crop year. This bill provides a good and reasonable blueprint for agricultural policy over the next 5 years.

Mr. Chairman, I would like to point out what I see as the seven major objectives of H.R. 3950:

First, we provide a reasonable price and income safety net for farmers within current Federal budget constraints.

This bill stops the decline in price and income safety net protection provided to

American farmers. Income protection—or target prices—for all the major commodities is frozen at current 1990 levels for the next 5 years.

A slight increase in price supports—or loan rates—for wheat and feed grains is provided, following 5 years of steady cuts in loan rates since 1985.

A new, no-net-cost marketing loan is authorized to protect the income of oilseed producers and regain U.S. competitiveness.

The minimum dairy price support level and the sugar loan rate are frozen at current levels for the next 5 years. Authority for other commodity programs—peanuts, wool and mohair, and honey—is continued with minor changes.

Furthermore, this bill continues current limitations placed on Government payments to farmers. The bill keeps in place the current $50,000 limit on deficiency payments a producer can receive under the wheat, feed grain, cotton, and rice programs.

The bill extends the $250,000 limitation on combined Federal farm program benefits that a single person can receive. H.R. 3950 also imposes the first-ever payment limits on wool and mohair producers.

Second, we increase food assistance for our Nation's needy.

Our Nation faces a growing urban and rural poverty problem with one of every six rural Americans and one of eight urban residents living below the poverty line. Between 2 and 5 million children go to bed hungry each night.

H.R. 3950 tackles the inadequate diet and hunger low-income families and the homeless face by providing increased benefits under the Food Stamp Program. These increased benefits are provided for in the House budget resolution.

Also reauthorized are The Emergency Food Assistance Program [TEFAP] and other food donation programs that serve food banks and soup kitchens. These domestic food programs account for nearly half of annual U.S. Department of Agriculture expenditures.

But we are not just throwing money at the problem. We strengthen the efforts to help people become self sufficient. And we are also proposing a new and stricter measures to crack down on illegal food stamp trafficking and other abuses.

Third, we significantly strengthen our efforts to preserve wetlands, protect soil and water resources, and improve environmental quality.

This bill extends and improves the successful and effective resource conservation measures put in place by the 1985 farm bill—the Conservation Reserve Program, sodbuster and swampbuster restrictions, and conservation compliance planning.

In addition, a wide-ranging package of new measures to help American agriculture better conserve its natural resource base, preserve our Nation's vanishing wetlands, and protect water quality are proposed in H.R. 3950.

This bill proposes programs that will encourage farmers to reduce pesticide and fertilizer use.

The bill also establishes the first-ever Office of Environmental Quality within the U.S. Department of Agriculture.

We also propose a new forestry title as part of H.R. 3950 that, among other things, will encourage State and private tree planting, particularly in our urban areas. We also call for establishment of the America the Beautiful Foundation which is supported by President Bush.

Fourth, we strengthen our agricultural export promotion programs to protect taxpayers and to counter foreign subsidies and unfair trade practices.

Major reforms are made in the administration of our export promotion programs to prevent abuse.

These programs, the Export Enhancement Program, the Market Promotion Program, and the export credit guarantee programs, help American farmers regain world market share against the massive agricultural subsidies and unfair trade practices used by other nations, particularly the European Community.

We set the funding of EEP at not less than $500 million annually and the MPP at not less than $200 million annually.

Fifth, we streamline the delivery of Public Law 480 overseas food aid.

These important changes in the Public Law 480 section of the trade title are the result of compromise language worked out between the Committee on Agriculture and the Committee on Foreign Affairs.

I believe the language reported by the Agriculture Committee incorporated significant changes to make our Food for Peace Program more efficient. However, I respect the views of our colleagues on the Foreign Affairs Committee and I am pleased that we were able come to develop this compromise language for Public Law 480.

The compromise provides that in administering the Public Law 480 program, the U.S. Department of Agriculture will have primary responsibility for administering the concessional sales program.

The Agency for International Development will have primary responsibility for administering the title II humanitarian assistance program and the new title III, government-to-government grant program.

Debt forgiveness, administrative funding for enhancing activities of private voluntary organizations, and multiyear commodity availability provisions, which were contained in both committee bills, are maintained. We also ensure the availability for assistance for emerging democracies.

This bill also imposes new and stiffer requirements on country agents and ship brokers to avoid conflicts of interest and to promote competition.

Sixth, we provide greater planting flexibility for farmers.

H.R. 3950 gives farmers more flexibility to plant crops the market wants rather than "farming the programs" to get Government payments as has occurred under current law.

Up to 25 percent of a farm's cropland can be planted to corps other than the base crop without loss of crop base acreage. This so-called flex acreage is not eligible for any Federal deficiency payments.

Seventh, we significantly expand agricultural research to meet the challenges of the 1990's.

To keep U.S. agriculture competitive and to address growing environmental and food safety concerns, H.R. 3950 authorizes $500 million annually for competitive research grants in the food and agricultural sciences.

The bill also reauthorizes existing agricultural research and extension programs used by USDA and the land-grant university system.

New research initiatives are established in the areas of sustainable agriculture practices, agricultural telecommunications, weather information, water quality, pesticide use, and new product/industrial use development, food safety, and biotechnology risk assessment.

CONCLUSION

Mr. Chairman, these are just a few of the many provisions contained in this legislation. This is not a perfect bill by any means.

But it is a fair and reasonable bill that provides, in my estimation, a proper balance of the needs of American agriculture, the American consumer, and our Nation.

I want to emphasize that the committee and our eight subcommittees have worked long and hard on this legislation. Our oversight of the Food Security Act of 1985 and subsequent legislation has been extensive.

We began formal hearings on the 1990 farm bill in May of last year. Our eight subcommittees and the full committee have held hearings here in Washington and we reached out to the American people by traveling to every region of the country to hear their views.

We have heard testimony from hundreds and hundreds of people. We listened to all sides and our markup sessions often reflected the conflicting views presented.

This bill represents a consensus approach. It represents a continuation in many respects of the market-oriented philosophy of the 1985 act. But it also recognizes that continual cuts in farm price support levels are unacceptable.

For more than 50 years, the American people and their representatives in Congress have supported programs to provide income and price stability to American agriculture.

We have done so because we understand the importance and benefits of a stable, affordable, and safe food supply for consumers and our Nation's economy.

We care about the welfare of American farmers, their families and the communities of rural America. This legislation continues that commitment.

Mr. SMITH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. Mr. Chairman, I commend the gentleman both for his leadership on the committee and also for his statement. It was very good.

I want to also ask if this is true: The Commodity Credit Corporation as the gentleman pointed out, is only 63/100 of 1 percent of our budget. Included within that, however, is the cost of the reserve program. The reserve program is used to carry basic commodities from years of surplus to a year when there would have been a shortage. That program is for the purpose of stabilizing storable agriculture supplies and keeping them at a very reasonable price. A computer study was just completed and reported last week.

The study done by Iowa State University and Missouri University which showed that, but for the reserve program and the products available under that program over these last 2 years, the shortage caused by the drought, the cost to the consumer between now and 1996 would have been an additional $40 billion. Now, that is consumers who are going to save that.

In addition to that, the $27 billion we are spending for the Government food program of which $19 billion is for food stamps, that $27 billion cost for food for the poor would go up probably to somewhere between $37 and $47 billion. So we are saving, really, just with the reserve program, we are saving as much as the whole cost of CCC.

Mr. DE LA GARZA. Mr. Chairman, I thank the gentleman for his contribution, and the gentleman is correct. This is a consumer piece of legislation.

Members may disagree, but this study shows that the consumer has benefited $40 billion for having those stocks in place. We have just heard that supply and demand does not work. We have had a freeze in Florida. We had a freeze in Texas. Since we do not have an ample supply of orange juice for the women, infants, and chilben, for the school lunch programs, the Committee on Appropriations has had to commit about $150 million just for that simple reason.

In the commodities that we deal with, they are there, they are available, and had it not been for those commodities, and I am speaking to those that may be bringing amendments, pointing the finger at Members, we would not have had the availability of the food at those reasonable prices.

Mr. Chairman, let me express my appreciation to all the members of the committee who worked so diligently on this bill. We have differences of opinion. That happens in any family. To the chairman of the other committees, the Committee on Foreign Affairs, the Committee on Merchant Marine and Fisheries, the Committee on Education and Labor, the Committee on Ways and Means, they and their staff have been most amenable to cooperate. We have worked together. Basically we have been able to resolve almost all the issues that we had with other committees. The staff of our committee, working with the other committees, have been here to 4 o'clock in the morning, 4:30 in the morning, all but for one purpose in mind, and that is that we bring into this floor legislation that, hopefully, might keep Americans as the best-fed people in the world.

Mr. FASCELL. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I yield to the gentleman from Florida.

Mr. FASCELL. Mr. Chairman, let me add my commendation and congratulations to the chairman of the committee. Indeed, we have worked very hard together, the Committee on Foreign Affairs, the Committee on Agriculture on title XII, and I know he has had the same experience with the others.

I want to pay my respect, and thank also the staff of the full committee as well as my own staff, because they did spend long hours in bringing about a compromise, which I think all Members are real pleased with, on title XII.

Mr. Chairman, I rise to express my strong support for the compromise amendment to title XII, international food assistance and trade programs, to be offered by Congressman GEJDENSON on behalf of the Committe on Foreign Affairs and the Committee on Agriculture. This carefully constructed compromise recognizes and respects the strong jurisdictional interests of both the Committee on Foreign Affairs and the Committee on Agriculture, with regard to these programs.

I would like to congratulate Mr. GEJDENSON and Mr. DE LA GARZA for the extensive work they have done to revise and reform Public Law 480, Food for Peace. The compromise amendment ensures that Public Law 480 programs meet the objectives we all share: providing U.S. food to hungry people and to countries unable, because of poverty, to meet their own food requirements, and at the same time, helping to build markets for the commercial sale of U.S. agricultural commodities.

One of the important reforms contained in this compromise is to limit the number of agencies of the executive branch directly involved in the day-to-day operations of food assistance programs. Currently, food assistance programs are governed by an interagency committee made up of five government agencies. Decisionmaking is frequently slow, and commodity shipments are delayed.

The compromise amendment remedies this situation by requiring the President to designate the Secretary of Agriculture as the official with primary responsibility for administering the title I concessional sales program and to designate the administrator of the Agency for International Development as the official with primary responsibility for administering title II and title III grant programs.

Provision of U.S. food assistance inherently involves both the Agency for International Development and the Department of agriculture, a fact which has made crafting the compromise we will be considering a difficult and lengthly task. The representatives of the Committee on Foreign Affairs and the Committee on Agriculture have been sincere in their determination to create greater accountability for food assistance by assigning more specific responsibility to each of these two agencies to administer Public Law 480 programs, recognizing the legitimate concerns and areas of the expertise of the two principal agencies and the areas of overlapping responsibility, which make it impossible to separate responsibilities as neatly as some might prefer.

The compromise amendment does not intend that either the Department of Agriculture or the Agency of International Development should become involved in activities outside their areas of expertise and responsibility

The Department of Agriculture, for example, should not have responsibility for economic development programs and projects in recipient countries—that is the responsibility of the Agency for International Development. It is AID's role to ensure that all food assistance programs, including the concessional sales program, administered by the Department of Agriculture, are integrated with AID's projects and activities in the recipient country.

AID, with its more extensive field staff, should continue to be responsible for economic development activities, including agricultural development, authorized by Public Law 480. The Department of Agriculture, through its agricultural attaches, continues to have responsibility for using local curriencies for activities related to development of markets for U.S. agricultural commodities.

The draft compromise also recognizes the role of the Department of Agriculture in determining commodity availability and usual marketing requirements, in order to assure that our food assistance does not limit commercial agricultural trade or disrupt world markets. The Department's responsibilities in these areas are not meant to be exercised in such a way as to permit it an agreement-by-agreement veto on Public Law 480 transactions.

In order to assure that each administering agency respect the areas of expertise of the other, the legislation provides for consultation between the agencies prior to negotiation of agreements. This consultation period is not intended to provide an opportunity for bureaucratic delay. The agencies involved should attempt to keep procedures informal and paperwork requirements at a minimum, so that the consultation process may proceed efficiently and in most cases not require the 30-day period provided.

In drafting this amendment, the committees recognized that the executive branch has already announced its intention to streamline the processes of the interagency committee responsible for food aid. The committees support this step.

The Department of State, for example, has a legitimate consultative role in determining that food assistance is not inconsistent with U.S. foreign policy in a country, and the legislation respects that role. The State Department, the Treasury Department, and the Office of Management and Budget, do not, however, need to be involved in micro-management of food aid agreements. We commend the executive branch for the steps it is taking to improve management of food aid, and we believe the reforms we are advocating further strengthen that process.

In regards to agricultural export programs, the compromise amendment adopts all major House Committee on Agriculture provisions on agricultural export promotion programs which:

Authorize 5-year funding levels for all programs; makes improvements in program administration and accountability; and institute new efforts to assist emerging democracies. The amendment also provides for the development of a long-term agricultural trade strategy; increased foreign language proficiency in the

Foreign Agricultural Service; equity to fish products in export promotion programs; and new reporting on the level of foreign components in agricultural exports.

I urge my colleagues to support the compromise amendment for title XII, to make U.S. food assistance programs more effective in providing food to people who desperately need it around the world.

Mr. MADIGAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in strong support of H.R. 3950, the 1990 farm bill. I want to begin by congratulating the chairman for leading our committee through a long and difficult process on this 1,000-page bill. The result of his leadership is a 5-year reauthorization of Federal farm programs with the full bipartisan support of the committee.

The gentleman from Texas has already briefly explained the important features of the bill. I want to devote a few minutes to some of the key aspects of the debate on this legislation.

In this time of great focus on the budget, the chairman and I will be offering an amendment to bring this bill within the CBO current services baseline for farm supports for the full 5 years of the authorization. This will mean, in effect, that farm supports will be frozen until 1995 with no increases to compensate for inflation

The committee has not attempted to second guess the outcome of the budget summit. We do, however, stand ready to make any reductions required of the committee at such time as the House issues reconciliation instructions. We have reduced agriculture spending by almost 60 percent since 1986. That track record illustrates our commitment to budget responsibility and our willingness to do what is necessary when the time comes.

Within these severe budget constraints, H.R. 3950 is based on the same philosophy that has proven successful under the last farm bill. In 1985 farmers were in financial crisis, in part due to world economic conditions and in part because of artificially high Government support prices that removed our farm products from the world market. Since our highly efficient farmers produce far more food than can be consumed in the United States, they must export to survive. We export 30 percent of our corn production, nearly 50 percent of our soybeans and almost two-thirds of the wheat grown in this country.

The 1985 farm bill recognized these facts and shifted toward more market-oriented policies. The results have been nothing short of miraculous. Farmers who in 1987 were getting 33 percent of their income as cash payments from the Government, will receive less than 15 percent of their income from the taxpayer. Nationally, agricultural exports, which had virtually collapsed by 1985, are expected to reach nearly $41 billion in 1990 and most importantly will produce a $19 billion balance of trade surplus for this country.

In this 1990 reauthorization the Agriculture Committee continues the successful shift toward a market orientation. Even more emphasis is given to this move by introducing greater flexibility into the commodity programs.

Not all of the changes made in this bill, however, further the goal of a market-oriented agriculture. The administration has expressed particular opposition to provisions that increase Government loan rates and limit the Secretary of Agriculture's discretion. This could lead to a return to the practice of freezing ourselves out of world markets and increased Government expenditures. I will at the appropriate time offer amendments to respond to the administration's concerns.

Later, during consideration of amendments to H.R. 3950, this House will hear much about the advantages of targeting farm program payments to certain income classes of farmers. I will join that debate, but there are some thoughts that the House should consider throughout these discussions of the farm bill. Chief among these is the purpose behind the farm programs. These programs are not for the purpose of transferring income to farmers, as in the case of Social Security or welfare to the indigent. The farm programs are for the purpose of managing the most basic industry in America for the benefit of all Americans.

Food production, processing, transportation, and sales is the largest sector of our economy, employing over 20 million Americans. Agriculture is the most consistently successful moneymaker in our international trade. The system of food distribution in this country provides higher quality food in greater abundance at less cost to its citizens than any country in the world. The average American family spends only 10.4 percent of its disposable income on food, about half the amount spent by a family in Switzerland or Japan.

The underpinnings of this tremendously efficient machine are the 2 million American farmers. Their ability to consistently supply sufficient quantities of high-quality agricultural commodities, in turn, is dependent upon the stablizing influence of the Federal farm programs. Without those programs, there would be severe peaks and valleys in both prices and production that would bankrupt farmers and deprive American families of the stable, affordable food upon which they depend.

The driving force behind these necessary programs is the voluntary participation of the farmer. The farmer receives financial assistance in return for altering his production levels according to the needs of the Nation. No farmer receives a handout from the Government. He must idle part of his production and follow a whole host of rules, including environmental mandates, established to benefit the general society in return for the Government's money.

While certain limits have been placed on the total amount of income assistance any one farmer can receive, the guiding principle has always been that all farmers are allowed and encouraged to participate. There is a very simple reason for this. Spending large sums on farm programs and then prohibiting the larger farmer from participating would destroy the basis of the programs, essentially wasting the money spent.

Some 38 percent of the total agriculture production of this country is grown by farmers with gross revenues of over $500,000. If those producers were arbitrarily excluded from Federal farm programs, the total management burden would fall on the remaining 62 percent of productive capacity. Greater acreages would have to be idled by smaller producers, while those excluded would increase their production, causing still greater pressure on the smaller farmer. The only way to keep the remaining farmers in the programs would be to increase the amount of Federal payments they receive. Instead of saving money, as is claimed, this approach is more likely to cause greater expenditures by the taxpayer.

Some of these problems could be offset by the probable massive reorganization of farm structures throughout the country. Lawyers would make a great deal of money engineering unnecessary legal maneuvers to evade the arbitrary and foolish target scheme. In the end, the accomplishments of a targeting proposal would

leave us the choice of either driving farmers to scheme to avoid the new rules with little change in outcome or, even worse, it could lead to the comlete collapse of a stable national food supply with dire results for us all.

Overall, the 1990 farm bill, as brought to the floor by the Agriculture Committee, is the product of several months of thoughtful and responsible work and grows from years of experience of how to make the complex food system work for the benefit of both farmers and consumers. It is not a perfect document, in its fundamentals it is sound policy for the Nation. I strongly urge the House to join me in suporting H.R. 3950.

□ 1700

Mr. Chairman, I reserve the balance of my time.

Mr. DE LA GARZA. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Georgia [Mr. HATCHER].

Mr. HATCHER. Mr. Chairman, I am pleased to speak today to title 17 of the 1990 farm bill, the food stamp and related provisions title and title 14, fruits, vegetables, and marketing.

As you know, title 17, which reauthorizes and improves the Food Stamp Program and the Domestic Commodity Donation Programs, honors the late Congressman Mickey Leland. Congressman Leland's commitment to alleviate hunger throughout the world was indeed inspirational. I am proud that title 17 contains the provisions of the Mickey Leland Memorial Domestic Hunger Relief Act, introduced last February and cosponsored by many Members of the House. I would like to take this opportunity to thank Congressman PANETTA and Congressman EMERSON for their work in developing this important legislation and for their continued leadership in the fight against hunger in this country.

The Subcommittee on Domestic Marketing, Consumer Relations, and Nutrition heard testimony at nine hearings held during this Congress that hunger and poverty in this country not only persist but are increasing. In my home State of Georgia, an additional 9,742 households were added to the food stamp rolls last year, and we have heard repeatedly lately that throughout the country food stamp participation levels are continuing to increase dramatically. Title 17 of the 1990 farm bill, which contains the most significant improvements in programs to combat hunger since passage of the Food Stamp Act of 1977, is critically needed.

In addition to reauthorizing the Food Stamp Program, title 17 will help to make the program more responsive to the neds of families with children, the homeless and near-homeless, the elderly and disabled, and low-income families and individuals living in rural America. The title encourages self-sufficiency of food stamp recipients, simplifies administration of the program, and promotes coordination between the Food Stamp Program and other assistance programs. An important part of the title contains proposals of the administration that will increase the integrity of the Food Stamp Program. The title also will increase the use of computer technology to improve Food Stamp Program Administration and delivery of benefits.

Title 17 strengthens the domestic commodity programs, including the Temporary Emergency Food Assistance Program [TEFAP] and the Commodity Supplemental Food Program, by increasing the opportunities for distribution and the amount of commodities distributed.

The cost of title 17 is within the limits of the Budget Resolution that has passed the House. The authors of this important legislation are committed to keeping its cost within the limits of any agreement that will come from the budget summit. Should that agreement permit less to be spent on our nutrition programs than title 17 requires, title 17 will be modified to reduce its cost accordingly.

There is an additional point I would like to make. The 1990 farm bill reauthorizes and improves the operations of our major farm commodity programs. These programs are important not only to farmers, but also to consumers. The Farm Commodity Programs ensure that American consumers have an adequate, stable, and affordable food supply. Perhaps no segment of American consumers is more dependent on these stable, affordable food prices than the poorest 20 percent of American families who spend more than twice as much of their income on food as the average American family.

The farm bill's provisions affecting the Farm Commodity Programs, the Food Stamp Program, and other nutrition programs provide an integrated approach to addressing the hunger problem in our Nation, and I urge its passage.

Title 14, fruits, vegetables, and marketing, recognizes the importance of the domestic fruit and vegetable industry in U.S. farm policy, and the importance of fruits and vegetables to the diets of the American people by requiring the Secretary of Agriculture to conduct a study of the domestic fruit and vegetable industry. This title also contains provisions of H.R. 3664, the Omnibus Agricultural Commodity Promotion and Research Act of 1990. These provisions will authorize the creation of commodity promotion and research programs for pecans, mushrooms, and limes, and amends the existing programs for potatoes, cotton, and honey.

The committee has heard from individual fruit and vegetable producers and groups representing such producers who are genuinely concerned as to the industry's ability to continue to produce these crops in the quality and quantity wanted, especially at a price the public is able to pay. Generally, the study required by title 14 will assess the health of the various segments of the fruit and vegetable industry in 1990, identify the problems and issues they face, including those imposed by the Federal Government, recommend solutions to these problems, and identify those actions that can be taken by Federal agencies to encourage increased production of domestic fruits and vegetables.

Mr. Chairman, fruits and vegetables are an important part of the American diet. This title acknowledges this fact and will help the fruit and vegetable industry to better serve the American consumer. I urge its adoption.

Mr. MADIGAN. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from Missouri [Mr. EMERSON].

□ 1710

Mr. EMERSON. Mr. Chairman, I rise in strong support of the bill before the House of Representatives, H.R. 3950, the Food and Agriculture Resources Act of 1990. I wish to congratulate the chairman and the ranking Republican of the Committee on Agricultural for their hard work on this bill. This is sound legislation for the American farmers and for the consumers of our country. The Committee on Agriculture continues the market-oriented focus of the 1985 Food Security Act and brings forth a bill that is in line with the House-passed budget resolution.

The American farmer is the envy of all—and we all benefit from the productivity and efficiency of the farmers in our country. We cannot afford to take this valuable resource for granted and must provide a basis and a climate in which the farmer can prosper and continue to supply both this country and the world with food and fiber. Almost all segments of the American society are affected by the bill the committee brings forward today—food production, conservation of our resources, nutrition, research, export promotion, and foreign food aid. The committee is committed to providing the means by which the income of our farmers is stabilized so that the American people can continue to be well fed, at reasonable prices.

The stage has been set and events are beginning to unfold on another decade of American agriculture. Over the years our agriculture livelihood has evolved in response to the world around us. The course of international events, particularly in Eastern Europe

and the Soviet Union, is changing faster than we could imagine. With these dramatic changes, our own rural farms and communities cannot be immune from the far-reaching effects this new breeze of democracy holds in store for the world. The opportunities for new partnerships between American agricultural industries and the expanding economies of Eastern Europe, the Soviet Union and the Far East hold great promise. Supplying food and fiber to the world's emerging democracies, as well as for our domestic needs, will provide markets never available before.

The 1990 farm bill is ushering in this new era and encompasses a broad range of issues. Securing the plentiful supply of food and agricultural products for the consumers of the Nation and the rest of the world remains the principal reason behind our farm policy. The 1985 Food Security Act solidified our world position; nevertheless, it is clear that we must examine the current farm situation in conjunction with existing farm programs and build upon them so that agriculture will continue to prosper into the decade of the 1990's.

The formulation of Federal farm policy has a profound impact on creating and sustaining jobs in rural America. The economic vitality of our rural communities continues to hinge on the success of our agriculture industry. A prosperous rural economy means greater opportunities for the men and women who sell farm implements, drive the grain and livestock trucks, deliver the feed, market the seed and fertilizer, and process the fruits of our harvest. We must maintain our position as the world's most efficient and reliable food supplier.

The Federal farm programs provide stability and strength to an industry that is crucial to our Nation's security and health. These programs benefit consumers and farmers by providing a reliable supply of food and fiber at the most reasonable cost in the world. I strongly urge my colleagues to support this legislation that keeps America on the path of expanded food and fiber production security.

This is also a bill that commemorates our late colleague, Mickey Leland. I served with Mickey on the Select Committee on Hunger and I believe this bill, particularly title 17 which is named after my friend, is a fitting tribute to him. I wish to congratulate the gentleman from California [Mr. PANETTA] and the gentleman from Georgia [Mr. HATCHER] for their work on this title. It represents an attempt to provide food assistance to needy families through the Food Stamp Program and through the Emergency Food Assistance Program. I know our chairman is vitally interested in this subject and appreciate the assistance he has provided.

Agriculture is a way of life in the United States and touches each and every one of us on a daily basis. Many people contribute to the bountiful harvest we all enjoy. No one should be left out of this harvest; and yet we know there are people among us who are in dire need and lack the resources to obtain nutritious diets. That is why I have joined with my colleagues to present this bill that will provide food assistance to needy families through the Food Stamp Program and through the Emergency Food Assistance Program, better known as TEFAP.

It is fitting that this bill is named after my close personal friend and colleague, Mickey Leland. Mickey and I shared a dream of a world in which no person ever went hungry. He and I had long discussions on this topic in the Halls of the Congress and whenever we traveled here and abroad. I particularly remember our last trip to Ethiopia in the spring of 1989. I remember Mickey with children who had not eaten a decent meal in their brief lives. I remember how much he cared and wanted to help, and I believe this title furthers the goals to which he and I and so many others aspire.

I firmly believe that in our Nation of abundance, it is a tragedy for any child, elderly person, or anyone to go hungry. We are a generous country. That is why we have programs like the $17 billion Food Stamp Program and other supplementary programs to feed needy people. When these programs do not work or provide insufficient help we have a responsibility to know why and then do something about it. That is what I hope this title will do.

This title reflects what we hope to be able to do to improve the Federal food assistance programs. Whatever additional funding that is provided in the final budget resolution will dictate the parameters of our efforts in the food assistance area. I feel confident saying that the final title will be in accord with the budget resolution. Additionally, as we have done in the past, should there be sequestration, as provided for by Gramm-Rudman-Hollings, the additional spending provided in the food assistance title will be adjusted.

The manner in which we, as a country, provide assistance to needy families should be governed by a sense of compassion, a desire to help people get back on their own feet when their need is temporary, and a clear view that the system now in place must be reformed from one in which we have programs for food, programs for financial assistance, and programs for special needs. Remember, we are trying to help whole people, not just parts of them. A program that provides help for those unable to help themselves and makes taxpayers out of the ablebodied is my ultimate goal.

This title accomplishes several important goals. Most importantly, it reauthorizes the Food Stamp Program and the Emergency Food Assistance Program [TEFAP]. From the aspect of Federal food assistance programs the mainstay of feeding programs is the Food Stamp Program. It is a program that will provide $17 billion in benefits this year, as compared to the $9 billion provided in 1980.

FOOD STAMP PROGRAM

Several changes are made in the Food Stamp Program. Food stamp benefits are increased across-the-board through an increase in the thrifty food plan. Participants will have their benefits based on 105 percent of the thrifty food plan by 1995. In addition, by 1994 the ceiling on the excess shelter expense deduction will be lifted. Currently 25 percent of the food stamp households are not able to deduct full shelter and heating expenses because of the ceiling on that deduction. Lifting the ceiling will allow full accommodation of shelter costs of food stamp participants.

The definition of a household for food stamp purposes is simplified. This has been one area that has proved to be a significant problem for States administering the Food Stamp Program. Under this title, the household, for food stamp purposes, will consist of persons purchasing and preparing food together. Parents and their minor children and husbands and wives must apply together as a single household.

This title also proposes to exclude the first $50 a month paid as child support from consideration as income in the Food Stamp Program, consistent with the AFDC regulations. This provision highlights the importance of securing child support payments from absent parents, who, I believe, have the obligation to support their children. It is extremely important that Federal assistance programs stress this responsibility.

Other changes proposed to be made to the Food Stamp Program include an increase in the $4,500 limit on cars to $5,500; allowing persons 50 years and older who are college students to participate in the Food Stamp Program, if otherwise eligible; and, an increase to $75 per month the amount of actual expenses that may be reimbursed during participation in the food stamp employment and training program.

In addition, States will be required to implement automated data processing systems by October 1993 with review by the Secretary. The Secretary will be permitted to waive these requirements for small States and in certain other circumstances. This provision will contribute to the efficient administration of the Food Stamp Program, provide necessary help to

overworked administrators, and help provide a means to deliver the correct amount of benefits in an effective manner.

An extremely important provision in the title concerns the complicated nature of the Food Stamp Program and the AFDC Program. Both programs are designed to serve needy families. However, the rules and regulations differ to a great degree providing confusion and inefficiency for participants and administrators alike. For those families receiving AFDC, we ought to be able to provide food stamp benefits without requiring them to go through a maze of applications, forms, verifications, and procedures that are different from those applicable to the AFDC Program. After all we are talking about needy families—families needing income and food assistance.

When a family is in need of help, that need often crosses program lines. Need for income assistance often means need for housing assistance, food assistance, and for some, help in finding and keeping a job. The hurdles that families must scale in applying for help are immense. They often must go to different agencies, different eligibility workers, meet different eligibility standards, and abide by different rules and regulations. That they are able to receive help is often a reflection of their abilities, rather than the system represented to them.

Administrators of these programs—both on the State and local levels—have similar problems. The resolution of the differences in the Federal assistance programs is often not within their ability to achieve. Many efforts have been made by States; but they may have gone as far as they can go. The proposal in this title makes an initial step to resolving the differences between the two major assistance programs—AFDC and food stamps. We are proposing that certain sites be allowed to determine food stamp eligibility based on the AFDC regulations, for those AFDC families in which all members receive AFDC. While we propose that AFDC rules be applied in almost all instances, food stamp rules will be used for income deductions and processing standards, including the provision of expedited services for families in immediate need.

This important, innovative procedure is a first step in the process of resolving the differences among the several Federal assistance programs. Needy families are not well served by the complicated, confusing process now in place. Administrators on the State and local level cannot get a handle on the myriad of programs and deliver services to needy families in an effective and efficient manner. The current system does not deliver benefits to needy families in either a compassionate or efficient manner. I hope this provision will change that.

COMMODITY DISTRIBUTION PROGRAMS

One of the debates that arose during the consideration of the Hunger Prevention Act of 1988 concerned the differences between the Food Stamp Program and TEFAP. Both programs are valuable and necessary programs. However, for some the ability to receive commodities through TEFAP may mean the only assistance they receive. Some needy families, especially elderly families, were much more likely to desire and receive commodities through TEFAP. That is why this title requires the purchase of $175 million in commodities for TEFAP for each of 1991 and $190 million for 1992—$220 million is authorized each year for 1993, 1994 and 1995. I am an ardent supporter of the commodity distribution programs. I believe this is an efficient and effective means by which we can provide food to needy people. The rural, elderly poor are able to benefit from commodity distribution programs much more readily than the Food Stamp Program. I truly believe that if we did not have this program we would have to invent it.

Homeless people are also in need of food assistance. Therefore this title continues the commodity homeless program at the level established in the Hunger Prevention Act—at $32 million. This program is continued through 1995, so that soup kitchens and food banks can receive commodities and serve needy people without permanent homes.

Other changes to the commodity distribution program include establishment of a commodity supplemental food program for elderly persons, permanent food bank projects, and a requirement that the Secretary of Agriculture make surplus commodities available to emergency feeding organizations when available and if necessary, on an irregular or seasonal basis, depending on availability.

I hope my colleagues will join with me to work to provide food assistance to needy families and individuals in a compassionate and efficient manner. My ultimate goal is to see true reform of the welfare system—through which we provide benefits to needy people through coordinated and simplified programs and also provide employment and training to able-bodied participants.

We have a responsibility to maintain programs for those who are aged or disabled; but we also must simplify the programs we have now and provide a method to make taxpayers out of those able-bodied people now in need of help.

Mr. Chairman, I urge my colleagues to support H.R. 3950—a bill that helps farmers, consumers, and needy families.

Mr. DE LA GARZA. Mr. Chairman, at this point I reserve the balance of my time.

Mr. Chairman, it is my understanding that the Committee on Foreign Affairs would like to utilize some of their time at this point.

The CHAIRMAN pro tempore (Mr. ALEXANDER). The gentleman from Connecticut [Mr. GEJDENSON] is recognized for 15 minutes.

Mr. GEJDENSON. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, at the appropriate time in the debate on the Food and Agricultural Resources Act of 1990, I will offer an amendment to title XII that reflects a compromise worked out between the House Agriculture and Foreign Affairs Committees.

I would like to thank the chairman of the Foreign Affairs Committee, Mr. FASCELL, and the chairman of the Agriculture Committee, Mr. DE LA GARZA, for their willingness to work long and hard on crafting this compromise.

This amendment reforms Public Law 480, Food for Peace, programs by streamlining the act and by establishing clear lines of authority between the two agencies responsible for our Overseas Food Program: USDA and AID.

The amendment designates USDA as the agency responsible for title I Concessional Loans and the Market Development Programs funded by title I local currencies.

The compromise establishes AID as the agency responsible for title II food donations and a new grant program established by title III.

The amendment also revises the authorities of the Secretary of Agriculture to establish commodity availabilities for Public Law 480 in several ways:

First, by mandating the docket determinations to be made before the beginning of the fiscal year;

Second, by requiring that docket determinations be made on an aggregate basis rather than on a country-by-country basis; and

Third, by requiring the Secretary of Agriculture to notify the Congress in writing of any modifications in the docket and the reasons for such changes.

Additional authorities delegated to the Secretary of Agriculture in the amendment, namely the usual marketing requirements and the CCC authorities, are intended to allow the Secretary to take into consideration domestic concerns, but are not meant to allow the Secretary means by which he or she may intrude into the workings of title II and title III programs for nondomestic reasons.

Mr. Chairman, the entire compromise makes many smaller changes to reform Food for Peace, but I want to tell my colleagues that the overriding principal here has been to make food aid a more effective development tool

that is not hindered by bureaucratic delay and infighting. I think that we accomplish that in this compromise.

In addition to reauthorizing Food for Peace, the compromise title XII reauthorizes U.S. agricultural export promotion programs for 5 years. These programs include the Export Enhancement Program, the GSM-102 and GSM-103 Credit Guarantee Programs, and the Targeted Export Assistance Program, which is renamed and improved.

The amendment also provides $275 million in new credit guarantee authority to guarantee U.S. exports to emerging democracies. This provision will not only promote the export of U.S. agricultural commodities, but will also guarantee financing for agricultural infrastructure improvement projects in these nations.

The compromise title XII also authorizes a market promotion program, which is based on the Current Targeted Export Assistance Program. The Market Promotion Program will significantly increase exports of high-value commodities, such as fruits and means, as well as value-added agricultural products.

Another key provision of the compromise provides for a long-term agricultural trade strategy looking beyond the current budget year. Under this provision, the Secretary must develop a 3-year agricultural trade strategy and develop individual market plans for the top 15 potential growth markets for American agricultural commodities.

Mr. Chairman, I believe that the compromise on title XII which I will offer as an amendment later in the debate is a good compromise which will dramatically improve the Food for Peace Program as well as American agricultural export promotion programs.

I urge my colleagues to support the Foreign Affairs Committee amendment to title XII.

Mr. Chairman, I yield back the balance of my time.

Mr. MADIGAN. Mr. Chairman, I yield 5 minutes to the gentleman from Oregon [Mr. ROBERT F. (BOB) SMITH].

Mr. ROBERT F. (BOB) SMITH. Mr. Chairman, I thank the gentleman for yielding this time to me.

I want to commend the chairman of the Committee on Agriculture, the gentleman from Texas [Mr. DE LA GARZA], and my good friend, the gentleman from Illinois [Mr. MADIGAN], the ranking member, for what I believe to be an excellent piece of legislation within budget. It ought to be passed without massive amendments.

Mr. Chairman, I rise today to offer my thoughts on the measure currently before us, the 1990 farm bill. My intent is to give this debate the benefit of perspective.

Though we refer to H.R. 3950 as the farm bill, it is just shorthand for the Food and Agricultural Resources Act of 1990. This bill is not for our Nation's farmers. It is the food bill, and therefore, it is for anyone who eats.

Parts of this bill are essential. Research money helps develop new and more efficient farming methods and products so that our consumers will continue to enjoy a broad selection of high-quality goods in their grocery store.

A considerable portion of this bill is devoted to nutritional programs, which help put meals on the tables of families in need. Twenty-six million people received food stamp benefits last year, 24 million children are fed daily in the National School Lunch Program, and one of every three babies born in the United States receives benefits from the Supplemental Food Program for Women, Infants, and Children.

In Ethiopia, we provided 50 percent of the aid to their starving people.

The Public Law 480 Food for Peace Program gives a hand up to those in faraway lands who suffer famine and grinding poverty. This 30-year-old program continues to meet the multiple objectives of moving U.S. farm products abroad, meeting food and development needs in Third World countries, and supporting foreign policy goals.

Another important role of agriculture exports is inventory disposal. Our farmers and ranchers are so productive and efficient, that we easily produce twice what we can consume at home. By aggressively pursuing export markets, we earn foreign exchange, reduce outlays for price support programs, provide inexpensive food for the world's hungry, and still maintain our remarkable productive capacity.

The emerging democracies in Eastern Europe and around the globe are economies that have failed to supply the fundamental consumer product: Food. We are able to fill that need. The powerful economies of the four tigers in the Pacific Rim—Hong Kong, Singapore, Korea, and Japan—have earned our money in trade. They are home to increasingly wealthy consumers who demand cheaper and higher quality food. We can supply that as well.

The export programs authorized by the farm bill help our producers remain competitive in an increasingly unfair trading environment. Programs such as our GSM-102 and 103 loan guarantees, targeted export assistance, and the Export Enhancement Program ease our balance of trade, build new markets, and put other nations on notice that we will not concede our markets without a fight.

Agricultural exports will total about $40 billion this year, maintaining a favorable agricultural balance of trade that the United States has enjoyed for four decades. Meanwhile, every dollar in farm exports generates $1.51 in economic activity, much of it outside the farm sector. Think of it. At a cost of a little over $10 billion, we are getting back $40 billion. That is good business.

The future health of agricultural trade will be largely dependent on the outcome of the Uruguay round of talks within the General Agreement on Tariffs and Trade. If the U.S. position prevails, we will need a strong food and fiber industry to take advantage of the many opportunities which will present themselves. If GATT fails, we must have a strong agriculture sector to survive in an increasing hostile trade environment.

In any case, it would be irresponsible to unilaterally disarm before these talks are completed in December. Amendments which would destroy the Sugar Program, shake the foundation of basic commodity programs, and impose absurd restrictions on farming practices, will ultimately spell disaster for one sector of our Nation's economy, agriculture, that is competitive in international trade.

You have received numerous letters from your colleagues about how the farm bill forces taxpayers to pay millionaire farmers not to grow crops. That's like saying the Defense Department exists to pay generals not to fight wars. It's just enough of a half-truth to make a great press release. In Burns, OR, we have another name for that kind of talk. Unfortunately, this twisted logic has given birth to a whole herd of well-intentioned, but shortsighted amendments.

These are the so-called targeting or means test amendments. Price support programs are intended to act as a safety net for producers, this is true. To most of the farmers in my district, these proposed limits will not come into play. But, they know the budget trend and they understand the implication of the camel's nose under the tent. A ceiling far over their heads this year can have them in the basement next year.

And this could ultimately destroy the entire purpose of our price support programs. In addition to offering a safety net, these programs are designed to serve as leverage to enforce conservation and production controls.

If you push the largest farmers out of the program, they will be free to produce as much as they want and in any manner they choose. Voting for these amendments might make you feel better, but the savings you envision won't occur. In fact, the administration asserts that such amendments will actually cost more money than current law. Large farmers, unfettered by production controls, will plant fence row to fence row, driving prices down and price support outlays up.

So, let me warn you: Be very careful what you ask for, you might just get it.

While time limits prevent me from sorting out all of the amendments offered on this farm bill, I would like to leave you with one thought that is absolutely indisputable.

Your constituents, like mine, must feed themselves and their families. And your constituents, like mine, currently enjoy the highest quality food and fiber in the world, while spending a smaller percentage of their income than in any other nation on Earth.

This is due entirely to the productivity of America's farmers. I hope you will keep this in mind as we work to rewrite this farm bill in an attempt to build upon the market-oriented policies that allow our ranchers and farmers to work their magic for America's consumers.

Mr. DE LA GARZA. Mr. Chairman, I yield 3 minutes to the gentleman from Louisiana [Mr. HUCKABY], the distinguished chairman of the Subcommittee on Cotton, Rice and Sugar.

Mr. HUCKABY. Mr. Chairman, I thank the gentleman for yielding me this time.

I would like to commend Chairman DE LA GARZA, as well as the gentleman from Illinois [Mr. MADIGAN], the ranking member on the committee, for the extremely hard and conscientious work they have done in the last year.

The Subcommittee on Cotton, Rice and Sugar, held hearings throughout the Nation in the last year as we made preparations for this farm bill, and I certainly rise in support of the legislation today.

In the area of cotton, I am pleased to report to my colleagues that the 1985 farm bill is working so well that today the price of cotton is above our target price, and it is very likely that the program could actually cost us nothing. It could even return money to the U.S. Treasury this year.

I would like to report that rice exports are up 30 percent from what they were in 1985; however, let me point out that in Japan the rice farmers receive six times as much for their rice as American farmers do, and we still are not allowed by the Japanese to sell rice in Japan.

The sugar program has operated now for 6 years at a cost of 18 cents support price. It costs, as a previous speaker has said, absolutely nothing to the American taxpayer.

The proposal would freeze the target prices for cotton, rice, and sugar, for the next 5 years, a hard freeze.

Agriculture is doing I think more than its share when it comes to budget responsibility. I know of no other function in the budget that is even contemplating a freeze for 1 year, let alone 5 years, as this bill does.

An amendment that I offered in committee regarding flexibility is an important part of this bill. It will give farmers an opportunity to switch crops and still protect their base, to switch in response to market signals.

Finally, Mr. Chairman, let me point out that I will be offering an amendment to further tighten up the eligibility requirements for those who receive Government payments, who participate in our programs.

We will preserve the three entities that we established in 1987. I think this is extraordinarily important so that we can operate our economies of scale and so that American agriculture can continue to be the most efficient agriculture in the world.

There will be numerous amendments that will be offered in the coming days to attack the very infrastructure, the integrity, and the heart of our system. I would urge my colleagues to vote and stay with the committee so that 10 years from now when we look back we will not have to say, "What happened to agriculture in the nineties?"

The system that we have today works extraordinarily well.

□ 1730

Let us keep it. Let us keep American agriculture strong.

Mr. MARLENEE. Mr. Chairman, we are considering the renewal, and in many cases the reform, of the Federal programs which play a vital role in our society from at least four critical aspects: First, they ensure that American consumers have available a wide variety of safe, high-quality foods and fiber at the cheapest prices anywhere in the world. Second, they provide a very modest income safety net for American farm producers who must deal with the adversities of Mother Nature and fight against the unfair and predatory practices of other world producers. Third, the programs help provide ample supplies of food in order that we can assist those in our country who are in need through such programs as food stamps; school lunch; temporary emergency food assistance; women infants, and childrens; elderly feeding; food banks, and others. Finally, these programs help ensure that we as a country have sufficient supplies in order to make very generous food donations and assistance to help feed the peoples of underdeveloped nations and those facing a crisis due to famine, flood, earthquake, or other disaster.

The taxpayer cost of maintaining these effective farm programs has been reduced dramatically from some $26 billion in 1986, down to an estimated $9.2 billion for the current year. The farm bill legislation which the House Agriculture Committee has brought to the floor today will ensure that future taxpayer costs will be contained to roughly this same annual level throughout the life of the bill.

Mr. Chairman, I would like to point out an important fact regarding the so-called costs of these farm programs. A recent study completed by the Food and Argicultural Policy Research Institute has found that farm programs result in a direct economic benefit to American consumers by stabilizing any sudden increases in food prices. In fact, the study concludes that without the current system of farm programs that food price increases due to drought-induced shortages would have cost U.S. consumers a total of some $40 billion between 1989 and 1996. Again, this is a savings to consumers of $40 billion compared with a cost for the programs in the bill which is estimated at about $53 billion over the 5-year period. And without the current system of farm programs, consumers would be faced with fewer supplies of domestically produced food; prices would be significantly higher, and many of the safeguards which currently ensure that food is not tainted with dangerous chemicals would be difficult to maintain.

Mr. Chairman, the pending legislation is the result of months of hard work by many of our most dedicated and knowledgeable colleagues. It is a highly responsible piece of legislation, and one which will continue to lead stability and predictability to food supply and food prices over the next 5 years. I would hope that a majority of Members will resist the temptation to react in a knee-jerk fashion when amendments are offered claiming to save huge amounts of money or to exclude the filthy rich farmers from participation in the programs. The fact of the matter is that this bill has delicately balanced the overall needs of all farm producers along with the overall benefits and needs of American consumers and taxpayers. To suggest that simply because a particular farming operation has annual gross receipts of $100,000 or $500,000 or even $1 million in any given year demonstrates an outrageous ignorance of how any business—whether farming or computer manufacturing—operates.

Just because a business or a merchant may have gross sales of some particular, arbitrary level does not automatically mean that the business made a profit. Indeed, in farming it is not all that unusual to have $1 million in gross sales in a given year, and yet lose money. I implore our colleagues to resist the efforts by some individuals who want to grab headlines with hot air, flimsy facts, and faulty logic.

Thanks to the excellent efforts of Chairman DE LA GARZA, our ranking member, EDWARD MADIGAN, the entire membership of the committee, producer and consumer groups from across the Nation, and a contingent from USDA headed by Mr. John Campbell, the Deputy Under Secretary for International Affairs and Commodity Programs, we have before us a responsible and effective farm bill. I hope all Members will join me in objecting to those amendments which have not been approved or accepted by the committee leadership, and keep the balance, fairness, and reasonability which is represented by the bill as reported.

Mr. MADIGAN. Mr. Chairman, I yield 5 minutes to the gentleman from Texas [Mr. ARMEY].

Mr. ARMEY. Mr. Chairman, I thank the gentleman for yielding me this time.

Mr. Chairman, let me begin my remarks by expressing my appreciation for my understanding of the hard work and the many hours that the members of the Committee on Agriculture have spent on this bill, and recognize, if you will, that after all of these long hours of work and so forth it is

difficult to see someone not on the committee come in and intrude against your workmanship, but, in fact, that is my purpose for rising today, not to criticize them as members of the committee but to criticize the underlying philosophy behind our existing farm policy.

Let me suggest to you, as I understand it and have understood it for some years, that farm policy is bad for farmers, because it reduces the productivity of our farm sector.

One, the underlying philosophy is to boost farm income by restraining production. In that regard, in recent years we have removed 1.6 million cows from our dairy herd. We have squandered billions of oranges and lemons through the system of marketing orders. We routinely, year in and year out, take one-fourth of our farmland, some 60 million acres, out of production. When we do that, we voluntarily vacate markets and other countries expand to fill them.

In the past 20 years, Europe has displaced 30 million acres that we have set aside. Latin America, in the 1980's alone, has displaced another 20 million acres of our set-aside. Thus, if we had not taken our land out of production over the last 20 years, we would not have today all of those acres put in production.

Let me also point out we have taken prime agricultural land with sound infrastructure in place out of production by virtue of official government policy. These other nations have put marginal agricultural land into place without anywhere near the infrastructure to support that land that we have, and the upshot of this policy has been for us to deport our agricultural land, and what might have been our fair share of world markets.

I would argue that we should reduce the government role in agriculture and devote our energies to trade reform.

The situation is critical. Agricultural demand worldwide will rise from 30 to 50 percent during the 1990's. If we do not fill that demand, other countries will, and markets once lost will be lost forever.

Let me say that there are some misconceptions about farm policy in addition to this. It is generally argued that it is a cheap-food policy. It is argued that we pay less of our disposable income on food than other nations, and that is true. But that argument does not recognize the fact that the native productivity of our superior agricultural resources is the primary reason why we have a stable, sound, dependable food supply year in and year out and that we have a higher disposable income per capita than any other nation in the world. It is said that our farm policy is good for consumers. The Economic Research Service of the U.S. Department of Agriculture says itself that these policies cost the consumers $12.1 billion a year in increased food prices.

The whole point of dairy, sugar, peanut, and other programs is to keep costs high. In fact, just a moment ago somebody was celebrating our prices because of our policies, because we have held the price high. It is said that these policies are good for the family farmers.

I would say that this is probably the most egregious result of current farm policy. It subsidizes larger farms and allows them to have a Government subsidy with which to underwrite the credit they achieve in order to buy out their neighbors. Large farms year in and year out are supplying an increasingly larger share of total agricultural product to the American consumers.

It is said that we are continuing the successful policies of the 1985 bill. The 1985 bill gradually lowered target prices. This bill freezes them. The 1985 bill lowered loan rates. This bill raised them.

The object of this policy is to increase the number of people in agriculture dependent upon a Government check; I think that is bad. Raise food prices for American consumers; I think that is bad. And, of course, to diminish the chances of the small family farm to compete.

Mr. Chairman, this Congress is about to make a tragic mistake by reauthorizing our farm programs without making fundamental reforms or even continuing to reduce the Federal role in agriculture.

The 1985 bill, for all its many faults, at least lowered target prices by a small amount over the last 3 years. This bill halts that trend and freezes them in place for the next 5. The 1985 bill lowered loan rates by some 20 percent, making our farm products much more competitive. This bill reverses that trend and increases loan rates.

Although the committee did overcome its perennial urge to bust the budget—no doubt to avoid a nasty and embarrassing floor fight—it could think of little beyond fine tuning current law. Consequently, our basic policy, which has been in place since the depression, remains intact: We will continue to try to boost farm income by restraining the productivity of the American farmer.

That, of course, is the essence of our farm programs. In every other area of our society increased productivity is considered a good thing—in fact, it's a national imparative. In the strange world of Government-controlled agriculture, however, it is seen as an embarassment that must be avoided at great cost.

Thus, we have paid dairy farmers to kill their cows; we order orange growers to squander a third of their crops; we require a Government license to grow peanuts, we pay our crop farmers to take nearly one-quarter of our arable land out of production—all on the theory that this will reduce supply and raise farm income.

It does not work.

When we curtail our production, foreign nations simply expand theirs and capture the markets that we have voluntarily vacated. Over the last 20 years, for example, Western Europe's crop expansion has displaced, in effect, 30 million of the acres that we have unilaterally set aside. Latin American crop expansion in the 1980's alone has displaced another 20 million of acres we have taken out of production.

If we had not been curtailing our production for the last 20 years, this new foreign acreage would not have been planted, and we would not need set-asides today. This policy has accomplished nothing more than to deport our farm land.

We have now reached a critical point. With rising living standards around the world, the demand for agricultural products is likely to skyrocket during the coming boom years of the 1990's. Demand may rise by as much as 30 to 50 percent, according to Dennis Avery of the Hudson Institute.

America has a comparative advantage in agriculture, and we are in a unique position to meet this rising demand. We have the experienced farmers, good soil and climate, and perhaps most of all, we have already invested in our agricultural infrastructure. The railways, the paved roads, the storage facilities—all of that is in place here.

And yet if we continue to restrain our production, other countries will develop similar infrastructure, fill their domestic needs themselves, and move to capture foreign markets. We know that any country that wants to pay the price can develop and expand its own agriculture. Even Saudi Arabia—desert Saudi Arabia—is now a net exporter of wheat. Our urgent task should be to discourage other countries from making that expensive investment and instead buying farm products from the United States, where these products can be produced more efficiently. We cannot do that by shutting down a quarter of our farm land and surrendering markets. If we continue our present policies for another 5 years, we will lose markets, not just for the life of this farm bill, but permanently.

That, Mr. Chairman, is why we are making a tragic mistake. We are systematically suffocating our largest and potentially most competitive industry. And we are doing it in the name of farmers.

We desperately need a new farm policy, one based on free markets and free trade. If the commodity groups would devote half as much energy to achieving trade reform as they do lobbying for bigger subsidy checks, the United States could quickly get a good GATT agreement. The Uruguay round is in jeopardy today because the Europeans cannot believe we are serious. Even if we reach an agreement at the bargaining table, they think our own farm lobby—led of course by the sugar and peanut blocs—will strangle it. Commodity groups need to understand that reducing the Government's role in agriculture and expanding world trade would be the best thing that could happen to the American farmer.

Mr. Chairman, I have used some strong language and colorful analogies in recent months as my way of yelling "Stop!" at policies which I feel are profoundly misguided. I sincerely hope that my colleagues on the Agriculture Committee were not unduly offended. None of

it, of course, was personal. I have great respect for most of them—for the chairman and ranking member, my colleagues from Texas Mr. STENHOLM, Mr. COMBEST, Mr. SARPALIUS, my conservative friends, Mr. GRANDY and Mr. GUNDERSON, and others. Nevertheless, this is something I feel strongly about. As the philosophy of Adam Smith is remaking our world. I can see no reason that we should continue to manage our agriculture from Washington, DC. Today's farm policy is a relic of ideas that have been entirely repudiated by events. It must be changed.

Mr. DE LA GARZA. Mr. Chairman, I yield 2 minutes to our colleague, the gentleman from Kansas [Mr. GLICKMAN], one of the distinguished subcommittee chairmen on our committee.

Mr. GLICKMAN. Mr. Chairman, I would start out by saying that my good friend, the gentleman from Texas [Mr. ARMEY], is not completely wrong. He is just overwhelmingly substantially wrong, and I am sure that after the full debate on these issues, Members of this House and members of the American public will recognize that. During this farm bill debate, we will hear a lot of seemingly arcane phrases like target prices, loan rates, person determination, set-asides, flexibility, acreage allotments, conservation reserve, and dozens of others. These terms, while important, tend to obscure the bigger purpose of why we are here reauthorizing Federal farm policy. The real issue in all of this is food security for the United States of America.

Mr. Chairman, what seems so easy to obtain in this modern day of fancy supermarkets, fast foods, and microwave dinners continues to be the Achilles heel to may developing nations. Failing to ensure food security has led to the demise of leaders and entire governments, as we witnessed in Eastern Europe. Indeed, Gorbachev's top priority in rebuilding the Soviet economy, and preserving his political position, is to improve the productivity of Russian agriculture.

Developing countries around the globe spend billions of precious foreign exchange every year importing food and still millions of their citizens go to bed each night hungry and millions more die from malnourishment. This tragedy is further compounded by the fact that while they still are unable to meet this basic human need, other pressing national needs go unmet.

Even with advancements in technology and agricultural productivity, food security can not be taken for granted, which many do, ironically, in part because of the success of modern farm programs. This success grew out of the farm and rural development programs of the New Deal, which laid the foundation for economic growth that led us out of the Depression.

Those programs, just like current ones, were designed to keep farmers in the business of producing food. The New Deal farm bills, the precursors of modern ones, enabled us to feed ourselves during World War II and made it possible, too, for us to feed Europe and the rest of the world following the war. Because these programs, which admittedly are not perfect, have worked, the United States, alone among great powers, has never suffered massive famine, has never had to look beyond its borders to feed itself, and has kept millions around the world alive.

Many of our colleagues will ask themselves why we need to pass this farm bill, why we need to spend billions on these programs. To them and those who have questions about the heart of this legislation, let me say: It no longer is good enough for farmers to prosper only once in a while; it no longer is good enough for the poor to eat only in good years; it no longer is good enough to ask our farm families to plant their crops without a clue as to whether they will recover their investment; it no longer is good enough for our export customers to wonder whether they will be left holding an empty bag if supplies tighten up here; it no longer is good enough to have to choose between supplying our own people and those beyond our border; and it no longer is good enough to say that we can't feed the world, to justify doing less than we are able.

I wish I had made that argument. I did not; it came from one of the leading statesmen of American agriculture, Senator Hubert Humphrey. He was right when he made those comments in 1976 and those words ring just as true today.

Over the next couple of days as we debate the details of this legislation, I will address the specific provisions which were developed by the Wheat, Soybeans, and Feed Grains Subcommittee. Let me just note briefly in closing, that the distinguished chairman of the Agriculture Committee so often reminds those of us on the committee, legislation is the art of the possible at the moment. It is true of any legislation, including the bill at hand. As the debate unfolds, I urge my colleagues not to lose sight of the real goal of this bill, ensuring our food security, and to support the bill.

Mr. MADIGAN. Mr. Chairman, I yield 6 minutes to the distinguished gentleman from Kansas [Mr. ROBERTS].

Mr. ROBERTS. Mr. Chairman, I thank my Republican leader for yielding me this time.

Mr. Chairman, I want to thank the chairman of the full committee, the gentleman from Texas [Mr. DE LA GARZA], and the ranking member and all of my colleagues.

Mr. Chairman, to pass any farm bill is always a gauntlet, if you please, and to use the language of a former chairman of the Committee on Agriculture, it perhaps is not the best possible bill but the best bill possible, and I think it is.

We have had to pass this bill under very, very difficult circumstances in the Committee on Agriculture. We have had budget restrictions, very severe budget restrictions, more to come.

We have those who are well-intentioned, the speaker before me, the gentleman from Texas [Mr. ARMEY], my colleague, who is, I think, very well intentioned, but a self-declared Assistant Secretary of Agriculture.

Many of the things that he would propose or has proposed, I think, would be very counterproductive. We had some environmental challenges before us in the full committee, and I think we have met those challenges. The chairman has already shown what the farm bill would cost us, cost us the taxpayers of the United States. I say "cost." It is an investment as opposed to a cost. He showed us the chart in relation to the total spending of the Federal Government.

□ 1740

But we still hear some people say that the cost is out of control. That is just not the case. I know the spending shot up to $26 billion in 1986. Please, my colleagues, disavow yourselves of that number. That is not the correct number as of today. I am glad we did spend $26 billion to prevent the worst depression that we have had in farm country for many, many years. It saved many farm families.

Since that year, the program costs have been heading steadily downward. This year's cost is estimated at $10 billion, a 60-percent spending reduction in 4 years.

Now, if everybody around this place had done that, my staff tells me in terms of the budget numbers, if every segment of the budget reduced its outlays in proportion to agriculture, savings would have been approximately $455 billion. We would not have to go to a sequester, if in fact we would have in the rest of the Federal Government reduced spending like we have done in the Committee on Agriculture under very, very difficult times.

I must tell Republican Members, and Democratic Members, for that matter, I am a little bit upset with the Office of Management and Budget. If you want to view this bill in the context of OMB, which spells "farm" c-u-t, I think perhaps this is a general trashing of the farm bill. Yet we have a very fine letter from the Secretary of Agriculture that shows that we are close in the House Committee on Agriculture and that we are making progress.

The gentleman from Illinois [Mr. MADIGAN] will have the latest figures

in that regard, and he and the gentleman from Texas [Mr. DE LA GARZA] will bring this bill under budget acceptable to the Secretary of Agriculture.

I do not know if you can get anything acceptable to OMB at this stage of the game, more especially with agriculture. I do not know if Mr. Darman can spell "farm." He can spell "agriculture." Asking Mr. Darman and OMB for help on this particular farm bill is like asking for a neck massage from the Boston Strangler.

So I would tell Members to pay attention to the Department of Agriculture and Mr. Yeutter, not to OMB.

Now we have those who are intent on reforming this farm bill. I urge my colleagues to look under the banner of reform. See what lurks there, if you will. They have a motto: "If it ain't broke, break it."

I would tell Members that all of these amendments that go into the structure of the farm bill can be very counterproductive. We have one in particular by the gentleman from Texas [Mr. ARMEY] who wants to change the farm program from a supply management program, guaranteeing the consumer of New York, yes, Dallas, TX, and San Francisco and all of the metropolitan areas, that they spend approximately what, 12 percent of their income dollar for food; 88 percent goes for other things.

The gentleman from Texas [Mr. ARMEY] wants to change that to a welfare program. The purpose of the program is to enable the farmer-stockman to have some stability, some predictability, so that we can feed this country in a troubled and hungry world, and boy, do we do that. It works.

Just look at the lines in Eastern Europe if in fact you do not think this works. Yet we have those that want to go back to the farm policy of Poland and Hungary before the Berlin Wall came down. That is utterly ridiculous.

Means testing. We have a gross yardstick, and boy, it is gross, and we have got a net income yardstick, and we are going to take the efficient producer, a farmer and two sons with 2,000 acres in western Kansas that really produce more wheat than any State, and take them out of the farm program on the basis we are trying to help the small family farmer. I assume that is somebody 5 foot, 3 inches tall from Vermont, a hobby farmer. And they are fine folks. I am all for them. They belong on the cover of the Saturday Evening Post and in all sorts of nostalgic look-backs to farm country.

It does not exist any more. We are trying to help the producer here to feed the hungry and malnourished. I know it makes a lot of populist headlines, but it would be very counterproductive. We are going to lose the partnership we made with the environmental community. We have got a fine partnership with the environmental community. We have made progress on ground water, we have made progress in regard to food safety, we have made progress in regard to LISA, low intensity sustainable agriculture. If we take the efficient producer out of the program, there goes the land, there goes the partnership in regard to the environmental progress that we have made.

How are you going to implement this thing that the gentleman from Texas [Mr. ARMEY] wants to put into effect? You are going to have to have every farmer take their income tax return down to the local ASCS office. That is going to be a joy to behold. Most farmers wait until the last minute to file their income tax return. You have a whole bunch of deadlines you have to meet in regard to the farm program. I do not think the farmers will like to see that.

Mr. Chairman, I have run out of time, but I would simply indicate this is a good bill. What is at stake in the farm bill today is America's largest single industry, and the benefit of the consumer and the farmer-stockman. Please support this farm bill. We have done a good job.

Mr. DE LA GARZA. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from Illinois [Mr. HAYES].

Mr. HAYES of Illinois. Mr. Chairman, I rise today to express my concerns about H.R. 3950, the Food and Agriculture Resources Act of 1990, otherwise known as the 1990 farm bill. While I have two major concerns about the bill, I will more than likely support it because I expect the advantages will outweigh the disadvantages. Mr. Chairman, I represent the majority of the South Side of Chicago, which is a very urban area with concerns like affordable housing and adequate health care, but not necessarily the 1990 farm bill. Out of the 500,000 plus people living in my district only a very few if any, own a farm. Certainly there are no farms within the district, so my concerns are clearly representative of a consumers point of view and not that of the farm industry.

I believe that the intent of the 1990 farm bill is to lessen the farmer's dependence upon the Government and strengthen his reliance on the open marketplace for income and the success of his farm. The issue of total reliance must be addressed because my concern is that even though farmers receive Government assistance, the price of food continues to constantly climb. When the farmers benefit, the savings should eventually trickle down to the consumers.

My district is one of the poorest congressional districts in the country and it is important to my constituents that the price of food stablize. Again, if we in this country wish to subsidize the farmer then in turn the subsidy should be reflected in the price of the farmer's products. My vote in support of this legislation reflects my belief that the 1990 farm bill should benefit the American consumer as well as the American farmer.

Second, I feel that this Congress does not have a real problem offering support and subsidies to this Nation's family farmer. However, I suspect that some of the concern expressed, and it is clearly a concern, is that the majority of these subsidies are targeted toward sustaining and financing corporate farmers instead of what we perceive to be the traditional family farmer. Since 1985, the family farmer and especially minority farmers have lost their farms at an alarming rate. It was surprising to me to learn that many of the farmers benefiting from the farm bill's programs are those farmers whose annual incomes are well over $100,000. It is my hope that we look at the small family farmer and the minority farmer and make the 1990 farm bill work for them and not only for the corporate farmer.

Mr. MADIGAN. Mr. Chairman, I yield 3 minutes to the most patient gentleman from Florida [Mr. GRANT].

Mr. GRANT. Mr. Chairman, I thank the distinguished ranking member for yielding me this time. I want to make one thing absolutely clear to people that may not be familiar with farm policy in this country, that we are not subsidizing farmers. A truer sense of the word would be that we might be subsidizing the cost of food products that American people get, and in fact, people all across the world. I thought the chairman made an excellent point in his presentation, that we spend less of our disposable income than any nation in the world. It does not matter how much the income is as a percentage, we spend less.

□ 1750

Mr. Chairman, we do not spend 12 percent; we spend 10.4 percent of our disposable income.

By comparison, the Japanese spend 20 percent, the Italians 22 percent, the Russians 25 percent, and the Chinese 46 percent of their disposable income.

I would say that we have got a pretty good deal going for the American consumer. Hopefully, it is a pretty good deal for the American farmer, too.

That is part of the policy that we are attempting to continue with this farm bill. Please understand that what Americans want is a consistent supply of high-quality food and they want it when they want it and they want it for the least cost possible.

Some people still continue in their belief that somehow every morning the employees at Safeway or Publix or Winn-Dixie go out behind the store and pick up the food from a little

garden in the back of the store. That is not the way it works. It never has worked that way.

And for those of you who did not grow up on a farm, let me tell you something: There was a great farm depression that preceded the Great Depression in this country. And if you were in Florida, northern Florida, like I was in the late 1970's and early 1980's, you would know there was a depression in the farm country then, too.

What we are trying to do is to insure that that does not happen again. Sure there are agreements that are made. We want the goals that we have established and the farmer policies to continue, that is, to feed our people at the least cost possible, and to continue to supply them with high-quality edible products on a continuous basis. To accomplish that, we need farmers, ladies and gentlemen, farmers. You cannot get into the farming business overnight.

So we established a policy to help us meet those goals. One of those, one of the tenets of that agreement, is to make farming profitable. There is nothing wrong with farmers making a profit.

Who ever thought of such a thing? You would not dare dream of going into the shoe business if you could not make a profit, or into the automobile repair business if you could not make a profit.

There has been some quid pro quo, some exchange of values here. Farmers have agreed to certain controls. The Government has agreed, in exchange for some of these controls, to see that farmers are paid a reasonable price for their products.

Basically, two methods are used. Under one, production is practically unlimited and prices guaranteed; under another, production is controlled and the market is geared to work. It works well, some say too well, some say not well enough, but the reality is that our people spend less of their disposable income than any other people on Earth for food.

Mr. DE LA GARZA. Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN pro tempore (Mr. ALEXANDER). The Chair recognizes the gentleman from Florida [Mr. GIBBONS], a member of the Committee on Ways and Means, for 15 minutes.

Mr. GIBBONS. Mr. Chairman, I yield myself such time as I may consume. I do not intend to take the full 15 minutes. This debate is going to go on long enough.

So when I finish and Mr. CRANE finishes here, we are going to yield the balance of our time to the gentleman from Texas [Mr. DE LA GARZA] and the Committee on Agriculture.

Mr. Chairman, certain provisions of the agriculture bill were referred to the Committee on Ways and Means because they affect taxes and export trade. We made some recommended changes. Fortunately, the Rules Committee included most of the changes we made in the text of the bill.

So, therefore, to that extent, we support the bill.

During my leave to insert, I am going to insert the chairman's statement, which covers entirely the things that we did in the Committee on Ways and Means bill.

I only want to say there are a couple of other amendments, one that I have that will come later. I do not intend to take up a lot of your time by explaining it.

It essentially limits for a 2-year period those programs, those agricultural support programs that appear to be subsidies. The reason why I do that and ask the Congress to join me in that, in limiting those programs to 2 years and not 5, is that we are engaged in a huge round of multilateral negotiations now. And it is my opinion that if we adopt a 5-year farm bill, we just freeze agriculture right where it is and the European Community will continue its export subsidies, wrecking agricultural systems all around the world, and we will contribute our part to that also.

So I think it would be much easier to go for 2 years now rather than 5 years, just on subsidy programs. It does not affect any of the rest of the agricultural bill on its 5-year term, just on the subsidy programs.

Let us complete the Uruguay round and then come back and make whatever amendments we have to do to future agricultural bills rather than be placed in the position of having to repeal all of this at the end of the Uruguay round.

I have argued with the administration for not having done this. I know Senator DOLE has suggested perhaps a 1-year bill. But I thought I would do a little better by the agriculture by saying a 2-year bill on just the subsidy programs rather than the 5 years that has been proposed.

We have also made some changes in the sugar program. We are out of step with the General Agreement on Tariffs and Trade. We have been found to be in arrears, in violation of the General Agreement on Tariffs and Trade. So the Ways and Means is suggesting a tariff rate quota instead of the current quota system that the GATT panels have found against.

We need to do this so that we will not be an international scofflaw.

It will not affect the operation of the domestic sugar program. It just makes it legal as far as our GATT agreement is concerned.

Mr. Chairman, I yield such time as he may consume to the gentleman from Illinois [Mr. CRANE].

Mr. CRANE. I thank my distinguished colleague, the chairman of the Subcommittee on Trade, for yielding time to me.

Mr. Chairman, as the debate has thus far indicated, H.R. 3950 is an expansive piece of legislation covering numerous domestic agriculture programs and related issues. However, there are a few provisions that fall within the jurisdiction of the Committee on Ways and Means, and we have attempted to address them in a manner that does not impede the basic purposes of this important farm legislation.

One significant, yet I believe noncontroversial, change that the Ways and Means Committee made to this bill is to add a provision giving the President the authority to implement a tariff-rate quota on imports of sugar. This authority is designed to permit the United States to implement certain limits on sugar imports in a manner which is consistent with our international obligations. Last June, the United States lost a dispute in the GATT [General Agreement on Tariffs and Trade] when a panel ruled that current U.S. sugar quotas were in violation of GATT rules.

The new subtitle specifically authorizes the President to establish and implement a tariff-rate quota on imports of sugar, syrups, and molasses, if the U.S. Trade Representative determines that the implementation of such tariff-rate quota would not be inconsistent with U.S. international obligations.

This authority allows the tariff-rate quota to be put in place beginning October 1, 1990. It is expected that, in establishing the tariff-rate quota or making adjustments thereafter, the USTR would consider the interests of all concerned parties, including domestic sugar producers, domestic consumers, and materially affected trading partners.

I should note that the provision does not mandate the implementation of a tariff-rate quota. The President would retain the option of using either this authority or the authority under section 22 of the Agricultural Adjustment Act of 1933 to regulate sugar imports. Both would be GATT legal.

A second important aspect of the Ways and Means portion of this bill is the treatment of imports under various commodity research and promotion programs, commonly called checkoff programs. Currently, fees for checkoff programs are imposed on beef, cotton, dairy, eggs, honey, pork, potatoes, watermelons, wool, and mohair. The treatment of imports under these programs varies from commodity to commodity.

The provision approved by the Ways and Means Committee would simply state in the statute that any commodity checkoff program may not be applied to imports unless the application

is in a nondiscriminatory manner consistent with U.S. international obligations.

There are several other miscellaneous trade-related provisions included in this bill which the Ways and Means Committee reviewed. They involve primarily reports, studies and the export enhancement program, and our committee either left them untouched or merely clarified that certain determinations be made consistent with existing trade statutes and our international obligations.

Mr. Chairman, I feel that we have appropriately addressed those issues within the jurisdiction of the Ways and Means Committee and have enhanced our farm programs without interfering with U.S. trade law or upsetting our international obligations.

Mr. ROSTENKOWSKI. Mr. Chairman, H.R. 3950, the Food and Agricultural Resources Act of 1990, was sequentially referred to the Committee on Ways and Means, because certain sections of the bill fall within its jurisdiction with respect to tariffs, imports, trade agreements, and revenue matters.

On July 18, the Committee on Ways and Means considered H.R. 3950, as reported by the Committee on Agriculture, and reported it favorably, with additional amendments. All of the amendments approved by the Committee on Ways and Means have been incorporated into the original text of the bill now before us, pursuant to the rule providing for the consideration of H.R. 3950.

The amendments approved by the Committee on Ways and Means made two significant changes to the sugar title—title II—of H.R. 3950, as reported by the Committee on Agriculture. In addition, certain amendments, relating to the consistency of agricultural authorities with U.S. trade laws and international obligations under trade agreements, were approved to various sections of the bill.

Most significantly perhaps, the Committee on Ways and Means deleted the sugar reexport program, as reported by the Committee on Agriculture. The authorization of such a program falls within the jurisdiction of the Committee on Ways and Means with respect to both imports and tax matters. This proposed program would have assessed a tax on the sale of sugar and fructose sweeteners in the United States, in order to finance subsidized purchases by U.S. sugar processors of foreign sugar from certain eligible foreign countries. In the view of the Committee on Ways and Means, such a program presented serious problems of trade policy, economic policy, and tax policy. The committee, therefore, concluded that its deletion from the bill was appropriate.

Also on the subject of sugar, the Committee on Ways and Means added a new subtitle to the bill authorizing the implementation of a tariff-rate quota on sugar imports, in order to comply with our international obligations under the GATT. The current system of import quotas on sugar has been found by a GATT panel to be in violation of the GATT, and the United States, therefore, has an obligation to change our restrictions on sugar imports to a GATT-compatible system. The Committee on Ways and Means amended this bill to authorize the implementation of such a GATT-compatible tariff-rate quota system on October 1 of this year. The provision does not amend or affect the operation of the domestic sugar price-support program. In fact, it is entirely compatible with the domestic sugar program authorized elsewhere in this bill. It is also a discretionary program which authorizes, but does not require, the implementation of a tariff-rate quota.

In the area of commodity research and promotion programs, subtitle B of title VI, and subtitle C of title XIV, contain provisions authorizing the application of research and promotion fees, commonly called checkoffs, to imports of commodities. The Committee on Ways and Means examined these subtitles in light of our jurisdiction over imports, import fees, and international trade agreements. The committee amendments added a new provision to ensure that all commodity research and promotion programs are applied to imports only in a nondiscriminatory manner, consistent with our international obligations. The new provision will apply to all checkoff programs, whether they are established under current law, under this bill, or in future legislation. The provision is not meant to hamper the effectiveness of these programs, but rather is meant to ensure the application and enforcement of the programs, consistent with U.S. international obligations.

In title XII of the bill, relating to the various authorities on agricultural export promotion, the committee approved certain technical modifications to avoid conflict or inconsistency between such export authorities and the operation and enforcement of U.S. trade laws.

Finally, the Committee on Ways and Means, which has jurisdiction over the use of Social Security numbers, deleted the provision in section 1762 of the bill requiring the submission of Social Security numbers by owners or operators of Food Stamp Program participants.

Mr. Chairman, I believe these amendments represent constructive improvements in H.R. 3950 as reported by the Committee on Agriculture. I urge my colleagues to support the bill, as amended.

Mr. CRANE. Mr. Chairman, I would ask that the minority time that has not been consumed be yielded to my colleague, the gentleman from Illinois [Mr. MADIGAN], the distinguished ranking minority member on the Committee on Agriculture.

Mr. GIBBONS. Mr. Chairman, I want to reiterate that the 2-year proposal that I am making has nothing to do with the Ways and Means jurisdiction. Our jurisdiction does not extend to that. It is merely an expression of my own and not any attempt to enlarge our jurisdiction.

Mr. Chairman, I yield back to the Committee on Agriculture the balance of my time.

□ 1800

Mr. MADIGAN. Mr. Chairman, I yield 5 minutes to the gentleman from Missouri [Mr. COLEMAN].

Mr. COLEMAN of Missouri, Mr. Chairman, today starts the food fight in the House. That is not meant to be sarcastic, but I must say that the way the American farmer is being treated in the press and by some of my colleagues these days it may be an apt description of the coming debate. But let's make it clear that this legislation is very serious business to farmers, consumers, and the national economy.

Unfortunately, the 1990 farm bill is being attacked from all sides by people who do not know the first thing about farming and refuse to look at Federal farm programs closely enough to understand their importance to this country.

Today, we will look at statistics. We will hear about percentages. We will be shown charts. Our eyes will glaze over as we ponder the meaning of bar graphs and squiggly, crisscrossing lines as we are shown the cost of farm programs.

But at the end of the day when you stop off at the supermarket on the way home, for once do not rush through the store, get your pound of hamburger and race to the checkout line. Take a moment and look around—at the abundance, the variety, the freshness, the wholesomeness of what is contained in there. It is provided to you by the American farmer.

One of the reasons the store is filled with food is Federal farm policy. It is intended to provide a stable, abundant food supply at a reasonable cost. It has succeeded for many years.

Now, let's take a moment to talk about all those so-called millionaire farmers self-appointed critics say are on the Federal dole. Well, in my State of Missouri, as of 1988, there were 113,000 farms with an average size of 269 acres. If you are making a million dollars on 269 acres, then you're not growing a legal crop!

Let's look further at the overall balance sheet of Missouri farmers. America's farmers, even those with comparatively small farms such as those in Missouri, have a huge capital investment whether they farm 300 acres or 3,000. There is land; there are animals to purchase and nurture; machinery to buy and repair; storage bins and buildings to be kept up so that grain can be stored properly and livestock housed.

The farmer is involved in a business that takes a large upfront investment before he makes a dime of profit. Following the farm recession, the Missouri Department of Agriculture says that Missouri farm real estate totaled $17.5 billion with machinery and motor vehicles valued at more than $3 billion.

And, there is more: farmers must buy livestock and the feed for them; seed, fertilizer and lime; pesticides; fuel and electricity to run the machinery. Breakdowns are always occurring and repairs must be made or planting

deadlines are missed or a crop is left to ruin in the field. All these items cost lots of money. In Missouri, total production expenses were $3.4 billion in 1987.

This investment is put at risk every year, dependent on weather, insects and the vagaries of the marketplace. What the farm program does is provide a safety net to catastrophic losses due to no fault of the producer.

Few if any Americans are getting rich farming. Talk to farmers and they will tell you they do it for the love of the land, the way of life it provides for them and their families.

What do all of those billions of dollars mean to America's economy? Most people in Kansas City know, because a large part of Kansas City's economy is built around American agriculture. The farm economy includes processors and retailers, barge shippers and truckers, meatpackers, the local feed and seed store where farmers purchase everything from fertilizer to grease guns.

All of these people depend on a stable farm economy, and the farm bill is designed to help provide that.

The farm bill is a massive document. It contains much more than farm subsidies and export promotion programs. Nearly a quarter of it deals with this Nation's agricultural research and extension programs. Agricultural research is this Nation's farm infrastructure, and the knowledge our researchers gain is widely disseminated by the Extension Service.

This legislation further defines our soil and water conservation goals so that American agriculture will continue to be the most productive in the world.

Regarding the conservation compliance program, we have initiated actions to assist producers in complying with requirements for those who farm highly erodible soils. In Missouri's Sixth Congressional District alone, more than 20,000 plans have been approved, calling for thousands of miles of terraces to be constructed or new cropping systems to be implemented. The cost of assisting north Missouri farmers to comply with the sodbuster provisions by 1995 has been estimated to be more than $180 million.

In the matter of wetlands, the committee has restated the definition of the 1985 act, clarifying the standards for a wetland determination. A wetland is land that: First, has a predominance of hydric soils; second, is inundated or saturated by surface or ground water at a frequency and duration sufficient to support a prevalence of hydrophytic vegetation typically adapted for life in saturated soil conditions; and third, under normal circumstances does support a prevalence of such vegetation.

During committee consideration of this legislation, we took a close look at the delineation manual used by the Soil Conservation Service, among others, to make wetland determinations. It is clear from a careful reading of the manual that only one part of the definition of wetland was being used to make determinations. Because this clearly is not the intent of Congress, the committee decided to state, once again—clearly—what constitutes a wetland.

The committee legislation also makes certain that if a parcel of land lacks one of these characteristics it is exempt under the swampbuster provisions of the law.

In an effort to make certain producers know their land has been designated as wetland, the committee also will require the Secretary of Agriculture to delineate wetlands on maps, to notify affected landowners and then—prior to certifying the map as valid for a wetland determination—provide affected parties a right to appeal the determination. Under the appeal provisions, the Secretary is required to make an on-site examination.

The committee also chose to provide exemptions for minimal effects of wetland conversions and to give landowners a way to establish a wetland in mitigation for the conversion of another parcel of land. The landowner is given an appeal right should any mitigation require giving up more than on a one-for-one basis.

Mr. Chairman, I want to conclude by saying that in a 5-year period we have seen the farm economy change dramatically. Five years ago we were in a recession. Many farmers still are operating on the thinnest of margins, and the slightest of economic downturns—or rise in interest rates—could turn what is being described as a stronger farm economy into a depressed one. American agriculture is getting back on its feet, but slowly.

During the 1985 debate, I sponsored section 1440 that called on the Extension Service in several States to assist farmers and farm families whose lives were being uprooted by the farm recession. Families were breaking up; drug and alcohol abuse were on the rise; even suicides were becoming common in what had always been a stable, wholesome country life.

The Extension Service in Missouri responded to section 1440 with dedication and energy in rural Missouri. Other States, too, provided counseling and outreach to families; they helped displaced farmers to learn new ways of thinking and new ways to apply their skills. I want to take this opportunity to praise the Extension Service for its work, especially those folks in the Missouri Extension Service.

I am pleased that we are extending and expanding the original section 1440 in this bill.

When we begin debate under the 5-minute rule, Members should remember that there is more in this farm bill than crop subsidies. This is sound legislation I believe the House should adopt.

Mr. DE LA GARZA. Mr. Chairman, I yield 2 minutes to our distinguished subcommittee chairman, the gentleman from North Carolina [Mr. ROSE].

Mr. ROSE. Mr. Chairman, I understand that Willie Nelson is not too happy with our farm bill. I have a great deal of respect for Willie Nelson's abilities, and I appreciate his support for farming and farmers in America.

Unfortunately, we have done about as good as we can do at this point in the history of our Republic, in this bill. I urge all my colleagues in the House to give very strong consideration to supporting this bill, to stay with it like it is, and to not vote for amendments that would cripple it.

One of the areas that is in this bill that some of my colleagues are questioning and are going to offer amendments to change, is the peanut title of this bill. This peanut section is a model section, in my opinion, because it does not cost the taxpayers of this country to have it operate. Peanut farmers in the Southwest and the Carolina-Virginia regions of this country actually cover each other's losses if any occur in the operation of this program.

Our former colleague, now the mayor of Atlanta, GA, was just here this afternoon and has written all of our colleagues in the House to say how important the peanut program is to all the small farmers in south Georgia where he hails from. This program is a good bargain for the American public. Those that would say the consumer is getting a bad deal in the peanut program are not telling the facts straight.

We have sent everybody in the House a little peanut butter and we have sent them a peanut candy bar. If we gave the peanuts to those people that make those products, the price to the consumer would not come down. Stick with the farm bill, and stick with the peanut program.

Mr. MADIGAN. Mr. Chairman, I yield 3 minutes to the very distinguished gentleman from Louisiana [Mr. HOLLOWAY].

Mr. HOLLOWAY. Mr. Chairman, I would like to compliment the chairman of the committee, the gentleman from Michigan [Mr. DINGELL] and our minority leader, the gentleman from Illinois [Mr. MADIGAN] for the bipartisan support and cooperation we have had on this bill.

First, some in the House here seem to say, if it is not broke, break it. I am saying this bill is not broke, so let Members leave it alone.

I was not here in 1985 when we did the 1985 farm bill, but the authors did a great job. Agriculture in our Nation

is on the rebound. We as Southern farmers struggle a little more than Midwestern farmers because we have to have a little more money per bushel to produce. We have to live with that. But Congress must set policy for the Nation as a whole. We in the South have to live with the fact that producers in other regions can be a little more efficient than we are. Many of our farmers who grew soybeans are out of business now. They had to diversify and go other ways.

The Ag Committee has continued the market-oriented trend of the 1985 farm bill. We have to grow for the export market. We depend on agriculture to meet some of our need for exports to offset imports and help balance trade. We had days when farmers were asking for $9 guaranteed per bushel for soybeans. We could not do that because then we grow for domestic use only and ignore market signals. We cannot do that in this bill.

The Ag Committee has acted responsibly. As Members will see in this bill, we have had to give some things up that we very badly wanted, particularly for soybean farmers. They wanted more income support than we could afford. They did not get it. We wish we could do more, but we could not.

I want to touch on the basics, and I would like to follow the gentleman from North Carolina on peanuts. Something that is very important to me is sugar, something that is essential to the economy of rural areas in Louisiana. Unemployment in rural areas of this country is 15 percent. If we destroy the agriculture of this Nation, it will be 30 percent. Agriculture is essential to rural development throughout this Nation. In Louisiana, sugar is essential. Our major competitor, the EC, dumps on the world market. They support sugar at 32 cents a pound. Here we are with the gentleman trying to reduce 18 cents down to 16 cents in this country. Our sugar farmers can compete if we have a fair market, a fair world to compete in, but it is not that way.

We as Americans have long given in to other countries. We are the good guys. If we unilateraly lower our loan rate, we will wait 20 years until they come around to conform to what we have done. We must not give away our bargaining power. I say today we have to try to protect and try to keep the good programs we have. The sugar program costs the American taxpayers nothing. We have people say that under the present program, consumers pay. But the sugar program eliminates wild price swings and in years with a sugar program, the cost of sugar is cheaper to the American consumer.

□ 1810

The only people who are going to benefit if we reduce the sugar process are the tremendous conglomerates in this country who are going to make a profit from it. The farmer will be hurt and the consumer will never see lower costs for sugar-containing products. The consumer will not get one bit of benefit whatsoever from it.

So I ask the Members today to support the farm bill. I am probably as conservative a Member in this House as, for instance, the gentleman from Texas [Mr. ARMEY], but we need a good farm bill. We need a bill so we can keep people in rural areas of this country producing. We need a bill that allows us to continue to export into the world market and bring in the $28 billion to $30 billion from exports and hopefully keep growing. We have to do export enhancement and carry out some of the programs before us.

So, Mr. Chairman, I close by saying that I ask for the support of the Members of this House for a bill that we have pretty well cut as short as we can. I believe we have made this the best bill we can possibly produce.

Mr. DE LA GARZA. Mr. Chairman, I yield 3 minutes to our colleague, the gentleman from Missouri [Mr. VOLKMER], one of our distinguished subcommittee chairmen.

Mr. VOLKMER. Mr. Chairman, I commend the gentleman from Texas [Mr. DE LA GARZA] and the gentleman from Illinois [Mr. MADIGAN] and other members of the Agriculture Committee for bringing the 1990 farm bill to the floor. Even though I may have some concerns about some of the provisions, I also recognize the fact that we have budgetary constraints that require us to do certain things we would not necessarily like to do.

However, I would at this time like to address title XV of the bill, which is State and private forestry. This is the first time in the farm bill in recent memory that we have had a forestry title. In there we incorporate some of the provisions that were commended by the President, including the America the Beautiful Foundation. Additional tree planting is what we are looking at, and also better stewardship for our existing trees and assisting with technical assistance with nonindustrial forestry people who have private forest reserves.

In this bill we also provide for disaster assistance and fire-fighting and forest stewardship assistance, along with our community and urban forestry.

The gentleman from Alabama [Mr. HARRIS] has been instrumental in the fire-fighting area, and I would like to yield to him at this time to address that portion of the bill.

Mr. HARRIS. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I want to commend the gentleman from Missouri [Mr. VOLKMER] as well as the gentleman from Texas [Mr. DE LA GARZA] and all the members of the committee who have worked so hard on this bill. This represents a lot of hard work.

I am especially proud to have had a part in the State and private forestry section dealing with our volunteer fire departments. This bill recognizes its importance.

This is "Mom and apple pie," because the job that the rural fire departments perform are so important to us in the rural areas. We see every day all the problems we have now with fires all over the country, and we see the need for a force there than can be mobilized to help us. This is a great recognition of the problem, and hopefully we can develop a solution that will help us protect our properties in Alabama and through rural America.

Mr. Chairman, I thank the gentleman for yielding, and I look forward to working with him.

Mr. VOLKMER. Mr. Chairman, I also thank the gentleman from Alabama [Mr. HARRIS] for his assistance in bringing this part of the bill to us, along with other members of the subcommittee who have worked with me as chairman of the subcommittee to formulate the provisions that are in title XV of the bill. I think that they are supported unanimously by the subcommittee and hopefully by the full committee.

Mr. MADIGAN. Mr. Chairman, I yield 6 minutes to the gentleman from Wisconsin [Mr. GUNDERSON], the ranking member of the Subcommittee on Livestock, Dairy and Poultry.

Mr. GUNDERSON. Mr. Chairman, first of all, let me begin by saying a special word of commendation of praise to our distinguished chairman and our distinguished Republican leader. They are valiant warriors on behalf of American agriculture and all it includes. I think everyone ought to recognize them for the toil they have paid in the trenches on behalf of America's ability to eat and eat well and to feed a hungry world.

Mr. Chairman, this is my first opportunity as the ranking Republican of the subcommittee to participate in the writing of a farm bill. It has been both a privilege and a challenge to each of us in our subcommittees as we try to deal with the realities of the budget concerns, the fiscal constraints, and the environmental concerns, and through all of that try to write a farm bill that is something we are proud to take back to our farm communities.

Through this effort this year we have had a goal, or at least I have pursued a goal of what I call a modern national dairy industry. While the bill that we bring to the Members today is not everything any of us in an ideal world would like, I must say that this bill includes many, many important steps to move toward a modern dairy industry that both supports the dairy farmers in this country and equally

allows us to prepare for what obviously sometime in the next 10 years will likely become international competition.

In 1980 the Government, through the 1980 farm bill, signaled that we simply were having price supports at a level that was more than we could afford. In the 1985 farm bill we recognize that there was the need for a transition to market orientation, and now in 1990, we are recognizing an important difference, that the dairy price support program is no longer the market price but, rather, it is, as farm programs ought to be, the safety net, and that the farmer today truly produces for a market price in a market orientation.

I think it is important, however, as we begin this debate that each and every Member understand what we have done in the last 5 years. If you will look at the red line on the chart next to me, you will see we have moved from a 1.260 price support down to $10.60 or down to the $10.10 figure actually, and we have also seen a signficant cut in the cost of the dairy price support program over these 5 years from really something like $2.5 billion on down to the $600 million that we are spending in fiscal year 1990.

One of the great problems we face on the Agriculture Committee in trying to write this particular element of the farm bill is that the Congressional Budget Office has made the assumption, with no basis, that we would simply extend the 1985 farm bill through 1995 with a 50-cent-a-year cut in the price support program. Now, this chart becomes significant because if you will look at the lower line, what they are projecting for the current services baseline for dairy in each of those years is a declining baseline down to just over $200 milion.

If you believe the Congressional Budget Office bureaucrats, you would believe that we would go from a $2.4 billion expenditure in 1985, to $200 million in 1995, and under their theory we would literally phase out the dairy program in 1997. Now, nobody else believes that, and yet that is one of the kinds of economic handcuffs that we on the Agriculture Committee have had to deal with. So when you hear that the dairy program is over the budget, it is simply over the budget baseline of the CBO because we have made the decision in the bill in front of us that we have reached a proper baseline in terms of a safety net for our dairy program.

Yes, today farmers produce for a market price, and we are happy to say that the bill we bring the Members will guarantee an average farmer with 40 cows $28,000 more in income than would the proposal that was submitted by the Department of Agriculture. So we believe this is a step in the right direction in protecting farmers' income, and we believe that also the possibility ought to exist that while farmers will have no price support cuts under this 5-year bill, the possibility of increases will exist in the years in the future when and if a shortage should occur.

In addition to that, we have tried to modernize this bill by providing what we call a change in the calculations from butterfat—because there is not a milk surplus today, there is a butterfat surplus because American consumers have changed their dietary demands—so we have recommended that we calculate the dairy program on a realistic, honest assessment, which is total solids.

Third, we have provided a two-tier programs with a trigger to implement supply management when that is necessary, and, fourth, we have provided what we call the mechanisms for a dairy trust to protect dairy farmers' income in the event a processor might go bankrupt.

In addition to those key elements, the national market order hearing and the MW revisions that the Department of Agriculture is undertaking at the present time provide us with the basis through this legislation to move America's dairy farmers and, more importantly, our dairy policy into the modern national dairy industry that we find in the 1990's.

Mr. Chairman, the dairy industry in 1990 is poised for a new and exciting decade of change in the marketing and production of milk. Last year, as I started to engage in the discussion of crafting the dairy title of the 1990 farm bill, I laid out two broad goals: First, create a national dairy policy which unifies all dairy producers under one set of consistent dairy programs; and second, develop a modern dairy program which reflects the dairy industry of the 1990's. While sounding simple, the implementation of a program to achieve these goals has been monumental.

Representing one of the Nation's leading dairy producing regions, I have suggested the interests of the dairy industry nationwide and those of Wisconsin are not mutually exclusive. The traditional dairy structure of Wisconsin has underscored the true necessity of a national and modern dairy program, where policy should be on economics, and the industry exists and flourishes on those national and modern policies.

Dairy has made positive advancements since enactment of the Food Security Act of 1985, mainly the continued increase in consumption of dairy products. Since 1985, commercial disappearances of dairy products has increased 7.4 billion pounds, up 7.4 percent. Since 1980, consumption has increased 19 billion pounds.

The domestic market growth the dairy industry has experienced in recent years can be attributed partly to an effectively dairy promotion program, a promotional campaign our dairy farmers support and pay for to strengthen their position in the marketplace.

The dairy program has changed dramatically over the last few years. Today farmers are producing for the market and not for the support price, with the support price acting as a safety net. From 1980–1985, farmers produced for the support price. But today, dairy farmers are enjoying some of the highest market prices in history, without the benefit of the price support program. The current Minnesota-Wisconsin pay price, the Federal minimum pay price, is $13.28, well above the current $10.10 support price. After a sharp increase in the M–W in 1989 with an accompanying decline from $10.98 in March to $14.93 in December, some relatively stability is returning to the dairy markets.

The dairy industry has reduced surpluses and Government costs dramatically from 13.2 billion pounds in 1985, costing $2.41 billion pounds, to 8 billion pounds costing $670 million, over a 70-percent decrease in spending. It is difficult to find another program that has contributed those kinds of reductions over the last 5 years. These reductions have helped cut the cost of all agricultural stabilization spending for the Dairy Program from 2.68 percent of the total Federal budget in fiscal year 1986 to around 1 percent of total Federal spending today.

Changes in dairy 1985–89

	Percent
Price support level	−20
CCC purchase costs	−70
Consumer price milk	+14
Consumer price index dairy products	+11.6
Consumer price index all food	+23.0

In achieving the goals of a national and modern dairy program, frankly meant a solid national consensus was required with all regions of the country participating in the debate to find an acceptable reauthorization of our Dairy Program.

The Subcommittee on Livestock, Dairy and Poultry conducted field hearings in January 1990, to do just that, provide a stage for a national debate on developing long-term, national and modern dairy policies. Hearings were held in Modesto, CA; Seattle, WA; Syracuse, NY; Rochester, MN; and Harrisonburg, VA.

A number of areas of consensus emerged from these hearings.

First, the pricing system using the Minnesota-Wisconsin price series was obsolete and needed reform.

Second, component pricing needed to be implemented in the Federal milk marketing orders.

Third, changes in the Federal milk marketing orders should be done through the administrative process.

Fourth, the pricing incentive on milkfat was excessive and inaccurate.

Fifth, a different method needed to be developed to provide dairy commodities to our food programs.

Sixth, a stand-by inventory management program should be provided in the event market adjustments have not responded to increased production.

Seventh, stability in the markets was needed because of the recent fluctuations in the Minnesota-Wisconsin price series.

Eighth, milk quality standards need to continue to ensure a safe and high-quality product to consumers.

Ninth, the Dairy Export Incentive Program should be continued.

There were also various areas where a national consensus was not clear cut.

First, the type of inventory management program should be used.

Second, the California make allowance.

Third, specific recommendations for providing for food program needs.

Fourth, the changes required through the Federal milk marketing order administrative process.

Fifth, an exact alternative to the M–W price series.

Continuation of the Federal Dairy Program to stabilize the dairy economy by establishing price supports for milk was stressed throughout these hearings. Providing orderly and long-term policies can accomplish this objective.

The National Commission on Dairy Policy, established in the 1985 Food Security Act for the purpose of recommending reforms in dairy policy for the future, stated:

The milk price support program should treat all producers equally. Sensible policy should result in an ample supply of milk at prices that are affordable to consumers, yet offer producers a reasonable return on their investment.

Federal agricultural policy should be: (1) flexible enough to accommodate unforeseen problems; (2) formulated through a process that is open and well understood by producers and the public; (3) capable of working for several years; (4) market-oriented—that is, resulting in commercial use of the vast majority is produced; and (5) consistent on both the Federal and State level.

The dairy industry is made of diverse farm operations across the country, more concentrated in regions like the Upper Midwest and the Northeast, with a growing industry in the West. The industry also has unique processing and marketing enterprises to provide an outlet for milk to consumers. Even with this diversity, Federal price support policy needs to treat all commercial dairy operations fairly, absent of regional barriers or incentives for production, manufacturing and marketing.

In writing the dairy title for the 1990 farm bill, I along with the chairman of the Livestock, Dairy and Poultry Subcommittee, CHARLIE STENHOLM, followed the recommendations of the National Commission on Dairy Policy report.

MILK PRICE SUPPORT POLICY

The National Commission on Dairy Policy believes Federal dairy policy should be market-oriented. Market forces and adjustments in the Government should balance supply and demand for milk and dairy products.

SUPPORT PRICES WITH PURCHASES

Government purchases of dairy products is a workable solution for supporting milk prices. The Federal support price should establish a minimum price which guarantees an adequate supply of milk. The Commodity Credit Corporation purchases of dairy products must serve primarily to balance the domestic market annually and other surplus products should be secondary.

SETTING OF PRICE SUPPORTS

Price supports should be set by a formula of accounting for changes in technology in an explicit calculation, taking into account economic considerations in other agricultural segments, being able to operate several years without major adjustments, and having some latitude to account for shifts in supply or demand to prevent either a build-up of costly surpluses or decreases in production that result in shortages.

PRODUCTION CONTROLS

A production control program should be implemented in lieu of major price reduction to reduce unneeded supplies of cheese, butter, and nonfat dry milk. The program shouldn't be temporarily used to reduce the Federal deficit, but may be needed to meet deficit reduction targets.

MOST EFFECTIVE PRICE CONTROL PROGRAMS

A dairy termination program and a two-tier pricing program are the selected alternatives. The Commission provided the choices to make it hard for producers to anticipate a specific type of program. Inefficiencies in the administration of the Federal milk marketing order system have led to Class I milk differentials because of the long delays in the hearing process. The USDA and the dairy industry must speed up decision making.

REGIONALISM

The Commission is not in favor of "regionalized" price support system because it believes that an attempt to protect producers in one area would counter the basic market forces. Recommends State pricing systems, mainly the California make allowance, encourages artificial manufacturing growth, and therefore, increased production incentives.

ADVERTISING AND PROMOTION

Endorses the programs financed through mandatory assessments on milk production but it is not sure how beneficial they are to the producers. These programs must be monitored to insure benefits. The Dairy Promotion Board and the United Dairy Industry should be combined to reduce administrative and program costs and improve communications.

TECHNOLOGY

New technologies should not be prohibited because they may affect milk price or industry structure. The Federal authorities should determine how they effect the wholesomeness of the product, the impacts upon the consumer perceptions of the product, and the impact upon the health of an animal.

A national and modern market-oriented dairy price support program is important to the Upper Midwest. But just as important is a national and modern Federal milk marketing order program. Over the last year and a half, I have been working with Secretary Clayton Yeutter to develop a method to evaluate proposals to reform the milk orders through the USDA administrative hearing process, with economic justifications provided by the dairy industry. Just in the last year, the industry has witnessed a series of progressive and aggressive efforts to deal with the Federal milk marketing orders initiated by USDA.

One event which could have the single most dramatic impact on the dairy industry is the decision announced by USDA on March 29, 1990, to conduct national hearings on the Federal milk marketing order system. I commend Secretary Yeutter for setting an aggressive timetable to analyze over 60 proposals from the industry for changes to establish prices for class I and class II milk; establish a uniform system of classifying milk; and change regulations on reconstituted milk.

With hearings to be conducted in six locations in September and October, including Eau Claire, WI, the USDA proposes to have amended orders be effective by May 1, 1992. The dairy industry of the Upper Midwest has claimed the current Federal milk marketing order system is outdated. This has been confirmed by the General Accounting Office and the Economic Research Service at USDA.

Another major area of concern to the industry has been the method by which the Federal minimum price for milk is established through the Minnesota-Wisconsin price service. Most recently, the USDA called for a separate hearing process to develop an alternative pricing mechanism. The USDA and the GAO has concluded the life of the M–W is limited and by the end of 1992, it will be virtually obsolete. Following discussions with the USDA over how to best deal with this necessity, the Department on July 5 announced it will commence gathering data and conducting tests on alternative price series. The goal is to have a replacement or modified price series in place by May 1, 1992.

The dairy title of H.R. 3950 as reported by the House Agriculture Committee represents a national market-oriented approach of reauthorizing dairy policy for the next 5 years. This title also will provide stability for the dairy farmers and the dairy industry.

The committee was successful by crafting a dairy program that eliminates the option for a price cut below the current $10.10 support price and establishes that as the floor through the next 5 years of the farm bill. The committee has put forth a budget responsible program which shows spending to average $719 million a year. A stand-by inventory management program, called for through the national hearings, was provided to deal with a true national milk surplus.

Changes in the way the USDA calculates Government purchases to a total solids equivalent is a recognition that a more accurate method of defining surplus products needs to be in place. Deadlines on hearings on the Federal milk marketing orders and development of alternatives to the M–W were also a important part of the dairy title. And, as a means of providing some assurance farmers would get paid for their product, a dairy payment security proposal was included in the committee bill.

The real challenge the committee faces is trying to write a 5-year dairy program against an unrealistic baseline assumed by the Congressional Budget Office. CBO has done an indefensible act by assuming Congress would move to phase out the dairy program through 1995. Rather than using the same adjustment CBO provided other commodities, by freezing target prices and support prices over the next 5 years, CBO has proposed continued cuts in the dairy price support level and virtual elimination of the dairy program.

The committee wrote the dairy title using a $725-million a year budget estimate proposed by the Senate and was successful in doing so. CBO has instead reduced spending from $628

million in 1991 to $211 in 1995 which is made possible by reducing the price support from $10.10 to $8.60 in 1995.

If the dairy program gets the budget commitment all other commodities have received, we can put forth a sound, market-oriented dairy program for our dairy farmers and still have a budget responsible program.

I am committed to preserving the market opportunities of dairy farmers and the dairy industry of Wisconsin. I am also committed to developing a truly national and modern dairy program where policies are based on economics, the way they were intended when these programs were developed in the 1930's and 1940's. I am confident the dairy industry of Wisconsin and the Nation will see positive changes in the marketing structure of milk by responding to the challenges of our budget, our price support program, and our Federal milk marketing order system. I am confident U.S. dairy will be in the position to participate and benefit in the world dairy market and that good dairy farmers will be able to prosper in the new decade.

□ 1820

Mr. DE LA GARZA. Mr. Chairman, I yield 3 minutes to the gentleman from California [Mr. BROWN].

Mr. BROWN of California. Mr. Chairman, today we are starting a rather lengthy debate on the shape and direction that our food and agriculture programs will be taking for the next 5 years. These are controversial programs, to judge by the number of amendments which have been noticed, but they shouldn't be. These programs are essential to the continued success of our food and agriculture sector, a sector of our economy which produces affordable food, net export gains, and takes full advantage of the skills and resources of our country.

I became a member of the House Agriculture Committee in 1973, when Congressman Sisk of California left the committee. I have served on the committee for 18 years and have come to have a great appreciation for the benefits produced by our agricultural programs and have gained an understanding of who benefits most from these programs: the American consumer. During my 18 years on the committee, my district has changed from an agricultural district to a suburban district. I represent the most urban district on the committee, and my position is one of having to balance the needs of producers with the needs of the general public. The bill before the House today, H.R. 3950, accomplishes that.

We have held costs constant in the bill, in recognition of the budgetary pressures which face all Government programs. We have recognized the environmental concerns which dominate society and have put together a conservation and environment package which moves our agricultural programs into a new era of stewardship. We have tried to deal with the needs of low income people in the food stamp and other feeding programs, domestic and international, which are authorized in the bill. We have reauthorized our agricultural export programs, so essential in counteracting the subsidization programs of our competitors, but we have tightened up these programs. We have, in short, put together a package which I can present to the residents of my district as a fair balance of the needs of farmers, consumers, environmentalists, and taxpayers.

I would like to compliment Chairman DE LA GARZA and the ranking minority member Mr. MADIGAN for their tireless work in bringing this legislative package together. These two gentlemen worked to fashion this balanced proposal, taking stands which they would rather not take, but ones which were necessary in order to get this compromise. And people like me, with non-farm districts, need to recognize the compromise which this bill represents and thank the committee for having taken their demands into account.

I serve as chairman of the Subcommittee on Department Operations, Research, and Foreign Agriculture and our subcommittee was responsible for two titles of the 1990 farm bill: the research title and the aid and trade title. I would like to briefly describe what is contained in these two titles and demonstrate the importance of these provisions to my colleagues.

The research title, title XIII, represent more than 2 years' work, and continues efforts begun in the 100th Congress to authorize needed research programs. In H.R. 3950, we have reauthorized a number of general research, extension, and teaching programs and have made changes to them to improve their effectiveness. We have expanded the competitive research grants program to make it a major new research initiative as recommended by the National Academy of Sciences' Board on Food and Agriculture. This new initiative will allow agriculture to continue its path of progress based upon the best science and technology.

We have expanded and created problems which will draw new talent into the food and agricultural sciences with a major minority fellowship effort. We will make better use of the historically Black institutions, the 1890's colleges and universities, and will reach out to other schools for talented Black, Hispanic, and other minority students.

We have responded to public concerns about food safety and ground water quality with a host of new program proposals designed to reduce the contamination from chemicals used in agriculture. These programs constitute a major new thrust to our research and extension efforts with work on alternative agricultural systems, integrated pest management [IPM], integrated cropping systems, and water quality research and extension. These programs complement the field programs along the same lines which are authorized in the conservation title of the bill.

We have initiated new programs in agricultural weather information, new crop and new product development, genetic resources conservation, information systems, and a host of other needed areas. Together the proposals made in the research title will provide the base for our food and agriculture sector in the next century.

The export title, title XII, contains reauthorization of our agricultural export and food aid programs. The export programs in the 1985 farm bill have been successful in recapturing world market share that the United States lost during the early 1980's. Agricultural exports help our farmers and enhance our general economic performance by creating millions of off farm jobs through associated services in financing, storage, packaging, processing, merchandising, and transportation. Agricultural exports contribute to a positive trade balance of more than $17 billion and thus play a major role in reducing the national trade deficit. Since our farmers can produce more than the country can consume during the same year, exporting the residual supplies is critical in keeping agriculture a healthy industry. And continuing our export promotion programs is essential to exporting these products in a highly competitive market in which other countries are subsidizing their exports.

The Subcommittee on Department Operations, Research, and Foreign Agriculture, together with two other subcommittees, have extensively examined these export programs and were in the lead in uncovering problems in program administration. We have responded to these problems by adding new provisions to strengthen the administration and operation of the export promotion programs to prevent inconsistencies and abuse. These changes address concerns raised in our hearings and in audits of the programs by USDA's Office of Inspector General and the General Accounting Office. These provisions would require the Secretary of Agriculture to certify and periodically audit all USDA export programs and establish a marketing strategy for carrying out all export programs, including the increased export of high value products. We have included tighter provisions to make sure that only U.S. grown commodities are eligible for export credit guarantees. This bill will also require stronger oversight of the Targeted Export Assistance [TEA] program to require that all participants meet specified cost-share levels and assistance is

directed at markets where U.S. producers face unfair trade practices.

We have worked out a compromise agreement with the Committee on Foreign Affairs which would revamp our food aid programs. We increase food donations and allow debt forgiveness for the neediest countries. Our committee has worked hard with the Foreign Affairs Committee to produce a strong program which will make sure that U.S. commodities reach the hungriest people. The program also ensures that economic development is the underlying objective of all of our food aid programs, in recognition that economic development and policy reform are preconditions to develop future export markets for our commodities. We have maintained provisions to safeguard against the potential disincentives that the donation of U.S. commodities can have on agricultural production in the recipient countries, because the committee does not want this program to be a disincentive for indigenous agricultural production in developing countries.

We have also provided increased support for newly emerging democracies, and reauthorized the Food For Progress Program which provides donated commodities to countries that encourage private enterprise and agricultural reform. I support the changes to the food aid programs and believe that this bill will further the continued cooperation between the agencies which carry out these programs.

As with any bill, there are more improvements and additions which could be made. I plan to support some of these efforts, such as the amendment by Mr. DE FAZIO to establish a national organic certification standard. Growers in my home State of California are very eager for this as a way of taking advantage of a growing market in this country and around the world. We have worked on this proposal in committee and I view it as a modest one, and one to which the author has made major changes in order to accommodate the concerns of the committee and the Department of Agriculture. When the amendment is offered, I hope that my colleagues will also support the amendment.

There are other meritorious amendments, some of which I will support. But I will not support proposals which do serious damage to the careful balance which this bill represents. There are a number of well-intentioned amendments which have cause serious damage to the programs authorized in this bill. I would urge my colleagues to exercise restraint when considering these amendments.

As a member from a suburban district, I would ask my colleagues from other suburban districts and from urban ones to take a step back and look at the compromise which this bill represents. It makes great environmental strides in proposals which are supported by most of the major environmental organizations. It keeps funding constant by authorizing programs at the current Congressional Budget Office baseline. It provides inexpensive food, yes by subsidization of production, but with costs spread across society, not paid by the individual consumer. Removing or seriously disrupting these programs will cause prices to rise as the individual consumer is forced to pay the bill, with a regressive impact on low and middle-income families.

I urge my fairminded colleagues to support this bill, this compromise which represents many months of work.

Mr. GRANDY. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from Florida [Mr. LEWIS].

Mr. LEWIS of Florida. Mr. Chairman, in 1985, the House Agriculture Committee was charged with the duty of constructing an American farm policy that would: promote international trade, conserve millions of acres of environmentally fragile soils, and protect farm income that was experiencing severe declines through the early 1980's. The Food Security Act of 1985 accomplished those goals.

In 1990, the Agriculture Committee has been charged with similar duties: continue to promote international agriculture trade, protect millions of environmentally fragile farm acres, and address the issue of farm income.

H.R. 3950, the Food and Agriculture Resources Act of 1990 achieves those goals.

The committee has not reached the finalization of this legislation without hard work, intense negotiations, and some very difficult decisions.

During this process, we have been constantly attacked and maligned regarding the direction in which the committee was moving in regards to the 1990 farm bill.

Basically, our goal was, and continues to be, to supply the American consumer with a safe, reliable, nutritious, abundant, and affordable food supply. And we have done this.

A figure you will hear often during this debate is 10.4 percent. U.S. consumers spend 10.4 percent of their consumption dollars on food, the lowest percent of any nation in the world.

The Japanese spend 18.8 percent, the Swiss devote 20.2 percent, the Russians spend over 27 percent of their income on food.

In order to keep the cost of food to the consumer low and guarantee the consumer and food processing industry a constant supply of products, the Farm Programs provide adequate incentives and some measure of protection against the inherent risks that are associated with agriculture, such as weather, insects, and disease.

These variables are the basis for the changes in commodity prices and farmer income that are experienced annually by agriculture producers.

H.R. 3950 is comprised of 18 titles, that vary from 10 commodity titles to titles that deal with food stamps and related programs, conservation, forestry, research, and several other agriculture related areas.

This legislation literally affects every one of us from when we wake in the morning to when we go to sleep at night.

One of the titles included in this legislation is the sugar title. The United States sugar program, as established in the 1985 farm bill, has provided stability in the U.S. marketplace while operating at "No cost to the government."

The program also yielded over $300 million dollars in revenues for the U.S. Treasury over the past 3 years.

Opponents of the United States sugar program have been carrying out a misinformation campaign over the past 2 years that has succeeded in making this title one of the most controversial titles in the farm bill.

The extremely tight, volatile world sugar market is the reason the Agriculture Committee established a sugar program in the 1981 farm bill.

While the United States sugar program establishes a minimum import quota so that American sugar producers are assured at least 18 cents a pound, the European Community is directly subsidizing their sugar industry to the tune of 30 cents a pound.

This has caused the EC to become the second largest exporter of sugar in the world in just 12 years. They dump their excess subsidized sugar on the world market, which in turn depresses prices well below most countries' cost of production.

Mr. Chairman, the U.S. agriculture industry has become the model for agriculture production around the world. One only needs to recall the pictures and stories of long food lines and severe food shortages in Eastern Europe and Russia in order to realize the success we have had with our American food policy. What is the first thing we see every time we walk into a supermarket? A bountiful array of fresh fruits and vegetables.

Then we pass aisle after aisle of food—generic, frozen, name brand, store brand, dairy products, meats. It's quite amazing when we think about it. We in American have a choice in what we select for our dinner table, and the Agriculture Committee has attempted to present to this body legislation that will continue to allow the American consumer such a choice.

I would like to commend Chairman DE LA GARZA and Congressman MADIGAN on their leadership in developing legislation that is both prudent and

fiscally conscious; 1990 figures indicate that less than 17 percent of USDA's budget is used for farm price supports.

This number is expected to decline in 1991. I ask my colleagues to remember that the legislation before us today will affect 435 congressional districts—directly—either in the way of food stamps and commodity distribution programs in the inner city and rural areas of America, or ground water and conservation protection in the farm lands.

I urge my colleagues to support H.R. 3950 so that America's farmers can continue to supply the United States with a safe, bountiful food supply.

Mr. DE LA GARZA. Mr. Chairman, I yield such time as he may consume to the gentleman from Indiana [Mr. MCCLOSKEY].

Mr. MCCLOSKEY. Mr. Chairman, I rise in strong support of the 1990 farm bill and thank the gentleman from Texas [Mr. DE LA GARZA] for his generosity in so yielding.

The House Agriculture Committee has included a $500 million Competitive Research Grant Program in the 1990 farm bill. This initiative is based on legislation which I introduced last fall, H.R. 3806, the Competitive Agricultural Research Grant Act of 1989. I wish to thank Chairman DE LA GARZA, Chairman BROWN, Chairman STENHOLM, my Indiana colleagues Representatives JONTZ and LONG, and the other members of the Agriculture Committee for their support of this important program.

This grant program will stimulate new academic research in agriculture, thereby strengthening our Nation's rural economy and assisting young scientists in pursuing academic careers.

Given high budget deficits and the need for fiscal restraint, I realize that new Federal outlays are hard to justify. However, agricultural research has produced an annual return of more than 45 percent. In addition, the development of new crop and animal strains, farming techniques, and market uses for agricultural products will benefit all sectors of the American economy.

Over the past several decades, Federal funding for agricultural research has shown no growth other than matching inflation. In 1965, the USDA research budget had the purchasing power of $788 million in 1982 dollars; the 1988 research budget was valued at $778 million in 1982 dollars. Of these funds, less than $50 million was in the form of competitive grants. Competitive grants, by their very nature, seek out the contributions that all scientists and areas of science can make to advance the knowledge and technology that will impact agricultural marketing, production, and competitiveness.

My bill was developed in conjunction with recommendations made by the National Academy of Sciences Board of Agriculture National Research Council in "Investing in Research," a 1989 proposal to strengthen the national agriculture, food, and environmental systems.

The farm bill language closely tracks language in H.R. 3806, establishing six high priority fields: Plant systems; animal systems; nutrition, food quality and health and welfare; natural resources and the environment; engineering, products, and processes; and markets, trade, and agricultural policy.

The President's budget proposal for fiscal year 1991 requested $100 million for competitive research grants as a national initiative for agricultural research. This would expand the current USDA competitive grants program by about $57 million over the fiscal year 1990 appropriation.

However, two fields were omitted from the President's budget—engineering and markets. These fields have been reinstated in the farm bill language. Research in these two fields will be crucial to ensure American competitiveness as we approach the next century.

The importance of agriculture in our own economy and to U.S. international competitiveness warrants a renewed commitment to the development of new techniques and products and to the pursuit of innovative market uses for agricultural products.

Trade in agricultural products is an important asset for the United States in international balance of payments calculations. U.S. preeminence in agricultural trade has faced severe global competition during the past decade as advances in agricultural production have spread. In the future, we will face a substantively more competitive environment.

Our ability to compete is directly related to the edge we have in science and technology. Land, labor, and capital alone will no longer provide our agricultural competitive advantage. Research, especially competitive grants which stimulate innovation, is an investment in our future.

The House Appropriations Committee has included $73 million to fund this program this year, a 50-percent increase over last year. I am hopeful that over the 5-year life of the farm bill, this research program will continue to grow.

American farmers can continue to compete. Continued research will ensure that U.S. agriculture remains highly productive, that commodities remain nutritious and safe, and that new market uses are developed. The grant program the farm bill seeks to establish is a direct investment in our Nation's future.

Mr. DE LA GARZA. Mr. Chairman, I yield 1 minute to the distinguished gentleman from Oregon [Mr. WYDEN].

Mr. WYDEN. Mr. Chairman, I rise to speak briefly about the hunger relief provisions in this legislation, particularly the Mickey Leland hunger provision. I am very pleased that this legislation increases hunger assistance to our needy community by 6 percent.

□ 1830

Those of us who want to have additional funding for programs for the low income have a special obligation, in my view, to work to root out some of the fraud and corruption that permeated these programs. I am very pleased that Chairman DE LA GARZA has accepted legislation that I have authored that would toughen the penalties for those who traffic in food stamps, drugs, arms, explosives, and ammunition, whether it is Los Angeles which recently had a $1.6 million case where there was food stamp trafficking, whether it is Portland where police are breaking into drug houses and finding thousands of dollars of unredeemed food stamps, all too often we are seeing our terribly important antihunger program ripped off by drug dealers and arms merchants.

Under this legislation, food stamp traffickers would have new and heavy penalties, a $250,000 fine and a 20-year prison sentence. These important penalty provisions would replace basically the slap on the wrist that exists under current law.

I want to thank Chairman DE LA GARZA for his support, and also on the minority side the gentleman from Missouri [Mr. EMERSON] and also the gentleman from Kansas [Mr. GLICKMAN] who offered it for me in the committee.

Mr. GRANDY. Mr. Chairman, I yield 2 minutes to the gentleman from Pennsylvania [Mr. RIDGE].

Mr. RIDGE. Mr. Chairman, I rise to offer my support for provisions in the farm bill's conservation title which establish a national goal for the long-term preservation of 2.5 million acres of wetlands located on agricultural property. Chairman DE LA GARZA, Vice Chairman MADIGAN, Congressmen COLEMAN and ENGLISH should all be commended for the tremendous effort which was put forth in working to achieve a fair balance on many difficult environmental and agricultural issues. In my view, the conservation title reflects a serious and successful effort to balance many competing public policy goals.

Wetlands preservation is an important component of this year's farm bill. When I introduced the Permanent Wetlands Agricultural Reserve Act of 1990, it was in an effort to encourage members of the Agriculture Committee to mandate the long-term protection of wetlands in return for a fair market price to America's farmers who choose to enter into a permanent conservation lease. My bill required that a minimum of 2.5 million acres of wetlands be conserved and that the private landowner be fairly compensated, based on the terms of the lease agreement. I am delighted the farm bill established the same 2.5 million acres as a national goal.

The permanent easement program makes sense for several fundamental reasons. First, the conservation agreement is permanent. America's taxpayers should not be renting conservation. Rather, we should be making a once-in-a-lifetime environmental investment. Second, by providing reasonable terms for conservation easements, we will be treating our agricultural landowners fairly. Today's wetlands regulations significantly reduce the productive use of private property. We

must be willing to compensate landowners who pay taxes on their private property, but are unable to develop their land to meet the needs of their families.

Finally, in order to achieve President Bush's goal of a "no net loss of wetlands," we must start with this year's farm bill. Our Nation's wetland base is estimated to be less than 100 million acres. The Department of Agriculture estimates that nearly 13.8 million acres of wetlands were lost during the last three decades due to agricultural conversion. Today, another 10.8 million acres of wetlands located on private property could well be converted for agricultural purposes. The best way for us to protect our farmers' private property rights while preserving wetlands is to proceed apace and enroll a full 2.5 million acres in permanent conservation agreements.

Once again, I applaud the leadership and all of my colleagues on the Agriculture Committee for striking a fair and reasonable balance on a difficult issue.

Mr. DE LA GARZA. Mr. Chairman, I yield 2 minutes to our distinguished colleague, the gentleman from Virginia [Mr. OLIN].

Mr. OLIN. Mr. Chairman, I would first like to thank Chairman DE LA GARZA for yielding me this time and to commend him and the gentleman from Illinois [Mr. MADIGAN] for putting together a farm bill that represents a good balance and should have the support of all the Members.

I rise to talk a little bit about the dairy title of the bill. I must say, it is a pleasure at this time to be on the side of the committee in all respects and support the committee bill in ever feature.

On that, I thank the gentleman from Texas [Mr. STENHOLM] the chairman of the Subcommittee on Livestock, Dairy, and Poultry, and the gentleman from Wisconsin [Mr. GUNDERSON] for their cooperation and willingness to work out an accommodation of different points of view.

I would like to remind the Members that the dairy title of this farm bill comes off the 1985 farm bill. The dairy provision there by any measurement has got to be considered a substantial success.

The surplus that we were dealing with at that time has been brought down approximately 70 percent, as the gentleman from Wisconsin said. The cost of the program is down about the same amount. Farm income has been stable over this period of time.

Right now supply and demand are in relative balance. The milk price, the manufacturing price, is running $2 a hundredweight above the support level, and the fluid milk price is running about $3 above the support level. This is a good example of what happens in the market when you have supply and demand in relative balance.

The consumption of milk and milk products has gone up during the last 5 years. Productivity of animals has gone up, and prices of milk products in the market have been reasonable.

The one thing people need to remember is that there is no need at this time to vastly and radically change the provisions of the 1985 bill. In forming the 1990 bill, our objective has been particularly to try to maintain the balance between supply and demand so that milk prices can continue to be favorable to farmers.

Mr. Chairman, I urge the Members to vote and support the committee position on dairy and vote for the entire bill.

Mr. GRANDY. Mr. Chairman, I yield 2 minutes to our distinguished colleague, the gentleman from Minnesota [Mr. PENNY].

Mr. PENNY. Mr. Chairman, new agriculture legislation passed a critical step when the House Agriculture Committee recenty approved the 1990 Food and Agricultural Resources Act. This legislation reauthorizes commodity programs, agricultural research and extension, conservation measures, and food aid and trade programs for the next 5 years. We now begin the critical process of reviewing this legislation before the entire House.

The Agriculture Committee struggled to lay the groundwork for agricultural policy for the next 5 years. In a changing political world, with stricter environmental concerns, and under tremendous budgetary pressures, the committee has done a commendable job. I particularly compliment the chairman for his leadership.

The House Agriculture Committee has made some significant changes to the 1985 farm bill while attempting to maintain a market-oriented agriculture policy that offers continued incentives for farmers regarding such important programs as conservation and supply stabilization.

The committee has made a major change in how commodity loan rates are determined. The House bill repeals the "Findley" loan adjustment—reduction—mechanism sets regular nonrecourse loan rates at 85 percent of the rolling 5-year average market price for the commodity. The Secretary of Agriculture would have limited authority to lower the loan rate further based on commodity stocks-to-use ratios.

Other important provisions of the bill include:

A limited planting flexibility option of 25 percent of farm base acres—including historical oilseeds plantings—to other permitted crops with base protection. There would be no deficiency payments but loans are in effect for flex acres.

Target prices for program crops are frozen at 1990 levels. In the bill, for each 2.5-percent increase in the corn ARP, above 15 percent, or wheat above 7.5 percent, the target price increases by 2.55 percent.

The committee bill provides for a soybeans marketing loan, with the loan rate set at $5.25 per bushel and with future increases or decreases based on the stocks-to-use ratio.

The dairy title of the bill sets a minimum support price of $10.10 per hundredweight. The bill also allows for adjustments of 25 cents to 50 cents based on projected Government purchases, and calls for a stand-by inventory management program should purchases exceed 7 billion pounds.

The research title proposes to support the commercialization of new products made from agricultural commodities.

Conservation measures in the bill expand the Conservation Reserve Program [CRP] slightly and redirect the emphasis to sign up smaller areas of land that directly affect ground water quality. The bill includes new wetlands easement, conservation cost-share, and voluntary water quality programs.

Reauthorization of the Export Enhancement Program [EEP] and the Market Promotion Program [MPP], with increased emphasis on the export of U.S. value-added agricultural products.

This legislation will also make significant and positive changes in our foreign food aid programs under Public Law 480. The Agriculture Committee has worked closely with the Foreign Affairs Committee and the House Select Committee on Hunger to fashion a compromise Public Law 480 proposal. These changes to Public Law 480 will create a new program to provide food for development for the poorest countries in the world and to address the urgent needs of hungry people in poor countries. I fully support this food aid compromise and I am certain that these changes will contribute to a better use of U.S. food aid to enhance the food security of those most in need.

Mr. Chairman, those are some of the highlights. On balance this is a good bill. I urge a favorable vote.

Finally, I would like to point out an issue that was not addressed directly in the farm bill, but will be addressed by the Agriculture Committee next year. That issue is the availability of credit from the Farmers Home Administration for beginning farmers. Included in report language in this farm bill is a call for the USDA to maintain and report statistics on beginning farmers that are served by FmHA loan programs.

Chairman DE LA GARZA and Mr. ENGLISH, chairman of the Conservation, Credit, and Rural Development Subcommittee, are committed to undertaking a major review of FmHA lend-

ing practices next year. I am confident that the Agriculture Committee will consider legislation that I introduced earlier this year, the Beginning Farmer and Rancher Credit Act of 1990, during that review process.

Getting started in farming today is a difficult task, and young farmers are becoming few and far between. During the 1980's, financial conditions slowed entry into farming and forced many younger farmers and ranchers to leave agriculture. The USDA's Economic Research Service estimates that as a result of farm financial difficulties, nearly half of all farm assets are owned by farmers who will be likely to retire in the next 10 years. In my own State of Minnesota, the average age of farmers is nearly 60 years! It is obvious that we must create new opportunities for our young and aspiring farmers, and help to maintain the American tradition of independent family farms.

Mr. GRANDY. Mr. Chairman, I yield 2 minutes to the gentleman from California [Mr. HERGER], a distinguished member of the Agriculture Committee.

□ 1840

Mr. HERGER. Mr. Chairman, I strongly support the legislation as passed by the Agriculture Committee. I want to commend our distinguished chairman and ranking minority member of the committee for their outstanding leadership.

This bill is designed to continue the successful, market-oriented policies of the 1985 farm bill. We have made great progress in bringing down Federal outlays in farm spending—from nearly $26 billion in 1986 to less than $9 billion this year. I also stand in support of the overall freeze in spending contained in this bill due to our need to balance our Federal budget.

These market-oriented policies will help continue the expansion of agricultural exports, which are so vital toward reducing our trade deficit. The Marketing Loan Program for rice and cotton has proven successful in assisting producers in building new markets abroad while reducing burdensome surpluses. Federal export programs have been especially successful in assisting our farmers who face unfair foreign competition or heavily protected markets.

This legislation freezes program spending while maintaining our goal of balancing supply with demand. It also provides our farmers with necessary support against foreign subsidies and unfair competition, and thus strengthens our negotiating position as we attempt to reduce farm subsidies on a worldwide basis through the GATT talks.

This legislation is essential to economic stability and growth for rural America. Just as important, it will provide American consumers with an inexpensive and healthy supply of food. I strongly urge my colleagues to support the bill as passed by the committee.

Mr. DE LA GARZA. Mr. Chairman, I yield 2 minutes to our distinguished colleague, the gentleman from Missouri [Mr. SKELTON.]

Mr. SKELTON. Mr. Chairman, I rise to speak in favor of the farm bill that is pending before the House at this time.

I begin, first, by commending the chairman, the gentleman from Texas [Mr. DE LA GARZA], chairman of the Committee on Agriculture, for his efforts in crafting an omnibus farm bill that is truly responsible to the various segments of American society, first, to the farmers, then to consumers and then looking at the very tight budget and those who are interested in that.

As chairman of the congressional rural caucus for the last 6 years, I have seen the American farm sector recover from the deep recession that was the backdrop for the 1985 farm bill. High commodity prices reduced America's competitiveness in the world market.

Our rural communities were suffering as a result of Americans losing farms that had been in their families, Mr. Chairman, literally for generations. In fiscal year 1986, the Federal Government disbursed $25.8 billion in farm support program payments. In response to those conditions, we shifted course.

Mr. Chairman, we created a market-oriented farm policy. As a result, the farm economy has improved dramatically. American commodities are much more competitive on world markets. Food prices have stabilized. Farm support costs have declined from the $25.8 billon in fiscal year 1986 to about $10.5 billion in the year 1989.

Mr. Chairman, hope, Mr. Chairman, was renewed for many family farmers who were on the verge of bankruptcy.

During the next few days many of our colleagues will offer amendments to limit the scope or to dismantle these policies. Mr. Chairman, we cannot let that happen. Asserting that commodity programs are giveaways, some of our colleagues will attack our Nation's farmers. However, the real beneficiaries of our current farm program are the American consumers.

The best bargain in this world today is the food that is produced and purchased here in America. American agriculture is the envy of the world. Our farmers are the hardest-working and the most productive in the history of this civilization.

Under this farm bill that is before us, we will continue that policy. I urge its support.

Mr. DE LA GARZA. Mr. Chairman, I yield 2 minutes to the gentleman from Kansas [Mr. SLATTERY].

Mr. SLATTERY. Mr. Chairman, as we begin this debate on the 1990 farm bill, I hope that my colleagues will consider some basic budget facts.

The committee bill freezes target prices and, according to CBO, comes in at current services baseline. While program cuts are virtually certain to be a part of any budget summit agreement, we should remember that farm program costs have come down dramatically over the past 4 years, from over $25 billion in 1986 to about $8 billion projected for 1990. The actual levels of support that farmers receive has been reduced. For example, the wheat target price has been reduced from $4.38 in 1986–87 to $4 in 1990. Considering the impact of inflation over this period, farmers are receiving substantially less support from Government than in the mid-1980's. The decision to freeze, rather than attempt to increase target prices over the period, is not necessarily good news to our farmers in this country but it necessary because of our budget restraints.

Mr. Chairman, the supply and price of food and the conservation of food-producing resources is a matter of vital concern to all Americans, not just farmers. U.S. farm policy has been successful in providing consumers the most abundant, highest quality, most reliable food supply in the history of the world and at a cheap price. Compared with both the European Community and with Japan, United States food costs are lower and farm program costs are smaller.

On the environmental front, the Agriculture Committee bill continues and builds upon the environmental gains made in the 1985 farm bill:

Wetlands protection provisions are strengthened. Unlike the 1985 law, the committee bill stipulates that simply draining wetlands will trigger the cut-off of farm program benefits.

Water quality provisions offer significant incentives to farmers to agree to alter their operations to protect groundwater and surface water from all forms of agriculture-related contamination.

The Integrated Farm Management Program authorized by the committee bill allows and encourages farmers to use more environmentally sound methods. Through this program, producers will no longer be locked into conventional methods of agricultural production as dictated by the program eligibility rules set up by the 1985 farm bill.

The committee bill also continues Conservation Reserve Program authority to offer 10-year rental contracts to producers who agree to protect highly erodible land or other environmentally sensitive lands.

Mr. Chairman, I intend to offer an amendment that will provide additional flexibility for the production of re-

source conserving crops to producers who farm highly erodible land. One third all all cropland in this country is highly erodible and more than 50 percent of soil erosion occurs on these acres. And resource conserving crops are one of the best and most cost-effective ways of controlling erosion. Producers should have a simple, straightforward mechanism for growing these crops without any penalty related to farm program participation or benefits.

The committee bill continues to push U.S. farm policy toward a market-orientation. In addition to reduced support rates that the Agriculture Committee has recommended, the bill allows producers to transfer up to 25 percent of base acres among program crops and oil seeds in response to market signals. For too long, the Department of Agriculture has micromanaged the farm economy. It's time that we give farmers more room to follow the market in their own cropping decisions.

The committee bill continues important agriculture export promotion activities, including the Export Enhancement Program. Some 25 percent of EEP funds would be reserved for high value or value-added products.

Finally, the committee bill takes important steps on grain quality—an important issue for U.S. agricultural competitiveness. The bill requires that the premiums and discounts offered to farmers in the price support loan program be based on factors related to grain quality and cleanliness. If properly implemented, these provisions will help to ensure that farm programs no longer distort market signals regarding grain quality and cleanliness by eliminating profitable marketing opportunities for substandard grain. I hope that these provisions, which codify USDA actions taken in response to grain quality provisions of the 1988 Federal Grain Inspection Service reauthorization, will prevent the U.S. Government from ever again becoming a respository for low quality grain which cannot otherwise be profitably marketed.

Mr. GRANDY. Mr. Chairman, I yield 3 minutes to the distinguished ranking member of the Cotton, Rice, and Sugar Subcommittee, the gentleman fron Minnesota [Mr. STANGELAND].

Mr. STANGELAND. Mr. Chairman, I rise today in strong support of the farm legislation as reported by the House Committee on Agriculture.

First, I would like to thank the chairman of our committee, Mr. DE LA GARZA, and the ranking member of the committee, Mr. MADIGAN, for their leadership on this important measure. Both were tireless in their efforts for a bill that represents good agricultural policy for producers and consumers and yet met the tight budget constraints under which we are working.

We went to the people. Hearings were held all around the Nation. All interested parties were given the opportunity to speak. After our hearings and during the development to speak. After our hearings and during the development of this bill all members of the committee were given an opportunity to present their proposals. Many had proposals that I supported which would have provided higher supports levels for farmers. But budget realities always limited what we could do.

This bill represents many hours of hard work, attempting to balance the goals of many interests. The chairman and the ranking member were always there providing the leadership to get us to the point we are today.

Mr. Chairman, at this point I would like to speak about the situation facing agriculture today. Speakers you have already heard of will hear later will provide you with all the statistics on the reduction in cost to the Government of farm programs, the increase in the net farm income, the reduction in farm debt, the strength of our export markets, the contribution of agricultural to our balance of payments, and other significant statistics for American agriculture.

While these statistics are important, I must point out to my colleagues that these represent aggregate data and national averages. All farmers of the Nation have not shared equally in the rebounding of the agricultural economy. While I feel strongly that the 1985 farm bill started us in the right direction, we must remember that severe drought conditions in some parts of the country also contributed to the strengthening in market prices. Those areas where hardest hit by these conditions did not share equally. When you have no crops you can't benefit by high market prices.

As a farmer, I know what it's like to hear favorable market quotes during farm market broadcasts, but have no crop to sell. In my part of the country, it appears we are finally breaking out of a multiyear drought. We still need rain to build up our subsoil moisture. While not complete we are on our way back.

My point for bringing this to the attention of my colleagues is to complete the picture of American agriculture. Critics will attempt to paint a picture of the American farmer as a willing beneficiary of unlimited Government handouts. They'll say things are great on the farm across the country. That picture is wrong. It's simply not the case.

Farming is a difficult and risky business. It is a highly leveraged business. The rate of return on invested capital is very small, 2 to 3 percent in Minnesota. Not only is farming subject to the vagaries of nature, it faces a number of unpredictable elements in our society, including frequent changes in national farm policy.

In spite of these difficult circumstances farmers provide the American consumers with an abundant supply of safe nutritious food for the smallest percentage of their income of any place in the world.

I would also like to make a few comments on some of the elements of the legislation under consideration. As I have mentioned it is a difficult task to develop national farm policy for so many different commodities grown in so many different regions of the country. There are always competing and at times outright conflicting goals. This is the case, not only for production agriculture, but true as well, for processing, distribution, and consumption of agricultural commodities.

In this bill we have included provisions to allow farmers more flexibility among the program crops. Some will argue we have not gone far enough. I think we have—and I would be particularly concerned with giving any additional flexibility to producers of program crops who continue to receive program benefits on these acres and be allowed to produce nonprogram crops on these same acres. For example, in northwest Minnesota potato growers receive no Government support. To allow program farmers the flexibility to now produce nonprogram crops with Government support isn't fair. It upsets the market. Simply stated it doesn't allow a level playing field.

In this measure we have included an oilseeds program. As the case will be shown we have lost a tremendous number of acres of soybeans, sunflowers, and the like during the last 5 years. We have lost a tremendous foreign market for soybeans. Acres of sunflowers have dropped to the point that we are having trouble keeping the processing industry alive. I wish there had been more support by the industry in 1985 for a sunflower program, but that's water under the bridge. This bill takes a first step to address that situation. Recognizing the budget limitations, we have made a beginning.

Additionally, the relationships between the feed grains developed in the 1985 farm bill effectively made it more advantageous to produce crops other that oats and barley. We have seen a reduction in the acreage of oats to the point where we are now a major importer of oats. This should not be the case. The bill makes needed changes in this area. I hope we have been successful. This is something I personally will be following.

We have also made some changes to improve the feed barley situation. Presently, market prices for feed and malting barley are combined. When

the deficiency payments are determined on this basis it can adversely affect producers of feed barley. In years of short supply, higher barley prices significantly reduce the amount of deficiency payments due the farmer. We have made some changes to address this situation.

I think we have also developed a workable dairy program. It provides a minimum of $10.10 support level. Unfortunately, this is again an instance where budget projections would not allow a higher minimum. At this time I would also like to note that I am pleased that the Secretary of Agriculture has agreed to hold a national hearing on national milk marketing orders. I feel that the results of these hearings has the potential to affect the dairy industry in Minnesota as much as does this farm bill.

While I know we will not be considering major changes to the Federal Crop Insurance Program, I am looking forward to working with my colleagues in assuring funding for the Federal Crop Insurance Program for the 1991 crop year.

The measures included in the conservation title of the farm bill as reported from the full committee represent a compromise supported by farm groups as well as environmental groups. An item worthy of mention is the changes relating to the swamp buster provisions which make the penalty fit the crime so to speak. That is, a farmer will no longer lose all of his program benefits for a minor violation. We do not want to penalize farmers, we want to protect our wetlands in a realistic manner.

The committee has also maintained strong support for the export programs. It is imperative that we maintain our export markets.

And, I am pleased to have actively supported the chairman of the committee, Mr. DE LA GARZA, and the ranking member, Mr. MADIGAN, in the decision to write a farm bill independent from the ongoing GATT negotiations. It is imperative that we do so.

Some of the amendments which will be offered jeopardize this approach. In all instances, I urge my colleagues to reject these amendments. The committee bill has taken the proper approach. American agriculture supports a level playing field in the international arena. Some of these amendments will "unilaterally disarm" segments of American agriculture, leaving the American farmer alone to fight the treasuries of our foreign competitors.

One additional item—rural development. While this measure does not directly address rural development, those of us from the rural communities know that the best rural development is a strong agricultural economy. In drafting this legislation the committee worked with this in mind. Unfortunately, some of the amendments will result in job losses. For farmers it will be particularly difficult. A recent economic policy institute report states "rural workers have a harder time recovering from economic dislocation. Rural Americans are at a distinct disadvantage in the labor market. The economic infrastructure of rural regions just cannot absorb large numbers of unemployed workers." Having a strong agricultural and rural economy is as important to our Nation as it is to the local and regional communities.

During the debate on this legislation, some will argue their points with deep and sincere emotions. Others will argue from a detached position and say we must approach farming strictly as a business. In reality, it is both. A business and a way of life. We must develop farm policy which will allow farmers to work their land and compete with their neighbors down the road and farmers in foreign countries. Yet recognizing the uniqueness of farming as a way of life and the role it has played in our Nation is important. This legislation does both.

□ 1850

Mr. DE LA GARZA. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Mississippi [Mr. ESPY].

Mr. ESPY. Mr. Chairman, I rise in support of H.R. 3950, and I would like to commend the gentleman from Texas [Mr. DE LA GARZA] and the gentleman from Illinois [Mr. MADIGAN] and other members of this committee for presenting what I feel is a good bill, a responsible bill.

Mr. Chairman, it continues our efforts to create a stable and consistent and reliable food supply. It continues our efforts to open markets abroad, which helps our balance of trade after all, as we suffer trade deficits in almost every other category. It combats hunger at home and abroad through the Mickey Leland Anti-Hunger Assistance Act. It provides for a cleaner environment with wetlands and other environmental modifications. And, Mr. Chairman, it is not a budget buster. Only six-tenths of 1 percent of the Federal Treasury does this agriculture bill cost.

Mr. Chairman, it has often been said before and is almost cliche now that Americans are the best fed people for the least amount of disposable income. As I said, it almost sounds cliche.

Mr. Chairman, as we see food lines in the Soviet Union and shortages in Eastern Europe and elsewhere all across the world, this fact really comes home. American consumers get a really good deal from this farm bill and our National Farm Program. We only spend about 11 to 14 percent of our disposable income on food, and that is the lowest among industrialized nations.

Mr. Chairman, in the debate tomorrow this House will be considering amendment sponsored by some of our urban and suburban Members. I hope that this debate does not turn into a rural versus urban concern, because, Mr. Chairman, agriculture is important to everyone, because everyone must eat.

I hope Members will resist this tomorrow, because by and large I feel these are antifarm and antirural. They are antifarm because they only serve our competitors who seek to undercut our positions in world markets, and they are antirural because they further seek to call for the demise of rural America and rural economies, because, Mr. Chairman, as we still seek to diversify in Mississippi and other rural States across this Nation, it is still true that as so goes agriculture, so goes rural America.

Mr. Chairman, in conclusion, I think this is a good bill. I think that it is fiscally responsible. I and others on the committee would have liked to have seen some kind of inflation index, some sort of benefits being targeted to the cost of production, because combines cost more, cotton pickers cost more, everything costs more, and small farmers in this Nation are being ploughed under.

These large farmers that you hear so much about today, Mr. Chairman, really on an average receive only about a 2-percent return on their investment.

Mr. Chairman, in conclusion, I think this is a good bill, and I would like to recommend it to Members. I hope we do pass House bill 3950.

Mr. DE LA GARZA. Mr. Chairman, I yield 3 minutes to the gentleman from New York [Mr. SCHUMER].

Mr. SCHUMER. Mr. Chairman, first let me thank the chairman of the committee for the generous yielding of time. I would say first that I have eminent respect for him and the members of the committee. They work hard, they labor diligently, and for something they truly believe in. I think no one can impugn the motives and the hard work of the members on the Committee on Agriculture as they labored through this proposal.

Mr. Chairman, I would simply say that farm policy is really at a crossroads. The coalition that I am part of believes that there are certain problems in the bill that cannot be fixed from within the Committee on Agriculture. We understand that. But we think we can bring a salutory force to help make things better.

The perspective we center around is in the interest of taxpayers, consumers, and smaller farmers. These are groups that are part of the farm bill, but not a large enough part. And that has meant in my judgment a somewhat imbalanced approach that has meant

flawed policy and unnecessary bloating of the Federal budget as well.

Mr. Chairman, I believe that the farm programs should not be eliminated. I believe they are important and serve a role. But I believe equally fervently that they ought to be fixed. I believe that billions of dollars can be saved without hurting the family farmer and to the benefit of the country as a whole.

So, the Coalition of Common Sense Farm Policy Members will offer a series of different amendments to bring about fundamental changes. They are in two categories. The first are in categories of programs that have truly outlived their usefulness, or programs that have gone awry. The Export Guarantee Program, a program that in general makes some sense, spends a quarter of its dollars on Iraq. I do not think the American people really would support that.

The T Program, the Targeted Export Assistance Act, gives money to large businesses and co-ops to advertise overseas. Again, if we had to rank American priorities in these days of budget deficits, that would be at the bottom of the list. And the list goes on.

The Woolen Mohair Program was designed to subsidize a needed strategic commodity, woolen mohair having not been a strategic commodity for 20 years.

But the other thing we wish to do is refocus the farm program on the family farmer. When 3.6 percent of the farmers get close to 40 percent of the subsidies, there is something wrong. I will offer an amendment that will set a ceiling on eligibility of farm subsidies, ensuring that those that are making $100,000 of profit, not the Reid amendment in the Senate, because we all know that gross receipts don't measure the wealth of a farmer. Many farmers have high gross receipts, high expenses, and do not make any money. But if you are making over $100,000, you should not get a subsidy, you do not need a subsidy, and since 1985, with the Reagan farm changes, too high a proportion of the farm bill goes into that arrangement.

Mr. Chairman, the bottom line is we can have a rational, constructive farm policy. We can have a farm bill that helps the producers that need help and the taxpayers that need relief. I look forward to the remainder of the debate and look forward to hopefully this House making some changes in the farm bill that again will not end farm programs, but simply aims to fix them.

Mr. DE LA GARZA. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Arkansas [Mr. ALEXANDER].

Mr. ALEXANDER. Mr. Chairman, I thank the gentleman for yielding time to me. I wish to commend the chairman, the ranking member, and all of the members of the committee and staff for producing a very difficult bill on the subject of omnibus farm legislation. I know personally, having once served as a member of the Committee on Agriculture, the arduous task that they have had, to hear the numerous witnesses over time to produce this legislation today.

There are two points I would like to make at the outset of the debate on this farm bill.

The first is that this farm bill has been driven as much by budgetary considerations as by farming considerations.

Farmers and friends of agriculture in Arkansas and across the country deserve no less than candor from us.

It would be less than candid to speak on this bill without pointing out that the problem of the Federal deficit has played a large role in shaping this bill, and will play a large role in the final product which emerges from this debate.

The second point is that farm programs are essential to American agriculture, and that this country cannot do without them if it is to sustain an agricultural industry that can compete effectively in the global marketplace.

Under today's conditions we need these programs.

Farmers prefer earning their money from the marketplace rather than through Government programs. The result of farm programs, however, has been a relatively cheap and stable supply of food for consummers.

And, we must observe that every major agricultural country in the world has a farm program. Why? Because the same survival-of-the-fittest rules that make the free market such a frightening place for individual farmers apply to farming countries, as well.

Our trading competitors and partners realize that the risk of financial ruination for the individual farmer—from 100 different sources completely outside his control—is too great.

Those other countries realize that it is the obligation of any national government to share that risk with the farmer, if that government wants to adequately feed and clothe its people and compete effectively in the world farm marketplace.

The administration is currently working at Geneva, under the GATT framework, for a total, worldwide elimination of farm programs. Perhaps we would be the biggest kid on the block under that scenario; perhaps not.

But one thing is for sure: in today's non-GATT environment, America would be eaten alive in world agriculture trade without farm programs. Every nation subsidizes their farmers. And the United States must do so as well.

Many amendments, including two of my own, will be considered in the next few days. I hope that when the debate is finished, it can be said that we did as much as we could for the American farmer under the circumstances.

□ 1900

Mr. DE LA GARZA. Mr. Chairman, may I inquire as to the remaining time?

The CHAIRMAN pro tempore (Mr. SCHUMER). The gentleman from Texas [Mr. DE LA GARZA] has 8½ minutes remaining; the gentleman from Iowa [Mr. GRANDY] has 3 minutes remaining.

Mr. DE LA GARZA. Mr. Chairman, I am informed that the Committee on Education and Labor has allotted to them 30 minutes. I do not know of their participation with the exception of the mutual committee member, the gentleman from Indiana [Mr. JONTZ], who is present. Either we could allow him time on our time or, if he would, take time from that allocated to the Committee on Education and Labor.

The CHAIRMAN pro tempore. The Chair informs the chairman that the Committee on Education and Labor's time will be yielded back unless they show up.

The Chair is informed that they have shown up in the person of the gentleman from Indiana [Mr. JONTZ].

Mr. DE LA GARZA. Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN pro tempore. The gentleman from Indiana [Mr. JONTZ] is recognized for 15 minutes.

Mr. JONTZ. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I want to thank the distinguished chairman of the Committee on Agriculture, of which I am also a member, for allowing me to proceed at this point.

Mr. Chairman, my understanding is that the ranking minority member of the full House Committee on Education and Labor, Mr. GOODLING, will be present to claim his time.

Mr. Chairman, I certainly want to thank the chairman of our full Committee on Education and Labor, the gentleman from California [Mr. HAWKINS], and the chairman of the Subcommittee on Select Education, the gentleman from New York [Mr. OWENS], for making it possible for me to utilize this time this afternoon.

I would like to take a few minutes to speak to the issue which our Committee on Education and Labor debated a few days ago, which is a very important issue to a number of our Nation's farmers and agricultural communities.

That is the question of farmers with disabilities, what we can do in this farm bill to provide help to those individuals to keep them productive, keep then on the land, keep them a part of American agriculture.

Section 1842 under title XVIII of the farm bill that we have before us contains an assistance program for farmers with disabilities which is the product of work by the Easter Seal Society and Representative NAGLE of Iowa, a member of the full Committee on Agriculture, which I think is an excellent provision, to expand what is happening now in our country to assist these farmers and to provide them with assistance through the Agricultural Extension Service to help them remain productive.

Currently, farming is this Nation's most hazardous occupation. There are some 500,000 disabled farmers and agricultural workers nationwide. Regrettably, there is assistance, but for a small number of those, even though we know many farmers who have been disabled through on-farm accidents or some other way, can often continue farming with proper help.

We have models now in place, successful programs operating now in the State of Iowa, in the State of Indiana. At Purdue University, Indiana Easter Seal Society operates the Breaking New Ground Program. There are also programs in Montana and Vermont which are outstanding programs that are run through the Cooperative Extension Service.

We know from the operation of these programs that there is much which can be done to help farmers with disabilities.

The purpose of the provision which is in title XVIII of the farm bill is to expand what is now happening to fund cooperative programs between the State extension services and private not-for-profit organizations such as Easter Seals and others to help disabled farmers and agricultural workers.

There will be a total of $31 million authorized over the next 5 years for grants under this program. There would be a competitive process for awarding those grants. I think that this provision would allow us to move forward and address the very pressing need and help a group of young men and women who would like to remain in agriculture, who have been disabled through some accident, who can remain productive in agriculture with some assistance.

Mr. Chairman, when this legislation came to the House Education and Labor Committee, there was extensive debate over the proper relationship between the Secretary of Education and the rehabilitation programs under the Secretary's authority, and the program as it was written in the House Agriculture Committee, which is a program to be funded with agriculture dollars and administered through the Extension Service.

My belief is that there may be an amendment offered on the floor of the House by myself or by the gentleman from Michigan [Mr. FORD], a member of the full Committee on Education and Labor, to provide that these programs be administered in consultation with the Secretary of Education.

Whatever the will of the House may be in that regard, I feel like we would not want to delay this program or hinder it in any way by encumbering it with unnecessary amendments. But at the same time, the Secretary of Education and the rehabilitation programs he administers certainly have something to offer.

My hope would be that this concern can be accommodated and that we can see the proper sort of working relationship between the Department of Education and the Department of Agriculture to see that this is a positive program.

I want to again thank the chairman of our subcommittee, the gentleman from New York [Mr. OWENS], who is responsible for rehabilitation matters. I know the gentleman from Pennsylvania [Mr. GOODLING], the ranking minority member of the full committee is here.

I would like to retain the balance of my time, Mr. Chairman. There are other issues which perhaps can be discussed on the time that remains of the Committee on Education and Labor, but I felt it was necessary to address this very important issue of the disabled farmers in our country who need the assistance, who can be receiving assistance through this provision.

Mr. Chairman, I reserve the balance of my time.

Mr. GRANDY. Mr. Chairman, it is my understanding that the minority side of the Committee on Agriculture has 3 minutes remaining.

The CHAIRMAN pro tempore. The gentleman is correct.

Mr. GRANDY. I would like to use that time to close at this point. Then I assume the time will revert to either the Committee on Foreign Affairs or the Committee on Education and Labor. Is that correct?

The CHAIRMAN pro tempore. The gentleman from Iowa may close for the minority side of the Committee on Agriculture at this point if he wishes, yes.

Then we would probably have to finish the Education and Labor portion of the debate, the remaining time for the gentleman from Indiana and the 15 minutes for the gentleman from Pennsylvania [Mr. GOODLING].

Mr. GRANDY. Mr. Chairman, with that understanding, I will finish up for the Agriculture Committee.

The CHAIRMAN pro tempore. The gentleman from Iowa is recognized.

Mr. GRANDY. I thank the chairman.

Mr. Chairman, I, too, want to join the members of the committee and the Members of this body who have congratulated the chairman of the Committee on Agriculture and its ranking member, the gentleman from Illinois [Mr. MADIGAN] for putting together a very difficult but very worthwhile package that does not give any member of the Committee on Agriculture what he or she wanted, which does not give any farmer in this country what he or she wanted, or any consumer, for that matter, but has tried to fashion a balanced package that meets the needs of those people who produce food in this country and those people who consume it.

Mr. Chairman, I know there are problems with this bill, and I know there will be amendments that are offered. But I hope that during the course of the debate we remember that what we are discussing as we discuss the Food and Agricultural Resources Act of 1990, is the continuation of a world recovery policy that began in 1985 with the Food Security Act, was extended with the Agricultural Credit Act of 1987, was to some extent supplemented by the drought bills of 1988 and 1989 and is now, I think, reaching an appropriate culmination in this bill.

We have frozen target prices in this bill. Members of this committe, Members in this room have preferred to raise those target prices.

Federal employees will see cost-of-living allowances built into their wages; farmers will not.

What they will see is probably 4.5-percent inflation over the next 5 years, which will amount to a net loss in income for them and yet, because of the budgetary requirements, we cannot index target prices to the cost of inflation. And we do not, because we are mindful. We are also trying to remain in mind of that pledge that we took in the Food Security Act to make our exports more competitive.

With that in mind, we have tried to create a trade policy that responds to those needs.

I heard the gentleman from New York mention some criticisms of the T Program, which rightly should be criticized.

□ 1910

Yes, there have been some subsidies to large, large companies that have used advertising dollars, but let me remind Members we are trying to address that in committee. An amendment was offered by this gentleman which was accepted by the committee to allow up to 25 percent of those T funds to go to smaller companies, smaller regional companies, to market their products and advertise their products overseas. We are changing.

There is an attempt to criticize programs like the Export Enhancement Program which have in the past stressed bulk commodities over value-added products. That change is in this

bill. More to the point, we are trying in this bill to continue what we did in the Food Security Act of 1985, which is to balance the economic and environmental needs of this country. If Members recall in 1985, the conservation title was handed to this body on the floor. This year, the Committee on Agriculture, and the Subcommittee on Conservation, Credit, and Rural Development and the Subcommittee on Department Operations, Research, and Foreign Agriculture have made those changes.

Let me say, Mr. Chairman, in conclusion, I salute all the Members who have worked hard. I close with a statement that I think anybody who supports this bill would support, made by William Jennings Bryan over 90 years ago, who said,

> Burn down your cities and leave our farms, and your cities will spring up again as if by magic; but destroy our farms and the grass will grow in the streets of every city in the country.

Mr. DE LA GARZA. Mr. Chairman, I yield 1 minute to our distinguished colleague from Georgia [Mr. RAY].

Mr. RAY. Mr. Chairman, I rise in support of H.R. 3950, the 1990 farm bill, and I want to commend the chairman of the committee, Chairman DE LA GARZA, and the ranking Republican member, Congressman MADIGAN, for their leadership on this issue. The debate on this bill promises to be lively and aggressive.

There was a time when this body was proagriculture because of the very large percentage of Americans who were farmers—compared to less than 2 percent today—and because many Americans, having gone through the Great Depression of the 1930's, they, the Congress, appreciated those who produced food for them when they were going through a difficult period in our history. Sadly, today it seems we do not have a proagriculture majority in Congress.

I do not know of any Federal program that doesn't have bureaucratic complications and which can not be budgetarily adjusted—not one. This includes agriculture. But I want to remind my colleagues that our agricultural production system is a fragile one—one which during the last 14 years lost about half of America's farm producers. In addition, a large percentage of the current generation of children from farm families are going into professions other than agriculture, and the future is looking very bleak indeed.

I have had the opportunity to visit foreign farm organizations during the past few years as have many members of the Agriculture Committee. I have observed that most European countries, as well as Asian and Middle Eastern countries, do whatever is necessary to protect their food production systems. Their farms were decimated during several wars.

The South during the Civil War also experienced a time of starvation, when there was no one at home to run the farms. So we know what happens when the farmers leave the land for whatever reason.

The point that I want to make tonight is that the pipeline from the farms to the supermarket must be protected—and it must be protected at all costs. I hope that at some future date we would reach a period of market stability where we could begin to reduce certain types of subsidy to support agricultural programs—but that time is not now.

The 1985 farm bill has for the most part worked very well. We have farmers who are beginning to recover and to regain their economic status—farmers who are once again becoming motivated and happy about the contribution they are making to the American family, the families of the world, and to the starving families of the world.

If our colleagues from the nonfarm States are successful in wrecking the 1990 farm program, they will have contributed to driving more farms out of the food production business. They will make it necessary for increased importing of agriculture products.

Mr. Chairman, I speak from a forum of experience. All of my ancestors have been farmers, and I am a former farmer—and I might add a former farmer who was driven off the land in the 1950's because of 3 years of drought and a disastrous fire that burned 200 acres of grain and because of an administration that tinkered with agriculture during that period.

Mr. Chairman, there will a lot of healthy discussion on this bill as there should be, but I judge that in the final analysis we should vote for and pass H.R. 3950, the farm bill.

Mr. DE LA GARZA. Mr. Chairman, I reserve the balance of my time, to conclude debate after the other committees have used their time.

The CHAIRMAN pro tempore (Mr. SCHUMER). The gentleman from Pennsylvania [Mr. GOODLING] is recognized for 15 minutes.

Mr. GOODLING. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, there are a couple of areas of the bill that we have some jurisdiction over, and I would mention those very briefly.

Section 1382, consistent with the jurisdiction over worker health and occupation and the responsibility given the Department of Labor by the Occupation Safety and Health Act, in advancing safe and healthy working conditions, of course, comes to our committee. Section 1382 requires the Department of Agriculture to conduct a study of the frequency and severity of accidents to persons working in agriculture, and conducting the study, the bill calls upon the Department of Agriculture to utilize the work in this area done by the National Institute for Occupational Safety and Health, NIOSH, in State and private agencies and industries, and also requires that the Department of Agriculture furnish a report on the study to the respective Committees on Agriculture of the House and the Senate, by January 1, 1992.

There were two minor changes made by the committee in this section. We would require the Department of Agriculture to consult OSHA as well as NIOSH in conducting the study. Second, we would require the Secretary to submit a copy of the report of the study of the House and Senate Committees on Labor at the same time as the report given to the Committee on Agriculture.

In the bill, section 1774, the food distribution advance funding for States option contracts, amend the Commodity Distribution Reform Act and WIC amendments of 1987. It authorizes the Secretary of Agriculture to use Commodity Credit Corporation, and section 32 funds to pay for all or a portion of the cost of goods or processing or packaging of food on behalf of State commodity distributing agencies. When such funds are used to meet the agreed-upon costs, the State commodity distribution agencies are required to reimburse the Secretary for such costs, and the funds received by the Secretary to be deposited for the credit of the Commodity Credit Corporation or the appropriate account from which the funds were originally borrowed, and repayments must be made by the agency within 150 days. If not, the Secretary must deduct any outstanding amount from the appropriate account within 30 days. This gives the Secretary an opportunity to do what we must do, if we are going to use many of these commodities. He has to be in a better position to get commodities to those who are using the commodities in a manner in which they can be used. So many times commodities come at the end of a school year, and somebody has to find some place to store them, have to rent facilities, many times, particularly refrigerated facilities. Other times, all sorts of commodities come into a school district, and there is nothing they can do with them unless they are reprocessed, and they send them out for reprocessing, and then they bring them back and try to use them that way.

This will give the Secretary a little more leeway to provide these commodities in such a manner that it is more likely that the schools will be able to use them, as well as some of the senior citizens groups that also seem to be interested.

The one area that I had hoped that we could do more with, and the gentleman from Indiana [Mr. JONTZ] talked about earlier, I think we want to be careful if we are going to get in the business of deciding every committee should have some separate rehabilitation program, everything is going to be redundant. We do not have money to do those kinds of things. We have good programs being operated now. I hope that our minor change in saying at least the Secretaries must consult with each other will bring about a coordinated effort so that we do not find ourselves spending a lot of money in different agencies, coming from different departments, doing exactly the same thing.

I hope that when those are brought up as amendments we can get support.

Mr. Chairman, the committee has made two minor changes in section 1382 consistent with its jurisdiction over worker health and safety and the responsibility given the Department of Labor by the Occupational Safety and Health Act in advancing safe and healthy working conditions. Section 1382 requires the Department of Agriculture to conduct a study of the frequency and severity of accidents to persons working in agriculture. In conducting the study, the bill calls upon the Department of Agriculture to utilize the work in this area done by the National Institute for Occupational Safety and Health [NIOSH] and State and private agencies and entities. The bill also requires that the Department of Agriculture furnish a report on the study to the respective Committees on Agriculture of the House and Senate by January 1, 1992.

The two minor changes made by the committee to this section: First, require the Department of Agriculture to consult OSHA as well as NIOSH in conducting the study; and second, require the Secretary to submit a copy of the report of the study to the House and Senate Labor Committees at the same time as the report is submitted to the Committees on Agriculture.

In this bill, section 1774, the food distribution—advance funding for State option contracts amends the Commodity Distribution Reform Act and WIC amendments of 1987. It authorizes the Secretary of Agriculture to use Commodity Credit Corporation and section 32 funds to pay for all or a portion of the costs of foods or the processing or packaging of foods on behalf of State commodity distributing agencies. When such funds are used to meet agreed upon costs, the State commodity distribution agencies are required to reimburse the Secretary for such costs and the funds received by the Secretary are to be deposited to the credit of the Commodity Credit Corporation or the appropriate account from which the funds were originally borrowed. Repayment must be made by the State agencies within 150 days of delivery of the processed foods or the Secretary must deduct any outstanding amount from the appropriate account within 30 days.

Basically, this provision gives the Secretary of Agriculture the necessary authority to borrow funds from the CCC or section 32 accounts and advance these payment to companies to provide USDA-donated commodities in processed forms that are readily usable by local recipient agencies. The primary beneficiary of this change will be the schools that participate in the National School Lunch Program and receive USDA commodities as part of their Federal entitlement assistance. Senior citizen meal program operators have also expressed an interest in this initiative.

Due to the volume of processing that is anticipated, USDA believes that more plate-ready foods will be available to schools at lower costs. Additionally, it will be more attractive to offer a wider variety of USDA commodities in forms that are more desirable for school food service operations. Currently State commodity distribution agencies must either advance State funds to cover food, processing, and packaging costs and subsequently bill the schools in advance and then proceed to negotiate State level processing contracts. With this new authority, the processing of USDA foods to meet the needs of the schools and other local recipients should be expedited. Finally, the administration included a similar provision in its draft farm bill legislative package that was sent to the Congress earlier this year.

With respect to section 1842, the Education and Labor Committee made a few minor changes to authorize consultation with the Secretary of Education, and to remove the limitation that the disability be only physical in nature. Section 1842 authorizes demonstration grants to support cooperative programs between State extension service agencies and private nonprofit disability organizations to provide on-the-farm agricultural education and assistance directed at accommodating disability in farm operations for individuals with physical disabilities and their families. This program is authorized at $3 million for fiscal year 1991 and fiscal year 1992 and at $5 million for fiscal year 1993 through fiscal year 1996. The legislation also authorizes $1 million for a national grant for technical assistance, training, and dissemination to be awarded to national private nonprofit disability organizations.

This is a program which is clearly designed to provide rehabilitation to farmers with disabilities. We were hopeful in committee to place this program administratively where we believe it belongs with other rehabilitation programs through the Department of Education. Further, we were hopeful that we could have made a greater link with the National Institute of Disability and Rehabilitation Research, which is currently studying the needs of individuals with disabilities in the workplace. The committee was reluctant to make these substantive changes, but did recognize the need to at least coordinate the grants in consultation with the Secretary of Education.

Each of these amendments must be offered on the floor and I am hopeful that my colleagues will support such a move. To authorize a disability program that is focused on rehabilitation, and not have it coordinated with the lead Federal agency that operates the basic State grant rehabilitation grant program seems to be duplicative and misdesigned. We need to be concerned about the needs of the client, not turf issues among Federal agencies or committees of Congress. I hope that we will be able to have the Education and Labor Committee's language accepted if it is offered as an amendment. It will strengthen the programs, and provide more comprehensive services to the client in the long run.

Mr. JONTZ. Mr. Chairman, I yield such time as he may consume to the gentleman from New York [Mr. OWENS].

Mr. OWENS of New York. Mr. Chairman, I would like to associate myself with the remarks made by the previous speaker, the gentleman from Pennsylvania [Mr. GOODLING] with regard to the rehabilitation programs and the fact that $3 million is included in this bill for rehabilitation purposes at a time when we are faced with the need to make Government more efficient, more effective, to spread ourselves in this way, and to have an appropriation for this kind of activity, without having the infrastructure raise these serious questions.

Mr. Chairman, I rise to indicate my support for an amendment to section 1842 of this legislation intended to be offered by the gentleman from Michigan [Mr. FORD] tomorrow.

Section 1842 of this legislation authorizes the Secretary of Agriculture to make demonstration grants to support cooperative programs between State extension service agencies and private nonprofit disability organizations to provide on-the-farm agricultural education and assistance directed at accommodating disability in farm operations for individuals with physical disabilities, and their families, who are engaged in farming or farm-related occupations.

The intent in having extension agents deliver services to farmers is to heed research results which show that farmers respond most favorably to services delivered by people most familiar to them, in this case extension agents, with whom they have a long history of successful interaction. In the current context, however, it would be a mistake not to ensure that the expertise in rehabilitating people with disabilities housed in the Department of Education's Rehabilitation Services Administration is obtained in the administration of the program.

For this reason, I intend to support an amendment to be offered tomorrow by the gentleman from Michigan [Mr. FORD] which would require the Secretary of Agriculture to consult with the Secretary of Education in the administration of this program. This would ensure that the Department of Agriculture is in a position to benefit from the disability-specific expertise of the Rehabilitation Services Administration, located within the Department of Education. The Ford amendment will also promote greater familiarity in the Rehabilitation Services Administration with rehabilitation as seen from the perspective of the farmer.

A rehabilitation system responsive to the need of farmers is a necessity in our society. The rate of occupationally incurred disability is higher for farmers than for any other occupation. The Rehabilitation Act of 1973 is up for reauthorization next year and it is my intent as the chair of the subcommittee responsible for that effort to build on those services already provided under the act and the knowledge gained as a result of implementing this provision in the farm bill to ensure that this $1.5 billion program, the Federal Government's largest devoted to the rehabilitation of people with disabilities, is responsive to the rehabilitation needs of our Nation's farmers.

The Ford amendment would also make a needed change in the target population for this program. As currently worded, only individuals with physical disabilities are eligible to receive services. As a House Member who was heavily involved in the recently passed Americans With Disabilities Act, I note that an unsuccessful attempt was made in one of the committees considering the bill to limit coverage to those with physical disabilities. The attempt to limit coverage under the Americans With Disabilities Act to those with physical disabilities represented a departure from the definition of disability in effect since 1973, and was wisely rejected. It is contrary to sound principles of disability policy to arbitrarily exclude an entire class of people with disabilities from the benefits of this program. The Ford amendment would delete the word "physical" from the current language, thereby ensuring that this program's target population is the same as that set forth in the basic State Rehabilitation Program funded under the Rehabilitation Act.

I applaud the efforts of the gentleman from Michigan to improve the legislation before us and urge a "yes" vote on his amendment tomorrow.

□ 1920

Mr. GOODLING. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN pro tempore (Mr. RAY). The gentleman from Nebraska [Mr. BEREUTER] is recognized for 15 minutes.

Mr. BEREUTER. Mr. Chairman, I yield myself 12 minutes.

Mr. Chairman, I want to begin by commending the chairman, the ranking member, and all the members of the Committee on Agriculture of the House who have crafted very important legislation which they are bringing to the floor. They have made a tremendous effort in doing that, and I commend them.

I want to focus my remarks initially on title XII, where the Committee on Foreign Affairs of the House had jurisdiction with the Committee on Agriculture on matters relating to food assistance and exports. I would speak first to the amendment earlier described and to be offered by the gentleman from Connecticut [Mr. GEJDENSON], the chairman of the Subcommittee on International Economic Policy and Trade of the Committee on Foreign Affairs. He has done that with the support and cooperative effort of this Member and other members of the Committee on Foreign Affairs and of the Select Committee on Hunger. It incorporates a major and important new initiative to restructing the Public Law 480, Food for Peace Program. This represents the culmination of an effort that has gone on for more than a year. This Member has worked with and consulted extensively with all the organizations and agencies involved in the Food for Peace Program to develop the best possible structure for Food for Peace during the 1990's. We were assisted greatly by the Committee on Agriculture, and we had great cooperation and support from the Select Committee on Hunger.

This Member introduced comprehensive reform legislation in the form of H.R. 4783, which has been reflected in a major way in the amendment offered by the chairman, the gentleman from Connecticut [Mr. GEJDENSON].

As has been mentioned, the provisions in the Gejdenson amendment represent an agreement between the Committee on Foreign Affairs and the Committee on Agriculture that major reform to make the program work efficiently and with full accountability by individual agencies of the executive branch are needed, especially in AID and the USDA, which incidentally are led by my constituents, USDA Secretary Clayton Yeutter and AID Administrator Ronalds. So I have a special interest in trying to make these two agencies' programs mesh for the benefit of the public and of the international programs. By making these changes, we strengthen an extraordinarily important part of the U.S. Foreign Assistance Program, the assistance in the form of U.S. food commodities, which I think is the most popularly accepted part of our foreign assistance program.

When people are hungry, obviously there is no assistance as valuable as food assistance. But food assistance takes careful programming, careful handling, and careful consideration of nutrition and markets to be used well. We have an opportunity to eliminate the scourge of hunger from the world in this decade, but it can only happen if this kind of attention is paid to the objective of having the best possible U.S. food assistance programs. Hunger relief and development is part and parcel of a continuation of the title II programs of assistance for emergencies and through private voluntary organizations in this legislation. In addition, a major new title III grant program for the poorest countries is begun, with the AID Administrator being asked to design it for maximum development impact against hunger.

The title I concessional sales program will become more tailored, under the responsibility of the Secretary of Agriculture, to building up economic development in countries that have good potential as future commercial sales markets for U.S. agricultural exports. Concessional assistance in the form of commodities is an excellent way to support economic development in these countries. With agricultural exports as the single largest export sector of American products or services, we are helping to multiply the number of paying customers we will have in the future for our agricultural products and our processed food.

In the Committee on Foreign Affairs, must through and hard mental work went into the consideration of what would be the best structure for the Public Law 480 program to meet all the needs served by the program in the 5 years ahead. Undoubtedly and absolutely, that was true in the Agriculture Committee of the House as well. The key conclusion after many hearings was that a sharper division of authorities among the responsible agencies would correct many glitches and delays that occur in the present five-agency, consensual decisionmaking process on each and every Public Law 480 application. The result would be a Food for Peace Program that would better serve the interests of the United States in development assistance, in foreign agricultural market development, in foreign policy, and in humanitarian relief than does the present structure.

This Member is also pleased to see that we have reauthorized the highly successful Farmer-to-Farmer Program for the next 5 years. The bill also helps promote the institutional sustainability of fledgling agricultural education institutions in the poorest countries. By adding language to encourage the use of some of the local currencies generated through sales of grant food aid to be used for research, education, and extension in agricultural sciences, this bill would help improve food security and agricultural and economic development through strengthening local agricultural education institutions that are often under severe funding constraints. We, therefore and hereby, can encourage the development in the hungriest countries of local food grant colleges as sister institutions to our own land grant institutions and colleges. Since such local currencies could be used by indigenous nongovernmental organizations, including agricultural education institutions, together with the interest resulting from the investment of the funds, then our grant food aid assist-

ance could contribute both to feeding the hungry today and to permanently endowing local foundations to support agricultural education, research, and extension work that will correct the world hunger problem at its roots.

The bill also strengthens even further the nutritional impact of both the Public Law 480 program and AID's child survival and other development activities. We have a moment of opportunity opened up by a new Public Law 480 grant program for the poorest countries to figure out how to better use our food assistance to address malnutrition which is such an important element of food insecurity and child and maternal mortality rates.

We have an excellent title XII amendment being presented by the gentleman from Connecticut [Mr. GEJDENSON], and with great assistance by the Agriculture Committee chairman, the gentleman from Texas [Mr. DE LA GARZA], and I would certainly urge my colleagues to support it.

Now, let me proceed to a discussion very briefly of the domestic provisions of H.R. 3950.

Mr. Chairman, this Member commends all of the members of the Agriculture Committee, its distinguished chairman, the gentleman from Texas [Mr. DE LA GARZA] and the ranking minority member, the distinguished gentleman from Illinois [Mr. MADIGAN], for their leadership in developing the legislation now before the House and in particular for completing committee action on this bill in a timely manner. Putting together a comprehensive agricultural and food resources legislation of this magnitude is no small feat indeed—especially at a time when the country faces deep deficit problems.

This Member would like to thank the chairman and the ranking member, and especially the distinguished gentlemen from Missouri [Mr. VOLKMER] and [Mr. COLEMAN] and the ranking member, the gentleman from Washington [Mr. MORRISON] for their willingness to incorporate several elements of H.R. 4584, the Conservation Forestry Act of 1990, sponsored by this Member, into the conservation title of H.R. 3950. These elements include provisions to promote the planting of trees in semiarid areas of the United States in the form of shelterbelts and windbreaks, filterstrips and wildlife corridors. This activity is highly beneficial to semiarid areas as these trees will protect and enhance crop and livestock production, the economic mainstay of these mainly rural regions, provide valuable wildlife habitat and promote environmental goals generally. Special provisions were also included that would promote tree planting, in the form of filterstrips, in areas that have significant influence on surface and groundwater quality.

This Member would also like to especially, enthusiastically thank the distinguished gentleman from Kansas [Mr. ROBERTS] for introducing in subcommittee at this Member's request an amendment that would establish a Semiarid Agroforestry Research, Development and Demonstration Center and U.S. Forest Service Facilities in Lincoln, NE. Operation of this center will prove invaluable to States with semiarid climates in developing agroforestry systems specially suited to their climate that will promote crop and livestock production as well as enhance wildlife, water quality and the environment generally. The subcommittee chairman, Mr. VOLKMER, again, was helpful in giving every requested assistance to this Member on this amendment.

Mr. Chairman, this Member will be offering amendments that would enhance further these treeplanting and agroforestry provisions to further promote treeplanting in semiarid regions of the United States.

The bill now before the House also contains a number of provisions that will enhance the quality, cleanliness, and ultimately the competitive position of some of our most important exports, wheat, feedgrains, and soybeans. These commodities accounted for over $20 billion in exports in 1989. Many of the grain quality provisions now present in H.R. 3950 had their House origin in H.R. 3822, which was introduced by this Member in November of 1989. Mr. Chairman, the committee should be commended for addressing grain quality which is so critical to the competitiveness of U.S. agricultural exports and ultimately the financial well-being of a large cross section of U.S. farmers and rural America as a whole.

The bill now before the House continues the market-oriented, export-facilitating thrust of the 1985 Food Security Act that has been very instrumental in pulling rural America back from the brink of disaster that faced it such a short time ago. Exports and farm income are up. Confidence is growing in rural America. This Member commends the House Agriculture Committee for completing their very important and difficult task of preparing comprehensive 1990 farm and food legislation. Also, appreciation is expressed for including numerous provisions drafted by or introduced for this Member.

Mr. BROOMFIELD. Mr. Chairman, I am pleased to rise in support of title XII of this bill, which falls within the jurisdiction of the Committee on Foreign Affairs.

I want to commend Chairman FASCELL, and Congressmen GEJDENSON, ROTH, and BEREUTER of the subcommittee for their tireless effort on this legislation.

The substitute for title XII which will be offered jointly by the Foreign Affairs Committee and the Agriculture Committee will substantially reform U.S. Food Aid Programs. It is a serious attempt to reform the distribution of U.S. food aid to relieve the problem of hunger and improve the export of U.S. agricultural goods.

Because the authorities in this bill cross the jurisdictions of several congressional committees as well as several executive branch agencies, it is understandable that no reforms will be acceptable to all parties.

Despite this obstacle, I am pleased that a compromise was reached between the Agriculture Committee and the Foreign Affairs Committee on title XII. We will offer the substitute amendment later and I urge all of my colleagues to support this compromise.

The CHAIRMAN pro tempore. The gentleman from Nebraska [Mr. BEREUTER] has consumed 10 minutes.

Mr. BEREUTER. Mr. Chairman, I yield my remaining time, 4 minutes, to the gentleman from Michigan [Mr. SCHUETTE] for any remarks he might have to offer on the farm bill.

Mr. SCHUETTE. Mr. Chairman, I thank the gentleman from Nebraska [Mr. BEREUTER] for his courtesy tonight in yielding me this time.

Mr. Chairman, in this Chamber today, we start the debate on agricultural policy for farmers and ranchers in America, to set the course and direction of farm policy in the decade of the 1990's. This is farm policy in a global economy, farm policy in global markets, but, most of all, farm policy for America's farmers and ranchers.

I am proud to serve as a Member representing part of Michigan on this occasion as the 1990 farm bill has emerged from committee. This is a $17 billion industry that helps our State thrive. This farm bill is crafted toward having sensitivity for world market forces, strong export features, and responsiveness to environmental concerns, because, after all, farmers are America's first conservationists, as well as flexible commodity programs, recognizing, however, the importance of nonprogram crops.

During the course of this debate in the days to come, many of us will speak up on amendments offered to this bill. Let me share a perspective. Few in this Chamber would argue or advocate unilateral disarmament in terms of defense policy or defense strategy. No, we build a better peace in a safer world by tough negotiating at the bargaining table. So goes it with international trade and the predominance of agriculture in trade talks today. Let us not disarm the American farmer when foreign subsidies far exceed any we might have at this time, my point being that a worldwide reduction in subsidies and opening up markets to American products overseas is a worthy goal; however, this is only achievable through tough negotiations.

Let us not do the work of the European communities for them by unilaterally disarming American agricultural programs without a corresponding re-

duction at this point in time of foreign subsidies.

So when we go forth in this debate on many commodity programs, let us keep that perspective in mind. Our goal here in a global economy, and with global markets, is, after all, to fight for the American farmer.

The point here is, that we should approach this debate on farm policy from the perspective that we have a responsibility to American farmers. If it is the American farmer versus the French farmer, we will win, but if it is the American farmer versus Europe, Inc., EC-92, with unfair, uneven subsidies from foreign countries, then we would not be doing a service to American farmers. Let us keep that perspective in mind as we go forth during the course of this debate.

Mr. Chairman, I would like to commend Chairman DE LA GARZA and ranking minority member MADIGAN for their exhaustive efforts in guiding this fine piece of legislation to the floor of the House. The Food and Agricultural Resources Act of 1990, as it was adopted by the Agriculture Committee, is sound policy for farmers, for consumers, for our economy, for our environment, and for almost every other segment of our society. A change from this path would hurt rural America, disrupt the consumer's ability to purchase low cost food and fiber, destroy an opportunity for improving our environmental programs, and cripple one of America's premier occupations: farming.

American consumers receive the cheapest food and the best produced food in the world. When compared to other countries, U.S. consumers spend 10.4 percent of their income on food. That represents the lowest cost of any country. Our farmers are the most productive and most efficient of any other farmer in the world. Our consumers are the best fed of any other consumer. We should keep that in mind as we consider this legislation.

The 1985 farm bill was a success. It was legislation that Congress can and should be proud for having adopted. It helped boost our farm exports, increase farm income, improve our competitiveness, move agriculture toward a more market-oriented system, hold down food costs, and make food production more efficient. The bill we now consider will build on those successes.

In the Food Security Act of 1985, we experienced a sweeping policy change with regard to the partnership between the environment and agriculture. The environmental community, through its commitment to protecting and enhancing the Nation's natural resources and environment, worked in consultation with American producers and helped develop some very sound environmental initiatives. For instance, farmers have idled about 34 million acres of highly erodible land through the Conservation Reserve Program since 1986. Nationwide, the average soil loss on land in the program is estimated to be reduced from 20.9 to 1.6 tons per acre after permanent vegetation is established. The 1990 farm bill will build on these monumental accomplishments while extending current programs and establishing new opportunities for protecting wetlands, continuing the protection of highly erodible land, and increasing the quality of ground and surface water.

In the area of agricultural trade, the United States is the world's top exporter of agricultural products. In 1988 alone, our agricultural exports totaled $37 billion, accounting for over 1.2 million jobs and $93 billion in domestic economic activity. With the passage of the 1990 farm bill, we will assure a positive balance of U.S. agricultural trade, combat world hunger and encourage economic development, counter unfair, subsidized export competition, and build new markets for U.S. farm export vital to all Americans.

In conclusion, Mr. Chairman, I must point out that commodity programs comprise less then eight-tenths of 1 percent of the total Federal budget. Farm program spending has dropped substantially in recent years, saving American taxpayers billions of dollars. Since fiscal 1986, we have experienced a 70-percent reduction in Federal spending on farm programs. I ask my colleagues: Has any other Federal program achieved such savings as this? Has any other Federal program even come close?

The 1990 farm bill, H.R. 3950, is legislation that will continue to provide Americans with the safest, most reliable and lowest cost food and fiber supply in the world. It is vitally important that we protect America's largest single industry. U.S. agriculture employs nearly 21 million people, almost 19 percent of the Nation's work force, and accounts for nearly one-fifth of our gross national product. It is not an industry we can afford to lose. The United States' agriculture industry is the envy of the world. Let's keep moving forward. Let's adopt this bill.

Mr. BEREUTER. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN pro tempore. The Chair recognizes the gentleman from Indiana [Mr. JONTZ].

Mr. JONTZ. Mr. Chairman, may I inquire as to how much time remains to the majority of the Committee on Education and Labor?

The CHAIRMAN pro tempore. The gentleman from Indiana [Mr. JONTZ] has 5 minutes remaining.

Mr. JONTZ. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I want to take the remaining time to speak to what I consider to be one of the strongest aspects of the farm bill which comes before us in these next couple of days, and that is the environmental provisions of this bill which build on what was accomplished in the Food Security Act of 1985, which improve a number of those programs, and which put into place some programs which address our Nation's environmental problems in a commonsense practical way.

The legislation which comes before us strengthens the swamp buster provisions, making them more workable and more acceptable to both agriculture and environmental concerns. The legislation establishes water quality protection provisions which would ensure that USDA provides technical assistance to producers and provides incentives to producers to examine their management practices in areas where water quality might be sensitive, and to adopt best management practices on a voluntary basis where that would be a desirable thing.

□ 1930

Mr. Chairman, the bill establishes an Office of Environmental Quality within USDA to focus and coordinate environmental concerns. The bill makes a number of improvements in the Conservation Research Program. One very important to my own State in Indiana would allow a 15-year contract on CRP lands which are put into hardwoods. The bill includes a number of excellent forestry provisions and a forestry title all the way from assistance to rural communities with firefighting to urban forestry provisions, and there are other very important environmental programs in this legislation also.

Mr. Chairman, I want to emphasize that these are not programs which are being imposed upon the farmer, but rather programs which adopt the spirit of cooperation. I believe that America's farmers want to produce food and fiber for this country in an environmentally benign way. They want to move toward a more sustainable system of agriculture.

We have made a substantial investment in this legislation in research in the area of sustainable agriculture and also extension activities. Farmers recognize that they are impacted by environmental decisions and that in turn they impact the environment.

So, Mr. Chairman, I think we have the right balance in this legislation. We have endeavored in committee to make all of the provisions as workable as possible and achieve the objectives of a clean environment in a way which makes sense for America's producers.

Mr. Chairman, I might say that these very desirable provisions in the legislation are the result of efforts by a number of members of the committee. Certainly the chairman of our committee, the gentleman from Texas [Mr. DE LA GARZA] provided outstanding leadership along with the chairman of several of our subcommittees, the gentleman from Oklahoma [Mr. ENGLISH], the chairman of the Conservation Credit Subcommittee, the gentleman from California [Mr. BROWN], the chairman of the Department of Operations Subcommittee, the gentleman from Missouri [Mr. VOLKMER], the chairman of the Forestry Subcommittee. I believe that we bring to the House a bill which is a very strong bill from the standpoint of the environment and that the bill should get the support, not only of Members of Congress from rural areas, but also from urban and suburban areas because of what this legislation does to help

America's farmers make a transition so that they can continue to meet the food and fiber needs of our Nation with minimal impact on the environment.

Mr. DE LA GARZA. Mr. Chairman, I yield 1 minute to our distinguished colleague, the gentleman from Texas [Mr. STENHOLM].

Mr. STENHOLM. Mr. Chairman, Will Rogers once observed, "It ain't people's ignorance that bothers me so much as it is them knowing so much that ain't so, that's the problem."

Regrettably, the average person today knows very little about production agriculture, how food is grown, processed, and marketed. Many Americans have probably never met a farmer in person. Most consumers take the farmer and our food supply for granted, without realizing how fortunate the United States is to have the safest, least expensive, best quality, and largest food supply the world has ever known.

As we move toward consideration of the 1990 farm bill, instant experts have surfaced, mostly self-acclaimed, with a tendency for exaggerating, or in some cases oversimplifying agricultural policy.

Certainly farm programs need improving, and the House Agriculture Committee has made every effort to do so; but let's keep things in perspective. The total USDA budget has cost an average of $44.1 billion annually over the past 10 years, peaking in 1986 at $58.7 billion. The problem with this statistic is that the USDA budget is not entirely devoted to farmers. In fact, the largest outlay of the entire USDA budget is allocated for school lunch programs, the Food Stamp Program, Food Assistance for Women, Infants, and Children [WIC], funding for conservation, forestry and research, foreign assistance, rural development, food safety and inspection services to assure consumers of quality products, and administrative costs. Infact, under the current proposed USDA budget, approximately 50 percent is allocated for Federal food assistance programs alone. Federal farm price supports, on the other hand, make up only 16.8 percent of the total agricultural budget for fiscal year 1990. Relative to all Federal budget costs, this amounts to just 0.8 percent, less than one penny out of every Federal budget dollar.

Why has the Federal Government traditionally been involved in American agriculture? I believe there are many reasons. Let me briefly focus on just two.

First, farmers and ranchers compete in an international marketplace where foreign governments are often in partnership with their exporting companies. A restaurant owner in Abilene, TX, for example, does not have to worry about the price of a meal in Europe because his customers are local. But American farmers compete with foreign producers who are often heavily subsidized by their governments. If we were unable to provide some degree of Federal support, the cost of production would make our food products too expensive and foreign markets would take their money elsewhere, which could amount to an average of $16 billion annually in losses added to an already staggering trade imbalance.

Americans have come to enjoy and expect a high-quality food supply at a very reasonable cost, now just 10.4 percent of our consumer dollar. Acccording to 1988 figures, a nicely prepared sirloin steak in Washington, DC costs about $11.46; in Tokyo, we would pay about $51.20 for the same sirloin steak. Today, we can buy a dozen eggs for 85 cents; in Stockholm, they pay $2.87. American families can enjoy 53 cents/liter milk, but to a consumer in Ottawa, it would be twice that much. For $1.63, Americans can purchase over 2 pounds of oranges. London consuemrs will pay $3.42 for the same quantity of oranges.

If food costs have gone up over the years, it's not because the farmer is receiving more money. In fact, crop prices are less today than they were 10 years ago. Rice has gone from $12.80 per unit in 1980 to $7 in 1990; soybeans have dropped from $7.60 per bushel to $5.60; corn is down from $3.12 per bushel to $2.55; and wheat is at $2.65, down from $3.99. If the cost of food has increased, it's due to economic factors such as inflation, and manufacturing and distribution cost increases, not as a result of Federal farm programs. Today, agricultural spending is less than 50 percent what it was in 1986. The fact is, American domestic farm policy keeps the consumer's cost of food down, an important economic point for low-income families, while allowing producers to compete in an international marketplace.

Second, the 10-year average of return on equity for production agriculture is 5.1 percent. Compared to other industries, that is not a lucrative business. A recent survey by Forbes magazine revealed that the health industry had an 18.7-percent return on equity; the entertainment and information industry, 17.3 percent; business services and supplies, 16.7 percent. Even the depressed energy industry experienced a 10.2-percent return on equity. The median return on equity for all industries over the past 10 years has been 14.3 percent. Yet, production agriculture has experienced only a 5.1-percent average annual return on their investment.

Without some degree of Federal support to cope with the weather, the cost of production, and international markets, U.S. agriculture could begin to experience dramatic and severe price fluctuations. Hundreds of thousands of people could be forced to leave farming, as only the very largest, possibly corporate or even foreign owned, could compete. We could see a concentration of crop and livestock production, controlled by an elite few, with the power to dictate the price, quantity, and quality of our most basic needs of food and fiber.

We have found ourselves in a similar situation regarding oil production. In 1989, the United States crossed over the 50-percent line on energy imports and may soon be at the mercy of OPEC and other oil exporting countries. Last month, we imported approximately 54 percent of our domestic energy needs, the highest in history.

Taxpayers, by no means, owe every farmer his or her living. But taxpayers, by all means, owe it to themselves to ensure the security of their own food supply through providing an opportunity for our farmers to compete in the world market.

As mentioned earlier, we have the most abundant quantity, the best quality, and the safest food supply at the lowest cost to the consumer compared to any other country in the world. It's not that way by accident. The Food Security Act of 1985 has provided a sound inventory management foundation that allows a balanced supply-and-demand scenario. It would not be wise to jeopardize this blessing by significantly changing the direction of our agricultural policy at the expense of those who make this possible, the American farmers.

Mr. TOWNS. Mr. Chairman, I rise today in support of the Food and Agricultural Resources Act of 1990. I want to especially compliment the chairman and members of the committee for their continued support of 1890 Land Grant Institutions and Tuskegee University. This is the centennial year for these colleges and universities. For over a century, they have played a leading role in educating minority in the agricultural sciences. As a graduate of one of these schools, North Carolina A&T State University, I know firsthand about these colleges' commitment to research and training; 1890 institutions have focused these efforts on enhancing the quality of life for small, minority and limited-resource farmers. I plan to offer a series of amendments which will heopfully augment support for small and limited-resource farmers as well as research initiatives at the 1890 Land-Grant Institutions.

If I might, Mr. Chairman, let me briefly comment on the series of price support amendments which the House can anticipate during consideration of the farm bill. As a Member who represents an urban district, I would urge my colleagues to be very careful about slashing farm subsidy programs. While we are all concerned about deficit reduction, those of us the urban America should remember that we need the votes of farm-State members to continue funding for issues that are important for

urban districts like mass transit; substance abuse treatment programs; and institutional support for inner-city hospitals price support programs are just as important to farm districts as these programs are to urban America. If urban members demonstrate no interest in preserving programs important to the American agricultural sector, members from farming districts can easily justify withholding their support of urban-oriented programs.

A national economic policy requires that we govern with some consideration for equity. To me that means that we should not go out of our way to set up a battle between urban consumers and rural farmers. If we use the farm bill merely as an opportunity to slash farm programs without regard to the implications for our agricultural sector, then we face the real possibility of pitting urban and rural Americans against each other.

So I would urge the urban members of this body to carefully weigh their attacks on the farm bill. Let us operate as a nation that is concerned about preserving domestic agriculture, ending hunger and supporting the family farmer. We should be able to accomplish this without succumbing to regional divisions.

Mr. WEBER. Mr. Chairman, I rise today in support of H.R. 3950, the Food and Agricultural Resources Act of 1990. I also want to take this opportunity to commend the chairman of the committee, Mr. DE LA GARZA, and the ranking minority member Mr. MADIGAN, for their work on this bill. The committee has developed a good and reasonable legislation that is fair to farmers, consumers, and taxpayers. The bill continues to provide an income safety net for farmers while recognizing the budget constraints that we face.

A number of Members, Mr. Speaker, have in recent weeks talked about the need to further reduce agriculture spending. They seem to claim that agriculture programs are at the root of our deficit problem. Nothing could be further from the truth, Mr. Speaker. I want to remind the Members of this body that agriculture spending has been reduced from $26 billion in 1986, to a projected cost of $10.2 billion in 1991. This represents a 58-percent reduction in total spending. I would venture to guess that the proponents of additional cuts would not be willing to accept that kind of reduction in the programs which directly affect their constitutents. It is my hope, that Members will reject any attempts to further erode the safety net that this bill provides for rural America.

Despite the large reduction in spending, this bill continues the important trade policies implemented by the Food Security Act of 1985 that helped the United States retain our position of leadership in export of markets. Since 1986, our exports have increased 33 percent. Largely as a result of policies established in the 1985 farm bill. Those policies include commodity programs that emphasized competitiveness, targeted export subsidies and continued funding for market development.

The export title is one of the most important provisions of the bill. Currently, one-third of our production is exported, contributing $16 billion to the U.S. trade balance. The bill continues this important policy by reauthorizing the Export Enhancement Program and sets the funding at not less than $500 million annually.

In addition, Mr. Chairman, this legislation requires that 25 percent of the EEP funds be used for the export of value-added products. This provision is similar to legislation which Congressman GRANDY and I introduced early this year.

The committee realized that there is a striking contrast when we compare our bulk exports with the exports of value-added commodities. The export of high and intermediate value products constitutes 80 percent of today's world agricultural trade, yet it accounts for a small part of our exports. The United States leads the world with 33 percent of world trade in bulk products, but our share of the world market for value added products is only 7 percent. Compare this with the European Community which has captured 50 percent of the world market for processed agricultural products.

This statistic represents a staggering loss to our economy. It is a statistic that the committee has decided to address, and I commend them for that.

Another provision of the bill which addresses the need to compete effectively with our foreign competitors is the establishment of a soybean marketing loan, an idea which I have supported for a number of years and am glad to see as a part of this bill.

Mr. Chairman, our soybean farmers stand at crossroads. For years, they have enjoyed success, primarily free from Government involvement. Today, the world of soybeans is changing, with new international challenges and problems.

Foreign support of soybean production has continued to expand since the 1985 farm bill took effect. U.S. soybean acreage and production have fallen while world demand has significantly expanded. As a result, the United States is losing to foreign competition its share of the important world market. Nearly half of the U.S. soybean crop has been exported which accounts for nearly $6 billion toward the U.S. balance of trade. However, USDA economists predict that soybeans will be the only major crop showing smaller cash receipts in 1990.

The committee, Mr. Chairman, recognized these challenges and reported out a program which supports U.S. farmers, not foreign competitors, providing planting flexibility and established a soybean marketing loan program to provide a safety net. This legislation will set a $5.25 marketing loan for soybeans. I believe this program will provide an opportunity for soybean farmers to regain lost foreign market opportunities.

Finally, Mr. Chairman, this legislation builds on the 1985 legislation which provided a number of incentives to protect our Nation's natural resources and environment. Farmer compliance with the historic conservation legislation included in the 1985 act has opened the door for a renewed commitment to conservation. For instance, almost 34 million acres of highly erodible land with average annual soil loss rates of 20.9 tons per acre have been idled for 10-year periods under the Conservation Reserve Program. Sodbuster and swampbuster provisions have been implemented to help protect marginal lands and wetlands.

The bill under consideration this week extends these programs and establishes new opportunities to further enhance farmer's conservation practices. The bill provides farmers with an opportunity to voluntarily implement water quality management plans with assistance from USDA. It establishes a permanent easement program for wetland restoration, which should benefit both wildlife habitat and water quality. The bill also enhances the conservation reserve program by extending the authorization and expanding the land eligible for enrollment to include environmentally sensitive acreage.

One of the most important provisions of the conservation title is the establishment of a multiyear set-aside program. Currently, a large part of the acreage conservation reserve land idled under the annual program seldom has a perennial cover crop established. The multiyear set-aside program will provide an appropriate incentive for farmers to establish perennial cover crops. This type of management practice will improve soil fertility, reduce weed problems on cropped land, improve water quality, and improve habitat for wildlife and birds.

Mr. Chairman, this provision is similar to legislation which I introduced last year. I was glad to see that the committee adopted this program, and I urge the Members to strongly support it.

There are a number of programs in this legislation which deserve our support and are critical to the prosperity of rural America. I have tried to outline three areas, Mr. Speaker, which I feel will have a dramatic impact on the future of agriculture, and help support a continued economic recovery in rural America.

Ms. SNOWE. Mr. Chairman, today the House of Representatives will consider H.R. 3950, the Food and Agricultural Resources Act—better known as the farm bill. My interest in this legislation stems from the importance of agriculture to the State of Maine and the unique challenges that confront Maine's farmers.

H.R. 3950 seeks to address some of the critical issues facing the farmers of Maine. The bill takes strides toward promoting justice and equity in the marketplace for our farmers and consumers through revisions to the subsidy program. It increases research and extension programs to help small farms adopt more efficient and effective techniques. The importance of environmental protection is recognized and encouraged by H.R. 3950. This farm bill seeks to expand foreign markets for U.S. crops—an initiative that Maine potato farmers have been developing with seed potatoes. Finally, it reauthorizes State and private forestry provisions which are a great benefit to Maine's many private timberland owners.

Agricultural production in the State of Maine is responsible for over $450 million in sales a year from its 7,300 farms. Agriculture provides 14,000 jobs on the farm and 7,500 jobs in processing facilities. Food processing contributes another $870 million in sales. In addition, forestry, also covered under the farm bill, is Maine's leading employer.

The credit for the success of Maine's farmers is due primarily to their own hard work and determination to make a living from the land. Most of Maine's crops—potatoes, eggs, blueberries, and others receive no direct Government assistance. The farms are primarily small family operations that rely on the market to sell their products.

It is important to note the contribution of Maine's farmers to the nation's cornucopia of plentiful food. According to the U.S. Department of Agriculture, Maine produces nearly 100 million dollars' worth of potatoes, $90 million in eggs, and $85 million in dairy products. In addition, Maine produces another $85 million in blueberries, apples, cattle, and other commodities. Most importantly, Maine's farmers have achieved much of this success through their own hard work and effort.

Maine's farmers have the ability to compete with their counterparts from other regions of the country on a level playing field. However, our agricultural policies have not created the needed equity in the marketplace for all farmers and for consumers. Farmers in my district continue to compete in a marketplace that seems skewed against them both domestically and internationally. This situation is unfair to the consumer and taxpayer as well as the farmer.

It is time to bring reality and fairness to our Nation's agriculture policies. For years Southwestern and Western farmers have enjoyed access to subsidized water, grazing land, and power. At the same time many of these farmers are also receiving subsidies and price supports for their crops. The farmers of the northeast are not extened the same benefits.

Western farmers, frankly, get an unfair amount of subsidies. For example, the water subsidy program has created an inequitable system of double subsidies that have placed eastern farmers at a competitive disadvantage. I was very pleased with the recent action of the House to phase out these subsidies in an amendment to H.R. 2567, reauthorization of the Bureau of Reclamation. I remain committed to bringing market justice to our farm programs.

Our action to elimiate water subsidies to large corporate farms was a positive step toward fairness in the marketplace. The tendency of some farm operations to exploit loopholes to receive more Federal support than intended must be stopped. I hope that during our consideration of H.R. 3950 we can address this issue in a manner that protects the farmer, the consumer, and the taxpayer.

Competition comes not only from other U.S farmers but also from foreign imports. I am particularly concerned about the importation of below-grade potatoes from Canada. These imports are very damaging to U.S. producers. In 1985, I authored an amendment to the farm bill which would require the Secretary of Agriculture to perform random spot checks of potatoes entering the United States through Northeastern points of entry. This provision, unanimously accepted by the House, helped in keeping below-grade potatoes out of the United States.

Because of the success of these inspections, they must not be allowed to lapse. I wrote to the Department of Agriculture's General Counsel to ensure that this provision would not need to be reauthorized. The response from the General Counsel stated that, in their view, the inspection provision "is permanent legislation. Accordingly, reenactment is not necessary to continuation of this inspection requirement."

The success of the potato inspection program relies upon frequent and vigorous enforcement. The number of inspections must increase to meet the volume of shipments entering the United States. I urge the Department of Agriculture to make this inspection program a priority.

As the figures I mentioned earlier indicate, Maine also has a substantial dairy industry. Thus, I am concerned about the provisions in H.R. 3950 to reduce the support price for milk to $10.10. However, I understand that a compromise has been reached that will make some positive changes to this provision. In particular, I am pleased to see that the support price will not be allowed to drop below the $10.10 base level.

Maine's farmers have also been on the forefront of efforts to farm with minimal environmental damage. However, they have expressed frustration with the often conflicting policies and the harsh punishments that are exacted by regulatory agencies. I am pleased that the committee has brought forward a bill that addresses the need for environmental protections and provides more incentives for farmers rather than penalties. The approval of these provisions by both agricultural and environmental organizations speaks well of the compromises contained in H.R. 3950.

This legislation also recognizes the increasing awareness of the consumer about the safety of the food they purchase. We need to take strides to address the question of food safety, but we must do so in a manner that does not leave our farmers without alternatives for growing their crops and ultimately endanger our food supply. I am pleased that the committee recognized the need for research into alternatives to chemical use and lower chemical inputs. Farmers must have an opportunity to participate in this research and the regulatory decisions that may result.

I am also pleased to note that the trade provisions within this bill will help to develop and foster new markets for American agricultural products in foreign countries. These new markets will allow our farmers to reap higher incomes from their crops and reduce their dependence on Government support.

H.R. 3950 places an important emphasis upon research and extension, two areas of farm policy that provide substantial return for tax dollars invested. The University of Maine has been highly successful in utilizing funds for this program. I have heard many strong testimonials from my constituents on the value of extension programs in promoting more efficient and effective means of farming and crop production. I am glad to see that the committee also shares my enthusiasm for research and extension.

The 1990 farm bill has also taken important steps to revitalize our forests and the industries that depend upon them. The bill provides forest stewardship assistance to private landowners and gives the USDA authority to provide disaster assistance to landowners who suffer loses from fire or natural disasters. In addition, the forestry title establishes new research programs for the use of wood products and the management of timber lots. Over 90 percent of Maine's forest lands are privately owned, making the State and private forestry provisions particularly vital to the continued success of Maine's forest products industries.

Mr. Chairman, the United States has the most productive farmers in the world. U.S. citizens spend less for their food than any other nation in the world and we are the best fed nation in the world. As we address H.R. 3950, legislation that will set the Nation's farm policies for the next 5 years, I hope that my colleagues will consider the challenges that we still face.

We must meet the challenges of fiscal restraint. We must meet the challenge of levelling the playing field for farmers from all regions. Finally, we must meet the challenge of the future: a future in which there will be more people to feed, less land to grow crops on, fewer resources, and greater competition.

I am confident that the American farmer will continue to meet these challenges. Our actions should assist them in this effort.

Mr. LIGHTFOOT. Mr. Chairman, several misconceptions have developed about Federal farm programs. I would like to take a few moments to discuss and clarify those misconceptions.

First of all, there is the misconception that the farm programs reauthorized in the 1990 farm bill are too expensive. What detractors of the farm program fail to mention is that Farm Program costs have declined dramatically since 1986. In 1986, farmer programs cost the U.S. taxpayers $26 billion. This year, the same programs are estimated to cost the U.S. taxpayers $8 billion—a decline of nearly 70 percent in 4 years. Furthermore, the House Agriculture Committee package freezes spending at current levels—few other programs authorized by Congress can make this claim. In addition, I don't know of any other Federal program in which spending has dropped so radically. In fact, spending has increased in the past 4 years for virtually all other Federal programs.

The average American farmer is not getting rich off of Federal farm programs. While there may be a few abuses in need of correcting—which I certainly would support if not done with a meat-ax approach—farmers generally only get about 25 percent of the price consumers pay for food on the supermarket shelf. At the same time, American consumers have about the lowest cost of food of anyone in the world. U.S. consumers pay only about 10.4 percent of their income for food. Consumers in the Soviet Union, for example, pay approximately 28 percent of their income for food. Americans are getting good food value for their dollar. Cutting farm programs will only hurt the consumer more. I ask my colleagues to keep these points in mind when considering amendments to H.R. 3950.

□ 1940

Mr. DE LA GARZA. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, we have come to the end of the initial phase of considering

the 1990 farm bill. Tomorrow we will go on to considering amendments and finally, hopefully, we will have an end result.

I think all who have participated throughout the day. I repeat again my thanks to the chairmen of the other committees, the ranking Members, the ranking member on our committees, all of our Members, the staff and everyone who has worked with us to get us to this point.

Finally, Mr. Chairman, let me conclude by saying that we have brought forth a vehicle which we respectfully suggest is worthy of your highest consideration. We have labored diligently and honestly trying to utilize all the resources at our disposal to deal with the realities of our times. We feel right is on our side and that justice and equity and the people of this great country of ours will be served well if you support our efforts. To this end, we will dedicate ourselves in the days to come.

Mr. Speaker, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore [Mr. STENHOLM] having assumed the chair, Mr. RAY, Chairman pro tempore of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3950) entitled the "Food and Agricultural Resources Act of 1990," had come to no resolution thereon.

GENERAL LEAVE

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks, and include therein extraneous material, on H.R. 3950, the bill just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

BENEFITING THE CREDIT CONSUMER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois [Mr. ANNUNZIO] is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, on June 12 the Consumer Affairs Subcommittee held hearings on legislation which I sponsored which is intended to put an end to abuses by credit repair clinics. These clinics prey on consumers who are looking for help in clearing up their credit histories. Unfortunately, the only thing that most credit repair clinics clean out are consumers' checkbooks.

For many Americans, the charge card has replaced cash as the preferred means of payment. Credit is the lifeblood of the American consumer society. We use credit to buy our houses, our cars, and our clothes. We use it for impulse purchases and for important purchases. Credit cards are now even being accepted in some fast food restaurants and movie theatres.

To assure that Americans are treated fairly when they apply for credit, Congress passed the Equal Credit Opportunity Act. As the author of amendments to the act, I extended that act's ban on credit discrimination to the use of age or marital status. As a result, creditors cannot discriminate against the elderly, or against married or single women who seek credit in their own name. This assures that credit applications are judged on their own merit, free of discrimination. The Equal Credit Opportunity Act has made it much better for women, who traditionally were discriminated against, to get the credit they deserve.

People's circumstances can change. Unemployment can occur, illness may result, and other misfortunes can take place. As a result, Americans can and do become overextended on credit. The bills pile up and a poor credit history is created.

A poor credit history is the "Scarlet Letter" of 20th century America. Consumers with bad credit histories can find it impossible to borrow to buy a car, purchase a home, or even be able to rent an apartment.

In desperation, some people turn to credit repair clinics which claim to have a method to clean up the credit history painlessly and effortlessly. That, of course, is not true. No credit clinic can get accurate information removed from a consumers' credit report.

The credit repair clinics prey on the desperate hopes of persons who can least afford to be swindled. Credit repair organizations hold out the promise of a quick credit fix at a high cash price. They prey on consumers whose dreams of a better life and desperate situation make them susceptible to the false promises of unscrupulous credit repair operators.

When it comes to inaccurate information, the Fair Credit Reporting Act gives consumers the right to have erroneous information deleted or corrected.

I am proud to have been involved in the passage of the Fair Credit Reporting Act. The act also gives consumers important rights and protections involving their files at credit bureaus. It is one of the landmark laws regarding Americans' privacy.

The Fair Credit Reporting Act is even more important today than when it was passed. Americans are deeply concerned about their personal privacy. They view privacy as a fundamental right. Indeed, by a margin of better than seven to two, they would add privacy to the list of "life, liberty and pursuit of happiness" found in the Declaration of Independence. And Americans are worried about protecting that privacy. A poll taken earlier this year showed that 79 percent of Americans express concern about threats to personal privacy.

The Fair Credit Reporting Act was passed to protect privacy by restricting access to information stored in credit bureaus. Prior to passage of the act, anyone could gain access to information in credit reports simply by paying the credit bureau the appropriate fee. The act put an end to that unlimited access. Since passage of the act, only persons with a legitimate business need for the information can get a copy of the report. Usually the business need is the granting of credit, and increasingly, offering employment.

While the act has in general worked well, there are some areas in which improvements can be made.

The protection of consumers' account numbers needs to be strengthened. Telemarketing fraud often depends on the crooks' ability to obtain valid credit card numbers. An investigation conducted under my chairmanship of the Consumer Affairs Subcommittee uncovered a telemarketing operation in which the crooks used credit reports as a source of credit card numbers. The crooks used the numbers to fraudulently bill consumers for services that they had not ordered. Congress adopted an amendment I offered that made such use of a credit card number a Federal criminal offense. Besides enacting that law, the investigation led to a tightening up of procedures at credit bureaus to guard credit card numbers more closely. Still, more needs to be done to assure that unauthorized persons do not have access to consumers credit card numbers.

In addition to protecting account numbers, credit bureaus need to strengthen their procedures to prohibit unlawful access to credit reports. There have been some recent examples in which unauthorized persons gained access to credit reports under false pretenses. The penalties for this type of invasion of privacy need to be strengthened. In addition, any unauthorized person gaining access to the report should be liable to the person whose report they accessed. I support amending the Fair Credit Reporting Act to provide such increased penalties and civil liability.

The accuracy of credit bureau files is of utmost importance to consumers. Inaccurate information can result in the denial of credit or employment. The time taken to correct errors can result in consumers losing favorable interest rates on loan offers.

Last year, creditors and employers purchased about 450 million credit reports on American consumers, an average of almost two reports on every man, woman, and child in the United States. Credit bureaus claim that the reports are very accurate, and that the rate of erroneous reports is only about one half of 1 percent. Yet even that seemingly small error rate means that every year 2¼ million Americans are denied credit or employment based on wrong information.

This is a failure rate that we would not tolerate in other fields. We would not fly in airplanes if only 1 flight in 200 crashed and we would not be pleased if one-half of 1 percent of all the meat sold in the country was spoiled. We should not accept 2¼ million inaccurate credit reports annually as business as usual.

The Fair Credit Reporting Act recognizes that wrong information can get into a credit file. The act gives consumers the right to find out what is in the file, and to have inaccurate information corrected or deleted from the file.

At the time the act was passed the volume of reports was much lower than today, and most credit bureau operations were local. Now most credit bureaus access one of three national computerized data bases. As a result of

the concentration of information in these three systems, it is more important than ever that consumers have greater rights when it comes to having inaccurate information in a credit report deleted or removed.

Under the Fair Credit Reporting Act, credit bureaus have a reasonable time in which to investigate information that consumers have identified as inaccurate. Unfortunately, investigations into consumer complaints of inaccurate information have been taking longer and longer. That is why I support the provisions of H.R. 4213, the Consumer Credit Protection Act Amendments of 1990, which would define a reasonable time as 30 days. A month to reinvestigate inaccurate information is more than adequate when getting a home loan or a job may be at stake.

Setting a time limit in which to complete a reinvestigation is similar to other provisions of the Consumer Credit Protection Act, all of which require that banks resolve disputes over billing errors within set time periods. There is no reason why credit bureaus also cannot resolve disputes within a 30-day period.

Consumers have a right to expect that their credit files are kept confidential and are available to those who have a legitimate need for the information. They have a right to expect that the information in the files is accurate. Finally, they have a right to have any inaccurate information corrected promptly.

I hope that the Consumer Affairs Subcommittee will act soon on the legislation before it, so that the valuable protections of the Consumer Credit Protection Act are further strengthened.

THE S&L SCANDAL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mr. OWENS] is recognized for 60 minutes.

Mr. OWENS of New York. Mr. Speaker, with the new developments every day in the savings and loan scandal, swindle or debacle. I think it is very important to stop and review where we are. I think it is important that the American people not be overwhelmed with the myriad number of proposals that are being thrown at us from various directions.

I think it is also important that the American public not become weary and dismiss this problem, as they often do, just because of longevity, they will not be able to stay with it. We must stay with it. It is a very serious problem. It certainly is going to stay with us for a long time to come. $500 billion bill. When you add the amount of money needed to execute the bailout, plus the interest that we will have to pay over the years, there is general agreement that the General Accounting Office is reasonable when it says we are talking about $500 billion bill.

There is a study that has been done at one of the universities which says that the figure will be double that, and it will be more than a trillion dollars when we are finished, so it is important that the American taxpayers for their own benefit follow developments closely and not be confused.

Some of the new developments are very positive. Some of the editorials that are being written each day in the newspapers are very enlightening and also very positive in terms of demonstrating that the will is here to deal with the problem.

One proposal has been made for a special prosecutor by the gentleman from Vermont, and I certainly want to add my good wishes. I wholeheartedly approve of the appointment of a special prosecutor. I think it would be a very positive development to handle certain aspects of this problem.

Another proposal has been made for a joint bipartisan committee similar to the Iran/Contra Investigating Committee, a bipartisan Senate and House Committee. I think that would be a very constructive development also.

The full light of day should be thrown on all developments relating to the savings and loans swindle.

□ 1950

And that the best way to do that would be with a committee that has high visibility, and hopefully would get television coverage. It would be a very good idea, and considering the magnitude of the problem, it would be quite appropriate.

I also understand that there has been a recent proposal that there be a commission appointed instead of a bipartisan committee. Well, that might not be a bad idea also. A commission would take it away from the partisan dart-throwing accusations being made back and forth by various Members of each party. A commission would be out of the spotlight for a while anyhow. But it would have to come back. So it might not be a bad idea also to have a commission. Maybe we should have a commission and a joint bipartisan committee also and also a special prosecutor. It is such a huge problem that all of those things might be in order.

We are dealing with a situation where there is a paralysis of the functions of government looming on the horison, a fiscal paralysis in the richgest Nation in the world, a need for the government to use all of its resources to take care of a situation which does not yield any production, does not return anything to our economy, so it would be very much in order to have as many investigations and as much discussion and as much dialog, as much exposure, as much visibility as possible.

There are some groups that are proposing a tax package, a tax package where they delineate the need for those who were at the party, those who benefited most from this effort, to pay for the bailout. There is another tax package that has been proposed casually by Mr. Felix Royerton, a well-known financial expert from New York, my hometown. He wants a 5-percent surcharge to be placed on everybody. He casually proposes that that is the way we can clean it up in 5 years, if we put a 5-percent surcharge on every taxpayer, and then we will have this mess cleaned up, he says. That would be a gross injustice to force every American taxpayer to pay a 5-percent tax surcharge and pay for the party that the majority, 90 percent, of the Americans did not go to that party.

It is altogether fitting, I think, that the other proposal which talks about having those with incomes over $200,000, having those who benefited from brokered deposits, having those who were involved pay a much greater percentage. Then, of course, we can get out of the debacle partially by doing what we have so far been hesitant to do, and that is label all the people involved who are crooks, label those who are swindlers in a proper way, and go after them with a great deal of vigor.

The President's mobilization of prosecutors was called a show. It is the right kind of show. The President's mobilization of prosecutors brought them in from all over the country and talked about the need for more vigorous prosecution of the S&L crooks was the right kind of show, whatever the purpose, whatever the motivation was, but we need to face up to the fact we are dealing with criminals in a large part of the S&L debacle. We need to face up to the fact that $500 billion did not escape just because people were incompetent, that we have not lost a situation of billions of dollars because people are incompetent in these financial enterprises.

Banks do not hire incompetent people. If there was mismanagement, it was not mismanagement without some conspiracy involved in most cases.

I think it is very important that the American people insist that we call it the way it is, that leaders, legislators, people in the executive branch stop dancing around the issue of crime, massive white collar crime, which has been committed here, and we do not want to talk about it.

The conservatives in this House are always yelling about the need for stronger crime bills and stronger law enforcement, but they have not bothered to take the floor to deal with the fact that massive crimes have been committed here and that we are not even ready to call it crimes. Economic crimes, financial crimes which impact on the lives of thousands of people, when we take it in its totality, this network of racketeering enterprises all across the country, they are impacting on the lives of millions of people. In

fact, there is no American who will escape since the bill has been handed to every American taxpayer, those members of their families, everybody is impacted. The whole country is impacted by these crimes that have been committed.

I am all in favor of vigorous prosecution against a violent criminal who snatches somebody's pocketbook and runs away with it, of some old lady who needs her money to buy her groceries, to pay her rent, that is a crime that must be punished, and we must deal with it. But when we multiply the deed that is done by a violent criminal who snatches one pocketbook, when we multiply that by the millions and millions, billions of dollars that have been stolen and the bill handed to the American taxpayers, there is a need to understand that those also are criminals and that those criminals need to be dealt with in a fashion that we deal with criminals.

I applaud the Senate in its deliberations on the crime package that I suppose will soon be coming to the House. They were willing to deal with the situation. I do not applaud the entire package. There is a lot of preoccupation with the death penalty and a lot of things in the package that I do not applaud. They did forcefully and realistically deal with the S&L criminals. They have gone so far as to say the kingpins, the people who were at the center in these various swindles at these various banking networks, they should get life in prison. They have decreed that life in prison would be the maximum.

There are some people who are kingpins. Billions and billions of dollars were sucked under, under their supervision. Thousands of widows and children are hurt as a result, and the Lincoln-Savings-Charles-Keating operation under the banner of the S&L savings and loans, under the banner of the U.S. Government guaranty, they sold certain kinds of securities in the lobby of the bank and made people believe that they were guaranteed, they were insured, just as other transactions were insured. Several hundred widows, several hundred senior citizens were caught up in that, and they are totally wiped out now. There will be no return. They were not insured. They bought fraudulently represented securities. Keating was the man in charge of that whole racketeering enterprise, whatever name you might want to give to it.

In the final analysis, it was a racketeering enterprise. Kingpins like that deserve to be treated in a special way. The Senate has said the kingpins in the S&L criminal network ought to get life in prison.

I understand that there is a proposal already made that the House crime package will water that down to 30 years in prison. The House is already ready to go soft and continue the pattern that has been all too prevalent. We are soft and too soft on white collar crime, on white collar fiscal crime.

The conservatives never have come to the floor to deal with the fact that massive white collar crime has been committed, that millions of dollars have been stolen, that the productivity of the country is impaired, that we will be digging out of this hole for a long time to come.

The peace dividend is down the drain. On and on it goes.

I am here because I see no hope for ever being able to address the needs of my constituents that have been neglected for the last 8 years. The peace dividend was one bright ray of hope, the fact that we saw an obvious rationale for the expenditure of large amounts of money on defense being taken away with the end of the cold war, and everybody has assumed that tremendous amounts of funds could be diverted now to meet those needs that had been sacrificed and neglected for so many years. We assumed that we would be able to deal with education in a more rational way and that this country would be able to address itself to the fact that leaving education primarily to the States and localities is great up to a certain extent.

In the modern economy, as we modernize, as the need for technological change drives our economy, the need for educational change to keep up with that technological change becomes more important, and the States cannot finance it, the localities cannot finance it, and there is a need for the Federal Government to participate. We though we would be ready, that we could look forward to receiving the kind of assistance that the Federal Government ought to be giving to education. Instead of the Federal Government keeping pace with the complexities of education and the high cost related to preparing our youngsters for this complex technological society, we have gone backward.

When Ronald Reagan took office, the Federal Government was providing 8 percent of the total education budget. Eight percent is not very much, but at least it was providing that much at the time he took office. When he left office, only 6 percent of the budget, the total education bill, the education bill when Ronald Reagan left office, was about $360 million, when you include education all the way from Head Start to graduate education, $360 million, mostly paid by the States and the localities, the Federal Government paying less than it had 8 year before.

□ 2000

There is no way to keep pace with Japan and the European Market, new developments that are challenging our competitiveness in this constantly shrinking global economy. But education will not receive any benefits. The President can call summit meetings. He can declare himself the education President. He can do a number of things, but the funds are not there.

At the same time he makes these declarations about the need to go forward and to launch a new educational initiative, we are having summit meetings at the White House where budget cuts are on the table and budget cuts are likely to take place in the area of education as well as the area of health care. We have a great need to catch up on our housing for the low-income population. Homelessness is rampant. It is rampant because of the great reduction over the last 8 years in the amount of Federal funds available for housing.

There is no hope that after this budget summit is concluded we are going to be able to meet that need.

In the shadow behind all the negotiations at the White House the S&L debacle, the S&L hole, the giant bottomless pit is there. Whether they admit it or not, they must consider the S&L debacle in all of their deliberations.

We are probably going to be presented with a package here related to the balancing of the budget to leave out the S&L's completely and say we will take care of that later on. Probably that is going to be left for a lameduck Congress to take care of.

But the truth of the matter is that that again is perpetrating a swindle on the American people. It is hiding the facts, delaying the facts, deceiving the American people, and wrecking the credibility of the Government.

You cannot come here with a package that does not deal with the S&L debacle. You have to lay it out in front and let us know that driving the sequestration that is going to probably take place, where massive cuts are taken in domestic programs, while we still fail to make the appropriate cuts in military programs, driving all that is the need to save money and be ready to deal with the S&L debacle.

In order for us to face up, I think we have to get back to dealing with the prosecution problem. We have to clearly understand and make all of the American people understand that great crimes have been committed.

We will also save a tremendous amount of money if we drive forward and insist that there be maximum prosecution for those who have committed the crimes.

If you call it the way they do and insist on maximum prosecution, if you follow the lead of the Senate and say there should be life in prison for the kingpins, if you get tough all down the line, there is going to be a tremendous shakeout. A tremendous number of

people are holding out so far that will come forward. If you have what the Senate has proposed, if you pay informers, there are a number of things in the Senate bill I think that are very pertinent and get to the point. You pay informers and you reward people for helping to expose where the money is hidden.

There are large amounts of money in Swiss banks and tied up in various kinds of personal assets. There are all kinds of things that will happen if you drive forward and insist that maximum prosecution take place.

Why haven't we called for maximum prosecution on the floor of this House, the conservatives who are yelling that we need a crime bill right away, that crime is engulfing America? They have nothing to say about crime in the area of the savings and loans, the white collar crime that is strangling us.

After we get through with the S&L debacle, of course parallel with it we have to deal with the problems in HUD that have been pushed to the side. There are other guaranteed programs that we have, numerous programs that we have where Government guarantees the loans and guarantees the financial transactions, that are also in trouble that have not yet been discussed.

Unless we lay it out and deal with the problem, unless we label the kind of situation where HUD was allowing agents to handle certain transactions, and one agent took $5 million and said she gave part of it away and called herself a Robin HUD, finally when she was prosecuted in a very weak way, she got 4 years; 4 years for $5 million. That is not a bad deal. That is not a bad deal at all, if you can steal $5 million from the Government and all you get is 4 years. With good behavior she will be out in less than 2 years and can go to the Swiss banks or whereever she has the money hidden.

The softness on white-collar crime permeates all of our activity. Of course, a Nation that only half-heartedly prosecutes a conspiracy that takes place in the basement of the White House has lost its sense of direction. There were people who in the basement of the White House were doing things directly contrary to the orders of Congress, doing things directly contrary to the policies of the Government, and we could not bring ourselves to really fully prosecute them. We hired a special prosecutor. We spent millions of dollars. Elementary blunders have been made, so the cases are being thrown out in the appellate process, because elementary things have been done which law school students I think would have avoided. It is a half-hearted prosecution and a half-hearted approach to very serious crimes that were committed in the Iran-Contra conspiracy.

So it is a problem that seems to be with us in terms of not knowing how to deal with white-collar crime, not knowing how to deal with white-collar conspiracy, not having the gut reaction to understand when white-collar people in high places move in criminal ways that millions of people suffer, the credibility of the Government suffers, law and order is threatened in a very basic way.

Conservatives are the biggest disappointment, because they have not been on the floor at all to deal with these matters. We are still waiting to hear a voice from the conservatives talk about the fact that the S&L debacle has not only certainly eroded the moral values, but set very poor examples for youth in terms of moral values, put the Nation on a wrong course.

It has also brought socialism into the banking industry. We have massive socialism to clean up the mess. I am not against socialism or approaches to socialism or Government subsidies which produce decent transportation for poor people. I am not against an approach for subsidies or socialism if it is going to produce decent health care. But I take offense to the socialization of the banking industry that has taken place.

Billions of dollars are being poured in by the American taxpayers to deal with the banking industry. The Government is managing banks on a massive scale. The Government is managing the bailout rescue process on a massive scale.

Capitalism, a great intervention has taken place which is unprecedented in terms of capitalism being allowed to ride on the backs of Government. Yet the conservatives have nothing to say about this.

I think it is a failure, a basic failure, and a failure that will hurt us greatly because we are not willing to face the kind of reality that is before us.

I would also propose that if we do not define criminal acts in the proper way, if we do not measure up to the moment in terms of the fact that white-collar criminals are a basic threat to our economy, that racketeering enterprises have walked off with billions of dollars of public money, if we do not face up to that we are in very serious trouble.

We cannot define crimes that are obvious. If money is accepted by the board of directors or the management of a bank, if they take a $100,000 deposit, the broker deposit scheme, if you take a $100,000 deposit and you pay the broker a commission, let us just take one example for the benefit of the American people who are not familiar with banking practices as I am and do not have any particular expertise in this area.

To simplify the matter, let us take a $100,000 broker deposit. The east coast sends it to one of the banks in the Sun Belt, $100,000. When it arrives it already has paid a commission. The commission might have been 10 percent in order to get the transaction done. The $100,000 deposit has yielded a 10-percent commission, so when it arrives it is only $90,000.

The $90,000 has been attracted because of the fact that the bank in the Sun Belt is paying high interest rates, higher than usual anywhere, maybe 10 percent, maybe 12 percent. Let us say it is 10 percent to keep it simple.

They have a $90,000 piece of working capital which is expected to yield a 10-percent return on $100,000. In other words, $90,000 is expected to yield $10,000 in terms of interest, and you are working only with $90,000. Even if you got 10 percent, if the best conditions were prevailing, as they have not been, and you got a 10-percent return on the $90,000, you would have $9,000. You would be $1,000 short.

On that $90,000 it is impossible to make more than $9,000, even with a 10-percent return and the best conditions.

If there are people who are in charge of the bank, on the board, in the management, and if they oversee these kinds of activities, where they know that they do not have any opportunity of fulfilling the obligation to pay the interest rate on that broker deposit, that $100,000 that was reduced by $10,000, it arrived, it was $90,000.

□ 2010

They know they can never pay the interest rate that they have said they would pay. They know what they have obligated themselves to pay is a fraud, it is phony.

Now, that is a conspiracy. No matter how many times the people who do that have gone to church or have given to charity, to oversee that kind of activity is a criminal activity.

That is a conspiracy, that is fraud, and everybody it seems who were in failing banks have engaged in that kind of criminal activity, that kind of fraud.

But we do not choose to define it that way. We cannot see the obvious. We cannot see a conspiracy when it stares us in the face.

Beyond the obvious conspiracy of promising interest rates on nonexistent money, there were the other kinds of conspiracies which we claim we cannot decipher. If a piece of land was sold at a highly inflated rate, we say that was bad judgment. Land flips take place among people who are all in one insider circle, and we say, "Well, that is the way businessmen operate all the time."

If in Denver, CO, a building was sold for $26 million and everybody knew it

was only worth $13 million, the people who got the loan from the bank to buy the building got $26 million to buy the building. They got a loan. The building was worth $13 million. I guess they only paid $13 million for it because the people who were on the board of the bank and the management of the bank required that they put $13 million of the $26 million back into the bank to buy stock from the bank.

That is not conspiracy? That is not a crime? You give a loan and you know that the collateral is not worth what you have given the loan for? And at the same time, you require that they buy back stock equal to one-half the loan, that is a clear conspiracy, it seems to me.

I do not understand why we have to split hairs about it. But the inability of our Nation, in cases like this, to define crime when crime is obvious is part of the problem with the rescue operation with the savings-and-loan debacle.

I do not intend to go on because I think the complications of this problem are so great that we need to take it one bite at a time. I am speaking to my fellow laymen, I do not expect to be appointed to any investigating committees, be a part of any commission. But I speak for the people in my district who are suffering and are going to continue to suffer because the Federal Government's participation in the resolution of problems that only the Federal Government can help resolve will not take place as long as we let these kinds of crimes go on and on.

There are many other debacles and many other problems that we face with the softness on white-collar crime.

We are hurt in many other ways, with various schemes that are much more complex. I will discuss them at a later date.

It is sufficient to say now that we should face up and we should, as members of the public, as taxpayers, as voters, insist that all of our leaders begin to deal with the crimes as crimes.

One great part of the solution lies in our willingness to face up to the fact that crime has been committed by very respectable, well-educated, white-collar gentlemen, and we have to make them own up to it and pursue them as we pursue any other criminals.

Great benefits will be yielded. Ordinary people will not be required or mandated to pay a 5-percent surcharge, to use their hard-earned money to make up for what the crooks have walked off with.

DO WE NEED THE B-2?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin [Mr. ASPIN] is recognized for 60 minutes.

Mr. ASPIN. Mr. Speaker, my colleagues and I rise today to discuss the future of the B-2 bomber. The issue comes to us for decision at a time of great change and uncertainty. It is tougher than ever to buy the right defense—and do it within our means.

Last year, I voted against the Dellums-Kasich amendment to eliminate all future B-2 procurement but complete research and development for the program. Instead, the gentleman from Oklahoma, Mr. SYNAR, and I offered an amendment to the defense authorization bill that cut B-2 funding and put strict limits on when and how B-2 funds could be spent.

As I said then, I didn't believe that the House of Representatives was ready to make a decision on the B-2 last year. The B-2 had just come out of the world of special access programs. I said that it was important for the entire House, and not just a handful of us on the Armed Services Committee, to be fully informed about the B-2.

I believe that the House of Representatives is now ready to make a decision on the B-2 bomber. The Armed Services Committee has held a number of open hearings on the bomber in recent months. We've received testimony from Air Force Secretary Donald B. Rice, then-Air Force Chief of Staff, Gen. Larry D. Welch, Strategic Air Command Commander in Chief, Gen. John T. Chain Jr., Chairman of the Joint Chiefs of Staff, Gen. Colin L. Powell and Secretary of Defense Dick Cheney.

I have also asked the General Accounting Office and the Congresssioal Budget Office for independent analyses of the B-2 program and its costs, the results of which have been available to all House members.

There are three questions we must ask in deciding what to do with the B-2 program. First is the question of cost. Second is the B-2's capabilities—whether it will work and whether it will really be stealthy. And the final question is its mission—what is the B-2 supposed to do.

Up until last year, almost everything about the B-2 program was highly classified, including its costs. When the B-2 came out of the shadows, the price tag was $70.2 billion for 132 planes, or $530 million a copy. The resulting sticker shock led to much questioning of the program.

Those figures were just a snapshot of the moment. Let's go back a bit further than last year to get the full flavor of the B-2's cost growth.

In January 1986, the Air force estimated that a 132-plane program would cost $58.2 billion, or $440 million per plane. As I said a moment ago, the price had risen to $530 million per plane by the time the B-2 made its public debut last year. By March of this year, the Air Force was estimating that the 132 plane program would cost $75.6 billion. That's $580 million per copy.

This past April, Secretary Cheney testified to Congress on the results of his Major Aircraft Review. He cut the B-2 program back to 75 planes, and estimated that the reduced program would cost $61.1 billion, or $815 million a plane. Cheney also told us that that figure was an initial estimate subject to further revision.

The revision is now in, and the news is not good. According to the latest figures from the Defense Department, the 75-plane program will now cost $62.8 billion—$4.6 billion more than 132 planes were supposed to cost as recently as 1986. And the $840 million per plane price tag is almost double the cost per plane that the Air Force gave us in 1986.

And it may not be over yet. The Congressional Budget Office is estimating that a 75-plane buy would cost $64.9 billion, or $865 million per plane.

By the way, all of these figures are in inflated or then-year dollars and so they are comparable.

And all these estimates assume full credit for efficiencies and cost saving efforts planned by the Air Force. We know from past experience that these tend to be, to put it politely, optimistic.

These enormous costs, by themselves, don't mean that the B-2 should be stopped. But they mean that we had better be very confident that the B-2 will work and that we really need it before we buy any more.

The second issue we need to examine is the B-2's capabilities—will it work? Will it be stealthy?

The B-2's ability to penetrate Soviet air defenses and reach its targets is both central to this debate and of the highest classification. We can't talk about details. But we can talk about the program and where it stands in general terms.

The B-2's incorporates two fundamentally different kinds of technology to allow it to penetrate air defenses.

The first technology is the one we are most familiar with. When people talk about the Stealth aspects of the B-2, they're talking about its shaping and the materials used in its production. The plane gets its distinctive flying-wing configuration from the effort to reduce its radar return, or radar cross section. It has a radar-absorbent coating to further reduce its visibility to radars.

The second type of technology the B-2 needs to be able to penetrate Soviet air defenses is defensive avionics. While the specific capabilities the B-2 is supposed to have are classified, we know from the B-1 that defensive avionics can include electronics designed to detect, evade and even spoof enemy radar.

As we also know from the problems we've had with the B-1's electronic countermeasures, such systems can be highly problematic. It will be a while before we know how the B-2 is doing. In testimony to the Armed Services Committee on February 22 of this year, the General Accounting Office put it this way, and I quote:

If current schedules are met, it will be at least 3 years before critical performance testing, including integrated offensive and defensive avionics is completed. It has been during this critical performance testing that significant performance problems have been discovered in other advanced weapons systems.

Members of this House will recall that we did not find out about the B-1's considerable problems with electronic countermeasures until the program was virtually complete.

A number of outside experts have raised concerns that the B-2 could be detected by current Soviet radars or by some exotic new type of radar that might be built in the future. For example, earlier this year, the television program "60 Minutes" questioned whether the B-2 might be detected by low frequency radars that the Soviets already have. Others have suggested that the B-2 might be rendered obsolete by exotic systems like so-called multistatic radars—which have more than one receiver—or impulse radars—which broadcast in short, very powerful pulses using thousands of different frequencies.

Because there's been so much public attention on the question of the B-2's stealthiness, let me take a moment to set the record straight.

The B-2 is not invisible to radar. In fact, the Air Force readily admits it can be detected at great range by some low frequency radars.

But detection isn't the end of the game. It's only the first of four steps. In the next step, the radar—whether on the ground or in the air—has to track the B-2 long enough to figure out where it is and where it's heading. The third step is to get what's called a fire control solution, which means the radar has gotten enough information about the B-2's location to send a missle within striking distance. The final step is the kill. To get the kill, the missile has to acquire the B-2 itself, and then get close enough so it can detonate its warhead within lethal range.

This past June 20, the Armed Services Committee was briefed on an outside, independent assessment of how successful the Soviets would be in using their air defenses against the B-2. While the results of this assessment are highly classified, I can say that I haven't seen anything in that briefing or anywhere else that makes me believe that anyone's found an "Achilkles' heel" to the B-2's stealthiness.

Our past experiences with programs that haven't finished testing prompt me to point out, however, that it is early. Air Force tests of the B-2's radar cross section to take have used scale models and components from the plane. The first tests of B-2 stealth characteristics on a real, full-sized bomber in flight don't begin until this fall.

The answer then to the question of whether the B-2 will work as advertised is: The early results are good, but we just don't know yet. And the General Accounting Office tells us that we won't know for at least 3 years.

The third and final question we need to ask of the B-2 is its mission: what is it supposed to do?

The Air Force has no shortage of answers to this question.

The Air Force says the B-2 is good for stability because it doesn't pose a first-strike threat. But the same is true of standoff bombers carrying air-launched cruise missles. The Air Force also says that because it can carry weapons that have both high yield and great accuracy, the B-2 is especially effective against certain kinds of strategic targets in the Soviet Union: deep underground bunkers for Soviet leaders, targets that are dispersed over a large area and very hard targets. But the fact is that our unmanned ballistic missiles and cruise missiles can also attack these kinds of targets.

The question we need to ask is that: Does B-2 make a unique and necessary contribution over and above the strategic systems we have today?

The Air Force testimony to the Armed Services Committee on the B-2 boils down to three claims;

The Air Force says the B-2 is necessary to attack mobile missiles and mobile command centers in the Soviet Union. In the jargon of nuclear strategy, these are called strategic relocatable targets, or S-R-T's.

The Air Force says the B-2 is necessary to take advantage of a provision in START that allows more nuclear weapons on penetrating bombers.

The Air Force says the B-2 is necessary so the United States can have a viable manned bomber into the 21st century.

Additionally, the Air Force makes another argument for B-2, that it is needed for non-nuclear missions. I will also deal with that.

The first issue is strategic relocatable targets. This appears to be the central, unique requirement for the B-2. Therefore, we should begin by looking closely at the Air Force case. On July 12 last year, Gen. Larry D. Welsh, then Chief of Staff of the Air Force, told the Armed Services Committee that hunting strategic relocatable targets was not the primary mission of the B-2. Maybe more to the point, he said we wouldn't be able to do it very well for the foreseeable future.

Some months later, on March 6 of this year, we heard form Gen. John T. Chain Jr., commander in chief of the Strategic Air Command and also head of the Air force-Navy office that does strategic target planning. General Chain said that strategic relocatable targets were the only targets that couldn't be hit by other weapons. The only way to do the job was with a manned bomber and, because Soviet air defenses are expected to improve, it would eventually have to be the B-2. So said General Chain.

He didn't say these S-R-T's were the only targets the B-2 would have. He said they were the only ones for which we had to have the B-2.

One general says we can't hunt them very well and won't be able to for the foreseeable future. The other general says we need the B-2 to get at these mobile targets.

Both generals are probably right. As General Welch says, we can't hunt S-R-T's very well today, and we aren't going to get much better anytime soon. but as General Chain says, if we ever do get any better at hunting S-R-T's, there's a good chance that a penetrating bomber will play a role.

At the present time, hunting S-R-T's is one of the jobs of the B-1. But the Air Force believes that improvements in Soviet air defenses will mean that in the next century B-1s will not be able to do the job—a contention that I will examine a little later in this speech.

The second Air Force argument for B-2 concerns the so-called bomber discount rule. Under START, a penetrating bomber with gravity bombs and short-range missiles counts as only one nuclear weapon, though it can carry 16 or more. Again I turn to SAC Commander General Chain. On March 6, he testified to the Armed Services Committee that he needed the additional uncounted weapons carried by B-2 to cover targets in the Soviet Union, based on the guidance he has from the White House about what he is to accomplish if the United States must ever retaliate for a nuclear attack.

Let's look at these numbers. Without the B-2, we'll have about 8,000 strategic weapons once we've made the reductions required by START. The 132 B-2s planned originally would add another 2,000 or so. Secretary Cheney has already cut his B-2 request down to 75. These 75 bombers would add roughly 1,000 weapons under START.

When Secretary Cheney announced the B-2 program was being cut from 132 to 75 planes, he said that he was beginning a study of possible changes in our targeting requirements. Leaving aside the question of why we are cutting the bomber force first and studying our targets needs second instead of the other way around, there are good

reasons to suspect that the changes in the Soviet Union have reduced the targets for nuclear weapons.

The United States targeting plan has four target categories: conventional military targets, war supporting industry, Soviet nuclear forces and the Soviet leadership.

Target numbers are going down.

Soviet conventional forces are shrinking through Gorbachev's unilateral reductions and will shrink further through the Conventional Forces in Europe [CFE] negotiations. Military targets in Eastern Europe are just no longer appropriate. And there is an effort underway in the Soviet Union to convert military production capacity to the civilian economy. Soviet nuclear forces are going to shrink under START, by as many as 1,000 silos according to projections. And the process of democratization in the Soviet Union suggests that the targeting of Soviet leadership should also be reviewed.

These changes have been implicitly recognized by President Bush and President Gorbachev. They agreed at the recent summit to begin follow-on negotiations for deeper cuts below START—the so-called START II negotiations—"at the earliest practical date." Numbers in the range of 3,000 to 4,000 are being discussed as the residual nuclear weapons after a new round of negotiations. Clearly, we are going to have to rethink our targeting requirements under START II. Why not do it earlier rather than later and see whether we still need the additional 1,000 weapons provided by 75 B-2s?

The third Air Force claim for the B-2 might be called death of the triad, the classic division of our strategic forces into land-based missiles, sea-based missiles and bombers. Without the B-2, the Air Force claims, the Soviet will modernize their air defense to the point where we will have no viable bomber leg of the triad.

There are two separate issues here. The first is whether the Soviets will modernize their air defenses as quickly as the Air Force projects. The second is whether it matters if they do.

According to the Air Force, Moscow has been spending the equivalent of about $15 to $20 billion a year on its air defenses, a truly staggering amount for an economy correctly described as a basket case. If the Soviets can afford to keep pouring these kinds of resources into air defenses for another decade, the Air Force tells us that the B-1 won't be able to penetrate the most heavily defended areas in the Soviet Union without taking unacceptably high losses. So the Air Force would assign the B-1 to targets in less defended areas. And they want the B-2 so it can attack targets in the heavily defended areas.

The intelligence community says that the Soviets are continuing to spend on air defenses. But Gorbachev is coming up on a new 5-year defense plan and some other categories of defense spending are already down significantly. The spending on air defense could slow. If it does, the B-1 could continue to penetrate even the most heavily defended areas in the Soviet Union well into the next century.

But what if inspite of their economic problems the Soviets do continue to spend these enormous quantities on air defenses? The fact is that we will still have a very robust bomber leg for the foreseeable future. The stealthy advanced cruise missile ensures that, at a total cost of only about 10 percent of the B-2.

The final Air Force argument for the B-2 is that it is needed for conventional, that is nonnuclear, non-strategic, missions. This one comes in two scenarios: little war and big war.

The United States air strike against Libya in 1986 in retaliation for its support of a terrorist attack against United States servicemen is the usual example of a little war or single raid scenario. We are told by the Air Force that six B-2s could have handled the job instead of the massive Air Force and Navy operation actually hatched to put bombs on Libya.

I'm skeptical about using our most advanced bomber against a second-rate power. But if you're going to do it, the 15 B-2's the Congress has already authorized are more than enough to take care of the Libya contingency. Bombing Libya is not an argument for more B-2s, even if you accept it.

Using B-2 in a large conventional war is a trickier proposition. For one thing, with the change of such a war in Europe receding quickly, we are in the immensely fortunate position of being hard pressed to conjure up a plausible large-scale conventional war scenario. But assuming that we are in one, it's not at all clear we'd want to jeopardize a strategic system.

It's not just the expense of the airplane, nor the risk of having its technology fall into enemy hands, although these are serious concerns. If we were at war with the Soviet Union, a conventional mission for the B-2 probably wouldn't be considered. In the middle of a major conventional war when the risk of nuclear escalation would be at its highest, we would not want to take the B-2 out of its strategic role.

These, then, are the elements of the debate over the B-2 mission and its place in our strategic deterrent. What can we conclude? First, on the hunt for strategic relocatable targets. It's not clear we will be able to figure out how to do it effectively. And if we do, it's not clear that we will need the B-2 to do it.

Second, on the number of nuclear weapons. It is increasingly apparent that we don't need the additional 1,000 nuclear weapons that 75 B-2s would give us under START. Building a bomber simply to make the rubble bounce is folly.

Third, the future of the bomber leg of the triad. Theres plenty of life left in the B-1 and the B-52, particularly with stealthy advanced cruise missiles attached. The end of the B-2 would not mean the end of the triad.

Fourth, the conventional mission. Conventional use of the B-2 on a large scale in a big conventional war is doubtful. Using it for raids like the Libyan affairs is questionable, but in any case doesn't require that we build more than the 15 now on order.

A unique and compelling mission for B-2 has not been established.

What can we conclude from this examination of the B-2's cost, capabilities and mission?

Clearly, it has not been demonstrated that we must build the B-2 now. If we press ahead, we will spend additional tens of billions of dollars before we know if the B-2 will work, and before we know if it is really necessary. And that's assuming that there would be room in the budget in the first place, which will be extremely hard to find. Full speed ahead for B-2 is a nonstarter.

What then, Mr. Speaker, should we do with the B-2 program?

I have tried today to outline the many things that have happened since this House last confronted this issue. In summary, much has happened in the last year, but nothing that has happened has improved the case for the B-2.

Therefore, I am joining with my colleagues on the Armed Services Committee, RONALD V. DELLUMS of California and JOHN KASICH of Ohio, who have pushed hard for the B-2's termination.

Mr. Speaker, when the Armed Services Committee marks up the fiscal 1991 defense authorization bill in just a few days, I will incorporate the language of the Dellums-Kasich amendment in the chairman's mark on the B-2 program in my Procurement and Military Nuclear Systems Subcommittee. Production of the B-2 should be stopped and the production facility should be mothballed. Research and development should be continue and completed. This will leave us with about 15 deployable aircraft.

I can only commend Congressman DELLUMS and, Congressman KASICH for their forsight, pledge to work with them to terminate the B-2 and congratulate them on their impending success.

Mr. Speaker, I ask Members of this House who supported the B-2 in the past, or who like me were skeptical but not committed to either its termination or survival, to take a very hard

look at the B-2 program and its costs. And I ask them to reconsider.

Five programs alone—the B-2, the C-17, the advanced tactical fighter, the Navys A-12 and its Air Force variant and the Army's light helicopter—have combined costs of over 300 billion. It is simply inconceivable that we will be able to make the budget numbers we will face in the future without cancelling one or more of these programs. Terminating the B-2 may be but the first step in moving toward fiscal reality.

I'm supporting termination of the B-2, but I will support making the investments necessary to assure a robust bomber leg for the future. I'll support fixing the B-1's electronic countermeasures. I'll support the SRAM II missile and its integration onto the B-1. Finally, I'll continue my strong support for the stealthy advanced cruise missile. The advanced cruise missile will assure that our bomber leg can deliver weapons even to the most highly defended targets in the Soviet Union—at about 10 percent of the B-2's cost.

□ 2020

Mr. ASPIN. Mr. Speaker, I yield to the gentleman from Oklahoma [Mr. SYNAR].

Mr. SYNAR. Mr. Speaker, I am pleased to join the distinguished chairman of the Armed Services Committee, Mr. ASPIN, in endorsing the proposal offered by the gentlemen from California, Mr. DELLUMS, and Ohio, Mr. KASICH, to terminate further production of the B-2 Stealth bomber. Under that proposal, research and development work on the aircraft would be completed so that the Stealth technology can be fully tested and hopefully, perfected, but only the 15 aircraft currently under contract would be completed, rather than the 132 the Air Force originally wanted or the 75 they are now asking for.

Because I believe in a strong defense, I have reluctantly concluded that the B-2 is a bottomless pit which we can no longer afford without more and better information about the plane's cost, its essential mission, and evidence that it is capable of accomplishing that mission. As a Member who does not sit on the Armed Services Committee or the Appropriations Subcommittee on Defense I have been trying to obtain such information for 5 years without a great degree of success.

Chairman ASPIN has strongly supported my right as a Member to have such information, and for that I am very grateful. But the information reluctantly provided by the Air Force has been sketchy, of questionable reliability, and ever-changing.

Until last year, almost all information about the program was "black" and required a special access clearance. Only after I succeeded again, with the support of Chairman ASPIN, in having an amendment added to the 1986 Defense authorization act, which required it, did the Secretary of Defense transmit to Congress a report purporting to set forth the total program cost of the B-2 at $58.2 billion or $440 million per plane. But because the report contained only the one number and was classified, it was virtually meaningless, provided no assistance to Members in trying to decide how to vote, and permitted no meaningful debate on the program.

Not until last year was the cost information on the B-2 program declassified. By that time, the total had risen to $70.2 billion for 132 airplanes, or $530 million each. Even so, Chairman ASPIN and I voted against the Dellums-Kasich proposal and offered instead a successful amendment to the Defense authorizaiton bill which cut the funding for the B-2 and placed restrictions on spending for the program which required certification that the testing specified in the performance matrix had been successfully completed and that the Secretary submit a plan to reduce the cost of the program.

Much has happened in the last year, not the least of which are the profound changes which have taken place in Eastern Europe and within the Soviet Union. Along with those changes, I believe there are several reasons why further production of the B-2 can be safely terminated at this time and should be.

One. In terms of its mission, the only things the B-2 was supposed to be able to do that the current B-52's and B1-B's cannot do was to hit relocatable targets and to penetrate persumed improvements in Soviet air defenses anticipated in the year 2000 or beyond. But the Air Force has acKnowledged that the B-2 is not presently capable of hitting relocatable targets, and in view of recent testimony by CIA Director William Webster concerning the extremely bad state of the Soviet economy, not to mention the obvious political problems in the Eastern European countries and within the Soviet Union itself, it would seem highly unlikely that the Soviet Union can afford to expend the resources necessary to upgrade their air defenses to make the B1-B aircraft incapable of penetration by the year 2000.

Two. Moreover, the stealth capability of the B-2 is still unproven. In fact, tests of the B-2's defensive avionics have not yet begun and, according to the U.S. General Accounting Office, will take at least 3 years to complete.

Three. But the biggest reason for terminating further production of the B-2 is its cost. It is the most expensive weapon system ever developed; $26.7 billion has already been spent. The Air Force now acknowledges that the total cost of 75 aircraft will be $62.8 billion or $840 million per plane. The Congressional Budget Office estimates that the cost will be $64.9 billion dollars or $865 million per plane.

And the cost just keeps rising. For example, the Air Force just recently advised Chairman ASPIN that their budget request for the B-2 for fiscal year 1991 should be raised by $1.4 billion.

Any way you slice it, it appears that the total cost of these aircraft will be in the neighborhood of one billion dollars apiece.

A final reason for discontinuing production of the B-2 is that serious questions have been raised about the possibility of waste or even fraud in the program. The Government Operations Committee and the Committee on Energy and Commerce, both of which I sit on, are looking into this possibility.

In fact, Chairman DINGELL of the Energy and Commerce Committee wrote Secretary Cheney about this matter just last week and quoted the Justice Department as saying that, although Northrop had submitted inaccurate cost and scheduling data on the B-2, the Department would be unable to prosecute them for fraud, because the Air Force was fully aware that the reports were false and did nothing about it. Justice also noted that for most of the time the B-2 Program has been under way, the Air Force has had only two auditors to oversee the expenditure of $26 billion and the activities of 14,000 Northrop employees.

In summary, I have reluctantly concluded that in view of the current budget deficit situation we cannot afford to continue spending billions to build more B-2's when there is no credible evidence that they will be needed within the foreseeable future and the tests have not been completed to prove that the aircraft is capable of achieving its stated mission goals.

Finally, Mr. Speaker, I would like to pay tribute to Chairman ASPIN for standing shoulder to shoulder with me over the years and unfailingly supporting my right, as a Member of the House, to have full access to information on the B-2 Program even though I am not a member of the Armed Services Committee. I also salute him for his diligence in pursuing the B-2 Program in a fair and objective manner, and for his willingness to acknowledge that changed circumstances now warrant support of the Dellums-Kasich amendment, which we both opposed just a year ago. I urge my colleagues to join us in supporting that proposal this year.

I would also like to commend the gentlemen from California [Mr. DELLUMS] and Ohio [Mr. KASICH] for their foresight in developing their proposal last year and their diligence in sticking

with it this year. I am proud to support their proposal and I urge my colleagues to do likewise.

□ 2030

Mr. ASPIN. Mr. Speaker, I thank the gentleman from Oklahoma [Mr. SYNAR] for his very, very kind comments.

Mr. Speaker, I yield at this time to the gentleman from California [Mr. DELLUMS].

Mr. DELLUMS. Mr. Speaker, I thank the gentleman from Wisconsin [Mr. ASPIN] for yielding.

Mr. Speaker, there are times then words are not adequate to describe one's feelings, and this is such a moment. I would like to say to the gentleman from Wisconsin [Mr. ASPIN] and to the gentleman from Oklahoma [Mr. SYNAR], my distinguished colleagues, that I appreciate their integrity and their intellectual honesty. I might say, Mr. Speaker, that I also would like to applaud the gentleman from Wisconsin [Mr. ASPIN] for using this venue, this forum, and the gentleman from Oklahoma [Mr. SYNAR] for using this venue and this forum to make this statement.

Mr. Speaker, I have been in the House of Representatives now for nearly 20 years, and, without precedent, more often than not the forum that we use to make these kinds of announcements is a press conference where we talk to each other through members of the press. But I applaud my colleague and the chairman of my committee for using this forum to allow us to talk with each other.

Having said that, Mr. Speaker, I would like to then make the following comments.

The gentleman from Wisconsin [Mr. ASPIN] and the gentleman from Oklahoma [Mr. SYNAR] have both addressed the substantive questions. Let me say that I welcome both their analysis and the conclusions that they have drawn and the decisions that they have made to incorporate the Dellums-Kasich amendment in their markup of the Defense authorization bill for fiscal year 1991.

A year ago, a very interesting coalition emerged: The gentleman from California [Mr. DELLUMS], in the progressive wing of the Democratic Party, and the gentleman from Ohio [Mr. KASICH], the gentleman from Connecticut [Mr. ROWLAND], the gentleman from Pennsylvania [Mr. RIDGE] and others, in the more moderate to conservative wing of the Republican Party, emerged in this interesting coalition, and several people said, "How can this be? How can this diverse group of people with very difficult politics arrive at the same conclusions with respect to the B-2?"

My argument at that time, Mr. Speaker, was that finally both sides are beginning to ask the very same questions, and when we start to ask the same quesions, we increase the possibility of coming to the same answers.

So, this group asked with respect to the B-2, "Do we need it? Can we afford it? And are their alternatives?"

Mr. Speaker, we all said, "No, you don't need it. No, you cannot afford it. Yes, there are alternatives."

So, we came to the floor arguing that this B-2 bomber had an exorbitant cost, a dubious mission, and questionable capabilities. Myself and the gentleman from Ohio [Mr. KASICH] offered an amendment last year on the floor. We thought we were going to win last year, but at the 11th hour the gentleman from Wisconsin [Mr. ASPIN], the gentleman from Oklahoma [Mr. SYNAR] in their wisdom offered a different amendment, and on the basis of significant conclusion, and that is that only a small number of Members of the House actually understood the B-2 bomber because the program has been immersed in the special access category for a long time.

Mr. Speaker, I might say to my colleagues, "We no longer use the term 'black programs' since this Mr. Speaker, is black, and with respect to my own constitutency I found it very difficult that I would go home opposing black programs. So, I decided that we ought to call a special access program."

So, we no longer say these programs are in the black bag. We say they are in the special access category, and since the program had been in a special access category, for a short period of time, my distinguished colleagues decided that Members needed at least an additional year to gain greater insight into this program, and that amendment prevailed overwhelmingly. The gentleman from Ohio [Mr. KASICH], my colleague, and I walked off the floor having lost a significant battle, only able to derive 144 Members of Congress to support our position.

□ 2040

We felt at that time that we had won the debate, we said, but we lost the vote. In the course of the year, the program never got better. The arguments never got stronger. The cost just got worse. Our fiscal realities worsened and the world, at least in Eastern Europe, began to improve.

So we kept our coalition together, joined by the distinguished gentleman from Kansas [Mr. SLATTERY], an extraordinary worker; the gentleman from Pennsylvania [Mr. RIDGE], an extraordinary worker, and the five of us, the gentleman from Ohio [Mr. KASICH], the gentleman from Connecticut [Mr. ROWLAND], the gentleman from Pennsylvania [Mr. RIDGE], the gentleman from Kansas [Mr. SLATTERY] and myself worked diligently, assiduously, every day. We got 146 Members to cosponsor our legislation, 207 Members to indicate that they would vote in opposition to the B-2. We had 41 Republicans undecided, 53 Democrats undecided. Out of that reservoir of 94 undecided votes, we needed 11.

We said, "We're going to beat this thing. We're going to win, because we've worked hard and we're going to put this program to sleep."

But I now welcome the extraordinary statement of my distinguished colleague, because the gentleman from Wisconsin [Mr. ASPIN] now guarantees that we can win. In this situation, the gentleman is the 800-pound gorilla.

When the chairman of the House Armed Services Committee says that on the basis of substantive analysis that he has arrived at the conclusion that this program lacks value and lacks merit to go forward, the gentleman brings many Members of Congress with him.

So I personally thank the gentleman. I thank him for his courage, for his leadership, again for his integrity, and above and beyond all that, for the gentleman's intellectual honesty.

Mr. Speaker, one other comment. Sometimes those of us who start off moving against controversial weapons systems or taking controversial stands are bloodied up early in the beginning of the battle and rarely are around at the end. If you use a football analogy, there are some of us who take the kickoff at the 1-yard line, fight bringing it down the field, and then somebody with a clean unform comes in when it is inside the 2-yard line to take it over the goal for the glory and the touchdown, and those persons who were bloodied down the road when it was not popular and it was not easy to stand up on the cutting edge of change, to advocate, they are long forgotten.

So I thank the gentleman for not forgetting the gentleman from Ohio [Mr. KASICH], not forgetting the gentleman from Kansas [Mr. SLATTERY], not forgetting the gentleman from Pennsylvania [Mr. RIDGE], and not forgetting the gentleman from Connecticut [Mr. ROWLAND] and the other people who made up the 146 Members who cosponsored, and the 207 people who said that they would stand up with us to oppose the B-2, and I thank the gentleman on behalf of myself. The gentleman from Wisconsin and I have served along side each other for 20 years. Sometimes we have been together, sometimes we have not, but it is a heartfelt feeling tonight the way that the gentleman stood up to stand with us in a manner that never will be forgotten by this gentleman.

I think the gentleman from Oklahoma [Mr. SYNAR]. I remember very

clearly when the gentleman stood up on the floor of Congress and looked both the gentleman from Ohio [Mr. KASICH] and myself in the eye and said, "If this program has not cleaned itself up 12 months from now, I will stand with you." The gentleman is a person of his word and I thank him for his intellectual honesty and his integrity.

Mr. ASPIN. Mr. Speaker, I thank the gentleman from California for his very kind and very generous comments.

Mr. Chairman, I yield to the gentleman from Florida [Mr. IRELAND].

Mr. IRELAND. Mr. Speaker, I thank the gentleman for yielding to me.

Mr. Speaker, I rise to join my distinguished colleague and chairman of the Armed Services Committee, Mr. ASPIN, in expressing support for the Kasich-Dellums bill to kill the B-2 bomber.

Chairman ASPIN's decision to back this legislation is a crucial development that may finally put an end to billions of dollars a year of needless Federal spending.

Mr. Speaker, the future of the B-2 is in jeopardy. Its congressional support is eroding. Finally, it appears that the leadership in the House of Representatives is starting to accept the realities of our fiscal crisis and changing international security relationships.

Chairman ASPIN's comments today tell me that he is prepared to make some tough decisions. He is prepared to make the right decision when it comes to the future of the B-2. And as a result, Mr. Speaker, the B-2 bomber is clearly in trouble. I believe this is good news for the American people. Why?

For starters, the cost of the B-2 bomber is in doubt. Will it bear the $61.1 billion price tag that Secretary Cheney mentioned at the April 26 major aircraft review hearing before the Armed Services Committee? The answer is "No." The actual cost is much higher—and it is climbing rapidly.

For another thing, the B-2's ability to find mobile targets has always been in doubt. Its ability to evade detection by enemy radar is uncertain. And the integrity of the company that is building the B-2—Northrop—has been questioned.

Mr. Speaker, everything about the B-2 bomber program is surrounded by doubt and uncertainty. Therefore, Chairman ASPIN's decision to stop the program is fully justified for strategic, policy, and programmatic reasons.

The B-2 bomber is yet another piece of evidence of the terrible flaw in planning and management that exists within the Pentagon.

I am deeply concerned about the broader trend in the cost of major acquisition programs. Good cost work can hold DOD programs together. However, good cost work is conspicuously absent from DOD today. The costs of countless DOD programs are beginning to skyrocket.

Take, for instance, the major aircraft review presented by Secretrary Cheney in April. It covered four major programs—the B-2, the A-12, the C-17, and the ATF. In the few months that have elapsed since the review was completed, cost estimates for three of the four programs have literally come unglued.

Congress must act, and act quickly, to reverse this trend. Honest and accurate cost estimates are the foundation of a fiscally responsible 5-year defense plan. And the 5-year defense plan must be the foundation of any coherent policy for protecting our national security.

I plan to offer an amendment to the fiscal year 1991 defense authorization in the Armed Services Committee that would bring DOD into compliance with the law governing the preparing of cost estimates for major programs (section 2434 of title 10). But that's not enough.

There should be sanctions at the staff level for misleading the Secretary of Defense on the cost of a multi-billion-dollar weapons system. A $5,000 fine, for example, might help stop that kind of behavior.

What is more, money to pay for these huge cost overruns should not be so readily available to Pentagon staff without congressional knowledge and approval. The Pentagon's so-called "M" and "Merged Surplus" accounts—holding more than $60 billion in expired, but available, spending authority, should be abolished.

The B-2 bomber is one reason, albeit a big reason, that the Pentagon has such a serious money problem looming ahead in the next 5 years. With a potential $1-billion price tag for just one bomber, something is wrong.

Right now, in order to simply bring the Pentagon's programs down to the minus-2-percent funding line that is proposed in the President's fiscal year 1991 budget DOD will have to reduce its programs by $140.2 billion for fiscal years 1992-94.

But the minus-2-percent line is only an extension of the military build-down in defense programs that has taken place since 1985. It does not address the significant changes that have taken place in the world—changes that are reflected in the significantly lower spending limits contained in the bill the Armed Services Committee will bring to the floor in early September, and in the House-passed budget resolution which the committee has now embraced.

Much deeper cuts are now in the offing. We must kill some big programs to make room for those programs that fit our new and evolving military strategy. We must find a way to strike a delicate balance between people, readiness, training, modernization, R&D and future technology. Big ticket items like the SSN-21 submarine, LHX helicopter, A-12, and ATF that now clog the money pipeline are prime candidates for termination or revision.

Chairman ASPIN has taken a step in the right direction. But more is needed. Above all, I don't want the committee to use the vacuum created by terminating the B-2 to fund yet another obsolete or unnecessary program.

Instead, we must use this opportunity to develop strength where we now have our greatest weakness. We must prepare for the low-intensity, non-national type of conflicts that will be the battlegrounds of the future.

These battles are now new—they have been going on around the world for several decades. But our experience in dealing with them has been limited to conflicts in which the threat of Soviet involvement has drawn us into the fray.

And to put it bluntly, Mr. Speaker, our experiences in Korea, Vietnam and other areas clearly demonstrate that we are not very successful in coping with such battles.

And we will not get any better until we stop trying to live in the past, and start trying to figure out what it will take to improve on the things that we've been doing so badly for more than 20 years.

The card-punchers at the Pentagon want us to continue to feed dinosaur programs like the B-2 while they study our options. Well, propping up our aging dinosaurs won't solve anything.

Let us face it, we know very well the nature of the new threats we face. Now, we need to reject old philosophies and look to the future. We must channel our strength primarily into manpower—into developing a fighting force that is radically different than the one we have today—one that emphasizes leadership skills and integrity rather than card-punching.

We do not need studies; we do not need procrastination. We do need a coherent plan of action. We do need a Defense Department that is accountable to Congress for carrying out that plan of action.

In the words of Spike Lee, I have a message for the cardpunchers and procrastinators at the Pentagon: "Just Do It!"

□ 2050

Mr. ASPIN. Mr. Speaker, I yield to the gentleman from Ohio [Mr. KASICH].

Mr. KASICH. Mr. Speaker, I thank the chairman for yielding.

Mr. Speaker, I have to say, just like my colleague, the gentleman from California, as I sat in the chair over

here and watched the distinguished chairman make his remarks, I kind of had to pinch myself to see if this really was happening, because it is something we have worked so long and so tirelessly and so hard to be able to achieve.

I remember the night that RON DELLUMS and I had dinner together, and we started talking about the B-2, and, "Well, what do you think? Can we do it?" "Yeah, we can." "Well, do you think we can get it all? How much can we go after?" We shook on it, and we said we were going to go after it whole hog.

At the time, of course, everybody thought we were crazy. On my side they said, "Now, how could you work with a guy like DELLUMS?" I said, "Well, the only time people over here ever work with him, the only time they ever work with a guy like DELLUMS is when he makes sense, and he happens to share your point of view." In fact, we were just in a conference the other day, and BILL DICKINSON was saying, "Well, we're working on this R&D, and I've got DELLUMS' word." I turned to one of my friends, and I said, "You see why I work with DELLUMS? Because when he gives you his word, you can count on him."

We started working right then, and we pulled our good friend JOHN ROWLAND from Connecticut in with us who could not be here tonight. He is in Connecticut right now. I went to JOHN, and I said, "JOHN, I've got to have your help. I can't be the only Republican over here doing this, because it is just going to be very, very tough, and I want you to get involved, and I think it is the right thing." He sat through some of the discussions and hearings, and he joined us. We started to build from there, RON working very hard on his side and JOHN ROWLAND and I working very hard on our side, and I am very proud of the 28 Republicans who joined us the last time. You know, that was more Republicans that ever voted against a major weapons system during that whole MX debate, when we had the church groups and everybody else in the country beating Republicans up, we could only get 12 or 13 at the time that voted against the MX, and yet intellectually, honestly, 28 Republicans on this floor the last time voted to kill one of the No. 1 defense systems that we have seen put in the military budget in modern times. It took a lot of guts and a lot of courage for them to buck their President and buck their party and do what they thought was right in terms of providing for a lean and efficient national military.

I will tell you the last time it was ARTHUR RAVENEL and it was ANDY IRELAND and JOHN ROWLAND and the finest speech given on the floor on our behalf on this admendment was given by the gentleman from Pennsylvania, Mr. RIDGE, who delivered the most compelling comments that were made during the entire debate. We walked off the floor, and you know, we were hurt because we felt we had a good position. We thought we had won the debate. It was frustrating to us that we made all the arguments but we did not win. Nobody beat us down. Nobody knocked us down. Nobody outdebated us. We had the win. We felt we just did not get the votes. I remember at the time Mr. SYNAR and Mr. ASPIN and I and DELLUMS went out on the front porch and had our picture taken and they said at the time, "If you guys are right, if this thing does not work out, we are going to be the first two to lend you our support the next year."

This year came along, and we started digging around again, and a very significant thing happened to me, the gentleman from Kansas, Mr. SLATTERY, came to me and said, "KASICH, I did not vote with you guys the last time, but we have got a serious budget problem, and I am going to work to help you guys win this amendment." I mean, you want to talk about the definition of relentless, that is what JIM SLATTERY was. I mean, it got to the point where Democrats ran the other way when they saw JIM SLATTERY coming, because he hit them up day after day after day, and you might remember the press conference, JIM, TOM RIDGE was there, RON and I and a handful of others, where we said that we would win this fight in the trenches, that we would go Member to Member, we would do the "Dear Colleagues," we would visit them in their offices, we would call them at their homes. It did not matters, no stone was going to be left unturned in this battle.

TOM RIDGE then agreed to do vote-counting with the Republicans, and we made the most systematic effort and continued to make the most systematic organized effort to kill a defense system I think we have seen in modern times, and let me tell you what we thought for those that are interested and those that watched.

Here we were fighting defense contractors who had a lot of assets at their disposal. We fought people in the military who came over, all the witnesses, everybody else that came over and made the argument, we made sure we were there at every hearing to rebut all of their arguments. We fought the military-industrial complex, all of their assets, all of their people, and we just never gave up. We kept right on plugging, because we though we had the facts.

But, I mean, this was team effort. I mean, JIM SLATTERY and TOM RIDGE made the difference this year, because they organized DELLUMS and me. They organized us and put us in a position where everybody had their little bit of work to do.

□ 2100

LES ASPIN convenes a committee. I want to tell you, when LES ASPIN first ran for committee chairman, if I had had a vote, he would have clearly received my vote. Because when I came in 1983 the Committee on Armed Services had no strategy. We had no program and no plans as to huow we funded systems. there was no policy that was the underpinning reasons for why we made decisions.

Here comes LES ASPIN, the Saturday night bomb thrower who says, "One day I am going to provide some leadership for this committee." He ran for that chairmanship and he won. The message that communicated throughout the Capitol and throughout Washington and throughout the defense establishment is this every intelligent man, who had been trained in the inner halls of the Pentagon, was now going to take charge of a committee and we were going to make decisions based on the merits and based on the facts.

I was thrilled that we were finally going to get some leadership at the top of that committee that would allow us to make some hard choices.

LES was not with us last year. He was not convinced in his own mind. He was not convinced in his own mind we were right. I believe LES ASPIN did it on the merits.

I believe MIKE SYNAR did it on the merits. MIKE SYNAR took a lot of heat for his inquisitive nature on this program. A lot of people said, "Why does he care?" He was driving them crazy because he wanted to ask for a lot of questions.

Last year they prevailed, and this year LES convened their series of hearings. We had all the experts come in. We had General Chain. We had Secretary Cheney. We had everybody that had a star that could walk in the door have a chance to come in and talk. Every expert who had ever received a dime for consulting to anybody in their life had an opportunity to come in and talk about the program. And we sat and listened.

We went up into the secret hearing room and we listened to the closed briefing, It was briefing after briefing, hearing after hearing. I think the record became clear, just like LES said. They could not make the case. they could not make the case for the cost. They could not make the case for this mission, they could not make the case for any of this. You see the bottom line is that LES ASPEN is a guy who will act on the basis of facts.

I want to tell Members, there are some on our side that get mad at LES. I once in a while get mad at LES. There is no question about it. But you see, I think he provides a kind of leadership on this committee that we need

in a changing world to make hard choices.

As a result of that, I want to say to the gentleman from California, as a result of his trying to make decisions on the merits, he has gotten in trouble on your side of the aisle when he has tried to be intellectually honest. Rather than tearing this guy down, we ought to figure out a way to give him support when he wants to make the hard choices. He is not going to resent you when you want to fight him on the facts. That is what I tell Members, if you want to fight LES ASPIN, that is fine, have the facts. You have the facts and be right and I will be on your side and go after him like nothing. But you had better know what you are talking about, have the facts, and know the policy.

It is a pleasure for me to serve on the committee with LES ASPIN, and also a pleasure to work with MIKE SYNAR. We have a lot more work to do on the special access programs. We are forming them, and a variety of things. I am glad MIKE SYNAR came to the committee meeting. He added a great breath of fresh air. It is a pleasure to be in concert with both gentleman. I think this will make the difference.

The bottom line is none of us can take credit for having the momentum to win. We have not won yet. We have to be diligent. We have not won in the committee or on the floor.

Let me tell Members, with LES ASPIN going our way, it makes it look like we are going to win. Where does the credit go? It goes to a team. It goes to a team where not one person rose above anyone else, but many Members of this Congress taking time with nothing to gain. Guys like TOM RIDGE and JIM SLATTERY, who received minimal acclaim back in their own districts, who set hour after hour aside. Guys like ARTHUR RAVENEL, who had nothing to gain from this, who said this is something they believe in, this is something they are going to do, and they dedicated themselves to trying to make the country better, make the defense establishment make sense.

It is a team effort. This is a wonderful night for all of us who want to have sanity in our defense policy. Folks, it is not over yet but we are going to keep plugging.

Mr. Chairman, Mr. DELLUMS and I will be banging on your window in the middle of the night to make sure we win this thing in conference committee. We will do whatever you need us to do in order to carry this fight in conference and make sure you prevail in defining what the defense policy of America ought to look like through the period of the nineties and the next century.

Mr. ASPIN. I thank the gentleman from Ohio [Mr. KASICH] very much.

Mr. Speaker, I yield to the gentleman from Pennsylvania [Mr. RIDGE].

Mr. RIDGE. Mr. Speaker, I think it was in 1982 after the election, when both parties sent the victorious congressional candidates to different forums. There was one at the Kennedy School at Harvard, and another at Williamsburg.

If I recall, Chairman ASPIN, that is the first occasion that our paths crossed. I like to pride myself on first impressions as being the most accurate. There was about a day that we spent at the Kennedy School on defense and related matters.

I said to myself, there is indeed a man of tremendous ability and intellect and substance. I guess I would like to have said at that time I envisioned he would end up being chairman of the Committee on Armed Services, but I was not clairvoyant. At least I was smart enough to recognize that I felt there was at least one Member of Congress, and that was when I first met him, that I thought down the road would be willing to set some priorities for the Pentagon if they were truly unwilling to set priorities on their own.

Tonight is just another example where you have confirmed that assessment in my mind. More importantly, I think you were true to your word when you came to the floor last year and said look, this is not simply the province of the Committee on Armed Service. This is a weapons system that has a strategic importance clearly for this country. Let us make no mistake about it, it has economic importance to 100 Members of 200 Members of Congress that have contractors and subcontractors in their congressional districts. So when you joined with the gentleman from Oklahoma [Mr. SYNAR] and said let us revisit this in a year, and made the commitment that it would be revisited, and that if you felt that they had not made their case by that time, and Members had been given an opportunity to assess it themselves now that it was no longer a special access program, we would revisit it, look at it hard, and make a decision.

Well, you kept that commitment as well. You certainly assessed it once again. Perhaps equally as important, you gave Members an opportunity to assess it once again. I think that is clearly one of the reasons, Mr. Chairman, that we went from 144 votes a year and a half ago to, as someone previously indicated, we felt in our whip count that we had in excess of 200, nearly 207, and that is certainly within the 90 that we had identified as legitimately undecided. We knew for sure we could get the balance of 11.

So it was not only the word that you gave to the sponsors of the amendment that was resoundingly defeated. I remember RON DELLUMS and JOHN KASICH disappointed, I guess would be a modest description of their feelings. I know that they felt intellectually, as they have said many times, that they had won the argument, but around here that does not do any good unless you get the requisite numbers of yeas and nays. So that interim which you gave, Mr. Chairman, to the Chamber and individual Members, I think has worked out certainly as far as we have gone now with your decision to put the Dellums-Kasich bill in your makeup for the subcommittee.

I do have to commend my colleague, the gentleman from Oklahoma [Mr. SYNAR]. He was also a man of his word. I also have to give him credit for doing what many of us often talk about, but few of us rarely do, and that is get totally involved in an issue outside of our committee of jurisdiction. It is something that some Members do from time to time, but I doubt if anyone has attacked, literally attacked, a problem or a weapons system or a project as relentlessly in recent years as MIKE SYNAR has done, and he is to be commended as well.

For 2 or 3 years many Members have felt that this was a weapons system that had an ever-changing mission, which made it suspect from the very beginning, that had a technology that was at best dubious, and certainly a price tag that grew to be unconscionable more and more every day.

Every challenge that those of us who were in a position to challenge, every challenge to its mission would be met by a rebutal or a creative response by the Pentagon. "Well, it is not quite this mission now, it is this mission."

It is very difficult admittedly to hit a moving target, and it is no doubt that that is the reason the Pentagon over the last couple of years continued to change the mission of the B–2 bomber.

□ 2110

But fortunately, if you sat back and thought of its place in the triad and thought of its place in the strategic arsenal that all of us are committed to, it has no real fundamental role.

Certainly not one worthy of a billion-dollar price tag.

If you thought about it for a minute, most of those missions, as our colleague from California pointed out in his remarks, could have been met. Most of those strategic missions could have been met with a cheaper strategic alternative.

So, clearly, when it came around to trying to decide whether or not you needed it to meet some kind of strategic mission, there was enough question, enough doubt in the minds of many, enough hopeful objectivity to conclude that it had no place in our arsenal of weapons.

The technology, as the chairman has pointed out, at least to date when you are talking about its stealth quality, the configuration of the wings and the composition of the materials used

to date has no Achille's heel. But we do know that it is going to be 3 or 4 more years until it is completely tested, including the avionics.

And we have to know that our enemies, those who would take a look at our stealth capability, would certainly not sit idly by and not develop their own anti-Stealth capability as well.

There is no doubt in my mind that perhaps we have done it and others have done it as well. So that when you got around to a weapons systems that had a dubious mission and questionable technology, there was ever more reason to be concerned about the direction in which we were going.

Then, finally, as many of the speakers have so well documented tonight, we started with a weapons system with a $440 million price tag, which was certainly astronomical in terms of other systems that we have seen. Then, over the years, ironically, particularly the past year and a half, has the Pentagon who lobbied so hard, who claimed it was absolutely essential that they have a minimun of 132 B-2 bombers to fit into our strategic triad, that number has come whittling down from 132 to 75, and I do not think there is any Member in this chamber that does not doubt that the Pentagon, if they thought they could save it, would agree to 60 or 50 or 40.

Then you start wondering, well, how strategically essential were the 132 if you are willing to compromise at 75, then 60 and then on down?

At the same time that the numbers are going down, the cost goes through the roof. Remember it started at $440 million. It is $840 or $860 million now, and that does not include operation and maintenance costs, and the anticipated cost overruns. That would certainly take it to a billion dollars.

If you look at the changing world, if you look at our problems in our own domestic world, with the deficit and the other priorities that we have, I think it is high time that we give credit where credit is due, and that is to the chairman for coming on board, as he promised, after he himself took another look at it for a year and gave our colleagues in this chamber an opportunity to look at it for a year.

There is no doubt in my mind that if Chairman LES ASPIN concluded that America needed a weapon system or a bomber that cost a billion dollars, if it was essential to the survivability of this country, if it was essential to maintain a deterrent, if it was essential for us to continue to operate in the world of nations today in order to protect our freedoms and the opportunities we enjoy in this country, there is no doubt in my mind that LES ASPIN would be on the floor promoting that weapon system.

So the price tag, in and of itself, is not a withdrawal into the conclusion. But if you add it all together, if you have got a weapon system whose mission keeps changing, whose technology is questionable at best and whose price tag continues to escalate through the roof, it is pretty clear that we have no time, no place, no money for such a weapon system.

So I thank the chairman for his courage, his leadership, his vision and the two other individuals who I think down the line, if people are going to write the history of the B-2—which I hope we do terminate this year—the relentless, persistent, indefatigable, undying, unyielding, uncompromising RON DELLUMS and JOHN KASICH.

You know, there are some people who would take a look at the 435 men and women in the House of Representatives and say, "Well, what can one or two of you do?"

Mr. Speaker, this is a good civics lesson for students of government, be they in grade school, high school or college.

If you have got an idea and you truly believe in it and you work tirelessly and assiduously toward that particular goal, one or two people can make a difference in this chamber.

So I think we all owe a debt of gratitude to JOHN KASICH and RON DELLUMS because it was their tenacity and their vision that brings us to what our friend, Mr. DELLUMS, called this very unique forum tonight where we can applaud the good work and vision and leadership of the chairman of the Committee on Armed Services, but in my mind to applaud equally as much and as loudly and as clearly the spirit and the vision of the two really fine legislators, my colleagues and friends, RON DELLUMS and JOHN KASICH. It is a pleasure to be with you tonight.

Mr. BENNETT. Mr. Speaker, we all have grave concerns about the B-2 bomber program. I congratulate Mr. ASPIN for his decision today. I also congratulate Mr. DELLUMS, Mr. KASICH, Mr. ROWLAND, Mr. SLATTERY, Mr. RIDGE, and my other colleagues for their vigor in leading this effort. I joined with them as an original cosponsor of the bill to terminate the B-2 program.

Compared with past bomber programs, the B-2 bomber is a great concept, but in reality today it is a plane overwhelmed by technical problems and soaring costs in a time when our country is facing difficult financial challenges.

To keep this program in perspective, consider the price we have paid for bombers in the past, even when priced in today's inflation adjusted dollars:

In the late 1940's we bought 2,000 B-47 bombers for $21 million each.

In the late 1950's we bought 750 B-52 bombers for $80 million each.

In the 1980's we bought 100 B-1 bombers for $310 million each.

Now in the early 1990's, we are asked to buy 75 B-2 bombers at $840 million each.

And the cost of the B-2 is only going to go up. Just last month, we were informed in a letter from Secretary of the Air Force Don Rice that they have encountered "unfunded requirements" in the production of the first 15 B-2's. He told us that this means the Air Force cannot buy 15 planes with the $27 billion the Congress has funded so far. Rather, he can only buy 13. This means that the cost of the first B-2's will be over $2 billion each.

The truth is we cannot afford further procurement of the B-2. Our country must come to grips with the serious budget problems we face. We must make cuts in our domestic spending by eliminating unnecessary social programs. And we must cut our defense spending by eliminating unnecessary weapons. The B-2 is one of those programs that has to go. The chairman is right when he has decided against additional procurement of these extremely expensive planes in the face of inadequate funding for much more necessary other defense requirements.

DO WE NEED THE B-2 BOMBER: CONTINUED

The SPEAKER pro tempore (Mr. OWENS of New York). Under a previous order of the House, the gentleman from California [Mr. DELLUMS] is recognized for 30 minutes.

Mr. DELLUMS. I thank the Speaker.

Mr. Speaker, I yield at this time to the gentleman from Indiana [Mr. MCCLOSKEY].

Mr. MCCLOSKEY. Mr. Speaker, as Mr. DELLUMS was indicating earlier in the previous special order, today is a very happy and memorable day, not that there will not be problems, perhaps economically and otherwise, coming out of these decisions in many ways being forced upon us. But it has been a most happy and momentous year.

I remember some 10 or 11 months ago when Chairman ASPIN led a mission to the Soviet Union, a very educational and informative mission, at a time, quite frankly, just 10 or 11 months ago, last August, when the world strategically was as it has been essentially since the end of World War II. There were hopes to end the cold war, to tamp it down, but indeed all the old problems and stresses and suspicions were there.

In fact, I remember at one point talking to the members of the Soviet Security and Defense Committee about their conceptions of the B-2 bomber. I think they said quite sincerely and credibly that the Stealth technology, as far as they were concerned, posed no overwhelming or impossible challenges or burdens on them.

Since that time, we saw another happy night with the collapspe of the Berlin Wall. The Berlin Wall has, in effect, come down. A most happy night and day in world history.

Indeed, since that time, we have seen the onrush of democracy in numerous Eastern Bloc republics as they

worked their way toward freer societies, with greater or lesser degrees of success, and nowhere perhaps is this ultimately going to be more true, hopefully, than the Soviet Union, which is having its share of problems.

Mr. Speaker, the simple fact is that our entire international security and geopolitical situation has changed. We no longer live in a world where we need 132 B-2 bombers as was the case until several months ago, with the original request from Mr. Cheney and the administration. We no longer need the 75 B-2 bombers at a cost of $61 billion, as recently submitted by the administration.

I would submit to you that it flunks the basic commonsense awareness test. I would challenge anyone to find more than a few cabdrivers, waitresses, hairdressers, laborers, ditch diggers, or middle-income executives that would argue to their Congressman, as we all know there are relatively speaking very few, that we need 132 or 67 or even 30 B-2 bombers at a time when we have a $300 to $500 billion crisis in the savings and loan, when we are starving medical care, at a time when we are starving education and we are on the brink of a possible budget collapse.

Let us face it, there is a lot of hope for the summit, there is a lot of hope for common sense and compromise. But if we face a sequester come September and October, I submit to you that that would be the greatest chaos economically in U.S. history since the Great Depression and, indeed, one way, quite frankly, to avoid that chaos is to endorse the Dellums-Kasich-Aspin mark on the B-2 bomber.

□ 2120

There is simply no reason to go on with this. The main mission was, as we all know, to penetrate the Soviet air space and attack hardened or mobile targets that may have survived a strategic nuclear attack. In short, a Committee on Armed Forces rationale that would have our bombers flying over the Soviet Union, a decimated Soviet Union, after the exchange of some 10,000 warheads. What is going to be alive or worth it on either side, to justify such a dubious mission? It would be difficult to locate and attack these mobile targets in the aftermath of a nuclear strike, to say the least.

Also, as has been pointed out, a fleet of reconnaissance satellites would be required to keep the mobile targets under surveillance. If Congress allows procurement of this system, would this be next on the Pentagon's wish list? As Gen. Maxwell Taylor said,

> Is it worth several billion dollars to overfly Soviet targets with a few score of manned bombers looking for residual targets after each country has already exchanged several thousand megatons of nuclear fire power on their respective target systems?

In its place, particularly as Chairman ASPIN has mentioned, we have several viable alternatives to the B-2 in our current defense arsenal. B-52's and B-1B's armed with cruise missiles would be capable of evading any improved radar defense the Soviets could muster, and would be similarly effective. With a range of only 50 to 200 miles, they could not be capable of shooting down our cruise missile carriers.

In addition, the Pentagon claims that the B-2 could be useful on more conventional bombing missions such as Libya, similar situations as Panama, or whatever the next Third World drug-oriented or problematic dictatorship crisis is going to be. I submit that our present arsenal of bombers, the B-1B, the B-52, and the various other aircraft, so forth and so on, should be enough to counter those possibilities.

Termination costs of this program are estimated to cost $4.6 billion. This is significant money, but as I have said, it dwarfs in comparison to B-2's lifetime cost of over $100 billion. Are we willing to invest this extraordinary sum of money in a plane without a specific strategic mission? With recent global changes spreading democracy around the world and our defense strategy being realigned to reflect a multipolar world, the necessity of the B-2 is absent.

As the gentleman from California [Mr. DELLUMS] mentioned so eloquently, and again as all Members mentioned tonight, but particularly the gentleman from California [Mr. DELLUMS] and the gentleman from Ohio [Mr. KASICH], they should be commended for their wisdom and foresight and their ongoing courage and diligence in bringing this to all Members. There is simply no need for the B-2, despite all previous discussions. Our Federal budget deficit requires sacrifices at all levels. Let Members make one where the cuts will be least painful. Endorse the Dellums-Kasich-Aspin mark on the B-2.

Mr. DELLUMS. Mr. Speaker, I thank the gentleman for his extraordinary statement and very kind remarks, and I yield to the gentlewoman from Tennessee [Mrs. LLOYD].

Mrs. LLOYD. Mr. Speaker, I, too, voted with my chairman, the gentleman from Wisconsin [Mr. ASPIN] last year to not support this Dellums-Kasich language. I felt we needed a little bit more time to look at the program and make a proper evaluation.

I want to commend my chairman for calling this special order tonight. Certainly he serves our Congress well, a man of keen intellect and vision, certainly a leader in our times.

This is a very historic time to be a leader of the Committee on Armed Services. We have a chance for a new decade, to enact a policy driven defense program that will address our needs, take care of our national security, and not a program that reeks of oink, that does take care of special interests, but truly is fine-tuned to take care of our national security, to fashion it in a just and sensible manner.

Members, we cannot afford to botch up on the opportunity that we have. This is going to mean we can talk about tough choices. We are cutting back on our defense spending. Well, colleagues, the moment for truth has arrived. This is a tough choice. I have been in Congress for 16 years now, and I have been on the Committee on Armed Services for 7 years. I do not take matters relating to our national security lightly. I have always been a strong proponent of a strong national defense, but I am also an advocate of fiscal responsibility, and I will oppose the costly programs where I think there is a questionable need.

My colleagues tonight have talked about the cost of the programs, the questionability of the mission, and whether or not that will perform, so I will not go into those aspects. However, I am going to remind my colleagues that certainly I am not one to vote lightly against defense programs. I have taken a good look at the B-2, to make what I feel is the most informed decision that I can make. I conclude this is a system we cannot afford right now, the one where there is less than a compelling need.

Again, I want to thank my chairman for his leadership, for the good job he is doing, and I look forward to a good year working on the subcommittee on procurement and military nuclear systems, looking at what we need, how we can spend our money in the best and most informed way, and not be afraid to make the tough decisions that we will make this year.

Mr. Speaker, during last year's debate on the defense authorization bill I expressed concern about the B-2's cost and questioned the need for a $530 million aircraft. I also expressed concern about rushing to a conclusion that the B-2 be killed. Consequently, I supported a proposal advanced by my distinguished chairman from Wisconsin, Mr. ASPIN, and my distinguished colleague from Oklahoma, Mr. SYNAR. Their proposal represented a middle ground between those who wanted to push forward with the B-2 at all costs and those who sought to terminate the program. The Aspin/Synar proposal gave the Air Force the opportunity to restructure the B-2 program so that it was more affordable. It also gave those of us in Congress with divided opinions about the need for the B-2 more time to consider that question and reach a definitive conclusion. After countless meetings and briefings and long and careful deliberation, I rise today to announce my opposition to further production funding for the B-2 bomber.

Today, our national debt is twice what it was in 1980. Last week, Richard Darman announced that the revised fiscal year 1991 budget deficit was $168 billion. This figure ex-

cludes the astronomical cost of the savings and loan bailout, which when added raises the deficit to over $200 billion. Clearly, now is the time to take a good, long, hard look at all Government programs, both defense and domestic, to determine those that are essential and those that can be cut or canceled.

I have been in Congress for 16 years and served on the Armed Services Committee for 7. I do not take matters relating to the U.S. national security lightly and I am a strong proponent of a strong national defense. However, I am also an advocate of fiscal responsibility and oppose spending on costly programs for which there is questionable need. Under Secretary Cheney's restructured program, which calls for the purchase of 75 B-2's, the unit cost for the bomber has jumped from $530 million to $840 million. Based upon this cost comparison, the B-2 is less affordable today, than it was a year ago. Unfortunately, it appears likely that the cost will continue to rise.

To complete the planned buy for the B-2 the United States must spend another $40 billion. Given the current downward pressure on the defense budget and the large deficit, it is unreasonable to assume money for the B-2 will be available. If we terminate the program now while allowing research and development on the B-2's revolutionary stealth technology to be completed, as well as construction for the already authorized 15 aircraft, we will save billions of precious defense dollars.

The case against spending billions on the B-2 becomes even more compelling when one considers that the B-2's mission can be performed by alternative systems at a much cheaper cost. The B-2 debate has been punctuated with charges and countercharges about what exactly the B-2 is designed to do. After suggesting that the B-2 was intended for use against strategic relocatable targets and then backing away from that suggestion, the Air Force seems to have settled on deterrence as the B-2's primary mission.

The Air Force contends that the future credibility of America's nuclear deterrent and the sanctity of the triad requires purchase of a manned penetrating bomber; namely, the B-2. I believe the Air Force position undervalues the contribution made by cruise missile carriers to deterrence. The Strategic Air Command is currently using B-52's equipped with cruise missiles to perform the mission of deterrence; a mission they perform at a fraction of the B-2's cost. What's more, the United States just completed purchasing a brand new penetrating bomber which the Air Force expects will be able to penetrate Soviet air defenses into the next century: the B-1B. So why purchase more B-2's now?

To counter the argument that cruise missile carriers can perform the mission of the B-2, the Air Force points to the advantage conferred upon penetrating bombers by the START agreement. The START agreement counts all penetrating bombers as carrying one warhead against the 6,000 limit permitted by the treaty regardless of how many warheads the bomber may actually be carrying. There is a discount for cruise missile carriers, but it is not as great. The United States needs to take advantage of START's bomber-counting rule, the Air Force argues, if strategic planners are expected to hold at risk all the targets that they are required to by the current Single Integrated Operational Plan.

The Air Force counters the argument that the B-1B will be able to effectively serve as a penetrator well into the next century—and, consequently, allow SAC planners to take advantage of START's bomber-counting rule—by citing anticipated enhancements in Soviet air defense capabilities. The Soviets have invested annually billions of dollars in systems designed to counter the threat posed by the United States bomber force. The Air Force assumes this investment will continue at the same level, or nearly the same level, for the foreseeable future. Eventually, so the argument goes, the B-1B's effectiveness as a penetrator will atrophy to the point where it will have to be complemented by the B-2.

The Air Force's arguments about START's bomber-counting rule and the future effectiveness of the B-1B are not as solid as they appear. Both rest upon assumptions about American targeting requirements and the Soviet economy that are either outdated or questionable.

It needs to be remembered that the bulk of the current START agreement was negotiated before the fall of 1989, a period when cold war perspectives and assumptions governed U.S. war planning and our START negotiating position. Before November 1989, American nuclear planners required enough strategic warheads to hold at risk military installations, command and control systems, and population centers, not only in the Soviet Union, but also in Eastern Europe. The bomber-counting rule allowed strategic planners to effectively circumvent START's 6,000 warhead limit and ensure coverage of an expansive target list.

Today, the Iron Curtain no longer hangs over Eastern Europe. Freely elected governments now preside over Hungary, Czechoslovakia, and Poland. Hungary and Czechoslovakia have reached agreements with the Soviet Union providing for the withdrawal of Soviet troops from both countries by the end of 1991. East Germany, long considered the cornerstone of the Soviet's Eastern European empire, is expected to unite with West Germany later this year after the first all-German elections since before World War II. The new Germany will be solidly anchored in NATO and other Western institutions.

The dramatic changes in Eastern Europe have eliminated the need to point nuclear weapons at Warsaw, Budapest, Prague, and Berlin. The nuclear target base has shrunk and with the coming nuclear and conventional arms control agreements the target base will shrink further still. With fewer targets confronting American strategic planners, the importance of START's bomber-counting rule lessens. In fact, perhaps it is time for the administration to initiate a comprehensive review of U.S. targeting policy.

The Soviet economy is in a severe crisis. You do not have to be an economist to reach this conclusion. You merely have to read the headlines coming out of the Soviet Union. Among other things, the U.S.S.R. is plagued by overly centralized, inefficient industries, an agricultural system that fails to produce enough food to adequately feed the population, and a shoddy, unkept transportation system. The Soviet Government is confronted with an urgent need to divert precious resources from defense spending to reforming and restructuring the civilian economy.

This assessment is shared by the Defense Intelligence Agency and the Central Intelligence Agency. In a report to the Joint Economic Committee the DIA and CIA characterized Soviet economic performance in 1989 as "abysmal." The report also stated that "* * * there is a reasonable chance that the (Soviet) economy could deteriorate markedly * * * . Moscow continues to reduce and restructure its forces, the economic urgency of reducing the burden of defense shows no sign of abating. * * * On balance, most indicators point to * * * further reductions in defense spending through 1995." Given these trends there is no reason to expect the Soviets to continue to invest as heavily in air defense as they have in the past. This, in turn, makes it reasonable to assume that the B-1B will be able to penetrate Soviet air space much further into the future than the Air Force now believes.

Mr. Speaker, I am not one to vote lightly against defense programs. I have taken a good, long, hard look at the B-2. I have concluded that it is system that the United States simply cannot afford and for which there is a less than compelling need. My position will allow the Air Force to complete research and development on the Stealth bomber and allow the Air Force to maintain a 15 aircraft flying test bed. I will continue to support the ECM enhancements for the B-1B, development and production of the SRAM II, as well as its integration with the B-1B, and the advanced cruise missile. These programs will insure that the United States has a credible air-breathing leg to its nuclear triad into the next century, and they will do so at a much cheaper cost than the B-2.

Mr. DELLUMS. Mr. Speaker, I thank the gentlewoman for her exceptional statement, and I now yield to the gentleman from South Carolina [Mr. RAVENEL].

Mr. RAVENEL. Mr. Speaker, first I would like to address my remarks to the gentleman from California [Mr. DELLUMS]. I come from a section of the country where regardless of what political persuasion a person aspires to, whether they are Republican or Independent or Democrat, comparatively speaking, compared to the rest of the country, pretty doggone conservative. I came up here and was appointed to the Committee on Armed Services. I had been warned. I had been warned by members of my party to look out for the liberals, the screaming liberals on the Committee on Armed Services, and they would just absolutely savage defense, and over a period of time they would probably reduce the United States to the status of Costa Rica. There is no Committee on Armed Services, all we have is a doggone good police force. Then I was appointed to a committee, and there the gentleman is, the dreaded RON DELLUMS, a Berkley, CA, liberal par excellence.

The first thing I noted when I started attending meetings up here was that all these committee meetings, subcommittee meetings, were chaired by white chairmen, they operated on

black time, which down in South Carolina, when we start 10, 15, 20, 30, minutes late. That is what we call black time down there. That is what our black community calls it, and this gentleman from California [Mr. DELLUMS] is our chairman, and to my amazement, we started right on time. If the gentleman will recall, I asked, "Mr. Chairman, why is it you black Congressmen, you operate your committe on white time and all these white Congressmen are operating on black time?" By George, I just figured it ought to be run right here, and that is why we start. A member can set their clock at the time he pounds the gavel. And I have felt drawn to the gentleman from California [Mr. DELLUMS]. I felt, "Man, this fellow Dellums is going to be all right." Then I heard about the gentleman from Wisconsin [Mr. ASPIN], and we had to kind of watch out for him. If we did not look out, he would sell our Nation's defense down the river, but I have found in the gentleman from Wisconsin [Mr. ASPIN] a firm and fast friend.

I kind of gravitated to those people. I am nice and friendly with those people who are nice and friendly to me. There I am in the First Congressional District of South Carolina, 125,000 beneficiaries in military medicine, not only active duty and their dependents, but retirees and all their dependents. Here several months ago when we are looking for the program and money not only for the personnel account to which you vociferously oppose at the time, but it also involves the accounts which were, I think, $600 million in the hole, and they were closing down the family practice clincis at our hospitals, and served our bases down there in our district, and I went to the gentleman with my problem, and he said, "Don't worry about it, we will take care of you," and the gentleman did.

□ 2130

Mr. Speaker, I say to my colleague, the gentleman from Ohio [Mr. KASICH], "If I remember, JOHN, it was just about a year ago, just about a year ago that the Armed Services Committee, we were invited to visit the Soviet Union. We went all over the Soviet Union."

Of course, Mr. Speaker, I am not one of these folks that really is technically informed. I am delighted to be invited here tonight so that I could bone up on just exactly what the mission of the B-2 is, the cost of the B-2, and this, that and the other, and I heard over, and over and over that a little bit of knowledge can be a dangerous thing, and, if I am tackled on it in this year's election back home, they will probably think I am an expert on the B-2.

However, Mr. Speaker, revelation occurred to me over there when we went there, and that was, when we started, as the gentleman from Indiana [Mr. MCCLOSKEY] remembers, we traveled around the Soviet Union, and what we saw over there, what we found when we got into the Soviet Union, is we found that what they had over there is a Third World country really with a first-rate military organization. Man, all of their equipment, just great. Small arms, fine, superb. Those ships in the Black Sea fleet, I mean just extremely well built. Our ships come in to Pascagoula in shame in some instances. Everything is just so well done, so well constructed. The aircraft that we saw; we saw very little military aircraft, but the civilian aircraft we saw was on par with ours. Artillery pieces, tanks, everything else we saw was fine. We went to their training bases, boot camp. We went out to their rifle ranges, and firing ranges, what have you. Spit and polish, lots of esprit de corps. All those guys marched, and, oh, man, it was a sight to behold.

However, Mr. Speaker, then you go to the hotel in Moscow, Moscow, the capital of the Soviet Union. We could not drink the water because, if we did, within just hours we would come down with the screaming meemies. So, we were all drinking Coca Colas and bottled water. In Moscow, imagine being unable to drink the water, and, when we got just a few miles out of Moscow, we get to a town over 25 or 30 miles out, they had a central well. Everybody was getting their water from a little central well. No water system. In towns of 10 and 15,000 people, no central sewer system. Everybody was still using privies like they used in this country years and years ago.

Mr. Speaker, that is what happens to a nation that lets its military industrial complex dominate it when the need was not really there because it never was there. We never intended, the West never intended, to first-strike the Soviet Union or to launch any kind of an attack upon it, but because their strong military complex dominated their economy and because of that domination, that country, that great superpower, was really reduced to a Third World nation.

So, I knew all along, and I say to my colleagues, "You know, looking at the situation, I knew that it was only a matter of time before the B-2 would be terminated, and what we're and what you've done here tonight is I think you've spelled the end of that program. I think that time for its termination has come. I firmly believe that we have the votes in the House to pass the amendment that you're going to include in your mark and to pass your bill with the mark included, and I think this is a real great day for our country because we're not savaging the military. We're not devastating our national defense. All we're doing is we're just terminating a very, very expensive weapon system which ultimately would reach a cost of probably $100 million."

Mr. Speaker, think of the potholes that that would fill around this country. Think how that would go toward helping us solve our deficit situation. Think of the water systems that that will improve, the sewerage systems that that will build in rural America, the new bridges, some of which are functionally out of date now, that it will construct. It will help us so much over the period of time when the B-2 program would have been in effect and gobbling up the vast sums of money that it would gobble up. Think how it will go toward helping us rebuild our infrastructure.

Mr. DELLUMS. Mr. Speaker, let me just very briefly say to my distinguished colleague from South Carolina [Mr. RAVENEL] that I appreciate his statement, I think. I simply say that I welcome the gentleman's support, and, if he is saying that this gentleman has gone some distance in attempting to explode the notion that stereotypes are meaningful, then I have tried to do that, and that in continuing to engage in sterotypes and images that have no meaning, that is something that we ought to get beyond. And if the gentleman is saying that he has come to the point that he is prepared to stand with this gentleman and any other person on the floor of this Congress on the integrity or the ideas, then I appreciate the gentleman's statement, and I welcome his friendship, and I look forward to our continued camaraderie and coalition as we go forward to shape the future of this country and the world.

Mr. Speaker, I yield to my distinguished colleague, the gentleman from Kansas [Mr. SLATTERY].

Mr. SLATTERY. Mr. Speaker, I thank the gentleman from California [Mr. DELLUMS], my friend, for yielding, and I am going to be very brief this evening. I certainly cannot match the eloquence of the speakers we have already heard here this evening, but I came over here this evening for several reasons.

First of all, Mr. Speaker, I want to commend the chairman of the Committee on Armed Services, the gentleman from Wisconsin [Mr. ASPIN], for his intellectual honesty, as has already been mentioned. I say to the gentleman, "Your willingness to look at this whole question in a very comprehensive way and the fact that you are here this evening, and all of us know that you take your job as the chairman of perhaps the most important committee, and maybe in the free world; when it comes to military matters, you take that responsibility very seriously. I think everyone in this body on both sides of the political

aisle understands that, and the fact that you are here this evening is a tremendous boost to this effort, and, needless to say, it isn't over, and it isn't going to be over until the final vote is cast on the conference committee."

Mr. Speaker, we all know that is going to take place probably sometime in October in the last day and the last hour of this session of Congress. However, I say to the gentleman from Wisconsin [Mr. ASPIN], "I want you to know that I deeply appreciate what you're doing here this evening. I know this has been an enormous difficult situation for you. I think you're doing the right thing, and I think, more important, history is going to record the decision you're making is also right."

In addition, Mr. Speaker, I also wanted to come over here this evening to pay real respect and restate my admiration for the gentleman from California [Mr. DELLUMS], the gentleman from Ohio [Mr. KASICH], who I have really enjoyed working with, and my admiration for them is going up every day.

As my colleagues know, there was talk from the gentleman from South Carolina [Mr. RAVENEL], our friend, about stereotypes, and I hope that, when we leave here this evening, and I hope, as we move forward in this debate and in the other debates, I hope that all of my colleagues will be able to say, "Let's listen to what our colleagues are saying. Let's look to the wisdom of their argument. Let's look to the substance of their remarks. And let's set aside all the stereotypes because the fact of the matter is, when we talk about the world that we live in today, it is changing."

Mr. Speaker, the old models are changing, and the old paradigms are changing, and we have to be prepared to deal with the new realities in this world.

Now, having said that, I would also point out that this gentleman is here tonight and has decided earlier this year to support termination of this program, not because of what is going on in the world necessarily. I would be here this evening if the Soviet bear was showing its steely teeth to the rest of the world. I would be here still in opposition to this weapons system because I do not believe it makes sense, and I came to this point from my position on the Committee on the Budget earlier this year.

The gentleman from Ohio [Mr. KASICH], my friend, has been relentless. I mean a day has not passed in the time that I have been here this year when JOHN KASICH has not said, "How many more votes do you have? What are you doing on B-2? Don't get distracted on anything else. Keep focused on this project."

Mr. Speaker, I say to the gentleman from Ohio [Mr. KASICH], "Thank you, JOHN, for keeping us all focused."

But I remember that night when we were walking back from here earlier this year when I told him I was with him on this project and was looking forward to working with him, and from that day we have been focused on this effort, and I think we are going to win it, but we have to continue our focus, and again this is not over until the last vote this year.

□ 2140

The point I was going to make is that I came to this point from the Budget Committee perspective. Earlier this year, it became very apparent to me that contrary to all the rosy economic assumptions that we were looking at in January and February, if you all recall, we had a budget on the table that was projecting an ending deficit for fiscal year 1990 of $100 billion. We only had to find supposedly $36 billion to get the Gramm-Rudman deficit reduction target of $64 billion. For those of us on the Budget Committee who looked at those numbers and looked at those economic assumptions, we knew this was smoke and mirrors, that we were not even anywhere near the realm of reality and we were not being honest about Social Security. We were not really facing to the savings and loan mess. When I looked at those numbers, I concluded that we have got to make real changes, real policy changes in what we are doing with the Pentagon budget.

I started looking at it and said that we have got to find some big programs that just have got to be terminated, and this became one of those programs. This is the program that I think needs to be terminated.

I am convinced that the mission just does not make sense. The cost is just completely mind-boggling. When you get to the point to try to explain to the American taxpayers why we are going to spend $1 billion on airplanes or something approaches the cost of this plane in its weight in gold, this is unbelievable, absolutely unbelievable, and I do not think the American taxpayers can buy this whole concept for a minute.

So again, Mr. Speaker, I express my gratitude to the gentleman from Wisconsin. I express my admiration to my friend, the gentleman from California, and I hope as we move forward in this process that all of our colleagues will listen more attentively to the arguments that are made by all our colleagues on matters of this importance.

Mr. Speaker, this is an historic time. Never before in the history of this Congress, has the Congress of the United States terminated a major weapons system that the President of the United States was pushing. If we are are successful in this effort, this will be a first and it would not have been possible without the gentleman from California [Mr. DELLUMS], the gentleman from Ohio [Mr. KASICH], the gentleman from Pennsylvania [Mr. RIDGE], the gentleman from Wisconsin [Mr. ASPIN], the gentleman from Oklahoma [Mr. SYNAR] and the team that we have been working on.

So I am looking forward to a successful conclusion of this, and in concluding, I just want to say that our friend, the gentleman from Pennsylvania [Mr. RIDGE] made a very good point in that what I think we are perhaps all feeling here this evening, just a little bit of at least, is the fact that we are making a difference, and I think every Member of this body has that desire. They want to make a difference in the future of their country.

I think that any satisfaction we might all feel this evening is because we believe and believe very sincerely that the decision that we are making is going to make a very important difference, a difference for the benefit of our children and grandchildren. I think if we feel any satisfaction this evening, it derives from that.

Again, Mr. Speaker, it is a pleasure to share this evening with these gentleman.

Mr. DELLUMS. Mr. Speaker, I thank the gentleman for his very eloquent and pointed remarks.

Mr. Speaker, may I inquire as to the remaining time?

The SPEAKER pro tempore (Mr. MCCLOSKEY). The gentleman from California his 1 minute remaining.

Mr. ASPIN. Mr. Speaker, I ask unanimous consent that the gentleman from California [Mr. DELLUMS] be given an additional 15 minutes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

The SPEAKER pro tempore. The gentleman from California [Mr. DELLUMS] is recognized for an additional 15 minutes.

Mr. DELLUMS. Mr. Speaker, I thank my colleague for requesting this additional time.

Mr. Speaker, I yield to the gentleman from Georgia [Mr. GINGRICH], the distinguished minority whip.

Mr. GINGRICH. Mr. Speaker, I thank my friend for yielding to me.

I want to say first of all that if the B-2 is not dead as a result of this particular special order, it is certainly very, very seriously wounded.

I think anybody who supports it, and I have been a supporter of the B-2, has to look at the chairman's statement and has to conclude that a fundamental rethinking is in order and that, frankly, unless overpowering arguments can be made by the President, I think this is a program that is not going to get there.

I think this evening's presentation by the chairman and by all the many people who have been active on this project is a very major turning point in that debate.

I could not help but to take just a minute to commend these three gentleman.

First of all, I want to commend the gentleman from California and the gentleman from Ohio who I regard as good friends and who over the last 2 years have waged—relentless is exactly the right word as used by the gentleman from Kansas.

As the majority whip, it is normally my job to put the arm on somebody else, but I would say that the gentleman from Ohio [Mr. KASICH] has put the arm on me more often this year than I have on him and that he has been at least once a week reminding me that as seen by his analysis, I had voted wrong last year and I had a chance to join those who were able to see the Stealth, I guess might be the best way to put it; but also, as always, the gentleman from California was articulate and passionate and also courteous in that part of the legislative process. I think these two gentleman made a very formidable team last year and, frankly, I think they are going to make a formidable team this year, even if the chairman has not reached his own conlusions and decided that this analysis led him to decide he was correct.

Second, I just want to take an additional minute this evening to say to the chairman that I read recently that the gentleman was looking toward a series of hearings to lay out and rethink the whole process in a world in which potentially the major national security threat to the United States may or may not be from the Soviet Union, and that is going to require not only reshaping the rice bowls at the Pentagon, but breaking a few of them.

I want to commend the gentleman. The gentleman and I do not always agree on a wide range of things, but we served together at the Center for Strategic Studies on their military reform project when it did not look like I would be whip or the gentleman from Wisconsin would be chairman for a long time. Both of us emerged, I guess, faster probably than the CSI expected when they invited us.

But the gentleman knows intellectually, and he is probably one of the brightest people ever to be chairman in terms of sheer IQ, the gentleman knows that we have got to rethink all of this and the gentleman knows that the building over there, and I say this as somebody who was an "Army brat" and has the greatest respect for military traditions, it is not the nature of large uniformed bureaucracies to be agile in fundamentally rethinking how they function.

I just want to commend the gentleman from Wisconsin, not just for tonight, and again I am not quite as sanguine as my colleagues here as to where the B-2 ends up, but I want to commend the gentleman for the courage to say, "Let's really rethink from the ground up," because it struck me in the last couple months that the next couple of years may be the most formative period since the Korean war, that we may literally reshape and rethink and reformulate American defense posture, American defense structure and American defense strategy, and that our generation has an obligation to be as open as the gentleman suggested in a recent press statement at really erasing the board and then coming back and saying, "Let's look at the real threat. Let's look at what we want Presidents to be able to do in the next 15 years."

I just want to commend the gentleman from Wisconsin, and I look forward from my position to cooperate in any way I can on a bipartisan basis and really rethinking all of this, and I just really want to commend the gentleman.

Mr. ASPIN. Mr. Speaker, will the gentleman yield?

Mr. DELLUMS. I yield to the gentleman from Wisconsin.

Mr. ASPIN. Mr. Speaker, I thank the gentleman, and I thank him for his comments particularly on the question of where we are going with defense, because the gentleman is absolutely right. If we look at the question of what kind of defense we need, what we are essentially wrestling with right now is the question of a new response to the old threat. The old threat is the Soviet Union. It is still there. At the moment we are wrestling with a new response to that threat because there are some changes going on and we are trying to sort out what changes have taken place in the Soviet Union, what changes are reversible, and what has not changed. We are sorting our defense budgets around that principle.

But looking ahead, as the gentleman was saying, to the next 4 or 5 years, we ought to start looking at the question of how do we size and shape the defenses of the United States if we are no longer shaping them around the Soviet Union, and that is a new world.

We have designed the forces of this country on the grounds that whatever works to skin the cat will also work to skin the kitten, so if we shaped our forces toward a war with the Soviet Union and if we had to, we used them in Granada or Panama or bombing Libya or whatever, but if the Soviet Union is not the major threat, or suppose the threat from the Soviet Union is so specialized in one or two areas that we can no longer size and shape the defenses of the United States, then the question is how do you size and shape the defense of the United States?

□ 2150

The gentleman has had a lot of experience in the military areas and really has a very creative mind about these things. I would welcome his participation in this kind of a debate, because it permeates, and it is hard to overstate the extent to which the Soviet threat is what our defense budgets are all about, and I do not mean what we vote on in Congress or what Dick Cheney, the Secretary of Defense, sends over or whatever we deal with in the Committee on the Budget. I'm talking about deep in the bowels of the Pentagon, when it comes to designing the tactics what the various services of the military use, and it is with the Soviet threat in mind. When we do our training, it is with the Soviet threat in mind. When we design weapons systems like tanks and planes, it is with the Soviet threat in mind. If the Soviet threat is not the reason for how we design the tank how do we design the tank? Interesting, challenging question.

I hope the gentleman from Georgia will participate. I have always had a high regard for him, and as the gentleman says, we have been involved in a couple of studies at CSIS in our more callow youth and since, and I think it would be very, very important for lots of reasons, the first being, of course, the gentleman from Georgia adds a very great deal to that and, second, anything we can divert him away from his otherwise nefarious jobs, we would be very happy to take up his time on something that is really important and very helpful to the country. So we will welcome his participation.

Mr. GINGRICH. Let me just say in that spirit for one last minute, and I will yield back, that I think that on our side we will see people, and, of course, we have got two of them right here in Mr. RIDGE and Mr. KASICH, and we are going to see on the Republican side with the younger generation, I think, a very strong interest in cooperating with our friends on the gentleman's side of the aisle and really arguing out intellectually.

We may finally be at that moment my good friend from California has so long yearned for where we actually need to rethink from the ground up and not simply argue at the margins. I would look forward to participating both possibly in hearings the gentleman has and in dialog on the floor and also in private conversation.

I think what the gentleman is doing is extremely important.

Again, in closing, I just want to say that I know, I guess, for the gentleman from California this has to be one of the bigger days, maybe not quite as big as the night he won on South

Africa, but one of the bigger days of his career. You two have worked very hard, and you have earned it.

Mr. DELLUMS. Mr. Speaker, first, let me say to my distinguished colleague from Georgia that I thank him very much for his contribution to these proceedings.

In closing, let me say that the gentleman is correct, that this is an extraordinary night. As I said before, I am in my 20th year in the Congress. I represent the Eighth Congressional District in California. I came to Washington, DC, against the backdrop of a very tumultuous era in the history of this country, the civil rights movement, the struggle to bring peace to Vietnam, and so this gentleman came to Washington, and when we won, the word that went around the country was Afro-top, bell-bottom radical black dude from Berkeley wins election, so this gentleman carried that baggage to the floor of Congress for many, many years.

But in the face of that, this gentleman continued to challenge this body to try to debate the issues on their merits and debate within the framework of policy, not tinkering on the margins as my colleagues said. Well, tonight, we now recognize that we no longer can afford the luxury as an institution to tinker on the margins, but we now are forced, if for no other reason but the limited dollar environment that we function in, that we must begin to debate on the basis of policy.

I have said many times before, Mr. Speaker, and to my colleagues in the House, that cynics do not bring change. That it is out of idealism and optimism that this country's great strength can go forward.

Tonight, my sense of optimism and idealism is renewed. I would like to say to my distinguished colleague from Wisconsin, the chairman of the full committee, Mr. ASPIN, that this development restores my faith, and anyone observing this process should come to understand this: to serve in this body means to embrace the mentality of the long-distance runner. When I first came here I thought as a hundred-meter sprinter, freedom now, peace now, change now, and in the context of this body, that impatience was tempered by the reality that many Members move slowly here, so we have to be the long-distance runner.

Those of us who have continued to try to be the long-distance runner, Mr. ASPIN, have lived long enough to get ourselves to the 1990's. I think the 1990's will be an exceptional era in the history of this country.

I am happy to be alive in the context of the 1990's, because in the 1990's, if for no other reason but the moral and intellectual and economic and human imperatives, we will be required to debate the issues we refused to debate in the 1960's, in the 1970's, and in the 1980's, and we will have to debate them in the 1990's.

Mr. Speaker, I am pleased that my colleagues have joined in this coalition to bring some sanity to our military budget, to end the madness of spending billions of dollars to build a B-2 bomber we do not need.

I would just say, as I said to the Soviet members at the Armed Services Committee who came to our committee hearing one day when we had the Secretary of the Air Force and the commanding general of the Air Force, if the B-2 bomber's greatest quality is its stealthiness, that is, you cannot see it, why do we not just tell the Soviets we have 132 of them, and if you cannot see them, how do they know we are lying? Let us take the $70 billion and get on with the business of addressing the human misery of the people in America, but we could not get away with that easy approach, but now with this development with the chairman coming forward and saying that the Dellums-Kasich amendment will be incorporated in his mark in fiscal year 1991, we will strike, in my humble opinion, a great blow to the B-2 bomber.

Clearly the other body and this body will have to come together. It will probably be a contentious issue, a controversial issue in the context of the hearing or in the context of the conference report, but, Mr. ASPIN, if the debate is over whether the gentlemen in the other body will dictate the defense policy for the next decade or the gentleman from Wisconsin, I will stand with the gentleman from Wisconsin to reshape this military budget and reshape history for the country. I think the gentleman's approach is the view of the future and the view of the world as it will evolve as we move into the 21st century. I am honored to be here. I am very pleased the gentleman has done what he has done, and I want to say to my colleague, the gentleman from Ohio [Mr. KASICH], that it has been fantastic to come to know you and to learn you and about you and to be your friend and to show this body and to show this Nation that a black and a white, a Republican and a Democrat, a progressive and a fiscal conservative can come together on the integrity of ideas, and if two people are willing to take whatever heat necessary to stand on integrity, there is nothing that we cannot do.

I think we are at the moment where we have shown that.

Mr. KASICH. If the gentleman will yield further, I think the only other point that needs to be added here tonight is that, as a Republican, and one that serves in the minority here, I have never had a minority mentality. I have always believed that full participation is possible as long as the debate is kept on the basis of the issue and not the personalities, and I think it is significant what RON said earlier about starting off at the goal line and getting bloodied up.

I want to say from the Republican point of view, for Mr. RIDGE and Mr. IRELAND and Mr. KOLBE and Mr. ROWLAND that we feel that as Republicans we were given the full opportunity to be involved in this debate, and nowhere along the path were we ever forgotten or pushed out because we may not have had all the votes we would like to have around here.

I guess the message is that as a Republican you can be successful in this House if you want to carry on a high debate, an intellectual debate and one based on the merits.

Mr. Chairman, again, I thank you. RON, I am glad we had that handshake that night. It is not over yet, but we are going to work like dogs to make sure we see it all the way through the committee, through the House, and through the conference and strike a great blow for the Republic.

Mr. DELLUMS. I thank the gentleman. I thank the Speaker for his generosity.

THE ALTERNATIVE TO RAISING TAXES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia [Mr. GINGRICH] is recognized for 60 minutes.

Mr. GINGRICH. Mr. Speaker, I will not take all of my time.

I do want to spend a few minutes on the question of bringing the deficit under control and cutting spending as the alternative to raising taxes.

I recently got into a dialog with several of my Democratic colleagues about why we have a problem with the Federal deficit and whether or not there is a difference in the two parties. I simply want to walk through a series of 23 efforts to cut spending since the budget summit began and lay out for the American people the difference between the two parties.

□ 2200

I do this because frankly we hear an awful lot of effort to confuse people about what is going on. What is going on is very simple. As the American economy grows, as we create more jobs and better jobs, the Government's revenue increases. More money comes into Washington. We get over twice as much money today as we did under Jimmy Carter, most of that because the Reagan tax cuts increased the economy, created new jobs, gave us the longest period of peacetime economic growth in our history, and therefore people were more employed, they had better jobs, they had higher salaries, they could pay more taxes.

All of that occurred as a process of economic growth.

But, no matter how rapidly revenue occurred, the fact was that congressional spending, congressional voting for spending, went up faster.

It is a little bit like having a teenager who will always spend 10 percent more than the allowance. If you give them $20, they will spend $22; if you give them $40, they will spend $44. They are always going to stay ahead of the amount of money they get.

So those people who think that the primary way you are going to deal with the budget is to raise taxes I think are fundamentally wrong. Until the Congress of the United States is prepared to cut spending, we are not going to be able to balance the budget.

I want to go through these 23 examples, because in 22 out of 23, more Republicans voted for cutting spending than voted against, and more Democrats voted against cutting spending than voted for.

These are not just chosen. These were all the spending cut efforts that occurred since the budget summit began. Remember, the budget summit was called by President Bush to try to bring together on a bipartisan basis House Democrats and Republicans, Senate Democrats and Republicans, working with the President of the United States, to try to find a way to control spending, to bring the deficit under control, and to get to a balanced budget.

The goal was to bring down the deficit so the Federal Government would borrow less money, so we would have less competition for interest rates, so that as a result, interest rates would drop, because people were not having to loan as much money to the Government. That is the theory.

The question is, how do we get Congress during the budget summit to control its own spending? And the answer was, we did not.

The fact is, that because of the power of the Democratic Party in Congress, we continue to spend under almost every circumstance.

Here are the 23 specific amendments that were offered during the budget summit up through today, and what happened.

The first was on May 24, 1990, on the fiscal 1990 supplemental appropriations. It was a motion which involved a Senate amendment to procure a fish farming laboratory in Arkansas.

In other words, we were going to spend $6 million. It was necessary, by the way, so we could add a $6 million fish and wildlife refuge in central Iowa.

So in order to get the Senate their fish and farming laboratory in Arkansas, the House basically said we want to add another $6 million for a fish and wildlife refuge in central Iowa.

The Republicans voted to cut, the Democrats voted to increase. And here was the vote. Republicans, 32 against cutting, 130 in favor; Democrats, 214 against cutting, 30 in favor.

In other words, the Democrats voted about 7 to 1 in favor of more spending, the Republicans voted by better than 4 to 1 in favor of cutting spending.

The second amendment, May 24, 1990. This was a disagreement over whether or not to provide money to transfer a ferry boat to the Government of American Samoa. Now, you might think that this is a small enough item, that surely we could wait a year to provide to transfer a ferry boat to the Government of Samoa.

This was the vote: 116 Republicans voted to wait, 50 Republicans voted to do it now; 7 Democrats voted to wait, 234 voted to do it now. Even on an item as distant and as obscure as transferring a ferry boat to the Government of American Samoa, by a vote of 234 to 7, the Democrats simply could not show any fiscal discipline.

The next one was one in which Democrats joined with Republicans because it was so abusred that it simply could not survive. This was an effort from the Senate to provide $238 million to build an explosives production facility at the Louisiana Army Ammunition Plant.

On this one the Democrats were OK, too. What was going to happen frankly was we were going to build an entirely new ammunition plant which was surplus, which we know we did not need beforehand, but this was probably as good a model of pork barrel as we have seen in modern times, and nobody could swallow it. Republicans voted 162 to cut it out, 6 in favor of keeping it; the Democrats voted 214 to cut it out, 27 in favor of keeping it.

So there is the first time you see Democrats voting to cut spending.

The fourth amendment, May 24, 1990. There was a fight over $1 million for the appropriate technology for Rural Areas Program. There was an effort to change the funding level to $827,000. The vote was 231 to 165. The Republicans voted 28 against cutting spending, 134 in favor; the Democrats voted 203 for more spending, and 31 in favor of cutting spending.

The next vote, frankly the Democrats voted for cutting spending. It was a very unusual vote. This was a motion to cut $65 million for the plutonium recovery modification project at the Rocky Flats plant in Colorado.

Republicans voted 32 in favor of cutting and 139 against. This is the one time you find Republicans voting for more spending on this list.

The Deomcrats voted 110 in favor of cutting spending and 139 against. It was rejected by 142 to 278, and it was a fight over how rapidly to modify the plutonium recovery system at the Rocky Flats plant. It was more an argument over the nature of nuclear power in America than an argument over spending. But it was the one time when, to give them their due, the Democrats voted more in favor of cutting spending than the Republicans did.

The sixth amendment was June 19, an amendment by Mr. FRENZEL to cut 10.53 percent across the board, that is to freeze at last year's level.

It is very important to understand budgeting in Washington. In Washington, DC, if you do not increase spending, you are cutting it. This is the only place in America where we project budget spending based upon what is called current services.

In other words, if you had $100 last year, but it would take $109 this year to do what you did last year, a flat budget is $109, a $9 increase.

It is a method of calculation which guarantees a constant upward pressure on the budget. Anywhere else in America, in your family budget, for example, if you had $100 last year, then you get $109 this year, that is $9 more. Washington is the only place in America where you can get more and call it less.

So what Mr. FRENZEL was trying to do, and this is the first in a series of amendments by Mr. FRENZEL, he was bringing in a proposal which would simply have frozen at last year's amount the spending, the discretionary spending for energy and water.

Eighty-six Republicans voted to freeze spending. Eighty-five voted no. A very, very sensitive issue. This may be one of the most popular bills because it spends more directly on water projects than any bill in the country.

So the Republicans by a 1-vote margin, 86 to 85, voted to cut spending.

Then let us look at the Democrats; 12 voted to cut spending and 229 voted for more spending.

Again on June 19, a not quite as extensive effort by Mr. DANNEMEYER, provided for a 5-percent across-the-board cut in all discretionary accounts. Now, notice, that means Mr. DANNEMEYER was providing for 5.53-percent increase. So he is actually providing for a substantial increase in spending from last year.

Rejected. Republicans voted 99 to increase it 5 percent and cut it 5 percent from the actual bill, but 5 percent over last year's increase; 72 voted against the spending cut.

Let us look at the Democrats. Here is a bill, remember, this new amendment is dramatically improved in terms of spending. That is, there is more spending than last time. Last time 12 Democrats voted to cut, this time it goes up to 14; 14 vote to cut, and 148 vote against cutting.

June 19 again. This is the Penny amendment to provide a 2-percent

across-the-board cut in all discretionary accounts. That means an 8.53-percent increase.

Remember, this is a cut from an inflated level. So it will be 8.5 percent more spending than last year. The Republicans voted 126 to cut, 42 against. The Democrats voted 49 to cut, 190 against.

So once again, we have, even though this was going to allow for an 8-percent increase, it was not enough spending, and by about almost a 4-to-1 margin, the Democrats vote for even bigger spending.

On June 20, the following day, amendment No. 9 in this series, an amendment which would have reduced from $16 million to $8 million the appropriation for TV Marti, and again, this is a place where in pure spending terms, the Democrats had more people willing to reduce spending.

□ 2210

This was an argument, in part, over foreign policy, whether or not we should be sending money to spend on television to broadcast to Cuba, one of the remaining real Communist dictatorships.

The Republicans voted 8 for cuts, 166 against; the Democrats voted 103 for cuts and 140 against. There was a bipartisan majority that thought sending broadcasts into Cuba was more important. But again I think you have to say on a purely spending level—and on this I have to say I voted against the cuts because I felt for $16 million it was vital to continue to try to reach Cuba because of Castro and communism. Here is a place where, frankly, purely on spending grounds the Democrats would have done slightly better.

On the No. 10 amendment, an amendment to provide a 5-percent across-the-board cut in the discretionary accounts of Commerce, Justice, State, and the Judiciary. This is only the discretionary now. It is a 5-percent cut, which still did not bring it down to the level that it might have been in terms of a pure freeze. The Republicans voted 75 for the cuts, 94 against. The Democrats voted 13 for the cuts, 229 against.

The 11th amendment, June 28, 1990, we have the Veterans' Administration/HUD appropriations. Mr. FRENZEL offered an amendment to freeze everything except for medical care and Veterans Health Service and Research Administration. Mr. FRENZEL got 65 Republicans to vote for a cut, 105 voted against. The Democrats had 7 who voted for the cut, 323 voted against.

The same day, June 28, there was an amendment by Mr. DANNEMEYER which would cut everything across the board by 5 percent, which included veterans. That was too tough even for most Republicans. They voted 48 for the cut, 108 against. The Democrats voted 5 for the cut, 235 against.

Amendment No. 13, also June 28, was another Veterans' Administration/HUD appropriation. This was the Penny amendment to provide a 2-percent across-the-board cut in all discretionary accounts except for Veterans' Administration, medical care, and HUD section 8 subsidy contracts. A real effort to broaden out, only a 2-percent cut which, remember, in this setting, is something on the order of a 12-percent increase in real dollars.

Even at that level the Republicans voted 124 to cut, 46 in favor of more spending. The Democrats voted 48 to cut, but 189 against more spending. And the result was that the amendment was defeated.

So even at the 2-percent cut level, we were unable to win the amendment.

July 12, amendment No. 14, on the transportation appropriations account, there was a Penny amendment to provide a 2-percent across-the-board cut in all discretionary accounts. Remember this, again, is less than a real cut. There is still real growth in the spending because of the way Washington calculates.

The result was 112 Republicans voted for the Penny amendment, providing for the 2-percent cut, 62 voted against it. But the Democrats voted 21 for spending cuts and 221 against cutting spending.

On amendment No. 15, which was on July 18, a Frenzel amendment to the rural development/agriculture and related agencies appropriations provided for a 7.7-percent across-the-board cut in all discretionary accounts. That is back to a freeze. Remembering, again, these bills were 7.7 percent higher than last year's amount. So all Mr. FRENZEL was doing was freezing it. The Republicans voted 104 to freeze it and 67 for more spending. The Democrats voted 11 to freeze it, 238 for more spending.

Amendment No. 16, July 18. On the rural development/agriculture and related agencies appropriation, Mr. DANNEMEYER came in with a lower cut. He was going to cut 5 percent across the board in all discretionary accounts. Remember that is a 2.7-percent increase over last year. So he was actually going to increase spending over last year by 2.7 percent. The Republicans voted 102 for the cuts, 67 against. The Democrats voted 13 for the cuts, 233 against.

Again, on July 18, amendment No. 17, the Penny amendment to provide a 2-percent across-the-board cut in all discretionary accounts except Women, Infants and Children's Program.

Now, this means this was providing for a 5.7-percent increase in spending. Republicans voted 144 in favor of the amendment, 26 against. Even this level of increase, the Democrats voted 58 for the lower level of spending and 190 in favor of more spending, almost a 4-to-1 margin for more spending by the Democrats.

The same day, Mr. WALKER of Pennsylvania then offered an amendment to provide a 0.0000000002 percent, that is, 9 zeros, across-the-board cut, which was $19.90.

The point Mr. WALKER was trying to make was that the House is so addicted to spending and Democrats in the House are so addicted to spending that even at $19.90 they just could not vote to cut spending. Remember, this is on a huge increase, so you would have vastly more spending.

What happened to his symbolic amendment? The Republicans voted 156 for a $19.90 cut, 11 against. The Democrats voted 19 in favor of the $19.90 cut, 203 against.

So by a better than 10-to-1 margin, the Democrats proved they could not even vote to cut $19.

The following day, on the Labor vote and Human Services and Education appropriations, Mr. WALKER, who had been sort of laughed at for offering his $19.90 cut, people said, "Well, give us a serious offer." He came back and offered to freeze the Physicians Payment Review Commission to last year's level, a $65,000 cut. In other words, the Physicians Payment Review Commission is going to be given $65,000 more this year than it got last year.

Mr. WALKER made the argument that surely if we are trying to have a budget summit and trying to control spending, we could afford to freeze the Physicians Payment Review Commission at last year's number.

We lost. Republicans voted 112 for the cut, 50 against. Democrats voted 3 to freeze it at last years's number and 243 against.

Mr. WALKER was not deterred. He came back with an amendment to freeze the U.S. Institute of Peace. Now, you would think that with all the things happening in Eastern Europe, with all the things that Gorbachev was doing, that maybe we could keep the U.S Institute of Peace at last year's level.

Currently, the Democrats were providing for a $450,000 increase. It was defeated.

Republicans voted 144 to freeze it, 26 for more spending. The Democrats voted 50 to freeze it, 194 for more spending, almost a 4-to-1 margin.

The same day, Mr. FRENZEL attempted to freeze the Labor, Health, Human Services and Education appropriations discretionary accounts. They were getting a 15.2-percent increase, and he attempted to freeze them.

We lost. Republicans voted 83 in favor of a freeze, 86 against. Democrats voted 2 in favor of a freeze and 247 for more spending. That is 120-to-1 margin for more spending. That is 120-

to-1 margin for more spending among the Democrats.

The same day, Mr. PENNY provided for a 2-percent across-the-board cut in all discretionary accounts in the bill except chapter 1 of education, compensatory education, education for the handicapped, higher education, student financial assistance, and library assistance programs.

In other words, Mr. PENNY was trying to say "take all of the things people say are the most valuable, we will not touch them, but let us limit the other parts of the bill to a 13.2-percent increase." That is a pretty massive increase by the standards of most American families.

The Republicans voted 122 for the 2-percent cut and 43 for more spending. The Democrats voted 38 for the 2-percent cut and 210 for more spending.

Finally, the same day, the liberal Democrats thought they were clever. They offered an amendment to cut $2 million from the offices of the Secretaries of Labor and Education and $2.8 million from the office of the Secretary of Health and Human Services. They thought they would show the Republicans, if the Republicans were going to offer these spending cuts, they would try to cut the spending of Republican appointees.

They were shocked. Republicans voted 92 to cut the spending, 74 against. The Democrats voted 112 in favor of cutting spending, 138 against. We could not even cut the administrative services, which means that the amendment lost.

Now, in 23 amendments, you will find that in about 20 of them the Democrats clearly voted for massively more spending. When you go down the list, it is an amazing number.

□ 2220

Let me run through the numbers. Democrats, 30 for a cut, 214 for more spending; 7 for a cut, 234 for more spending; 229 for more spending, 12 for a cut; 148 for more spending, 14 for a cut; 190 for more spending, 49 for a cut; 140 for more spending, 103 for a cut; 229 for more spending, 13 for a cut; 323 for more spending, 7 for a cut; 235 for more spending, 5 for a cut; 221 for more spending, 21 for a cut; 238 for spending, 11 for a cut; 233 for spending, 13 for a cut; 190 for spending, 58 for a cut; 203 for more spending, 19 for a cut; 243 for more spending, 3 for a cut; 194 for more spending, 50 for a cut; 247 for more spending, 2 for a cut; 210 for more spending, 38 for a cut; 138 for more spending, 112 for a cut;

Again and again and again the Democrats voted against cuts in spending and for more spending almost without regard.

The reason I outline this is so there will be no question in the minds of my colleagues or the minds of the American people. It would be possible to have a budget summit without any tax increase if the Republicans who had consistently been voting to cut spending were in charge of the summit. But the fact is, as long as the Democrats control the House and Senate, it is virtually impossible to control spending because the underlying bias of the Democratic Party, the power of the alliance it has with the bureaucratic welfare state, the allies it has who rely on Government spending, for their resources, means that on vote after vote after vote, the Democratic Party is committed to spending. In fact, if we look at only July 18 and July 19, in a series of nine amendments, the Republicans voted 70 percent to cut, the Democrats voted 84 percent for more spending. I raise this because the average American family faces a very straightforward challenge. If, in fact, the Government continues to increase its spending, it is going to raise our taxes, so people will have less money in their pockets for citizens to be able to spend. It is a question of who gets to spend your money. Should we allow the Congress to spend your money, or should we allow citizens to spend their own money?

I think it is vital as we look at the budget summit. It is vital as we look at the appropriations bill, it is vital as we look at the upcoming debt ceiling, that we decide that we are fed up with business as usual in Washington, DC, that we do not accept another round of promises while raising spending, another round of future cuts that never occur, while raising spending, another round of pious platitudes while raising spending.

From May 24 when the budget summit began to July 19 we have not been able to cut spending on vote after vote after vote. In fact, we have found spending going up. I think it is vital for the American people to demand that Congress control its budget and Congress control Government spending in order to protect the family budget, and in order to protect the individual taxpayer. So I think this record lays it out. These are hard facts. These are actual votes on specific dates for specific amendments, and I think if people look at them, the pattern is very clear, and it is very obvious that the Republicans have been trying to cut spending, and it is very obvious that the Democrats have resisted again, and again, and again, and usually by very large margins, that they have voted for higher and higher spending.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. MCNULTY (at the request of Mr. GEPHARDT), for today, on account of cancellation of flight.

Mr. ENGLISH (at the request of Mr. GEPHARDT), for today, on account of illness in family.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Member (at the request of Mr. SCHUETTE) to revise and extend his remarks and include extraneous material:)

Mr. BURTON of Indiana, for 60 minutes, today.

(The following Members (at the request of Mr. SYNAR) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. YATES, for 60 minutes, today.

Mr. RANGEL, for 60 minutes, on July 31.

Mr. DELLUMS, for 30 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Ms. ROS-LEHTINEN) and to include extraneous matter:)

Mr. SCHUETTE.

Mr. MILLER of Ohio in three instances.

Mr. DORNAN of California.

Mr. LIGHTFOOT.

Ms. ROS-LEHTINEN.

(The following Members (at the request of Mr. SYNAR) and to include extraneous matter:)

Mr. TORRICELLI.

Mr. ANDERSON in 10 instances.

Mr. GONZALEZ in 10 instances.

Mr. BROWN of California in 10 instances.

Mr. ANNUNZIO in six instances.

Mrs. BOXER.

Mr. ACKERMAN.

Mr. STARK.

Mr. RANGEL in two instances.

Mr. RICHARDSON.

Mr. CLAY.

Mr. DIXON.

Mr. MFUME.

Mr. ENGEL.

Mr. NOWAK.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 1747. An act to provide for the restoration of Federal recognition to the Ponea Tribe of Nebraska, and for other purposes; to the Committee on Interior and Insular Affars.

ENROLLED JOINT RESOLUTION SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a joint resolution of the House of the following title, which was thereupon signed by the Speaker:

H.J. Res. 591. Joint Resolution designating the third Sunday of August of 1990 as "National Senior Citizens Day."

SENATE ENROLLED JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to an enrolled joint resolution of the Senate of the following title:

S.J. Res. 75. Joint resolution relating to NASA and the International Space Year. Examined and fund truly enrolled July 23, 1990.

ADJOURNMENT

Mr. GINGRICH. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 10 o'clock and 24 minutes p.m.) under its previous order, the House adjourned until Tuesday, July 24, 1990, at 11 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

3591. A letter from the Secretary of Agriculture, transmitting the Secretary's concerns regarding H.R. 3950, the Food and Agricultural Resources Act of 1990; to the Committee on Agriculture.

3592. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. Act 8-246, "Tax Revenue Anticipation Notes Act of 1990," and report, pursuant to D.C. Code Section 1-233(c)(1); to the Committee on the District of Columbia.

3593. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. Act 8-248, "Condominium and Cooperative Trash Collection Tax Credit Act of 1990," and report, pursuant to D.C. Code Section 1-233(c)(1); to the Committee on the District of Columbia.

3594. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. Act 8-239, "District of Columbia Prevention of Domestic Violence Amendment Act of 1990," and report, pursuant to D.C. Code Section 1-233(c)(1); to the Committee on the District of Columbia.

3595. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. Act 8-243, "Closing of a Portion of D Street, S.W., S.O. 87-324 Act of 1990," and report, pursuant to D.C. Code Section 1-233(c)(1); to the Committee on the District of Columbia.

3596. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. Act 8-240, "Uniform Enforcement of Foreign Judgments Act of 1990," and report, pursuant to D.C. Code Section 1-233(c)(1); to the Committee on the District of Columbia.

3597. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. Act 8-244, "Carlos Manuel Rosario Adult Education Center Designation Act of 1990," and report, pursuant to D.C. Code Section 1-233(c)(1); to the Committee on the District of Columbia.

3598. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. Act 8-241, "Windy Court and Derby Lane Designations Act of 1990," and report, pursuant to D.C. Code Section 1-233(c)(1); to the Committee on the District of Columbia.

3599. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. Act 8-245, "Dedication and Designation of 7th Street, S.E., Oxon Run Road, S.E., and Edward Eugene Cornwell, Jr. Drive, S.E., S.O. 89-276 Act of 1990," and report, pursuant to D.C. Code Section 1-233(c)(1); to the Committee on the District of Columbia.

3600. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. Act 8-242, "Washington Hospital Center Corporation Revenue Bond Act of 1990," and report, pursuant to D.C. Code Section 1-233(c)(1); to the Committee on the District of Columbia.

3601. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. Act 8 247, "District of Columbia Regional Airport Authority Act of 1985 Amendment Act of 1990," and report, pursuant to D.C. Code Section 1-233(c)(1); to the Committee on the District of Columbia.

3602. A letter from the Assistant Secretary of State for Legislative Affairs, transmitting notice that the Department's report on PLO compliance with its December 1988 commitments will be submitted as scheduled at such time as the United States-PLO dialogue is resumed, pursuant to Public Law 101-246, section 804(b) (104 Stat. 78); to the Committee on Foreign Affairs.

3603. A letter from the Comptroller General, General Accounting Office, transmitting a list of all reports issued by GAO in June 1990, pursuant to 31 U.S.C. 719(h); to the Committee on Government Operations.

3604. A letter from the Archivist of the United States, transmitting a report on Federal audiovision activity for fiscal year 1989; to the Committee on Government Operations.

3605. A letter from the Federal Election Commission, transmitting a report to alert Congress that the Presidential Election Campaign Fund is running out of money, pursuant to 26 U.S.C. 9009(a)(5)(A); to the Committee on House Administration.

3606. A letter from the Attorney General, Department of Justice, transmitting a copy of the annual report of the Attorney General for the 1988 fiscal year, pursuant to 28 U.S.C. 529; to the Committee on the Judiciary.

3607. A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to amend title 35, United States Code, to strengthen the legitimate rights of patent owners vis-a-vis infringers and licensees; to the Committee on the Judiciary.

3608. A letter from the Acting Secretary of Defense, transmitting certification that the Johnston Atoll chemical agent disposal system has destroyed live chemical munitions; jointly, to the Committees on Appropriations and Armed Services.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DINGELL: Committee on Energy and Commerce. H.R. 4238. A bill to amend the Public Health Service Act to extend various programs with respect to vaccine-preventable diseases. (Rept. 101-611). Referred to the Committee of the Whole House on the State of the Union.

Mr. DINGELL: Committee on Energy and Commerce. H.R. 5112. A bill to amend the Public Health Service Act to extend certain programs for health care services in the home; with an amendment (Rept. 101-612). Referred to the Committee of the Whole House on the State of the Union.

Mr. DINGELL: Committee on Energy and Commerce. H.R. 5113. A bill to amend the Public Health Service Act to extend the program for the prevention and control of injuries. (Rept. 101-613). Referred to the Committee of the Whole House on the State of the Union.

Mr. DINGELL: Committee on Energy and Commerce. H.R. 5146. A bill to amend the Public Health Service Act to extend the program regarding organ transplantation; with an amendment (Rept. 101-614). Referred to the Committee of the Whole House on the State of the Union.

Mr. DINGELL: Committee on Energy and Commerce. H.R. 4039. A bill to amend the Public Health Service Act to establish a program for the prevention of disabilities, and for other purposes. (Rept. 101-615). Referred to the Committee of the Whole House on the State of the Union.

Mr. DINGELL: Committee on Energy and Commerce. H.R. 975. A bill to amend the Federal securities laws in order to provide additional enforcement remedies for violations of those laws; with an amendment (Rept. 101-616). Referred to the Committee of the Whole House on the State of the Union.

Mr. DINGELL: Committee on Energy and Commerce. H.R. 4497. A bill to amend the Federal securities laws to eliminate abuses in transactions in penny stocks, and for other purposes; with an amendment (Rept. 101-617). Referred to the Committee of the Whole House on the State of the Union.

Mr. HAWKINS: Committee on Education and Labor. H.R. 5215. A bill to amend the Congressional Award Act to temporarily extend the Congressional Awards Board, and to otherwise revise such act; with amendments (Rept. 101-618). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROSTENKOWSKI: Committee on Ways and Means. H.R. 1154. A bill to prohibit the importation of assault weapons and certain accessories; with an amendment (Rept. 101-619). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROSTENKOWSKI: Committee on Ways and Means. H.R. 4939. A bill regarding the extension of most-favored-nation treatment to the products of the People's Republic of China, and for other purposes; with an amendment (Rept. 101-620). Referred to the Committee of the Whole House on the State of the Union.

REFERRAL OF SENATE AMENDMENT

Pursuant to clause 5, rule X and clause 2, rule XXIV,

The Senate amendment to the bill (H.R. 4328) to authorize appropriations for fiscal years 1991 and 1992 for the customs and trade agencies, and for other purposes, was referred from the Speaker's table to the Committee on Ways and Means for consideration of such provisions of the Senate amendment as fall within the jurisdiction of that committee under clause 1(v), rule X.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ARCHER:

H.R. 5342. A bill relating to the extension of duty-free treatment for certain digital processing units; to the Committee on Ways and Means.

By Mr. BILIRAKIS:

H.R. 5343. A bill to amend section 3104 of title 38, United States Code, to permit certain service-connected disabled veterans who are retired members of the Armed Forces to receive compensation concurrently with retired pay without reduction in the amount of the compensation and retired pay; jointly, to the Committees on Veterans' Affairs and Armed Services.

By Mr. FRENZEL:

H.R. 5344. A bill to provide for a lower rate of duty on East German products imported during the transition to a unified Germany; to the Committee on Ways and Means.

By Mrs. SCHROEDER:

H.R. 5345. A bill to amend the Public Health Service Act to require that, as appropriate, women and members of minority groups be included as subjects in clinical research conducted under such act; to the Committee on Energy and Commerce.

By Mrs. SCHROEDER (for herself, Mr. SCHAEFER, Mr. SKAGGS, Mr. BROWN of Colorado, Mr. CAMPBELL of Colorado, and Mr. HEFLEY):

H.R. 5346. A bill to amend title 28 of the United States Code to authorize the appointment of one additional bankruptcy judge for the district of Colorado; to the Committee on Judiciary.

By Mr. SCHULZE:

H.R. 5347. A bill to amend the Internal Revenue Code of 1986 to allow subchapter S corporations to have foreign sales corporations as subsidiaries; to the Committee on Ways and Means.

By Mr. SHAW:

H.R. 5348. A bill to amend title XVIII of the Social Security Act to provide an additional payment under part A of the Medicare Program for the operating costs of inpatient hospital services of hospitals with a high proportion of patients who are Medicare beneficiaries; to the Committee on Ways and Means.

By Mr. SCHUETTE:

H.R. 5349. A bill to reform the budget process; jointly, to the Committees on Rules, Government Operations, Appropriations, Ways and Means, and the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 496: Mr. SHARP and Ms. SLAUGHTER of New York.

H.R. 725: Mr. COSTELLO.

H.R. 747: Mr. BARNARD and Mr. BAKER.

H.R. 930: Mr. BLAZ.

H.R. 2121: Mr. ENGEL.

H.R. 2319: Mr. QUILLEN and Mr. GORDON.

H.R. 2353: Mr. COLEMAN of Texas, Ms. LONG, Mr. BUSTAMANTE, and Mr. WOLF.

H.R. 2395: Mr. MARKEY, Mr. COYNE, Mr. GALLEGLY, Mr. WILSON, Mr. CHAPMAN, Mr. PANETTA, Mr. KOLTER, Mr NEAL of North Carolina, Mr BUSTAMANTE, Mr. STUDDS, Mr. BRUCE, Mr. EDWARDS of California, Mr. LANTOS, Mr. SMITH of Texas, and Mr. HUGHES.

H.R. 2460: Mr. LEWIS of Georgia and Mr. JONES of North Carolina.

H.R. 2648: Mr. MARKEY.

H.R. 2798: Mr. SOLARZ, Mr. GEREN, Mr. GUARINI, Mr. CARDIN, Mr. OWENS of Utah, and Mr. JACOBS.

H.R. 2816: Mr. STUDDS.

H.R. 3004: Mr. LEHMAN of California.

H.R. 3346: Mr. DELAY and Mr. HERGER.

H.R. 3483: Mr. MARKEY.

H.R. 3643: Mr. BRUCE.

H.R. 3934: Mr. CAMPBELL of California.

H.R. 3936: Mrs. SCHROEDER, Mr. HOYER, Mr. FLIPPO, Mr. SAVAGE, Mr. CROCKETT, and Mr. BILBRAY.

H.R. 3977: Mr. MILLER of Washington and Mr. DAVIS.

H.R. 3978: Mr. BOSCO.

H.R. 3999: Ms. SCHNEIDER.

H.R. 4042: Mr. DOUGLAS.

H.R. 4147: Mr. NEAL of North Carolina.

H.R. 4219: Mr. BILBRAY, Mr. ENGLISH, Mr. JOHNSTON of Florida, Mr. HOCHBRUECKNER, Mrs. LOWEY of New York, and Mr. MCDERMOTT.

H.R. 4300: Mr. GILMAN.

H.R. 4368: Mr. STAGGERS.

H.R. 4484: Mr. FORD of Tennessee.

H.R. 4485: Mr. MORRISON of Washington.

H.R. 4550: Mr. BLAZ.

H.R. 4617: Mr. CAMPBELL of Colorado.

H.R. 4711: Mr. POSHARD, Mr. BUNNING, Mr. CHAPMAN, Mr. BOUCHER, and Mr. GALLO.

H.R. 4761: Mr. RINALDO, Mr. HATCHER, Mr. DYMALLY, Mr. FORD of Tennessee, and Mr. WOLPE.

H.R. 4893: Mr. BEILENSON, Mr. EDWARDS of California, Mr. ATKINS, Mrs. SAIKI, and Mr. DWYER of New Jersey.

H.R. 4894: Ms. KAPTUR, Mr. HUGHES, and Mr. BATES.

H.R. 4993: Mr. BARTLETT.

H.R. 4997: Mr. GRANDY, Mr. MARLENEE, and Mr. HOUGHTON.

H.R. 5007: Mr. EDWARDS of California, Mr. HENRY, Mr. SCHUETTE, and Mr. THOMAS of California.

H.R. 5018: Mr. DORNAN of California, Mr. ATKINS, Mr. DONNELLY, Mr. FAWELL, Mr. SAXTON, and Mr. LENT.

H.R. 5082: Mr. DORNAN of California.

H.R. 5120: Mr. MRAZEK, Mr. STOKES, Mr. KOLTER, Mr. BRYANT, Mr. OWENS of New York, and Mr. RAHALL.

H.R. 5127: Mr. BEREUTER.

H.R. 5146: Mr. GEREN of Texas.

H.R. 5163: Mr. SMITH of Vermont and Mr. BUSTAMANTE.

H.R. 5288: Mr. MCDERMOTT, Mr. MANTON, Ms. KAPTUR, Mr. BRYANT, Mr. FAUNTROY, and Mr. GORDON.

H.R. 5331: Mrs. COLLINS.

H.R. 5338: Mrs. KENNELLY, Mr. ASPIN, Mr. DORNAN of California, and Mr. DWYER of New Jersey.

H.J. Res. 214: Mr. SOLOMON, Mr. RANGEL, Mr. WALGREN, Mr. LEWIS of Florida, Mr. GONZALEZ, and Mr. YOUNG of Alaska.

H.J. Res. 459: Mr. MANTON, Mr. PURSELL, Mr. KENNEDY, Mr. CROCKETT, Mr. FISH, and Mr. DE LUGO.

H.J. Res. 469: Mr. MADIGAN.

H.J. Res. 524: Mr. FISH and Mr. DYMALLY.

H.J. Res. 576: Mr. BOSCO and Mr. ROHRABACHER.

H.J. Res. 616: Mr. WALSH, Mr. KOSTMAYER, Mr. LANTOS, Mr. THOMAS A. LUKEN, Mr. MARTINEZ, Mr. JONES of Georgia, Mr. COURTER, Mr. DYSON, Mr. VALENTINE, and Mr. DARDEN.

H.J. Res. 626: Mrs. BOXER, Mr. ACKERMAN, Ms. SLAUGHTER of New York, Ms. KAPTUR, Mr. VALENTINE, Mr. BILBRAY, and Mr. BENNETT.

H. Con. Res. 329: Mr. MAZZOLI, Mr. BEREUTER, and Mr. HARRIS.

H. Res. 134: Mrs. VUCANOVICH and Mr. BRUCE.

H. Res. 312: Mr. BOUCHER, Mr. DORGAN of North Dakota, Mr. WAXMAN, Mr. PAYNE of New Jersey, Mr. MILLER of California, Mr. FEIGHAN, Mr. STARK, Mrs. JOHNSON of Connecticut, Mr. GONZALEZ, and Mrs. MARTIN of Illinois.

H. Res. 418: Mr. CROCKETT, Mr. OWENS of Utah, Mr. BLAZ, Mr. MRAZEK, Mrs. BOXER, and Mr. ACKERMAN.

PETITIONS, ETC.

Under clause 1 of rule XXII,

217. The SPEAKER presented a petition of the United Filipino-American World War II Veterans Association, Inc., relative to American bases in the Philippines; which was referred to the Committee on Foreign Affairs.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 3950

By Mr. GEJDENSON:

—Strike out title XII—Trade (page 313, line 3, through page 397, line 22) and insert in lieu thereof the following:

TITLE XII—AGRICULTURAL TRADE AND ASSISTANCE

Subtitle A—Public Law 480 and Related Programs

SEC. 1201. SHORT TITLE.

This subtitle may be cited as the "Mickey Leland Food for Peace Act".

SEC. 1202. AMENDMENT OF AGRICULTURAL TRADE DEVELOPMENT AND ASSISTANCE ACT OF 1954.

Unless otherwise expressly provided, whenever in this subtitle an amendment is expressed in terms of an amendment to a section or other provision, the reference shall be considered to be made to a section or other provision of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1691 and following).

SEC. 1203. EXTENSION OF AUTHORITIES.

Section 409 (7 U.S.C. 1736c) is amended—

(1) by striking "1990" in the first sentence and inserting "1995"; and

(2) by striking "and the Food Security Act of 1985" in the second sentence and inserting ", the Food Security Act of 1985, and

the Food and Agricultural Resources Act of 1990".

SEC. 1204. AMENDMENT TO SECTION 2.

Section 2 (7 U.S.C. 1691) is amended to read as follows:

"SEC. 2. UNITED STATES POLICY.

"It is the policy of the United States to use its abundant agricultural productivity to promote the foreign policy of the United States by enhancing the food security of the developing world through the use of agricultural commodities, and local currencies accruing under this Act, to—

"(1) combat world hunger and malnutrition and their causes;

"(2) promote broad-based, equitable, and sustainable development, including agricultural development;

"(3) expand international trade;

"(4) develop and expand export markets for United States agricultural commodities; and

"(5) foster and encourage the development of private enterprise and democratic participation in developing countries.".

SEC. 1205. AMENDMENT TO SECTION 3.

Section 3 (7 U.S.C. 1691a) is amended to read as follows:

"SEC. 3. OVERALL FOOD AID LEVEL.

"It is the sense of the Congress that the President should increase the level of food aid provided by the United States, and should encourage other donor governments to increase the level of food aid they provide, to reflect the findings of the National Research Council of the National Academy of Sciences that it will be necessary to double the present food aid level of approximately 10 million metric tons per year in order to meet the projected world food aid needs during 1991 through 2000. It is further the sense of the Congress that the President should encourage other developed countries to increase their contributions toward combatting hunger and malnutrition in developing countries by expanding international food and agricultural assistance programs.".

SEC. 1206. AMENDMENTS TO TITLE I.

(a) AMENDMENT TO SECTION 101.—Section 101 (7 U.S.C. 1701) is amended to read as follows:

"SEC. 101. SALES PROGRAM.

"(a) GENERAL AUTHORITY.—To carry out the policies set forth in section 2, the President may negotiate and carry out agreements with developing countries to provide for the sale of agricultural commodities to such countries—

"(1) for dollars on credit terms, or for local currencies (including for local currencies on credit terms) for use under section 104; and

"(2) on such other terms and conditions as the President may require be included in such agreements, consistent with the requirements of this Act.

"(b) DEFINITION OF DEVELOPING COUNTRY.—For the purposes of this section, the term 'developing country' means a country that has a shortage of foreign exchange earnings and has difficulty meeting all of its food needs through commercial channels.

"(c) PRIORITIES IN ALLOCATIONS OF ASSISTANCE.—In determining whether and to what extent agricultural commodities will be made available to developing countries under this section, the President shall give priority to countries that—

"(1) demonstrate that greatest need for food, and

"(2) have the demonstrated protential to become commercial markets for competitively priced United States agricultural commodities.".

(b) AMENDMENTS TO SECTION 103.—Section 103 (7 U.S.C. 1703) is amended—

(1) by striking subsections (a), (b), (d), (h), (i), (j), (p), (q), and (r);

(2) by redesignating subsection (c), (e), (f), (g), (k), (l), (m), (n), and (o) as paragraphs (1) through (9), respectively;

(3) in paragraph (7), as so redesignated—

(A) by striking "except as provided in section 108,";

(B) by striking "(1)"; and

(C) by striking ", and (2)" and all that follows through "conversion;" and inserting a semicolon;

(4) by inserting "and" at the end of paragraph (9), as so redesignated; and

(5) by inserting after the paragraph the following:

"(10 give priority to financing the sale of food and fiber commodities in the allocation of funds made available under this title.".

(c) AMENDMENT TO SECTION 104.—Section 104 (7 U.S.C. 1704) is amended to read as follows:

"SEC. 104. USE OF LOCAL CURRENCY PAYMENTS.

"(a) IN GENERAL.—Agreements under section 101 may provide that the President shall use payments made in local currencies by the recipient country in accordance with this section.

"(b) ACTIVITIES.—The proceeds from the payments referred to in subsection (a) may be used in the recipient country for the following:

"(1) TRADE DEVELOPMENT.—To carry out programs to help develop markets for United States agricultural commodities on a mutually beneficial basis in the recipient country.

"(2) AGRICULTURAL BUSINESS DEVELOPMENT LOANS.—To make loans to United States business entities (including cooperatives) and branches, subsidiaries, or affiliates of such entities for agricultural business development and agricultural trade expansion of such recipient countries.

"(3) AGRICULTURAL FACILITIES LOANS.—To make loans to domestic or foreign entities (including cooperatives) for the establishment of facilities for aiding in the utilization or distribution of, or otherwise increasing the consumption of and markets for, United States agricultural products.

"(4) TRADE PROMOTION.—To promote agricultural trade development, under procedures established by the President, by making loans or through other activities (including trade fairs) that the President determines to be appropriate.

"(5) PRIVATE SECTOR AGRICULTURAL TRADE DEVELOPMENT.—To conduct private sector agricultural trade development activities in the recipient country, as determined appropriate by the President.

"(6) AGRICULTURAL DEVELOPMENT.—To support—

"(A) increased agricultural production, including availability of agricultural inputs, with emphasis on small farms, processing, forestry management, and land and water management;

"(B) credit policies for private-sector agriculture development; and

"(C) establishment and expansion of institutions for basic and applied agricultural research and the use of such research through development of extension services.

"(7) RESEARCH.—To conduct research in agriculture, forestry, and aquaculture, including collaborative research which is mutually beneficial to the United States and the recipient country.

"(8) ACQUISITION OF BUILDINGS FOR UNITED STATES GOVERNMENT USE.—To acquire (by purchase, lease, rental, or otherwise) sites and buildings and grounds abroad for United States Government use (including offices, residence quarters, and community and other facilities), and to construct, repair, alter, and furnish such buildings and facilities.

"(9) ACQUISITION OF MATERIALS FOR LIBRARIES.—To finance under the direction of the Librarian of Congress and the Director of the National Agricultural Library, in consultation with the National Science Foundation and other interested agencies—

"(A) programs outside the United States for the analysis and evaluation of foreign books, periodicals, and other materials to determine their technical, scientific, cultural, or educational significance to the United States, and

"(B) the acquisition of such books, periodicals, and other materials and the deposit thereof in libraries and research centers in the United States specializing in the areas to which they relate.

"(10) SCIENTIFIC ACTIVITIES.—To collect, collate, translate, abstract, and disseminate scientific and technological information, conduct research and support scientific activities overseas, including programs and projects of scientific cooperation between the United States and other countries, such as coordinated research against human diseases, and to promote and support programs of medical and scientific research.

"(11) PEST CONTROL PROGRAMS.—To pay the costs of carrying out programs for the control of rodents, insects, weeks, and other animal or plant pests.

"(c) SPECIAL ACCOUNT.—Local currencies received by the President under section 101 shall be deposited in an interest-bearing account to the credit of the United States. Amounts in such accounts shall be used by the President as provided in this section.

"(d) FISCAL REQUIREMENTS REGARDING USE OF LOCAL CURRENCIES.—

"(1) EXEMPTION.—Section 1306 of title 31, United States Code, shall not apply to local currencies used by the President under paragraphs (1) through (7) of subsection (b).

"(2) USE OF CURRENCIES BY OTHER AGENCIES.—Any department or agency of the United States Government that uses any currencies from a special account established pursuant to subsection (c) for a purpose for which funds have been appropriated shall reimburse the Commodity Credit Corporation in an amount equivalent to the dollar value of the currencies used.

"(e) REDUCTION IN BALANCE OF PAYMENTS DEFICIT.—The President shall utilize local currencies received pursuant to this Act is such manner as will, to the maximum extent possible, reduce any deficit in the balance of payments of the United States.

"(f) SUPPORT FOR CERTAIN EDUCATIONAL INSTITUTIONS.—If the President determines that local currencies deposited in a special account pursuant to subsection (c) are not needed for any of the activities described in subsection (b), the President may use those currencies to provide support for any institution (other than an institution whose primary purpose is to provide religious education) located in the recipient country that provides education in agricultural sciences or other disciplines for a significant number of United States national (who may include members of the United States Armed Forces or the Foreign Service or dependents of such members).".

(d) REPEAL OF SECTION 105; DEBT FORGIVENESS AND DEBT-FOR-NATURE SWAP AUTHORITIES.—Title I is amended by striking section 105 (7 U.S.C. 1705) and inserting the following:

"SEC. 105. DEBT FORGIVENESS.

"(a) AUTHORITY.—The President, taking into account the financial resources of a country, may waive payments of principal and interest that that country would otherwise be required to make to the Commodity Credit Corporation under dollar sales agreements under this title if—

"(1) that country is a least developed country (as defined in section 301(b) or has a per capita external debt in excess of $1500; and

"(2) either—

"(A) an International Monetary Fund standby agreement is in effect with respect to that country;

"(B) a structural adjustment program of the International Bank for Reconstruction and Development or of the International Development Association is in effect with respect to that country;

"(C) a structural adjustment facility, enhanced structural adjustment facility, or similar supervised arrangement with the International Monetary Fund is in effect with respect to that country; or

"(D) even though such an agreement, program, facility, or arrangement is not in effect, the country is pursuing national ecnomic policy reforms that would promote democratic, market-oriented, and long term economic development.

"(d) APPROPRIATIONS ACTION REQUIRED.—The aggregate amount of principal and interest waived under this section may not exceed the amount approved for such purpose in an Act appropriating funds to carry out this Act.

(c) LIMITATION ON NEW CREDIT ASSISTANCE.—If the authority of this section is used to waive payments otherwise required to be made by a country pursuant to this title, the President may not provide any new credit assistance for that country under this title during the 2-year period beginning on the date such waiver authority is exercised, unless the President provides to the Congress, before the assistance is provided, a written justification for the provision of such new credit assistance.

"(d) APPLICABILITY.—The authority of this section applies with respect to credit sales agreements entered into before or after the enactment of the Food and Agricultural Resources Act of 1990.

"SEC. 105A. DEBT-FOR-NATURE SWAPS FOR LATIN AMERICA AND THE CARIBBEAN.

"(a) DEBT CONVERSION.—To the extent provided for in an agreement meeting the requirements of subsection (b), the President may release an eligible country from all or a part of its obligation to make principal and interest payments that would otherwise be required to be made to the Commodity Credit Corporation under dollar sales agreements under this title.

"(b) DEBT-FOR-NATURE SWAP AGREEMENT.—The agreement referred to in subsection (a) is an agreement between the United States Government and the government of the eligible country which includes the following requirements:

"(1) ISSUANCE OF BOND.—The government of the eligible country shall be required to issue, and deposit in a trust, a long-term bond or other obligation requiring that government to make periodic payments to the trust. Such obligation shall be nonredeemable.

"(2) TRUST.—The agreement shall provide for the establishment of a trust, which shall hold the bond or other obligation. The trust shall be managed by a board of trustees as specified in the agreement

"(3) USE OF FUNDS FOR ENVIRONMENTAL PURPOSES.—Amounts paid to the trust shall be made available by the trustee, in accordance with the agreement, to—

"(A) indigenous nongovernmental environmental, conservation, or development organizations,

"(B) the government of the eligible country, or

"(C) other appropriate entities, for use in protecting, preserving, or restoring, and ensuring the appropriate and sustainable use of, environmentally critical land, habitat, or other natural resources in the eligible country.

"(c) CRITERIA FOR SELECTING COUNTRIES.—In determining the eligible countries with respect to which the authority of this section will be exercised, the President shall take into account—

"(1) the needs for financial resources for use in protecting, preserving, or restoring environmentally critical areas and resources in an eligible country; and

"(2) the commitment of the government of that country to protecting, preserving, and restoring, those areas and resources.

"(d) ELIGIBLE COUNTRIES.—For purposes of this section, the term 'eligible country' means a country in Latin America or the Caribben that the President determines—

"(1) has adopted a strong economic reform program consistent with the policies of the International Monetary Fund and the International Bank for Reconstruction and Development and the International Development Association;

"(2) is pursuing comprehensive investment reforms with the Inter-American Development Bank or is otherwise implementing an open investment regime; and

"(3) has concluded, if appropriate, a financing package with commercial banks including debt and debt service reduction.

"(e) CONSULTATION REQUIREMENTS.—The President shall consult with nongovernmental organizations having expertise with respect to environmental or conservation matters—

"(1) in identifying countries with respect to which the authority of this section should be exercised because of their environmental situation;

"(2) during the negotiation of an agreement pursuant to subsection (b) with respect to the debt restructuring arrangement pursuant to subsection (b)(1), the establishment of the trust pursuant to subsection (b)(2), and the uses of funds pursuant to subsection (b)(3); and

"(3) with respect to whether funds paid to the trust are being used for the intended purposes.

"(f) ANNUAL REPORTS.—Each year, the President shall submit to the Congress a report which describes the debt-for-nature swap agreements entered into under this section during the preceding fiscal year.

"(g) APPROPRIATIONS ACTION REQUIRED.—The aggregate amount of principal and interest waived under this section may not exceed the amount approved for such purpose in an Act appropriating funds to carry out this Act.

"(h) RELATION TO SECTION 105.—This section should not be construed to limit the authority of the President to provide debt forgiveness under section 105 of this Act for eligible countries (as defined in this section).

"(i) APPLICABILITY.—The authority of this section applies with respect to credit sales agreements entered into before or after the enactment of the Food and Agricultural Resources Act of 1990.".

(e) AMENDMENT TO SECTION 106.—Section 106 (7 U.S.C. 1706) is amended to read as follows:

"SEC. 106. TERMS AND CONDITIONS OF SALES.

"(a) PAYMENT.—

"(1) DOLLARS.—Except as provided in paragraph (2), agreements under section 101 shall require that payment for agricultural commodities be made in dollars.

"(2) LOCAL CURRENCIES.—(A) The President may permit a recipient country to make payment under an agreement under section 101 in the local currency of such country in order to use the proceeds from such payments to carry out activities under section 104.

"(B) Payments in local currency shall be at rates of exchange that are no less favorable than the highest exchange rate legally obtainable in the country and that are no less favorable than the highest exchange rate obtainable by any other country.

"(b) INTEREST.—An agreement under section 101 shall provide that interest shall accrue on the payment deferred under such agreement at such rate as is determined appropriate by the President, but not in excess of 50 percent of the cost of borrowing to the United States Government as of the time the agreement is entered into.

"(c) DURATION.—Payments required under an agreement under section 101 may be made in reasonable annual amounts over the period specified in the agreement, which may not be less than 10 nor more than 40 years after the date of the last delivery of agricultural commodities under such agreement. The date for the beginning of such annual payment may be deferred for not more than 2 years after the date of such last delivery, and interest shall be computed from the date of such last delivery.

"(d) DELIVERY.—Delivery of agricultural commodities pursuant to an agreement under this title shall be made for not more than 10 years following the date of the agreement and subject to the availability of the commodities at the time delivery is to be made.

"(e) USE OF SALES PROCEEDS FOR ECONOMIC DEVELOPMENT PURPOSES.—Agreements under this title for the sale of agricultural commodities for dollars on credit terms may include requirements that an amount equal to the proceeds from the sale of the commodities in the recipient country be used for such economic development purposes as are agreed upon in the agreement or any amendment thereto. Such purposes may include promotion of specific policy reforms and private sector development. In negotiating such agreements, the President shall emphasize the use of such proceeds for purposes that directly improve the lives of the poorest of the people of the recipient country and their capacity to participate in the development of their country and to carry out programs in accordance with sections 109 and 406(a)(1).".

(f) AMENDMENT TO SECTION 107.—Section 107 (7 U.S.C. 1707) is amended in subsection (d) by striking "103(a), 103(d), 103(e), 103(f), 103(j), 103(k)" and inserting "103(2), 103(3), 103(5)".

(g) REPEAL OF SECTION 108.—Section 108 (7 U.S.C. 1708) is repealed.

(h) AMENDMENTS TO SECTION 109.—

(1) REQUIREMENT FOR SELF-HELP MEASURES.—Section 109 (7 U.S.C. 1709) is amended by amending subsection (a) to read as follows:

"(a) To be eligible to enter into an agreement under title I or title III, the proposed recipient country must undertake self-help measures for economic development purposes in order to improve food security and agricultural development, alleviate poverty, and promote broad-based, equitable, and sustainable development through such activities as—

"(1) fostering increased agricultural production (with emphasis on the production by small farms of food for local consumption) and processing, forestry management, and land and water management;

"(2) fostering the availability of agricultural inputs necessary for agricultural growth;

"(3) improving marketing, storage, and transportation systems;

"(4) promoting and developing credit policies for private sector agricultural development;

"(5) promoting free and open markets for food and agricultural producers;

"(6) establishing and maintaining government policies to ensure adequate incentives to producers of food and agricultural products;

"(7) establishing and expanding institutions for basic and applied agricultural research and the use of such research through development of extension services and agricultural education institutions; and

"(8) preservation of biological diversity.".

(2) DESCRIPTION OF SELF-HELP MEASURES.—Subsection (d)(1) of that section is amended by striking "maximum".

(3) ADDITIONAL REQUIREMENT.—Subsection (d)(2) of that section is repealed.

(4) REDESIGNATIONS.—Subsection (c) of that section is redesignated as subsection (b), subsection (d)(1) of that section is redesignated as subsection (c), and subsection (d)(3) of that section is redesignated as subsection (e).

(5) APPLICATION OF PROVISIONS TO NEW TITLE III PROGRAM.—Subsection (b) of that section, subsection (c) of that section, and subsection (d) of that section (as so redesignated by paragraph (4) of this subsection) are amended by inserting after "this title" each place it appears "or title III".

(i) REPEAL OF SECTION 110.—Section 110 (7 U.S.C. 1710) is repealed.

(j) AMENDMENTS TO SECTION 112.—Section 112 (7 U.S.C. 1712) is amended

(1) in subsection (a) by striking "to finance the sale of agricultural commodities to" and inserting "or title III with";

(2) in subsection (b) by striking "International Relations" and inserting "Foreign Affairs"; and

(3) by striking subsection (d).

(k) AMENDMENT TO SECTION 113.—Section 113 (7 U.S.C. 1713) is amended to read as follows:

"SEC. 113. DEADLINE FOR AGREEMENTS UNDER TITLES I AND III.

"An agreement under this title or title III shall, to the extent practicable, be entered into not later than—

"(1) November 30 of the first fiscal year in which agricultural commodities are to be shipped under the agreement, or

"(2) 60 days after the date of enactment of the annual Rural Development, Agriculture, and Related Agencies Appropriations Act for the first fiscal year in which agricultural commodities are to be shipped under the agreement,

whichever is later.".

(l) AMENDMENTS TO SECTION 115.—Section 115 (7 U.S.C. 1715) is amended—

(1) in subsection (a) by striking the first two sentences; and

(2) in subsection (b)—

(A) in the next to the last sentence by striking "International Relations" and inserting "Foreign Affairs", and

(B) in the last sentence by inserting "not more than" after "for a period of".

SEC. 1207. AMENDMENTS TO TITLE II.

(a) AMENDMENTS TO SECTION 201.—Section 201 (7 U.S.C. 1721) is amended—

(1) in subsection (a)—

(A) by striking "The President" and inserting "IN GENERAL.—Notwithstanding the provisions of any other Act, the President"; and

(B) by inserting "under this title" after "furnish agricultural commodities";

(2) by amending subsection (b) to read as follows:

"(b) MINIMUM LEVELS.—

"(1) MINIMUM ASSISTANCE.—Except as provided in paragraph (3), the President shall make agricultural commodities available for food distribution under this title in an amount that—

"(A) for fiscal year 1991, is not less than 1,925,000 metric tons.

"(B) for fiscal year 1992, is not less than 1,9250000 metric tons.

"(C) for fiscal year 1993, is not less than 1,975,000 metric tons.

"(D) for fiscal year 1994, is not less than 2,000,000 metric tons; and

"(E) for fiscal year 1995, is not less than 2,025,000 metric tons.

"(2) MINIMUM NONEMERGENCY ASSISTANCE.—Of the amounts specified in paragraph (1), and except as provided in paragraph (3), the President shall make agricultural commodities available for nonemergency food distribution through private voluntary organizations, cooperatives, the World Food Program, and other intergovernmental organizations in an amount that—

"(A) for fiscal year 1991, is not less than 1,450,000 metric tons;

"(B) for fiscal year 1992, is not less than 1,475,000 metric tons;

"(C) for fiscal year 1993, is not less than 1,500,000 metric tons;

"(D) for fiscal year 1994, is not less than 1,525,000 metric tons; and

"(E) for fiscal year 1995, is not less than 1,550,000 metric tons.

"(3) EXCEPTION.—The President may waive the requirements of paragraphs (1) and (2) for any fiscal year if the President determines that such quantities of commodities cannot be used effectively to carry out this title or in order to meet an emergency or that insufficient funds are available for that fiscal year to meet those requirements. In making a waiver under this paragraph, the President shall prepare and submit to the Committee on Foreign Affairs and the Committee on Agriculture of the House of Representatives and to the Committee on Agriculture, Nutrition, and Forestry of the Senate a report containing the reasons for the waiver."; and

(3) in subsection (c)(2) by striking "fortified or processed" both places it appears and inserting "fortified, processed, or bagged".

(b) AMENDMENTS TO SECTION 202.—Section 202 (7 U.S.C. 1722) is amended—

(1) by striking "nonprofit voluntary agencies" each place it appears and inserting "private voluntary organizations,";

(2) by striking "nonprofit voluntary agency" each place it appears and inserting "private voluntary organization";

(3) in subsection (a) by striking "friendly";

(4) in subsection (b)(4) by striking "those agencies" and inserting "those organizations"; and

(5) in subsection (c) by striking "(c)(1)" and all that follows through "(3) in carrying out a multiyear agreement pursuant to this subsection," and insert "(c) In carrying out a multiyear agreement under this title,".

(c) REPEAL OF SECTION 206.—Section 206 (7 U.S.C. 1726) is reapealed.

(d) AMENDMENTS TO SECTION 207.—Section 207 (7 U.S.C. 1726a) is amended—

(1) by striking "nonprofit voluntary agency" each place it appears and inserting "private voluntary organization"; and

(2) by adding at the end the following:

"(d)(1) Not less than $10,000,000 and not more than $13,500,000 of the amounts made available in each fiscal year to private voluntary organizations and cooperatives under this title shall be made available by the President to such organizations and cooperatives to assist in—

"(A) establishing new programs under this title; and

"(B) meeting specific administrative, management, personnel and internal transportation and distribution costs for carrying out programs in foreign countries under this title.

"(2) In order to receive funds made available under paragraphs (1), a private voluntary organization or cooperative must submit a request for such funds (which must be approved by the President) when submitting a proposal to the President for an agreement under this title. Such request for funds shall include a specific explanation of—

"(A) the program costs to be offset by such funds;

"(B) the reason why such funds are needed in carrying out the particular assistance program; and

"(C) the degree to which such funds will improve the provision of food assistance to foreign countries (particularly those in sub-Saharan Africa suffering from acute, long-term food shortages).

"(e) Upon the request of a private voluntary organization or cooperative, the President may provide assistance to that organization or cooperative with respect to the sale of agricultural commodities made available to it under this title.".

(e) AMENDMENT TO SECTION 208.—Section 208 (7 U.S.C. 1726b) is amended to read as follows:

"SEC. 208. ADMINISTRATION.

"(a) PROPOSALS.—

"(1) TIME FOR DECISION.—Not later than 45 days after the receipt by the President of a proposal submitted—

"(A) by a private voluntary organization or cooperative, with the concurrence of the appropriate United States field mission, for commodities; or

"(B) by a United States field mission to make commodities available to a private voluntary organization or cooperative;

under this title, decision shall be made concerning such proposal.

"(2) DENIALS.—If a proposal under paragraph (1) is denied, the response shall specify the reasons for the denial and the conditions that must be met for the proposal to be approved.

"(b) NOTICE AND COMMENT.—Not less than 30 days prior to the issuance of a final

guideline to carry out this title, the President—

"(1) shall provide notice of the proposed guideline (including notice of its availability for review and comment) to private voluntary organizations and cooperatives that participate in programs under this title and to other interested persons; and

"(2) shall make the proposed guideline available, on request, to such organizations, cooperatives, and other persons.

The President shall take any comments recieved into consideration prior to the issuance of the final guideline.

"(c) REGULATIONS, GUIDELINES, AND HANDBOOKS.—

"(1) IN GENERAL.—The President shall promptly issue all necessary regulations and make revisions to agency guidelines with respect to changes in the operation or implementation of programs established under this title.

"(2) REQUIREMENTS.—The President shall develop regulations with the intent of—

"(A) simplifying procedures for participation in the programs established under this title;

"(B) reducing paperwork requirements under such programs;

"(C) establishing reasonable and realistic accountability standards to be applied to eligible organizations participating in such program, taking into consideration the problems associated with carrying out programs in developing countries; and

"(D) providing flexibility for carrying out such programs.

"(3) HANDBOOKS.—Handbooks developed by the President to assist in carrying out programs under this title shall be designed to foster the development of programs under this title by eligible organizations.

"(d) DEADLINE FOR SUBMISSION OF COMMODITY ORDERS.—Not later than 15 days after receipt of a call forward from the United States field mission for agricultural commodities that meet the requirements of this title, the order for the purchase or the supply, from inventory, of such commodities shall be transmitted to the Commodity Credit Corporation.".

"(f) FOOD AID ADVISORY GROUP.—Title II is amended by adding at the end of the following new section:

"SEC. 209. FOOD AID ADVISORY GROUP.

"(a) ESTABLISHMENT.—The President shall establish a Food Aid Advisory Group to meet regularly and provide advice on the implementation of programs under this title.

"(b) MEMBERSHIP.—The Food Aid Advisory Group shall be composed of—

"(1) the Administrator of the agency for International Development;

"(2) the Inspector General of the Agency for International Development;

"(3) the Administrator of the Foreign Agricultural Service;

"(4) the Administrator of the Agricultural Stabilization and Conservation Service;

"(5) representatives of each private voluntary organization and cooperative participating in a program under this title or receiving planning assistance funds to establish programs under this title; and

"(6) representatives from African, Asian and Latin American indigenous nongovernmental organizations determined appropriate by the President.

"(c) CHAIRPERSON.—The Administrator of the Agency for International Development shall be the chairperson of the Food Aid Advisory Group.

"(d) CONSULTATIONS.—In preparing regulations, handbooks, or guidelines in implementation of this title, and in preparing any significant revisions of any such regulations, handbooks, or guidelines, the President—

"(1) shall provide such proposals to the Food Aid Advisory Group for review and comment, and

"(2) shall consult and, when appropriate, meet with the Group regarding such proposed regulations, handbooks, guidelines, or revisions thereto prior to their issuance.

"(e) TERMINATION.—The Food Aid Advisory Group shall terminate on December 31, 1995.".

"(g) SAFEGUARDING USUAL MARKETINGS.—Title II is further amended by adding at the end the following new section:

"SEC. 210. SAFEGUARDING USUAL MARKETINGS.

"In exercising the authorities conferred by this title, the President shall take reasonable precautions to safeguard usual marketings of the United States and to assure that agricultural commodities provided under this title will not unduly disrupt world prices of agricultural commodities or normal patterns of commercial trade with recipient countries.".

SEC. 1208. AMENDMENT TO TITLE III.

Title III (7 U.S.C. 1727-1727g) is amended to read as follows:

"TITLE III

"SEC. 301. FOOD FOR DEVELOPMENT.

"(a) GENERAL AUTHORITY.—To carry out the policies set forth in section 2, the President may negotiate and carry out agreements with least developed countries to provide commodities to such countries on a grant basis.

"(b) LEAST DEVELOPED COUNTRIES.—

"(1) DEFINITION.—As used in this section, the term 'least developed country' means a country that—

"(A) meets the poverty criteria established by the International Bank for Reconstruction and Development for Civil Works Preference for providing financial assistance, or

"(B) is a food deficit country and is characterized by high levels of malnutrition among significant numbers of its population.

"(2) INDICATORS OF FOOD DEFICIT COUNTRIES.—In determining whether a country is a least developed country under the criteria in paragraph (1)(B), the President should take into consideration whether that country meets all of the following indicators of national food deficit and malnutrition (using the best available information):

"(A) CALORIE CONSUMPTION.—The daily per capita calorie consumption of the country is less than 2,300 calories.

"(B) FOOD SECURITY REQUIREMENTS.—The country cannot meet its food security requirements through domestic production or imports due to a shortage of foreign exchange earnings.

"(C) CHILD MORTALITY RATE.—The mortality rate of children under five years of age in the country is in excess of 100 per 1,000 births.

"(c) PRIORITIES IN ALLOCATION OF ASSISTANCE.—In determining whether and to what extent agricultural commodities shall be made available to least developed countries under this section, the President shall give priority to countries that—

"(1) demonstrate the greatest need for food;

"(2) demonstrate the capacity to use food assistance effectively;

"(3) have demonstrated a commitment to policies to promote food security, including policies to reduce measurably hunger and malnutrition through efforts such as establishing and institutionalizing supplemental nutrition programs targeted to reach those who are nutritionally at risk; and

"(4) have a long term plan for broad-based, equitable, and sustainable development.

"(d) DIRECT USES OR SALES OF COMMODITIES.—Agricultural commodities provided to a least developed country under this section—

"(1) may be used in such country for—

"(A) direct feeding programs, including programs that include activities that deal directly with the special health needs of children and mothers consistent with section 104(c)(2) of the Foreign Assistance Act of 1961 (22 U.S.C. 2151b(c)(2); relating to the Child Survival Fund), or

"(B) the development of emergency food reserves; or

"(2) may be sold in such country by the government of the country or the President (or their designees) as provided in the agreement, with the proceeds of such sale used in accordance with subsection (f).

"(e) ACCOUNTING FOR LOCAL CURRENCY PROCEEDS.—

"(1) SEPARATE ACCOUNTS.—Except as provided in paragraph (2), all of the proceeds of sales of agricultural commodities pursuant to subsection (d)(2) shall be deposited into a separate account in the recipient country.

"(2) ACCOUNTING FOR LOCAL CURRENCIES TO BE USED FOR POLICY REFORM.—The President may waive the requirement of paragraph (1) with respect to local currency proceeds that are to be used to promote policy reforms pursuant to subsection (f)(1)(A) if the President determines that those currencies will otherwise be adequately accounted for in accordance with procedures approved by the President.

"(3) OWNERSHIP AND PROGRAMMING OF LOCAL CURRENCIES.—The proceeds of sales pursuant to subsection (d)(2) shall be the property of the recipient country or the United States, as specified in the applicable agreement. Such proceeds shall be utilized for the benefit of the recipient country, shall be jointly programmed by the President and the government of the recipient country, and shall be disbursed in such country in accordance with local currency agreements between the President and that government.

"(f) USE OF LOCAL CURRENCY PROCEEDS.—

"(1) IN GENERAL.—Except as provided in paragraph (5), the local currency proceeds of sales pursuant to subsection (d)(2) shall be used in the recipient country for specific economic development purposes, including—

"(A) the promotion of specific policy reforms to improve food security and agricultural development within the country and to promote broad-based, equitable, and sustainable development;

"(B) the establishment of development programs, projects, and activities that promote food security, alleviate hunger, improve nutrition, promote family planning, and promote maternal and child health care, oral rehydration therapy, and other child survival objectives consistent with section 104(c)(2) of the Foreign Assistance Act of 1961 (22 U.S.C. 2151b(c)(2); relating to the Child Survival Fund);

"(C) the promotion of increased access to food supplies through the encouragement of specific policies and programs designed to increase employment and incomes within the country;

"(D) the promotion of free and open markets through specific policies and programs;

"(E) support for United States private voluntary organizations and cooperatives and encouragement of the development and utilization of indigenous nongovernmental organizations;

"(F) the purchase of agricultural commodities (including transportation and processing costs) produced in the country—

"(i) to meet urgent or extraordinary relief requirements in the country or in neighboring countries, or

"(ii) to develop emergency food reserves;

"(G) the purchase of goods and services (other than agricultural commodities and related services) to meet urgent or extraordinary relief requirements;

"(H) the payment, to the extent practicable, of the costs of carrying out the program authorized in section 406;

"(I) private sector development activities designed to further the policies set forth in section 2, including loans to financial intermediaries for use in making loans to private individuals, cooperatives, corporations, or other entities;

"(J) activities of the Peace Corps that relate to agricultural production;

"(K) the development of rural infrastructure such as roads, irrigation systems, and electrification to enhance agricultural production;

"(L) research and malnutrition and its causes, as well as research relating to the identification and application of policies and strategies for targeting resources made available under this section to address the problem of malnutrition; and

"(M) support for research (including collaborative research which is mutually beneficial to the United States and the recipient country), education, and extension activities in agricultural sciences.

Section 1306 of title 31, United States Code, shall not apply to the use under this paragraph of local currency proceeds that are owned by the United States.

"(2) SUPPORT OF PRIVATE INDIGENOUS NONGOVERNMENTAL ORGANIZATIONS.—To the extent practicable, not less than 10 percent of the proceeds of sales in each country pursuant to subsection (d)(2) shall be used to support the development and utilization of indigenous nongovernmental organizations and cooperatives that are active in rural development, agricultural education, sustainable agricultural production, other measures to assist the poorest people, and environmental protection projects within such country.

"(3) CONSULTATION WITH FOREIGN AGRICULTURAL SERVICE OFFICERS.—The President shall ensure that members of the Foreign Agricultural Service, who are assigned to a country in which local currencies are to be used under this subsection, are consulted with respect to the uses of those currencies in that country.

"(4) INVESTMENT OF LOCAL CURRENCIES BY NONGOVERNMENTAL ORGANIZATIONS.—A nongovernmental organization may invest local currencies that accrue to that organization as a result of assistance under paragraph (1), and any interest earned on such investment may be used for the purpose for which the assistance was provided to that organization without further appropriation by the Congress.

"(5) SUPPORT FOR CERTAIN EDUCATIONAL INSTITUTIONS.—If the President determines that local currencies deposited in a special account pursuant to subsection (e)(1) are not needed for any of the activities described in subparagraphs (A) through (M) of paragraph (1) of this subsection or for any other specific economic development purpose in the recipient country, the President may use those currencies to provide support for any institution (other than an institution whose primary purpose is to provide religious education) located in the recipient country that provides education in agricultural sciences or other disciplines for a significant number of United States nationals (who may include members of the United States Armed Forces or the Foreign Service or dependents of such members).

"(g) GENERAL REQUIREMENTS.—In exercising the authorities conferred by this title, the President shall—

"(1) take reasonable precautions to safeguard usual marketings of the United States and to assure that agricultural commodities provided under this title will not unduly disrupt world prices of agricultural commodities or normal patterns of commercial trade with recipient countries;

"(2) give consideration to the development and expansion of markets for United States agricultural commodities and local foodstuffs by increasing the effective demand for agricultural commodities through the support of measures to stimulate equitable economic growth in recipient countries, with appropriate emphasis on developing more adequate storage, handling, and food distribution facilities;

"(3) obtain commitments from recipient countries that will prevent resale or transshipment to other countries, or use for other than domestic purposes, of agricultural commodities provided under this title, without specific approval of the President;

"(4) obtain commitments from recipient countries to publicize widely to their people, by public media and other means, that the commodities are being provided on a grant basis through the friendship of the American people as food for peace;

"(5) take maximum precautions to assure that donations under this title shall not displace any sales of United States agricultural commodities that would otherwise be made; and

"(6) take steps to assure that the United States obtains a fair share of any increase in commercial purchases of agricultural commodities by the recipient country and that commercial supplies are available to meet demands developed through programs carried out under this Act.".

SEC. 1209. AMENDMENTS TO TITLE IV.

(a) AMENDMENTS TO SECTION 401.—

(1) AVAILABILITY DETERMINATIONS.—Section 401 (7 U.S.C. 1731) is amended in subsection (a)—

(A) by inserting ", prior to the beginning of each fiscal year" after "Secretary of Agriculture shall";

(B) by striking ", and the commodities and quantities thereof which may be included in the negotiations with each country"; and

(C) by inserting after the first sentence the following: "The Secretary may, during the fiscal year, modify such determination if the Secretary provides to the Congress prior notice of that modification (including a statement of the reasons for the modification).".

(2) TIMING OF SHIPMENT OF COMMODITIES.—Section 401(b) is amended by adding at the end the following: "In evaluating the timing of shipments of agricultural commodities to be provided under this Act, the President shall consider the time of harvest of any competing commodities in the recipient country.".

(3) STABLE LEVEL OF COMMODITIES.—Section 401 is amended by adding at the end the following:

"(c) STABLE LEVEL OF COMMODITIES.—In implementing this Act, the Secretary shall, to the extent practicable, seek to maintain a stable level of available agricultural commodities under this Act of the kind and type needed to provide assistance to developing countries and seek to make such commodities available to the degree necessary to fulfill multiyear agreements under this Act.".

(b) AMENDMENTS TO SECTION 402.—Section 402 (7 U.S.C. 1732) is amended—

(1) by inserting "(a) AGRICULTURAL COMMODITIES.—" before "The term" in the first sentence;

(2) by inserting "and title III" after "title II" in the proviso;

(3) by inserting before the last sentence the following: "For purposes of title II, a product of agricultural commodities shall not be considered to be produced in the United States if it contains any ingredient that is not produced in the United States if that ingredient is produced and is commercially available in the United States."; and

(4) by striking the last sentence; and

(5) by adding at the end the following:

"(b) ADMINISTRATOR.—The term 'Administrator' as used in this Act means the Administrator of the Agency for International Development, unless otherwise specified in this Act.

"(c) COOPERATIVE.—The term 'cooperative' as used in this Act means a private sector organization whose members own and control the organization and share in its services and its profits and that provides business services and outreach in cooperative development for its membership.

"(d) FOOD SECURITY.—The term 'food security' as used in this Act means access by all people at all times to sufficient food and nutrition for a healthy and productive life.

"(e) INDIGENOUS NONGOVERNMENTAL ORGANIZATION.—The term 'indigenous nongovernmental organization as used in this Act means a foreign organization working at the local level to solve development problems in the foreign country in which it is located, except that the term does not include an organization that is primarily an agent or instrumentality of the foreign government.

"(f) PRIVATE VOLUNTARY ORGANIZATION.—The term "private voluntary organization" means a not-for-profit, nongovernmental organization (in the case of a United States organization, an organization that is exempt from Federal income taxes under section 501(c)(3) of the Internal Revenue Code of 1986) that receives funds from private sources, that receives voluntary contributions of money, staff time, or in-kind support from the public, and that is engaged in or is planning to engage in voluntary, charitable, or development assistance activities (other than religious activities).

"(g) SECRETARY.—The term 'Secretary' as used in this Act means the Secretary of Agriculture, unless otherwise specified in this Act.".

(c) AMENDMENTS TO SECTION 403.—Section 403 (7 U.S.C. 1733) is amended—

(1) in subsection (a) by striking ", to the extent the Commodity Credit Corporation is not reimbursed under section 104(j) and 105,";

(2) in subsection (c) by inserting "(other than subsection (d) of this section)" after "this Act"; and

(3) by adding at the end the following:

"(d) ALLOCATION OF FUNDS BETWEEN TITLE I PROGRAM AND TITLE III PROGRAM.—For any fiscal year—

"(1) the amount of funds made available to carry out title I may not be greater than twice the amount made available to carry out title III, and

"(2) the amount of funds made available to carry out title III may not be greater than twice the amount made available to carry out title I,

taking into account amounts transferred between titles of this Act.".

(d) COORDINATION WITH DEVELOPMENT ASSISTANCE STRATEGY.—Section 104 of that Act (7 U.S.C. 1734) is amended by adding at the end the following:

"(c) To the maximum extent possible, assistance for a foreign country under this Act shall be coordinated and integrated with United States development assistance objectives and programs for that country and with the overall development strategy of that country. Special emphasis should be placed on, and funds devoted to, activities that will increase the nutritional impact of programs of assistance under this Act, and child survival programs and projects, in least developed countries by improving the design and implementation of such programs and projects.".

(e) FARMER-TO-FARMER PROGRAM.—Section 406 (7 U.S.C. 1736) is amended to read as follows:

"SEC. 406. FARMER-TO-FARMER PROGRAM.

"(a) IN GENERAL.—To further assist developing countries, middle-income countries, and emerging democracies to increase farm production and farmer incomes, the President may, notwithstanding any other provision of law—

"(1) establish and administer a program of farmer-to-farmer assistance between the United States and such countries to assist in increasing food production and distribution and improving the effectiveness of the farming and marketing operations of farmers;

"(2) utilize United States farmers, agriculturalists, land grant universities, private agribusinesses, and nonprofit farm organizations to work in conjunction with farmers and farm organizations in such countries, on a voluntary basis, to facilitate the improvement of farm and agribusiness operations and agricultural systems in such countries, including animal care and health, field crop cultivation, fruit and vegetable growing, livestock operations, food processing and packaging, farm credit, marketing, inputs, agricultural extension, and the strengthening of cooperatives and other farmer groups;

"(3) transfer the knowledge and expertise of United States agricultural producers and businesses, on a people-to-people basis, to such countries while enhancing the democratic process by supporting private and public, agriculturally related organizations that request and support technical assistance activities through cash and in-kind services;

"(4) to the extent practicable, enter into contracts or other cooperative agreements with or make grants to private voluntary organizations, cooperatives, land grant universities, private agribusiness, or nonprofit farm organizations to carry out this section (except that any such contract or other agreement may obligate the United States to make outlays only to the extent that the budget authority for such outlays is available pursuant to subsection (c) or has otherwise been provided in advance in appropriation Acts);

"(5) coordinate programs established under this section with other foreign assistance activities carried out by the United States; and

"(6) to the extent practicable, augment the funds available for programs established under this section through the use of foreign currencies that accrue from the sale of agricultural commodities under this Act, and local currencies generated from other types of foreign assistance activities.

"(b) DEFINITIONS.—The following definitions apply for purposes of this section:

"(1) DEVELOPING COUNTRY.—The term 'developing country' means a country that has a shortage of foreign exchange earnings and has difficulty meeting all of its food needs through commercial channels.

"(2) EMERGING DEMOCRACY.—The term 'emerging democracy' means a country that is taking steps toward—

"(A) political pluralism, based on progress toward free and fair elections and a multiparty political system;

"(B) economic reform, based on progress toward a market-oriented economy;

"(C) respect for internationally recognized human rights; and

"(D) a willingness to build a friendly relationship with the United States.

"(3) MIDDLE INCOME COUNTRY.—The term 'middle income country' means a country that has developed economically to the point where it does not quality for bilateral development assistance from the United States because its per capita income level exceeds the eligibility requirements of such assistance programs.

"(c) MINIMUM FUNDING.—Notwithstanding any other provisions of law, not less than 0.2 percent of the amounts made available for each of the fiscal years 1991 through 1995 to carry out this Act, in addition to any funds that may be specifically appropriated to carry out this section, shall be used to carry out programs under this section, with not less than 0.1 percent to be used for programs in developing countries.".

(f) REPEAL OF SECTION 407; ADMINISTRATIVE PROVISIONS.—Section 407 (7 U.S.C. 1736a) is amended to read as follows:

"SEC. 407. ADMINISTRATIVE PROVISIONS.

"(a) AVOIDANCE OF CONFLICT OF INTEREST.—A person may not be an agent, broker, consultant, or other representative of the United States Government, an importer, or an importing country in connection with agricultural commodities provided under this Act during a fiscal year in which such person acts as an agent, broker, consultant, or other representative of a person engaged in providing ocean transportation or transportation-related services for such commodities. For the purposes of this subsection, the term 'transportation-related services' means lightening, stevedoring, bagging, or inland transportation to the destination point.

"(b) FULL AND OPEN COMPETITION.—No purchase of agricultural commodities from private stocks or purchase of ocean transportation services shall be financed under this Act unless such purchases are made on the basis of full and open competition utilizing such procedures as are determined necessary and appropriate by the President.

"(c) LIMITATION ON COMMISSIONS.—No commission, fees, or other payments to an agent, broker, consultant, or other representative of the importer or importing country for ocean transportation brokerage services in connection with the carriage of commodities provided under this Act may be paid in excess of an amount determined appropriate by the President.".

(g) AMENDMENTS TO SECTION 408.—

(1) ANNUAL REPORT.—Section 408 (7 U.S.C. 1736b) is amended by amending subsection (a) to read as follows:

"(a) ANNUAL REPORTS.—

"(1) IN GENERAL.—The President shall prepare an annual report concerning the programs and activities implemented under this Act for the preceding fiscal year.

"(2) CONTENTS.—Each report shall include—

"(A) the levels and recipients of food and other assistance provided under this Act;

"(B) the countries in which projects or activities are implemented under this Act;

"(C) a general description of the projects or activities implemented under this Act; and

"(D) a statement of the amount of each agricultural commodity made available pursuant to section 416(b) of the Agricultural Act of 1949 and the Food for Progress Act of 1985.

"(3) SUBMISSION.—The President shall submit such report no later than January 15 of each year to the Committee on Agriculture and the Committee on Foreign Affairs of the House of Representatives and the Committee on Agriculture, Nutrition and Forestry of the Senate.".

(2) OTHER REPORTS.—Section 408 is further amended by redesignating subsections (d) and (e) as subsections (h) and (i), respectively, and by inserting the following new subsections after subsection (c):

"(d) QUARTERLY REPORT OF ANTICIPATED AGREEMENTS.—Prior to each quarter of a fiscal year, the President shall submit to the Committee on Agriculture and the Committee on Foreign Affairs of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate a list of the agreements that the President anticipates will be entered into under this Act with respect to each foreign country during the remainder of that fiscal year.

"(e) CURRENT YEAR REPORTS.—The President shall submit a statement to Congress not later than June 1 of each fiscal year specifying the agreements signed under this Act for that fiscal year. Such statement shall also specify for each country with which there is an agreement under this Act for that fiscal year, the amount that country requested and is receiving under the Food and Progress Act of 1985, section 416(b) of the Agricultural Act of 1949, title I of this Act, title II of this Act, and title III of this Act. With respect to title II, the statement shall indicate for each country—

"(1) the quantity provided through the World Food Program, private voluntary organizations, or cooperatives (identified by name), or government-to-government agreements;

"(2) the type and quantity of each commodity provided; and

"(3) the quantity provided for each program category.

"(f) TITLE II FOREIGN CURRENCY PROCEED REPORTS.—The President shall, no later than the end of the fiscal year, submit a statement to Congress on the number of requests submitted and the number of requests approved under section 207 for that fiscal year for the generation of foreign currency proceeds, the amount of foreign currency proceeds generated, and a summary of the uses of such proceeds.

"(g) WORLD FOOD DAY REPORT.—On World Food Day, October 16 of each year, the President shall submit to the Congress a

report, prepared with the assistance of the Secretary and the Administrator, assessing progress towards food security in each country receiving United States Government food assistance. Special emphasis should be given in such report to the nutritional status of the poorest populations in such countries.".

(h) AMENDMENT TO SECTION 409.—Section 409 (7 U.S.C. 1736c) is amended by striking "to finance sales under title I and no program of assistance under title II" and inserting "Under this Act".

(i) REPEAL OF SECTION 411.—Section 411 (7 U.S.C. 1736e) is repealed.

(j) MULTIYEAR AVAILABILITY.—Section 413 (7 U.S.C. 1736g) is amended to read as follows:

"SEC. 413. MULTIYEAR AGREEMENTS.

"Agricultural commodities provided under this Act shall be made available on a multiyear basis, subject to the requirements of section 401 and the availability of appropriations, unless—

"(1) the past performance of the country in meeting program objectives does not warrant a multiyear agreement;

"(2) it is anticipated that the need of the country for assistance does not extend beyond one year; or

"(3) other circumstances, as determined by the President, indicate there is only a need for a one-year agreement.".

(k) DISTRIBUTION OF ASSISTANCE.—Title IV is further amended by adding at the end the following:

"SEC. 414. DISTRIBUTION OF ASSISTANCE.

"(a) NONDISCRIMINATORY DISTRIBUTION.—The President shall attempt to ensure that agricultural commodities made available under title II and title III are distributed within the recipient country in a manner that does not discriminate on the basis of political affiliation, geographic location, ethnic, tribal, or religious identity, or other extraneous factors.

"(b) MILITARY DISTRIBUTION.—

"(1) PROHIBITION.—Except as provided in paragraph (2), the President shall not enter into any agreement to provide agricultural commodities under title II or title III that provides for the distribution, handling, or allocation of such commodities by the military forces of any government or insurgent group.

"(2) EXCEPTION.—Notwithstanding paragraph (1), the President may authorize the handling or distribution of agricultural commodities by a country's military forces in exceptional circumstances in which—

"(A) nonmilitary channels are not available,

"(B) such action is consistent with subsection (a), and

"(C) the President determines that such action is necessary to meet the emergency health, safety, or nutritional requirements of the recipient population.

"(3) REPORTS TO CONGRESS.—The President shall report any authorization under paragraph (2) to the Congress within 30 days. Any such report shall specify the reason for the authorization, including an explanation of why no alternatives were available to the handling or distribution by the country's military forces.

"(c) SAFE PASSAGE.—When entering into agreements under title II and title III which involve areas experiencing protracted warfare or civil strife, the President shall, to the extent practicable, encourage—

"(1) all parties to the conflict to permit safe passage for the commodities and other relief supplies; and

"(2) the creation of safe zones for medical and humanitarian treatment and evacuation.".

(l) LIMITATION ON USE OF LOCAL CURRENCY FOR AGRICULTURAL PRODUCTION.—Title IV is further amended by adding at the end the following:

"SEC. 415. LIMITATION ON USE OF LOCAL CURRENCY FOR AGRICULTURAL PRODUCTION.

"Local currencies that are made available for use under this Act may not be used to finance the production for export of agricultural commodities (or products thereof) that would compete, and determined by the President, in world markets with similar agricultural commodities (or products thereof) produced in the United States is such competition would cause substantial injury to United States producers, except that this section does not prohibit the use of such currencies for crop substitution or other alternative development activities undertaken in furtherance of narcotics control objectives.".

(m) LIMITATION ON USE OF LOCAL CURRENCY FOR ABORTIONS.—Title IV is further amended by adding at the end the following:

"SEC. 416. LIMITATION ON USE OF LOCAL CURRENCY FOR ABORTIONS.

"Local currencies that are made available for use under under this Act may not be used to pay for the performance of abortions as a method of family planning or to motivate or coerce any person to practice abortions.".

(n) RESPONSIBILITIES FOR ADMINISTERING ACT.—

(1) ALLOCATIONS OF RESPONSIBILITIES.—Title IV is further amended by adding at the end the following:

"SEC. 417. RESPONSIBILITIES FOR ADMINISTERING ACT.

"(a) DESIGNATION OF AGENCY PRIMARILY RESPONSIBLE FOR IMPLEMENTATION OF PRESIDENTIAL AUTHORITY.—

"(1) TITLE I PROGRAM.—The President shall designate the Secretary as the official with primary responsibility for administering the authority granted to the President by title I, except that the requirements of this paragraph does not apply with respect to sections 105 and 105A or (to the extent they apply to title III) sections 109 and 112.

"(2) TITLE II AND TITLE III PROGRAMS.—(A) The President shall designate the Administrator as the official with primary responsibility for administering the authority granted to the President by title II and title III and (to the extent they apply to title III) sections 109 and 112.

"(b) COOPERATION BETWEEN AGENCIES.—

"(1) USDA.—The Secretary shall be responsible for ensuring that the Department of Agriculture, in carrying out its responsibility under title I, cooperates fully with the Agency for International Development with respect to the latter's areas of expertise.

"(2) AID.—The Administrator shall be responsibile for ensuring that the Agency for International Development, in carring out its responsibilities under title II and title III, cooperates fully with the Department of Agriculture with respect to the latter's areas of expertise.

"(c) REVIEW OF PROPOSED AGREEMENTS.—

"(1) TITLE I PROGRAMS.—Before negotiating an agreement (or an amendment to an agreement) under tile I, the Secretary shall consult with the Administrator to ensure that the proposed agreement will not be inconsistent with United States development assistance objectives and programs for the recipient country and with the overall development strategy of that country.

"(2) TITLE II AND TITLE III PROGRAMS.—Before negotiating an agreement (or an amendment to an agreement) under title II or title III, the Administrator shall submit to the Secretary the proposal which is the basis for those negotiations. The Secretary shall have up to 30 days in which to review the proposed agreement (or amendment) with regard to matters in the areas of the Secretary's expertise and to provide the Secretary's views on the proposed agreement (or amendment to the Administrator. The Administrator may waive the requirement of this paragraph with respect to an agreement (or amendment to an agreement) under title II if the Administrator determines, after consultation with the Secretary, that an emergency exists that requires such waiver.

"(d) CONSULTATION WITH SECRETARY OF STATE.—

"(1) TITLE I PROGRAMS.—The Secretary shall consult with the Secretary of State to ensure that agreements under title I are not inconsistent with United States foreign policy.

"(2) TITLE II AND TITLE III PROGRAMS.— The Administrator shall consult with the Secretary of State to ensure that agreements under title II and III are not inconsistent with United States foreign policy.

"(e) SAFEGUARDING USUAL MARKETING.—Prior to the beginning of each fiscal year, the Secretary shall determine, for each foreign country that is an anticipated recipient of agricultural commodities under this Act during that fiscal year, the maximum quantities of agricultural commodities that can be made available during that fiscal year under this Act consistent with the requirements of section 103(l), section 210, and section 301(g)(l). During the fiscal year, the Secretary may increase such maximum quantity with respect to a country because of changed circumstances and may determine such maximum quantities with respect to additional countries.

"(e) ACQUISITION OF COMMODITIES FOR TITLE II AND TITLE III PROGRAMS.—

"(1) USE OF COMMODITY CREDIT CORPORATION.—Subject to the approval of the Secretary, the Commodity Credit Corporation shall acquire and make available to the Administrator such agricultural commodities (that have been determined to be available under section 401(a)) as the Administrator may request to carry out agreements under title II and title III.

"(2) DIRECT ACQUISITION.—If the Administrator is unable to obtain agricultural commodities through the Commodity Credit Corporation pursuant to paragraph (1), the Administrator may use funds made available to carry out title II or title III (as the case may be) for the acquisition of agricultural commodities (that have been determined to be available under section 401(a)) for use in carrying out agreements under that title.".

(2) CONFORMING AMENDMENT.—Section 201(a) (7 US.C. 1721(a)) is amended by striking the last sentence.

SEC. 1210. FOOD FOR PEACE OFFICERS.

The Administrator of the Agency for International Development shall increase the number and the expertise of the personnel of the Agency for International Development at the agency's headquarters and its missions abroad who carry out the program authorized by title II and title III of the Ag-

ricultural Trade Development and Assistance Act of 1954.

SEC. 1211. REVISION OF REGULATIONS.

(a) IN GENERAL.—The President shall provide for the issuance of regulations to revise the existing regulations to implement the Agricultural Trade Development and Assistance Act of 1954, including all provisions necessary or appropriate to implement the amendments made by this subtitle.

(b) DEADLINES.—The regulations specified in subsection (a) shall be issued in proposed form no later than 6 months after the date of enactment of this Act and in final form no later than one year after the date of enactment of this Act.

SEC. 1212. INDEPENDENT EVALUATION OF PUBLIC LAW 480 PROGRAMS.

(a) REQUIREMENT FOR PERIODIC GAO EVALUATIONS.—Not later than 2 years after the date of enactment of this Act and 2 years thereafter, the Comptroller General of the United States shall evaluate the assistance provided under the Agricultural Trade Development and Assistance Act of 1954 as follows:

(1) SELECTION OF COUNTRIES.—The Comptroller General shall select—

(A) 5 countries that receive assistance under title I,

(B) 5 countries that receive assistance under title II, and

(C) 5 countries that receive assistance under title III.

The countries selected shall be countries that are representative of the countries that receive such assistance in each of the three following regions: Africa, Asia/Near East, and Latin America.

(2) TITLE I PROGRAM EVALUATIONS.—For each country selected under paragraph (1)(A), the Comptroller General shall evaluate the uses of the local currencies deposited in a special account pursuant to section 104 with respect to—

(A) their impact on agricultural trade development, and

(B) the financial management of those currencies, including the personnel requirements for managing those currencies.

(3) TITLE II PROGRAM EVALUATIONS.—For each country selected under paragraph (1)(B), the Comptroller General shall evaluate the uses of the assistance provided under that title, including an evaluation of—

(A) the impact of such assistance on enhancing food security (including nutrition),

(B) the uses for economic development of any local currencies proceeds generated by such assistance, and

(C) the financial management of those local currencies, including the personnel requirements for managing those currencies.

(4) TITLE III PROGRAM EVALUATIONS.—For each country selected under paragraph (1)(C), the Comptroller General shall evaluate—

(A) the use of the agricultural commodities provided under section 301(d)(1) with respect to their impact on enhancing food security (including nutrition); and

(B) the use of local currencies pursuant to section 301(f) with respect to—

(i) their impact on enhancing food security (including nutrition), and

(ii) the financial management of those currencies, including the personnel requirements for managing those currencies.

(b) REPORTS TO CONGRESS.—The Comptroller General shall submit a report on each evaluation conducted pursuant to subsection (a) to the Committee on Foreign Affairs and the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate.

SEC. 1213. AMENDMENT TO SECTION 416(b) OF 1949 ACT.

Section 416(b) of the Agricultural Act of 1949 (7 U.S.C. 1431(b)) is amended by adding at the end the following:

"(13) A person may not be an agent, broker, consultant, or other representative of the United States Government, an importer, or an importing country in connection with agricultural commodities provided under this subsection during a fiscal year in which such person acts as an agent, broker, consultant, or other representative of a person engaged in providing ocean transportation or transporation-related services for such commodities. For the purposes of this paragraph, the term 'transportation-related services' means lightening, stevedoring, bagging, or inland transportation to the destination point.

"(14) No purchase of agricultural commodities from private stocks or purchase of ocean transportation services shall be financed under this subsection unless such purchases are made on the basis of full and open competition utilizing such procedures as are determined necessary and appropriate by the President.

"(15) No commission, fees, or other payments to an agent, broker, consultant, or other representative of the importer or importing country for ocean transportation brokerage services in connection with the carriage of commodities provided under this subsection may be paid in excess of an amount determined appropriate by the President.

"(16) The President shall attempt to ensure that agricultural commodities made available under this subsection are distributed within the recipient country in a manner that does not discriminate on the basis of political affiliation, geographic location, ethnic, tribal, or religious identity, or other extraneous factors.

"(17)(A) Except as provided in subparagraph (B), the President shall not enter into any agreement to provide agricultural commodities under this subsection that provides for the distribution, handling, or allocation of such commodities by the military forces of any government or insurgent group.

"(B) Notwithstanding subparagraph (A), the President may authorize the handling or distribution of agricultural commodities by a country's military forces in exceptional circumstances in which—

"(i) nonmilitary channels are not available,

"(ii) such action is consistent with paragraph (16), and

"(iii) the President determines that such action is necessary to meet the emergency health, safety, or nutritional requirements of the recipient population.

"(C) The President shall report any authorization under subparagraph (B) to the Congress within 30 days. Any such report shall specify the reason for the authorization, including an explanation of why no alternatives were available to the handling or distribution by the country's military forces.

"(18) When entering into agreements under this subsection which involve areas experiencing protracted warfare or civil strife, the President shall, to the extent practicable, encourage—

"(A) all parties to the conflict to permit safe passage for the commodities and other relief supplies; and

"(B) the creation of safe zones for medical and humanitarian treatment and evacuation.".

SEC. 1214. FOOD FOR PROGRESS.

The Food for Progress Act of 1985 (7 U.S.C. 1736o) is amended—

(1) in subsection (b)—

(A) by striking "countries that" and inserting "developing countries, and countries that are emerging democracies, that", and

(B) by striking "developing countries" and inserting "the governments of such countries, or with private voluntary organizations, nonprofit agricultural organizations, or cooperatives,";

(2) in subsection (d) by striking "with countries";

(3) in subsection (e)(3)—

(A) by striking "to a developing country", and

(B) by striking "by a developing country";

(4) in subsection (e)(4) by striking "to a developing country" both places it appears;

(5) in subsection (f)(1) by striking "to developing countries";

(6) in subsection (g) by striking "1990" and inserting "1995";

(7) in subsection (j) by striking "entered into with a country", and by inserting "with respect to a country" after "effect ";

(8) in subsection (k) by striking "recipient countries" and inserting "the recipient ";

(9) in subsection (l) by striking "1990" and inserting "1995 "; and

(10) by adding at the end the following:

"(m) A person may not be an agent, broker, consultant, or other representative of the United States Government, an importer, or an importing country in connection with agricultural commodities provided under this section during a fiscal year in which such person acts as an agent, broker, consultant, or other representative of a person engaged in providing ocean transportation or transportation-related services for such commodities. For the purposes of this subsection, the term 'transportation-related services' means lightening, stevedoring, bagging, or inland transportation to the destination point.

"(n) No purchase of agricultural commodities from private stocks or purchase of ocean transportation services shall be financed under this section unless such purchases are made on the basis of full and open competition utilizing such procedures as are determined necessary and appropriate by the President.

"(o) No commission, fees, or other payments to an agent, broker, consultant, or other representative of the importer or importing country for ocean transportation brokerage services in connection with the carriage of commodities provided under this section may be paid in excess of an amount determined appropriate by the President.

"(p) The President shall attempt to ensure that agricultural commodities made available on a grant basis under this section are distributed within the recipient country in a manner that does not discriminate on the basis of political affiliation, geographic location, ethnic, tribal, or religious identity, or other extraneous factors.

"(r)(1) Except as provided in paragraph (2), the President shall not enter into any agreement to provide agricultural commodities on a grant basis under this subsection that provides for the distribution, handling, or allocation of such commodities by the military forces of any government or insurgent group.

"(2) Notwithstanding paragraph (1), the President may authorize the handling or distribution of agricultural commodities by a country's military forces in exceptional circumstances in which—

"(A) nonmilitary channels are not available,

"(B) such action is consistent with subsection (p), and

"(C) the President determines that such action is necessary to meet the emergency health, safety, or nutritional requirements of the recipient population.

"(3) The President shall report any authorization under paragraph (2) to the Congress within 30 days. Any such report shall specify the reason for the authorization, including an explanation of why no alternatives were available to the handling or distribution by the country's military forces.

"(s) When entering into grant agreements under this section which involve areas experiencing protracted warfare or civil strife, the President shall, to the extent practicable, encourage—

"(1) all parties to the conflict to permit safe passage for the commodities and other relief supplies; and

"(2) the creation of safe zones for medical and humanitarian treatment and evacuation.

"(u) As used in this section—

"(1) the term 'cooperative' means a private sector organization whose members own and control the organization and share in its services and its profits and that provides business services and outreach in cooperative development for its membership;

"(2) the term 'emerging democracy' means a country that is taking steps toward—

"(A) political pluralism, based on progress toward free and fair elections and a multiparty political system;

"(B) economic reform, based on progress toward a market-oriented economy;

"(C) respect for internationally recognized human rights; and

"(D) a willingness to build a friendly relationship with the United States.

"(3) the term 'nonprofit agricultural organization' means a not-for-profit farm association of agribusiness, a not-for-profit farm association, a not-for-profit cooperator organization, or a similar not-for-profit organization; and

"(4) the term 'private voluntary organization' means a not-for-profit, nongovernmental organization (in the case of a United States organization, an organization that is exempt from Federal income taxes under section 501(c)(3) of the Internal Revenue Code of 1986) that receives funds from private sources, that receives voluntary contributions of money, staff time, or in-kind support from the public, and that is engaged in or is planning to engage in voluntary, charitable, or development assistance activities (other than religious activities).".

SEC. 1215. EXTENSION OF FOOD SECURITY WHEAT RESERVE.

Section 302(i) of the Food Security Wheat Reserve Act of 1980 (7 U.S.C. 1736f-1(i)) is amended by striking out "1990" both places it appears and inserting "1995".

Subtitle B—Export Promotion

SEC. 1221. AMENDMENT TO THE AGRICULTURAL TRADE ACT OF 1978.

(a) GENERAL PROVISIONS.—Titles I through IV of the Agricultural Trade Act of 1978 (7 U.S.C. 1761 et seq.) are amended to read as follows:

"TITLE I—GENERAL PROVISIONS

"SEC. 101. DEFINITIONS.

"As used in this Act—

"(1) AGRICULTURAL COMMODITY.—The term 'agricultural commodity' means any agricultural commodity, food, feed, or fiber, and any product thereof.

"(2) DEVELOPING COUNTRY.—The term 'developing country' means a country that—

"(A) has a shortage of foreign exchange earnings and has difficulty accessing sufficient commercial credit to meet all of its food needs, as determined by the Secretary; and

"(B) has the potential to become a commercial market for agricultural commodities.

"(3) SECRETARY.—The term 'Secretary' means the Secretary of Agriculture.

"(4) UNFAIR TRADE PRACTICE.—(A) Subject to subparagraph (B), the term 'unfair trade practice' means any act, policy, or practice of a foreign country that—

"(i) violates, or is inconsistent with, the provisions of, or otherwise denies benefits to the United States under, any trade agreement to which the United States is a party; or

"(ii) is unjustifiable, unreasonable, or discriminatory and burdens or restricts United States commerce.

"(B) Nothing in this Act may be construed to authorize the Secretary to make any determination regarding an unfair trade practice that is inconsistent with section 301 of the Trade Act of 1974.

"(5) UNITED STATES.—The term 'United States' includes each of the States, the District of Columbia, Puerto Rico, and the territories and possessions of the United States.

"(6) UNITED STATES AGRICULTURAL COMMODITY.—The term 'United States agricultural commodity' means—

"(A) with respect to any agricultural commodity other than a product of an agricultural commodity, an agricultural commodity entirely produced in the United States; and

"(B) with respect to a product of an agricultural commodity—

"(i) a product all of the agricultural components of which are entirely produced in the United States; or

"(ii) any other product the Secretary may designate that contains any agricultural component that is not entirely produced in the United States if—

"(I) such component is an added, de minimis component,

"(II) such component is not commercially produced in the United States, and

"(III) there is no acceptable substitute for such component that is entirely produced in the United States.

For purposes of this paragraph, fish entirely produced in the United States include fish harvested by a documented fishing vessel as defined in title 46, United States code, in waters that are not waters (including the territorial sea) of a foreign country.

"SEC. 102. CERTIFICATION OF COMPLIANCE.

"The Secretary shall obtain certification with respect to commodities provided, or for which financing or credit guarantees are provided, under any commercial export promotion program of the Department of Agriculture or Commodity Credit Corporation—

"(1) from countries, or importers in countries, that were the intended destination of agricultural commodities under such program, that such commodities were received in that country; and

"(2) from the seller or exporter of record of such commodities, that there were no corrupt bonuses, extra sales services, or other items than those so provided, financed, or guaranteed in connection with the transaction, and that the transaction complied with applicable United States law.

"SEC. 103. DEPARTMENTAL ADMINISTRATION SYSTEM.

"(a) IN GENERAL.—With respect to each commercial export promotion program of the Department of Agriculture or the Commodity Credit Corporation, the Secretary shall—

"(1) specify by regulation the criteria used to evaluate and approve proposals for that program;

"(2) monitor the progress of each proposal, specifying in a central system—

"(A) the origin of the proposal;

"(B) arguments supporting the proposal;

"(C) arguments against the proposal;

"(D) recommended action at the various stages of consideration; and

"(E) the disposition of the proposal;

"(3) provide for regular audits of program transactions to determine compliance with program objectives and requirements; and

"(4) in the event any audit discloses noncompliance with program objectives or requirements, determine promptly whether in light of such noncompliance to suspend or debar the noncomplying party from further participation in 1 or more of the programs under this title, affording the alleged noncomplying party opportunity for an agency hearing.

"(b) ACCESSIBILITY OF INFORMATION.—Information pertaining to a particular proposal shall be retrievable within the central system by country, commodity, proposal, and other appropriate categories, including participating financing institutions.

"(c) INDEPENDENT STUDY OF WAYS TO IMPROVE IMPLEMENTATION OF SYSTEM AND IMPROVE MANAGEMENT.—The Secretary shall contract with an appropriate management consulting firm to obtain from that firm detailed recommendations on how to improve the implementation of this section and, generally, the mangement information systems of the Department of Agriculture and the Commodity Credit Corporation with respect to the commercial export promotion programs of such department and agency.

"SEC. 104. POLICY.

"The Congress finds that the agricultural export policy of the United States should provide for increased emphasis on sales abroad of United States processed, value-added agricultural products due to the multiple benefits from such sales to United States producers, processors, and exporters, and the national workforce.

"SEC 105. DEVELOPMENT OF AGRICULTURAL TRADE STRATEGY.

"(a) IN GENERAL.—

"(1) DEVELOPMENT OF MULTIYEAR STRATEGY.—The Secretary shall develop, for the 3-fiscal year period beginning with fiscal year 1992, and for each 3-fiscal year period occurring thereafter, a long-term agricultural trade strategy for the United States to guide the Secretary in the implementation of United States Government programs designed to promote the export of United States agricultural commodities. In preparing such a strategy, the Secretary shall consult with the United States Trade Representative to ensure that the strategy is coordinated with the annual national trade policy agenda under section 163 of the Trade Act of 1974.

"(2) GOALS.—The long-term agricultural trade strategy established under paragraph (1) shall be designed to ensure—

"(A) the efficient, coordinated use of United States Government programs designed to promote the export of United States agricultural commodities;

"(B) the improvement in the commercial potential of markets in developing countries for United States agricultural commodities;

"(C) the growth of exports of United States agricultural commodities; and

"(D) the maintenance of traditional markets for United States agricultural commodities.

"(b) CONTENTS.—In the long-term agricultural trade strategy developed under subsection (a), the Secretary shall include—

"(1) findings with respect to trends in the comparative position of the United States and other countries in the export of agricultural commodities, organized by major commodity groups and including a comparative analysis of the cost of production of such commodities;

"(2) the agricultural trade goals for all agricultural commodities, expressed in both physical volume and monetary value, over not less than the 3-year period for which the strategy is developed;

"(3) the agricultural trade goals for each agricultural commodity, expressed in both physical volume and monetary value, over not less than such 3-year period;

"(4) the agricultural trade goals for high-value, processed agricultural commodities, expressed in both physical volume and monetary value, over not less than such 3-year period;

"(5) multiyear plans for the implementation and coordination of United States export assistance programs and foreign food assistance programs to meet all such agricultural trade goals;

"(6) findings and recommendations with respect to the movement of United States agricultural commodities in nonmarket economies;

"(7) recommended long-term strategies for growth in agricultural trade and exports, taking into account United States competitiveness and trade negotiations, and considering the effects of exchange rate fluctuations and unfair trading practices on the competitiveness and availability of exports of United States agricultural commodities;

"(8) strategies designed to make the United States a primary and dependable supplier of agricultural commodities on the world market;

"(9) an analysis of the differences in the markets of developed and developing countries (including the debt load of particular countries), and a strategy to increase exports of United States agricultural commodities to such markets; and

"(10) an estimate of the expected impact of United States Government programs designed to promote the export of United States agricultural commodities on earnings or market share, in the priority markets identified under subsection (d), of exports of United States agricultural commodities.

"(c) DESIGNATION OF GROWTH MARKETS.—The Secretary shall establish, for inclusion in the long-term agricultural trade strategy developed under subsection (a), a list of not less than 15 countries (or groups of countries) that are most lilely to emerge as growth markets for United States agricultural commodities during the 3- and 6-fiscal year periods beginning with the first fiscal year for which the strategy is developed.

"(d) DESIGNATION OF PRIORITY MARKETS.—The Secretary shall designate countries identified on the list developed under subsection (c) as priority markets for United States Government programs designed to promote the export of United States agricultural commodities (other than those programs designed to provide food assistance and those programs under the Export Enhancement Program under section 201).

"(e) ESTABLISHMENT OF MARKET PLANS.—The Secretary shall develop individual market plans for each country (or group of countries) designated as a priority market subsection (d). Each such market plan shall set forth—

"(1) specific plans to assist exports of United States agricultural commodities to and market development in the specific country or group of countries through United States Government programs designed to promote the export of United States agricultural commodities; and

"(2) the agricultural trade goals for the United States for that specific country or group of countries over at least the 3-year period for which the agricultural trade strategy under this section is developed.

"(f) CONFIDENTIALITY.—The Secretary may designate any portion of the agricultural trade strategy prepared under this section as confidential and not to be released to the general public if—

"(i) the Secretary determines that the release of the information involved would disadvantage the United States with respect to its competitiors in specific foreign markets; or

"(ii) any of such information is determined to be confidential business information.

Nothing in this section shall be construed to authorize the withholding of information from the Congress.

"SEC. 106. RELIEF FROM UNFAIR TRADE PRACTICES.

"(a) USE OF PROGRAMS.—

"(1) IN GENERAL.—The Secretary may, for each article described in paragraph (2), make available some or all of the commercial export promotion programs of the Department of Agriculture and the Commodity Credit Corporation to help mitigate or offset the unfair trade practice serving as the basis for the proceeding described in paragraph (2).

"(2) COMMODITIES SPECIFIED.—Paragraph (1) shall apply in the case of articles for which the United States has instituted, under any international trade agreement, any dispute settlement proceeding based on an unfair trade practice if such proceeding has been prevented from progressing to a decision by the refusal of the party maintaining the unfair trade practice to permit the proceeding to progress.

"(b) CONSULTATIONS REQUIRED.—For any article described in subsection (a)(2), the Secretary shall—

"(1) promptly consult with representatives of the industry producing such articles and other allied groups or individuals regarding specific actions or the development of an integrated marketing strategy utilizing some of all of the commercial export programs of the Department of Agriculture and the Commodity Credit Corporation to help mitigate or offset the unfair trade practice identified in subsection (a)(2); and

"(2) ascertain and take into account the industry preference for the practical use of available commercial export promotion programs in implementing subsection (a)(1).

"SEC. 107. PRESERVATION OF TRADITIONAL MARKETS.

"The Secretary shall, in implementing programs of the Department of Agriculture intended to encourage or assist exports of agricultural commodities, seek to preserve traditional markets for United States agricultural commodities.

"SEC. 108. INDEPENDENCE OF AUTHORITIES.

"Each authority granted under this Act shall be in addition to, and not in lieu of, any authority granted to the Secretary or the Commodity Credit Corporation under any other provision of law.

"SEC. 109. PROGRAM EXPENDITURES.

"Expenditures for programs under this Act shall be considered to be expenditures for export promotion and not expenditures for any price support program.

"TITLE II—SPECIFIC EXPORT PROMOTION PROGRAMS

"SEC. 201. EXPORT ENHANCEMENT PROGRAM.

"(A) IN GENERAL.—The Commodity Credit Corporation shall carry out in accordance with this section a program to discourage unfair trade practices by making United States agricultural commodities competitive.

"(b) EXPORT BONUS.—

"(1) IN GENERAL.—In carrying out the program established under this section, the Commodity Credit Corporation may—

"(A) make agricultural commodities, acquired by the Commodity Credit Corporation, available to exporters, users, processors, or foreign purcuasers at no cost either directly or through the issuance of commodity certificates; and

"(B) make cash payments to exporters, users, and processors.

"(2) CALCULATION OF BONUS LEVELS.—The Commodity Credit Corporation shall—

"(A) maintain an established procedure for evaluating program bonus requests, with guidelines for determining prevailing market prices for targeted commodities and destinations to be used in the calculation of acceptable bonus levels;

"(B) use a clear set of established procedures for measuring transportation and incidental costs to be used in the calculation of acceptable bonus levels and for determining the amount of such costs actually incurred;

"(C) in the case of livestock and livestock products, develop a methodology to determine the world price and gather and analyze appropriate price and cost of production information in foreign countries for the purpose of price discovery and to aid sales in foreign markets, and publish such information periodically; and

"(D) maintain consistent and effective controls and procedures for auditing and reviewing payment of bonuses and for securing refunds where appropriate.

"(3) DISCLOSURE OF INFORMATION.—The Secretary may, notwithstanding the provisions of section 552 of title 5, United States Code, provide for withholding from the public the procedures and guidelines established under paragraphs (2)(A) and (B) if the Secretary determines that release of such information would adversely affect the operation of the program. Nothing in this paragraph shall be construed to authorize the withholding of information, including such procedures and guidelines, from the Congress.

"(4) DISCLOSURE OF CARGO.—

"(A) IN GENERAL.—The Secretary shall ensure that commodities exported under the program established under this section arrive at the specified destination country.

The Secretary may provide for an exception if such arrival does not occur due to force majeure.

"(B) ENFORCEMENT.—The Secretary shall provide that if commodities exported under the program established under this section fail to arrive at the specified destination country, except as provided under subparagraph (A)—

"(i) any person receiving, or who otherwise would receive, a bonus under this section in connection with such commodities shall be liable for the amount of such bonus and shall be ineligible for participation in the program established under this section for a period of up to 5 years, unless such failure was beyond the control of such person and without negligence or acquiescence on the part of such person; and

"(ii) if such failure is attributable in whole or in part to the specified destination country, no bonus is made available for exports to such country for a period of at least 1 year.

"(c) SCHEME OR DEVICE.—Any person who engages in any scheme or device to circumvent the provisions of this paragraph shall be ineligible to participate in the program established under this section for a period of up to 5 years. The Secretary shall provide that no bonus is made available, for a period of at least 1 year, under the program established under this section for exports to any country that engages in any scheme or device to circumvent the provisions of this paragraph.

"(d) OTHER REMEDIES UNAFFECTED.—The remedies provided under this paragraph are in addition to any remedy available under any other provision of law.

"(5) COMPETITIVE DISADVANTAGE.—The Secretary shall take such action as is necessary to ensure that equal treatment is provided to domestic and foreign purchasers and users of agricultural commodities in any case in which the importation of a manufactured product made, in whole or in part, from a commodity made available for export under this section would place domestic users of the commodity at a competitive disadvantage.

"(6) DIFFERENT COMMODITIES.—The Commodity Credit Corporation may provide to a United States exporter, user, or processor, or foreign purchaser, under the program established under this section, agricultural commodities of a kind different than the agricultural commoditiy involved in the transaction for which assistance under this section is being provided.

"(7) OTHER EXPORT PROGRAMS.—The Commodity Credit Corporation may provide bonuses under this section in conjunction with other export promotion programs conducted by the Secretary or the Commodity Credit Corporation.

"(c) PRIORITY IN THE CASE OF LIVESTOCK.—In the case of proposals for bonuses for dairy cattle or other appropriate livestock, the Commodity Credit Corporation shall give priority to proposals that include, in connection with the purchase of the livestock, appropriate herd management training, veterinary services, nutritional training, and other technical assistance necessary for the adaptation of the livestock to foreign environments.

"(d) INAPPLICABILITY OF PRICE RESTRICTIONS.—Any price restrictions that otherwise may be applicable to dispositions of agricultural commodities owned by the Commodity Credit Corporation shall not apply to agricultural commodities provided under this section.

"(e) RECORDS.—

"(1) IN GENERAL.—In the administration of the program establish under this section, the Secretary shall require, by rule, each exporter, user, or processor who receives a bonus under the program to maintain all records concerning a program transaction for a period of 5 years after completion of the program transaction, and to permit the Secretary to have full and complete access, for such 5-year period, to such records.

"(2) NONPROGRAM TRANSACTIONS.—The Secretary may require, by rule, exporters, users, or processors participating in the program to make available, for a period of 5 years after completion of a program transaction, books and other records concerning transactions other than program transactions for purposes of program oversight and administration.

"(3) CONFIDENTIALITY.—The individually identifiable information contained in books and records subject to this subsection shall be considered confidential by the Secretary and by the Department of Agriculture and is not subject to disclosure under section 552 of title 5, United States Code. Any officer or employee of the Department of Agriculture who knowingly discloses information made confidential by this paragraph shall be fined under title 18, United States Code, or imprisoned for not more than 1 year, or both. Nothing in this subsection shall be construed to authorize the withholding of information from the Congress.

"(4) CONDUCT OF RULEMAKING.—Final rules under paragraphs (1) and (2) shall be issued not later than 90 days after the date of enactment of the Food and Agricultural Resources Act of 1990.

"(f) FUNDING LEVELS.—

"(1) IN GENERAL.—The Commodity Credit Corporation shall make available for each of the fiscal years 1991 through 1995 not less than $500,000,000 of the funds or commodities of the Commodity Credit Corporation to carry out the program established under this section.

"(2) LIMITATION.—Not more than 10 percent of the funds and commodities made available for a fiscal year to carry out the program established under this section may be made available to promote the export of agricultural commodities described in section 101(6)(B)(ii).

"(g) IN GENERAL.—It is not the purpose of the program established under this section to affect adversely the exports of agricultural commodities of countries, as determined by the Secretary, that are not engaged in unfairly subsidizing their exports of agricultural commodities. The program shall be implemented in a manner necessary to minimize external and unintended effects damaging to the earnings of such countries from exports of agricultural commodities.

"SEC. 202. MARKET PROMOTION PROGRAM.

"(a) IN GENERAL.—The Commodity Credit Corporation shall establish and carry out a program to encourage the development, maintenance, and expansion of commercial export markets for agricultural commodities through cost-share assistance to eligible trade organizations that implement a foreign market development program.

"(b) TYPE OF ASSISTANCE.—Assistance under this section shall be provided in the form of funds of, or commodities owned by, the Commodity Credit Corporation, as determined appropriate by the Secretary.

"(c) REQUIREMENTS FOR PARTICIPATION.—

"(1) IN GENERAL.—To be eligible for assistance under this section, an organization shall—

"(A) be an eligible trade organization;

"(B) prepare and submit a marketing plan to the Secretary that meets the guidelines governing such plans established by the Secretary; and

"(C) meet any other requirements established by the Secretary.

"(2) PRIORITY BASIS FOR EXPORT ASSISTANCE.—The Secretary shall provide assistance under this section on a priority basis in the case of an unfair trade practice.

"(d) ELIGIBLE TRADE ORGANIZATIONS.—An eligible trade organization shall be—

"(1) an organization that promotes the export and sale of agricultural commodities and that does not stand to profit directly from specific sales of agricultural commodities;

"(2) a cooperative organization or State agency that promotes the sale of agricultural commodities; or

"(3) a private organization that promotes the export and sale of agricultural commodities if the Secretary determines that such organization would significantly contribute to United States export market development.

"(e) APPROVED MARKETING PLAN.—

"(1) IN GENERAL.—A marketing plan submitted by an eligible trade organization under this section shall describe the advertising and other export promotion activities to be carried out by the eligible trade organization with respect to which assistance under this section is being requested.

"(2) REQUIREMENTS.—To be approved by the Secretary, a marketing plan submitted under this subsection shall—

"(A) specifically describe the manner in which assistance received by the eligible trade organization in conjunction with funds and services provided by the eligible trade organization will be expended in implementing the marketing plan;

"(B) establish specific market goals to be achieved as a result of the marketing promotion program; and

"(C) contain whatever additional requirements are determined by the Secretary to be necessary.

"(3) AMENDMENTS.—A marketing plan may be amended by the eligible trade organization at any time, with the approval of the Secretary.

"(4) BRANDED PROMOTION.—An agreement entered into under this section may provide for the use of branded advertising to promote the sale of agricultural commodities in a foreign country under such terms and conditions as may be established by the Secretary.

"(f) OTHER TERMS AND CONDITIONS.—

"(1) MULTIYEAR BASIS.—The Secretary may provide assistance under this section on a multiyear basis, subject to annual review by the Secretary for compliance with the approved marketing plan.

"(2) TERMINATION OF ASSISTANCE.—The Secretary may terminate any assistance made, or to be made, available under this section if the Secretary determines that—

"(A) the eligible trade organization is not adhering to the terms and conditions of the program established under this section;

"(B) the eligible trade organization is not implementing the approved marketing plan or is not adequately meeting the established goals of the marketing promotion program;

"(C) the eligible trade organization is not adequately contributing its own resources to the marketing promotion program;

"(D) the unfair trade practice that was the basis of the provision of assistance has

been stopped and marketing assistance is no longer required to offset its effect; or

"(E) the Secretary determines that termination of assistance in a particular instance is in the best interest of the program.

"(3) EVALUATIONS.—The Secretary shall monitor the expenditure of funds received under this section by recipients of such funds. The Secretary shall make evaluations of such expenditure, including—

"(A) an evaluation of the effectiveness of the program in developing or maintaining markets for United States agricultural commodities;

"(B) an evaluation of whether assistance provided under this section is necessary to maintain such markets; and

"(C) a thorough accounting of the expenditure of such funds by the recipient.

The Secretary shall make an initial evaluation of expenditures of a recipient not later than 15 months after the initial provision of funds to the recipient.

"(4) AVAILABILITY OF RECORDS.—

"(A) IN GENERAL.—In the administration of the program established by this section, the Secretary shall require, by rule, each eligible trade organization that receives assistance under the program to maintain all records concerning a program transaction for a period of 5 years after completion of the program transaction, and to permit the Secretary to have full and complete access, for such 5-year period, to such records.

"(B) NONPROGRAM TRANSACTIONS.—The Secretary may require, by rule, eligible trade organizations pasrticipating in the program to make available, for a period 5 years after completion of a program transaction, books and other records concerning transactions other than program transactions for purposes of program oversight and administration.

"(C) CONFIDENTIALITY.—The individually identifiable information contained in books and records subject to this paragraph shall be considered confidential by the Secretary and by the Department of Agriculture and is not subject to disclosure under section 552 of title 5, United States Code. Any officer or empoloyee of the Department of Agriculture who knowingly discloses information made confidential by this subparagraph shall be fined under title 18, United States Code, or imprisoned for not more than 1 year, or both. Nothing in this paragraph shall be construed to authorize the withholding of information from Congress.

"(D) CONDUCT OF RULEMAKING.—Final rules under subparagraphs (A) and (B) shall be issued not later than 90 days after the date of enactment of the Food and Agricultural Resources Act of 1990.

"(5) LEVEL OF MARKETING ASSISTANCE—

"(A) IN GENERAL.—The Secretary shall justify in writing the level of assistance provided to an eligible trade ogranization under the program and the level of cost-sharing required of such organization.

"(B) LIMITATION—Assistance provided under this section to private organizations for activities described in subsection (e)(4) shall not exceed 50 percent of the cost of implementing the marketing plan. Criteria for determining that cost shall be consistent and such cost shall be documented.

"(g) PROGRAM LEVEL.—The Commodity Credit Corporation shall make available assistance under this section at a level not less than $200,000,000 for each of the fiscal years 1991 through 1995.

"(h) REGIONAL TRADE CENTER SET-ASIDE—

"(1) IN GENERAL.—The Secretary shall establish as an objective the reservation of an amount of assistance provided under this section for the benefit of applicants whose applications have been forwarded to the Secretary by the 4 regional nonprofit export trade assocations that have been established by a number of States in cooperation with the Foreign Agricultural Service of the Department of Agriculture, and for the benefit of the National Association of State Departments of Agriculture, for purposes such as the conduct of export promotion trade fairs and other export promotional activities.

"(2) DESIRED LEVEL OF SET-ASIDE.—The desired amounts of such assistance should be provided at levels no less than—

"(A) 10 percent in fiscal year 1991,

"(B) 11 percent in fiscal year 1992,

"(C) 12 percent in fiscal year 1993,

"(D) 13 percent in fiscal year 1994, and

"(E) 14 percent in fiscal year 1995,

as the Secretary may determine will best effectuate the goals of this section.

"SEC. 203. EQUITABLE TREATMENT OF HIGH-VALUE AND VALUE-ADDED UNITED STATES AGRICULTURAL COMMODITIES.

"In the case of any program, such as that established under section 201, operated by the Secretary or the Commodity Credit Corporation during the fiscal years 1991 through 1995, for the purpose of discouraging unfair trade practices, the Secretary shall establish as an objective to expend annually at least 25 percent of the total funds available (or 25 percent of the value of any commodities employed) for program activities involving the export sales of high-value agricultural commodities and value-added products of United States agricultural commodities.

"TITLE III—TRADE REPORTING

"SEC. 301. EXPORT REPORTING AND CONTRACT SANCTITY.

"(a) EXPORT SALES REPORTS.—

"(1) IN GENERAL.—All exporters of wheat and wheat flour, feed grains, oil seeds, cotton and products thereof, and other commodities that the Secretary may designate as produced in the United States shall report to the Secretary of Agriculture, on a weekly basis, the following information regarding any contract for export sales entered into or subsequently modified in any manner during the reporting period:

"(A) type, class, and quantity of the commodity sought to be exported;

"(B) the marketing year of shipment; and

"(C) destination, if known.

"(2) CONFIDENTIALITY AND COMPILATION OF REPORTS.—Individual reports shall remain confidential in accordance with subsection (c) but shall be compiled by the Secretary and published in compilation form each week following the week of reporting.

"(3) IMMEDIATE REPORTING.—All exporters of agricultural commodities produced in the United States shall, upon request of the Secretary, immediately report to the Secretary any information with respect to export sales of agricultural commodities and at such times as the Secretary may request. When the Secretary requires that such information be reported by exporters on a daily basis, the information compiled from individual reports shall be made available to the public daily.

"(4) MONTHLY REPORTING PERMITTED.—The Secretary may, with respect to any commodity or type or class thereof during any period in which the Secretary determines that—

"(A) there is a domestic supply of such commodity substantially in excess of the quantity needed to meet domestic requirements.

"(B) total supplies of such commodity in the exporting countries are estimated to be in surplus,

"(C) anticipated exports will not result in excessive drain on domestic supplies, and

"(D) to require the reports to be made will unduly hamper export sales,

provide for such reports by exporters and publishing of such data to be on a monthly baiss rather than on a weekly basis.

"(b) REPORT ON ORIGIN OF COMMODITIES.—

"(1) IN GENERAL.—Subject to paragraphs (2) and (3), the Secretary shall require each person making a commercial export of any agricultural commodity or product thereof (hereinafter in this section referred to as a 'good') that is determined by the Secretary to be of commercial significance, before or upon that exportation, to report the quantity of such good so exported, and the percentage of the agricultural components produced in the United States and percentage produced in a foreign country by value and weight, and shall report such percentages by crop year and type, if necessary or appropriate to determine the identity of the United States and foreign agricultural components of the good exported.

"(2) EXEMPTION.—A person shall not be required to report any information under paragraph (1) that cannot be obtained from records maintained in the ordinary course of business.

"(3) REPORTS FOR HIGH-VALUE PROCESSED PRODUCTS.—With respect to exports of any good that is a high value, complex, processed product (as determined by the Secretary), a report under paragraph (1) need only be made for exports of that good over a period of not more than 1 year, and the information required under paragraph (1) may be aggregated for the period covered by the report.

"(4) CODES.—The Secretary may establish codes to identify the type and characteristics of each commodity for the purposes of reports under paragraph (1).

"(5) COMPILATION OF REPORTS.—Individual reports under this subsection shall remain confidential in accordance with subsection (c) but may be compiled by the Secretary and published in compilation form on a quarterly basis.

"(c) CONFIDENTIALITY.—The individually identifiable information contained in reports under this section shall be considered confidential by the Secretary and by the Department of Agriculture and is not subject to disclosure under section 552 of title 5, United States Code. Any officer or employee of the Department of Agriculture who knowingly discloses information made confidential by this subsection shall be fined under title 18, United States Code, or imprisoned for not more than 1 year, or both. Nothing in this section shall be construed to authorize the withholding of information from the Congress.

"(d) FAILURE TO REPORT.—Any person who knowingly fails to make any report required under this section shall be fined not more than $25,000 or imprisoned for not more than 1 year, or both.

"(e) CONTRACT SANCTITY.—Notwithstanding any other provision of law, the President shall not prohibit or curtail the export of any agricultural commodity under an export sales contract—

"(1) that is entered into before the President announces an action that would otherwise prohibit or curtail the export of the commodity, and

"(2) the terms of which require delivery of the commodity within 270 days after the date of the suspension of trade is imposed,

except that the President may prohibit or curtail the export of any agricultural commodity during a period for which the President has declared a national emergency for which the congress has declared war.

"TITLE IV—REPORTS

"SEC. 401. NONGOVERNMENTAL SUBSIDIES.

"(a) IN GENERAL.—The Secretary shall submit a report to the Committee on Agriculture and the Committee on Foreign Affairs of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate specifying any nongovernmental agricultural subsidies provided in any foreign country. In compiling such report, the Secretary shall give priority to specifying those nongovernmental subsidies provided to livestock and commodities for which there is a price support program or marketing agreement or order in effect in the United States.

"(b) DEADLINES.—The Secretary shall submit the report specified in subsection (a) no later than 180 days after the date of enactment of the Food and Agricultural Resources Act of 1990, and shall submit additional reports at 1 year intervals for each of the next 5 years after the submission of the first report.

"SEC. 402. LONG-TERM AGRICULTURAL TRADE STRATEGY REPORT.

"(a) IN GENERAL.—The Secretary of Agriculture shall every 3 years prepare a long-term agricultural trade strategy report on the long-term agricultural trade strategy developed by the Secretary under section 105. The first such report shall be submitted under subsection (e) before the beginning of fiscal year 1992. Each subsequent report shall be submitted under subsection (e) before the beginning of each third fiscal year occurring after fiscal year 1992.

"(b) CONTENTS.—

"(1) IN GENERAL.—Each report prepared under subsection (a) shall describe in detail each aspect of the long-term agricultural trade strategy prepared under section 105.

"(2) REVIEW OF IMPLEMENTATION.—In each report submitted after the first report, the Secretary shall—

"(A) review the agricultural trade performance of the United States during the fiscal years ending since submission of the preceding report, in light of the long-term agricultural trade strategy and trade goals developed by the Secretary for such fiscal-year period under this Act;

"(B) determine whether and to what extent individual market plans developed under section 105(e) were successfully implemented during such fiscal-year period;

"(C) determine whether the use of any United States Government programs designed to promote exports of United States agricultural commodities resulted in such agricultural exports or increased agricultural exports or market share in the priority markets during such fiscal-year period; and

"(D) conduct a country-by-country analysis of expenditures made under United States Government programs designed to promote exports of United States agricultural commodities and the export performance of the United States in such market during such fiscal-year period.

"(c) CONSULTATION.—In preparing each report under subsection (a), the Secretary shall consult with the United States Trade Representative to ensure that the report is coordinated with the annual national trade policy agenda included in the annual report for the relevant fiscal year prepared under section 163 of the Trade Act of 1974.

"(d) UPDATE.—The Secretary shall prepare an annual update to the report required under subsection (a) that shall contain a description of any revisions to the long-term agricultural trade strategy made by the Secretary, any changes in law that are required to meet the goals of the long-term agricultural trade strategy, and such other information as may be specified in this section or determined appropriate by the Secretary.

"(e) TREATMENT AS ANNUAL BUDGET SUBMISSION.—The long-term agricultural trade strategy report under subsection (a) shall be submitted with the annual budget submission of the President to the Congress for fiscal year 1992 and for each third fiscal year thereafter. The annual updates under subsection (d) of each such report shall be submitted, respectively, with the annual budget submission of the President to the Congress for the 2 fiscal years after submission of such report. Any provision of the long-term agricultural trade strategy report or annual update that relates to recommended levels of spending on international activities of the Department of Agriculture shall be treated as the annual budget submission of the President to the Congress for such activities for the fiscal year beginning in the year in which the report is submitted, and shall be submitted together with the budget request for other programs of the Department of Agriculture for such fiscal year.

"(f) AVAILABILITY OF REPORT.—

"(1) SUBMISSION TO CONGRESS.—The Secretary shall submit each report required under subsection (a) (and the updates to such report under subsection (d)) to the Committee on Agriculture, the Committee on Foreign Affairs, and the Committee on Ways and Means of the House of Representatives and to the Committee on Agriculture, Nutrition, and Forestry and the Committee on Finance of the Senate.

"(2) AVAILABILITY TO PUBLIC.—Except as provided in paragraph (3), the Secretary may make the report required under subsection (a) available to the general public, including the department of agriculture of any State.

"(3) CONFIDENTIALITY.—The Secretary may designate portions of the report required under subsection (a) or any update prepared under subsection (d) as confidential and not to be released to the general public if—

"(A) the Secretary determines that the release of such information would disadvantage the United States with respect to its competitors in specific foreign markets; or

"(B) any of such information is determined to be confidential business information.".

(b) CONFORMING AMENDMENTS.—(1) Section 1113(c)(9) of the Food Security Act of 1985 (7 U.S.C. 1736-1(c)(9)) is amended—

(A) in subparagraph (A) by adding "and" after the semicolon;

(B) by striking subparagraph (B); and

(C) by redesignating subparagraph (C) as subparagraph (B).

(2) Section 4201 of the Agricultural Competitiveness and Trade Act of 1988, and the item relating to section 4201 in the table of contents for the Omnibus Trade and Competitiveness Act of 1988, are repealed.

SEC. 1222. AMENDMENTS RELATING TO EXPORT CREDIT PROGRAMS.

(a) GUARANTEES FOR WOOD AND FISH.—Section 4(b)(1) of the Food for Peace Act of 1966 (7 U.S.C. 1707a(b)(1)) is amended by adding at the end the following new sentence: "In making available any assistance under this paragraph with respect to wood and processed wood products or fish and processed fish products, the Secretary of Agriculture shall make such guarantees available under terms and conditions comparable to terms and conditions that apply to other agricultural products.".

(b) CRITERIA FOR USE OF AUTHORITY.—Section 4(b)(2) of the Food for Peace Act of 1966 (7 U.S.C. 1707a(b)(2)) is amended by inserting "directly benefit United States agricultural producers will" after "that the sale will".

(c) PROGRAM LEVEL.—Section 4(b)(10) of the Food for Peace Act of 1966 (7 U.S.C. 1707a(b)(10)) is amended by striking "available—" and all that follows through the end of the paragraph and inserting "available not less than $500,000,000 for each of fiscal years 1991 through 1995.".

(d) CREDIT GUARANTEES.—Section 4 of the Food for Peace Act of 1966 (7 U.S.C. 1707a) is amended by adding at the end the following:

"(e) RESTRICTION.—The Corporation shall not make credit guarantees available to any country which the Secretary determines cannot adequately service the debt associated with the guarantee.

"(f) FRAUD.—If the Corporation finds that any exporter or assignee has engaged in fraud or in any scheme, trick, or device to misuse or misappropriate any credit guarantee made available under this section, the relevant export credit guarantee issued under this section is no longer valid.

"(g) DIVERSION OF CARGO.—

"(1) IN GENERAL.—The Secretary shall ensure that commodities exported under any program under this section arrive at the specified destination country. The Secretary may provide for an exception if such arrival does not occur due to force majeure.

"(2) ENFORCEMENT.—The Secretary shall provide that in the case commodities exported under any program under this section fail to arrive at the specified destination country, except as provided under paragraph (1)—

"(A) any person receiving a credit guarantee under this section in connection with such commodities shall be liable for the amount of any amounts paid under such guarantee and shall be ineligible for participation in any program under this section for a period of up to 5 years, unless such failure was beyond the control of such person and without negligence or acquiescence on the part of such person; and

"(B) if such failure is attributable in whole or in part to the specified destination country, no credit or guarantee is made available under any program under this section for exports to such country for a period of at least 1 year.

"(3) SCHEME OR DEVICE.—Any person who engages in any scheme or device to circumvent the provisions of this subsection shall be ineligible to participate in any program under this section for a period of up to 5 years. The Secretary shall provide that, for a period of at least 1 year, no credit or guarantee is made available under any program under this section for exports to any country that engages in any scheme or device to circumvent the provisions of this subsection.

"(4) OTHER REMEDIES UNAFFECTED.—The remedies provided under this subsection are in addition to any remedy available under any other provision of law.

"(h) FOREIGN AGRICULTURAL COMPONENTS.—The Commodity Credit Corporation shall finance or guarantee under this section only United States agricultural commodities, as defined in section 101(6) of the Agricultural Trade Act of 1978. The Commodity Credit Corporation shall not finance or guarantee under this section the value of any foreign agricultural component.

"(i) RECORDS.—

"(1) IN GENERAL.—In the administration of the program established under this section, the Secretary shall require, by rule, each exporter under the program to maintain all records concerning a program transaction for a period of 5 years after completion of the program transaction, and to permit the Secretary to have full and complete access, for such 5-year period, to such records.

"(2) NONPROGRAM TRANSACTIONS.—The Secretary may require, by rule, exporters participating in the program to make available, for a period of 5 years after completion of a program transaction, books and other records concerning transactions other than program transactions for purposes of program oversight and administration.

"(3) CONFIDENTIALITY.—The individually identifiable information contained in books and records subject to this subsection shall be considered confidential by the Secretary and by the Department of Agriculture and is not subject to disclosure under section 552 of title 5, United States Code. Any officer or employee of the Department of Agriculture who knowingly discloses information made confidential by this paragraph shall be fined under title 18, United States Code, or imprisoned for not more than 1 year, or both. Nothing in this subsection shall be construed to authorize the withholding of information from the Congress.

"(4) CONDUCT OF RULEMAKING.—Final rules under paragraphs (1) and (2) shall be issued not later than 90 days after the date of enactment of the Food and Agricultural Resources Act of 1990.".

(e) USE OF PROGRAM.—Section 4(b)(5) of the Food for Peace Act of 1966 (7 U.S.C. 1707a(b)(5)) is amended by inserting ", foreign policy," after "foreign aid".

(f) SHORT-TERM EXPORT CREDIT GUARANTEES.—Section 1125 of the Food Security Act of 1985 (7 U.S.C. 1736t) is amended—

(1) in subsection (b) by striking "1990" and inserting "1995";

(2) in subsection (d)—

(A) by inserting "(1)" after "(d)"; and

(B) by adding at the end the following:

"(2) In making available any guarantees under subsection (b) with respect to wood and processed wood products or fish and processed fish products, the Corporation shall make such guarantees available under terms and conditions comparable to terms and conditions that apply to other agricultural products."; and

(3) by adding at the end the following new subsections:

"(e) FOREIGN AGRICULTURAL COMPONENTS.—The Commodity Credit Corporation shall guarantee under any program conducted under this section only United States agricultural commodities, as defined in section 101(6) of the Agricultural Trade Act of 1978. The Commodity Credit Corporation shall not guarantee under this section the value of any foreign agricultural component.

"(f) RECORDS.—

"(1) IN GENERAL.—In the administration of the program described in this section, the Secretary shall require, by rule, each exporter under the program to maintain all records concerning a program transaction for a period of 3 years after completion of the program transaction, and to permit the Secretary to have full and complete access, for such 5-year period, to such records.

"(2) NONPROGRAM TRANSACTIONS.—The Secretary may require, by rule, exporters participating in the program to make available, for a period of 5 years after completion of a program transaction, books and other records concerning transactions other than program transactions for purposes of program oversight and administration.

"(3) CONFIDENTIALITY.—The individually identifiable information contained in books and records subject to this subsection shall be considered confidential by the Secretary and by the Department of Agriculture and is not subject to disclosure under section 552 of title 5, United States Code. Any officer or employee of the Department of Agriculture who knowingly discloses information made confidential by this paragraph shall be fined under title 18, United States Code, or imprisoned for not more than 1 year, or both. Nothing in this subsection shall be construed to authorize the withholding of information from the Congress.

"(4) CONDUCT OF RULEMAKING.—Final rules under paragraphs (1) and (2) shall be issued not later than 90 days after the date of enactment of the Food and Agricultural Resources Act of 1990.".

SEC. 1223. MARKET DEVELOPMENT TASK FORCE.

"(a) ESTABLISHMENT.—The Secretary of Agriculture (hereinafter in this section referred to as the "Secretary") shall establish a task force, to be known as the "Market Development Task Force" (hereinafter in this section referred to as the "Task Force"), to help develop the long-term agricultural trade strategy required by section 105 of the Agricultural Trade Act of 1978, and to coordinate and disseminate information, and provide advice and education to entities, concerning agricultural export markets and domestic agricultural trade programs.

"(b) COMPOSITION.—The Task Force shall be composed of 12 members, of which—

(1) 1 member shall be the Administrator of the Foreign Agricultural Service, or such Administrator's designee;

(2) 1 member shall be the Secretary of Commerce, or such Secretary's designee;

(3) 1 member shall be the United States Trade Representative, or such Representative's designee;

(4) 1 member shall be the Administrator of the Small Business Administration, or such Administrator's designee;

(5) 1 member shall be the Administrator of the Extension Service, or such Administrator's designee;

(6) 1 member shall be the Administrator of the Agricultural Stabilization and Conservation Service, or such Administrator's designee;

(7) 1 member shall be a representative of the National Association of State Department of Agriculture (NASDA);

(8) 1 member shall be the special assistant to the President appointed under section 1113 of the Food Security Act of 1985 (7 U.S.C. 1736-1), or such assistant's designee; and

(9) 4 members shall be from the private sector who represent different interests in the agriculture sector of the United States economy.

(c) CHAIRPERSON.—The Administrator of the Foreign Agricultural Service shall serve as the Chairperson of the Task Force.

(d) VACANCIES.—A vacancy occurring on the Task Force among the members described in subsections (b)(7) and (b)(9) shall be filled in the same manner in which the original appointment was made.

(e) EQUIPMENT AND STAFF.—

(1) PERSONNEL.—The Secretary shall make available to the Task Force office facilities and equipment necessary to enable the Task Force to effectively carry out its functions.

(2) STAFF.—The members of the Task Force identified in paragraphs (1) through (6) of subsection (b) shall make available to the Task Force such personnel, and the Secretary shall employ such additional staff, as are necessary to enable the Task Force to effectively carry out its functions.

(f) FUNCTIONS.—The Task Force shall—

(1) participate in—

(A) the development of the long-term agricultural trade strategy required by section 105 of the Agricultural Trade Act of 1978, placing particular emphasis on developing a strategy through which the Federal Government can support the export of value-added or high-value United States agricultural commodities (as defined in section 101(6) of the Agricultural Trade Act of 1978); and

(B) the preparation of the report to the Congress on the long-term agricultural trade strategy and the annual revisions to that strategy required by section 402 of the Agricultural Trade Act of 1978;

(2) coordinate the information available concerning—

(A) the locations of existing and potential export markets for United States agricultural commodities (as defined in section 101(6) of the Agricultural Trade Act of 1978);

(B) the types of commodities and products desirable in such markets;

(C) the existence of trade barriers applicable to such markets;

(D) the existence of Federal trade program opportunities that are available to domestic exporters; and

(E) any other information related to such markets;

(3) disseminate information relating to the long term agricultural trade strategy required by section 105 of the Agricultural Trade Act of 1978;

(4) annually produce, publish, and disseminate throughout the United States through the Extension Service and through regional trade organizations, a catalog containing information available through the Federal Government concerning such markets;

(5) act as an advisor to and consult with State governments to promote the establishment and use of such markets; and

(6) perform any other functions determined appropriate by the Task Force.

(g) CONSULTATION WITH PARTICIPANTS IN PROGRAMS.—The Task Force shall consult with participants in agricultural trade programs, including regional trade organizations, in carrying out the functions of the Task Force.

(h) REGULATIONS.—Not later than 180 days after the date of enactment of this Act, the Secretary shall prepare and submit, to the Committee on Agriculture and the Committee on Foreign Affairs of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate, proposed regulations necessary to establish and administer the Task Force.

(i) RELATIONSHIP TO USTR FUNCTIONS.—The functions and responsibilities of the Task Force may not conflict with, or supercede, any authority of the United States Trade Representative to determine the existance of trade barriers or unfair trade prac-

tices under the Trade Act of 1974, or to develop or coordinate the trade policy of the United States.

(j) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as may be necessary to carry out this section.

(k) TERMINATION.—The Task Force shall cease to exist 5 years after the date of enactment of this Act.

Subtitle C—Agricultural Trade With and Fellowships for Emerging Democracies and Middle-Income Countries

SEC. 1231. PROMOTION OF AGRICULTURAL EXPORTS TO EMERGING DEMOCRACIES.

(a) GUARANTEES TO BE MADE AVAILABLE.—(1) The Commodity Credit Corporation, for each of fiscal years 1991 through 1995—

(A) shall make available not less than $225,000,000 of export credit guarantees for exports to emerging democracies under the program described in section 1125(b) of the Food Security Act of 1985 (7 U.S.C. 1736t(b)), in addition to the amounts required under that section;

(B) shall make available $50,000,000 to guarantee financing, on terms of not less than 3 years no more than 10 years, for the establishment or improvement by United States persons of facilities in emerging democracies to improve handling, marketing, processing, storage, or distribution of imported agricultural commodities and products thereof if the Secretary of Agriculture determines that such guarantees will primarily promote the export of United States agricultural commodities (as defined in section 101(6) of the Agricultural Trade Act of 1978); and

(C) is encouraged to make available guarantees under section 4(b) of the Food for Peace Act of 1966 (7 U.S.C. 1707a(b)), in addition to the amounts otherwise available under that section, for exports to emerging democracies.

The Commodity Credit Corporation shall give priority under subparagraph (B) to opportunities or projects identified under subsection (b).

(2) Before the authority under paragraph (1)(B) is exercised, the Secretary of Agriculture shall consult with exporters of United States agricultural commodities (as defined in section 101(6) of the Agricultural Trade Act of 1978), nongovernmental experts, and other Federal Government agencies in order to ensure that facilities in an emerging democracy for which financing is guaranteed under paragraph (1)(B) do not primarily benefit countries which are in close geographic proximity to that emerging democracy.

(b) SHARING UNITED STATES AGRICULTURAL EXPERTISE.—

(1) IN GENERAL.—

(A) ESTABLISHMENT OF PROGRAM.—For each of the fiscal years 1991 through 1995, the Secretary of Agriculture (hereinafter in this section referred to as the "Secretary"), in order to develop, maintain, or expand markets for United States agricultural exports, is directed to make available to emerging democracies the expertise of the United States to make assessments of the food and rural business sytems needs of such democracies, make recommendations on measures necessary to enhance the effectiveness of those systems, and identify specific opportunities and projects to enhance the effectiveness of those systems.

(B) EXTENT OF PROGRAM.—The Secretary shall implement this subsection with respect to at least 3 emerging democracies in each fiscal year.

(2) EXPERTS FROM THE UNITED STATES.—The Secretary shall implement the requirements of paragraph (1)—

(A) by providing assistance to teams consisting primarily of agricultural consultants and government officials expert in assessing the food and rural business systems of other countries to enable such teams to conduct the assessments, make the recommendations, and identify the opportunities and projects specified in paragraph (1) in emerging democracies; and

(B) by providing necessary subsistence expenses in the United States and necessary transportation expenses by individuals designated by emerging democracies to enable such individuals to consult with food and rural business system experts in the United States to enhance such systems of such emerging democracies.

(3) COST-SHARING.—The Secretary shall encourage the nongovernmental experts described in paragraph (2)(B) to share the costs of, and otherwise assist in, the participation of such experts in the program under this subsection.

(4) TECHNICAL ASSISTANCE.—The Secretary is authorized to provide technical assistance to implement the recommendations, or in connection with the opportunities or projects identified, under paragraph (1).

(5) REPORTS TO SECRETARY.—A team that receives assistance under paragraph (2)(A) shall prepare such reports as the Secretary may designate.

(6) REPORTS TO CONGRESS.—The Secretary shall annually submit to the Committee on Agriculture, Nutrition, and Forestry of the Senate and the Committee on Agriculture and the Committee on Foreign Affairs of the House of Representatives, a report summarizing the activities carried out under this subsection, including a summary of the assessments and recommendations prepared under this subsection, and the Secretary shall also make the assessments and recommendations available to the public.

(7) ADVISORY COMMITTEE.—To provide the Secretary with information that may be useful to the Secretary in carrying out the provisions of this subsection, the Secretary shall establish an advisory committee composed of representatives of the various sectors of the food and rural business systems of the United States.

(8) USE OF CCC.—The Secretary shall implement this subsection through the funds and facilities of the Commodity Credit Corporation. The authority provided under this subsection shall be in addition to and not in place of any other authority of the Secretary or the Commodity Credit Corporation.

(9) LEVEL OF ASSISTANCE.—The Secretary shall provide assistance under this subsection of not more than $10,000,000 in any fiscal year.

(c) FOREIGN DEBT BURDENS.—(1) In carrying out the program described in subsection (a), the Secretary of Agriculture shall ensure that the credits for which repayment is guaranteed under subsection (a) do not negatively affect the political and economic situation in emerging democracies by excessively adding to the foreign debt burdens of such countries.

(2) Not later than 6 months after the effective date of this title, and not later than the end of each 6-month period occurring thereafter, the Secretary of Agriculture, in consultation with other appropriate Federal departments, shall prepare and transmit to the Speaker of the House of Representatives, the Committee on Foreign Affairs and the Committee on Agriculture of the House of Representatives, and the Committee on Agriculture, Nutrition, and Forestry of the Senate a report to assist the Congress in assessing the extent to which credits for which repayment is guaranteed under subsection (a) meet the requirements of paragraph (1). The report shall include—

(A) the amount and allocation, by country, of credit guarantees issued under subsection (a);

(B) the aggregate foreign debt burdens of countries receiving commodities or facilities under such credit guarantees, expressed in terms of debt on account of agricultural commodities or products thereof, or facilities for which guarantees may be made under subsection (a)(1)(B), and all other debt;

(C) the activities of creditor governments and private creditors to reschedule or reduce payments due on existing debt owed to such creditors by a country in cases where such country has been unable to fully meet its debt obligations; and

(D) an analysis of—

(i) the economic effects of the foreign debt burden of each recipient country, and in particular the economic effects on each recipient country of the credits for which repayment is guaranteed under subsection (a); and

(ii) the relationship between any negative economic effects on any recipient country caused by its overall foreign debt burden and debt incurred under subsection (a) and such country's political stability.

(d) EMERGING DEMOCRACY.—As used in this section, the term "emerging democracy" means any country that, as determined by the President, is taking steps toward—

(1) political pluralism, based on progress toward free and fair elections and a multiparty political system;

(2) economic reform, based on progress toward a market-oriented economy;

(3) respect for internationally recognized human rights; and

(4) a willingness to build a friendly relationship with the United States.

SEC. 1232. AGRICULTURAL FELLOWSHIP PROGRAM FOR MIDDLE-INCOME COUNTRIES AND EMERGING DEMOCRACIES.

(a) ESTABLISHMENT.—The Secretary of Agriculture shall establish a fellowship program for middle-income countries and emerging democracies to provide fellowships to persons from eligible countries who specialize in agriculture for study in the United States.

(b) ELIGIBLE COUNTRIES.—

(1) IN GENERAL.—Any country that is a middle income country or is an emerging democracy as defined in section 1231(d) shall be eligible to participate in the program established under this section.

(2) MIDDLE INCOME COUNTRY.—For purposes of this section, a "middle income country" means a country that—

(A) has developed economically to the point where it no longer qualifies for bilateral foreign assistance programs from the United States because its per capita income level exceeds the eligibility requirements of such programs; or

(B) has never qualified for bilateral foreign assistance programs from the United States, but an ongoing relationship between the country and the United States, including technical assistance and training, would provide mutual benefits to that country and the United States.

(c) PURPOSE OF THE FELLOWSHIPS.—Fellowships under this section shall be provided in

order to allow the recipients to gain knowledge and skills that will—

(1) assist eligible countries to develop agricultural systems necessary to meet the food needs of their domestic populations; and

(2) strengthen and enhance trade linkages between eligible countries and agricultural interests in the United States.

(d) INDIVIDUALS WHO MAY RECEIVE FELLOWSHIPS.—The Secretary shall utilize the expertise of United States agricultural counselors, trade officers, and commodity trade promotion groups working in participating countries to help identify candidates, from both the public and private sectors of those countries, for the program established under this section.

(e) PROGRAM IMPLEMENTATION.—The Secretary shall consult with other United States Government agencies, United States universities, and the private agribusiness sector, as appropriate, to design and administer training programs to accomplish the objectives of the program established under this section.

(f) AUTHORIZATION OF APPROPRIATIONS.—There are hereby authorized to be appropriated without fiscal year limitation such sums as may be necessary to provide funding to carry out the program established under this section, except that the amount of such funds shall not exceed—

(1) for middle income countries described in subsection (b)(2)(A), $3,000,000;

(2) for middle income countries described in subsection (b)(2)(B), $2,000,000; and

(3) for emerging democracies, $5,000,000.

(g) COMPLEMENTARY FUNDS.—When the Secretary of Agriculture determines that it is advisable in furtherance of the purposes of the program established under this section, the Secretary may accept money, funds, property, and services of every kind by gift, devise, bequest, grant, or otherwise, and may, in any manner, dispose of all such holdings and use the receipts generated from such disposition as general program funds under this section. All funds so designated for the program established under this section shall remain available until expended.

Subtitle D—Studies, Reports, and Other Provisions

SEC. 1241. STUDY OF NORTH AMERICAN FREE TRADE AREA.

The Secretary of Agriculture shall study the effects on the United States agricultural economy of the creation of a North American free trade area, including the creation of a United States-Mexico free trade area. The Secretary shall submit a report on the results of such study to the Congress not later than May 31, 1991.

SEC. 1242. REPORT ON WOOD AND FISH EXPORT PROMOTION.

Not later than 180 days after the date of enactment of this Act, and annually thereafter for a period of 5 years, the Secretary of Agriculture shall prepare and submit to the Committee on Agriculture and the Committee on Foreign Affairs of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate a report concerning the promotion and participation of wood and processed wood products, and fish and processed fish products, in the programs conducted under the Agricultural Trade Development and Assistance Act of 1954, section 1125 of the Food Security Act of 1985, and section 4 of the Food for Peace Act of 1966.

SEC. 1243. ROSE AND FLOWER STUDY.

(a) IN GENERAL.—The Secretary of Agricultural shall conduct a study of the impact of consignment sales of foreign roses and fresh cut flowers on the domestic rose and fresh cut flower industry, taking into account the findings in the report issued in April 1989 entitled "Competitive Conditions in the U.S. and World Markets for Fresh Cut Roses" by the United States International Trade Commission.

(b) REPORT TO CONGRESS.—Not later than 6 months after the date of enactment of this Act, the Secretary shall report the results of the study conducted under subsection (a) to the Congress, together with any recommendation of the Secretary on how the domestic rose and fresh cut flower industry can compete fairly with the practice of consignment sales.

SEC. 1244. COMMODITY TRANSPORTATION AND TECHNOLOGY ASSESSMENT AND REPORT.

(a) ASSESSMENT.—The Secretary of Agriculture shall conduct an assessment of the impact upon prices received by producers, costs to consumers, and the overall effect upon the ability of the United States to fulfill export goals and expand foreign markets for domestic commodities, of the current agricultural transportation situation, focusing especially on rail transportation capabilities including rail abandonments, periodic shortages of adequate rail car equipment suitable for transporting agricultural commodities, and the practice of rail carriers selling in advance certificates of transportation.

(b) ADDITIONAL REQUIREMENTS.—In preparing the assessment required by this section, the Secretary shall consult with rail, truck, and waterborne carriers who have experience in the transportation of agricultural commodities, and shall also examine the feasibility of—

(1) providing technical and financial assistance to producers, marketers, and exporters in the design and construction of alternatives (such as freight containers which could be carried aboard flatbed trucks, flatbed rail cars, river barges, and oceangoing container vessels) to covered rail hopper cars for the purpose of transporting bulk commodities to appropriate terminal market facilities; and

(2) encouraging the establishment of a computerized network which would assist producers, marketers, exporters, and carriers in identifying, matching, and coordinating potential loads of agricultural commodities with carriers having proper capabilities and equipment in an effort to expedite transportation needs.

(c) REPORT.—Within 240 days after the date of enactment of this Act, the Secretary of Agriculture shall report to the Committee on Agriculture, Nutrition, and Forestry of the Senate and to the Committee on Agriculture of the House of Representatives the results of the assessment conducted under this section, and any recommendations the Secretary may have as a result of such assessment.

(d) EXPENDITURES.—For the purpose of preparing the assessment and report required by this section, the Secretary of Agriculture is authorized to expend such sums as may be necessary from any unobligated funds as may be necessary from any unobligated funds appropriated to the Department of Agriculture, and may, without the necessity of advertising for bids, contract with any appropriate private sector businesses which have expertise and experience in transporting agricultural commodities, or with experience in operating a computerized network of load and equipment matching between shippers and carriers, if the work or consultation performed under such contract is deemed necessary by the Secretary to fully comply with the scope of the assessment, and complete the report, required by this section.

SEC. 1245. RED TART CHERRY STUDY.

(a) STUDY.—Not later than 240 days after the date of enactment of this Act, the Secretary of Agriculture shall, in consultation with the United States International Trade Commission, complete a study to determine—

(1) the competitive factors affecting the domestic red tart cherry industry, including competition from imports;

(2) the effect that the European Community's restriction on imported red tart cherries has had, and may continue to have, on world trade of red tart cherries;

(3) the extent to which unfair trade practices and barriers to trade by other competing countries are impeding the marketing abroad of domestically produced red tart cherries; and

(4) the extent to which imported red tart cherry concentrate has been sold, and is being sold, in the United States at prices below the world market price.

(b) REPORT TO CONGRESS.—The Secretary shall submit a report containing the results of the study conducted under subsection (a) to the Congress.

(c) SENSE OF CONGRESS.—It is the sense of the Congress that the Secretary of Agriculture should use all available remedies, programs, and policies within the Secretary's jurisdiction to assist the domestic red tart cherry industry to maintain and enhance its ability to compete in the domestic and world market for red tart cherries.

SEC. 1246. REPORT ON SECTION 22 SUSPENSION OR TERMINATION.

(a) REQUIREMENT OF REPORT.—If section 22 of the Agricultural Adjustment Act (7 U.S.C. 624) is repealed or all measures proclaimed under such section are suspended, the Secretary of Agriculture shall, prior to the effective date of the suspension or termination of any quantitative limitation or fee in effect under that section, report to the Congress.

(b) CONTENTS OF REPORT.—The report under subsection (a) shall assess each material consequence of the lifting of such limitation or fee, including the impact on—

(1) the Farmers Home Administration and agricultural credit in general;

(2) the prices paid to farmers generally for the affected commodity; and

(3) United States food security needs.

SEC. 1247. AGRICULTURAL EXPORTS TO THE EUROPEAN COMMUNITY.

(a) FINDINGS.—The Congress finds that—

(1) the European Community has established a system, as part of its Europe 1991 economic integration plan, to set product standards and requirements, including those related to agricultural commodities and products thereof, and that system has not been transparent insofar to allow United States Government or industry experts to observe meetings of European standards-setting institutions;

(2) the European Community is also currently writing the rules by which United States exporters of agricultural commodities and products thereof will be able to show compliance with European Community product standards and requirements, and has refused to guarantee that such United States exporters will be able to show compliance with European Community product standards and requirements by using United

States laboratories or through self-certification;

(3) the United States maintains an open, transparent system to set standards and requirements for agricultural commodities and products thereof, and many reciprocal arrangements currently in place allow European Community exporters of agricultural commodities and products thereof to show compliance with United States product standards and requirements by using European Community laboratories or through self-certification;

(4) the value of United States exports of agricultural commodities and products thereof to the European Community in 1989 was $6,600,000,000 constituting 17 percent of all United States exports of agricultural commodities and products thereof; and

(5) the product standards and testing policies of the European Community are consequently unfair and discriminatory, and have great potential to reduce signficantly exports for the United States of agricultural commodities and products thereof.

(b) STATEMENTS OF POLICY.—

(1) The Congress denounces the European Community nontransparent process of setting standards and requirements for agricultural commodities and products thereof, and the Congress further denounces the refusal by the European Community to guarantee that United States exporters of such commodities and products will be able to show compliance with European Community standards and requirements by using United States laboratories or through self-certification.

(2) The Congress deplores the adverse consequences of the standards and testing policies of the European Community on the bilateral agricultural trade relationship between the United States and the European Community.

(3) The Congress urges the President to use all available means to bring about significant and far-reaching changes in the standards and testing policies of the European Community in order to protect and maintain United States access to the European Community market for agricultural commodities and products thereof.

SEC. 1248. LANGUAGE PROFICIENCY AND EVALUATION OF FOREIGN AGRICULTURAL SERVICE OFFICERS.

(a) ASSESSMENT OF FOREIGN LANGUAGE COMPETENCE.—The Foreign Agricultural Service shall revise its evaluation reports for its Foreign Service officers so as to require in a separate entry an assessment of the officer's effectiveness in using, in his or her work, a foreign language or foreign languages tested at the General Professional Speaking Proficiency level or above, in cases where the supervisor is capable of making such an assessment.

(b) PRECEDENCE IN PROMOTION.—The Director of Personnel of the Foreign Agricultural Service shall instruct promotion panels to take account of language ability and, all criteria for promotion otherwise being equal, to give precedence in promotions to officers who have achieved at least the General Professional Speaking Proficiency level in 1 or more foreign languages over officers who lack that level of proficiency.

(c) REPORT TO CONGRESS.—Within 6 months after the effective date of this title, the Administrator of the Foreign Agricultural Service shall submit a report to the Committee on Foreign Affairs, the Committee on Agriculture, and the Committee on Post Office and Civil Service of the House of Represenatives, and the Committee on Agriculture, Nutrition, and Forestry of the Senate, which—

(1) details the extent to which, in the 3 years before the effective date of this title, Foreign Service officers of the Foreign Agricultural Service achieved General Professional Speaking Proficiency level in the primary foreign language of the host countries in which they served before arriving in such countries or within 1 year after such arrival; and

(2) makes specific, new proposals to the Congress on how to ensure that at least 75 percent of Foreign Service officers of the Foreign Agricultural Service have achieved General Professional Speaking Proficiency level in the primary foreign language of the host countries in which they serve before arriving in such countries or within 1 year after such arrival.

Subtitle E—Foreign Affairs Provision

SEC. 1261. USE OF ECONOMIC ASSISTANCE FUNDS FOR AGRICULTURAL AND INDUSTRIAL ALTERNATIVES TO NARCOTICS PRODUCTION IN MAJOR COCA PRODUCING COUNTRIES.

(a) WAIVER OF CERTAIN RESTRICTIONS.—For the purpose of reducing dependence upon the production of crops from which narcotic and psychotropic drugs are derived, the President may provide economic assistance for a country which, because of its coca production, is a major illicit drug producing country (as defined in section 481(i)(2) of the Foreign Assistance Act of 1961 (22 U.S.C. 2291(i)(2))) to promote the production, processing, or the marketing of products which can be economically produced in such country, notwithstanding the provisions of law described in subsection (b) of this section.

(b) DESCRIPTION OF RESTRICTIONS WAIVED.—The provisions of law made inapplicable by subsection (a) are any other provisions of law that would otherwise restrict the use of economic assistance funds with respect to the production, processing, or marketing of agricultural commodities (or the products thereof) or other products, including sections 521, 546, and 547 (but excluding section 510) of the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1990, and comparable provisions of subsequent Acts appropriating funds for foreign operations, export financing, and related programs.

(c) DEFINITION OF ECONOMIC ASSISTANCE.—As used in this section, the term "economic assistance" means assistance under chapter 1 of part I of the Foreign Assistance Act of 1961 (22 U.S.C. 2151 and following; relating to development assistance) and assistance under chapter 4 of part II of that Act (22 U.S.C. 2346 and following; relating to the economic support fund).

Subtitle F—Effective Dates and Conforming Changes

SEC. 1271. EFFECTIVE DATES.

(a) IN GENERAL.—Subject to subsection (b), this title and the amendments made by this title shall take effect on October 1, 1990, and shall be effective only for fiscal year 1991 and thereafter.

(b) SECTION 103 OF 1978 AGRICULTURAL TRADE ACT.—The provisions of section 103 of the Agricultural Trade Act of 1978 (as amended by section 1221 of this Act) shall apply to proposals pending or received on or after the date of enactment of this Act.

(c) SECTION 301 REGULATIONS.—The Secretary shall promulgate regulations to implement section 301 of the Agricultural Trade Act of 1978 (as amended by this title) no later than 180 days after the date of enactment of this Act.

SEC. 1272. CONFORMING CHANGES.

(a) REPEAL OF EXPORT SALES REPORTING.—Section 812 of the Agricultural Act of 1970 (7 U.S.C. 612c-3) is repealed, effective upon the effective date of regulations promulgated under section 1271(c) of this Act.

(b) REPEAL OF OBSOLETE LAWS.—Section 1124 and 1127 of the Food Security Act of 1985 (7 U.S.C. 1736s and 1736v) are repealed.

(c) REPEAL OF SENSE OF CONGRESS.—Section 1165 of the Food Security Act of 1985 is repealed.

Strike all of section 1109 that proceeds proposed new subparagraph (B) of subsection (b)(2) of section 302 of the Food Security Wheat Reserve Act of 1980 (page 287, line 3 through line 13) and insert the following:

SEC. 1109. REPLENISHMENT OF THE FOOD SECURITY WHEAT RESERVE.

Section 302(b)(2) of the Food Security Wheat Reserve Act of 1980 (7 U.S.C. 1736f-1(b)(2)) is amended—

(1) by inserting "(A)" after "(2)";

(2) by striking "(A)" and "(B)" and inserting "(i)" and "(ii)", respectively; and

(3) by adding at the end the following new subparagraph:

In section 1109, in proposed new subparagraph (B) of subsection (b)(2) of section 302 of the Food Security Wheat Reserve Act of 1980, strike "(A)" (page 288, line 4) and insert "(i)" and strike "(B)" (page 288, line 7) and insert "(ii)"; and strike "; and" at the end of proposed new subparagraph (B) (page 288, line 17) and all that follows through the end of section 1109 (page 288, line 19) and insert a period.

Conform the table of contents of the bill.

By Mr. KOSTMAYER:

Section 1601(b)(2), strike paragraph (2).

Section 1601(c)(5), strike subparagraphs (C) and (D).

Section 1601, add at the end the following new subsection:

(e) EXCEPTION.—Section 1212 of the Food Security Act is amended by adding at the end the following new subsection:

"(f)(1) Except to the extent provided in paragraph (1), no person shall become ineligible under section 1211 for program loans, payments, and benefits as a result of the failure of such person to actively apply a conservation plan that documents the decisions of such person with respect to location, land use, tillage systems, and conservation treatment measures and schedules prepared under subsection (a), if the Secretary determines that—

"(A) such person has not violated the provisions of section 1211 more than one time on a farm; and

"(B) such person acted in good faith and without an intent to violate the provisions of this subtitle.

"(C) such person has actively applied a conservation plan with respect to location, land use, tillage systems, and conservation treatment measures and schedules prepared under subsections (a)(2) or (b)(3) except with respect to minor and technical violations that have a minimal effect on the erosion control purposes of the plan when applied.

"(2) If the Secretary determines that a person who has failed to comply with the provisions of section 1211 meets the requirements of paragraph (1), the Secretary shall, in lieu of applying the ineligibility provisions in section 1211, reduce by not less than $750 nor more than $10,000 (depending on the seriousness of the violation as deter-

mined by the Secretary), program benefits described in section 1211, that such producer would otherwise be eligible to receive in a crop year.

"(3) Any person whose benefits are reduced in any one crop year under this subsection shall continue to be eligible for all of the benefits described in section 1211 for any subsequent crop year if, prior to the beginning of such subsequent crop year, the Secretary determines that such person is actively applying conservation plans prepared under subsection (a)(2) or (b)(3), according to the schedule set forth in such plan.".

Section 1601, add at the end the following new subsection:

(e) APPLICATION OF CONSERVATION PRACTICES.—Subtitle B of title XII of the Food

Section 1603(b)(1), strike "and" at the end is amended by adding at the end thereof the following new section:

"SEC. 1214. APPLICATION OF CONSERVATION PRACTICES.

"(a) PREPARATION OR PLAN AND PROGRESS.—The Secretary, in preparing or revising a conservation plan for application under this subtitle, and in otherwise enforcing the ineligibility provisions of this subtitle, shall encourage and provide assistance to agricultural producers to enable such producers to reduce soil erosion on their land to reduce erosion to annual average rate of 5 tons per acre. The Secretary shall establish procedures to determine the progress made by the producer in achieving such reduction.

"(b) MODIFICATIONS.—

"(1) REQUEST.—A revision of a conservation plan that is or will be applied under this subtitle shall include the modification of any conservation practices or implementation schedules mandated by such plan if a request for such modification is made by the applicable producer or by the Secretary as a result of the monitoring or enforcement of this subtitle or designating special review areas as provided in section 1609.

"(2) APPLICATION OF CONSERVATION PRACTICES.—In preparing or revising a conservation plan under this subtitle after the date of enactment of this section, the Secretary shall require the producer to actively apply all appropriate primary conservation practices that would have the effect of reducing erosion on the land if, in the absence of such practices, the average annual rate of soil erosion would exceed the five tons per acre.

"(3) PRIMARY PRACTICES.—

"(A) IDENTIFICATION.—In identifying appropriate primary conservation practices to be applied under paragraph (2), the Secretary shall take into account the nature of the erosion problem, the technical feasibility of the practice, the crop or crops produced on the farm, the prevailing climate in the area, and such other relevant factors as the Secretary may think appropriate, except that the Secretary shall require the practices listed in subparagraph (B).

"(B) LIST OF PRACTICES.—The primary conservation practice required in a county shall be listed in the local field office technical guide, and such practices shall include contour farming, cross slope farming, divided slope farming, contour strip cropping, field strip cropping, wind strip cropping, grassed waterways, field borders, filter strips, conservation cover crops, cover and green manure crops, crop residue use, conservation tillage, emergency tillage, and grasses and legumes in rotation.".

Section 1603(b)(1), strike "and" at the end of subparagraph (D); insert "and" at the end of subparagraph (E); and insert after subparagraph (E) the following:

(F) by striking "and" at the end of paragraph (9); striking the period at the end of paragraph (10); and inserting "; and", and by adding at the end the following:

"(13) in the case of contracts entered into after the date of enactment of this paragraph, to comply with the provisions of subtitle C, with respect to the land that is the subject of the contract, an owner or operator shall limit soil erosion to not more than the soil loss tolerance after the expiration of the contract under this subtitle or face a loss of program benefits as described in section 1221.".

Section 1603(b), strike the period at the end of the subsection and insert "; and"; and insert at the end the following:

(4) by adding at the end the following new subsection:

"(f) INFORMATION CONCERNING FLEXIBILITY.—The Secretary shall provide owners and operators with information concerning flexibility in commodity programs to assist such owners and operators in determining whether to adopt or alter crop rotation patterns to achieve compliance with conservation provisions under this subtitle.".

Section 1603(f)(3), strike the closing quotation marks and period and add at the end the following:

"(e) NONCOMPLIANCE.—Any person who establishes or maintains farm acreage bases, as provided by section 1031 of this Act (7 U.S.C. 1461) shall be subject to an annual reduction of not less than 5 percent in such bases for each year that the Secretary determines such person has failed to actively apply a conservation plan or conservation system as required under section 1212, except if such person is ineligible under section 1211 or has benefits reduced under section 1212 in that year. Any person subject to an acreage base reduction shall be notified within 30 days of such determination by the Secretary. The Secretary shall restore in any subsequent crop year, any acreage base that has been reduced under this subsection if, prior to the beginning of such crop year, the Soil Conservation Service has certified to the Secretary that the person is actively applying the conservation plan or conservation system.

Section 1609, add at the end the following new subsection:

"(g) COMPREHENSIVE REPORT.—Subtitle E of title XII of the Food Secretary Act of 1985 (16 U.S.C. 3841) is further amended by adding after section 1246 the following new section:

"SEC. 1247. COMPREHENSIVE REPORT.

"(a) IN GENERAL.—Not later than December 31, 1992, and each year thereafter, the Secretary shall prepare and submit, to the Committees on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate, a comprehensive report that evaluates, in accordance with subsection (c), the programs and policies established and operated under this title.

"(b) COOPERATION AND CONSULTATIONS.—The report required under subsection (a) shall be developed jointly with the United States Fish and Wildlife Service and, where appropriate, in consultation other Federal agencies and such State agencies or officials and independent experts as the chief executive officer of each State may designate for this purpose.

"(c) REQUIREMENTS.—In conducting the evaluations required under subsection (a), the Secretary shall—

"(1) require the Soil Conservation Service to assess the progress made toward reducing soil erosion to a rate not to exceed 5 tons per acre through the implementation of the relevant provisions of this title, identify obstacles to the attainment of such goal, and recommend manners in which to overcome such obstacles;

"(2) require the Soil Conservation Service, in consultation with the Agricultural Research Service, to perform on-site evaluations of conservation practices on highly erodible lands, on-site estimates of erosion reductions that may result from the implementation of conservation plans, and to assess the technical adequacy and feasibility of such plans;

"(3) require the Soil Conservation Service, jointly with the United States Fish and Wildlife Service, to assess the contribution toward the national objectives of wetlands preservation, wildlife and waterfowl habitat improvement, and water quality improvement through the implementation of the relevant provisions of this title, identify obstacles to furthering progress toward such objectives, and recommend manners in which to overcome such obstacles; and

"(4) collect date concerning the social and economic impacts, violations, appeals and such other matters under this title as the Secretary determines to be necessary to assess the overall impact of this title.

"(d) COMPLIANCE MONITORING.—

"(1) PROCEDURES.—The Secretary shall develop and implement procedures for monitoring the compliance of producers and others with the provisions of this title at the local level. Such producers may include annual spotchecks of not less than 10 percent of all affected acreage.

"(2) REPORT.—The Secretary shall prepare an annual report that shall contain a summary of the results of the monitoring conducted under paragraph (1), and include information concerning the adequacy of conservation plans and practices on soil erosion, the number and nature of violations of such plans and appeals, and other matters that may be necessary to monitor the implementation of this title.

"(3) SPECIAL REVIEW.—Based on the information contained in the report under paragraph (2), the Secretary may designate for special review any areas or soil types for which primary conservation practices are likely to be required to attain an average annual erosion rate of 5 tons per acre per year.

"(4) NOTICE.—The Secretary shall provide notice to all persons whose conservation plans are being monitored of the results of such monitoring, and provide such persons with information regarding erosion rates, the adequacy of conservation practices, or the designation of special review status.

"(5) SUBMISSION.—The Secretary may develop and implement the procedures required under paragraph (1) in conjunction with the preparation by the Secretary of the report required under subsection (a). The reports required under paragraph (2) shall be submitted together with the report required under subsection (a).".

EXTENSIONS OF REMARKS

IF YOU CAN'T TAKE THE HEAT—TAKE THE PURPLE HEART

HON. CHARLES B. RANGEL
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Monday, July 23, 1990

Mr. RANGEL. Mr. Speaker, I rise to call your attention to three newspaper articles by David Evans of the Chicago Tribune. Mr. Evans' thought-provoking stories on the Panama invasion and its aftermath raise serious questions about the motivation for this country's actions and the methods used to justify them to the American public.

VETS BOILING OVER MEDAL FOR SOLDIER FELLED BY HEAT

(By David Evans)

WASHINGTON.—Three days before Christmas, Army Pfc. Grant Gipe was lying in a hospital bed at Brooke Army Medical Center in Texas, where he had been evacuated as a casualty of Panama's intense heat, when a general came by and awarded him a Purple Heart.

The 23-year-old paratrooper from the 82nd Airborne Division was one of 209 soldiers to have the medal pinned on his chest that day by Gen. Carl Vuono, the Army chief of staff.

But the award to a soldier felled by tropical heat has outraged many veterans, who say the Purple Heart traditionally has been reserved for wounds caused by enemy fire.

Army officials say they will not reconsider or retract the award.

"He made the decision on site," said Lt. Col. Terrence Adkins, chief of the Military Awards Branch at Army headquarters, who assisted Vuono in presenting the medals in his tour of the wards.

"It's an unusual case from the perspective of heat exhaustion," Adkins conceded, "but it is Army policy that decorations awarded by a commander on site will be upheld unless there is an impropriety in the award."

As a member of the U.S. invasion force sent in to oust Panamanian dictator Manuel Antonio Noriega, Gipe flew out of Polk Air Force Base, N.C., on the night of Dec. 20 and parachuted into Panama. According to various sources, he boarded the airplane with four canteens full of water and drank two on the flight south.

Gipe missed the designated landing area, parachuted into a swamp and was separated from this unit. In the intense heat he sloshed his way to a rendezvous point, consuming his remaining two canteens.

Gipe met up with other infantrymen from his company, and they flew by helicopter to their unit.

The company went on to scale a muddy hill exposed to Panamanian sniper fire.

Gipe, who was lugging a 25-pound machine gun and other gear, blacked out from the heat at the top of the hill. He was one of several soldiers flown to the Army hospital in San Antonio on Dec. 22 after being in Panama for less than 24 hours.

Gipe was "totally surprised when he was presented with a Purple Heart, according to an article in the March-April issue of The Purple Heart Magazine, which is published by the Military Order of the Purple Heart, an association of some 22,000 recipients of the medal.

According to Nick McIntosh, national historian for the association, Gipe's situation did not meet the criteria for the Purple Heart.

"There is no way the medical community would describe heat exhaustion as a wound or an injury," he said.

In defending the award to Gipe, Adkins said, "There are misperceptions among both serving and former [military] personnel."

However, according to Army regulations, the Purple Heart is awarded to recognize soldiers who are killed or wounded from a "missile, force, explosion or agent."

"A physical lesion is not required, provided the concussion or other form of injury is directly due to enemy . . . action," the regulations state.

Many veterans say Gipe's medical evaluation was not the direct result of enemy action.

Michael Prothero, adjutant general of the Military Order of the Purple Heart, said, "I've received at least 65 letters [from veterans] speaking against this award. Our members are upset with the Army leadership, not the soldier."

Many of them have complained in writing to the Army, and they have received a standard reply from Adkins saying the award was based on the fact that Gipe "was actively engaged in combat with the enemy at the time his injury was sustained, and . . . medical evacuation was required."

Veterans are not happy with what they see as the cheapening of the Purple Heart, said Prothero.

"At our annual convention next month I am sure there will be a resolution voted by the membership to make our feelings known to the Army," he said.

Regarding the award to Gipe, Prothero said, "I think it was a case where it was time to hand out medals, and the proper screening wasn't done. Maybe next time people will think ahead."

WHAT PURPLE HEART RECOGNIZES—ONE SOLDIER'S ORDEAL

(By David Evans)

WASHINGTON.—The Army has given a Purple Heart to a soldier who passed out from heat exhaustion in the invasion of Panama last December.

Veterans who bled or, worse, lost limbs for the right to wear the Purple Heart are rightfully upset at the de facto cheapening of an award intended to recognize death and injury from enemy fire in battle.

Indeed, the case of Staff Sgt. Lewis Olivera, of Wisconsin Dells, Wis, fits precisely the criteria for the Purple Heart, which are based on two unambiguous and engraved-in-stone standards: The soldier has to be wounded as a direct result of enemy fire, and the wounds must be severe enough to warrant medical treatment.

The 25-year-old Olivera is a member of the 2d Ranger Battalion, one of the Army's premier light infantry units, based at Ft. Lewis, Wash.

For Olivera, the night of Dec. 20 was a monumental bad dream. Shortly after midnight, Olivera leaped out of a C-130 transport 600 feet over the Rio Hato airstrip. Seconds after his chute snapped open, Olivera crashed through the jungle treetops and into an elevated power line.

Hanging from the line, Olivera was worried that Panamanian soldiers in the nearby barracks, troops of the Macho de Mantes battalion, a Panamanian ranger outfit, would see the sparks and flashes from the power line. He released the "D" rings holding the parachute to his body and, weighted down with a 180-pound pack, Olivera crumpled to the jungle floor.

A U.S. Air Force gunship flying overhead began strafing the barracks, barely 100 yards from where Olivera was crouched. To avoid being hit, he began the trek to a preplanned rendezvous point.

On the way, Olivera was ambushed by two Panamanian soldiers from the barracks. He suspects they were alerted by the sparks from his impact with the power line.

From a range of 50 feet, Olivera was hit square in the chest by two bullets from their AK-47 assault rifles. One bullet tore through two ribs and punctured his right lung. The other bullet severed the muscle above his right collar bone.

Olivera was knocked onto his back. The Panamaians approached, began rifling through his pockets for maps and documents, and discovered that he was dazed but still alive.

At point-blank range, one Panamanian soldier fired at Olivera's head. The bullet hit the lip of his keviar helmet, tore through the 19 layers of fibers and resin, and was deflected just enough that it didn't kill him outright.

Instead, the bullet struck Olivera above the left eye, fractured his skull, tore off a major chunk of the skin on his skull, an glanced off, knocking him unconscious.

The two Panamanian troopers left him for dead, tagging him with a black bandana that was the signature of a "kill" by the Macho de Mantes battalion.

The bullet to the head just happened to be a tracer round, and the heat of the burning chemical cauterized the ruptured blood vessels as the bullet passed through muscle and flesh. Doctors who later treated Olivera said the burning action of the tracer bullet probably kept him from bleeding to death as he lay knocked out on the jungle floor through the rest of the night.

Olivera regained consciousness the following morning and used his radio to call for help. According to a unit officer, Olivera's voice was noticeably faint. "We sent teams out to find him," the officer said.

Olivera was told by radio to fire three shots in the air to help the patrols locate him. In his weakened condition, Olivera was having difficulty working his right arm; he fired two shots from his M-16 into the air, but his arm dropped and the third shot

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

glanced off his head, tearing more skin off his skull.

The shots, though, were enough to alert a nearby Ranger patrol, although the troops who found the bleeding long enough to get medical treatment.

At the aid station, a chaplain offered Olivera last rites. "No, I don't think I need that. I'm doing just fine, really," Olivera mumbled.

Evacuated to Brooke Army Medical Center in San Antonio, Olivera was told by surgeous there that he would never parachute again and that his days as an Army Ranger were over.

On Dec. 22, Gen. Carl Vuono, the chief of staff of the Army, pinned the Purple Heart on the wounded Olivera, who is now fully recovered and back with his Ranger unit.

Vuono also pinned the Purple Heart that day on the soldier felled by heat.

QUESTIONS FROM AN INVASION: PANAMA AND THE PENTAGON

(By David Evans)

WASHINGTON.—In the eurphoric afterglow surrounding Gen. Manuel Noriega's abject surrender, the congressional emissaries who flew to Panama earlier this week will conduct their inevitable inquiry into the conduct of the invasion.

Hopefully, these august delegations will ask a few questions about an operation that so far has cost 23 dead and 314 wounded American troops and has turned entire sections of Panama City into the Beirut of the Western Hemisphere.

The topmost question: Have internal Pentagon politics influenced international actions? The Panama invasion force featured Army, Air Force, Navy and Marine Corps units, the standard "pie dividing" exercise where each service gets a role to play, and just a month before the Pentagon's fiscal 1991 budget request goes to Congress.

For example, the Air Force—with a sackful of stealth bombers, cruise missiles and advanced fighters in that budget request—sent a brace of F-117 radar-evading stealth fighters all the way from their home base in Nevada to bomb a field near Rio Hato. Air National Guard A-7 jets were on hand locally. Mountains would have shielded the A-7s from Panamanian radars and, besides, those radars normally don't operate at night and half of them were out of service because the U.S. embargo on spare parts.

At the least, why not hit a target? Four Navy SEALs were tragically killed in a successful attempt to knock out Noriega's Learjet at Paitillo airfield, a job that could have been done by a quick strafing run from the air.

Although a reinforced infantry brigade was already in Panama, the Army Mixmastered into the invasion force reinforcements from just about every kind of airborne, ranger, special forces and light infantry unit available.

The word among professional military officers is that the Army exploited the situation in Panama to make a grab for the Marines' traditional role of providing America's so-called "interventionary forces" for delousing Third World countries. A U.S. Army relieved of keeping Soviet tank arms at bay is facing wholesale unemployment; the task force sent to Panama appears suspiciously like a creative exercise in job transition.

If the audition overall was impressive, certain nagging details recall many of the Army's old Vietnam habits. Ticket-punching for one, where in Vietnam officers were rotated through commands every six months. For airborne troops, the ultimate ticket-punch is a combat parachute drop; it means a distinguishing star on top of the jump wings.

"Why'd they keep jumping?" asked one officer of the second wave of 82d Airborne Division troops who parachuted onto Tocumen airfield three hours after it was seized. The difference between landing the planes for the troops to walk off, and having them leap out from 500 feet, was the coveted star on the jump wings.

The firepower mindset remains firmly entrenched. "Why'd they take all that artillery down there?" asked a colonel, who happens to be an artilleryman.

Enemy sniper positions were hosed down by gunships flying overhead. Prodigious quantities of machine-gun ammunition were expended on the ground. Panama City's two million residents found themselves in a free-fire zone; according to reports from city hospitals, the gunplay killed well over 400 bystanders, including at least three American civilians, a toll that exceeds the 314 armed Panamanian soldiers the U.S. Army claims to have killed.

American help comes at a high price; one wonders if Colombia or Peru will be so willing now to invite the U.S. Army to help them combat the drug cartels.

Force creates voids and destabilizes conditions, and for all that firepower the Army appears to have been caught unprepared to deal with the burning and looting. Military police units were hastily rushed to Panama to regain control of the situation. As in Vietnam, the Army's big battalions were movable islands of force in a sea of powerlessness.

Just as those battalions were unsure of the whereabouts of the wily Viet Cong, they were unsure of Noriega's location. The composite conclusion from interviews with a half-dozen officers is that America's massive intelligence system failed to take Noriega's measure, and as a consequence commanders in the field were unable to anticipate his moves.

In the end, the Army was lucky. If there was a wimp in the whole sordid episode, it was Noriega. If he were a young Fidel Castro, Che Guevara or Ho Chi Minh, those U.S. Army battalions would be fighting today. They were spared this embarrassing and costly spectacle by the mouse that roared from Panama.

HOW USING A CARBON TAX TO REDUCE THE DEFICIT INCREASES AMERICAN COMPETITIVENESS

HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 23, 1990

Mr. STARK. Mr. Speaker, I believe we can reduce the deficit and get significant environmental benefits by enacting a carbon tax. I have introduced H.R. 4805 which imposes a $25-a-ton charge on the emission of carbon.

An article in the Economist provides an eloquent sense of urgency why America needs to impose a carbon tax. If we are to remain a world economic leader, we must act to reduce our deficits. High interest rates, caused by the deficit, are discouraging American investment. Imposing a carbon tax can cut the deficit, reduce our balance of payments, and begin to deal with the greenhouse effect.

Mr. Speaker, I urge my colleagues to learn about the many important positive effects a carbon tax can have on the American economy, our international trading position and the fight against global warming.

[From the Economist, July 21, 1990]

RED INK, GREEN TAXES

Now that those lips have finally moved, it is clear that tax increases will have to provide a large slice of the $50-55 billion of cuts that America's deficit trimmers are searching for. Indeed, that may be just the hors d'oeuvres. The administration now thinks that America's budget deficit in the coming fiscal year will be $169 billion—even before adding the cost of the savings and loan rescue. Better to find the money in ways that help the American economy than harm it.

Most taxes are levied on things that are good for an economy: government gets revenue at the expense of some economic welfare. Because income is taxed, people work a bit less hard; because capital is taxed, they have less incentive to save and to invest. The World Resources Institute thinks that such distorting effects of the tax system cost Americans 4-7 percent of GNP each year.

Why tax good things, when it is possible to tax bad ones? The obvious bad thing to tax is pollution. For, while hard work and thrift bring economic benefits, pollution brings costs—ill health, acidified water, damaged crops, crumbling buildings. Taxing pollution may also mean less need for enterprise-crushing regulation, rarely the most cost-effective way to clean up. America spends 1.5% of GNP on cleaning its environment, a sum that will almost double over the coming decade. Why spend this wastefully?

Energy is the biggest pollutant of all: causing in various ways oil spills, acid rain, smog and greenhouse warming. Over the years, American legislators have considered any number of ingenious rules to curb the dirty side-effects of burning fossil fuels: fuel-efficiency standards for car fleets, scrubbers for power-station chimneys, double hulls for oil tankers. All such devices drive up the price of fuel. But the extra money goes to the makers of catalytic converters or scrubbers. Government intervention increases; prices increase; government revenues do not.

Falling energy prices have made it harder to achieve improvements in air quality. The fuel cost of driving a mile in America, in 1989 prices, has fallen from 4 cents ten years ago to 2 cents today. That is the lowest level ever. Not surprisingly, the gains from energy saving made in the 1970s have stopped. America is once again becoming a big importer of energy, buying abroad nearly half the oil it consumes. Fuel imports are now equivalent to one-third of its trade deficit.

By increasing energy taxes, America would not only cut its budget and its balance-of-payments deficits with one swipe. It would also discourage a potent source of pollution. But there are bad and good ways to tax energy. The worst would be an oil import fee, repeatedly discussed in past budget crisis. Such a fee might cut America's dependence on imported oil in the short term. But because it would speed up the depletion of America's own oil supplies, it would increase future vulnerability. Worse, only about 40% of the increase in prices that it caused would go to the government

in higher revenues. The rest would line the pockets of American oilmen.

CARBON COPY

Far better would be to tax the carbon content of fuels, as they leave the mine, dock and well head. A tax of roughly $28 per ton of carbon content of coal, oil and gas would raise $22.5 billion revenue in 1991 and $163 billion over five years: enough to make a big hole in the budget deficit. Such a tax would also allow America, the world's biggest puffer of greenhouse gases, to stabilise carbon-dioxide emissions by the end of the century—a goal that the greener countries of Europe are already determined to reach. It would encourage energy conservation and the development of renewable fuels, giving American companies a better chance of competing on world markets in these two "green" industries. And with stable carbon-dioxide emissions would come cuts in those other nasty pollutants, sulphur dioxide and nutrous oxide.

A carbon levy could be presented not as a tax but as an "atmospheric users' charge", which might even make environmentally-conscious people feel virtuous about paying it. A broad-based tax would be less unpopular than a petrol tax: one recent poll found that 33% of Americans supported a general energy tax, but only 24% a petrol tax. The broader the tax, the more widely its burden is likely to be shared across the country; but the lower the rate needed to raise each extra dollar of revenue.

True, a carbon tax, like any tax on pollutants, would fall more heavily on the poor. But not as heavily as, say, a payroll tax. Tougher pollution rules raise energy prices too, but do not raise revenues from which the poorest could be given help. True, too, some companies would lose the competitive edge that America's cheap energy gives them. But American industry as a whole would not. A big cause of America's dwindling competitiveness is lack of investment, discouraged by the high interest rates that help finance that deficit. In competitive Japan, companies pay much more for their energy—but get their capital cheap.

TRUDE WEISHAUPT MEMORIAL DIALYSIS CENTER

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, July 23, 1990

Mr. ACKERMAN. Mr. Speaker, I call upon my colleagues in the House of Representatives to join me today in celebration of the dedication of a magnificent facility, a wonderous place where men and women blessed with extraordinary talents will give to others the greatest of gifts.

For today, in Queens, New York, a ribbon will be cut and fall away and the front doors of the Trude Weishaupt Memorial Dialysis Center will swing open. In the days and years ahead, the Weishaupt Center will be a place where hundreds upon hundreds of people will go, seeking the treatment that will save their lives.

Imagine, a place so magical that within its walls exists the power to continue human life. That is why the Trude Weishaupt Memorial Center was created.

Many people are due recognition and congratulations for this achievement. In particular, the dedicated doctors, nurses, and administrators at Booth Memorial Medical Center are responsible for establishing what is the finest facility of its kind in the great city of New York.

However, Mr. Speaker, one man deserves special mention. Kurt Weishaupt, a philanthropist and civic leader of the highest order for several decades in Queens County, built this center for the most special of reasons. It is a memorial to his late wife, an honor that will keep Trude's memory vibrant as the center extends the lives of so many others. Yet this facility bears the name Weishaupt, and the entire family, including daughters Carol and Hazel and son Robert, deserve praise.

Permit me a moment to describe the Trude Weishaupt Memorial Center. The health care needs of the center's patients are multiple and complex. Care plans for each patient provide for dialysis treatment, medication, diet, and counseling. Their medical needs are met by physicians on staff specializing in the treatment of kidney disease under the direction of Dr. Chaim Charytan.

These new facilities will enable Booth Memorial Medical Center, under the direction of Major Ronald Lyons, to maintain its leadership position in this most important field of medicine. The Weishaupt Memorial Center is expected to begin treating patients in August.

Booth Memorial calls Kurt Weishaupt a philanthropist, a leader, and an ambassador. All are correct. But to me, he is even more. I am proud to call him my friend.

SENATOR ARTHUR V. WATKINS: PUBLIC SERVANT

HON. HOWARD C. NIELSON

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Monday, July 23, 1990

Mr. NIELSON of Utah. Mr. Speaker, it is a personal honor to introduce legislation to memorialize the many contributions and valuable service rendered by one of Utah's most distinguished native sons: Senator Arthur Vivian Watkins. My bill would name the U.S. Post Office Building in Orem, UT, the "Arthur V. Watkins Post Office." It is but a small gesture in recognition of his selfless service to his community, his State, and his Nation.

Born on December 18, 1886 in Midway, Wasatch County, UT, Senator Watkins attended public schools in the Provo-Orem area. He entered Brigham Young Academy in 1903 and was a guard on their first championship basketball team.

In 1906, he left the academy to teach the fourth and fifth grades at Maeser Elementary School in Maeser, UT. When he was told that he would be paid only $40 a month, he asked how much sheepherders were paid. One of the school trustees, who was a sheep rancher, told him that herders were paid $60 a month because they were responsible for valuable property. Watkins stated, "I won't work for less than the sheepherders; children are a lot more valuable than sheep!" He was paid $60 a month.

From 1907 to 1910, he served a mission for the Church of Jesus Christ of Latter-day Saints in the Eastern United States. Following this, he remained in New York to study law at New York University, later transferring to Columbia University Law School, where he obtained his juris doctorate degree. In August, 1912 he passed the Utah State Bar Exam, and set up a private law practice in Vernal, UT. A year later, he married the former Andrea Rich, whom he had met while in school.

Watkins lost his first foray into the political arena, a bid for the office of Uintah County attorney. Shortly thereafter, he accepted an appointment as the assistant county attorney of Salt Lake City. Seven years later, however, health problems forced him to temporarily give up his legal activity, and he moved his family to a 600-acre ranch in Lehi, Utah County, where he became the first producer of turkeys on a commercial basis. In 1925, he moved to a 17-acre fruit farm in Orem, and opened a law practice in Provo.

Watkins tasted his first electoral success in 1928, when he was elected judge of the Fourth Judicial District Court. He served in that capacity until the Republicans were swept out of office in the election of 1932. While in Orem, in addition to significant leadership positions in the L.D.S. Church, he also served as the director of the Orem Chamber of Commerce, director and general counsel for the Provo River Water Users Association, and was instrumental in the construction of Deer Creek Reservoir.

In 1936, Watkins again fell short as a candidate for Utah's Second Congressional District, although he received more votes than Alf Landon, the Republican Presidential nominee. Ten years later, he ran for the U.S. Senate and defeated incumbent Senator Abe Murdock.

Perhaps Watkin's most notable role was that of chairman of the Select Committee on the Censure of Joseph McCarthy, the Wisconsin Senator who gained notoriety by accusing numerous individuals in and out of Government of belonging to the Communist Party. At the time, many questioned the wisdom of naming Watkins, but were soon surprised by the control and forcefulness he demonstrated while in the chair.

During his 12 years in the Senate, Watkins served as the chairman of the Joint Congressional Committee on Immigration and National Policy and was a member of the Judiciary, Interior, and Insular Affairs and Public Works Committees, as well as the Joint Committees on Economic Report and on Navajo-Hopi Indian Administration.

In the 1958 election, J. Bracken Lee, a former Governor of Utah, entered the race for Senator Watkins' seat and split the Republican vote, resulting in a Frank Moss victory. Watkins remained in Washington as a special consultant to the Interior Department on water and power matters. In 1959, he was nominated by President Eisenhower as associate commissioner to the Indian Claims Commission, later being named chief commissioner. In 1967, at the age of 81, he retired. The Washington Post wrote: "This country is deeply grateful to Mr. Watkins."

Andrea Rich Watkins died in 1971. Senator Watkins married Dorothy Watkins in March 1972. A year and a half later, he too passed on, leaving behind 7 children, 28 grandchil-

dren, and a legacy of service to his community, his State, and his country. I believe it would be most appropriate to honor him in this manner.

TRIBUTE TO SCHNECKSVILLE, PA

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 23, 1990

Mr. RITTER. Mr. Speaker, I rise today to pay tribute to the village of Schnecksville, PA, on the occasion of its 150th anniversary.

On September 13, 1749, Adam Schneck arrived in the New World from Wurttenberg, Germany. He settled in the Whitehall Township area in order to build a new and prosperous life for himself and his descendants.

In 1840, Adam Schneck's grandson Daniel Schneck became the founder of the salient town of Schnecksville. The genesis of this town was initiated through much hard work and perseverance by Daniel. He began a shingle factory, a kiln and yard, as well as carrying on the production of building bricks for nearly 20 years which allowed for the construction of a number of buildings in Schnecksville. By 1846, Schnecksville was of sufficient size that a post office was instituted for the encompassing area.

The descendants of Adam and Daniel Schneck organized the first Schneck family reunion in 1916. In 1989, they celebrated their 70th family reunion at the Schnecksville Grange Hall.

The village of Schnecksville is proud of its educational facilities; the Lehigh County Community College and the Lehigh County Vocational-Technical School, both established in 1966. These schools foster the exchange between talented and dedicated citizens and the Lehigh Valley job market.

Schnecksville is also the home of the leading independent agricultural operation in the Lehigh Valley, Jaindl's turkey farm. It was started by the late John L. Jaindl in the 1930's, and is now owned and managed by his son Fred Jaindl, and the enterprising Jaindl family.

Mr. Speaker, I would also like to recognize the civic organizations in the Schnecksville area who make an invaluable contribution to the village through community service: Jordan Lodge, Lady Lillie Best Rebeeka Lodge No. 227, Gross Hall Fish and Game Association, Copeechan Fish and Game Club, Upper Lehigh Lions Club, Schnecksville Grange, Vernon G. Kern Post No. 8344, and North Whitehall Republican Club.

In particular, I would like to recognize the Schnecksville 150th anniversary celebration committee members who have volunteered much of their time and energy in preparation for this special occasion. They are: Arlington Baer, Edward Frantz, Joanne Horwitz, Ellsworth Meckel, Ray Saltzman, Curtis Schneck, Paul Schwarz, Clifford Snyder, Glenn Stahley, Richard Steward, and Joe Witman.

Mr. Speaker, my colleagues, please join me in congratulating the Schneck family for being a part of such a prestigious accomplishment as founding the village of Schnecksville, and the good people of Schnecksville, PA, on its 150th anniversary.

REFORMS OF THE BUDGET PROCESS

HON. BILL SCHUETTE

OF MIGHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, July 23, 1990

Mr. SCHUETTE. Mr. Speaker, today I am introducing a comprehensive package of reforms of the Federal budget process. It is high time that the budget process include some discipline. In the 15 years which have passed since enactment of the budget process, many loopholes have been found by those whose purpose is to evade budget discipline. The same may be said of the Gramm-Rudman-Hollings legislation. It is time to correct the problems which have arisen, and in my legislation—which expands on legislation I have introduced in two Congresses in conjunction with the senior representative from New Mexico in the other body—would do so in a variety of ways.

First and most important, implementation of elements of the bill itself would reduce the deficit. The Grace Commission and the Heritage Foundation both estimate that implementation of the biennial budgeting provisions would reduce expenditures by $5 billion over 5 years. Furthermore, implementation of a constitutional amendment for the line-item veto, or its statutory corollary, enhanced rescission authority, would save $10 billion over the same 5 years. Elimination of the egregious practice of wonderland budgeting, without affecting the off-budget Social Security just as included in my bill, would reduce the baseline $9 billion in the current fiscal year, and $211 billion off the baseline over the 4 outyears.

Additionally, elimination of wonderland budgeting should significantly improve the fiscal discipline of both Congress and interest groups, as it sends a strong message that the public can no longer be fooled into thinking a 2- or 3- percent increase in spending is a cut. This was an especially frustrating problem in years like 1986–87, when spending increased 6 percent while inflation rose 1.1 percent, or 1985–86 when inflation was 3.7 percent and spending rose 11 percent.

My legislation will impose further discipline on the spenders in Congress—who, it has been proved, take every $1 in revenue increases and spend $1.58—by requiring separate votes on tax legislation. Additional advantage of this measure is that it will likely result in fewer tax bills—which means fewer complex changes and less confusion for our constituents.

It will also require a separate vote on entitlement expansions, thus preventing the bundling of entitlement expansions into reconciliation, which is, ironically, intended to cut entitlements. Yet, the reconciliation vehicle has become a favorite tool for increasing entitlements—the single fastest growing part of the Federal budget.

Further discipline will be imposed by the legislation's mandate of a two-thirds vote of the House to break its own rules and spend more money even after we are over budget. Regarding the budget process—making it more difficult to spend money after we are over budget or waive other points of order.

Finally, I order to protect the lifeline of our Nation's senior citizens, this bill will remove the Social Security trust fund from the budget permanently. Never again will those to whom we owe so much—our parents—be forced to wonder if this year's budget axe will fall on their vital program.

Finally, my legislation prohibits blue smoke and mirrors budget gimmicks which have cost our Treasury—and taxpayers—so much money while masquerading as savings. For instance, under my legislation timing shifts, extensions of expiring revenue provisions, or provisions which yield savings in the first year but cost the Treasury money thereafter are prohibited from being counted as reconciliation savings. Along the same lines, full year effects of entitlement expansions must be counted. No longer would a major expansion of a entitlement program pass itself off as affordable simply because it is not designated to be implemented until August or September of its first year.

Mr. Speaker, my legislation is comprehensive, necessary and germane to our budget crisis this year. I urge my colleagues who agree that our budget process is seriously off track to consider cosponsoring this all encompassing budget reform bill.

METRO BROADCASTING, INC. VERSUS FEDERAL COMMUNICATIONS COMMISSION

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, July 23, 1990

Mr. CLAY. Mr. Speaker, approximately 1 year ago, on June 29, 1989, I criticized the Supreme Court when, in Ward's Cove Packing Co. versus Atonio it took three giant steps backward in the battle against discrimination. The Court then held that there was no violation of the law when Alaska salmon canneries stratified their labor force by assigning Eskimo and Filipino workers to low-paying unskilled cannery line jobs, and white workers to the higher paying noncannery line jobs—both skilled and unskilled jobs. To add insult to economic injury, the cannery even assigned the workers to Jim Crow segregated dormitories and mess halls.

The Court in Ward's Cove created procedural legal hurdles which few employees could ever surmount. It is no longer enough for the workers, as in that case, to allege that the discrimination results from any or all of five or six different employment practices. They now must pinpoint the specific employment practice responsible for the discrimination. If they surmount this first hurdle, the workers then must prove that the employment practice is totally without "legitimate business justification." Formerly, it had been up to the employer—once discrimination was shown—to prove there was a "business necessity" for the disputed practice. It is still theoretically open for the workers to prove that there are

alternative ways of doing business, equally effective but with a lesser discriminatory impact. It is theoretically possible, I say, because the Court in Ward's Cove warned the lower courts to "proceed with care" whenever workers make this attempt, and reminded them that they, the courts, are "less competent than the employers to restructure business practices."

After this decision came down last year literally scores of pending discrimination suits were dismissed. It was, therefore, with eagerness and pleasure that I cosponsored the Civil Rights Act of 1990 (H.R. 4000) to reverse Ward's Cove and other Supreme Court decisions which took the teeth out of the civil rights laws.

That was last year.

Today, I want to praise Mr. Justice Brennan and the Supreme Court for its majority decision in Metro Broadcasting, Inc. versus FCC upholding our authority here in Congress to ensure that the views of racial minorities continue to be represented in the broadcast media.

The facts of the the case are simple.

For many years minority groups—and women—were almost totally excluded from the broadcast industry, except for an occasional FM station here and there. In 1971, minorities owned only 10 of the approximately 7,500 radio stations in America, and owned not a single one of the more 1,000 television stations.

Why? Several reasons.

It takes a lot of money to acquire a station, put it on the air and keep it going until advertisement revenues come in. Minorities lacked the necessary financial resources to compete for the lucrative broadcast stations. Equally if not more significant is lack of broadcast experience. The FCC always gave preference to those with an appropriate business background and experience. When radio came in, the licenses were awarded to those who owned a major newspaper or a string of movie theaters. When television came in, licenses were awarded to those with radio experience. Thus minorities were frozen out of the broadcast business from the start. It's like the chicken and the egg. No experience, no job—no job, no experience. How does one get started?

The consequence of all of this is that the minority audiences were denied both voice and viewpoint. The majority audience as well was denied a program which serves to enrich and educate listeners of every kind.

Diversified programming is a key objective not only of the Communications Act, but also an objective of the first amendment, so something had to be done. Therefore, in 1977 the Federal Communications Commission sponsored a conference on minority ownership policies. This conference concluded that:

Unless minorities are encouraged to enter the mainstream of the commercial broadcasting business, a substantial portion of our citizenry will remain underserved and the large, non-minority audience will be deprived of the views of minorities.

Two policies resulted from this conference.

First, minority ownership was henceforth to be one factor—a plus—to be considered when competitive applications were filed for a new broadcast station. Many other factors are considered in these competitive hearings, including broadcast experience, financial resources, local ownership, owner participation in the day-to-day operation of the station, the proposed programming, past participation by the applicant in civic affairs, and so on.

Second, the Commission adopted a "distress sale" policy to increase minority opportunities to acquire a broadcast station. In the unlikely event that a broadcast operator is called into question by the FCC for abuse of the airwaves, the operator is permitted to escape a "full-dress hearing," and a possible penalty, by selling his station at 75 percent of the market value, to an FCC approved minority enterprise.

Like the FCC, we in Congress have recognized the barriers faced by minorities in entering the broadcast industry, and for the past two decades have supported the FCC's attempts to promote program diversity by increasing minority ownership of the media.

In 1969, for example, we rejected a bill that would have eliminated the comparative hearing in license renewal proceedings; because it is when the license has expired—every 3 years—and is up for renewal that minority groups have an opportunity to make their bid for a license. We refused to freeze the status quo of white-only control.

In 1973, and again in 1974, we refused to extend the broadcast license period from 3 to 5 years, because, as we said again, "renewals provided a valuable opportunity for minorities to obtain a foothold in the industry."

In 1986 the FCC decided to reexamine the two policies adopted back in 1977.

We said "no," and in no uncertain terms. We did not want the FCC to change the policies which gave minorities a toe-hold opportunity to gain entry into the media. Why? Senator LAUTENBERG put it well when he explained that "minority broadcasters serve a need that is not well served by others. They address issues that others do not." Senator HOLLINGS added that the record "clearly demonstrates that minority ownership of broadcast stations does increase the diversity of view points presented over the airwaves."

We refused to permit the FCC to dismantle the two longstanding diversity policies. We said in our appropriation bill that we approved of these programs and that there was no need to study the topic further. Then we twice extended the prohibition on the use of appropriated funds to modify or repeal the minority ownership policies.

These policies have now been put to a constitutional test.

Rainbow Broadcasting—90 percent Hispanic owned—was awarded a new UHF television station in the Orlando, FL, area. It won out over Metro Broadcasting when the FCC determined that its minority credit outweighed Metro's credit for local residence and a better history of civic participation.

Meanwhile, in Hartford, CT, the Faith Center ran into trouble when it attempted to renew its television license, because of fraudulent advertising. Shurberg Broadcasting of Hartford then filed an application for the license. It was rejected when the FCC authorized the Faith Center to transfer its license to Astroline Communications Co.—a minority applicant—under the distress sale policy.

Metro Broadcasting from Orlando, and Shurberg Broadcasting from Hartford, appealed to the Supreme Court, the Bush Department of Justice joined in their contention that the two minority preference policies violate the equal-protection component of the fifth amendment.

Fortunately, the Bush administration was not successful. A majority of the Court held that: "benign race-conscious measures mandated by Congress—even if those measures are not 'remedial' in the sense of being designed to compensate victims of past governmental or societal discrimination—are constitutionally permissible."

The Court kept a judicial hand on the helm with its requirement that all such race conscious measures must "serve important governmental objectives within the power of Congress" and be "substantially related to achievement of those objectives."

Mr. Justice Brennan, in a 50-page opinion at once throughtful, scholarly, and moving to the spirit, concluded that these two hurdles were met.

First of all, the promotion of programming diversity serves "important governmental objectives." Minority ownership like the "diverse student body" in Bakke, contributes to a "robust exchange of ideas." All America benefits "by having access to a wider diversity of informative sources."

Second, the minority ownership policies are substantially related to the achievement of broadcast diversity. From its inception, public regulation of broadcasting has been premised on the assumption that diversification of ownership will broaden the range of programming available to the broadcast audience; every empiracle study bears this out.

Justice O'Connor wrote the principle dissent for the Reagan wing of the Supreme Court—Chief Justice Rhenquist, Justices O'Connor, Scalia, and Kennedy. They voted to keep minorities out of the broadcast industry by the use of insurmountable procedural hurdles; the same tactics they used last year to keep Eskimos and Filipinos out of the better jobs in the Alaska salmon-canning industry.

Justice O'Connor would require "strict scrutiny" by the Federal judiciary whenever "racial classifications" are an issue. While it is enough for the Brennan majority that the program serve an "important objective," Justice O'Connor would require that the program serve a "compelling interest," and affording minority access to the media is not a sufficiently "compelling interest" to justify the FCC minority regulations. In fact, the only compelling interests that fit her scheme of the constitution are those that remedy identified past discrimination against identifiable victims. Undoubtedly, she would have dissented with Justice Rhenquist from the decision written by then Chief Justice Burger, which upheld our set-aside program for minority business enterprises in the Public Works Employment Act of 1977. See *Fullilove* v. *Klutznick,* 448 U.S. 448 (1980).

Beyond this, Justice O'Connor worries that "consideration of race" in the allocation of broadcast facilities "may stigmatize" the beneficiaries. And while she approves in the abstract of diversification in the broadcast in-

dustry, she doubts the existence of a "black viewpoint," an "Asian viewpoint," or an "Arab viewpoint." Has she never viewed a Spanish language movie on the TV station BRAVO? Has she never tuned in on the commentary broadcast daily over the Howard University TV outlet.

Justice Kennedy also wrote a dissent—which Justice Scalia joined. He described the interest in broadcast diversity as "trivial." He then went on to find "disturbing parallels" between the majority opinion and the decision in *Plessy* v. *Ferguson,* 163 U.S. 537 (1896) which approved of separate but equal accommodations for "white" and "colored" railroad passengers. This I find somewhat disturbing. Justice Kennedy lauded the lone dissent in that case where Justice Harlan wrote that:

Our Constitution is color blind, and neither knows nor tolerates classes among citizens.

We all applaud and salute this sentiment; and someday, hopefully, our Nation will be color blind. But this will not happen without some assistance from us here in Congress. That is why I appreciate Justice Harlan's lone dissent in the earlier *Civil Rights Cases,* 109 U.S. 3 (1883) wherein he held that Congress had authority under the Civil War amendments to enact and enforce a public accommodations law; indeed, that we in Congress have full authority "to pass all laws necessary and proper for abolishing all badges and incidents of slavery in the United States," every "species of servitude," no matter what the source.

Examples of congressional affirmative action extend back to the Freedman's Bureau of 1866, a series of benign laws designed to give black Americans a leg up with land, education, and medical care. According to the Reconstruction Congress which initiated the Civil War amendments, that is what the 13th, 14th, and 15th amendments are all about. More recently, we enacted a voting rights law and ended the literacy tests demanded by many States as a condition of voting. The Supreme Court affirmed our authority to do this, because the enforcement clauses of these amendments are a "positive grant of legislative power authorizing Congress to exercise its discretion" in determining what laws are "necessary and proper" to secure the guarantees of full first-class citizenship, equal protection, and due process of the law, *Katzenbach* v. *Morgan,* 384 U.S. 541 (1966).

The Metro Broadcasting case is in keeping with this high tradition. I am happy with the majority decision, but we should not rest here. We cannot rest here. We must push on, as we are doing in the Civil Rights Act of 1990; until every facet, every phase of our nationhood is color blind.

CHEEKTOWAGA, NY, CHORUS TO TOUR EUROPE

HON. HENRY J. NOWAK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, July 23, 1990

Mr. NOWAK. Mr. Speaker, next year at this time the Cheektowaga Community Chorus, of Cheektowaga, NY, will be serving as "ambassadors of music and good will" as it travels the European Continent on a concert tour. The Cheektowaga Community Chorus has been selected the sole choral representative of New York State at festivals in France, Switzerland, and Austria.

This is a well-deserved honor for this versatile ensemble which has a rich and long cultural heritage. The Cheektowaga Community Chorus is a 94-member adult choral group which performs in the western New York area at many cultural and community events. A nonprofit organization, the chorus also performs many goodwill concerts at hospitals and nursing homes and civic functions. The chorus is in its 27th year, and is currently led by Virginia Greenan, the director since 1968. Joanne Basil is the group's current president.

The chorus will start its 1991 tour in Paris, France, where they will be a part of the production of an "American Musical Salute to France," an annual event celebrating the Franco-American bond.

The tour will then go to Switzerland where it will help celebrate the 700th anniversary of Swiss unification. The chorus will also visit Austria to commemorate the 200th anniversary of the death of Amadeus Mozart.

I would like to congratulate this wonderful cultural organization, the Cheektowaga Community Chorus, and wish them good fortune in their tour of Europe, and continued success in their future endeavors.

At this point in the RECORD, I would like to insert the text of a brochure with a brief sketch of the chorus' accomplishments and history:

Very few groups in the Town of Cheektowaga have a record of community service comparable to the Cheektowaga Community Chorus. With a long and continuing tradition of dynamic participation in all aspects of cultural and civic life in the Township, they are hailed as one of Cheektowaga's foremost musical ambassadors.

Funded in part by the Town of Cheektowaga, the Chorus' charter requires them to perform two concerts per year, but the Chorus goes far beyond these basic requirements. The Chorus is a Bicentennial Pioneer, in that it has performed at every Cheektowaga Independence Day celebration since the first one in 1976. In recent years, it has provided the music for Cheektowaga's annual Interdenominational Religious Service, and has received critical acclaim for these efforts. Concerts for Nursing Homes and Hospitals are on each yearly performance schedule. They also bring their music to the people through free concourse concerts at area shopping malls.

When there is a need to show off the best which the Town has to offer, the Chorus is always called upon. They provided the musical background for both the National Historic Site Designation for the Chapel of Our Lady Help of Christians and the grand opening of the Cheektowaga Cultural Center. The fresh and vibrant character of the Chorus' music and the variety of styles they perform give them universal appeal.

Having celebrated their 25th Anniversary Year in 1988, with a memorable concert at Kleinhans Music Hall in Buffalo, they anticipate an even more challenging musical endeavor with their International Tour.

This year 1990, as the Town is recognized as the "First Model Community," these singers will enhance the festivities with patriotic performances. The Chorus is under the capable direction of Virginia A. Greenan, who was a 1980 recipient of the Cheektowaga Bronze Medal of Honor for her work with the Chorus. The accompaniment for the group is provided by Margaret Riso.

TRIBUTE TO NELSON MANDELA

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, July 23, 1990

Mr. RANGEL. Mr. Speaker, I rise today to pay tribute to Nelson Mandela.

Mr. Mandela, whom all of us know by now as the man who overwhelmed this Chamber last month with stirring comments which raised in us our sleeping revolutionary spirits. He reminded us once again of the devotion to freedom and democracy that gave this Nation birth, and that through the decades has guided us through those crises of conscience that forced us to correct inequities and right wrongs.

Mandela is back in South Africa today, having convinced this Congress, and I hope this administration in the White House, that for us doing the right thing will mean sticking by our guns: Keeping in place those sanctions voted by the Congress in 1985 that Mr. Mandela and his supporters in South Africa are convinced have served as a critical wedge that has forced the stubborn leaders of South Africa to change their ways and begin to loosen the oppressive manacles of apartheid with which they have bound the majority of their people.

Give the South African leaders credit if you will—for coming to their senses—for coming to understand that 5 million can oppress 30 million only for a time. But let us not reward a change of a cold heart by giving away our own. As Mr. Mandela has warned us, we would be mistaken to think that the reactionary powers that be in South Africa are not looking for a signal from us that would allow them to step up their pressure to halt progress. If we lift our sanctions now, we will make it very easy for them to back up Mr. de Klerk and say, "enough."

Even as we speak of Mr. Mandela, we are reminded that our job of guaranteeing full participation in our Nation's life for all our citizens is not yet over. Mandela was too gracious a guest to speak on the subject, but we in this Chamber will soon be faced with yet another test of our own commitment to equal opportunity and equal protection under the law.

African-Americans over the last decade have been buffeted by an administration that thought it in its best interest to undo the gains

of the recent past in the area of civil rights. Unfortunately, the Supreme Court has seen fit to find ways to turn the clock back as well. Now with the 1990 civil rights bill, we have another opportunity to set the record straight and return the protections against discrimination on and off the job that African-Americans and other Americans of good conscience have fought so desperately to achieve.

I fully support the civil rights bill, and I encourage all of my fellow Members to support it as well. That legislation will be as important to all the citizens of this country as is our continued support of the struggle against apartheid in South Africa.

YOUNG TROUBLESHOOTER

HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Monday, July 23, 1990

Mr. RICHARDSON. Mr. Speaker, we hear constantly that the United States will never catch up with Japanese automotive technology. I'm proud to tell my colleagues today of Gabriel Garcia, an 18-year-old graduate of Santa Fe Technical High School in my district who recently won first place in the National Automotive Contest of the Skills Olympics in Tulsa, OK.

The contest, sponsored by the Vocational Industrial Clubs of America [VICA], had entrants from all 50 States, as well as Canada, the Virgin Islands, Puerto Rico, and Guam. Gabriel was awarded $20,000 for his first place finish, bringing to $60,000 the total prize money he has won for his skills over the past few years.

Gabriel also participated in the Triple A Trouble Shooting Contest, held recently in Washington, DC. He was accompanied by his automotive instructor, Skip Saurman, who taught some 65 aspiring mechanics during the past school year.

Gabriel plans a career as an automotive technician, specializing in computer systems. Mr. Speaker, I'm sure my colleagues join me in congratulating Gabriel Garcia on his accomplishments, and in encouraging more of our young people to take an interest in this vital area of technology.

GEORGE AUGUSTINE BROWN HONORING HIS 97TH BIRTHDAY, JULY 24, 1990

HON. KWEISI MFUME

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, July 23, 1990

Mr. MFUME. Mr. Speaker, I rise to recognize a fine Baltimorean, and a great American, George Augustine Brown. Mr. Brown will be celebrating his 97th birthday on Tuesday, July 24, 1990.

Mr. Brown's entire family will be on hand to celebrate this splendid occasion. Mr. Brown will be joined by his 10 children, their spouses, 30 grandchildren, 40 great-grandchildren, 3 great-great grandchildren, and a host of friends. Although Mr. Brown's wife, Sarah, passed away in 1985, they shared over 70 years of happy marriage together.

Gifted with a strong sense of work ethics and family loyalty, Mr. Brown is undoubtedly a model citizen. As a U.S. Postal worker and a devoted servant of God, Mr. Brown has continued to serve as a living legacy to families across our Nation. The Brown family is truly blessed with a relative with almost a century of life experiences. Mr. Brown continues to serve as a monumental historian through stories and information about past relatives.

Through his long and joyous life, Mr. Brown is living proof that the race is not promised to the swift but to he or she who endures.

I hope that my colleagues will join me in congratulating George Augustine Brown for his many years of life and dedication to family.

OLIVE CREST HONORED

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 23, 1990

Mr. DORNAN of California. Mr. Speaker, Olive Crest, the Orange County-based nonprofit organization which serves abused children, has been chosen for the second time to be honored at the Washington Charity Awards Dinner on July 30, 1990 in Washington, DC. As one of only six charities and the only nonnational charity to be selected. Olive Crest is clearly one of our brightest stars in the "Thousands Points of Light."

Founded by Dr. and Mrs. Donald A. Verleur in 1973 with a home for troubled teenage girls in Anaheim, CA, Olive Crest has grown to include 29 group homes which provide loving care and treatment in family-style settings in local residential neighborhoods. Approximately 100 children have been placed in its foster homes located in Orange, Riverside, San Bernardino, and Los Angeles Counties.

This organization serves children who are victims of physical, sexual, and emotional abuse, victims of neglect and abandonment, and children from environments where alcohol and/or drug problems prevail.

Children are referred for services by the Department of Social Services, the Mental Health Department, the Juvenile Probation Department, and other professionals such as the private defender's office, private therapists, and hospitals.

Olive Crest provides safe and warm homes for several hundred children each year and has, since 1973, assisted several thousand children in rebuilding and redirecting their lives toward wholeness and success, therapy enabling then to take their places in the community as healthy, productive and responsible citizens.

Mr. Speaker, I congratulate Olive Crest for a job well done and thank them for their commitment and dedication. They serve as an example for all of us.

SALUTE TO JUSTICE BRENNAN

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, July 23, 1990

Mr. SCHEUER. Mr. Speaker, what do you get when you combine intellectual brilliance, a passion for human rights, a dedication to the quality of life, and a lifetime devotion to upholding the Constitution of the United States of America?

You get Supreme Court Justice William Brennan.

For 34 years, this man has sat on the Supreme Court actively supporting the constitutional rights of all the people.

As one of the most widely respected Justices in the history of the Court, Mr. Brennan has forged coalitions to end segregation, to uphold the rights of women, workers, minorities, and children, to preserve reproductive freedom, and to ensure that the basic civil rights endowed by the Constitution are a reality for every citizen.

The Constitution is losing one of its most eloquent and respected watchdogs. Mr. Brennan will be sorely missed, but his legacy has solidly reinforced the foundation of our democracy, and his protection of our freedoms is already part of history.

HONORING LT. COL. THOMAS G. HARLEMAN

HON. ELIOT L. ENGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, July 23, 1990

Mr. ENGEL. Mr. Speaker, this week, Lt. Col. Thomas G. Harleman, currently Inspector-Instructor of the 6th Communication Battalion, 4th Marine Division (Reinforced) Fleet Marine Forces, U.S. Marine Corps Reserve stationed at Fort Schuyler which is located in my district, will be transferring his command.

Lieutenant Colonel Harleman has served in his current post for 2 years. His career as an officer in the U.S. Marine Corps dates back to 1972. During these past 18 years, Lieutenant Colonel Harleman has served with distinction at numerous posts in the United States as well as overseas. His decorations include the Meritorious Service Medal, the Navy Commendation Medal, the National Defense Service Medal, the Vietnam Service Medal with one star, and the Sea Service Deployment Ribbon with two stars.

Lieutenant Colonel Harleman's pending assignment is Assistant Chief of Staff, G-6, 9th Marine Expeditionary Brigade, Fleet Marine Forces, Camp Smedley D. Butler, Okinawa, Japan.

I join with Lieutenant Colonel Harleman's fellow officers and men in wishing him the best at his new assignment and thank him for his dedication and commitment.

IN PRAISE OF THE DELANCEY STREET FOUNDATION

HON. BARBARA BOXER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 23, 1990

Mrs. BOXER. Mr. Speaker, I rise today to pay tribute to the extraordinary work of the Delancey Street Foundation.

For 20 years, the Delancey Street Foundation has been a community of last resort for former felons, substance abusers, and the homeless who want to build a new life. Here, at no cost to the taxpayer or client, and without outside staff, residents of all ages, races, and backgrounds help and teach each other the skills and values they need to live not just drug-free, but legitimately and successfully in society.

Now, using the concepts of self-reliance, commitment, and hard work, Delancey Street residents have built a new home, "a masterpiece of social design," as described by Pulitzer Prize-winning columnist Alan Temko. Covering an entire city block, this four-story 350,000-square-foot complex contains street level retail stores, a public restaurant and outdoor espresso cafe, and 177 dwelling units that overlook a Mediterranean-style courtyard which also holds a vast array of educational and recreational facilities.

There is nothing like it anywhere in the world.

This has not only been a building project but an unprecedented vocational training program as well; over 250 formerly unemployable drug addicts, homeless people, and ex-felons now in Delancey Street have been trained in every skill in the building trades, as well as in purchasing, contracting, computer, and accounting services.

The magnificant new home will let Delancey Street double its current population. But more than that, it is a tangible representation of the Delancey Street principle that ordinary people can transform extraordinary—even impossible—dreams into reality, by pooling their resources, supporting one another, and living lives of purpose and integrity.

A TRIBUTE TO DR. PEDRO JOSE GREER, JR.

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 23, 1990

Ms. ROS-LEHTINEN. Mr. Speaker, it is a distinct honor and privilege to recognize Dr. Pedro Jose Greer, Jr., who, on September 24 will be presented the Award for Leadership by Hispanic Heritage Awards 1990 for his outstanding achievements in public health care in the Miami, FL, metropolitan area.

This great man has an exemplary record of selfless dedication to public health care. He has devoted himself especially to the critical needs of the homeless, battered women, and children.

When the homeless people of downtown Miami had no way of getting desperately needed medical attention, Joe Greer took action. He coaxed these improverished souls out from under the bridges and out of their cardboard houses and established the Camillus Health Concern, a free, walk-in clinic for the homeless. Run by volunteers and donations of medical equipment and medications, the clinic is the only one of its kind in Florida.

When the children of Overtown Miami urgently needed medical assistance, Joe Greer again took charge. He didn't simply bemoan the plight of these poor kids, frustrated at the harsh realities of city life. He didn't simply write a letter to the editor, telling others that something ought to be done. No, he went out and made sure that something was done. He fought for these little ones and founded a second clinic. Now, these needy young kids are getting the care they need at the Douglass Elementary Clinic.

Through it all, he has refused to admit to being the extraordinary hero that he is. Instead, it has been his goal to encourage the entire medical community to volunteer their services regularly. "There is no reason why private practitioners can't donate half a day every month to work at a clinic," he has said.

Well, Mr. Speaker, Joe Greer has given much more than that, and is to be admired and emulated by us all. Dr. Greer is currently involved in many boards and committees concerned with public health, including: the Rand Corp. Drug Policy Center, Catholic Community Services, and the Stanley C. Myers' Community Health Center. He has been a member of the National Advisory Council on Health Care for the Homeless and was the medical director of the Dade project, a health care project for the homeless of Dade County.

Dr. Greer was the chairman of the Children in Crisis Committee of the Cuban American National Council, and a board member of Safe Space, a shelter for battered women in Miami. He has been chairman of the city task force for health care to the homeless and was on the board of directors for the Coalition of the homeless. This outstanding individual has also been active as a member of the executive board of the Cuban American National Council.

In addition to his magnanimous public service, Dr. Greer has held fellowships in hepatology and gastroenterology at the University of Miami School of Medicine. He is a contributing editor to the Miami Medical Newsletter, and tirelessly makes presentations at schools on providing medical services to the homeless.

Hispanic Heritage 1990, whose host committee includes 27 national organizations, as well as ambassadors of the Organization of American States, has chosen this year's recipient of the Leadership Award wisely. Joe Greer has previously received the 1990 Cedars Foundation Fund Concern Award, the 1989 Volunteer of the Year Award, and a special 1989 award honoring excellence at the Cuban Medical Convention. In 1989, Newsweek magazine named him one of the unsung heroes of America.

The Speaker, Dr. Pedro Jose Greer, Jr., one of those thousand points of light, has shown exemplary dedication to public health. He is truly worthy of the highest praise and I am proud to join Hispanic Heritage in honoring him.

LI HUI, A CHINESE POLITICAL PRISONER

HON. RONALD D. COLEMAN

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, July 23, 1990

Mr. COLEMAN of Texas. Mr. Speaker, I rise today to enter into the CONGRESSIONAL RECORD a brief statement on Li Hui, a Chinese student detained along with 45 others last June in Tianjin after being accused of activities as a counterrevolutionary rebel.

According to a report in the June 17, 1989, edition of Tianjin Ribao, Li was turned over to the Beijing Municipal Public Security Bureau on June 15 of last year. The report went on to refer to Li as the "general commander of the west line of Tiananmen Square under the Beijing Self-Governing Union of College Students" and said he had taken part in blocking the path of military vehicles. The official account of the charges cited as grounds for his detention further state that he had organized a propaganda team to go to Jinan and Wuhan to stage counterrevoluntionary instigation. Li and seven others had arrived in Tianjin on June 6, 1989, and had begun to distribute leaflets describing the true situation of the June 4 massacre prior to their arrests.

According to Asia Watch and other groups that have attempted to follow the fate of the up to 30,000 political prisoners jailed for their support of the prodemocracy movement, Li's whereabouts and physical condition are unknown. I recognize that the Government of the People's Republic of China is not in the habit of responding to expressions of concern for the well-being of its citizens by Members of Congress, but I sincerely hope that in this case, it will make an exception.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

39-059 O-91-22 (Pt. 13)

Meetings scheduled for Tuesday, July 24, 1990, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

JULY 25

9:30 a.m.
Commerce, Science, and Transportation
Surface Transportation Subcommittee
To hold hearings to review the methods of transporting hazardous materials and on proposed legislation authorizing funds for the Hazardous Materials Transportation Act.
SR-253

Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

9:45 a.m.
Energy and Natural Resources
Energy Research and Development Subcommittee
To hold hearings on the current operations and future mission of the Department of Energy's national laboratories, focusing on ongoing programs at the laboratories and potential new and enhanced programs, and math and science initiatives that could utilize the expertise of the national laboratories.
SD-366

10:00 a.m.
Banking, Housing, and Urban Affairs
To resume hearings to examine financial service developments in Europe and Japan in relation to modernizing the American financial services industry.
SD-538

Budget
Business meeting, to mark up proposed legislation to reform the budget process.
SD-608

Foreign Relations
Business meeting, to consider pending calendar business.
SD-342

Labor and Human Resources
To hold hearings on proposed legislation to revise and strengthen the Federal Drug Administration's [FDA] regulation of medical devices.
SD-430

Joint Economic

Foreign Relations
To hold hearings on S. 2575, to urge the Secretary of State to negotiate a ban on mineral resource activities in Antarctica, and S.J. Res. 206, calling for the U.S. to encourage immediate negotiations toward a new agreement among Antarctic Treaty Consultative parties, for the full protection of Antarctica as a global ecological commons.
SD-419

2:00 p.m.
Finance
International Trade Subcommittee
To hold hearings to review the final report on the U.S.-Japan Structural Impediments Initiative (SII) talks.
SD-215

JULY 30

9:30 a.m.
Judiciary
Antitrust, Monopolies and Business Rights Subcommittee
To hold hearings on the impact of restructuring the savings and loan industry.
SD-226

2:30 p.m.
Finance
International Trade Subcommittee
To hold hearings on the impact of environmental concerns on international trade, focusing on proposed legislation to prohibit designation of a control as a beneficiary under the U.S. Generalized System of Preferences or the Caribbean Basin Initiative unless that country has effective pollution control standards and meets those standards.
SD-215

JULY 31

10:00 a.m.
Commerce, Science, and Transportation
Business meeting, to consider pending calendar business.
SR-253

2:00 p.m.
Energy and Natural Resources
Water and Power Subcommittee
To hold hearings on S. 2659, to revise and supplement Federal reclamation law to eliminate abuses of the Reclamation program, and H.R. 2567, to authorize funds for the construction of the Buffalo Bill Dam and the Reservoir, Shoshone Project, Pick-Sloan Missouri Basin Program, Wyoming.
SD-366

2:30 p.m.
Judiciary
To hold hearings on S. 1400, to regulate interstate commerce by providing for a uniform product liability law.
SD-138

AUGUST 1

9:30 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold hearings on reversing the decline of the U.S. electronics industry.
SR-253

Judiciary
Technology and the Law Subcommittee
To hold hearings on S. 2030, to protect the privacy of telephone users by permitting the use of pen registers and trap and trace devices on emergency assistance telephone lines of police and fire departments and where the provider of wire or electronic communication services enables the communication originator to block receipt of his or her number (caller identification).

Business meeting, to mark up S. 1554, to implement water settlements involving the Pyramid Lake Paiute Tribe, the States of California and Nevada and other parties regarding the waters of the Truckee and Carson Rivers and Lake Tahoe in Nevada and California, and H.R. 5063, to provide for the settlement of the water rights claims of the Fort McDowell Indian community in Arizona.
SR-485

SEPTEMBER 18

9:00 a.m.
Veterans' Affairs
To hold joint hearings with the House Veterans' Affairs Committee on legislative recommendations of the American Legion.
SD-106

HOUSE OF REPRESENTATIVE—*July 24, 1990*

The House met at 11 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Direct our thoughts, O God, to focus on things eternal; encourage our minds to think on the blessings we have received; sustain our souls in the confidence of Your presence; give strength to our wills so we speak and do the right and, O gracious God, nurture us in all things that we will know Your gift of spiritual health and peace. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER. Will the gentleman from Oklahoma [Mr. SYNAR] please come forward and lead the House in the Pledge of Allegiance.

Mr. SYNAR led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Hallen, one of its clerks, announced that the Senate had passed without amendment a bill of the House of the following title:

H.R. 2843. An act to establish the Tumacacori National Historical Park in the State of Arizona.

The message also announced that the Senate had passed with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 3265. An act to amend the Communications Act of 1934 to provide authorization of appropriations for the Federal Communications Commission, and for other purposes.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 1076. An act to increase public understanding of the natural environment and to advance and develop environmental education and training;

S. 1992. An act to require the Federal Communications Commission to ensure that broadcasters provide children's television programming that meets the educational and informational needs of the child audience, and for other purposes; and

S. 2874. An act to authorize the reformulation of the Cedar Bluff Unit of the Pick-Sloan Missouri Basin Program, Kansas, to provide for the amendment of water service and repayment contracts.

TIME FOR A UNIVERSAL NATIONAL HEALTH CARE PLAN

(Mr. GLICKMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GLICKMAN. Mr. Speaker, in January in the State of the Union Message President Bush made a promise. He announced that the Secretary of Health and Human Services would give him recommendations on how to deal with the soaring cost of health care and the people with no health coverage.

The answer came back yesterday. The Nation's health care system, Mr. Sullivan said, must remain a free market system, and no major substantive changes will be made to that health care system.

The President's promise on health care remains unfulfilled to the 37 million Americans with no health insurance. It remains unfulfilled to the working Americans who pay up to 25 percent of their income on health insurance premiums. It remains unfulfilled to the elderly who have their assets wiped out by long-term and catastrophic care costs. It remains unfulfilled to the children who have no coverage and need it the most. It remains unfulfilled to millions of small business owners who cannot continue to pay even a portion of escalating health costs for their employees.

Mr. Speaker, the current health care system is in desperate need of revision. It is time to adopt a universal national health care program for all Americans. Broken promises will not make Americans healthier. President Bush has missed a wonderful opportunity to make this country a kinder, gentler place to live.

FEDERAL FARM PROGRAMS ARE GOOD FOR AMERICA

(Mr. EMERSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EMERSON. Mr. Speaker, periodically, the Department of Agriculture publishes a report detailing the comparison between our food prices and what our foreign neighbors pay for their groceries. If you have taken the time to study these figures, it should be no surprise to learn that we as Americans continue to be the best fed people at the lowest cost in the world; and Federal farm programs are a primary reason why.

For the domestic consumer, the American agricultural machine is the best deal going. Knowing this, most would anticipate that the farm bill that we are considering this week should be the envy of our foreign competitors and the boast of American consumers. Unfortunately, there are those who want to dismantle current farm policy and leave farmers with empty pockets and consumers with bare supermarket shelves.

Fortunately, one fact is certain. Americans spend considerably less of their personal income on food than individuals living in any other industrialized nation. For example, the Japanese commit almost 19 percent of their consumable income to the purchase of food, the Soviets over 28 percent, the Koreans nearly 36 percent, and the Chinese over 47 percent. Yet, Americans need only put aside 11 percent of their disposable income for trips down the grocery aisle.

Critics of American agriculture also say that our farm programs are too costly. In 1990, the USDA estimates farm program costs will be slightly above $8 billion. Contrast that with more than $36 billion spent by the European Community during the same period, or with Japan, with half our population, which will spend more than $10 billion on farm supports. Our foreign competition spends far more on their programs while their consumers pay more at the supermarket. Who has the better deal?

As we consider the 1990 farm bill over the next few days, please remember that the entire Nation benefits from the American farmers' daily sunup to sundown efforts. The world greatly depends upon American agriculture to guarantee the plentiful supply of food and fiber for both domestic and overseas consumption—something every single person in this Nation can't live without.

□ 1110

OVERRIDING THE PRESIDENT'S VETO OF THE FAMILY AND MEDICAL LEAVE ACT

(Mr. VISCLOSKY asked and was given permission to address the House

for 1 minute and to revise and extend his remarks.)

Mr. VISCLOSKY. Mr. Speaker, on September 9, 1988, before a group of 200 GOP women in Rockford, IL, candidate George Bush stated: "We need to assure that women don't have to worry about getting their jobs back after having a child or caring for a child during a serious illness."

On June 29, President Bush broke that promise. He vetoed the Family and Medical Leave Act, which would provide unpaid leave and prevent Americans from being forced to choose between work and family.

Unfortunately, this is just one of a series of broken promises to the American people. Why did the President break yet another campaign pledge?

He would like us to believe that it is an issue of competitiveness. Nonsense. The United States and South Africa are the only major industrialized nations that lack a family leave policy.

Indeed, Japan—one of our fiercest competitors—not only has a leave policy, but it is a partially paid one.

We should hold George Bush to his campaign promise, and override his veto of the Family and Medical Leave Act.

CAMPAIGN PROMISES

(Mr. SMITH of Florida asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of Florida. Mr. Speaker, let us take a little pop quiz. Category: campaign promises.

In the year 1988 who said the following: "Treat white collar criminals as you would treat any other criminal. Lock them up. They belong in jail?"

Who said: "We need to assure that women don't have to worry about getting their jobs back after having a child or caring for a child during a serious illness?"

Who said: "We are going to keep the Social Security trust fund sound and out of reach of the big spenders?"

Finally, Mr. Speaker, who said: "Read my lips: no new taxes?"

That is right, you guessed it.

Hardly anyone has gone to jail in the S&L scandal. The President is in charge.

He vetoed the Family Medical Leave Act. He has used the trust funds to cover his deficit, and he has come out in favor of new taxes.

But that is OK, Mr. Speaker. He did not mean to break those promises.

IN SUPPORT OF H.R. 3950, THE 1990 FARM BILL

(Mrs. SMITH of Nebraska asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SMITH of Nebraska. Mr. Speaker, I take the well today in support of H.R. 3950, the 1990 farm bill.

And in doing so, I want to thank and commend the Agriculture Committee for the long and hard hours of work that produced this bill.

American agricultural exports have regained international prominence—helping to balance our trade deficit. And farmers' net incomes have started to show improvement with shrinking debt.

If we have landed on agriculture policy that is working, there is no reason to abandon it. And the committee has given us a bill intended to make a successful policy that much better.

On the major commodity programs, H.R. 3950 should help stem the export of soybean acres, and allow farmers enough flexibility to begin the export of actual soybean production.

On sugar, H.R. 3950 continues a fair program to provide consumers with a consistent supply of low-priced sugar and U.S. farmers with a stable market.

On research, H.R. 3950 will enhance our ability to commercialize new alternative crops and find new uses for traditional crops.

On the environment, H.R. 3950 will increase the protection of wetlands, ground water, and topsoil resources.

My district in Nebraska is the second most agricultural district in the Nation, and agriculture is the backbone of the Nation's economy. Only when the agricultural economy is sound, can the national economy be truly stable.

I urge my colleagues not to gut the already successful farm programs.

I urge you not to demand that agriculture do more than its fair share toward reducing the deficit.

And I urge you to support the good work of the House Agriculture Committee in H.R. 3950.

OVERRIDE THE PRESIDENT'S VETO OF FAMILY AND MEDICAL LEAVE ACT

(Mr. McDERMOTT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McDERMOTT. Mr. Speaker, the President's veto of the Family and Medical Leave Act was, plainly and simply, a veto against working families and especially working women. Women are the primary caregivers for children and for the elderly. Yet we have not offered them true equality in the workplace, or adequate child care, or appropriate long-term care for the elderly. We still expect women to fulfill the traditional caregiver role and yet we penalize them when they try to do so by forcing them to choose between their jobs and their families.

People say this bill will cost jobs, but they offer no evidence. People are already losing their jobs, when a child is born or a family member becomes ill.

If you do not want mothers to be with their infants in the first critical months of life, if you would rather have Government pay for all the home care that women now provide—free—to their aging parents, and if you think America is too weak or too cheap to compete with all the other industrialized countries that now offer family leave—then by all means vote with the President on this one. But if you want to strengthen families, then I urge you to override this veto.

TIME TO CUT WASTE, FRAUD, AND ABUSE IN THE PENTAGON

(Mr. DORGAN of North Dakota asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORGAN of North Dakota. Mr. Speaker, this weekend President Bush made a couple of campaign stops and did a little politicking.

At the first stop, he pointed an accusing finger at the Democrats, saying that the Democrats were the big spenders. He wanted to reduce the deficit by cutting spending, he said.

At the next stop, he broke a bottle of champagne across the bow of a new Navy ship he was christening and he warned against spending cuts in defense.

It is a curious message the President is sending. He apparently is for spending cuts for those programs that help people, but he's not for spending cuts for the MX missile, the B–2 bomber, the Midgetman missile, the trip to Mars.

The President's weekend trip is a perfect description of why we're not able to solve this deficit mess. He says he's for spending cuts. But when it comes to cutting the biggest pot of spending in the Federal Government, then his action is that of a toothless tiger.

Mr. President, if you say the deficit can only be solved by cutting spending and then you propose that the largest area of spending be protected, I wonder how interested you are in solving the problem.

Mr. President, join the rest of us in America who understand that when we stuffed $300 billion in the pockets of the Pentagon, we got some ships and planes but we also got a lot of waste, fraud, and abuse. It's time to cut that waste, fraud, and abuse.

SENECA NATION SETTLEMENT OF 1990

(Mr. HOUGHTON asked and was given permission to address the House

for 1 minute and to revise and extend his remarks.)

Mr. HOUGHTON. Mr. Speaker, today I am going to introduce a bill into the House, the Seneca Nation Settlement of 1990.

This is a once-in-a-lifetime opportunity occurring in the southern tier of my own home State, New York. It focuses on two groups, the brave Nation of Seneca Indians and second, the Salamanca City, right within that nation.

In a few months it will be the end of a 100-year-long lease arrangement between the nation and the Federal Government. We are now in the process of negotiating another lease of a similar timeframe with enhanced lease payments and other considerations proposed to the Federal Government and the State.

□ 1120

I will not go into the details. I will not talk about them because we will be discussing those later. But, you know, in this day and age of finger-pointing at the President, blaming one another for one thing or another, here is a unique relationship between a nation, a city, the Federal Government and the State, who bargained in good faith, hold total trust in one another, trying to reach a conclusion to a 100-year lease situation.

Mr. Speaker, there are wonderful opportunities which exist up in upstate New York. This is one of those good-news issues with which I am proud to be associated.

CAPITAL GAINS CUT: PUNISHMENT FOR THE POOR

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TRAFICANT. Mr. Speaker, in the last 10 years, the rich got richer in America and the poor got poorer. In fact, the rich income almost doubled, while poor people's income fell below $7,000 last year.

Let me say that again: The richest 1 percent in America now make more money than the 40 percent of the bottom of the ladder combined. And guess what, the poor also pay more taxes, and President Bush says we want a tax increase.

Who will that tax increase be on, folks? He wants a capital gains tax break for the rich. Capital gains, hell, this is capital punishment for the poor.

There is only one consolation I can think of for poor people in America, now that the President has said "no" to national health insurance. I never heard of anybody committing suicide by jumping out of a basement window. That is about the only advantage the poor people in this country have.

Let us stop the tax breaks for the wealthy and let us provide national health insurance for all the American people.

ABUSE OF THE EXCLUSIONARY RULE

(Mr. GEKAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GEKAS. Mr. Speaker, Members of the House, the President of the United States sent to the Congress a long time ago a strong anticrime bill that included the death penalty for the most serious and heinous offensive crimes known to mankind being perpetrated every day in this country that we love so much.

It included a bill to modify the exclusionary rule so that criminals cannot get off on technicalities on questions like: a raid on a house where cocaine was found. Even though the search warranted wanted to look for something else, that cocaine cannot be used against those criminals because of the technicalities of the exclusionary rule.

The President wants to change that.

But, Mr. Speaker, the House Committee on the Judiciary yesterday passed a bill, controlled by the Democrats, my friends on the other side, which makes the death penalty inoperable, which makes the exclusionary rule a mockery and which the entire bill is a pro-crime bill in all its elements because it does not do anything about the career criminal, nor does it impose the death penalty on the most serious crimes in our country.

KEEP THE TOBACCO PRICE SUPPORT PROGRAM IN THE AGRICULTURE BILL

(Mr. ROSE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROSE. Mr. Speaker, a great many of my colleagues in this House on both sides of the aisle have very valid and sincere concern about cigarette smoking. I recognize their concerns, and I also recognize that Senator KENNEDY and the gentleman from California, Mr. WAXMAN, and a great many of my colleagues in the House have legislation to deal with those issues in the weeks and months ahead of us.

Please, though, be careful in the farm bill when an amendment is offered to do away with the Tobacco Price Support Program. Do not think that is an antismoking vote.

The Tobacco Price Support Program keeps the price of tobacco high. It is not a subsidy program. It is paid for by the farmers. If you kill the tobacco program, you make tobacco cheaper to the companies; they will smile all the way to the bank.

Please stick with the Tobacco Price Support Program.

THE DEMOCRATIC PARTY CONVENTION IN NEW YORK CITY

(Ms. MOLINARI asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. MOLINARI. Mr. Speaker, 2 weeks ago, the Democratic Party chose New York City as the site for their 92d convention. As a New Yorker, I am delighted that our city will reap the financial infusion which it needs so desperately. From a political perspective, however, I was somewhat surprised.

Our visitors will see a city much dirtier and more congested than in the past due to recent budget cuts. They will visit a city in the grips of fear as our crime rate soars out of control. Homicides are up 20 percent over last year and our police commissioner admitted that he just "doesn't have the resources to do the job." Our fire department is sending out short-handed crews which this weekend was attributed to the deaths of three children in Harlem. Violence within our prisons can no longer be contained without more guards.

And yet our State and city taxes have gone up. New York City is once again the Nation's capital of taxes. But the only thing that has accompanied these tax increases is an increase in homes and businesses up for sale. Our one small consolation is that they are no longer moving to New Jersey thanks to Jim Florio.

Anyway, on behalf of the few Republicans in New York City, I want to express my gratitude to the Democratic National Committee for helping New York City. Lord knows we need it.

TWENTY-ONE THOUSAND TIMBER JOBS: NO THREAT TO THE SPOTTED OWL

(Mrs. UNSOELD asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. UNSOELD. Mr. Speaker, on May 1, the Bush administration told the world that listing the spotted owl as a threatened species would cost the Northwest 28,000 jobs.

That same day, the administration had a plan to save many of those jobs, but kept that plan secret.

Well, it is secret no more, thanks to whistleblowers who leaked it to my colleague from Oregon, Congressman PETER DEFAZIO.

I'm talking about 21,000 jobs, good timber industry jobs—all without further threatening the owl.

Thankfully, Congress is already acting to save a lot of these jobs. Congress is moving to restrict the export of raw logs from public lands, thus keeping mill jobs here, instead of shipping them to Japan.

We know we can save thousands of jobs in the Northwest. We know the administration knows it. If we are going to save our timber towns and timber families: we do not need the administration hiding internal documents that will save timber jobs in the Northwest; we do need the administration to get on board.

PRESIDENT BUSH'S FIRST NOMINATION TO THE SUPREME COURT

(Mr. DORNAN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORNAN of California. Mr. Speaker, some brief thoughts about the dominant media culture's liberal reaction to a President, who won a huge victory in 1988 making his first Supreme Court nomination: arrogant and obnoxious in the extreme.

One national lady anchor person suggested there might be violence in the streets if the selection were not liberal; another one suggested we would roll back the clock if a conservative were selected.

Look, Mr. Speaker, it is obvious that school teachers, like my conservative younger brother, did not cause the pollution of the public marketplace that we have today. It has been caused by liberal philosophy.

Finally, a national person in the media has the guts to print the lyrics of Two Live Crew in a national magazine. This week's Newsweek magazine has an article by George Will. It talks about America's slide into the sewer. And it all happened with the ACLU hiding scum pornographers behind the beautiful first amendment.

Read the lyrics of Two Live Crew. Read what we are going to be talking about in the NEA debate coming up. Read what people have done to our children.

And, Mr. Speaker, every one of our sisters, wives, mothers, yes, grandmothers and daughters around this country are being victimized by the liberal philosophy that protects this kind of heinous, satanic slop in our public marketplace.

CONGRESSIONAL CAMPAIGN FINANCE REFORM

(Mr. DERRICK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DERRICK. Mr. Speaker, it is my pleasure today to introduce legislation to reform the way congressional candidates finance their campaigns.

Critics of our electoral system have charged in recent months that congressional candidates rely too heavily on contributions from political action committees, or PAC's, and too little on contributions from individual voters back home. They have succeeded in planting the idea in many peoples' minds that PAC contributions are inherently evil because PAC's serve only the interests of "fatcats" at the average citizen's expense.

Although I disagree with the critics' premise, I strongly agree that congressional candidates should shift their fundraising away from PAC's and more toward individual contributors, for several reasons. First is the public's growing perception of PAC's as special interests. Second, increased small contributions would lead candidates to get out and meet more voters face-to-face. Finally, the overwhelming majority of PAC contributions flow to incumbents, so our current system makes it tough for challengers to raise enough money to mount credible campaigns.

My legislation begins by reducing the amount PAC's can contribute to congressional candidates from the current $5,000 per election to $2,000. Next, the bill encourages small donors to contribute by creating a tax deduction of up to $200 for contributions to candidates from a taxpayer's home State. To encourage candidates to solicit such contributions, the bill provides for dollar-for-dollar Federal matching payments for all qualifying contributions. To weed out frivolous candidates, only those who demonstrate broad appeal by raising at least $25,000 in increments of $200 or less will be eligible to receive a Federal match.

I also believe candidates rely too much on negative, often vicious campaigns centered around 30-second TV commercials which say nothing about issues and only sling mud. My bill requires broadcasters to provide their lowest unit charge for congressional campaign ads of 1 minute or longer in duration. If a congressional candidate wants to go negative, he can, but it would cost him significantly less to take the high road.

Mr. Speaker, this legislation will greatly improve the way Americans elect their Congress, so I urge Members to support it. I want to thank Dr. Norman Ornstein of the American Enterprise Institute for his assistance in drafting this measure.

□ 1130

CORRECT VETO ON FAMILY AND MEDICAL LEAVE ACT

(Mr. GRANDY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GRANDY. Mr. Speaker, I take this time only to briefly defend the President on the veto of the Family and Medical Leave Act, and remind Members that the President has not changed his position, has not falsified any of his statements. He is committed to parental leave. He is not committed to H.R. 770.

Why? Because this bill provides, among other things, unprecedented labor damages, quadruple back pay, unknown in labor law as we see it now. It provides no option for the employer to receive notification from the employee, if he or she should decide not to return during the leave, which is also unprecedented. And unlike the 30 States, Mr. Speaker, in the United States, that do have some parental leave option, this one-size-fits-all mandate provides no flexibility for the employer and the employee to tailor their need benefits.

The President has not changed. He wants commonsense policy. He wants sound solutions that reflect an evolving workplace. For that reason, he wisely vetoed the Parental Leave Act. For that reason, tomorrow, the House will sustain that veto.

KEEP AMERICAN AGRICULTURE STRONG WITH FARM BILL

(Mr. HUCKABY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUCKABY. Mr. Speaker, for the next 2 days and 2 nights the House will consider the 1990 farm bill. We only consider farm bills every 5 years, hence its importance and significance, for it will determine the shape of American agriculture through 1995.

Mr. Speaker, the 1985 farm bill worked amazingly well. Relative prosperity has been restored to American agriculture. It has been a tremendous deal for the American consumer. The American consumer only spends 11 percent of his disposable income, on the average, for food. Only 11 percent.

Mr. Speaker, I would like to point out to my colleagues that the top 15 percent of our farms, our biggest 15 percent, produce 70 percent of the American agriculture output. There is going to be a tax on the farm bill amendments offered to prohibit some of these programs from participating in our Government programs. Let Members keep American agriculture strong. I urge my colleagues to stay with the committee.

CONGRATULATIONS TO DENNISON, OH

(Mr. APPLEGATE asked and was given permission to address the House for 1 minute.)

Mr. APPLEGATE. Mr. Speaker, I would like to tell Members and all listening about a pulling up by the bootstraps success story in little Dennison, OH, in Tuscarawas County.

A large wholesale grocery there was pulled down in bankruptcy by its parent company, causing a lot of layoffs, 175 people in a very small community. Many people said, "Well, you cannot come back from that bankruptcy, it cannot be done." But they did not count on the dogged determination of the local towns people, and people like Gene Tolloty and Blair Hillyer, who brought the forces together to make it work, as well as the employees. The local people in the area bought the company, and they are bringing it back. This week, they opened it up under Tusco Grocers.

What could not be done, was. The Bible says, "If you have the faith of a mustard seed, you can move mountains." Believe me, they moved a lot of mountains, and they did it without any Federal help whatsoever. So our hats ought to be tipped to the people of Dennison, OH, one of the great little cities in the United States.

AFRICAN-AMERICAN HEBREWS IN ISRAEL

(Mr. DYMALLY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DYMALLY. Mr. Speaker, the Washington Post, on Saturday, July 7, 1990, carried a story about an agreement reached between the Government of Israel and the African-American Hebrews in Dimona, Israel. Mr. Speaker, that agreement has been as a result of more than 8 years of patient negotiations between my office and the Government of Israel. Those discussions brought me face to face with three Prime Ministers of Israel.

However, thanks to the efforts of Secretary Baker, Chairmen FASCELL, HAMILTON, and RANGEL, Mrs. LANTOS, wife of Congressman LANTOS, Stewart Einsentat, Rabbi Sarpestein, the Israeli Embassy in Washington, DC, the United States Ambassador in Israel, the Israeli Ministries of Interior and Foreign Affairs, and the patience of the African-American Hebrews. This agreement, we hope, will mark the beginning of a relationship of reconciliation regarding the problems faced by the African-American Hebrews in Israel.

LAFAYETTE DESERVES BETTER THAN THE ALBANIANS

(Mrs. BENTLEY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BENTLEY. Mr. Speaker, Marquis de Lafayette—a man who fought bravely in the American and French Revolutions. He is one of the two foreigners that Congress has honored by making a citizen of the United States. The other is Winston Churchill.

We have also honored him by naming the park across from the White House after him—Lafayette Park, a place that, unfortunately, has become the home of nothing but protest.

This week, there is another protest—this time by Albanians intent on bringing their brand of bitter, internecine warfare to the United States. They carry signs calling me, Congresswoman BENTLEY, a Stalinist puppet.

My reputation spans over nearly a half century, as a reporter and a Congresswoman trying to bring truth to bare facts and fighting for the underdog.

It is time to realize the Albanian—and Kosovo—situation for what it is. Albania is the one true repressive regime left in Europe—and was the only Maoist stronghold in Europe. The Albanians are attempting to spread their totalitarian rule over the Yugoslavian province of Kosovo while at the same time, boatloads of their citizens are fleeing to Italy.

Maybe it is time the government finds a better way to honor Lafayette than to allow those who champion suppression to parade in his shadow.

□ 1140

EXPLANATION OF PROPOSED AMENDMENTS TO THE FARM BILL

(Mr. VOLKMER asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. VOLKMER. Mr. Speaker, I would like to take this time of the House to announce to those who have been privy earlier to my discussions on the dairy program that although I thought I had worked out an agreement with some members of the Committee on Agriculture for the dairy program, we were unable to do so. But I will be offering my amendment that will increase the producer's income over that of the committee print, and that will do it at less cost to the taxpayer and the Government.

There will be no additional increase in price to the consumer because it is a price program that is for $10.60 per hundredweight instead of the committee print figure of $10.10. It also provides for a two-tier supply management program similar to the peanut program and similar to other agricultural programs.

Therefore, this is an amendment that I think all Members of the House can support in order to provide a stable supply of milk and dairy products to our consuming public, at the same time at less cost to the taxpayer and at the same time with over a $1 billion increase in income to the dairy producers.

Mr. Speaker, I look forward to offering that amendment when we get to title IV, and I hope that every Member will support it.

PERMISSION FOR MEMBER TO OFFER AMENDMENT IN MODIFIED FORM TO H.R. 3950, FOOD AND AGRICULTURAL RESOURCES ACT OF 1990

Mr. SYNAR. Mr. Speaker, I ask unanimous consent that, during consideration of H.R. 3950, pursuant to House Resolution 439, I may be permitted to offer the Synar amendment printed in House Report 101-609 in the modified form that I have placed at the desk.

The SPEAKER pro tempore (Mr. HARRIS). Is there objection to the request of the gentleman from Oklahoma?

Mr. MOAKLEY. Mr. Speaker, reserving the right to object, and I will not object, I would like the House to know that the gentleman has discussed the amendment with the Committee on Rules, and the committee has no objection to the request.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

FOOD AND AGRICULTURAL RESOURCES ACT OF 1990

The SPEAKER pro tempore. Pursuant to House Resolution 439 and rule XXIII, the Chair declares the House in the Committee of the Whole on the State of the Union for the further consideration of the bill, H.R. 3950.

□ 1142

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 3950) entitled the "Food and Agricultural Resources Act of 1990," with Mr. BONIOR in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose on Monday, July 23, 1990, all time for general debate had expired.

Pursuant to the rule, the amendment in the nature of a substitute recommended by the Committee on Agriculture now printed in the reported bill, as modified by the amendments printed in section 1 of the House Report 101-609, shall be considered by titles as an original bill for the purpose of amendment and each title is considered as read.

No amendment to said substitute, as modified, is in order unless printed in the "Amendments" portion of the CONGRESSIONAL RECORD on or before Friday, July 20, 1990, except for pro forma amendments for purposes of debate or amendments offered pursuant to the provisions of House Resolution 439.

It shall be in order for the gentleman from Texas [Mr. DE LA GARZA] after consultation with the gentleman from Illinois [Mr. MADIGAN] to offer at any time during consideration of each title an amendment or amendments en bloc to that title, including modifications in the text of any amendments printed in the CONGRESSIONAL RECORD which are germane thereto.

It shall be in order for the gentleman from Texas [Mr. DE LA GARZA], after the disposition of all other amendments, to offer amendments en bloc, which may include amendments to portions of the bill already read for amendment.

It shall be in order to consider en bloc the amendments printed in section 2 of House Report 101-609. Said amendments en bloc made in order by House Resolution 439 shall not be subject to a damand for a division of the question.

After the disposition of all amendments, except for the amendments offered en bloc by the gentleman from Texas [Mr. DE LA GARZA] which may amend portions of the bill already read for amendment, it shall be in order to consider the amendment offered by the gentleman from Oklahoma [Mr. SYNAR], printed in section 3 of House Report 101-609. Said amendment shall not be subject to amendment, except for an amendment offered by the gentleman from California [Mr. PANETTA], and pro forma amendments for debate.

No amendment shall be in order which affects the subject of title 19 of said substitute, as modified.

The Clerk will designate section 1.

The text of section 1, as modified by the amendments printed in section 1 of House Report 101-609 of the Committee on Rules, is as follows:

H.R. 3950

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE AND TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "Food and Agricultural Resources Act of 1990".

(b) TABLE OF CONTENTS.—The table of contents is as follows:

TITLE I—COTTON

Sec. 101. Loan rates, target prices, disaster payments, Acreage Limitation Program, and land diversion for the 1991 through 1995 crops of upland cotton.
Sec. 102. Suspension of base acreage allotments, marketing quotas, and related provisions.
Sec. 103. Commodity credit corporation sales price restrictions.
Sec. 104. Nonapplicability of section 103(a) of the Agricultural Act of 1949 to the 1991 through 1995 crops of upland cotton.
Sec. 105. Skiprow practices.
Sec. 106. Preliminary allotments for 1996 crop of upland cotton.
Sec. 107. Extra long staple cotton.
Sec. 108. Adjustment of support prices.
Sec. 109. Cottonseed and cottonseed oil price support.

TITLE II—SUGAR

Subtitle A—Price Support and Marketing Allotments

Sec. 201. Sugar program extension.
Sec. 202. Information reporting.
Sec. 203. Marketing allotments for sugar and crystalline fructose.
Sec. 204. Establishment of marketing allotments.
Sec. 205. Allocation of marketing allotments.
Sec. 206. Assignments of deficits.
Sec. 207. Provisions applicable to producers.
Sec. 208. Special rules.
Sec. 209. Regulations; violations; publication of Secretary's determinations; jurisdiction of the courts; United States attorneys.
Sec. 210. Appeals.
Sec. 211. Administration.

SUBTITLE B—Miscellaneous

Sec. 221. Sugarcane disaster assistance.
Sec. 222. Reports on quota allocations to countries importing sugar.

Subtitle C—Import Treatment of Sugars, Syrups, and Molasses

Sec. 231. Findings and purpose.
Sec. 232. Tariff treatment when tariff-rate quotas not in effect.
Sec. 233. Tariff-rate quotas.
Sec. 234. Applicable statutory authorities.
Sec. 235. Definitions.
Sec. 236. Conforming amendments to HTS.
Sec. 237. Effective date; termination.

TITLE III—RICE

Sec. 301. Loan rates, target prices, disaster payments, Acreage Limitation Program, and land diversion for the 1991 through 1995 crops of rice.
Sec. 302. Marketing certificates.

TITLE IV—DAIRY

Sec. 401. Findings.
Sec. 402. Milk Price Support and Inventory Management Program for calendar years 1991 through 1995.
Sec. 403. Milk manufacturing margin study.
Sec. 404. Minnesota-Wisconsin price series reform.
Sec. 405. Hearings on Federal milk marketing orders.
Sec. 406. Report of dairy product purchases.
Sec. 407. Application of support price for milk.
Sec. 408. Application of amendments.
Sec. 409. Adjustments for seasonal production; hearings on amendments; determination of milk prices.
Sec. 410. Transfer of dairy products to the military and veterans hospitals.
Sec. 411. Extension of the Dairy Indemnity Program.
Sec. 412. Export sales of dairy products.
Sec. 413. Component pricing of milk.
Sec. 414. Adjustments in payments by handlers.
Sec. 415. Dairy Export Incentive Program.
Sec. 416. Amendment to the Packers and Stockyards Act, 1921, to provide for the establishment of trusts for the benefit of milk producers.
Sec. 417. Status of producer handlers.

TITLE V—WOOL AND MOHAIR

Sec. 501. Extension of Price Support Program.
Sec. 502. Promotion program.
Sec. 503. Payment limitation.

TITLE VI—HONEY

Subtitle A—Beekeeping Stabilization

Sec. 601. Short title.
Sec. 602. Findings and policy.
Sec. 603. Honey price support.

Subtitle B—Honey Research, Promotion, and Consumer Information

Sec. 611. Short title.
Sec. 612. Definitions.
Sec. 613. Required terms in orders.
Sec. 614. Assessments.
Sec. 615. First reconfirmation referendum.
Sec. 616. Investigations and power to subpoena.
Sec. 617. Conforming amendment to order.

TITLE VII—OILSEEDS

Sec. 701. Oilseed price support.

TITLE VIII—PEANUTS

Sec. 801. Suspension of marketing quotas and acreage allotments.
Sec. 802. National poundage quota and farm poundage quota.
Sec. 803. Sale, lease, or transfer of farm poundage quota.
Sec. 804. Marketing penalties; disposition of additional peanuts.
Sec. 805. Price support program.
Sec. 806. Reports and records.
Sec. 807. Suspension of certain price support provisions.
Sec. 808. Experimental and research programs for peanuts.
Sec. 809. Conforming changes.

TITLE IX—WHEAT

Sec. 901. Loan rates, target prices, disaster payments, Acreage Limitation Program, and land diversion for the 1991 through 1995 crops of wheat.
Sec. 902. Nonapplicability of certificate requirements.
Sec. 903. Suspension of land use, wheat marketing allocation, and producer certificate provisions.
Sec. 904. Suspension of certain quota provisions.
Sec. 905. Nonapplicability of section 107 of the Agricultural Act of 1949 to the 1991 through 1995 crops of wheat.

TITLE X—FEED GRAINS

Sec. 1001. Loan rates, target prices, disaster payments, Acreage Limitation Program, and land diversion for the 1991 through 1995 crops of feed grains.
Sec. 1002. Price support for high moisture feed grains.

Sec. 1003. Nonapplicability of section 105 of the Agricultural Act of 1949 to the 1991 through 1995 crops of feed grains.
Sec. 1004. Calculation of refunds of advance established price payments by producers of the 1988 or 1989 crops of feed barley.

TITLE XI—GENERAL COMMODITY PROVISIONS

Subtitle A—Miscellaneous Commodity Provisions

Sec. 1101. Payment limitations.
Sec. 1102. Hybrid seed corn producers.
Sec. 1103. Advance deficiency and diversion payments.
Sec. 1104. Commodity credit corporation sales price restrictions.
Sec. 1105. Disaster payments for 1991 through 1995 crops of peanuts, soybeans, sugar beets, and sugarcane.
Sec. 1106. Extension and enhancement of authority for multiyear set-aside contracts.
Sec. 1107. Establishment of cover crop.
Sec. 1108. Supplemental set-aside and acreage limitation authority.
Sec. 1109. Extension of the food security wheat reserve.
Sec. 1110. Extension of normally planted acreage provisions.
Sec. 1111. Extension of provisions regarding the advance announcement of programs.
Sec. 1112. Extension of provisions regarding certain determinations of the Secretary.
Sec. 1113. Application of terms in the Agricultural Act of 1949.
Sec. 1114. Normal supply determination.
Sec. 1115. National agricultural cost of production standards review board.
Sec. 1116. Producer reserve program for wheat and feed grains.
Sec. 1117. Certificates.
Sec. 1118. Procedural requirements.
Sec. 1119. Financial impact assessment.
Sec. 1120. Survey of program participants.

Subtitle B—Uniform Base Acreage and Yield Provisions

Sec. 1121. Acreage base and program yield system for the wheat, feed grain, upland cotton, and rice programs.

TITLE XII—TRADE

Subtitle A—Public Law 480, Food for Progress

Sec. 1201. Amendment of Agricultural Trade Development and Assistance Act of 1954.
Sec. 1202. Extension of authorities.
Sec. 1203. Amendment to section 3.
Sec. 1204. Amendments to title I.
Sec. 1205. Amendments to title II.
Sec. 1206. Repeal of title III.
Sec. 1207. Amendments to title IV.
Sec. 1208. Program regulations.
Sec. 1209. Food for progress.
Sec. 1210. Amendment to section 416.

Subtitle B—Export Promotion

Sec. 1211. Amendment to the Agricultural Trade Act of 1978.
Sec. 1212. Amendments relating to export credit programs.
Sec. 1213. Market development task force.

Subtitle C—Agricultural Trade With and Fellowships for Emerging Democracies and Middle-Income Countries

Sec. 1221. Promotion of agricultural exports to emerging democracies.
Sec. 1222. Agricultural Fellowship Program for middle-income countries and emerging democracies.

Subtitle D—Studies and Reports

Sec. 1231. Study of North American free trade area.
Sec. 1232. Report on wood export promotion.
Sec. 1233. Rose and flower study.
Sec. 1234. Commodity transportation and technology assessment and report.
Sec. 1235. Red tart cherry study.
Sec. 1236. Report on section 22 suspension or termination.

Subtitle E—Effective Dates and Conforming Changes

Sec. 1241. Effective dates.
Sec. 1242. Conforming changes.

TITLE XIII—RESEARCH

Subtitle A—Extensions and Changes to Existing Programs

Sec. 1301. Increased authorizations for, and the extension of, existing programs.
Sec. 1302. Findings of the National Agricultural Research, Extension, and Teaching Policy Act of 1977.
Sec. 1303. Definition of sustainable agriculture.
Sec. 1304. Joint council on food and agricultural sciences and national agricultural research and extension users advisory board.
Sec. 1305. Federal-State partnership and coordination.
Sec. 1306. Grants to enhance research capacity in schools of veterinary medicine.
Sec. 1307. Grants and fellowships for food and agricultural sciences education.
Sec. 1308. Grants for research on the production and marketing of alcohols and industrial hydrocarbons from agricultural commodities and forest products.
Sec. 1309. Joint contract for assessment of food science and human nutrition research.
Sec. 1310. Animal health and disease research study and animal health science research advisory board.
Sec. 1311. Grant programs for 1890 land-grant colleges, including Tuskegee University.
Sec. 1312. International agricultural research and extension and international trade development centers.
Sec. 1313. Reauthorization of extension education and pilot project to coordinate food and nutrition education programs.
Sec. 1314. Aquaculture assistance programs.
Sec. 1315. Program of competitive, special, and facilities grants for agricultural research.
Sec. 1316. Minimization of conflicts of interest of employees of colleges receiving funds under the Smith-Lever Act.
Sec. 1317. Grants for financially stressed farmers, dislocated farmers, and rural families.

Subtitle B—Sustainable Agriculture Research and Education Program

Sec. 1321. Purpose and definitions.
Sec. 1322. Research and extension projects.
Sec. 1323. Program administration.
Sec. 1324. Federal-State Matching Grant Program.
Sec. 1325. Integrated management systems research and education.
Sec. 1326. Technical guides and handbooks.
Sec. 1327. Education and training.
Sec. 1328. Authorization for appropriations.
Sec. 1329. Repeal of agricultural productivity research provisions.

Subtitle C—National Genetics Resources Program

Sec. 1331. Establishment, purpose, and functions of the National Genetic Resources Program.
Sec. 1332. Appointment and authority of director.
Sec. 1333. Advisory council.
Sec. 1334. Definitions and authorization of appropriations.

Subtitle D—National Agricultural Library

Sec. 1335. Establishment, purposes, and functions of the National Agricultural Library.
Sec. 1336. Gifts.
Sec. 1337. Board of Regents.
Sec. 1338. Definitions and authorization of appropriations.

Subtitle E—National Agricultural Weather Information System

Sec. 1339. Short title, findings, and purposes.
Sec. 1340. Agricultural Weather Office.
Sec. 1341. National Advisory Board on Agricultural Weather.
Sec. 1342. State agricultural weather information systems.
Sec. 1343. Funding.

Subtitle F—Plant and Animal Pest and Disease Control Program

Sec. 1344. Findings and definitions.
Sec. 1345. Establishment of office.
Sec. 1346. Plant and Animal Pest and Disease Control Program.
Sec. 1347. Pest and disease control data base and pesticide resistance monitoring.
Sec. 1348. Research on exotic pests.
Sec. 1349. Authorization of appropriations.

Subtitle G—Research Regarding the Production, Preparation, Processing, Handling, and Storage of Agricultural Products

Sec. 1351. Findings, purpose, and definition.
Sec. 1352. Research and Grant Program.
Sec. 1353. Advisory committee and grant process.
Sec. 1354. Reports to Congress.
Sec. 1355. Authorization of Appropriations.

Subtitle H—National Institute for Alternative Agricultural Products

Sec. 1356. Short title, purposes, and definitions.
Sec. 1357. National Institute for Alternative Agricultural Products.
Sec. 1358. National Alternative Agricultural Products Board.
Sec. 1359. Research and development grants, contracts, and agreements.
Sec. 1360. Commercialization assistance.
Sec. 1361. General rules regarding the provision of assistance.
Sec. 1362. Regional centers.
Sec. 1363. Alternative Agricultural Products Technology Revolving Fund.

Subtitle I—Agriculture and Water Policy Coordination

PART 1—SHORT TITLE, DEFINITIONS, WATER QUALITY POLICY, COORDINATION, RESEARCH AND INFORMATION

Sec. 1364. Short title, purpose, definitions, and authorization of appropriations.
Sec. 1365. Policy with respect to agrichemicals.
Sec. 1366. State Water Quality Coordination Program.
Sec. 1367. Water quality research.
Sec. 1368. Nutrient management research.
Sec. 1369. Repository of agriculture and water quality planning information.
Sec. 1370. Data base on State plans and programs.
Sec. 1371. National Agriculture and Water Data Base.

PART 2—EXPERIMENTAL WATER QUALITY ENHANCEMENT PROGRAM

Sec. 1372. Program eligibility.
Sec. 1373. Duties of owners and operators.
Sec. 1374. Duties of the secretary.
Sec. 1375. Water quality management plans.
Sec. 1376. Agreements.

Subtitle J—Miscellaneous Research Provisions

Sec. 1377. Biotechnology risk assessment research.
Sec. 1378. Graduate school of the United States Department of Agriculture.
Sec. 1379. Pesticide Impact Response Program.
Sec. 1380. Collection of pesticide use information.
Sec. 1381. Disposal of agricultural chemicals and agricultural chemical containers.
Sec. 1382. National farm safety study.
Sec. 1383. Plant Genome Mapping Program.
Sec. 1384. Composting Research and Extension Program.
Sec. 1385. Aflatoxin Research Program.
Sec. 1386. Agricultural Telecommunications Program.
Sec. 1387. Study of the transportation of fertilizer and agricultural chemicals to farmers.
Sec. 1388. Special grant to study constraints on agricultural trade.
Sec. 1389. Special grants for mesquite and prickly pear research.
Sec. 1390. National centers for food safety research.
Sec. 1391. Immunoassay Research Program.
Sec. 1392. Rural development research.
Sec. 1393. Outreach and assistance for socially disadvantaged farmers.
Sec. 1394. Grants for Niche market development.
Sec. 1395. Miscellaneous agricultural research centers.
Sec. 1396. Agricultural assistance program for farmers with disabilities.

TITLE XIV—MARKETING

Subtitle A—Fruits and Vegetables

Sec. 1401. Findings.
Sec. 1402. Purposes.
Sec. 1403. Declaration.
Sec. 1404. Study of the fruit and vegetable industry.

Subtitle B—Marketing

Sec. 1411. Amendment to the Perishable Agricultural Commodities Act.
Sec. 1412. Enforcement of handler assessments.
Sec. 1413. Wine and winegrape industry study.
Sec. 1414. Producer research and promotion board accountability.

Subtitle C—Commodity Promotion

PART 1—PECAN PROMOTION

Sec. 1421. Short title.
Sec. 1422. Findings and declaration of policy.
Sec. 1423. Definitions.
Sec. 1424. Issuance of plans.
Sec. 1425. Regulations.
Sec. 1426. Required terms in plans.
Sec. 1427. Permissive terms in plans.
Sec. 1428. Assessment.
Sec. 1429. Petition and review.
Sec. 1430. Enforcement.
Sec. 1431. Investigations and power to subpoena.
Sec. 1432. Requirement of referendum.
Sec. 1433. Suspension or termination of plan.
Sec. 1434. Authorization of appropriations.

PART 2—MUSHROOMS

Sec. 1441. Short title.
Sec. 1442. Findings and declaration of policy.
Sec. 1443. Definitions.
Sec. 1444. Issuance of orders.
Sec. 1445. Required terms in orders.
Sec. 1446. Referenda.
Sec. 1447. Petition and review.
Sec. 1448. Enforcement.
Sec. 1449. Investigations and power to subpoena.
Sec. 1450. Savings provision.
Sec. 1451. Suspension or termination of orders.
Sec. 1452. Authorization of appropriations.
Sec. 1453. Regulations.

PART 3—POTATOES

Sec. 1461. Short title.
Sec. 1462. Findings and declaration of policy.
Sec. 1463. Definitions.
Sec. 1464. Authority to issue a plan.
Sec. 1465. Notice and hearings.
Sec. 1466. Required terms in plans.
Sec. 1467. Permissive terms in plans.
Sec. 1468. Assessments.
Sec. 1469. Investigation and power to subpoena.
Sec. 1470. Requirement of referendum.
Sec. 1471. Suspension or termination of plans.
Sec. 1472. Amendment procedure.

PART 4—COTTON

Sec. 1473. Short title.
Sec. 1474. Findings and declaration of policy.
Sec. 1475. Required terms in order; cotton imports.
Sec. 1476. Requirements for referenda.
Sec. 1477. Suspension and termination of orders.
Sec. 1478. Amendments to the order.
Sec. 1479. Producer refunds.
Sec. 1480. Definitions.

PART 5—LIMES

Sec. 1481. Short title.
Sec. 1482. Findings, purposes, and limitations.
Sec. 1483. Definitions.
Sec. 1484. Issuance of orders.
Sec. 1485. Required terms in orders.
Sec. 1486. Permissive terms in orders.
Sec. 1487. Petition and review.
Sec. 1488. Enforcement.
Sec. 1489. Investigations and power to subpoena.
Sec. 1490. Initial referendum.
Sec. 1491. Suspension and termination.
Sec. 1492. Authorization of appropriations.
Sec. 1493. Regulations.

PART 6—APPLICATION OF COMMODITY RESEARCH AND PROMOTION PROGRAMS TO IMPORTS

Sec. 1499. Consistency with international obligations of the United States.

TITLE XV—STATE AND PRIVATE FORESTRY

Sec. 1501. Firefighting preparedness and mobilization assistance.
Sec. 1502. Insect control.
Sec. 1503. Disaster assistance.
Sec. 1504. Research and utilization.
Sec. 1505. Forest Reserve Program.
Sec. 1506. Forest land protection studies.
Sec. 1507. Forest resources management improvement stewardship and reforestation project.
Sec. 1508. Urban and community forestry.
Sec. 1509. America the Beautiful Foundation.
Sec. 1510. Presidential Commission on State and Private Forests.
Sec. 1511. Blue Mountain Natural Resource Institute.
Sec. 1512. International Forest Resources Institute.

TITLE XVI—CONSERVATION

Sec. 1601. Modification of Highly Erodible Land Program.
Sec. 1602. Modification of Wetlands Program.
Sec. 1603. Conservation Reserve Program.
Sec. 1604. Tree planting initiative.
Sec. 1605. Natural Resource Loan Program.
Sec. 1606. State technical committee.
Sec. 1607. Water quality protection.
Sec. 1608. Wetland and environmental easements.
Sec. 1609. Administration of conservation programs.
Sec. 1610. Office of Environmental Quality.
Sec. 1611. Integrated farm management program option.
Sec. 1612. Soil and water activities.
Sec. 1613. Cost sharing for soil enhancement.
Sec. 1614. Extension of Great Plains Conservation Program.
Sec. 1615. Amendment to the Watershed Protection and Flood Prevention Act.
Sec. 1616. Resource Conservation and Development Program eligibility.
Sec. 1617. Amendment to the Noxious Weed Act.

TITLE XVII—FOOD STAMP AND RELATED PROVISIONS

Sec. 1700. Short title; presumption of reference to Food Stamp Act of 1977.

Subtitle A—Reducing Childhood Hunger

Sec. 1701. Households with high shelter expenses.
Sec. 1702. Basic benefit level.
Sec. 1703. Continuing benefits to eligible households.
Sec. 1704. Emergency food for disaster victims.
Sec. 1705. Clothing allowances and general assistance vendor payments.
Sec. 1706. Participants in demonstration projects.
Sec. 1707. Alternate method of issuance.
Sec. 1708. Improving assistance to the homeless.
Sec. 1709. Reduced paperwork for homeless households.

Subtitle B—Promoting Self-Sufficiency

Sec. 1711. Child support.
Sec. 1712. Limitation on resources.

Sec. 1713. State option to reduce unnecessary paperwork.
Sec. 1714. Combined households.
Sec. 1715. Employment and training program expansion.
Sec. 1716. Employment and training allocation.
Sec. 1717. Helping low-income students achieve self-sufficiency.
Sec. 1718. Families in transitional housing.
Subtitle C—Simplifying Program Administration
Sec. 1721. Relatives living together.
Sec. 1722. AFDC/Food stamp simplification.
Sec. 1723. Simplifying resource and eligibility determinations.
Sec. 1724. Simplified application signing requirements.
Sec. 1725. Categorical eligibility for recipients of State general assistance.
Sec. 1726. Fraud claims repayment.
Sec. 1727. Commission on coordination of family support and food stamp policies.
Sec. 1728. Dependent care expenses.
Sec. 1729. State flexibility in budgeting methods.
Sec. 1730. Enhanced waiver authority for demonstration projects.
Subtitle D—Hunger in Rural America
Sec. 1731. Simplified issuance procedures in rural areas.
Sec. 1732. Flexibility for State informational activities.
Sec. 1733. Vehicles necessary to carry fuel or water.
Sec. 1734. Grants to improve food stamp participation of rural Americans, minorities, elderly and homeless.
Subtitle E—Promoting Access for the Elderly and Disabled
Sec. 1741. Clarifying amendment concerning simplified procedure for claiming excess medical deduction.
Sec. 1742. Value of minimum benefit.
Sec. 1743. Procedures for issuing aggregate allotments.
Sec. 1744. Applicants for supplemental security income.
Sec. 1745. Asset Limits for the disabled.
Sec. 1746. Extension of pilot projects.
Subtitle F—Program Administration by State Agencies
Sec. 1751. Quality control sanctions with respect to disallowances before fiscal year 1991.
Sec. 1752. Food stamp automation.
Subtitle G—Food Stamp Program Integrity
Sec. 1761. Authorization of wholesale food concerns.
Sec. 1762. Biennial reauthorization of retail food stores.
Sec. 1763. Per-violation civil money penalty for coupon trafficking; permanent disqualification for certain abuses.
Sec. 1764. Fines for retail food stores and wholesale food concerns that accept loose coupons.
Sec. 1765. Fines for unauthorized third parties that accept food stamps.
Sec. 1766. Computer fraud penalties.
Sec. 1767. Unlawful use of coupons in laundering monetary instruments.
Sec. 1768. Issuance of warning letters.
Subtitle H—Commodity Distribution Programs
Sec. 1771. TEFAP commodity availability.
Sec. 1772. Food bank projects.
Sec. 1773. Authorizing a Commodity Supplemental Food Program for the elderly and increasing administrative funding.
Sec. 1774. Food Distribution Program—advance funding for State option contracts (SOCS).
Sec. 1775. Clarifying amendment.
Sec. 1776. Distribution of milk.
Sec. 1777. Commodity assistance for infants and children.
Subtitle I—Reauthorization of Programs
Sec. 1781. Reauthorization of Food Stamp Program and elimination of specified authorization levels.
Sec. 1782. Reauthorization of Nutrition Assistance Program for Puerto Rico.
Sec. 1783. Reauthorization of Temporary Emergency Food Assistance Program.
Sec. 1784. Soup kitchens and food banks.
Sec. 1785. Reauthorization of Commodity Supplemental Food Program and other food donation programs.
Sec. 1786. Processing agreements.
Sec. 1787. Nutrition education authorization.
Subtitle J—Miscellaneous; Effective Dates
Sec. 1791. Gleaning assistance.
Sec. 1792. Welfare Simplification and Coordination Advisory Committee.
Sec. 1793. Nutrition education improvements.
Sec. 1794. Effective dates.
Sec. 1795. Special provisions in case of sequestration.
TITLE XVIII—IMPROVEMENT OF AGRICULTURAL ECONOMY
Subtitle A—Grain Quality Improvements
Sec. 1801. Committee on grain quality and grain quality coordinator.
Sec. 1802. Benefits and costs associated with grain quality.
Sec. 1803. Classification, grades, and standards design framework.
Sec. 1804. Improving the cleanliness of grain.
Sec. 1805. Grade determining factors related to physical soundness and purity.
Sec. 1806. Testing for aflatoxin contamination of corn shipped in foreign commerce; domestic testing standards and procedures.
Sec. 1807. Cargo loading requirements.
Sec. 1808. Prohibition of contamination.
Sec. 1809. Sense of Congress concerning tests for purity.
Sec. 1810. Sense of Congress concerning cooperative enforcement of Federal grain purity requirements.
Sec. 1811. Entry quality standards for all farmer-owned reserve grains.
Sec. 1812. Price support loan incentives for quality grain.
Sec. 1813. Quality requirements for commodity credit Corporation-owned grain.
Sec. 1814. Establishing quality as a goal for Commodity Credit Corporation programs.
Sec. 1815. Seed variety information.
Sec. 1816. Survey of grain varieties.
Sec. 1817. Analysis of Variety Survey Data.
Sec. 1818. Sense of Congress concerning end-use performance research.
Sec. 1819. Sense of Congress concerning cooperation in objective testing.
Sec. 1820. Authority to assist farmers and elevator operators.
Sec. 1821. Standardizing commercial inspections.
Subtitle B—Agricultural Cooperation and Development
Sec. 1831. Control and eradication of plant pests.
Sec. 1832. Cooperation in animal disease control.
Sec. 1833. Debt for agricultural development exchanges.
Subtitle C—Other Provisions
Sec. 1841. Agricultural product promotion and enhancement.
Sec. 1842. Agricultural Assistance Program for farmers with disabilities.
Sec. 1843. Emergency grants to assist low-income migrant and seasonal farmworkers.
Sec. 1844. Narrowing the defense exception to the Farmland Protection Policy Act.
Sec. 1845. Forage rangeland inventory survey.
Sec. 1846. Accurate tracking of costs of Commodity Certificate Program.
Sec. 1847. Improving the accuracy of Commodity Program budget forecasts.
Subtitle D—Reports and Studies
Sec. 1851. Pass through of savings.
Sec. 1852. Farm value of agricultural products.
Sec. 1853. Study of the concentration of the meat packing industry.

Mr. DE LA GARZA. Mr. Chairman, I move to strike the last word.

Mr. Chairman, let me say to my colleagues that we begin the process today of bringing to the membership what we call the farm bill, our omnibus agricultural food and fiber research and education legislation, which encompasses 18 titles.

First and foremost, I would like to ask the Members to consider throughout the process what I will be telling them now, first, that this legislation impacts on all 270 million-plus Americans. It impacts on anyone in this country who eats. It impacts on the world, on anyone that eats, because from this where we get the commodities that we sell, that we at times barter, that we give in lower interest type loans or deferred payments to other countries, or that we give to the poor, the needy and the hungry of the world. All that is encompassed in what we will hear today. We will hear about different amendments; we will hear that this fellow got more money than that fellow, and we will hear that this impacts on the consumer. This does inpact on every single last one of our consumers.

How does this come about? We have people called farmers and ranchers who produce the food and fiber. Then it goes through the process of the middleman. Then it comes to the final user, to you, to me—that is us and we—the people who finally use the food. Everyone in this Chamber today and everyone within the sound of my voice will eat at least a minimum of one meal of some kind today. Heaven

forbid that there will be some who will not, but almost everyone, 99.9 percent of us, will eat.

Everyone will be impacted by what we do here today. So let us not be deterred by what this fellow or what that fellow got. We will be talking about the food chain here, about producing the food and the fiber, and for that the farmer needs good air, good water, and good soil.

There will be discussions on the farmers messing up the soil. They cannot do that. If they mess up the soil, they are out of business.

What do we as individuals need? How does this impact on us? The human body needs only three things for survival—air, water, and food. Only the good Lord makes air, water, and food, and only the farmers and ranchers produce food.

We will hear all kinds of charges, and we will hear figures of $2 billion and $3 billion. Here it is, I say to my friends. What does all this that we do cost the taxpayers of the United States in proportion to the total budget? Here is a graph. This is the total budget, $1.23 trillion. That is over $1 trillion. What we will be discussing today in support of the commodity programs, if you can see it here, is this tiny little line at the bottom. That is the taxpayer's dollar that we will be discussing today, six-tenths of 1 percent of the total budget of the United States of America.

□ 1150

Mr. Chairman, defense has over $300 billion, 300-plus billion. We will be speaking of less than 10.

So, throughout the days, as my colleagues hear the amendments, as my colleagues hear the discussion, I hope they will keep this in mind. How are we impacting on the budget?

The tiny little line, point six. Six-tenths of 1 percent.

What do we do with that?

We feed all of the people of the United States at a reasonable cost, less than any other major industrialized country in the world. We are at slightly over 10 percent of disposable income per family. Our major competitors are 15, 16, 18 percent. It is not that we do not have hungry people in America. We do. But it never has been the fault of the farmer. Something else went wrong.

So, Mr. Chairman, I implore my colleagues and urge my colleagues that, when they hear the discussion, and they see the papers with figures, this is the total impact to the budget: point six, six-tenths of 1 percent, and what do we do for that? Best-fed people in the world, in the history of the world, for the least amount of disposable income per family. That is what we do with our taxpayer dollars.

Mr. Chairman, that is what the discussion is going to be today, and someone may cute. Someone may offer an amendment. Someone may quote a little poetry.

Do not disrupt the food chain. It is working, and it is working well. Do not disrupt the food chain.

Mr. Chairman, we could mess it up. We could mess it up here.

Mr. CHAIRMAN. Are there any amendment to section 1?

The Clerk will designate title I.

The text of title I is as follows:

TITLE I—COTTON

SEC. 101. LOAN RATES, TARGET PRICES, DISASTER PAYMENTS, ACREAGE LIMITATION PROGRAM, AND LAND DIVERSION FOR THE 1991 THROUGH 1995 CROPS OF UPLAND COTTON.

Effective only for the 1991 through 1995 crops of upland cotton, the Agricultural Act of 1949 is amended by inserting after section 103A (7 U.S.C. 1444-1) the following new section:

"SEC. 103B. (a) LOANS.—(1) IN GENERAL.—Except as provided in paragraph (2), the Secretary shall, on presentation of warehouse receipts or other acceptable evidence of title, as determined by the Secretary, reflecting accrued storage charges of not more than 60 days, make available for the 1991 through 1995 crops of upland cotton to producers nonrecourse loans for a term of 10 months from the first day of the month in which the loan is made at such loan level, per pound, as will reflect for the base quality of upland cotton, as determined by the Secretary, at average location in the United States a level that is not less than the smaller of—

"(A) 85 percent of the average price (weighted by market and month) of such base quality of cotton as quoted in the designated United States spot markets during 3 years of the 5-year period ending July 31 in the year in which the level of price support is announced, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period; or

"(B) 90 percent of the average, for the 15-week period beginning July 1 of the year in which the level of price support is announced, of the 5 lowest-priced growths of the growths quoted for Middling one and three-thirty-seconds inch cotton C.I.F. Northern Europe (adjusted downward by the average difference during the period April 15 through October 15 of the year in which the loan is announced between such average northern European price quotation of such quality of cotton and the market quotations in the designated United States spot markets for the base quality of upland cotton, as determined by the Secretary).

For purposes of perfecting a security interest under any State law, the evidence of title approved by the Secretary under this paragraph shall be considered to be a warehouse receipt.

"(2) ADJUSTMENTS TO LOAN LEVEL.—(A) LIMITATION ON DECREASE IN LOAN LEVEL.—The loan level for any crop determined under paragraph (1) may not be reduced by more than 5 percent from the level determined for the preceding crop, nor may such loan level be reduced below 50 cents per pound.

"(B) LIMITATION ON INCREASE IN LOAN LEVEL.—If for any crop the average northern European price determined under paragraph (1)(B) is less than the average United States spot market price determined under paragraph (1)(A), the Secretary may increase the loan level to such level as the Secretary may deem appropriate, not in excess of the average United States spot market price determined under paragraph (1)(A).

"(3) ANNOUNCEMENT OF LOAN LEVEL.—The loan level for any crop of upland cotton shall be determined and announced by the Secretary not later than November 1 of the calendar year preceding the marketing year for which such loan is to be effective. Such loan level shall not thereafter be changed.

"(4) LENGTH OF TERMS OF NONRECOURSE LOANS.—(A) EXTENSION OF TERMS.—Except as provided in subparagraph (B), nonrecourse loans provided for in this section shall, on request of the producer during the 10th month of the loan period for the cotton, be made available for an additional term of 8 months.

"(B) LIMITATION ON EXTENSIONS.—A request to extend the loan period shall not be approved in any month in which the average price of the base quality of upland cotton, as determined by the Secretary, in the designated spot markets for the preceding month exceeded 130 percent of the average price of such base quality of cotton in such markets for the preceding 36-month period.

"(5) COMPETITIVE POSITION DETERMINATION.—(A) IN GENERAL.—If the Secretary determines that the prevailing world market price for upland cotton (adjusted to United States quality and location) is below the loan level determined under the foregoing provisions of this subsection, in order to make United States upland cotton competitive in world markets, the Secretary shall implement the provisions of Plan A or Plan B in accordance with this paragraph.

"(B) REDUCED LOAN REPAYMENT LEVEL.—If the Secretary elects to implement Plan A, the Secretary shall permit a producer to repay a loan made for any crop at a level determined and announced by the Secretary at the same time the Secretary announces the loan level for such crop as determined under paragraph (3). Such repayment level for loans on such crops shall not be less than 80 percent of the loan level determined for the crop. Such repayment level, once announced for the crop, shall not thereafter be changed.

"(C) MARKETING LOAN.—(i) If the Secretary elects to implement Plan B, except as provided in clause (ii), the Secretary shall permit a producer to repay a loan made for any crop at a level that is the lesser of—

"(I) the loan level determined for such crop; or

"(II) the prevailing world market price for upland cotton (adjusted to United States quality and location), as determined by the Secretary.

"(ii) For each of the 1991 through 1995 crops of cotton, if the prevailing world market price for upland cotton (adjusted to United States quality and location) as determined by the Secretary, is less than 80 percent of the loan level determined for such crop, the Secretary may permit a producer to repay a loan made under this subsection for a crop at such level (not in excess of 80 percent of the loan level determined for such crop) as the Secretary determines will—

"(I) minimize potential loan forfeitures;

"(II) minimize the accumulation of cotton stocks by the Federal Government;

"(III) minimize the cost incurred by the Federal Government in storing cotton; and

"(IV) allow cotton produced in the United States to be marketed freely and competitively, both domestically and internationally.

"(D) FIRST HANDLER NEGOTIABLE MARKETING CERTIFICATES.—(i) During the period beginning August 1, 1991, and ending July 31,

1996, if a program carried out under Plan A or Plan B fails to make United States upland cotton fully competitive in world markets and the prevailing world market price of upland cotton (adjusted to United States quality and location), as determined by the Secretary, is below the current loan repayment rate for upland cotton determined under subparagraph (A), then in order to make United States upland cotton competitive in world markets and to maintain and expand domestic consumption and exports of upland cotton produced in the United States, the Secretary shall provide for the issuance of negotiable marketing certificates in accordance with this subparagraph.

"(ii) The Commodity Credit Corporation, under such regulations as the Secretary may prescribe, shall make payments, through the issuance of negotiable marketing certificates, to first handlers of cotton (persons regularly engaged in buying or selling upland cotton) who have entered into an agreement with the Commodity Credit Corporation to participate in the program established under this subparagraph. Such payments shall be made in such monetary amounts and subject to such terms and conditions as the Secretary determines will make upland cotton produced in the United States available at competitive prices, consistent with the purposes of this subparagraph.

"(iii) The value of each certificate issued under clause (ii) shall be based on the difference between—

"(I) the loan repayment rate for upland cotton under Plan A or Plan B, as the case may be; and

"(II) the prevailing world market price of upland cotton (adjusted to United States quality and location), as determined by the Secretary.

"(iv) The Commodity Credit Corporation, under regulations prescribed by the Secretary, may assist any person receiving marketing certificates under this subparagraph in the redemption of certificates for cash, or marketing or exchange of such certificates for agricultural commodities or the products thereof owned by the Commodity Credit Corporation, at such times, in such manner, and at such price levels as the Secretary determines will best effectuate the purposes of the program established under this subparagraph. Any price restrictions that may otherwise apply to the disposition of agricultural commodities by the Commodity Credit Corporation shall not apply to the redemption of certificates under this subparagraph.

"(v) Insofar as practicable, the Secretary shall permit owners of certificates to designate the commodities and the products thereof, including storage sites thereof, such owners would prefer to receive in exchange for certificates. If any certificate is not presented for redemption, marketing, or exchange within a reasonable number of days after the issuance of such certificate (as determined by the Secretary), reasonable costs of storage and other carrying charges, as determined by the Secretary, shall be deducted from the value of the certificate for the period beginning after such reasonable number of days and ending with the date of the presentation of such certificate to the Commodity Credit Corporation.

"(vi) The Secretary shall take such measures as may be necessary to prevent the marketing or exchange of agricultural commodities and products for certificates under this subsection from adversely affecting the income of producers of such commodities or products.

"(vii) Under regulations prescribed by the Secretary, certificates issued to cotton handlers under this subparagraph may be transferred to other handlers and persons approved by the Secretary.

"(E) DETERMINATION OF PREVAILING WORLD MARKET PRICE.—(i) The Secretary shall prescribe by regulation—

"(I) a formula to define the prevailing world market price for upland cotton (adjusted to United States quality and location); and

"(II) a mechanism by which the Secretary shall announce periodically the prevailing world market price for upland cotton (adjusted to United States quality and location).

"(ii) The prevailing world market price for upland cotton (adjusted to United States quality and location) established under this subparagraph shall be used for purposes of both Plan A and Plan B and marketing certificates under subparagraph (D).

"(F) ADJUSTMENT TO PREVAILING WORLD MARKET PRICE.—(i) During the period beginning August 1, 1991, and ending July 31, 1996, the prevailing world market price for upland cotton (adjusted to United States quality and location) established under subparagraph (E) shall be further adjusted if:

"(I) such adjusted prevailing world market price is less than 115 percent of the current crop year loan level for the base quality of upland cotton, as determined by the Secretary; and

"(II) the Friday through Thursday average price quotation for the lowest-priced United States growth as quoted for Middling (M) one and three-thirty seconds inch cotton delivered C.I.F. Northern Europe is greater than the Friday through Thursday average price of the five lowest-priced growths of upland cotton, as quoted for Middling (M) one and three-thirty seconds inch cotton, delivered C.I.F. Northern Europe (hereafter referred to as 'the Northern Europe price').

"(ii) Such adjusted prevailing world market price shall be further adjusted on the basis of some or all of the following data, as available:

"(I) the United States share of world exports;

"(II) the current level of cotton export sales and cotton export shipments; and

"(III) other data determined by the Secretary, or a designee of the Secretary, to be relevant in establishing an accurate prevailing world market price for upland cotton (adjusted to United States quality and location).

"(iii) The adjustment may not exceed the difference between the Friday through Thursday average price for the lowest-priced United States growth as quoted for Middling one and three-thirty seconds inch cotton delivered C.I.F. Northern Europe and the Northern Europe price.

"(G) COTTON USER NEGOTIABLE MARKETING CERTIFICATES.—During the period beginning August 1, 1991, and ending July 31, 1996, if for any consecutive four-week period, the Friday through Thursday average price quotation for the lowest-priced United States growth, as quoted for Middling (M) one and three-thirty seconds inch cotton, delivered C.I.F. Northern Europe exceeds the Northern Europe price by more than 1.25 cents per pound, the Secretary shall issue negotiable marketing certificates to domestic users or exporters for documented sales made in the week following such consecutive four-week period. The value of such negotiable marketing certificates shall be based on the amount of the difference, reduced by 1.25 cents per pound, in such prices during the fourth week of the consecutive four-week period multiplied by the quantity of upland cotton included in such documented sales. The provisions of subparagraphs (D)(iv) through (vii) shall apply to negotiable marketing certificates issued under this subparagraph, and any such certificates may be transferred to other persons approved by the Secretary under regulations prescribed by the Secretary.

"(H) SPECIAL IMPORT QUOTA; ONE WEEK'S MILL CONSUMPTION.—(i) The President shall, within 60 days after the date of enactment of this section, establish an import quota program which shall provide that whenever the Secretary determines and announces that for any consecutive ten week period, the Friday through Thursday average price quotation for the lowest-priced United States growth, as quoted for Middling (M) one and three-thirty seconds inch cotton, delivered C.I.F. Northern Europe, adjusted for the value of any certificates issued under subparagraph (F), exceeds the Northern Europe price by more than 1.25 cents per pound, there shall immediately be in effect a special limited global import quota.

"(ii) Such quota shall be equal to one week's consumption of upland cotton by domestic mills at the seasonally adjusted average rate of the most recent 3 months for which data are available.

"(iii) Such quota shall apply to upland cotton purchased not later than 90 days after the date of the Secretary's announcement under clause (i) and entered into the United States not later than 180 days after such date.

"(iv) A special quota period may be established that overlaps any existing quota period if required by the provisions of clause (i), except that a special quota period may not be established under this paragraph if a special quota period has been established under subsection (n).

"(6) RECOURSE SEED COTTON LOANS.—In order to encourage and assist producers in the orderly ginning and marketing of their production of upland cotton, the Secretary shall make recourse loans available to such producers on seed cotton in accordance with authority vested in the Secretary under the Commodity Credit Corporation Charter Act (15 U.S.C. 714 et seq.).

"(b) PAYMENTS FOR FORGOING LOAN.—(1) IN GENERAL.—The Secretary shall, for each of the 1991 through 1995 crops of upland cotton, make payments available to producers who, although eligible to obtain a loan under subsection (a), agree to forgo obtaining such loan in return for such payments.

"(2) COMPUTATION.—A payment under this subsection shall be computed by multiplying—

"(A) the loan payment rate; by

"(B) the quantity of upland cotton on which the producer requests payment.

"(3) QUANTITY ELIGIBLE.—For purposes of this subsection, the quantity of upland cotton eligible for payment may not exceed the product obtained by multiplying—

"(A) the individual farm program acreage for the crop; by

"(B) the actual yield per harvested acre established for the farm.

"(4) LOAN PAYMENT RATE.—For purposes of this subsection, the loan payment rate shall be the amount by which—

"(A) the loan level determined for such crop under subsection (a) exceeds

"(B) the level at which a loan may be repaid under subsection (a).

"(5) PAYMENT IN NEGOTIABLE MARKETING CERTIFICATES.—The Secretary may make up to one-half the amount of a payment under this subsection available in the form of negotiable marketing certificates, subject to the terms and conditions provided in subsection (a)(5)(D).

"(c) DEFICIENCY PAYMENTS.—(1) IN GENERAL.—(A) COMPUTATION.—The Secretary shall make available to producers payments (to be known as 'deficiency payments') for each of the 1991 through 1995 crops of upland cotton in an amount computed by multiplying—

"(i) the payment rate; by

"(ii) the individual farm program acreage; by

"(iii) the farm program payment yield established for the crop for the farm.

"(B) 0/92 AND 50/92 PROGRAMS.—(i) If an acreage limitation program under subsection (e)(2) is in effect for a crop of upland cotton and the producers on a farm devote a portion of the permitted upland cotton acreage of the farm (as determined in accordance with subsection (e)(2)(A)) equal to more than 8 percent of the permitted upland cotton acreage of the farm for the crop to conservation uses (except as provided in subparagraph (F))—

"(I) such portion of the permitted upland cotton acreage in excess of 8 percent of such acreage devoted to conservation uses (except as provided in subparagraph (F)) shall be considered to be planted to upland cotton for the purpose of determining the individual farm program acreage in accordance with subsection (e)(2)(E) and for the purpose of determining the acreage on the farm required to be devoted to conservation uses in accordance with subsection (e)(2)(D); and

"(II) the producers shall be eligible for payments under this paragraph on such acreage, subject to the compliance of the producers with clause (ii).

"(ii)(I) To be eligible for payments under clause (i), except as provided in subclause (II) and clause (iv), the producers on a farm must actually plant upland cotton for harvest on at least 50 percent of the permitted upland cotton acreage of the farm.

"(II) The Secretary may waive the 50 percent planting requirement in subclause (I) for any crop of upland cotton.

"(iii) Notwithstanding any other provision of this section, any producer who elects to devote a portion (or, where the Secretary exercises the waiver authority under clause (ii)(II), all) of the permitted upland cotton acreage of the farm to conservation uses (or other uses as provided in subparagraph (F)) under this subparagraph shall receive deficiency payments on the acreage that is considered to be planted to upland cotton and eligible for payments under this subparagraph for such crop at a rate established by the Secretary, except that such rate may not be established at less than the projected deficiency payment rate for the crop, as determined by the Secretary. Such projected payment rate for the crop shall be announced by the Secretary prior to the period during which upland cotton producers may agree to participate in the program for such crop.

"(iv) If a State or local agency has imposed in an area of a State or county a quarantine on the planting of upland cotton for harvest on farms in such area, the State committee established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) may recommend to the Secretary that payments be made under this paragraph to producers in such area who were required to forgo the planting of upland cotton for harvest on acreage to alleviate or eliminate the condition requiring such quarantine. If the Secretary determines that such condition exists, the Secretary may make payments under this paragraph to such producers. To be eligible for payments under this clause, such producers must devote such acreage to conservation uses (except as provided in subparagraph (F)).

"(v) If an acreage limitation program under subsection (e) is in effect for any crop of upland cotton and if the Secretary determines that producers on a farm are prevented from planting the acreage intended for upland cotton to upland cotton because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make available to such producers payments computed as provided in paragraph (1)(A). Producers shall be eligible for such payments if a portion (or all) of the permitted upland cotton acreage of the farm is devoted to conservation uses (except as provided in paragraph (F)). Such acreage equal to more than 8 percent of the permitted upland cotton acreage of the farm for the crop shall be considered to be planted to upland cotton for the purpose of determining the individual farm program acreage in accordance with subsection (e)(2)(E) and for the purpose of determining the acreage on the farm required to be devoted to conservation uses in accordance with subsection (e)(2)(D). The provisions of clauses (iii) and (vi) shall apply to any such producers.

"(vi) The upland cotton crop acreage base and upland cotton farm program payment yield of the farm shall not be reduced due to the fact that such portion (or all) of the permitted acreage of the farm was devoted to conserving uses (except as provided in subparagraph (F)).

"(vii) Other than as provided in clauses (i) through (v), payments may not be made under this paragraph for any crop on a greater acreage than the acreage actually planted to upland cotton.

"(viii) Any acreage considered to be planted to upland cotton in accordance with clauses (i) and (v) may not also be designated as conservation use acreage for the purpose of fulfilling any provisions under any acreage limitation or land diversion program requiring that the producers devote a specified acreage to conservation uses.

"(C) PAYMENT RATE.—The payment rate for upland cotton shall be the amount by which the established price for the crop of upland cotton exceeds the higher of—

"(i) the national average market price received by producers during the calendar year that includes the first 5 months of the marketing year for such crop, as determined by the Secretary; or

"(ii) the loan level determined for such crop.

"(D) MINIMUM ESTABLISHED PRICE.—The established price for upland cotton shall not be less than $0.729 per pound.

"(E) REDUCTION FOR DISASTER PAYMENTS.—The total quantity of upland cotton on which payments would otherwise be payable to a producer on a farm for any crop under this paragraph shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under paragraph (2).

"(F) ALTERNATIVE CROPS.—The Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of acreage otherwise required to be devoted to conservation uses as a condition of qualifying for payments under subparagraph (B) to be devoted to sweet sorghum or the production of guar, sesame, safflower, sunflower, rapeseed, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, rye, commodities for which no substantial domestic production or market exists but that could yield industrial raw material being imported, or likely to be imported, into the United States, or commodities grown for experimental purposes (including kenaf), subject to the following sentence. The Secretary may permit such acreage to be devoted to such production only if the Secretary determines that—

"(i) the production is not likely to increase the cost of the price support program and will not affect farm income adversely; and

"(ii) the production is needed to provide an adequate supply of the commodity, or, in the case of commodities for which no substantial domestic production or market exists but that could yield industrial raw materials, the production is needed to encourage domestic manufacture of such raw material and could lead to increased industrial use of such raw material to the long-term benefit of United States industry.

"(2) DISASTER ASSISTANCE.—(A) PREVENTED PLANTING PAYMENTS.—Except as provided in subparagraph (C), if the Secretary determines that the producers on a farm are prevented from planting any portion (or all) of the acreage intended for upland cotton to upland cotton or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the producers in an amount equal to the product obtained by multiplying—

"(I) the number of acres so affected but not to exceed the acreage planted to upland cotton for harvest (including any acreage that the producers were prevented from planting to upland cotton or other nonconserving crops in lieu of upland cotton because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year; by

"(II) 75 percent of the farm program payment yield established for the farm by the Secretary; by

"(III) a payment rate equal to 33⅓ percent of the established price for the crop.

"(ii) Payments made by the Secretary under this subparagraph may be made in the form of cash or in such other form as the Secretary is authorized by law to make.

"(B) REDUCED YIELD PAYMENTS.—Except as provided in subparagraph (C), if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of upland cotton that the producers are able to harvest on any farm is less than the result of multiplying 75 percent of the farm program payment yield established for the farm for such crop by the acreage planted for harvest for such crop, the Secretary shall make a reduced yield disaster payment to the producers at a rate equal to 33⅓ percent of the established price for the crop for the deficiency in production below 75 percent for the crop.

"(C) LIMITATION DUE TO CROP INSURANCE.—Producers on a farm shall not be eligible for—

"(i) prevented planting disaster payments under subparagraph (A), if prevented planting crop insurance is available to the producers under the Federal Crop Insurance Act

(7 U.S.C. 1501 et seq.) with respect to the upland cotton acreage of the producers; or

"(ii) reduced yield disaster payments under subparagraph (B), if reduced yield crop insurance is available to the producers under such Act with respect to the upland cotton acreage of the producers.

"(D) EXCEPTION FROM LIMITATION.—(i) Notwithstanding subparagraph (C), the Secretary may make a disaster payment to producers on a farm under this paragraph if the Secretary determines that—

"(I) as the result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the producers have suffered substantial losses of production either from being prevented from planting upland cotton or other nonconserving crops or from reduced yields;

"(II) such losses have created an economic emergency for the producers;

"(III) crop insurance indemnity payments under the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.) and other forms of assistance made available by the Federal Government to such producers for such losses are insufficient to alleviate such economic emergency; and

"(IV) additional assistance must be made available to such producers to alleviate such economic emergency.

"(ii) The Secretary may make such adjustments in the amount of payments made available under this paragraph with respect to an individual farm so as to assure the equitable allotment of such payments among producers, taking into account other forms of Federal disaster assistance provided to the producers for the crop involved.

"(d) FARM PROGRAM PAYMENT YIELDS.—The farm program payment yields for farms for each crop of upland cotton shall be determined under title V.

"(e) PROGRAMS TO REDUCE ACREAGE.—(1) IN GENERAL.—(A) EXCESSIVE SUPPLY.—Notwithstanding any other provision of this Act, if the Secretary determines that the total supply of upland cotton, in the absence of an acreage limitation program, will be excessive taking into account the need for an adequate carry-over to maintain reasonable and stable supplies and prices and to meet a national emergency, the Secretary may provide for any crop of upland cotton an acreage limitation program as described in paragraph (2).

"(B) CONSIDERATION OF CONSERVATION RESERVE.—In making a determination under subparagraph (A), the Secretary shall take into consideration the number of acres placed in the conservation acreage reserve established under section 1231 of the Food Security Act of 1985 (16 U.S.C. 3831).

"(C) ANNOUNCEMENT OF PROGRAM.—(i) If the Secretary elects to put an acreage limitation program into effect for any crop year, the Secretary shall make a preliminary announcement of any such program not later than November 1 of the calendar year preceding the year in which the crop is harvested. Such announcement shall include, among other information determined necessary by the Secretary, an announcement of the uniform percentage reduction in the upland cotton crop acreage base described in paragraph (2)(A).

"(ii) Not later than January 1 of the calendar year in which the crop is harvested, the Secretary shall make a final announcement of such program. Such announcement shall include, among other information determined necessary by the Secretary, an announcement of the uniform percentage reduction in the upland cotton crop described in paragraph (2)(A).

"(iii) The Secretary shall allow producers in early planting areas to elect to participate in the program on the terms of the acreage limitation program—

"(I) first announced for the crop under subparagraph (C)(i); or

"(II) as subsequently revised under subparagraph (C)(ii)

if the Secretary determines that such producers may be unfairly disadvantaged by such revision.

"(D) RATIO OF CARRY-OVER TO TOTAL DISAPPEARANCE.—The Secretary shall carry out an acreage limitation program described in paragraph (2) for a crop of upland cotton in a manner that will result in a ratio of carry-over to total disappearance (domestic use plus exports) of 30 percent, based on the Secretary's most recent projection of carry-over and total disappearance at the time of announcement of the acreage limitation program.

"(2) ACREAGE LIMITATION PROGRAM.—(A) UNIFORM PERCENTAGE REDUCTION.—If an upland cotton acreage limitation program is announced under paragraph (1), such limitation shall be achieved by applying a uniform percentage reduction (not to exceed 25 percent) to the upland cotton crop acreage base for the crop for each upland cotton-producing farm.

"(B) ENFORCEMENT.—Except as provided in subsection (g), producers who knowingly produce upland cotton in excess of the permitted upland cotton acreage for the farm, as established in accordance with subparagraph (A), shall be ineligible for upland cotton loans and payments with respect to that farm.

"(C) CROP ACREAGE BASES.—Upland cotton crop acreage bases for each crop of upland cotton shall be determined under title V.

"(D) CONSERVATION USE ACREAGE.—(i) A number of acres on the farm shall be devoted to conservation uses, in accordance with regulations issued by the Secretary. Such number shall be determined by dividing—

"(I) the product obtained by multiplying the number of acres required to be withdrawn from the production of upland cotton times the number of acres planted to such commodity; by

"(II) the number of acres authorized to be planted to such commodity under the limitation established by the Secretary.

"(ii) The number of acres determined under clause (i) is hereafter in this subsection referred to as 'reduced acreage'.

"(E) FARM PROGRAM ACREAGE.—Except as provided in subsection (c)(1)(B), the individual farm program acreage shall be the acreage planted on the farm to upland cotton for harvest within the permitted upland cotton acreage for the farm as established under this paragraph.

"(3) USE OF CONSERVATION ACREAGE.—(A) PROTECTION FROM WEEDS AND EROSION.—The regulations issued by the Secretary under paragraph (2) with respect to acreage required to be devoted to conservation uses shall assure protection of such acreage from weeds and wind and water erosion.

"(B) PERMITTED PLANTINGS.—The Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of such acreage to be devoted to sweet sorghum, or the production of guar, sesame, safflower, sunflower, rapeseed, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, rye, or other commodity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not affect farm income adversely.

"(C) HAYING AND GRAZING.—(i) Except as provided in clause (ii) haying and grazing of acreage designated as conservation use acreage for the purpose of meeting any requirements established under an acreage limitation program (including a program conducted under subsection (c)(1)(B)), or land diversion program established under this section shall be permitted, except during any consecutive 5-month period that is established by the State committee established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) for a State. Such 5-month period shall be established during the period beginning April 1, and ending October 31, of a year.

"(ii) In the case of a natural disaster, the Secretary may permit unlimited haying and grazing on such acreage.

"(4) LAND DIVERSION PROGRAM.—(A) PAYMENTS.—(i) The Secretary may make land diversion payments to producers of upland cotton, whether or not an acreage limitation program for upland cotton is in effect, if the Secretary determines that such land diversion payments are necessary to assist in adjusting the total national acreage of upland cotton to desirable goals. Such land diversion payments shall be made to producers who, to the extent prescribed by the Secretary, devote to approved conservation uses an acreage of cropland on the farm in accordance with land diversion contracts entered into by the Secretary with such producers.

"(ii) If, at the time of final announcement of the acreage limitation program established under this subsection, the projected carry-over of upland cotton for the crop year is equal to or greater than 8 million bales, the Secretary shall offer a paid land diversion program to producers of upland cotton. Payments to producers under such a program shall be determined by multiplying—

"(I) the payment rate, of not less than 35 cents per pound of cotton, established by the Secretary; by

"(II) the program payment yield established for the crop for the farm; by

"(III) the number of permitted upland cotton acres diverted on the farm.

"(B) BIDS FOR CONTRACTS.—The amounts payable to producers under land diversion contracts may be determined through the submission of bids for such contracts by producers in such manner as the Secretary may prescribe or through such other means as the Secretary determines appropriate. In determining the acceptability of contract offers, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producers and the productivity of the acreage diverted.

"(C) LIMITATION ON DIVERTED ACREAGE.—The Secretary shall limit the total acreage to be diverted under this paragraph—

"(i) to not more than 15 percent of the upland cotton crop acreage base for a farm; and

"(ii) under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

The Secretary may allow producers to participate in a land diversion program under this paragraph at a level lower than the maximum level announced by the Secretary, at the option of the producer, if the Secretary determines that it will increase participation in such program.

"(5) WILDLIFE USES FOR REDUCED AND DIVERTED ACREAGE.—(A) IN GENERAL.—The reduced acreage and additional diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies.

"(B) COST SHARING.—The Secretary may pay an appropriate share of the cost of practices designed to carry out the purposes of subparagraph (A).

"(C) ENCOURAGEMENT OF PUBLIC ACCESS.—The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe, by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(6) PARTICIPATION AGREEMENTS.—(A) IN GENERAL.—An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such participation not later than such date as the Secretary may prescribe.

"(B) MODIFICATION OR TERMINATION.—The Secretary may, by mutual agreement with producers on a farm, terminate or modify any such agreement if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(f) ONE-HALF ACREAGE REDUCTION PROGRAM.—(1) IN GENERAL.—The Secretary may, for each of the 1991 through 1995 crops of upland cotton, make payments available to producers who meet the requirements of this subsection.

"(2) FORM OF PAYMENT.—Such payments may be—

"(A) made in the form of upland cotton owned by the Commodity Credit Corporation; or

"(B) made in such other form as the Secretary is authorized by law to make.

"(3) DETERMINATION OF PAYMENT.—(A) IN GENERAL.—Payments under this subsection shall be determined in the same manner as provided in subsection (b).

"(B) QUANTITY OF COTTON MADE AVAILABLE.—The quantity of upland cotton to be made available to a producer under this subsection shall be equal in value to the payments so determined under such subsection.

"(4) ELIGIBILITY.—A producer shall be eligible to receive a payment under this subsection for a crop if the producer—

"(A) agrees to forgo obtaining a loan under subsection (a);

"(B) agrees to forgo receiving payments under subsection (c);

"(C) does not plant upland cotton for harvest in excess of the crop acreage base reduced by one-half of any acreage required to be diverted from production under subsection (f); and

"(D) otherwise complies with this section.

"(g) EQUITABLE RELIEF.—(1) LOANS AND PAYMENTS.—If the failure of a producer to comply fully with the terms and conditions of the program formulated under this section precludes the making of loans and payments, the Secretary may, nevertheless, make such loans and payments in such amounts as the Secretary determines are equitable in relation to the seriousness of the failure. The Secretary may consider whether the producer made a good faith effort to comply fully with the terms and conditions of such program in determining whether equitable relief is warranted under this paragraph.

"(2) DEADLINES AND PROGRAM REQUIREMENTS.—The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not affect adversely the operation of the program.

"(h) REGULATIONS.—The Secretary may issue such regulations as the Secretary determines necessary to carry out this section.

"(i) COMMODITY CREDIT CORPORATION.—The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(j) ASSIGNMENT OF PAYMENTS.—The provisions of section 8(g) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(g)) (relating to assignment of payments) shall apply to payments under this section.

"(k) EQUITABLE SHARING OF PAYMENTS.—The Secretary shall provide for the sharing of payments made under this section for any farm among the producers on the farm on a fair and equitable basis.

"(l) TENANTS AND SHARECROPPERS.—The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers.

"(m) PROHIBITIONS.—(1) CROSS COMPLIANCE.—(A) IN GENERAL.—Compliance on a farm with the terms and conditions of any other commodity program or compliance with crop acreage base requirements for any other commodity may not be required as a condition of eligibility for loans or payments under this section.

"(B) CROP ACREAGE BASE INCREASES.—If a producer on a farm is participating in the cotton program under this section, the crop acreage base for any other commodity for the farm may not be increased if such commodity is produced on the farm in a manner that is not in compliance with—

"(i) the terms and conditions of the applicable commodity program for such commodity; or

"(ii) the crop acreage base requirements of the applicable commodity program for such commodity.

"(2) OFFSETTING COMPLIANCE.—The Secretary may not require producers on a farm, as a condition of eligibility for loans or payments under this section for such farm, to comply with the terms and conditions of the upland cotton program with respect to any other farm operated by such producers.

"(n) SPECIAL IMPORT QUOTA; 21 DAY'S MILL CONSUMPTION.—(1) DETERMINATION.—Whenever the Secretary determines that the average price of the base quality of upland cotton, as determined by the Secretary, in the designated spot markets for a month exceeded 130 percent of the average price of such quality of cotton in such markets for the preceding 36 months, notwithstanding any other provision of law, the President shall immediately establish and proclaim a special limited global import quota for upland cotton subject to the following conditions:

"(A) QUANTITY OF QUOTA.—The quantity of the special quota shall be equal to 21 days of domestic mill consumption of upland cotton at the seasonally adjusted average rate of the most recent 3 months for which data are available.

"(B) QUANTITY IN EVENT OF PRIOR QUOTA.—If a special quota has been established under this subsection during the preceding 12 months, the quantity of the quotas next established hereunder shall be the smaller of 21 days of domestic mill consumption calculated as set forth in subparagraph (A) or the quantity required to increase the supply to 130 percent of the demand.

"(C) DEFINITIONS.—As used in subparagraph (B):

"(i) The term 'supply' means, using the latest official data of the Bureau of the Census, the Department of Agriculture, and the Department of the Treasury—

"(I) the carry-over of upland cotton at the beginning of the marketing year (adjusted to 480-pound bales) in which the special quota is established; plus

"(II) production of the current crop; plus

"(III) imports to the latest date available during the marketing year.

"(ii) The term 'demand' means—

"(I) the average seasonally adjusted annual rate of domestic mill consumption in the most recent 3 months for which data are available; plus

"(II) the larger of either the average exports of upland cotton for the preceding 6 marketing years, or the cumulative exports of upland cotton plus outstanding export sales for the marketing year in which the special quota is established.

"(D) QUOTA ENTRY PERIOD.—When a special quota is established under this subsection, cotton may be entered under such quota during the 90-day period beginning on the effective date of the proclamation.

"(2) PROHIBITION.—Notwithstanding paragraph (1), a special quota period may not be established—

"(A) that overlaps an existing quota period; or

"(B) when a special quota period has been established under subsection (a)(5)(H).".

SEC. 102. SUSPENSION OF BASE ACREAGE ALLOTMENTS, MARKETING QUOTAS, AND RELATED PROVISIONS.

Sections 342, 343, 344, 345, 346, and 377 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1342–1346 and 1377) shall not be applicable to any of the 1991 through 1995 crops of upland cotton.

SEC. 103. COMMODITY CREDIT CORPORATION SALES PRICE RESTRICTIONS.

Effective only with respect to the period beginning August 1, 1991, and ending July 31, 1996, the tenth sentence of section 407 of the Agricultural Act of 1949 (7 U.S.C. 1427) is amended by striking all of that sentence through the words "110 per centum of the loan rate, and (2)" and inserting the following: "Notwithstanding any other provision of law, (1) the Commodity Credit Corporation shall sell upland cotton for unrestricted use at the same prices as it sells upland cotton for export; such sales shall be made on a competitive bid basis, but in no event, however, at less than 115 percent of the lower of the loan rate or the loan repayment rate in effect for the week in which it is sold for the base quality of upland cotton, as determined by the Secretary, adjusted for such current market differentials reflecting grade, quality, location, and other value factors as the Secretary determines appropriate plus reasonable carrying charges, and (2)".

SEC. 104. NONAPPLICABILITY OF SECTION 103(a) OF THE AGRICULTURAL ACT OF 1949 TO THE 1991 THROUGH 1995 CROPS OF UPLAND COTTON.

Section 103(a) of the Agricultural Act of 1949 (7 U.S.C. 1444(a)) shall not be applicable to the 1991 through 1995 crops.

SEC. 105. SKIPROW PRACTICES.

Section 374(a) of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1374(a)) is amended by striking "1990 crops" and inserting "1995 crops. However, for the 1991 through 1995 crops, the rules shall allow 30 inch rows to be taken into account for classifying the acreage planted to cotton and the area skipped".

SEC. 106. PRELIMINARY ALLOTMENTS FOR 1996 CROP OF UPLAND COTTON.

Notwithstanding any other provision of law, the permanent State, county, and farm base acreage allotments for the 1977 crop of upland cotton, adjusted for any underplantings in 1977 and reconstituted as provided in section 379 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1379), shall be the preliminary allotments for the 1996 crop.

SEC. 107. EXTRA LONG STAPLE COTTON.

Section 103(h) of the Agricultural Act of 1949 (7 U.S.C. 1444(h)) is amended—

(1) in paragraph (16)(B) by striking "each of the 1989 and 1990" and inserting "the 1989 and subsequent"; and

(2) in paragraph (16)(C) by striking "each of the 1987 through 1990" and inserting "the 1987 and subsequent"; and

(3) in paragraph (19) by striking "1991" and inserting "1996".

SEC. 108. ADJUSTMENT OF SUPPORT PRICES.

Section 403 of the Agricultural Act of 1949 (7 U.S.C. 1423) is amended to read as follows:

"SEC. 403. ADJUSTMENT OF SUPPORT PRICES.

"(a) CROPS OTHER THAN COTTON.—Appropriate adjustments may be made in the support price for any commodity except cotton for differences in grade, type, quality, location and other factors. Such adjustments shall, so far as practicable, be made in such manner that the average support price for such commodity will, on the basis of the anticipated incidence of such factors be equal to the level of support determined as provided in this Act.

"(b) COTTON.—Appropriate adjustments may be made in the support price for cotton for differences in quality factors and location. Beginning with the 1991 crop, the quality differences (premiums and discounts for quality factors) for the upland cotton loan program shall be established by the Secretary by giving equal weight to (1) loan differences for the preceding crop and (2) market differences for such crop in the designated United States spot markets.".

SEC. 109. COTTONSEED AND COTTONSEED OIL PRICE SUPPORT.

Effective only for the 1991 through 1995 crops of upland cotton, section 203 of the Agricultural Act of 1949 (7 U.S.C. 1446d) is amended to read as follows:

"SEC. 203. COTTONSEED AND COTTONSEED OIL PRICE SUPPORT.

"If the Secretary determines that any oilseed program or programs cause, or are likely to cause, a reduction in prices received by producers for cottonseed or by processors for cottonseed oil, the Secretary shall take such actions as are necessary to offset the actual or anticipated impact of such program on prices for cottonseed or cottonseed oil. Such actions shall only include actions to stabilize or increase the price of cottonseed, and shall not include actions to decrease the prices of other oilseeds.".

Mr. HUCKABY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, the first section of the 1990 bill is the cotton provision. Cotton has worked amazingly well in the last 5 years. In 1985 we implemented a new program called marketing loan for cotton. Since then cotton production has increased in the United States from a little more than 10 million bales to almost 15 million bales per year. We have seen the price increase from less than 50 cents a pound to almost 75 cents a pound, a dramatic increase.

Mr. Chairman, the program is working well. As a result of this, the bill before us today only does some fine-tuning to the cotton provision.

The target price: We freeze the target price for 5 years. For the next 5 years cotton will continue to have the existing target price of 72.9 cents. We will continue to use the existing formula. It shall be based upon 85 percent of the past market prices.

Production targets: One of the keys to the success of the cotton provision have been that we have controlled our inventory so that the farmer could get his price from the marketplace rather than from the Government. We continue to do that in the bill before us.

We have a maximum acreage reduction program of 25 percent. It is necessary, and we hope it will not be to reduce plantings by more than that. It should be an optional paid land diversion.

We change the formula by which we adjust the wool price to ensure that we are competitive. It is absolutely essential that American cotton be offered in the international markets at a competitive price always. We always want to be able to compete, and, with the changes that are made in the wool price formula, we will be able to do this.

Mr. Chairman, this is a strong title, the cotton title of the 1990 farm bill. It stands on a solid record of success of what has happened in the last 5 years, and I would urge my colleagues to adopt these provisions.

Mr. STANGELAND. Mr. Chairmam, I move to strike the requisite number of words.

Mr. Chairman, I will not take the full 5 minutes. I just want to stand in support of the gentleman from Louisiana [Mr. HUCKABY], the chairman of the Cotton, Rice and Sugar Subcommittee, and commend him for his leadership in this title.

Mr. Chairman, we have a cotton title here that is supported by all segments of the industry. To my knowledge, there is no dissent within the cotton industry on this title.

Cotton certainly is an extremely important corp domestically and in international trade. Cotton exports represent about $2 billion or about 5 percent of the total value of U.S. agriculture exports.

Mr. Chairman, the objective of the 1985 farm bill was to make U.S. cotton more competitive, and we accomplish that. While that act retained major features of previous legislation, we made some major changes. The gentleman from Louisiana [Mr. HUCKABY] has referred to those, such as some more discretionary authority to the Secretary. We provided for greater market orientation and more flexibility to promote market competitiveness. We established the marketing loan.

Let me say that this has the support of the industry, and I would urge my colleagues to overwhelmingly approve this title to the 1990 farm bill.

Mr. COMBEST. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I am representing probably what is the largest cotton producing district in the Nation of any congressional district. I rise in complete support of the cotton title of the 1990 farm bill.

Primarily what the cotton title does in the 1990 farm bill is to fine-tune and extend the 1985 cotton section of the bill which has worked extremely well, which we find ourselves in a very unique prosition, and that is supported by all segments of the cotton producing industry, and it has been strongly supported by the producers who have lived and worked under this bill for 5 years.

Mr. Chairman, I just might like to make just a moment's comment on what we anticipate some of the further discussions will be as we get into other titles in addition to the cotton title of the farm bill.

Mr. Chairman, references have been made by a number of our colleagues and references have been made in a number of newspaper articles which have recently appeared on the subject of the farm bill which discuss the policy, whether it be good or bad. Many of those critical of current farm policy in one paragraph will talk about the fact that we are paying producers not to produce, and in the same paragraph, or the one subsequent, following, to it, following, we will talk about the fact that we have over-surplus situations.

I do not know of any business, Mr. Chairman, that produces at the total extent, total capacity, of which it can produce. I do not know of any car manufacturer, I do not know of any television manufacturer, I do not know of anyone making widgets or digits that produces everything that can be produced. They produce according to market demand.

One would almost assume, or be led to believe under many of the discussions, and debates and articles about the farm program, that because we, as is indicated, pay farmers not to produce, we end up with shortages, that we do not have the commodities to fill the chain. That simply is not correct.

Mr. Chairman, under the farm program we have built into it the fact that there will be millions of bales of excess cotton produced over market demand. We build into it the fact that there will be millions of bushels or millions of hundredweights of grain that are built into the production levels so that we have adequate surpluses, so that we can in times of need or shortfalls be able to fill that demand, and yet, at the same time, do it in such a conscientious way that we do not flood the market with unusable commodities.

So, to those who would simply take the short sight, and not look into this further detail and would assume that because farmers do not produce fence to fence, do not produce every row which is capable, that in fact what they are doing is providing a good management tool to fill the demand and to fill the needs that are there to provide an adequate overage and surplus in case of shortages, but do so in a well-managed position and simply not the fact that we in this country do not produce enough because every acre that is allowed full production is not produced. There are many areas in which farmers have to comply with regulations that are imposed by the Federal Government, and in those they are compensated as such. We have seen what agricultural does when commodity programs are changed to the extent that farmers are asked or almost encouraged to produce row to row, fence to fence.

I hope we do not go back to those failed policies, Mr. Chairman, because in the past those policies have definitely been failures.

□ 1200

EN BLOC AMENDMENTS OFFERED BY MR. DE LA GARZA

Mr. DE LA GARZA. Mr. Chairman, I offer en bloc amendments.

The Clerk read as follows:

En bloc amendments offered by Mr. DE LA GARZA: 1. On page 33, strike lines 8 through 10 and insert "sorghum or the production of guar, sesame, castor beans, crambe, plantago ovato, triticale, rye, commodities for which no".

2. On page 41, line 21, insert after the period the following: "The Secretary may not exclude irrigated or irrigable acreage not planted in alfalfa when exercising the authority under this clause.".

3. On page 52—

(1) strike lines 19 through 24 and insert the following:

"(1) by striking paragraphs (4) through (6);

"(2) by redesignating paragraphs (7) through (19) as paragraphs (4) through (16), respectively;

"(3) in the second sentence of paragraph (5)(A)(i), as so redesignated, by inserting ', including a zero percentage reduction,' after 'reduction';

"(4) by striking paragraph (13) as so redesignated, and inserting the following:

'(13)(A)(i) Compliance on a farm with the terms and conditions of any other commodity program or compliance with crop acreage base requirements for any other commodity may not be required as a condition of eligibility for loans or payments under this section.

'(ii) If a producer on a farm is participating in the extra long staple cotton program under this section, the crop acreage base for any other commodity for the farm may not be increased if such commodity is produced on the farm in a manner that is not in compliance with—

'(I) the terms and conditions of the applicable commodity program for such commodity; or

'(II) the crop acreage base requirements of the applicable commodity program for such commodity.

'(B) The Secretary may not require producers on a farm, as a condition of eligibility for loans or payments under this section for such farm, to comply with the terms and conditions of the extra long staple cotton program with respect to any other farm operated by such producers.'; and"

(2) on line 25, redesignate paragraph (3) as paragraph (5).

Title I—Cotton

Section 101 is amended:

—(1) by inserting on page 32, line 11 after the word "producers," the following: "including such condition resulting from the adjudication of Indian water settlement disputes,";.

—(2) by inserting on page 33, line 7 after the word "producers," the following: "including such condition resulting from the adjudication of Indian water settlement disputes,".

—(3) by inserting on page 34, line 9 after the word "producers," the following: "including such condition resulting from the adjudication of Indian water settlement disputes,".

Mr. DE LA GARZA (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. DE LA GARZA. Mr. Chairman, these amendments en bloc actually have three items. One is an amendment by the gentleman from Texas [Mr. SARPALIUS] that would give the Secretary the authority to permit haying and grazing on conservation use acreage in case of a natural disaster.

Mr. Chairman, let me state at this point that any amendment which I will offer en bloc at the end of sections is in coordination with and consultation and agreement with the minority. I will not offer in behalf of the majority, so that the Members might remember through the day that any amendments we offer at the conclusion of a title will be in agreement, coordination and consultation with the minority.

The second amendment that we will have is by the gentleman from Wyoming [Mr. THOMAS]. There is a problem between certain water rights, historic water rights that now have reverted back to the original owners of that water, an Indian tribe. This will provide that the users of the water will be protected under a preventive planting. If they have no water, they cannot plant their crops. They have lost their water for other reasons. This during the term of this bill for the next 5 years would protect under that preventive planting, I understand it is like some 25 acres in Wyoming.

Then we have various and sundry items of a correcting nature, dotting an "i" or crossing a "t". That is the text of the amendments en bloc.

The CHAIRMAN. The question is on the en bloc amendments offered by the gentleman from Texas [Mr. DE LA GARZA].

The en bloc amendments were agreed to.

The CHAIRMAN. Are there any other amendments to title I?

If not, the clerk will designate title II.

The text of title II is as follows:

TITLE II—SUGAR

Subtitle A—Price Support and Marketing Allotments

SEC. 201. SUGAR PROGRAM EXTENSION.

(a) AMENDMENT TO THE AGRICULTURAL ACT OF 1949.—Effective only for the 1991 through 1995 crops of sugar beets and sugarcane, section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446) is amended by—

(1) striking "honey, and milk" in the first sentence and inserting "honey, milk, sugar beets, and sugarcane"; and

(2) amending subsection (h) to read as follows:

"(h)(1) The price of each of the 1991 through 1995 crops of sugar beets and sugarcane, respectively, shall be supported in accordance with this subsection.

"(2)(A) The Secretary shall support the price of domestically grown sugarcane through nonrecourse loans at such level as the Secretary determines appropriate but not less than 18 cents per pound for raw cane sugar.

"(B) The Secretary may increase the support price for each of the 1991 through 1995 crops of domestically grown sugarcane and sugar beets from the price determined for the preceding crop based on such factors as the Secretary determines appropriate, including changes (during the 2 crop years immediately preceding the crop year for which the determination is made) in the cost of sugar products, the cost of domestic sugar production, and other circumstances that may adversely affect domestic sugar production.

"(C) If the Secretary makes a determination not to increase the support price under subparagraph (B), the Secretary shall submit a report containing the findings, decision, and supporting data for such determination to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate.

"(3) The Secretary shall support the price of each of the 1991 through 1995 crops of domestically grown sugar beets through nonrecourse loans at such level for each such crop as the Secretary determines to reflect—

"(A) an amount that bears the same relation to the support level for such crop of sugarcane under paragraph (2) as the weighted average of producer returns for sugar beets bears to the weighted average of producer returns for sugarcane, expressed on a cents per pound basis for refined beet sugar and raw

cane sugar, for the most recent 5 year period for which data are available, plus

"(B) an amount that covers sugar beet processor fixed marketing expenses.

"(4) The Secretary shall announce the loan rate to be applicable during any fiscal year under this subsection as far in advance of the beginning of that fiscal year as is practicable consistent with the purposes of this subsection.

"(5) Loans under this subsection during any fiscal year shall be made available not earlier than the beginning of such fiscal year and shall mature at the earlier of—

"(A) the end of 9 months or

"(B) before the end of such fiscal year.

"(6) With respect to those sugar beet producing areas in which sugar beets normally are harvested during the last 3 months of a fiscal year, the Secretary shall make available, to each borrower under a loan made under this subsection during the last 3 months of the fiscal year on sugar processed from sugar beets so harvested, a supplementary nonrecourse loan in addition to the initial loan. In each case, the supplementary loan shall—

"(A) be made available to the borrower as of the first day of the following fiscal year;

"(B) be made at the same loan rate as the initial loan; and

"(C) mature in 9 months less the amount of time that the initial loan was in effect.".

(b) REPORT BY COMPTROLLER GENERAL.—The Comptroller General of the United States shall provide, not later than 12 months after the date of enactment of this Act, a report advising the Committee on Agriculture and the Committee on Ways and Means of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate on the progress the various agencies of the United States Government have made in addressing the concerns raised by the General Accounting Office in its official report, RCED-88-146, dated June 1988.

SEC. 202. INFORMATION REPORTING.

(a) DUTY TO REPORT.—All cane sugar refiners and sugar beet processors and all manufacturers of crystalline fructose from corn (hereinafter in this subtitle referred to as "crystalline fructose") shall furnish the Secretary of Agriculture (hereinafter in this subtitle referred to as the "Secretary"), on a monthly basis, such information as the Secretary may require with respect to such person's importation, distribution, and stock levels of sugar or crystalline fructose, respectively.

(b) PENALTY.—Any person willfully failing or refusing to furnish such information, or furnishing willfully any false information, shall be subject to a civil penalty of not more than $10,000 for each such violation.

(c) MONTHLY REPORTS.—Using the information received under subsection (a), the Secretary shall publish on a monthly basis composite data on imports, distribution, and stock levels of sugar and crystalline fructose.

SEC. 203. MARKETING ALLOTMENTS FOR SUGAR AND CRYSTALLINE FRUCTOSE.

(a) SUGAR ESTIMATES.—(1) IN GENERAL.—Before the beginning of each of the fiscal years 1992 through 1996, the Secretary shall estimate the amount of sugar that will be consumed in the United States during such fiscal year (other than sugar imported for purposes other than human consumption), and the amount of sugar that will be available from carryin stocks or from domestically-produced sugarcane and sugar beets for consumption in the United States during such year. The Secretary shall also estimate the amount of sugar that will be imported for such consumption during such year (other than sugar imported for purposes other than human consumption), based on the difference between the amount of estimated consumption and the amount of sugar estimated to be available from domestically-produced sugarcane, sugar beets and carryin stocks.

(2) QUARTERLY REESTIMATES.—The Secretary shall make quarterly reestimates of sugar consumption, availability, and imports for a fiscal year no later than the beginning of each of the second through fourth quarters of such fiscal year.

(b) SUGAR ALLOTMENTS.—For any fiscal year in which the Secretary estimates, under subsection (a), that imports of sugar for consumption in the United States will be less than 1,250,000 short tons, raw value, the Secretary shall establish for that year appropriate allotments under section 204 for the marketing by processors of sugar processed from domestically-produced sugarcane and sugar beets in a manner that is fair, efficient, and equitable to producers, processors, and refiners, at a level that the Secretary estimates will result in imports of sugar of not less that 1,250,000 short tons, raw value, for that year.

(c) CRYSTALLINE FRUCTOSE ALLOTMENTS.—In general, for any fiscal year in which the Secretary establishes allotments for the marketing of sugar under section 204, the Secretary shall establish for that year appropriate allotments for the marketing by manufacturers of crystalline fructose manufactured from corn, at a level not to exceed the equivalent of 200,000 tons of sugar, raw value, during such fiscal year, in a manner that is fair, efficient, and equitable to manufacturers.

(d) PROHIBITION.—(1) SUGAR.—(A) EXCEEDING ALLOCATION.—At any time allotments are in effect and allocated to processors under section 205, the total of—

(i) the amount of sugar marketed by a processor plus

(ii) the amount of sugar pledged as collateral for a price support loan under section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446)

shall not exceed the amount of the allocation of the allotment made to such processor.

(B) EXCEPTIONS.—Subparagraph (A) shall not apply—

(i) to the marketing during a fiscal year of sugar pledged in that fiscal year as collateral for a price support loan under section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446) after such sugar has been subsequently redeemed; or

(ii) any sale of sugar by a sugar beet processor to another sugar beet processor made to enable such other sugar beet processor to fulfill the amount of the allocation of the allotment made to such other processor.

(2) CRYSTALLINE FRUCTOSE.—At any time crystalline fructose allotments are in effect for manufacturers under subsection (c), no manufacturer may exceed the allotment made to it. No restrictions or allotments shall be established on the marketings of any liquid fructose.

(3) CIVIL PENALTY.—Any processor who violates paragraph (1) or manufacturer who violates paragraph (2) shall be liable to the Commodity Credit Corporation for a civil penalty in an amount equal to 3 times the U.S. market value, at the time of the commission of the violation, of that quantity of sugar or crystalline fructose involved in the violation.

(4) DEFINITION OF MARKET.—For purposes of this subtitle, the term "market" shall mean to sell or otherwise dispose of in commerce in the United States.

SEC. 204. ESTABLISHMENT OF MARKETING ALLOTMENTS.

The Secretary shall establish marketing allotments for sugar for any fiscal year in which such allotments are required under section 203(b) as follows:

(1) The Secretary shall establish the overall quantity of sugar to be allotted for such fiscal year (hereafter in this subtitle referred to as the "overall allotment amount") by deducting from the estimated sugar consumption for such fiscal year, as determined under section 203(a)—

(A) 1,250,000 short tons, raw value (representing minimum imports of sugar for consumption in the United States during such fiscal year), and

(B) carryin stocks of sugar, including sugar in Commodity Credit Corporation inventory.

The Secretary shall adjust the overall allotment amount to the maximum extent practicable to prevent the accumulation of sugar acquired by the Commodity Credit Corporation.

(2) The overall allotment amount for the fiscal year shall be allotted among—

(A) sugar derived from sugar beets; and

(B) sugar derived from sugarcane.

(3)(A) The Secretary shall establish percentage factors for the overall beet sugar and cane sugar allotments applicable for a fiscal year. The Secretary shall establish such percentage factors in a fair and equitable manner on the basis of past marketings of sugar (considering for such purposes the marketings of sugar processed from sugarcane and sugar beets of any or all of the 1985 through 1989 crops), processing and refining capacity, and the ability of processors to market the sugar covered under the allotments.

(B) The Secretary shall publish these percentage factors in the Federal Register, along with a description of the Secretary's reasons for establishing the factors, as provided in section 202(c).

(4) The marketing allotment for sugar derived from sugarcane and the marketing allotment for sugar derived from sugar beets for a fiscal year, in each case, shall be an amount equal to the product of multiplying the overall allotment amount for the fiscal year by the percentage established by the Secretary under paragraph (3)(A) for such allotment.

(5) The allotment for sugar derived from sugarcane shall be further allotted among the four States in the United States in which sugarcane is produced, and Puerto Rico (hereafter in this subtitle the term "State" shall include Puerto Rico), in a fair and equitable manner on the basis of past marketings of sugar (considering for such purposes the average of marketings of sugar processed from sugarcane in the 2 highest years of production from each State from the 1985 through 1989 crops), processing and refining capacity, and the ability of processors to market the sugar covered under the allotments.

(6)(A) The Secretary shall, based on reestimates under section 203(a)(2), adjust upward or downward marketing allotments established under paragraphs (1) through (5) in a fair and equitable manner, or suspend such allotments, as the Secretary determines appropriate, to reflect changes in estimated sugar consumption, availability, or imports.

(B) In the case of any increase or decrease in an allotment, each allocation to a processor of the allotment under section 205, and each proportionate share established with respect to the allotment under section 207(b), shall be increased or decreased by the same percentage that the allotment is increased or decreased.

(C) Whenever a marketing allotment for a fiscal year is required to be reduced during such fiscal year under this paragraph—

(i) if the amount of the sugar marketed, including pledged as collateral for a price support loan under section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446), for such fiscal year at the time of such reduction under the allotment by all processors covered by the allotment exceeds the reduced allotment, the amount of the excess sugar marketed shall be deducted—

(I) if beet sugar is involved, from the marketing allotment, if any, next established for beet sugar, or

(II) if cane sugar is involved, from the marketing allotment next established for the State; and

(ii) if the amount of sugar marketed, including pledged as collateral for a price support loan under section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446), for such fiscal year at the time of the reduction by any individual processor covered by the allotment exceeds the processor's allocation, the amount of the excess sugar marketed shall be deducted from the allocation of an allotment, if any, next established for the processor.

(7) Except as otherwise provided in section 206, each marketing allotment of sugarcane established under this section may only be filled with sugar processed from domestically grown sugarcane, and each marketing allotment of sugar beets established under this section may only be filled with sugar processed from domestically grown sugar beets.

SEC. 205. ALLOCATION OF MARKETING ALLOTMENTS.

(a) IN GENERAL.—(1) ALLOCATION TO PROCESSORS.—Whenever marketing allotments are established for a fiscal year under section 204, in order to afford all interested persons an equitable opportunity to market sugar processed under an allotment, the Secretary shall allocate each such allotment among the processors covered by the allotment.

(2) HEARING AND NOTICE.—(A) CANE SUGAR.—The Secretary shall make allocations for cane sugar after such hearing and on such notice as the Secretary by regulation may prescribe, in such manner and in such quantities as to provide a fair, efficient, and equitable distribution of such allocations by taking into consideration processing capacity, past marketings of sugar, and the ability of each processor to market sugar covered by that portion of the allotment allocated. Each such allocation shall be subject to adjustment under section 204(6)(B).

(B) BEET SUGAR.—The Secretary shall make allocations for beet sugar after such hearing and on such notice as the Secretary by regulation may prescribe, in such manner and in such quantities as to provide a fair, efficient, and equitable distribution of such allocations by taking into consideration processing capacity, past marketings of sugar (considering for such purposes the marketings of sugar processed from sugar beets of any or all of the 1985 through 1989 crops), and the ability of each processor to market sugar covered by that portion of the allotment allocated. Each such allocation shall be subject to adjustment under section 204(6)(B).

(b) FILLING CANE SUGAR ALLOTMENTS.—Except as otherwise provided in section 206, the marketing allotment established for cane sugar under this subtitle for a fiscal year may be filled only with sugar processed from sugarcane grown in the State covered by the allotment.

SEC. 206. ASSIGNMENTS OF DEFICITS.

(a) ESTIMATES OF MARKETING.—At any time allotments are in effect under this subtitle, the Secretary, from time to time, shall determine whether (in view of then-current inventories of sugar, the estimated production of sugar and expected marketings, and other pertinent factors) processors of sugarcane in each State covered by an allotment will be able to market the sugar covered by the allotment applicable to them and whether processors of sugar beets will be able to market sugar covered by the portion of the beet sugar allotment applicable to them.

(b) REASSIGNMENT OF DEFICITS.—(1) CANE SUGAR.—If the Secretary determines that the sugarcane processors subject to a State allotment will be unable to market the State's allotment for the fiscal year—

(A) the Secretary first shall reassign the estimated quantity of the deficit proportionately to the allotments for other cane sugar States, depending on the capacity of each other State to fill the portion of the deficit to be assigned to it, with such reassigned amount to each State to be allocated among processors in that State in proportion to the allocations of such processors; and

(B) if after such reassignments, the deficit cannot be completely eliminated, the Secretary shall reassign the remainder to imports.

(2) BEET SUGAR.—If the Secretary determines that a sugar beet processor subject to an allotment will be unable to market that allotment—

(A) the Secretary first shall reassign the estimated quantity of the deficit proportionately to the allotments for other sugar beet processors, depending on the capacity of each other processor to fill the portion of the deficit to be assigned to it; and

(B) if after such reassignments, the deficit cannot be completely eliminated, the Secretary shall reassign the remainder to imports.

(3) CORRESPONDING INCREASE.—The allocation of each processor receiving a reassigned amount of an allotment under this subsection for a fiscal year shall be increased to reflect such reassignment.

SEC. 207. PROVISIONS APPLICABLE TO PRODUCERS.

(a) PROCESSOR ASSURANCES.—Whenever allotments for a fiscal year are allocated to processors under section 205, the Secretary shall obtain from the processors such assurances as the Secretary deems adequate that the allocation will be shared among producers served by the processor in a fair and equitable manner that adequately reflects producers' production histories. Any dispute between a processor and a producer, or group of producers, with respect to the sharing of the processor's allocation shall be resolved through arbitration by the Secretary on the request of either party.

(b) PROPORTIONATE SHARES OF CERTAIN ALLOTMENTS.—(1) IN GENERAL.—(A) STATES AFFECTED.—In any case in which a State allotment is established under section 204(5) and there are in excess of 250 producers in the State to which it applies, the Secretary shall make a determination under subparagraph (B).

(B) DETERMINATION.—The Secretary shall determine, for each State allotment described in subparagraph (A), whether the production of sugar, in the absence of proportionate shares, will be greater than the quantity needed to enable processors to fill the allotment and provide a normal carryover inventory.

(2) ESTABLISHMENT OF PROPORTIONATE SHARES.—If the Secretary determines that the amount of sugar processed from all crops by all processors covered by a State allotment for a fiscal year will be in excess of the quantity needed to enable processors to fill the allotment for such fiscal year and provide a normal carryover inventory, the Secretary shall establish proportionate shares for the crop of sugarcane that is harvested during the fiscal year the allotment is in effect as provided in this subsection. Each such proportionate share shall be subject to adjustment under section 204(6)(B).

(3) METHOD OF DETERMINING.—For purposes of determining proportionate shares for any crop of sugarcane—

(A) The Secretary shall convert the State allotment for the fiscal year involved into a State acreage allotment for the crop by dividing the State allotment by the per-acre yield goal for the State, as established under subparagraph (B).

(B) The Secretary shall establish the State's per-acre yield goal for a crop at a level (not less than the average per-acre yield in the State for the preceding 5 years, as determined by the Secretary) that will ensure an adequate net return per pound to producers in such State, taking into consideration any available production research data that the Secretary deems relevant.

(C) The Secretary shall establish a uniform reduction percentage for the crop by dividing the State acreage allotment, as determined for such crop under subparagraph (A), by the number of acres in the State that the Secretary estimates would otherwise be harvested for the production of such crop of sugarcane.

(D) The uniform reduction percentage for such crop, as determined under subparagraph (C), shall be applied to the acreage base for each farm covered by the State allotment to determine the farm's proportionate share for the crop.

(4) ACREAGE BASE.—For purposes of this subsection, the acreage base for each sugarcane-producing farm shall be determined by the Secretary, as follows:

(A) The acreage base for any crop shall be the weighted average number of acres on the farm on which sugarcane was harvested for sugar or seed during each of the 5 preceding crops.

(B) In weighting past production of sugarcane, the 5 crops being considered shall be given the following weights:

Past crop	Weight factor
Most recent preceding crop	1
Second most recent preceding crop	2
Third most recent preceding crop	3
Fourth most recent preceding crop	4
Fifth most recent preceding crop	5

(C) Acreage that producers on a farm were unable to harvest to sugarcane for sugar or seed because of drought, flood, other natural disaster, or other condition beyond the control of the producers shall be considered as harvested to sugarcane for sugar or seed for purposes of this paragraph.

(5) VIOLATION.—(A) IN GENERAL.—Whenever proportionate shares are in effect in a State for a crop of sugarcane, no producer in the State knowingly may harvest for sugar or seed an acreage of sugarcane of such crop in

excess of the farm's proportionate share for the crop or otherwise violate proportionate share regulations issued by the Secretary under section 209(a).

(B) CIVIL PENALTY.—Any producer who violates subparagraph (A) shall be liable to the Commodity Credit Corporation for a civil penalty in an amount equal to 3 times the United States market value, at the time of the commission of the violation, of that quantity of sugar involved in the violation. The quantity of sugar involved shall be determined based on the per-acre yield goal established under paragraph (3).

(6) WAIVER.—Notwithstanding the preceding subparagraph, the Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act to waive or modify deadlines and other proportionate share requirements in cases in which lateness or failure to meet such other requirements does not affect adversely the operation of proportionate shares.

SEC. 208. SPECIAL RULES.

(a) TRANSFER OF PRODUCTION HISTORY.—For the purpose of establishing proportionate shares for producers under section 207, the Secretary, on application of any producer, may transfer the production history of land owned, operated, or controlled by such producers to any other parcels of land of such applicant.

(b) RESERVATION OF PRODUCTION HISTORY.—If for reasons beyond the control of the owner of a farm, the owner is unable to use all or a portion of the proportionate share established for the farm under section 207, the Secretary may reserve for a period of not more than 3 consecutive years the production history of such farm to the extent of the proportionate share involved. Such proportionate share may be redistributed to other farm owners or operators, but no production history shall accrue to such other farm owners or operators, by virtue of such redistribution of the proportionate share so redistributed.

(c) REVISIONS OF ALLOCATIONS AND PROPORTIONATE SHARES.—The Secretary, after such hearing and notice as the Secretary by regulation may prescribe, may revise or amend any allocation of a marketing allotment under section 205, or any proportionate share established for a farm under section 207, on the same basis as the initial allocation or proportionate share was established.

SEC. 209. REGULATIONS; VIOLATIONS; PUBLICATION OF SECRETARY'S DETERMINATIONS; JURISDICTION OF THE COURTS; U.S. ATTORNEYS.

(a) REGULATIONS.—(1) IN GENERAL.—The Secretary shall issue such regulations as may be necessary to carry out the powers vested in the Secretary in administering the marketing allotment program under this subtitle.

(2) PRIOR CONSULTATIONS REQUIRED.—In addition to taking such other action as may be required under section 551 through 559 of title 5, United States Code, prior to proposing any regulations under paragraph (1), the Secretary shall consult with representatives of domestic sugar processors and producers with regard to ensuring that such regulations achieve the objectives of this subtitle. The results of such consultations shall be published in the Federal Register, along with the proposed regulations.

(b) VIOLATION.—Any person knowingly violating any regulation of the Secretary issued under subsection (a) shall be subject to a civil penalty of not more than $5,000 for each violation.

(c) PUBLICATION IN FEDERAL REGISTER.—Each determination issued by the Secretary to establish, adjust or suspend allotments under this subtitle shall be promptly published in the Federal Register and shall be accompanied by a statement of the reasons for such determination.

(d) JURISDICTION OF COURTS; UNITED STATES ATTORNEYS.—(1) The several district courts of the United States are vested with jurisdiction specifically to enforce, and to prevent and restrain any person from violating, this subtitle or any regulation issued thereunder.

(2) Whenever the Secretary shall so request, it shall be the duty of the several United States attorneys, in their respective districts, to institute proceedings to enforce the remedies and to collect the penalties and forfeitures provided for in this subtitle. The Secretary may elect not to refer to a United States attorney any violation of this subtitle or regulation when the Secretary determines that the administration and enforcement of this subtitle would be adequately served by written notice or warning to any person committing the violation.

(e) NONEXCLUSIVITY OF REMEDIES.—The remedies and penalties provided for in this subtitle shall be in addition to, and not exclusive of, any remedies or penalties existing at law or in equity.

SEC. 210. APPEALS.

(a) IN GENERAL.—An appeal may be taken to the Secretary from any decision under section 205 establishing allocations of marketing allotments, or under section 207, by any person adversely affected by reason of any such decision.

(b) PROCEDURE.—Any such appeal shall be taken by filing with the Secretary, within 20 days after the decision complained of is effective, notice in writing of the appeal and a statement of the reasons therefor. Unless a later date is specified by the Secretary as part of the Secretary's decision, the decision complained of shall be considered to be effective as of the date on which announcement of the decision is made. The Secretary shall deliver a copy of any notice of appeal to each person shown by the records of the Secretary to be adversely affected by reason of the decision appealed, and shall at all times thereafter permit any such person to inspect and make copies of appellant's reasons for the appeal and shall on application permit such person to intervene in the appeal. The Secretary shall provide each appellant an opportunity for a hearing. The Secretary shall appoint an administrative law judge to conduct a hearing on the record on each appeal under this section. In all other respects, each appeal under this section shall be subject to the provisions of section 551 through 559, and 701 through 706, of title 5, United States Code.

SEC. 211. ADMINISTRATION.

(a) USE OF CERTAIN AGENCIES.—In carrying out the provisions of sections 202 through 210 of this subtitle, the Secretary may use the services of local committees of sugar beet or sugarcane producers, sugarcane processors, or sugar beet processors, State and county committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act, and the departments and agencies of the United States Government.

(b) USE OF COMMODITY CREDIT CORPORATION.—The Secretary shall use the services, facilities, funds, and authorities of the Commodity Credit Corporation to carry out the provisions of sections 202 through 210 of this subtitle.

Subtitle B—Miscellaneous

SEC. 221. SUGARCANE DISASTER ASSISTANCE.

(a) 1990 CROP.—Effective only for the 1990 crop of sugarcane, section 201(k)(2) of the Agricultural Act of 1949 (7 U.S.C. 1446(k)(2)) is amended by—

(1) inserting "(A)" after "(2)"; and

(2) inserting the following subparagraph:

"(B) If, because of frost, freeze, or related condition in 1989 constituting a major disaster or emergency declared by the President in the State of Louisiana under the Disaster Relief Act of 1974 (42 U.S.C. 5121 et seq.), the total quantity of the 1990 crop of sugarcane that the producers are able to harvest on any farm is less than—

"(1) 60 percent of the county average yield, as determined by the Secretary of Agriculture, for such crop, multiplied by

"(2) the acreage planted for harvest to such crop, the Secretary shall make a reduced yield disaster payment to the producers at a rate equal to 50 percent of the loan level for the crop for the deficiency in production greater than percent for the crop. The Secretary shall ensure that no producer receives duplicative payments under this subsection.".

(b) 1989 CROP CLARIFICATION.—(1) DETERMINATION.—Section 103 of the Disaster Assistance Act of 1989 (7 U.S.C. 1421 note) is amended by adding at the end the following new subsection:

"(f) SPECIAL RULE FOR SUGARCANE.—For purposes of determining the total quantity of the 1989 crop of sugarcane that the producers on a farm are able to harvest, the Secretary shall make the determination based on the quantity of recoverable sugar.".

(2) DEADLINE.—Section 152(a)(2) of the Disaster Assistance Act of 1989 (7 U.S.C. 1421 note) is amended by adding at the end the following: "In the case of producers described in section 103(f), the Secretary shall permit such producers to apply for assistance no later than January 15, 1991 and shall, in the case of applications received prior to the date of enactment of the Food and Agricultural Resources Act of 1990, recompute in accordance with section 103(f) the amount of any assistance due no later than 90 days after such date of enactment.".

SEC. 222. REPORTS ON QUOTA ALLOCATIONS TO COUNTRIES IMPORTING SUGAR.

Section 902(c) of the Food Security Act of 1985 (7 U.S.C. 1446 note) is amended by inserting "(1)" after "(c)" and inserting the following new paragraph:

"(2)(A) Effective 90 days after the date of enactment of the Food and Agricultural Resources Act of 1990 and by August 1 of each year thereafter through 1995, the Secretary of Agriculture shall report to the President and the Congress the extent, if any, of sugar imports from the country named in paragraph (1) by the countries described in paragraph (1).

"(B) Commencing with the quota year for sugar imports after the 1990–1991 quota year, the President shall report to the Congress by January 1 the identity of the countries that are net importers of sugar derived from sugarcane or sugar beets who have a quota for the current quota year, the identity of such countries who have verified that they do not import for reexport to the United States any sugar produced in the country named in paragraph (1), and the action, if any, taken by the President with respect to countries reported by the Secretary of Agriculture as net importers of sugar derived from sugarcane or sugar beets who imported such sugar from the country

named in paragraph (1) who reexported such sugar to the United States during the previous quota year under a sugar quota allocation.".

Subtitle C—Import Treatment of Sugars, Syrups, and Molasses

SEC. 231. FINDINGS AND PURPOSE.

(a) FINDINGS.—The Congress finds that—

(1) the current administration of import quotas on imports of sugar has been found to be inconsistent with obligations of the United States under the General Agreement on Tariffs and Trade (GATT) by a GATT panel established pursuant to a dispute settlement proceeding instituted against the United States by the Government of Australia;

(2) the United States has accepted the findings of the GATT panel report, and the GATT panel report has been adopted by the GATT Council;

(3) the United States now has an international obligation to bring its regime of import restrictions on sugar into conformity with the GATT rules;

(4) the conversion of the current regime of import quotas to a regime of tariff-rate quotas would comply with our international obligations; and

(5) a GATT-consistent regime of regulating sugar imports should be implemented not later than October 1, 1990.

(b) PURPOSE.—The purpose of this subtitle is to provide for the implementation on October 1, 1990, of tariff-rate quotas on imports of sugar, molasses, and syrups that are consistent with the international obligations of the United States.

SEC. 232. TARIFF TREATMENT WHEN TARIFF-RATE QUOTAS NOT IN EFFECT.

The rates of duty under column 1-general and column 2 of the HTS on sugars, syrups, and molasses that are entered during any period after September 30, 1990, when a tariff-rate quota provided for under section 233 is not in effect are the respective rates of duty that were applicable to sugars, syrups, and molasses entered on January 1, 1990.

SEC. 233. TARIFF-RATE QUOTAS.

(a) IN GENERAL.—

(1) Subject to paragraph (3), the President—

(A) may establish for any quota year beginning after September 30, 1990, a tariff rate quota on sugars, syrups, and molasses; and

(B) shall by proclamation implement each tariff-rate quota established under subparagraph (A).

(2) The President, or a designee of the President, may make such intra-annual adjustments to any tariff-rate quota established under paragraph (1) as may be necessary or appropriate.

(3) LIMITATIONS.—

(A) If the United States Trade Representative determines at any time that the application of a tariff-rate quota under this subtitle to any sugar, syrup, or molasses is inconsistent with the obligations of the United States under any trade agreement, such tariff-rate quota may not be applied to such sugar, syrup, or molasses.

(B) No tariff-rate quota may be implemented under paragraph (1) on or after the effective date specified in section 237(a) until the United States Trade Representative determines whether or not a limitation described in subparagraph (A) applies.

(b) REQUIREMENTS APPLICABLE TO TARIFF-RATE QUOTAS.—A tariff-rate quota established under subsection (a) for any quota year, and any intra-annual adjustment thereto, is subject to the following requirements:

(1) The interests in the United States sugar market of domestic producers, domestic consumers, and materially affected contracting parties to the General Agreement on Tariffs and Trade must be given due consideration.

(2) The United States Trade Representative shall allocate among supplier countries their respective shares of the tariff-rate quota established for the quota year. In making such allocations, the United States Trade Representative shall take into account—

(A) the percentage distributions allocated to supplier countries under Additional U.S. Note 3 to chapter 17 of the HTS for the quota period ending on September 30, 1990;

(B) in the case of supplier countries not included under subparagraph (A), the access of such countries to the United States sugar market during a representative period;

(C) the obligations of the United States under trade agreements; and

(D) any prohibition or limitation imposed under law as a political or economic sanction on the importation into, or export to, the United States of sugars, syrups, or molasses.

The United States Trade Representative may, from time to time, make such adjustments to allocations made under this paragraph as may be necessary.

(3) The rates of duty on sugars, syrups, and molasses that—

(A) are the product of any supplier country; and

(B) are certified upon entry as being included within the allocation made to such country for the quota year pursuant to paragraph (2);

are the respective rates that were applicable to sugars, syrups, and molasses entered on January 1, 1990.

(4) No rate of duty that exceeds 40 cents per kilogram may be imposed on sugars, syrups, or molasses that—

(A) are the product of any supplier country; but

(B) are not certified upon entry as being within the allocation made to such country for such year pursuant to paragraph (2).

(5)(A) The rates of duty referred to in paragraph (3) may be applied to all sugars, syrups, and molasses that are—

(i) entered for use only in the production (other than by distillation) of polyhedric alcohols, except polyhedric alcohols for use as a substitute for sugar in human food consumption; or

(ii) reexported in refined form or in sugar-containing products.

(B) The Secretary of Agriculture, after consultation with the United States Trade Representative, shall impose such licensing requirements, terms, conditions, bonds, or other limitations as may be necessary or appropriate to ensure that—

(i) sugars, syrups, and molasses to which subparagraph (A) is applied are utilized in accordance with the purposes stated in that subparagraph; and

(ii) reexportations are not used for the purpose of obtaining refunds and drawbacks of duties at rates applicable in circumstances described in paragraph (4)(B).

The Secretary of Agriculture shall consult with the Secretary of the Treasury regarding the implementation of clause (ii).

(c) REGULATIONS.—The United States Trade Representative and the Secretary of Agriculture are each authorized to prescribe such regulations as may be necessary or appropriate to carry out, with respect to the implementation of tariff-rate quotas established under this subtitle, the respective functions that each had in implementing the quota program established under Additional U.S. Note 3 to chapter 17 of the HTS for the quota period ending September 30, 1990.

(d) TIMING REQUIREMENTS; NOTICE.—If a tariff-rate quota for any quota year, or any intra-annual adjustment to a tariff-rate quota, is established under subsection (a)—

(1) the tariff—rate quota shall be established, and notice thereof published in the Federal Register, not later than the 15th-day before the date on which the tariff-rate quota is to take effect; and

(2) such adjustment shall be established, and notice thereof published in the Federal Register, not later than the 2nd day before the date on which the adjustment is to take effect.

SEC. 234. APPLICABLE STATUTORY AUTHORITIES.

After September 30, 1990, no quantitative limitation or duty on the entry, or withdrawal from warehouse for consumption, of sugars, syrups, and molasses may be imposed or modified except under the authority of—

(1) this subtitle;

(2) title II or III of the Trade Act of 1974;

(3) title VII of the Tariff Act of 1930;

(4) section 22 of the Agricultural Adjustment Act of 1933, as amended; or

(5) any statute, enacted after the date of the enactment of this Act, that specifically authorizes such an imposition or modification.

SEC. 235. DEFINITIONS.

As used in this subtitle:

(1) The term "entered" means entered, or withdrawn from warehouse for consumption, in the customs territory of the United States.

(2) The term "HTS" means the Harmonized Tariff Schedule of the United States.

(3) The term "sugars, syrups, and molasses" means articles described in subheadings 1701.11, 1701.12, 1701.91.20, 1701.99, 1702.90.30, 1806.10.40, and 2106.90.10 of the HTS.

(4) The term "quota year" means an annual period beginning on October 1 of any year and ending at the close of September 30 of the succeeding year.

SEC. 236. CONFORMING AMENDMENTS TO HTS.

Chapter 17 of the HTS is amended—

(1) by striking out Additional U.S. Notes 2, 3, and 4; and

(2) by redesignating Additional U.S. Note 5 as Additional U.S. Note 2.

SEC. 237. EFFECTIVE DATE; TERMINATION.

(a) EFFECTIVE DATE.—This subtitle, and the amendments made by it, apply to sugars, syrups, and molasses that are entered after September 30, 1990.

(b) TERMINATION.—The authority to establish tariff-rate quotas under the authority of this subtitle expires on September 30, 1996.

AMENDMENT OFFERED BY MR. DOWNEY

Mr. DOWNEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DOWNEY: Strike subtitles A and B of title II and insert the following:

TITLE II—SUGAR

SEC. 201. SUGAR PRICE SUPPORT.

Effective only for the 1991 through 1995 crops of sugar beets and sugarcane, section

201 of the Agriculture Act of 1949 (7 U.S.C. 1446) is amended by—

(1) striking "honey, and milk" in the first sentence and inserting "honey, milk, sugar beets, and sugarcane"; and

(2) amending subsection (h) to read as follows:

"(h)(1) The price of each of the 1991 through 1995 crops of sugar beets and sugarcane, respectively, shall be supported in accordance with this subsection.

"(2) The Secretary shall support the price of domestically grown sugarcane through nonrecourse loans at such level as the Secretary determines appropriate but not less than 16 cents per pound for raw cane sugar, except that such level may be increased under paragraph (4).

"(3) The Secretary shall support the price of domestically grown sugar beets through nonrecourse loans at such level as the Secretary determines is fair and reasonable in relation to the loan level for sugarcane.

"(4)(A) The Secretary may increase the support price for each of the 1991 through 1995 crops of domestically grown sugarcane and sugar beets from the price determined for the preceding crop based on such factors as the Secretary determines appropriate, including changes (during the 2 crop years immediately preceding the crop year for which the determination is made) in the cost of sugar products, the cost of domestic sugar production, and other circumstances that may adversely affect domestic sugar production.

"(B) If the Secretary makes a determination not to increase the support price under subparagraph (A), the Secretary shall submit a report containing the findings, decision, and supporting data for such determination to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Foresty of the Senate.

"(5) The Secretary shall announce the loan rate to be applicable during any fiscal year under this subsection as far in advance of the beginning of that fiscal year as is practicable consistent with the purposes of this subsection.

"(6) Loans under this subsection during any fiscal year shall be made available not earlier than the beginning of such fiscal year and shall mature before the end of such fiscal year.".

Redesignate the succeeding sections accordingly.

Mr. DOWNEY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD, and I further ask unanimous consent that the time on this amendment be limited to 1 hour, to be equally divided between the opponents and the proponents of the amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. DE LA GARZA. Reserving the right to object, Mr. Chairman, just to clarify this, it has just come to my attention that we would have to divide the half-hour, 15 minutes to the minority and 15 minutes to the majority.

Mr. DOWNEY. As would I, Mr. Chairman, if the gentleman will yield.

Mr. DE LA GARZA. And the gentleman from New York will do likewise?

Mr. DOWNEY. Yes, Mr. Chairman, I would respond to the gentleman that I would designate the gentleman from Ohio [Mr. GRADISON] to have 15 minutes as well.

Mr. DE LA GARZA. Mr. Chairman, I thank the gentleman, and I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. HUCKABY. Reserving the right to object, Mr. Chairman, would this also mean then that I would have 15 minutes and the gentleman from Minnesota [Mr. STANGELAND] would have 15 minutes?

Mr. DOWNEY. Mr. Chairman, if the gentleman will yield, that is correct, 15 minutes each.

The CHAIRMAN. The Chair would inquire of the gentleman from New York if this limitation would apply to not only this amendment but all amendments thereto?

Mr. HUCKABY. Mr. Chairman, I know of one amendment, possibly two other amendments, that I will be offering to this title. As to the amount of time it will take on that, I do not know.

I would suggest that we limit the time, if we might, just to the pending amendment.

Mr. DOWNEY. That was my initial request, Mr. Chairman, that the time limitation applies solely to my amendment.

The CHAIRMAN. Just to the Downey amendment?

Mr. DOWNEY. Yes, Mr. Chairman.

Mr. HUCKABY. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

The CHAIRMAN. The gentleman from New York [Mr. DOWNEY] is recognized for 15 minutes.

Mr. DOWNEY. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, this is a simple amendment, but is likely to draw excessive hyperbole on both sides if we are not careful.

What the amendment does is it reduces the loan rate by 2 cents for the sugar program. We do not eliminate the sugar program. My guess is that with this modest reduction we are not going to put anybody out of business. You are going to hear a lot of charges about this one way and the other.

Why are we doing this? I think the sugar program manages to be in one small program bad economic policy, bad agricultural policy, and bad foreign policy. We are not going to correct it all with a 2-cent reduction in the loan rate, but we will have a modest and important balancing effect if we adopt this amendment.

Let us deal first with the economy. It costs consumers, this sugar program, $1.9 billion a year. That is what the U.S. Department of Agriculture says it costs. Those are not my figures.

What the sugar producers have said all along is, "Don't worry about this program. It is a no-cost-to-the-Government program."

Well, Mr. Chairman and my colleagues, if you believe that, you will believe that consumers are not taxpayers. What they have done in the sugar program is eliminate the middle man of the Government. The subsidy goes directly from the grocery store into the pockets of the producers, at a cost of $1.9 billion a year.

Now, our 2-cent reduction will save the consumers $600 million a year. That is why the Consumer Federation of America, Consumers Union, Congress Watch, and every other consumer group so strongly endorses this modest reduction.

So we take this bad economic policy and make it a little bit better. It is bad agricultural policy.

There is no question, and I do not care what you hear in the debate today, that sugar processors are the most pampered farmers in America, and I would add, the most profitable. Since 1981, total support for sugar has increased 19 percent, and other crops have gone up 5 percent.

If you take a look at the loan rate, it is up for sugar 7.5 percent and down from 1981 by 19 percent.

If you look just at 1985, you will see that all other field crops took a hit of 10 percent, save that of sugar. Sugar was left alone.

When you strip out all the costs of production and you compare sugar with other field crops, you will also see how remarkably well it does.

All we are saying with this amendment is restore the balance. The 2-cent reduction comes out to be about a 10-percent reduction in the loan support rate.

It is bad foreign policy. In the early 1980's if you took a look at the amount of sugar that was imported into this country versus that which we produced, you found that there was a balance. We imported about half our sweetener needs and we grew and processed the other half in our own country. That has changed dramatically over the last 8 years. Now we produce ourselves about 85 percent and import about 15 percent.

□ 1210

It has wrought havoc among those countries, our traditional friends and allies, who would like to send us more sugar, the Philippines, the Caribbean nation countries, Australia, to mention a few, and some of the Andean nations.

If you are interested in restoring a balance, if you are interested in seeing the consumer protected by this change, this 2-cent reduction, it will translate into a 2-million short ton import program over the next 5 years, versus what is existing in the agriculture bill of about 1.25 million short tons.

Today I received a letter from the Colombian Ambassador. Let me read some excerpts of what he has to say about the sugar program. He supports the efforts that the gentleman from Ohio [Mr. GRADISON] and I are taking today. He is referring to the existing sugar program. He says,

It runs directly counter to the stated goals of the February 15th Declaration of Cartagena, which include long-term market access actions aimed at permanently strengthening the legitimate economy of Colombia and her Andean nations. The government of Colombia hopes the U.S. Government will move more decisively in the direction of free, fair and unrestricted trade in sugar, and it will remove this unwarranted threat to the Colombian economy.

Our Colombian friends are important to us, important in the effort to end the drug trade, important in the sense that we have promised them that we will allow them to have the opportunity to compete in this area.

If you adopt the Gradison-Downey amendment we give them that chance. If you maintain current law, you will simply be saying to the Colombians, the Filipinos, the Caribbean Basin initiative, we have a farm policy, but when it comes to sugar, it is far more important to reward cane, beet, and high fructose corn syrup processors than it is to allow you to sell us sugar that you produce with market efficiency. That is crazy.

This is a modest step in the right direction. It will reduce the price that consumers pay for sugar. It will be passed on in ways that will materially benefit them. I strongly urge Members to support this amendment.

Mr. HUCKABY. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the gentleman from New York [Mr. DOWNEY] mentioned Colombia. Let me say that every CBI nation, every CBI nation, has written to each Member of Congress supporting the bill of the Committee on Agriculture. Unfortunately, the Committee on Ways and Means stripped from this bill provisions that would have greatly enhanced the CBI nations' economic position.

Mr. Chairman, today the GATT negotiations have resumed in Geneva. Agriculture is the centerpiece of these negotiations. It appears to me that it would not be in the interest of America to significantly reduce, to reduce by 10 percent, the support price of one of the major commodities being discussed at these negotiations. Because let me point out, we support sugar here in the United States at 18 cents a pound, whereas our friends in Europe, the EC, support sugar at 30 cents a pound. 30 cents, compared to 18 cents here.

We have long maintained that if we could just get the European nations to quit dumping their extra sugar, their surplus sugar onto the world market, we would not even need a domestic U.S. sugar program, because the world price of sugar would certainly rise higher than what our support price is.

The gentleman from New York [Mr. DOWNEY] talked about the equity of sugar compared with other crops. Let us go back and look at what has happened in the decade of the 1980's.

In 1981 we passed a farm bill that once again included sugar. Let us look at what the percentage change of sugar in price has been in the last 10 years.

It starts at zero here. It rose to 7 percent and has been constant. If we look at all other commodities in the farm bill, starting at zero in 1981, they rose to almost 17 percent during the period of high inflation, significantly higher than what sugar did.

Then in the 1985 farm bill we reduced those commodities, but still to a level of higher support than sugar. So looking at the aggregate of the decade, we have only increased sugar from 16 cents to 18 cents since 1981. Mr. Chairman, we freeze the price of sugar for the next 5 years at 18 cents.

What about the retail price increases? What has happened between 1980 and 1989?

The proponents talk about what the consumers are going to get. The price of sugar increased 6 percent. But look at the price of soft drinks, 25 percent; candy, 45 percent; cereal, a whopping 93 percent increase. All of these products that are heavily sugar dependent significantly increased their prices during the 1980's, but not the price of sugar.

Let us look at the world price of sugar. What do we pay here in the United States compared to the other major cities in the world? Tokyo, significantly higher than us, as well as Stockholm, Paris, Rome, London. Here you can see the United States average price for sugar is 44 cents, lower than most cities in the world.

Mr. Chairman, I would like to point out that if you reduce the price of sugar, the consumer is going to see virtually no impact, because three-fourths of all sugar consumed in the United States is in manufactured products such as soft drinks, ice cream, and candy. Two cents worth of sweetener are in that soft drink, a little over a penny in that candy bar. You could give them the sweetener and you would not see any price decrease as far as the consumer is concerned.

Finally, I would like to point out to Members, what happened during the period of time when there was not a sugar program? We have had two periods of time back in the 1970's when the Congress did not reauthorize the sugar program. The price of sugar went from 6 to 65 cents virtually overnight. All of those retail items from soft drinks to candy bars, everything skyrocketed up.

But then when the price of sugar fell, the consumer items did not fall. We have seen that occur twice, and it would almost certainly occur again.

Mr. Chairman, in conclusion let me just say that the sugar program is a consumer program. It provides stable supplies of sugar, at a solid, reasonable, predictable price. It provides an opportunity for literally hundreds of thousands of jobs throughout 35 States in America. We maintain that if we could just have a level international playing field, it would not even be necessary to have a sugar program. But let us not significantly reduce the price of sugar before the GATT agreements are reached.

Mr. Chairman, I would urge Members to support the committee position.

Mr. GRADISON. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of the amendment offering by my friend and distinguished colleague from New York [Mr. DOWNEY].

Over the last decade dramatic changes have occurred in the domestic sweetener industry. Perhaps the most dramatic has been the emergence of corn sweeteners which now account for approximately 53 percent of the domestic sweetener market. For most of the past 60 years, the United States has intervened in the domestic sweetener market—primarily to protect the domestic sugar industry from the vagaries of the market, but also to attempt to stabilize domestic prices.

In the 1980's, under the stress created by the dynamism of the broader sweetener market, U.S. sugar policy has created numerous problems that have buffeted consumers, squeezed traditional foreign suppliers out of the American market, complicated our position in international trade, and skewed resources within the agricultural sector of the economy. Amidst this change, the House will have an opportunity to decide between two starkly contrasting visions on the future course of U.S. sugar policy.

The proposal recommended to the House by the Committee on Agriculture continues the relatively high level of support afforded to domestic sugar producers and constructs around it an elaborate system of "standby" domestic production and marketing controls that will take an army of USDA offi-

cials to administer. It leads, almost assuredly, to direct Federal control of the domestic sugar market at a cost to the taxpayer, according to USDA, of $200 million.

The alternative which we offer today, and which has the full support of the administration, would continue the present no net cost program, but at a lower level of support. This modest reform of the sugar program addresses the problems and dislocations caused by our present policy without resorting to supply management and without threatening the economic viability of the domestic sugar industry. It is a reasonable alternative to the committee bill.

There is amble evidence that the domestic price floor set by the Federal Government in this decade has been too high. Under the present level of support, that is the market stabilization price, which has increased 19 percent since 1981, the market has been skewed. In spite of an approximate 15 percent decline in the domestic consumption of sugar between 1981 and 1988, domestic cane and beet production increased 23 percent over the same period. This unprecedented increase in domestic production, which bore no relationship to market demand, directly threatened traditional foreign suppliers to the American market.

During the brief relatively open market period of the late 1970's the annual average level of sugar imports was 4.4 million short tons. With the reimposition of import quotas in order to maintain the integrity of the price support program, imports fell rapidly. As late as 1984, imports totalled roughly 3 million short tons. The following year, imports fell to 2 million short tons. In 1988, imports were originally limited to 758,000 short tons—a nearly 75 percent reduction over a 5-year period.

Drought conditions in the United States over the last 2 years have slightly eased these trends. The 1990 annualized import quota is currently 1.6 million short tons, just a mere 350,000 short tons above the trigger in the committee bill for domestic supply management. Given domestic consumption and production trends, absent further drought conditions or changes in the level of Federal price support, the recent improvement in foreign access to the U.S. market will be an aberration. The overall trend of escalating domestic production under a relatively high government guaranteed price, declining consumption, and a contraction in market access to foreign suppliers have created significant market distortions as well as creating problems for the United States in the GATT.

Although the case for reform of the sugar program is compelling, the Agriculture Committee has chosen to send to the floor a sugar program that walks backward in time. Marketing and production controls can exaggerate the distortions the present program has caused. The key to the sugar program is the domestic support price and the key to the support price is the loan rate. Until the loan rate is addressed and adjusted to reflect market realities and the reductions in support already taken in this decade by other major commodity producers these distortions will continue.

We will hear a great deal on the floor today, Mr. Chairman, about how reform of the sugar program represents "unilateral disarmament" in the international trade negotiations now underway in Geneva. We will also hear complaints about the trade distorting practices of the European Community. I agree that the sugar policies of the EC are one of the chief factors distorting the world sugar market. I agree that European sugar producers do not compete directly against the Europeans. U.S. sugar producers do not export into the world market and no EC country holds a quota in the U.S. market. This amendment changes nothing as far as our relationship to European competition is concerned.

As for the trade negotiations, my own view is that reform of the domestic sugar program strengthens, rather than detracts from, the position of the United States in the GATT. Recently, Ambassador Carla Hills wrote to Senator BRADLEY of New Jersey to express the administration's view that a 2-cent cut in the loan rate would not conflict with our negotiating position. I include Ambassador Hill's letter for the RECORD:

U.S. TRADE REPRESENTATIVE,
Washington, DC, July 18, 1990.

Hon. BILL BRADLEY,
U.S. Senate,
Washington, DC.

DEAR SENATOR BRADLEY: I understand that some have suggested that a 2-cent reduction in the domestic support price for sugar should be opposed because it would reduce our leverage in the Uruguay Round agriculture negotiations. The Administration supports a reduction in the sugar level and would not take this position if we felt our negotiating position would be weakened by it.

Our objective in the negotiations is to achieve comprehensive and substantial reform of the international rules on agricultural trade. We have proposed that all countries make commitments to reduce protection, subsidies and market access barriers affecting all commodities.

Our position with respect to the sugar provision of the farm bill is that substantial reform should not be undertaken. However, the Administration supports an immediate 2-cent reduction in the sugar price support level in order to modify the level of government support provided to sugar and make it more consistent with that provided to other commodities in the Food Security Act of 1985. We do not feel that this modification would conflict with our position opposing substantial reform.

Sincerely,

CARLA A. HILLS.

Mr. Chairman, we can debate the effects on the GATT negotiations all day, but I suspect that Mr. DOWNEY and I are unlikely to come to an agreement with our colleagues on the other side of this issue. We, therefore, must look at the bill before us and ask what is in the best interest of American agriculture over the next 5 years. We do not know, at this juncture, whether the Uruguay round will be successfully concluded. The House must consider the 5 year bill before it as it would any other farm bill—as a blueprint for American agriculture for the next 5 years.

Under this criterion, I believe a majority of my colleagues will come to the conclusion that adoption of this amendment is preferable to the program recommended under the committee bill. As I indicated earlier in my remarks, a continuation of the present relatively high level of support will continue to stimulate overproduction. Imports would fall. Domestic supply management would be triggered, perhaps as early as the 1992-1993 crop year. For that, the taxpayer would be asked to come up with 200 million scarce dollars, the consumer would continue to pay, and there is no guarantee the program would work.

There is an alternative. By making a modest and reasonable adjustment in the present program, the House can put the sugar program on a course that provides adequate support for sugar producers without the dislocations that have occurred over the last 5 years and without direct Federal management of the sugar market. I urge my colleague to support the amendment.

□ 1220

Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. The gentleman from Ohio [Mr. GRADISON] has consumed 9 minutes.

Mr. STANGELAND. Mr. Chairman, I yield myself 3 minutes.

Mr. Chairman, first of all I think we have to set some things straight on the Downey-Gradison amendment. The gentleman from New York [Mr. DOWNEY] and the gentleman from Ohio [Mr. GRADISON] would have Members believe that if we reduce the price to the sugar producrs from 18 cents to 16 cents that there is going to be a resultant decrease in the cost to consumers. That is the wildest speculation that has no bearing in historical fact.

At any time in our history when the price of sugar has gone up the price of a sugar-bearing product has gone up as well, sometimes far in excess of what the price of the sugar went up.

When the price of sugar in our history has come down, the price of the sugar-bearing product has never come down. To say that this 2 cents can be passed on in some way to the ultimate consumer, the American housewife, is the wildest speculation. All it will do is put more money in the hands of the manufacturer who is using sugar, who already is at a high profit level.

There are those who say that we in the past 5 years have reduced target prices to other commodities; therefore, we ought to reduce the price to sugar producers.

□ 1230

On the face of it, that sounds fair. But for 5 years the sugar program has been at no taxpayer cost, while the other commodities, wheat, feedgrains, were receiving taxpayer subsidies.

Many of us did not like to see those reductions and would not want to have them happen. However, we were faced with budget constraints and still are. Therefore, those prices went down.

In this farm bill, we are now freezing those prices. But to say that because they went down we now have to take it out of the sugar beet growers and the sugarcane farmers is sheer folly.

As my colleague from Louisiana states, let me say to you that we are in the present time negotiating in the Uruguayan round of GATT to reduce farm subsidies internationally. And for our trade ambassador or Mr. GRADISON or anyone else to say that if we reduce it it is going to make the Europeans consider a reduction, again is sheer folly. We need to reduce the subsidies at the GATT in Geneva, not here on the floor.

If we give up any portion of our farm program to the betterment and advantage of the European Community, let me tell you what they will give you back: They will give you back exactly zero.

These negotiations have to be conducted in Geneva. That is where any reduction ought to take place. It had not ought to be done here unilaterally.

This President said in his campaign that he would not unilaterally reduce the sugar support, that it would have to be done in Geneva. Yet this administration now says they would support a 2-cent reduction.

I urge my colleagues to vote "no" on Downey-Gradison and pass the committee legislation.

The CHAIRMAN. The gentleman from Minnesota [Mr. STANGELAND] has consumed 3½ minutes.

The gentleman from New York [Mr. DOWNEY] has 8 minutes remaining, and the gentleman from Louisiana [Mr. HUCKABY] has 9 minutes remaining.

Mr. HUCKABY. Mr. Chairman, I yield 1 minute to the gentleman from North Dakota [Mr. DORGAN].

Mr. DORGAN of North Dakota. Mr. Chairman, those here who want to take apart the sugar program want our price for sugar to float on the international sea of surplus and shortage, When there is a surplus prices would be low, and when there is a shortage the consumer would pay through the nose.

That makes no sense to me. The sugar program is a program that works, provides stable prices for consumers and provides stable income for producers.

It is a curious thing about this body: Every time it seems to find a program that works, we are so unaccustomed to finding it, we want to figure out a way to take it apart.

Why not instead of taking apart the programs that work, find those programs that do not work and make them work?

The sugar program is a good program, it is good for the producers and it is good for the consumers, and does not cost the Federal Government any money.

We ought to turn back this amendment and turn it back soundly. What we ought to do is apply the ideas from the program that works to wheat, feed grains, and other areas and make those programs work as well, and not take apart this program that is good for everybody in this country.

Mr. DOWNEY. Mr. Chairman, I yield 2½ minutes to the gentleman from California [Mr. BATES].

Mr. BATES. Mr. Chairman, I rise in support of the amendment offered by the gentlemen from New York and Ohio.

By restricting sugar imports and propping up American sugar prices, our Government forces consumers to pay more than the fair market price for sugar. Higher sugar prices mean that corn syrup producers can raise their prices as well and still compete effectively in the sugar market. Every 1-cent increase in sugar prices is quickly followed by a price increase of up to 1 cent in corn syrup and other sugar substitute prices. According to both the Commerce Department and the Agriculture Department, the U.S. sugar program has cost consumers roughly $3 billion annually over the past few years.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield briefly?

Mr. BATES. I yield to the chairman of the committee, the gentleman from Texas [Mr. DE LA GARZA].

Mr. DE LA GARZA. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, there seems to be an erroneous perception as to this cost. I have information which shows that the ones who made this study that shows $2.3 or $3 billion used the dump price of sugar, did not take into consideration that cuts have come to the consumer and, therefore, this is a figure that is faulty because of the criteria used to arrive at it. I would hope that the gentleman would accept that and continue with his proposal in a way which would be factual and not using a figure that cannot be verified.

Mr. BATES. I thank the chairman.

It is probably higher than that; it was probably added by the same people that gave us the deficit figures.

Mr. Chairman, this would not upset me nearly so much if the money was going to support America's struggling, small family farms. Instead, they help boost profits for the 7 largest U.S. sugarcane growers who produce roughly 14 percent of the sweeteners used in the United States. In fact, $133 million goes to just one farming operation in Florida.

Mr. Speaker, we are not being asked to do something reckless by supporting the Downey-Gradison amendment. It is rather moderate. In 1985, Congress passed a farm bill which cut nearly all major commodity programs. At that time, sugar was exempted.

According to USDA estimates, the 2-cent decrease called for in the Downey-Gradison amendment would reduce sugar and sweetener costs by over one-half a billion dollars annually. I urge support for this amendment and I thank the gentleman for yielding.

Mr. STANGELAND. Mr. Chairman, I yield such time as he may consume to the gentleman from Wyoming [Mr. THOMAS].

Mr. THOMAS of Wyoming. Mr. Chairman, I rise in strong support of the committee proposal.

Mr. STANGELAND. Mr. Chairman, I yield 2 minutes to the gentleman from Montana [Mr. MARLENEE], a member of the committee.

Mr. MARLENEE. Mr. Chairman, I rise to oppose the amendment. This amendment will cost the jobs of migrant workers who hoe and thin the sugar beet crop in my district. It will cost the jobs of those migrant workers who work the canefields. But why worry. Let them eat cake.

Let them eat cake and cookies. And let them wash it down with soda pop. And in order to do this, we in this Congress will wreck the sugar industry in California, in Florida, in Idaho, in Louisiana, in Montana. Thousands of American jobs will be destroyed.

But have a cookie.

But will that cookie be cheaper? Mr. Chairman, no, it will not.

The Mars Bars family is reported to have $1.5 billion in assets. This Congress wants to cut sugar prices so the Mars Bars family can make another one-half of 1 cent per candy bar profit. Meanwhile, thousands of American jobs are lost.

Have another candy bar. But it won't be any cheaper.

Mr. Chairman, have you ever seen the price of a candy bar go down? Have you ever seen the price of cookies come down? Of course not.

If you gave the large conglomerate sugar users all the sugar they use, the price of their products would not go down.

Mr. Chairman, this bag of cookies is made with sugar. It costs $3.32 per pound. This bag of cookies is made with no sugar. It costs $4.46 per pound.

All this demagoguery, all this chicanery, about the poor consumer.

Let's expose some consumer truths.

Let's go shopping.

Here's a bag of kitty litter. It costs 49.75 cents per pound.

Here's a bag of American produced sugar. It costs 37.25 cents per pound.

Here is a candy bar where no sugar was used. Cost: $10.82 per pound.

Here is a candy bar where sugar was used. Cost: $3.58 per pound.

And finally, Mr. Chairman, here is a case where we can compare sugar to a product you can buy at your local grocery store. And Mr. Chairman, you can burn up this product.

Here is a bag of charcoal brickets. The cost of this product is 57 cents per pound. And remember, Mr. Chairman, the cost of this bag of sugar is only 37.25 cents per pound.

Sugar is cheap—cheaper—than those products the consumer is willing to burn up or litter on.

This amendment should burn up consumers. They will never see any savings from this amendment. But let them eat cake.

I urge my colleagues to defeat this amendment.

Mr. GRADISON. Mr. Chairman, I yield 2 minutes to the gentleman from Massachusetts [Mr. CONTE].

□ 1240

Mr. CONTE. Mr. Chairman, my friends TOM DOWNEY and BILL GRADISON have worked long and hard to produce this important reform. They have done a great job and they deserve our support. Believe me, your constituents back home will be grateful for this vote.

The sugar program today guarantees two things: First, a price support at 18 cents a pound, and second, a badly misnamed no cost provision, which uses import quotas to make sure the price of sugar never goes below this 18-cent floor. Well, it sounds good. But, Mr. Speaker, there's no such thing as a free dessert, and there's no such thing as a no-cost subsidy.

Last week, sugar was selling at 12 cents a pound on the international market. But here in the United States, we were paying 23 cents a pound—almost twice the fair market price. Who makes up the difference? Everybody who buys food. This program inflicts a hidden tax—a tax on food, the most regressive tax there is.

The sugar tax smacks the poor harder than anyone else.

Nobody else gets a deal like this. It is antitrade, anitcompetitive, anticonsumer and antifree market.

Imagine what would happen if other industries worked the way the sugar industry does, with sellers guaranteed a price and lower-cost goods locked out of the market? Competition would vanish and quality would suffer. Consumers would scream bloody murder, and they'd be right.

But Mr. Chairman, we do not have to worry about that, because no other industry would have the gall to ask for a sweet deal like this one.

The sugar program is regressive. It is an embarrassment to our foreign policy and our trade negotiators in the GATT. By locking out sugar from Bolivia and Peru, it undermines our efforts to implement crop substitution in cocaine-producing areas. It hurts consumers, and hurts the poorest consumers the most. It is a bad deal for the country.

But this amendment is a great idea. By cutting just 2 cents off the price floor, we will recover about $500 million for America's consumers. Two cents is good sense. Support the Downey-Gradison amendment.

Mr. HUCKABY. Mr. Chairman, I yield 4 minutes to the gentleman from Michigan [Mr. TRAXLER].

Mr. TRAXLER. Mr. Chairman, I would like to extend my appreciation to the committee and to the subcommittee chairman for presenting what I consider to be a fine agricultural bill.

I rise in opposition to the Downey-Gradison amendment, of course. Let me say, this amendment has my undying opposition. I cannot think of a matter that would come to this floor which is of keener interest in the sugar provision than were in this bill, an amendment which I view as doing more harm to the constituency I represent than this one.

If I may speak to Members in a personal vein, my father used to say that the Sugar Act and that sugar beet that I love so much, and if Members have not seen it growing or harvested, I invite Members to my district, that sugar paid off the mortgage on the farm. I have a little scar on my left knee from a beet knife when I was a kid sitting around a pile, chopping those tops. So I come to this rather emotionally and, frankly, with some knowledge of this subject.

Let me assure Members, contrary to what has been said here, sugar program benefits the farmers of my district. Hundreds and hundreds of family farms, mom-and-pop operations, and they are able to make their payments on their mortgages, they are able to buy the products that are made in your district, because of sugar. Because of sugar. It is not some conglomerate that is producing this. It is decent, farming families in my district that are the backbone of this Nation.

For the life of me, to suggest that the sugar policy is wrong because it harms the consumer when, in fact, there is one Member that can honestly say that if this amendment is adopted, that the consumer will benefit, and that the savings will be passed on the consumer. That is simply not true. As a matter of fact, tell me any savings in the last 10 years in any product that have been passed on to the consumer. Members have to be terribly naive, a fool, or a knave to believe that.

First off, the amount of sugar that is in these products is minimal. We are talking less than pennies. Do you know where those pennies are going to go? For heaven's sake, do Members read the Wall Street Journal? It is bottom line. That is why the commercial users are all lined up in opposition to the provisions of the bill and in support of the amendment. It will put money in their pocket. That is what this is all about.

If any Member thinks the consumer will benefit from this, well, they deserve what will happen to him, and I have some stock in a bridge in Brooklyn that I will sell to anyone reasonably, and I think they will want to buy it, if a person believes this amendment.

I tell Members, the sugar program is as American as apple pie and ice cream. It does not hurt the consumer, and it does not hurt this Nation. It beneifts the family farmer. It provides a stable price for the American consumer. It does not cost $100 million. That is the Department of Agriculture's number. These people are opposed to this program. The CBO says it is not costing Treasury one nickel, and indeed we make money off the program through some administration charges.

I would urge Members, urge Members to vote no on this amendment. The current program as I said is beneficial for this Nation and to the consumer. In the world of sugar, and this is very important to understand this, most sugar is contracted for a fixed price. Sugar is a highly regulated commodity. The Europeans are not going to stop subsidizing sugar any more than the Japanese are going to stop growing rice. I hope Members vote "no" on Downey-Gradison.

Mr. Chairman, I rise in most strenuous opposition to the Downey-Gradison amendment to H.R. 3950, the Food and Agricultural Resources Act of 1990. The Downey-Gradison amendment proposes to reduce the sugar price support loan rate in an unacceptable fashion.

Mr. Chairman, we are told that this program benefits only a limited number of growers—

family farmers. Nothing could be further from the truth. Over 17,000 jobs in Michigan alone rely on a strong U.S. sweetener industry, and that number expands exponentially around the country. The people who work in the processing plants, the equipment dealers, the seed and fertilizer dealers, the small town merchant that sells to the growers and their families as well as the people who work in the processing plants and their families all depend upon this program. The activities of the sugar and corn sweetener industry in Michigan is over one-half billion dollars annually.

This amendment is unnecessary, not in the best interest of consumers, detrimental to our international trade position, and risks our ability to have an adequate supply of domestically-produced sugar.

First, the amendment is unnecessary because nothing is gained by cutting the price support level. The sugar program costs the Federal Government nothing. In fact, it has, according to CBO, actually produced revenue for the Federal Government. All of this has happened because the sugar price support program has been a stable one, and the Food and Agricultural Resources Act of 1990 maintains that stability.

Second, the amendment is not in the best interest of consumers because it intrudes on a key element of food shopping: being able to depend on food costs. While other food prices have gyrated over the past 10 years, the price of sugar has remained stable. Some will suggest to you that if the price of sugar goes down, the price of sugar containing products will also come down. Don't believe it. The relative amount of sugar in most sugar containing products is so small that if the sugar price came down, you wouldn't even save one cent on these processed foods. The only one who will benefit from the price cut will be the food processor, not the consumer.

Third, the amendment is not in our best interest for trade policy. The Caribbean Basin nations that produce sugar have endorsed the sugar program in the farm bill. If we cut our sugar price level, we will cut those nation's income. And with the rest of the sugar-producing world unwilling to change their programs, why should we make our producers the sacrificial lambs of international trade?

Finally, the amendment does indeed risk our domestic sugar supply. The only commodities for which we depend on foreign suppliers are those items for which the United States is not climactically suited. Such as coffee. If we drop our sugar price support level, we risk putting our producers out of business. The support level in the bill is 18 cents per pound. The current program is beneficial to the Nation, consumers, and the farmer.

According to USDA, average production costs are in excess of 19 cents per pound. Our support level is already below production costs. If we drive it down even more, we will see farmers—many of whom are our constituents—go out of business. If they go, so will the proceeding plants. Without those plants, no matter how efficient a grower may be, no sugar will be proceed.

Mr. Chairman, their are Members in this body that plead for us to understand the needs of their communities, and who will come to us to make their case each time. We work to try to understand their needs. Now it is the time for them to understand the needs of farmers and rural America. Do not believe that because you may not nave farmers in your district that you do not have a stake in this amendment. Anyone who has consumers who want to have the continued availability of a wholesome food supply and the world's most reasonable prices has every reason to support a strong American agriculture.

I urge you to vote no on the Downey-Gradison amendment.

Mr. STANGELAND. Mr. Chairman, I yield 2 minutes to the gentleman from Florida [Mr. LEWIS].

Mr. LEWIS of Florida. Mr. Chairman, today we have heard several unique arguments on why we should reduce farm spending and how we can improve American agriculture production. I am sure that the arguments will become even more creative as we move through these debates.

However, I am deeply concerned and offended regarding the newest arguments that have been leveled at the sugar program.

Opponents of the U.S. sugar program have begun to play on the emotions of the American public. We are no longer operating on facts and reality. The opponents have perpetuated a misinformation campaign in an attempt to change national policy.

The Food Security Act of 1985 established a market oriented sugar program. Unfortunately, the world sugar market is not an equally competitive market. The majority of sugar producing countries directly subsidize their sugar production.

For example, the European Community subsidizes their production to the tune of 30 cents a pound. If we were to make concessions in the American sugar program without similar changes made by our trading partners, we would literally devastate U.S. production.

This is not fair competitive trade. The only agriculture industry that approached the Reagan administration when they were trying to eliminate farm programs was the sugar industry.

They told President Reagan they could "compete on an internationally level playing field. We may lose some producers and some of the market, but we need an even playing field in order to compete."

Mr. Speaker, a decrease of 2 cents would only tilt the playing field more in favor of the European Community—I know of no American industry that can compete with those kind of odds.

The major opponents of the sugar program have stooped to an extremely low level of misinformation in order to garner support for a 2-cent reduction in the current 18-cent support price.

They are charging that this program is costing American consumers from $1.9 billion to $3 billion per year; this program is encouraging the production of illicit narcotics in Central and South American countries; and the program will cost American industry jobs because of the cost of sugar. These are all groundless allegations.

A 2-cent reduction in the support price of sugar would mean an immediate windfall of over $500 million to the American sweetener industry.

I cannot fathom how the sweeteners users are going to pass on a savings of fifteen one-hundredths of a cent to the consumer. That is how much the consumer will save on a candy bar if this legislation passes—fifteen one-hundredths of a cent.

How can we expect them to reduce the cost of sugar containing products when in the early 1980s the price of sugar went from 42 cents per pound to roughly 20 cents per pound and the cost of sugar-containing products did not decrease—what happened to passing the savings onto the consumer?

I contend the decrease experienced in the early 1980's and the decrease that will be experienced if the Downey/Gradison proposal passes will only be passed on to the sweetener user industries.

The $2-$3 billion cost to the consumer is also a highly inflated figure. These estimates are based on the U.S. price compared to the "world dump price" which is relatively meaningless. This market represents about 15 percent of the world sugar production.

The billion-dollar myth is based on a low point in the world price of roughly 3 cents per pound. I think that figure is irrelevant given the world price for the first half of 1990 was 14.53 cents per pound.

As a member of the Select Committee on Narcotics Abuse and Control, I am deeply discouraged by the correlation that the sweetener users and the opponents of the sugar program are making between drug production and the U.S. sugar program.

Sugarcane, a tropical grass, grows in large units in the lower elevation areas of Central and South America, while coca is grown in the mountainous areas in small plots tended by peasants.

In Peru, coca growers can earn $9,000 per year as opposed to the $200 per year they can earn growing a legal crop such as sugar. This, my colleagues, is simple economics—no Peruvian grower is going to turn down the opportunity to make $9,000 a year.

I am offended and disappointed to see the sweetener industries attempt to garner support for policy change using the drug plague as a shield for economic gain.

In closing, I would like to give just a few examples of what the Florida sugarcane producers have contributed to the communities that surround the production in Florida.

They have established higher education scholarships and financial assistance to local students; sponsored an endowed chair at Florida Atlantic University for Community Education, valued at $400,000; they sponsor two $100,000 scholarship funds dedicated to educational incentives; over one-half million dollars have been spent supporting community education in the area; the sugar industry has provided funding for two libraries, an auditorium facility and provided over $50,000 to expand and improve the Doyle Connor Center. These are but a few of the numerous contributions the Florida industry makes to their community.

I urge my colleagues to support the committee-passed version of the sugar title. Passing any amendments that would drastically alter the proposed legislation would begin to dismantle the American farm programs and the communities around the production areas across the country.

Unilateral concessions would sacrifice any advantages we may have at the negotiating table of the General Agreement on Tariffs and Trade.

Mr. DOWNEY. Mr. Chairman, I yield 1½ minutes to the gentleman from Pennsylvania [Mr. YATRON].

Mr. YATRON. Mr. Chairman, I rise in support of the amendment offered by Congressman DOWNEY and Congressman GRADISON. The modest and reasonable 2-cent reduction in the price support level that the amendment specifies is a sound way to put fairness back into U.S. sugar policy.

The current sugar program has had a negative impact on the food and beverage industries in the country, as well as in my own State of Pennsylvania.

Pennsylvania workers produce almost one-quarter of the Nation's total chocolates and candy, and almost 10 percent of the breads, cakes, cookies, and crackers produced domestically.

The current U.S. sugar program hurts U.S. workers and the competitiveness of the food and beverage industries in two ways.

First, the high U.S. price for sugar and sweeteners puts sugar-containing products at a disadvantage as they compete with other types of products in the market.

Second, many imported products are made from less expensive sugar. This lowers the cost of production of the food, and gives a foreign competitor a competitive advantage in setting wholesale price.

The amendment does not make the sugar program ineffective. It leaves the program virtually intact, but with a more reasonable price level.

Consumers and users do not argue with the need to provide a safety net for domestic sugar producers. But consumers do not want to support a program that hurts those in the food and beverage industry.

I urge my colleagues who want to restore some balance and fairness to the sugar program to vote in favor of the Downey/Gradison amendment.

□ 1250

Mr. STANGELAND. Mr. Chairman, I yield 2 minutes to the gentleman from Louisiana [Mr. HOLLOWAY], a member of the committee.

Mr. HOLLOWAY. Mr. Chairman, from listening to a little bit of the earlier debate, it sounds like if we were going to the arms control negotiations, we would disarm before we go. From listening to some of the earlier speakers, it sounds like we should disarm the sugar program and then go and negotiate a good program through GATT.

That will not work. We have to keep a strong program in this country. We have to keep this country strong. We have to quit giving in to the world and then thinking that 10 years from now they will come around and see our side of it.

The CBI supports this bill. I suppose many people, from listening to the debate, would think, well, the CBI must be strongly opposed to us not allowing sugar into our country. Every CBI representative strongly endorses the committee's bill. They feel they need these support prices and they need the process to continue.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. HOLLOWAY. I yield to the chairman of the committee.

Mr. DE LA GARZA. Mr. Chairman, I have information here that if this amendment is adopted, CBI countries will lose $85 million right away. That is what they would lose.

Mr. HOLLOWAY. Mr. Chairman, I think we have to have the support of these neighbors of ours. We have helped them with their trade items, including sugar.

We have many thousands of Jamaicans working in Florida in the sugar industry, making $5 an hour, whereas in their own country they would be making $3 to $5 a day. They are sending money back to their country to help themselves. We do not have the workers here to do it, so we get them from the Caribbean. This bill is very important to our Caribbean neighbors. They would all say that we should vote no on this amendment.

Mr. Chairman, I would ask any Member who is interested in our Caribbean neighbors to vote no on this amendment.

Mr. HUCKABY. Mr. Chairman, I yield 1 minute to the gentleman from South Dakota [Mr. JOHNSON].

Mr. JOHNSON of South Dakota. Mr. Chairman, I rise in opposition to the amendment and in support of the committee bill.

Mr. Speaker, there are no sugar beets grown in my State; there is no sugar cane grown in my State. But this is an important piece of legislation, and it is important that we not undermine it.

The sugar program is responsible for roughly a 25-cent-per-bushel increase or enhancement of the corn price. In any district of this country where corn is produced, the sugar program is a critical program.

Is the sugar program cost-neutral to the taxpayer? Yes, but it is better than that, because the sugar program is responsible for saving over $400 million to $500 million in the cost of the overall farm program because of the corn that goes off in the production of fructose and sugar. So it is not only cost-neutral but cost-beneficial to the taxpayer that we maintain this vital program.

I have enormous respect for my urban colleagues who have been pursuing this legislation, but let me say that despite the fact that I come from a very rural State, I have been very supportive of doing the kinds of things that are necessary to support a decent income for working people in urban areas.

Mr. Chairman, all we ask is equal treatment for those of us in rural America.

Mr. STANGELAND. Mr. Chairman, I yield 2 minutes to the gentleman from Michigan [Mr. SCHUETTE], a member of the committee.

Mr. SCHUETTE. Mr. Chairman, I thank the gentleman from Minnesota [Mr. STANGELAND] for yielding time to me.

As a member of the Agriculture Committee and representing the State of Michigan and a large sugar production, I rise in opposition to the Downey-Gradison amendment which would reduce the sugar support price by 2 cents.

Since 1981, the U.S. sugar program has maintained a secure domestic supply of sugar for the American consumer, and this program also enables more than 1 million American farmers and workers who produce and process sugar and corn for sweeteners to maintain a viable U.S. industry in spite of unfair and unlevel competition from abroad.

The price reduction proposed today would jeopardize the continued existence of a strong and important industry.

Many of the facts and arguments we have heard in opposition are frankly wrong and misleading. Any reduction in the price of sugar would not bring in compliance with prices of other domestically grown crops, and most importantly of all, it would put us at a serious disadvantage with foreign competitors.

Across the world, we see government activities in other countries. We see 30 cents in Europe above our 18-cent level, and if we reduce this price unilaterally, we are embarking on a course which will bring a slow death to the American sugar industry.

When we negotiate with the Soviet Union, we do it from strength and never from weakness. The same methodology and the same negotiating posture must be taken with respect to the American sugar program, to see that we do not disarm the American farmer in the wake of heavy excessive subsidization from our foreign competitors. If we adopt this position, our negotiating position in GATT will be severely limited, greatly weakened, and at the expense of the American farmer. This is a farm bill for farmers, not for the Europeans.

Mr. Chairman, if it is the American farmer versus the French farmer, we will win, but if it is the American farmer versus Europe, Incorporated, that is not fair.

Mr. GRADISON. Mr. Chairman, I yield myself 2 minutes.

Mr. Chairman, I have tried to listen carefully to the opponents of the Downey-Gradison amendment. What I have heard would suggest that we are talking about abandoning the sugar program.

We are not talking about abandoning the sugar program at all. We are talking about fine-tuning the program to reduce the nonrecourse loan rate from 18 cents to 16 cents and, as a practical matter, to reduce the market stabilization price from 22 cents to 20 cents. We are not turning our backs on the sugar producers, but we are trying to do something with our amendment which has not been mentioned by our opponents at all in the debate today, and that is to do something about overproduction.

We have heard a lot about stability. There is no stability in the sugar program. That is part of the problem. Production is going up, consumption is going down, and we have strong evidence that to maintain the 18-cent loan rate is going to make the problem worse, not make the problem better.

One other thing we have not heard about is domestic jobs in industry which use sugar as a raw material. What is really happening, of course, is that our imports from other countries of products that contain sugar are just increasing explosively. A recent analysis of 58 imported food items with an average sugar content of 40 percent shows that in the 1980's imports of confectionaries and chewing gum and bakery and cereal products doubled, miscellaneous food preparations and flavored sugars, syrups, and molasses almost tripled, and another 36 categories of processed and preserved fruit and other products rose tenfold.

Let us be candid about this. We have a free trade agreement with Canada. These products which use sugar can come in from Canada once that is phased in without any restriction on our side of the border. All we are going to do if we decide to continue the program at this present level is export manufacturing jobs, probably whole candy manufacturing companies and others, just across the borders where, by buying sugar at a lower price, they can send these products into the United States.

Mr. Chairman, jobs are at stake in this bill.

Mr. HUCKABY. Mr. Chairman, I yield 1 minute to the gentleman from Idaho [Mr. STALLINGS].

Mr. STALLINGS. Mr. Chairman, I rise in strong opposition to this amendment.

With all due respect to the Members who have been speaking on the other side, this amendment will do two things, and it will do them very dramatically: First of all, it will see a massive transfer of wealth from farmers to businesses. Second, it will eliminate a larger number of farmers. When we reduce the loan rate from 18 cents to 16 cents, a number of farmers in my district will go into other commodities.

Now, in Idaho we have 180,000 acres in sugar beets. That land will not sit idle when we reduce the loan rate to 16 cents. It will go into other commodities.

□ 1300

Mr. Chairman, a University of Idaho study identified the impact on a variety of commodities, on potatoes, on beans, on virtually everything else, not only grown in Idaho, but in the Northwest, that will be devastated. The impact on program crops will be just as slow, because, as those farmers move into the program crops, the cost of the government goes up.

Mr. Chairman, this will not save consumers anything. This will hurt farmers, and it will hurt the taxpayers.

I recommend that we vote no to this Downey-Gradison amendment.

Mr. DOWNEY. Mr. Chairman, I yield 2 minutes to the gentleman from Wisconsin [Mr. MOODY].

Mr. MOODY. Mr. Chairman, I appreciate the time.

Let me make two major points. The first is, yes, this is a jobs bill, and the jobs are being lost right now in my district because of the sugar program in the United States. We have a chocolate factory in Wisconsin, Ambrosia Chocolates. Guess what is happening? They are losing every day to Canadian chocolate companies that are buying sugar at the world price. We are losing jobs in Wisconsin, and I suspect in many other sugar producing industries in America, because the Canadians, they do not have this restriction. They can import world price sugar.

My colleagues are not saving American jobs. My colleagues are losing American jobs with this program. We are losing jobs in America with a sugar program because we have a lot more consumer sugar-using jobs than we have sugar-producing jobs. There are 23,000 food manufacturing companies in America. Those jobs are in jeopardy by this program.

We are not talking about a disarmament program here, as some people say, in GATT. We are talking about a very modest change, and we are not changing something to hurt others. We are changing it to help ourselves because there are a lot of consumers in America that use sugar.

Mr. Chairman, my second point is about the incidence of the benefit. Someone said, the gentleman from Idaho [Mr. STALLINGS], that this will just go to help companies. Wait a minute. If we had no competition in the sugar-using industry, he would have a point, but we have fantastic competition. When we have competitive markets, the benefits get shifted onto the consumer. Twenty-three thousand people competing in food manufacturing, that is, by definition, a condition where the benefits get sifted on down to the consumers because the producers are competing with one another. There is no such thing as locking the benefit up. If it were a monopoly, yes, but not in the case of multiple competing companies.

So, Mr. Chairman, this will be passed on to the consumers overwhelmingly. It is the consumers that will benefit. To vote against this amendment is to say, "Down with the consumers, up with the handful of producers that benefit."

The producers benefit, the consumers would lose, if we do not pass the Downey-Gradison amendment.

Mr. STANGELAND. Mr. Chairman, I yield such time as he may consume to the gentleman from California [Mr. HERGER].

Mr. HERGER. Mr. Chairman, I rise in strong opposition to this amendment, and urge my colleagues to reject it as well.

The sugar title, as passed by the House Agriculture Committee, provides that the sugar program will be continued at no net cost to the Federal Government. This amendment would not result in any budgetary savings, but would jeopardize the livelihoods of thousands of Americans. The sugar industry provides 361,000 American jobs and contributes $18.5 billion to our national economy.

The present bill freezes the loan rate at the current 18 cents a pound, which is critical to our farmers and processors. Compare the 18 cent level of our program to that of the European Community, which supports its sugar industry at 30 cents a pound. Such unfair competition has contributed to a 21-percent reduction in the acreage planted to sugar beets in California alone over the past few years.

This amendment would greatly disadvantage our sugar industry in competing against foreign competition which is very heavily subsidized. We currently are trying to negotiate an end to agricultural subsidies and other trade barriers in the Uruguay round of the GATT process. Reducing the loan rate for U.S. sugar producers will undoubtedly be viewed as "unilateral disarmament" by the EC and the many other nations which subsidize sugar. It thus will reduce our chances of reaching a successful agreement. Our farmers are ready to compete on a level playing field if one can be obtained in the GATT talks.

Finally, the proponents of this amendment contend that the sugar program entails substantial costs for consumers. However, they Fail to point out that since the sugar program was enacted in 1981 have actually been lower than in the prior 5 years. Moreover, from the early 1980's to 1989 sugar prices actually declined by 5 percent, while the average prices of sugar-containing food increased by 16 percent.

I urge my colleagues to reject this amendment and support the sugar program at 18 cents until at least we see what happens in the GATT talks.

Mr. STANGELAND. Mr. Chairman, I yield 1 minute to the gentleman from Oregon [Mr. ROBERT F. (BOB) SMITH].

Mr. ROBERT F. (BOB) SMITH. Mr. Chairman, I thank the gentleman from Minnesota [Mr. STANGELAND] for yielding this time to me.

Mr. Chairman, I oppose Downey-Gradison, and I support the committee position.

Mr. Chairman, if we were to take sugar out of this discussion and I would bring to my colleagues an amendment on the floor which would provide for stable consumer prices which would support American farmers at no cost to the Treasury and, yes, yield $300 million a year to the Treasury, my colleagues would wrap their arms about it and support it, and that is exactly what the committee position does.

Mr. Chairman, there are two governments that I can think of in the world who would rejoice at the passage of this bill. One is headquartered in Bonn, and the other in Paris. The European communities are cheering us on, hoping we will pass this amendment because this is unilateral disarmament. That is what this is.

Mr. Chairman, we need to negotiate in the GATT a world trade situation in which we are in. We do not have to disarm at this point. Let us pass the committee bill and oppose the Downey-Gradison amendment.

Mr. STANGELAND. Mr. Chairman, I yield such time as he may consume to the gentleman from Missouri [Mr. EMERSON].

Mr. EMERSON. Mr. Chairman, I wish to rise in strong opposition to the Gradison-Downey amendment. If adopted, this amendment would damage major facets of the sugar industry and leave countless numbers of American sugar workers jobless. The sugar price support has remained at 18 cents for the past 5 years and the action taken by the Agriculture Committee simply extends this price level for the next 5 years.

I urge my colleagues today to not be sweet talked into dismantling a program that has helped sugar producers compete in an international market for several years now. The present support level has also provided the opportunity for American corn growers to compete for a share in the sweetener industry, further benefiting the American consumer looking for an ample supply of sugar at a reasonable price. Contrary to those who wish to destroy the present program, the sweetener business is intensely competitive because corn sweeteners compete directly against the products of sugar cane and beet growers.

Additionally, the Bush administration, though the Uruguay round, is trying to help our Nation's corn and sugar growers compete in overseas markets that benefit from substantial foreign subsidization. This country's corn and sugar producers can compete against foreign producers, but they cannot go head to head against a foreign treasury.

Our trade negotiators are presently in Geneva attempting to bring about a fair and equitable agreement which would reduce or eliminate foreign subsidies and trade barriers. Until foreign nations end the unfair trade practices, we must maintain a strong, viable U.S. sugar program. Let's not pull the rug out from under our own domestic producers before our trade negotiations address this matter at the international table.

Moreover, those who say the American consumer will benefit from a price support reduction are giving us the sweetest talk of all. Will sweetener users really cut the price of their retail goods if the support prices for sugar were to drop? I think we all know that answer. I urge my colleagues to maintain the present program and support level and not cripple our Nation's corn and sugar growers ability to compete against unfair foreign trade subsidies.

Mr. GRADISON. Mr. Chairman, I yield such time as he may consume to the gentleman from Illinois [Mr. PORTER].

Mr. PORTER. Mr. Chairman, I rise in strong support of the Downey-Gradison amendment.

Mr. Chairman, all Members should support the Downey-Gradison amendment to lower the loan rate for sugar by 2 cents. Personally, I would prefer to eliminate the entire program, but this amendment will help correct some of the harmful effects of the current sugar program.

As it stands today, the sugar program hurts consumers; promotes environmental destruction; costs American jobs; stabs our allies in the less developed countries in the back; violates central provisions of the world trading system, and in light of the United States position on trade and our problems with Japan, is exceedingly hypocritical.

Mr. Chairman, supporters of Downey-Gradison are not suburban and urban villains out to destroy rural America. We are, in fact, simply trying to change a policy created by and for a narrow special interest. The sugar program has delivered a handsome return to a handful of farmers; it also temporarily allowed corn growers to make a special profit. But the program is a ticking bomb—it will fall of its own weight because it is fundamentally, economically unsound. The question is why this Congress keeps it on life support?

Finally, voting for Downey-Gradison will boost many American farmers. It will stop a process by which sugar beet farmers have bid up land prices and harmed the interests of those farmers who grow other crops.

Downey-Gradison will attempt to control the worst form of special interest legislation, and I urge my colleagues to adopt it.

Mr. Chairman, the sugar program also violates our international trade obligations. In this area the United States started on the wrong foot. In 1955, the GATT granted the United States a temporary waiver for the sugar program, with the expressed understanding that it was inconsistent with the guidelines and principals of the GATT. It is now 1990, and we are looking at 35 years of obstinancy on behalf of the U.S. national farm policymakers.

Nearly a year ago, June 1989, the GATT council, in response to an Australian charge of violation, reported that the United States program was inconsistent with the United States waiver. Did we need to get our hands slapped in this forum? No. But we deserved it. This is just one of many signals which continues to remind me it is time to reform the sugar program.

Mr. STANGELAND. Mr. Chairman, I yield 2 minutes to the gentlewoman from Hawaii [Mrs. SAIKI].

Mrs. SAIKI. Mr. Chairman, I rise in opposition to the Downey amendment. Hawaii's sugar industry has long been a cornerstone of my State's economy. It has enacted cost cutting measures to meet the 18-cent price support that has been eroded by inflation over the past 5 years. Even at the current 18 cents, it will have to find new ways to cut more costs. Hawaii needs a viable sugar industry, and this amendment to cut the price support by 2 cents will devastate our local industry.

Hawaii's sugar industry can compete with any other in the world, and is willing to do so in a fair marketplace. But the current marketplace is not fair. The European sugar industry dumps its excess sugar on the world market at prices below the cost of production. Europe's growers are supported by their governments at almost twice the level called for by this amendment.

Mr. Chairman, it is no wonder that they are the stumbling block in the ongoing negotiations to eliminate agricultural subsidies. We are told that a 10-percent cut would strengthen our hand in international negotiations, but we know that results are achieved by negotiating from a position of strength.

Mr. Chairman, passage of this amendment will hurt our hand, not strengthen it. I ask my colleagues to oppose this Marshall plan for the rich

European growers. Let us defeat the Downey amendment.

Mr. GRADISON. Mr. Chairman, I yield the balance of my time to the gentleman from Florida [Mr. GIBBONS].

Mr. GIBBONS. Mr. Chairman, I support the Downey-Gradison amendment because it will send the right message to our farmers, not only our sugar farmers, but all of our farmers, and it will send the right message to the world.

Mr. Chairman, the problem with our sugar negotiations and agriculture negotiations is that we have two superpowers in this field glaring across a barricade of sugar bags or tons of sugar to see who will blink the first. And none of us are going to blink unless we agree to start moving.

When we pass a 5-year sugar program, as we are doing here, and maintain price supports on sugar, as we have cut price supports on everything else, all we are telling the Europeans is, "We're not going to flinch, fellows. Not for 5 years are we going to flinch."

What we need to do is adopt the Downey-Gradison amendment. It will send the right message to the Europeans. It will send the right message to the other sugar subsidizers. It will send the right message to all the American farmers that this thing has got to end, that these supports cannot go on. They are not permanent, they are not indefinite.

Mr. Chairman, it makes absolutely no sense to say that, but cutting some price support systems, we will reduce domestic prices. As my colleagues know, the candy industry, the cookie industry, the cake industry, all these industries are highly, highly competitive, particularly the soft drink industry is highly competitive, and anytime we can make any reduction, any substantial reduction, in the cost of the materials supplied to them, there is going to be a reduction.

Mr. Chairman, I realize that, when we are talking about a candy bar, one candy bar, it is not going to make a heck of a lot of difference. As we all know and, as the gentleman from North Carolina told us, there is only a penny's worth of peanuts in that bar. I do not know how much sugar is in that bar, but, when we add all these prices together, the peanuts, the sugar, all the other starches, the other things that go into these products, and we keep boosting those prices up, it is going to go up. But, if we generally reduce the prices, prices are going to come down.

So, Mr. Chairman, we will save money, we will send the right signal, and we will do the right thing.

Mr. STANGELAND. Mr. Chairman, I yield 1 minute to the gentlewoman from Nebraska [Mrs. SMITH].

Mrs. SMITH of Nebraska. Mr. Chairman, I oppose the amendment offered by Congressmen DOWNEY and GRADISON that would reduce loan rates for sugar by 10 percent.

The program that is being challenged here today is a responsible, income-generating program. According to the USDA's Commodity Credit Corporation, over the past 3 years the timely repayment of sugar producer loans generated net revenues to the CCC of more than $336 million.

Furthermore, according to a recent analysis by the University of Illinois, this program has played a vital role in the development of the U.S. corn sweetener industry, which now consumes approximately 15 percent of all the corn marketed in the United States. This has raised the price of corn by an estimated 25 cents per bushel and, according to the USDA, saves the U.S. Government $500 to $700 million a year in deficiency payments to corn growers.

Over the past few years, a great deal has been said about the impact of the sugar program on the American consumer. When I first came to Congress in 1975, sugar prices were skyrocketing. Consumers were furious then, but I do not hear consumers complaining anymore.

The fact is, consumers are quite pleased with the results of the sugar program. The average American buys 20 pounds of sugar per year for home use, and at 35 cents per pound, that costs only $7 a year.

Sugar prices are stable, reasonable, and actually lower than before the program went into effect in 1982. The sugar program as proposed in H.R. 3950 will not increase the sugar price support—it freezes it, without a cost-of-production adjustment, for the 5-year life of the bill.

It is important that my colleagues know that the U.S. sugar program is certainly not unique in the world of sugar producers. In fact, sugar production and marketing are regulated by more governments and to a greater degree than any other commodity. Governments often regulate sugar production levels, prices, factory and field workers' wages, and even prices at various stages of distribution.

And let me again emphasize a key point: This sugar program is operating at no cost to the taxpayer.

We have had the loan rate frozen at 18 cents since 1985, and those supporting this amendment, have apparently not taken into account that 18 cents in 1985 does not equal 18 cents in 1990. Adjusting for the effects of inflation between 1985 and 1990, the sugar loan rate beginning July 1, 1990, was worth only 14 cents in real terms.

We have a program in place that operates at no cost to the taxpayer, returns a net profit to the Government, and ensures great stability to sugar prices that results in lower refined sugar prices. All that we have asked for is to maintain the status quo.

I urge the defeat of this amendment.

□ 1310

Mr. DOWNEY. Mr. Chairman, I yield myself 2 minutes.

Mr. Chairman, the sugar program is a tax on consumers. The world price of sugar, whether it is a dumped or nondumped price, is approximately half what American consumers are paying today.

We see displayed before us boxes of cereal and cans of soda and the suggestion is made that with the thousands of people who compete there, that if we reduce one of the raw material prices into that, that that will not be passed on to the consumer. Nonsense. If sugar prices went up, do you think they would not be passed on? Of course, they would be passed on.

Now, one-third of all the sugar does not come in the form of candy or soda. It comes directly in packages to consumers, so if you wanted to fly to Ottawa and pay haif what American consumers pay in the United States, you can do that because they have decided that they want the free market to reign. We have not gone that far, Mr. Chairman. All we have asked for is a 2-cent reduction in the food tax that this consumer program levies today. We are not asking us to unilaterally disarm at GATT. If we were, then Carla Hills would not be for this program.

I am not worried about the European program. I am worried about what is good for American consumers. This 2-cent reduction saves them $600 million.

So if you do not have sugar beets in your district and your program in your communities is not awash with sugar cane, explain to your consumers why you are opposed to the Downey-Gradison amendment, why the administration felt that it was important to see this 2-cent reduction, but that you did not, that somehow you figured that high sugar prices are good for American consumers, When in other parts of the world this does not exist.

You have a chance, and it is very rare on this floor that we are given this opportunity, to do something direct and sound for consumers.

Vote for the Downey-Gradison amendment. Reduce the price of sugar 2 cents. Do the right thing.

Mr. HUCKABY. Mr. Chairman, I yield 1 minute to the gentleman from Mississippi [Mr. ESPY].

Mr. ESPY. Mr. Chairman, I thank the gentleman for yielding time to me.

With all due respect to my colleague, the gentleman from New York, and to the gentleman from Ohio [Mr. GRADISON], I rise in strong opposition to the Downey-Gradison amendment. I think that it will not benefit anyone except

for large food companies, large soft drink companies, and affect our world trade competitors.

I think Carla Hills is for this because it is the position of our GATT negotiators to go to a zero subsidy position. In fact, I was in Geneva recently, Mr. Chairman, and talked to the EC GATT negotiator, and he said to me quite explicitly, "What you guys in America don't realize is that in the EC, in the European Community, we think that agriculture is like religion."

If that is the case, Mr. Chairman, I say sign me up with the church, and in that respect this amendment constitutes heresay.

The sugar amendment does not add to the deficit. As a matter of fact, the sugar program operates at absolutely no cost to the U.S. Treasury. If the argument here is the cost to the consumers, market history suggests that decreases in the price given to farmers has no relation whatsoever to the price that consumers pay.

If this amendment passes, the price of candy bars and soda will not fall. What will fall is the farmers, the rural communities, and what will go up is the position of the large soft drink companies and the food companies.

Mr. Chairman, this amendment needs to be defeated.

Mr. HUCKABY. Mr. Chairman, I yield my remaining time to the gentleman from Texas [Mr. DE LA GARZA], the chairman of the Committee on Agriculture.

Mr. DE LA GARZA. Mr. Chairman, you have heard it all. The final fact is, can the manufacturers—There is not one cocoa bean produced in the United States of America. All the chocolate comes from abroad, and they do not care how much they charge for it.

Now, for every farmer you lose, for every pound of sugar you use, it will come from abroad.

So the bottom line is, it is jobs in the United States of America, farmers in the United States of America.

Vote no on the Downey amendment. It is jobs USA jobs USA, jobs USA. You cannot cut it anymore. You cannot hide it anymore.

It is jobs, jobs, jobs in the USA. Vote no on the amendment.

Mr. HUCKABY. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I yield to the gentleman from Louisiana.

Mr. HUCKABY. Mr. Chairman, I thank the gentleman for yielding to me.

Let me point out, the Europeans support sugar at 30 cents a pound. The United States at 18 cents. Our farmers will compete head up with anyone. But we cannot compete against the European subsidies.

Mr. BERMAN. Mr. Chairman, I rise in support of the gentleman's amendment. I want to direct my remarks to a little-known subsidy enjoyed by the sugarcane industry: the H–2A Agricultural Guestworker Program which brings 10,000 Caribbean workers into the United States each year to harvest sugarcane under conditions that are the shame of this Nation.

This program began in the early 1940's, when the U.S. Department of Justice indicted Florida sugarcane growers on peonage counts—that is, the U.S. Government found that the growers were conspiring to enslave black Americans almost a century after the Civil War.

In lieu of peonage, the Florida sugarcane industry now relies on bonded labor in another form: foreign guestworkers who are brought into this country to work for particular growers, and who can remain in the United States only while their employment with those growers continue.

The Florida growers claim that they are unable to find U.S. workers for the jobs in question. Little wonder, given that decades of bonded labor have seriously depressed wages and working conditions.

When other industries cannot find workers, they improve wages and working conditions to attract job seekers. Not Florida sugarcane. They import more than 90 percent of their cane cutters each year, avoiding the free market in a manner unprecedented in other industries.

H–2A workers who complain about violations of labor laws or their employment agreement are flown home and are blacklisted from working in the U.S. canefields again. In 1986, workers upset with labor conditions organized a work stoppage at Okeelanta Corp., and were immediately rounded up by the county sheriff, taken to Miami, and flown home. With these powerful tools, the Florida sugar industry has at its disposal an extraordinarily exploitable work force.

H–2A employers are suppose to pay a premium wage—the adverse effect wage rate—in order to offset the impact of imported labor on American wages. Yet U.S. Department of Labor investigations in 1987–89 disclosed that one of the largest growers failed to pay even the Federal minimum wage. Shorting workers on the number of hours they worked is rampant, with the result that even at depressed wages, workers are paid far less than they earned.

The losers in this arrangement are clearly American workers, the imported guestworkers, and American taxpayers and consumers.

About 10,000 workers continue to be brought in from Caribbean nations each year to harvest cane, even though there are thousands of potential domestic workers in the immediate vicinity of the Florida canefields—many of them refugees who have sugar harvesting experience in their Caribbean homelands.

Unemployment in the Florida counties surrounding the canefields range from 10 to 15 percent. Besides doing nothing to alleviate domestic unemployment, the use of H–2A labor depresses wages and working conditions for American farmworkers who are employed, since growers hang over them the threat that they will be replaced by foreign laborers who will work for low wages and poor working conditions.

The near-slavery conditions the Caribbean guestworkers endure enrich the Florida sugarcane industry. Many workers are cheated out of wages. Injury rates are alarming: as many as one-third of the cane cutters are injured each season. Seriously injured workers are sent home and permanently blacklisted. Living quarters typically consist of prison-like barracks with barbed-wire fences, guards, and curfews.

And Americans taxpayers subsidized this outrage. The industry's labor practices mean that taxpayers pay for subsistence benefits—unemployment, food stamps, Medicaid—paid to unemployed American farmworkers. The U.S. Treasury suffers from foregone income tax and FICA revenues which would be paid had American workers held those jobs, but from which H–2A workers are exempt.

I have heard from leading figures in the sugar industry over the last few days; they have insisted to me that the Florida sugarcane atrocity is not their problem, not their responsibility. Well I am here to say it is. It is the black eye of the industry, and cane and beet growers and refiners around the country should make it their business to see to it that worker rights are enjoyed by all workers in the American sugar industry.

The H–2A program is another edge for the sugar industry, no less than price supports, and it is financed by taxpayers, consumers, unemployed Americans, and exploited foreign workers.

Mr. WEBER. Mr. Chairman, I rise today in strong opposition to this amendment. I believe that this amendment is unnecessary, works against the interest of consumers, weakens our international trade position, and risks our ability to have an adequate supply of domestically produced sugar.

The proponents of this amendment, Mr. Chairman, are claiming that it will save the American taxpayer's money. The Members of this body should know that nothing could be further from the truth. The sugar program costs the Federal Government nothing. According to the U.S. Department of Agriculture's Commodity Credit Corporation, the timely repayment of sugar producers loans generated net revenues to the CCC of $65 million in fiscal 1987, $246 million in 1988 and $25 million in 1989. All of this has happened because the Sugar Price Support Program has been a stable one, and the Food and Agricultural Resources Act of 1990 maintains that stability.

Furthermore, Mr. Chairman, the U.S. sugar program has played an important role in the development of the U.S. corn sweetener industry, which now consumes about 15 percent of all the corn marketed in the United States. This raises the price of corn by 25 cents per bushel and, according to the USDA, saves the U.S. Government some $500 to $700 million per year in deficiency payments to corn growers. The revenue and savings that the sugar program generates would be lost if this amendment passes.

The supporters of this amendment also have claimed that the sugar program has an adverse impact on the Caribbean Basin nations. Again, Mr. Chairman, this is simply not true. In fact, the Caribbean nations that produce sugar have endorsed the sugar program in the farm bill. If we cut our sugar price

level, we will cut those nations' income. And with the rest of the sugar producing world unwilling to change their programs, why should we make our producers the sacrificial lambs of international trade?

Mr. Chairman, it is very important that the Members of this body to understand what the real impact of this amendment will be. In Minnesota alone over 24,300 jobs rely on a strong U.S. sweetener industry. Up to $1.2 billion of economic activity is generated in my State each year by the sugar and corn industry. Over 1,200 growers produce 5 million tons of sugar beets on 334,000 acres. If passed, this amendment threatens the very existence of all segments of this industry.

If the Members of this body want to vote to eliminate jobs, force farmers into bankruptcy, stunt economic growth in rural America, and eliminate revenues to the Department of Agriculture, they should vote for this amendment. However, if members want to support programs which will continue the economic recovery in rural America, they should vote against this amendment.

I strongly urge a no vote on this amendment.

Mr. Chairman, I would like to take this time to express my opposition to the Downey-Gradison amendment to the sugar title. If enacted this amendment would cut 2 cents from the current 18-cent sugar loan rate. Such a unilateral cut would be devastating to American sugar producers and would severely weaken the negotiating position of the United States in the current GATT [General Agreement on Tariffs and Trade] negotiations.

The proposed Downey-Gradison 2-cent reduction in the sugar loan rate is the type of unilateral cut which we cannot afford in the face of the GATT negotiations. Today, almost every major sugar producing country subsidizes its sugar producers at a higher rate than our program. For example, the European Community subsidizes their sugar producers at a rate of 27 cents per pound. How can we encourage other countries to reform their programs, if we have already given away all our cards?

Proponents of the reduction say this will lessen consumer costs. Three-fourths of all sugar used is in manufactured products. Lowering the cost of raw sugar will not lower the cost of a candy bar when the amount of sugar in each candy bar does not even total one penny. This money will only pad the profit margin of the large candy and soft drink manufacturers. Not one dime—not one penny will find its way into the consumer's pocket if such a reduction is enacted.

The sugar program is by law a no-cost program. In fact over the past 3 years, the program has yielded $300 million in revenues, according to USDA figures. Because of the sugar program, American consumers have been able to depend on a stable supply of sugar at a reasonable price. Reducing or eliminating the sugar loan rate could move us back to the wild, cyclical price swings that plagued us in the mid-1970's.

My State of Idaho is one of the largest growers of sugar beets in the United States. A reduction in the sugar loan rate would drive many Idaho sugar beet growers into other crops such as barley, potatoes, and wheat thus making the prospect of oversupply in those commodity markets more probable. Such a result would have an immediate adverse effect on our State economy and agricultural communities.

We cannot endanger our GATT negotiating positions with this unilateral reduction. Moreover, a 2-cent reduction in the sugar loan rate would severely impact the agricultural community. Mr. Chairman, our farmers and our Nation cannot afford this amendment. I urge my colleagues to reject this amendment.

The CHAIRMAN pro tempore (Mr. ALEXANDER). All time has expired.

The question is on the amendment offered by the gentleman from New York [Mr. DOWNEY].

The question was taken; and the Chairman pro tempore announced that the Chair was in doubt.

RECORDED VOTE

Mr. DOWNEY. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 150, noes 271, answered "present" 1, not voting 10, as follows:

ANSWERED "PRESENT"—1

Sisisky

NOT VOTING—10

Bilirakis	Hansen	Nelson
Coughlin	Lowey (NY)	Watkins
Crockett	Morella	
Ford (TN)	Morrison (CT)	

□ 1338

The Clerk announced the following pairs:

On this vote:

Mr. Nelson of Florida for, with Mr. Hansen against.

Mrs. BENTLEY and Mr. STOKES changed their vote from "aye" to "no."

Mr. HUGHES and Mr. SAVAGE changed their vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

□ 1350

Mr. PENNY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, at this point I had intended to offer an amendment on the sugar price program to lower the price by 2 cents over the next 5 years. That would have resulted in a four-tenths of 1 cent reduction in the price support each year of the 5-year farm program.

Mr. Chairman, I was of a mind to offer this amendment because of the relative relationship of crop prices among commodities. Under the 1985 farm bill target prices and loan rates for wheat, feed grains and corn declined each of the 5 years of that farm bill. During that same time period the sugar price was maintained at a constant level of 18 cents per pound.

It was my view that while we were freezing all other target prices for crops for the duration of the 1990 farm bill that that would have left sugar with a comparative advantage due to the fact that they did not lose price while other crops did over the last 5 years.

In Minnesota at least, due to this price advantage and profit advantage enjoyed by sugar beet producers we were seeing an extraordinary bidding up of land values in the sugar beet producing counties that was to the disadvantage of all other producers of other crops within those counties.

My hope was to phase in this price reduction in a way that could have been absorbed and facilitated by the sugar beet producers and the processing industry. However, as debate on the previous amendment clearly demonstrated, any cut in that price, whether done immediately or phased in over 5 years, would not have resulted in a reduction in consumer prices. And again, because this is a program that does not impact on the Federal Treasury, no reduction in this price would have saved the taxpayers one dollar.

My view is that as we proceed with this farm bill there are areas in which we can make significant savings of taxpayer money, and I intend to place my emphasis in those areas. Tomorrow we will take up an overall limitation on program subsidies based on farm income from program crops. One amendment that I intend to offer would limit any farm subsidies to producers who exceed $1 million in sales of program crops. Another amendment which I am working on with the gentleman from Louisiana, Chairman HUCKABY, and with the gentleman from Massachusetts, Mr. CONTE, would limit payments to producers under various farm programs. We already have a $50,000 limitation on deficiency payments. We would reduce the limitation on payments for marketing loans, for Findley payments and other direct payments to farmers.

It seems to me that if we are really going to save money that efforts in support of these amendments are of prime importance. For that reason I do not intend to pursue my amendment on sugar today and will instead devote my attention and my energies to pass those amendments tomorrow.

AMENDMENT OFFERED BY MR. HUCKABY

Mr. HUCKABY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HUCKABY: 1. Strike section 207(b)(4) (A) and (B) and insert the following:

"(A) The acreage base for any crop shall be the number of acres that is equal to the average of the acreage planted and considered planted for harvest for sugar or seed on the farm in each of the 5 crop years preceeding such crop year.".

2. Redesignate section 207(b)(4)(C) as section 207(b)(4)(B).

Mr. HUCKABY. Mr. Chairman, I do not believe this amendment is controversial.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. HUCKABY. I yield to the gentleman from Texas.

Mr. DE LA GARZA. Mr. Chairman, in behalf of the full committee on our side, we have examined the amendment and we think it adds to the legislation. On this side we would have no objection to it.

Mr. STANGELAND. Mr. Chairman, will the gentleman yield?

Mr. HUCKABY. I yield to the gentleman from Minnesota.

Mr. STANGELAND. I thank the gentleman for yielding.

Mr. Chairman, we have examined the amendment on this side and certainly concur with the chairman of the committee and the chairman of the subcommittee that this does indeed enhance the legislation. We support the amendment.

Mr. HUCKABY. I thank the gentleman.

Mr. Chairman, I ask for an aye vote on the amendment.

The CHAIRMAN pro tempore (Mr. ALEXANDER). The question is on the amendment offered by the gentleman from Louisiana [Mr. HUCKABY].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. HUCKABY

Mr. HUCKABY. Mr. Chairman, I offer an amendment.

The clerk read as follows:

Amendment offered by Mr. HUCKABY: Strike all of subtitle C of title II.

Mr. HUCKABY. Mr. Chairman, the intent of this amendment is to really restore the status quo as to how the sugar program operates today.

The Committee on Ways and means struck the authority for the administration to administer, to regulate our imports under what is referred to as the tariff headnote authority. We allocate country-by-country quotas based upon historic shipments, and through this we operate a no-cost program.

In addition to this, the administration had the authority under the old program to also implement and operate a tariff rate quota or to operate under section 22. The effect and intent of my amendment is to restore the status quo of how the sugar program is operating today to ensure that it will continue to operate. The administration has the authority to change and implement a tariff rate quota if they so desire or to implement section 22.

Mr. STANGELAND. Mr. Chairman, I rise in support of the amendment of the gentleman from Louisiana.

Mr. Chairman, the Ways and Means Committee provisions require the administration to implement either a tariff rate quota or to use section 22 to bring sugar import provisions into compliance with the GATT. It gives specific authority to the tariff schedules for a tariff rate quota.

Currently the quota is operated under the tariff headnote authority. The Ways and Means Committee takes away this authority.

To implement a tariff rate quota, the USTR hopes to enter a voluntary restraint agreement with Canada backed up by section 22. The administration already has the authority to implement a tariff rate quota or to use section 22, and this language in the bill would take away a tool as passed by the Committee on Ways and Means, and the gentleman from Louisiana puts the language back in to give the administration the authority to continue, if it is appropriate, to use tariff headnote authority.

Mr. HUCKABY. Mr. Chairman, will the gentleman yield?

Mr. STANGELAND. I am happy to yield to the gentleman from Louisiana.

Mr. HUCKABY. Mr. Chairman, it is my understanding that without this amendment it will be necessary to increase imports of domestic sugar, to increase them significantly to the point that we would have to for the first time ever implement a production control system. Does the gentleman concur with that statement?

Mr. STANGELAND. I thank the gentleman for his contribution.

I would also like to point out that in the GATT, Australia brought a complaint against the United States sugar program and the GATT upheld the Australian complaint.

□ 1350

And so we are negotiating with Australia and the GATT as to how to bring our program into compliance. That may well be to use tariff rate quotas, it may well be to use section 22, but there may also be a way to use the tariff headnote authority. These difficulties should be ironed out, again, in Geneva, in GATT, where the complaint was filed and the complaint was upheld.

Mr. HUCKABY. Mr. Chairman, many feel that the existing program before us now that has a standby production control system meets the concerns of GATT.

Mr. STANGELAND. Yes. I thank the gentleman.

Mr. GIBBONS. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

I recognize my friends on the Committee on Agriculture may have a hard time believing me on this argument, but this argument, and I want to tell you directly, is not aimed at the sugar program. In fact, if we adopt this, it will operate the same way it does on the peanut program and all the other programs that restrict imports.

But the real problem here is to try to get America out of the outlaw class in international trade and to adopt a way of enforcing the sugar program, carrying out the sugar program without effecting the sugar program at all by 1 penny or $1 or 1 ton, so that we will be in compliance with the GATT rules.

We have been hauled into court in GATT. We lost the case. It was vigorously argued by our side.

The only way to cure it is to do what the Committee on Ways and Means did.

Now, there will be other ways and there are other ways now of controlling this program, section 22 of the Agriculture Act. It has been in existence since in the 1930's. That is what we expect the administration to rely upon that has a GATT waiver and to rely on that in the enforcement of this program.

But we suggest a tariff rate quota. The Committee on Rules incorporated it as part of the bill. It is what is in the bill. The Committee on Agriculture is now trying to strike that out.

We do it mainly to try to bring some peace into the negotiations around the world.

We cannot get anybody to come to the table and honestly negotiate with us if we are not going to follow the rules after we have adopted them. That is a simple problem that is ahead of us.

We are not trying to abolish the agriculture sugar program here, we are not trying to cut the importation or raise the important at all. We are trying to leave it as it is.

But we are trying to do it in a legal manner. That is all the argument is about.

I recognize I may appear as a wolf, in sheep's clothing on this particular subject matter, but let me assure you that we have worked with the Agriculture Department, with the lawyers down there, with the economists down there. We worked with the people in all of the agencies. While they do not endorse this program or adopt it as theirs, they do admit that this is a sound way to do it and they helped us in the drafting of it and criticized our drafting.

So all we are attempting to do is to bring down program into compliance. If we can get compliance, people are going to be much more anxious to bargain with us.

The trouble is, when we go to the bargaining table now, we violated so many of the rules ourselves nobody will sit down and bargain with us. They say, "We can't bargain with you. You don't even obey the rules that you helped lay down that are on the books now." How can we expect anybody to cooperate with us, to work with us, on that kind of thing?

All I am attempting to do is to leave the sugar program as it is, not cost a nickel to anybody, only come into compliance with the international rules for which we have been hauled into court and found guilty.

Mr. HUCKABY. Mr. Chairman, will the gentleman yield?

Mr. GIBBONS. I yield to the gentleman from Louisiana [Mr. HUCKABY].

Mr. HUCKABY. I thank the gentleman for yielding.

Mr. Chairman, there are many who feel like, with the production control system that is in this bill for the first time, we comply with GATT. No one really knows until we go to GATT. Different attorneys tell us different things.

We all feel that we should comply with international law.

Now, the existing program that we are operating under today, the way we are operating, the administration has the discretionary authority to implement the tariff rate quota. They have been telling us for many months they are going to do that, And the committee supports them doing that, but for various reasons they have not.

The position of the gentleman in the well mandates that they either implement that or implement section 22.

Now, we have significant problems with section 22. Section 22 changes the quota time period, it changes the imports, it changes significantly the way the program operates.

So what the committee is doing is we are just saying let us continue to operate as we are. We think we have complied with GATT. And the administration still has the authority here. They have the option to implement the tariff rate quota if they so choose.

Would the gentleman agree this is a correct statement?

The CHAIRMAN pro tempore (Mr. ALEXANDER). The time of the gentleman from Florida [Mr. GIBBONS] has expired.

(On request of Mr. HUCKABY and by unanimous consent, Mr. GIBBONS was allowed to proceed for 2 additional minutes.)

Mr. STANGELAND. Mr. Chairman, will the gentleman yield?

Mr. GIBBONS. I yield to the gentleman from Minnesota [Mr. STANGELAND].

Mr. STANGELAND. I thank the gentleman for yielding.

Mr. Chairman, the gentleman in the well [Mr. GIBBONS] is an expert on trade, tariffs, and ways and means, and I respect that. But is it not true that our operating under the headnote authority in our sugar program comes as a result of a waiver that we received to the rules in the GATT years ago, way back when?

Mr. GIBBONS. Section 22 authority comes under a waiver. Section 22 was in being a decade and a half before GATT came into being. So we got a waiver on that. But obviously, we do not have a waiver on the headnote authority, because that is what GATT found to be illegal after they took us into court, after the Australians and other people took us into court.

Mr. STANGELAND. Should that not be something that we negotiate in Geneva within the GATT as to how to resolve that Australian complaint and not do it here?

Mr. GIBBONS. That is the whole thing that I am talking about. Nobody wants to negotiate with some person who does not keep their word, who does not follow the rules after they have been ruled upon. That is our problem.

In the remainder of my time, I would like to say that all I am attempting to do here is get us into compliance with GATT, not to affect your program.

Now, tomorrow I have an amendment that affects your program. But that is not today. I hope you will realize that I am only trying to affect your program tomorrow, Mr. Chairman and members of the committee, because I think it is impossible for us to enact a 5-year subsidy program and then walk into GATT and say, "Hey, we are willing to negotiate now."

We will never get the 5-year subsidy program changed, if we ever put it

into law here for 5 years. I just want to put it into position for 2 years. But under this, let us not be the law-breakers, let us be the law-abiders. If we do not like the law, let us try to change the law.

All I am trying to do here is to make us comply with the GATT without hurting the domestic program.

Mr. FRENZEL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment for substantially the same reasons articulated by the distinguished chairman of the Subcommittee on Trade of the Committee on Ways and Means. The effect of the Huckaby motion is to restore the same flawed language which was found unacceptable in the General Agreement on Tariffs and Trade. We resisted, we fought the case, we did the best we could with it, and we lost.

What normally happens when you lose is you go home and you change your law and you take your lumps. We have for a long time railed vigorously in the GATT at those countries which either stalled decisions or, having received decisions, made no changes in their law. And when they do, they are then subject to retaliation, and occasionally we have retaliated. And now here is a case in which we have been a clear loser.

□ 1400

It is not a split decision. We lost. The amendment that is in the bill itself and which the Huckaby amendment would strike, is language which gives the Members a chance to make our position correct, to put Members back into agreement with the rules of the GATT.

Now, if we accept the Huckaby amendment, we will be out of agreement again, or we will remain out of agreement. We will be out of agreement again, and subject to retaliation, or whatever other kind of actions our trading partners would like to make against Members.

Mr. HUCKABY. Mr. Chairman, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from Louisiana.

Mr. HUCKABY. Mr. Chairman, under international law, does not GATT recognize that where one restricts domestic production, one can regulate through a potential system, and we have changed in this bill, we have changed existing law to comply with GATT?

Mr. FRENZEL. Mr. Chairman, I heard the gentleman make that statement earlier, but I must say personally I am not the GATT lawyer, and so I have difficulty interpreting whether what the gentleman has done is going to be satisfactory.

As I understand it, it is not wholly clear, and that the preponderance of argumentation I have heard is on the other side.

Mr. HUCKABY. If the gentleman will continue to yield, certainly I do not think there is any greater supporter of GATT and the GATT negotiations than Secretary Yeutter. Secretary Yeutter today has the authority in existing legislation to implement either the tariff right quota or section 22. We are just saying, let people continue operating as we are, and let them negotiate in Geneva, and also the fact that we feel we have complied with GATT.

Mr. FRENZEL. Mr. Chairman, I thank the distinguished chairman of the subcommittee for his contribution.

I will concede that the gentleman knows the sugar business from alpha to xylophone. Nevertheless, if we are going to live up to our agreements at the international level and if, more importantly, we are going to expect our trading partners to live up to theirs, they are not going to be able to do so if we continue to break the law. I submit that the Huckaby amendment continues to put Members out of agreement with the GATT, and if it is passed, we will have, I think, some retaliation in our trading partners, which I submit is going to be in agriculture commodities. If that is the way we want it, that is the way we are likely to get it.

Mr. DE LA GARZA. Mr. Chairman, I rise in support of the amendment. Very briefly, listening to my distinguished colleagues and friends, the gentlemen from Florida and Minnesota, I concur partially with their assessment of the situation, and we know that as far as free trade and international trade, our two distinguished friends and colleagues are purists in this effort. I applaud them for that.

We have to deal with the realities of internal situation and domestic situation. I have no disagreement. I do cringe a little bit when one of our colleagues says that we are GATT illegal, and that is really a short phrase used because there is no legal or illegal, but it is a community of nations, as all Members know, that establish some rules, and Members, hopefully, will apply.

We have, by and large, been faithful to the GATT, and will continue to be. There is some degree of insistence on my part, though, for example, that who brought the complaint, and we are heard from law school days that to come into a court of equity a person must come with clean hands. The charge was brought by our friends and neighbors, and very good trading partners, from Australia, who had kept sugar from coming into their country for abut 70 years, contrary to GATT. Then they changed it, but put in a tariff which is prohibitive, so that sugar will come into Australia. But now they are GATT legal. I have discussed this with several prime ministers of Australia. I have discussed it with their Minister of Primary Industry, Agriculture, their Minister of Commerce, and they are not that agitated. They are waiting to see. They are leading an effort to arrive to some degree of consensus at GATT.

I agree with my colleagues, and I applaud and respect them for their purity in wanting to establish a world legal order in trade, and all Members look towards that day so that we would not have to be dealing with legislation like we will be dealing with here. However, at this point in time, the reality of the situation is that basically the administration needs this tool to endorse the law as we now have it, and do not disrupt when the sugar comes in, how it comes in, and therefore I would hope that with due respect to my colleagues, committing ourselves to work toward the end which they so eloquently espouse that we support the committee and allow Members to give the administration this tool to continue administering the legislation as they have done in the past.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Louisiana [Mr. HUCKABY].

The amendment was agreed to.

The CHAIRMAN. Are there further amendments to title II?

If not, the Clerk will designate title III.

The text of title III, is as follows:

TITLE III—RICE

SEC. 301. LOAN RATES, TARGET PRICES, DISASTER PAYMENTS, ACREAGE LIMITATION PROGRAM, AND LAND DIVERSION FOR THE 1991 THROUGH 1995 CROPS OF RICE.

Effective only for the 1991 through 1995 crops of rice, the Agricultural Act of 1949 is amended by inserting after section 101A (7 U.S.C. 1441-1) the following new section:

"SEC. 101B. (a) LOANS AND PURCHASES.—(1) IN GENERAL.—Except as provided in paragraph (2), the Secretary shall make available to producers nonrecourse loans and purchases for each of the 1991 through 1995 crops of rice at a level that is not less than the higher of—

"(A) 85 percent of the simple average price received by producers, as determined by the Secretary, during the marketing years for the immediately preceding 5 crops of rice, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period; or

"(B) $6.50 per hundredweight.

"(2) LIMITATION ON DECREASE IN LOAN LEVEL.—The loan level for any crop of rice determined under paragraph (1) may not be reduced by more than 5 percent from the level determined for the preceding crop.

"(3) ANNOUNCEMENT OF LOAN LEVEL AND ESTABLISHED PRICE.—The loan and purchase level and the established price for each of the 1991 through 1995 crops of rice shall be announced not later than January 31 of each calendar year for the crop harvested in such calendar year.

"(4) LENGTH OF TERMS OF NONRECOURSE LOANS.—A loan made under this section shall

have a term of not more than 9 months beginning after the month in which the application for the loan is made.

"(5) MARKETING LOAN.—(A) IN GENERAL.—The Secretary shall permit a producer to repay a loan made under paragraph (1) for a crop at a level that is the lesser of—

"(i) the loan level determined for such crop; or

"(ii) the higher of—

"(I) the loan level determined for such crop multiplied by 70 percent; or

"(II) the prevailing world market price for rice, as determined by the Secretary.

"(B) DETERMINATION OF PREVAILING WORLD MARKET PRICE.—The Secretary shall prescribe by regulation—

"(i) a formula to define the prevailing world market price for rice; and

"(ii) a mechanism by which the Secretary shall announce periodically the prevailing world market price for rice.

"(C) PRODUCER PURCHASE OF NEGOTIABLE MARKETING CERTIFICATES.—(i) As a condition of permitting a producer to repay a loan as provided in subparagraph (A), the Secretary may require a producer to purchase marketing certificates equal in value to an amount that does not exceed one-half the difference, as determined by the Secretary, between the amount of the loan obtained by the producer and the amount of the loan repayment. Such certificates shall be negotiable.

"(ii) Such certificates shall be redeemable for agricultural commodities or products thereof owned by the Commodity Credit Corporation valued at the prevailing market price, as determined by the Secretary.

"(iii) The Commodity Credit Corporation, under regulations prescribed by the Secretary, shall assist any person receiving marketing certificates under this subparagraph in the redemption or marketing of such certificates. Insofar as practicable, the Secretary shall permit an owner of a certificate to designate the storage facility at which such owner would prefer to receive agricultural commodities or products thereof in exchange for such certificate.

"(iv) If any such certificate is not presented for redemption or marketing within a reasonable number of days after issuance, as determined by the Secretary, reasonable costs of storage and other carrying charges, as determined by the Secretary, shall be deducted from the value of the certificate for the period beginning after such reasonable number of days and ending with the date of the presentation of such certificate to the Commodity Credit Corporation.

"(6) SIMPLE AVERAGE PRICE DETERMINATION.—For purposes of this section, the simple average price received by producers for the immediately preceding marketing year shall be based on the latest information available to the Secretary at the time of the determination.

"(b) PAYMENTS FOR FORGOING LOAN OR PURCHASE.—(1) IN GENERAL.—The Secretary shall, for each of the 1991 through 1995 crops of rice, make payments available to producers who, although eligible to obtain a loan or purchase agreement under subsection (a), agree to forgo obtaining such loan or agreement in return for such payments.

"(2) COMPUTATION.—A payment under this subsection shall be computed by multiplying—

"(A) the loan payment rate; by

"(B) the quantity of rice the producer is eligible to place under loan.

"(3) QUANTITY ELIGIBLE.—For purposes of this subsection, the quantity of rice eligible to be placed under loan may not exceed the product obtained by multiplying—

"(A) the individual farm program acreage for the crop; by

"(B) the actual yield per harvested acre for the farm.

"(4) LOAN PAYMENT RATE.—For purposes of this subsection, the loan payment rate shall be the amount by which—

"(A) the loan level determined for such crop under subsection (a); exceeds

"(B) the level at which a loan may be repaid under subsection (a).

"(5) PAYMENT IN NEGOTIABLE MARKETING CERTIFICATES.—The Secretary may make up to one-half the amount of a payment under this subsection available in the form of negotiable marketing certificates, subject to the terms and conditions provided in subsection (a)(5)(C).

"(c) DEFICIENCY PAYMENTS.—(1) IN GENERAL.—(A) COMPUTATION.—The Secretary shall make available to producers payments (to be known as 'deficiency payments') for each of the 1991 through 1995 crops of rice in an amount computed by multiplying—

"(i) the payment rate; by

"(ii) the individual farm program acreage; by

"(iii) the farm program payment yield established for the crop for the farm.

"(B) 0/92 AND 50/92 PROGRAMS.—(i) If an acreage limitation program under subsection (e)(2) is in effect for a crop of rice and the producers on a farm devote a portion of the permitted rice acreage of the farm (as determined in accordance with subsection (e)(2)(A)) equal to more than 8 percent of the permitted rice acreage of the farm for the crop to conservation uses (except as provided in subparagraph (F))—

"(I) such portion of the permitted rice acreage in excess of 8 percent of such acreage devoted to conservation uses (except as provided in subparagraph (F)) shall be considered to be planted to rice for the purpose of determining the individual farm program acreage in accordance with subsection (e)(2)(E) and for the purpose of determining the acreage on the farm required to be devoted to conservation uses in accordance with subsection (e)(2)(D); and

"(II) the producers shall be eligible for payments under this paragraph on such acreage, subject to the compliance of the producers with clause (ii).

"(ii)(I) To be eligible for payments under clause (i), except as provided in subclause (II) and clause (iv), the producers on a farm must actually plant rice for harvest on at least 50 percent of the permitted rice acreage of the farm.

"(II) The Secretary may waive the 50 percent planting requirement in subclause (I) for any crop of rice.

"(iii) Notwithstanding any other provision of this section, any producer who elects to devote a portion (or, where the Secretary exercises the waiver authority under clause (ii)(II), all) of the permitted rice acreage of the farm to conservation uses (or other uses as provided in subparagraph (F)), under this subparagraph shall receive deficiency payments on the acreage that is considered to be planted to rice and eligible for payments under this subparagraph for such crop at a rate established by the Secretary, except that such rate may not be established at less than the projected deficiency payment rate for the crop, as determined by the Secretary. Such projected payment rate for the crop shall be announced by the Secretary prior to the period during which rice producers may agree to participate in the program for such crop.

"(iv) If a State or local agency has imposed in an area of a State or county a quarantine on the planting of rice for harvest on farms in such area, the State committee established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) may recommend to the Secretary that payments be made under this paragraph to producers in such area who were required to forgo the planting of rice for harvest on acreage to alleviate or eliminate the condition requiring such quarantine. If the Secretary determines that such condition exists, the Secretary may make payments under this paragraph to such producers. To be eligible for payments under this clause, such producers must devote such acreage to conservation uses (except as provided in subparagraph (F)).

"(v) If an acreage limitation program under subsection (e) is in effect for any crop of rice and if the Secretary determines that producers on a farm are prevented from planting the acreage intended for rice to rice because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make available to such producers payments computed as provided in paragraph (1)(A). Producers shall be eligible for such payments if a portion (or all) of the permitted rice acreage of the farm is devoted to conservation uses (except as provided in paragraph (F)). Such acreage equal to more than 8 percent of the permitted rice acreage of the farm for the crop shall be considered to be planted to rice for the purpose of determining the individual farm program acreage in accordance with subsection (e)(2)(E) and for the purpose of determining the acreage on the farm required to be devoted to conservation uses in accordance with subsection (e)(2)(D). The provisions of clauses (iii) and (vi) shall apply to any such producers.

"(vi) The rice crop acreage base and rice farm program payment yield of the farm shall not be reduced due to the fact that such portion (or all) of the permitted acreage of the farm was devoted to conserving uses (except as provided in subparagraph (F)).

"(vii) Other than as provided in clauses (i) through (v), payments may not be made under this paragraph for any crop on a greater acreage than the acreage actually planted to rice.

"(viii) Any acreage considered to be planted to rice in accordance with clauses (i) and (v) may not also be designated as conservation use acreage for the purpose of fulfilling any provisions under any acreage limitation or land diversion program requiring that the producers devote a specified acreage to conservation uses.

"(C) PAYMENT RATE.—The payment rate for rice shall be the amount by which the established price for the crop of rice exceeds the higher of—

"(i) the national average market price received by producers during the first 5 months of the marketing year for such crop, as determined by the Secretary; or

"(ii) the loan level determined for such crop.

"(D) MINIMUM ESTABLISHED PRICE.—The established price for rice shall not be less than $10.71 per hundredweight.

"(E) REDUCTION FOR DISASTER PAYMENTS.—The total quantity of rice on which payments would otherwise be payable to a producer on a farm for any crop under this paragraph shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under paragraph (2).

"(F) ALTERNATIVE CROPS.—The Secretary may permit, subject to such terms and con-

ditions as the Secretary may prescribe, all or any part of acreage otherwise required to be devoted to conservation uses as a condition of qualifying for payments under subparagraph (B) to be devoted to sweet sorghum or the production of guar, sesame, safflower, sunflower, rapeseed, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, rye, commodities for which no substantial domestic production or market exists but that could yield industrial raw material being imported, or likely to be imported, into the United States, or commodities grown for experimental purposes (including kenaf), subject to the following sentence. The Secretary may permit such acreage to be devoted to such production only if the Secretary determines that—

"(i) the production is not likely to increase the cost of the price support program and will not affect farm income adversely; and

"(ii) the production is needed to provide an adequate supply of the commodity, or, in the case of commodities for which no substantial domestic production or market exists but that could yield industrial raw materials, the production is needed to encourage domestic manufacture of such raw material and could lead to increased industrial use of such raw material to the long-term benefit of United States industry.

"(2) DISASTER ASSISTANCE.—(A) PREVENTED PLANTING PAYMENTS.—(i) Except as provided in subparagraph (C), if the Secretary determines that the producers on a farm are prevented from planting any portion (or all) of the acreage intended for rice to rice or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the producers in an amount equal to the product obtained by multiplying—

"(I) the number of acres so affected but not to exceed the acreage planted to rice for harvest (including any acreage that the producers were prevented from planting to rice or other nonconserving crops in lieu of rice because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year; by

"(II) 75 percent of the farm program payment yield established for the farm by the Secretary; by

"(III) a payment rate equal to 33⅓ percent of the established price for the crop.

"(ii) Payments made by the Secretary under this subparagraph may be made in the form of cash or in such other form as the Secretary is authorized by law to make.

"(B) REDUCED YIELD PAYMENTS.—Except as provided in subparagraph (C), if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of rice that the producers are able to harvest on any farm is less than the result of multiplying 75 percent of the farm program payment yield established for the farm for such crop by the acreage planted for harvest for such crop, the Secretary shall make a reduced yield disaster payment to the producers at a rate equal to 33⅓ percent of the established price for the crop for the deficiency in production below 75 percent for the crop.

"(C) LIMITATION DUE TO CROP INSURANCE.—Producers on a farm shall not be eligible for—

"(i) prevented planting disaster payments under subparagraph (A), if prevented planting crop insurance is available to the producers under the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.) with respect to the rice acreage of the producers; or

"(ii) reduced yield disaster payments under subparagraph (B), if reduced yield crop insurance is available to the producers under such Act with respect to the rice acreage of the producers.

"(D) EXCEPTION FROM LIMITATION.—(i) Notwithstanding subparagraph (C), the Secretary may make a disaster payment to producers on a farm under this paragraph if the Secretary determines that—

"(I) as the result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the producers have suffered substantial losses of production either from being prevented from planting rice or other nonconserving crops or from reduced yields;

"(II) such losses have created an economic emergency for the producers;

"(III) crop insurance indemnity payments under the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.) and other forms of assistance made available by the Federal Government to such producers for such losses is insufficient to alleviate such economic emergency; and

"(IV) additional assistance must be made available to such producers to alleviate such economic emergency.

"(ii) The Secretary may make such adjustments in the amount of payments made available under this paragraph with respect to an individual farm so as to assure the equitable allotment of such payments among producers, taking into account other forms of Federal disaster assistance provided to the producers for the crop involved.

"(d) FARM PROGRAM PAYMENT YIELDS.—The farm program payment yields for farms for each crop of rice shall be determined under title V.

"(e) PROGRAMS TO REDUCE ACREAGE.—(1) IN GENERAL.—(A) EXCESSIVE SUPPLY.—Notwithstanding any other provision of this Act, if the Secretary determines that the total supply of rice, in the absence of an acreage limitation program, will be excessive taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency, the Secretary may provide for any crop of rice an acreage limitation program as described in paragraph (2).

"(B) CONSIDERATION OF CONSERVATION RESERVE.—In making a determination under subparagraph (A), the Secretary shall take into consideration the number of acres placed in the conservation acreage reserve established under section 1231 of the Food Security Act of 1985 (16 U.S.C. 3831).

"(C) ANNOUNCEMENT OF PROGRAM.—If the Secretary elects to put an acreage limitation program into effect for any crop year, the Secretary shall announce any such program not later than January 31 of the calendar year in which the crop is harvested.

"(D) RATIO OF CARRY-OVER TO TOTAL DISAPPEARANCE.—The Secretary shall carry out an acreage limitation program described in paragraph (2) for a crop of rice in a manner that will result in carry-over stocks equal to between sixteen and one-half and twenty percent of the simple average of the total disappearance of rice for each of the three marketing years preceding the year for which the announcement is made. For the purpose of this subparagraph, "total disappearance" means all rice utilization, including total domestic, total export, and total residual disappearance.

"(2) ACREAGE LIMITATION PROGRAM.—(A) UNIFORM PERCENTAGE REDUCTION.—If a rice acreage limitation program is announced under paragraph (1), such limitation shall be achieved by applying a uniform percentage reduction (not to exceed 35 percent) to the rice crop acreage base for the crop for each rice-producing farm.

"(B) ENFORCEMENT.—Except as provided in subsection (g), producers who knowingly produce rice in excess of the permitted rice acreage for the farm, as established in accordance with subparagraph (A), shall be ineligible for rice loans, purchases, and payments with respect to that farm.

"(C) CROP ACREAGE BASES.—Rice crop acreage bases for each crop of rice shall be determined under title V.

"(D) CONSERVATION USE ACREAGE.—(i) A number of acres on the farm shall be devoted to conservation uses, in accordance with regulations issued by the Secretary. Such number shall be determined by dividing—

"(I) the product obtained by multiplying the number of acres required to be withdrawn from the production of rice times the number of acres planted to such commodity; by

"(II) the number of acres authorized to be planted to such commodity under the limitation established by the Secretary.

"(ii) The number of acres determined under clause (i) is hereafter in this subsection referred to as 'reduced acreage'.

"(E) FARM PROGRAM ACREAGE.—Except as provided in subsection (c)(1)(B), the individual farm program acreage shall be the acreage planted on the farm to rice for harvest within the permitted rice acreage for the farm as established under this paragraph.

"(3) USE OF CONSERVATION ACREAGE.—(A) PROTECTION FROM WEEDS AND EROSION.—The regulations issued by the Secretary under paragraph (2) with respect to acreage required to be devoted to conservation uses shall assure protection of such acreage from weeds and wind and water erosion.

"(B) PERMITTED PLANTINGS.—The Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of such acreage to be devoted to sweet sorghum, or the production of guar, sesame, safflower, sunflower, rapeseed, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, rye, or other commodity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not affect farm income adversely.

"(C) HAYING AND GRAZING.—(i) Except as provided in clause (ii), haying and grazing of acreage designated as conservation use acreage for the purpose of meeting any requirements established under an acreage limitation program (including a program conducted under subsection (c)(1)(B)), or land diversion program established under this section shall be permitted, except during any consecutive 5-month period that is established by the State committee established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) for a State. Such 5-month period shall be established during the period beginning April 1, and ending October 31, of a year.

"(ii) In the case of a natural disaster, the Secretary may permit unlimited haying and grazing on such acreage.

"(4) LAND DIVERSION PROGRAM.—(A) PAYMENTS.—The Secretary may make land diversion payments to producers of rice, whether or not an acreage limitation program for

rice is in effect, if the Secretary determines that such land diversion payments are necessary to assist in adjusting the total national acreage of rice to desirable goals. Such land diversion payments shall be made to producers who, to the extent prescribed by the Secretary, devote to approved conservation uses an acreage of cropland on the farm in accordance with land diversion contracts entered into by the Secretary with such producers.

"(B) BIDS FOR CONTRACTS.—The amounts payable to producers under land diversion contracts may be determined through the submission of bids for such contracts by producers in such manner as the Secretary may prescribe or through such other means as the Secretary determines appropriate. In determining the acceptability of contract offers, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producers and the productivity of the acreage diverted.

"(C) LIMITATION ON DIVERTED ACREAGE.—The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(5) WILDLIFE USES FOR REDUCED AND DIVERTED ACREAGE.—(A) IN GENERAL.—The reduced acreage and additional diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies.

"(B) COST SHARING.—The Secretary may pay an appropriate share of the cost of practices designed to carry out the purposes of subparagraph (A).

"(C) ENCOURAGEMENT OF PUBLIC ACCESS.—The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe, by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(6) PARTICIPATION AGREEMENTS.—(A) IN GENERAL.—An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such participation not later than such date as the Secretary may prescribe.

"(B) MODIFICATION OR TERMINATION.—The Secretary may, by mutual agreement with producers on a farm, terminate or modify any such agreement if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(f) ONE-HALF ACREAGE REDUCTION PROGRAM.—(1) IN GENERAL.—The Secretary may, for each of the 1991 through 1995 crops of rice, make payments available to producers who meet the requirements of this subsection.

"(2) FORM OF PAYMENT.—Such payments may be—

"(A) made in the form of rice owned by the Commodity Credit Corporation; or

"(B) made in such other form as the Secretary is authorized by law to make.

"(3) DETERMINATION OF PAYMENT.—(A) IN GENERAL.—Payments under this subsection shall be determined in the same manner as provided in subsection (b).

"(B) QUANTITY OF RICE MADE AVAILABLE.—The quantity of rice to be made available to a producer under this subsection shall be equal in value to the payments so determined under such subsection.

"(4) ELIGIBILITY.—A producer shall be eligible to receive a payment under this subsection for a crop if the producer—

"(A) agrees to forgo obtaining a loan or purchase agreement under subsection (a);

"(B) agrees to forgo receiving payments under subsection (c);

"(C) does not plant rice for harvest in excess of the crop acreage base reduced by one-half of any acreage required to be diverted from production under subsection (f); and

"(D) otherwise complies with this section.

"(g) EQUITABLE RELIEF.—(1) LOANS AND PAYMENTS.—If the failure of a producer to comply fully with the terms and conditions of the program formulated under this section precludes the making of loans, purchases, and payments, the Secretary may, nevertheless, make such loans, purchases, and payments in such amounts as the Secretary determines are equitable in relation to the seriousness of the failure. The Secretary may consider whether the producer made a good faith effort to comply fully with the terms and conditions of such program in determining whether equitable relief is warranted under this paragraph.

"(2) DEADLINES AND PROGRAM REQUIREMENTS.—The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not affect adversely the operation of the program.

"(h) REGULATIONS.—The Secretary may issue such regulations as the Secretary determines necessary to carry out this section.

"(i) COMMODITY CREDIT CORPORATION.—The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(j) ASSIGNMENT OF PAYMENTS.—The provisions of section 8(g) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(g)) (relating to assignment of payments) shall apply to payments under this section.

"(k) EQUITABLE SHARING OF PAYMENTS.—The Secretary shall provide for the sharing of payments made under this section for any farm among the producers on the farm on a fair and equitable basis.

"(l) TENANTS AND SHARECROPPERS.—The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers.

(m) PROHIBITIONS.—(1) CROSS COMPLIANCE.—(A) IN GENERAL.—Notwithstanding any other provision of law, compliance on a farm with the terms and conditions of any other commodity program, or compliance with crop base acreage requirements for any other commodity, may not be required as a condition of eligibility for loans, purchases, or payments under this section.

"(B) CROP ACREAGE BASE INCREASES.—If a producer on a farm is participating in the rice program under this section, the crop acreage base for any other commodity for the farm may not be increased if such commodity is produced on the farm in a manner that is not in compliance with—

"(i) the terms and conditions of the applicable commodity program for such commodity; or

"(ii) the crop acreage base requirements of the applicable commodity program for such commodity.

"(2) OFFSETTING COMPLIANCE.—The Secretary may not require producers on a farm, as a condition of eligibility for loans, purchases, or payments under this section for such farm, to comply with the terms and conditions of the rice program with respect to any other farm operated by such producers.".

SEC. 302. MARKETING CERTIFICATES.

(a) IN GENERAL.—Notwithstanding any other provision of law, whenever, during the period beginning August 1, 1991, and ending July 31, 1996, the world price for a class of rice (adjusted to United States qualities and location), as determined by the Secretary of Agriculture, is below the current loan repayment rate for that class of rice, to make United States rice competitive in world markets and to maintain and expand exports of rice produced in the United States, the Commodity Credit Corporation, under such regulations as the Secretary may prescribe, shall make payments, through the issuance of negotiable marketing certificates, to persons who have entered into an agreement with the Commodity Credit Corporation to participate in the program established under this section. Such payments shall be made in such monetary amounts and subject to such terms and conditions as the Secretary determines will make rice produced in the United States available at competitive prices consistent with the purposes of this section.

(b) VALUE OF CERTIFICATES.—The value of each certificate issued under subsection (a) shall be based on the difference between—

(1) the loan repayment rate for the class of rice; and

(2) the prevailing world market price for the class of rice, as determined by the Secretary of Agriculture under a published formula submitted for public comment before its adoption.

(c) REDEMPTION OF CERTIFICATES.—The Commodity Credit Corporation, under regulations prescribed by the Secretary of Agriculture, shall assist any person receiving marketing certificates under this section in the redemption of certificates for cash, or marketing or exchange of such certificates for agricultural commodities or the products thereof owned by the Commodity Credit Corporation, at such times, in such manner, and at such price levels as the Secretary determines will best effectuate the purposes of the program established under this section. Notwithstanding any other provision of law, any price restrictions that may otherwise apply to the disposition of agricultural commodities by the Commodity Credit Corporation shall not apply to the redemption of certificates under this section.

(d) COMMODITY DESIGNATION; STORAGE COSTS.—Insofar as practicable, the Secretary shall permit owners of certificates to designate the commodities and the products thereof, including storage sites thereof, such owners would prefer to receive in exchange for certificates. If any certificate is not presented for redemption, marketing, or exchange within a reasonable number of days after the issuance of such certificate (as determined by the Secretary), reasonable costs of storage and other carrying charges, as determined by the Secretary, shall be deducted from the value of the certificate for the period beginning after such reasonable number of days and ending with the date of the presentation of such certificate to the Commodity Credit Corporation.

(e) PREVENTION OF POTENTIAL ADVERSE AFFECTS.—The Secretary of Agriculture shall

take such measures as may be necessary to prevent the marketing or exchange of agricultural commodities and the products thereof for certificates under this section from adversely affecting the income of producers of such commodities or products.

(f) TRANSFERABILITY.—Under regulations prescribed by the Secretary of Agriculture, certificates issued to rice exporters under this section may be transferred to other exporters and persons approved by the Secretary.

Mr. HUCKABY. Mr. Chairman, I move to strike the last word. Title III is the rice provisions of the new 1990 farm bill. Like cotton, rice had a new program in 1985, a market loan program. It has worked very well. We have seen rice exports increase more than 30 percent today compared to 1985.

Mr. Chairman, the rice program, the provisions before Members, freezes the target price, freezes the support price for the next 5 years. Each year the target price will be $10.71. The loan rate will continue to be maintained at $6.50, minimum, and 85 percent of the past market price.

Just as in the cotton, Mr. Chairman, we establish a target prime inventory to control inventory so we could control and have some influence on the price in the marketplace. We set up stock-to-use ratio, which I think is a step in the right direction.

The rice program has continued, has shown strong result in 1985. We basically continue the same thrust of 1990 through 1995, freezing the support levels. I urge Members to adopt this.

Mr. Chairman, I yield to the gentleman from Minnesota [Mr. STANGELAND].

Mr. STANGELAND. Mr. Chairman, I want to salute the gentleman from Louisiana [Mr. HUCKABY] for his leadership in this rice title. Once again, we have come to a consensus where we have a rice title that is again supported by all segments of the industry.

We have to understand that rice production is highly mechanized, requiring large capital investments, probably the greatest of any of the commodities. From 70 to 75 percent of rural exports are controlled by five countries, with the United States and Thailand accounting for over one-half of this.

Rice is a big commodity in this country. The marketing loan prices of the 1985 farm bill made U.S. commercial exports more competitive. We believe that marketing loan has proven to be an effective and efficient marketing tool for rice. This title is within budget. It builds on the success of the 1985 farm bill. I urge our colleagues to support this title as written by the committee.

EN BLOC AMENDMENTS OFFERED BY MR. DE LA GARZA

Mr. DE LA GARZA. Mr. Chairman, I offer amendments en bloc.

The Clerk read as follows:

En bloc amendments offered by Mr. DE LA GARZA: On page 106, strike lines 22 through 24 and insert "sorghum or the production of guar, sesame, castor beans, crambe, plantago ovato, triticale, rye, commodities for which no".

On page 114, line 12, insert after the period the following: "The Secretary may not exclude irrigated or irrigable acreage not planted in alfalfa when exercising the authority under this clause.".

TITLE III—RICE

Section 301 is amended—

(1) by inserting on page 96, line 21 after the word "producers" the following: "including such condition resulting from the adjudication of Indian water settlement disputes,".

(2) by inserting on page 98, line 18 after the word "producers" the following: "including such condition resulting from the adjudication of Indian water settlement disputes,".

(3) by inserting on page 98, line 20 after the word "producers" the following: "including such condition resulting from the adjudication of Indian water settlement disputes,".

Mr. DE LA GARZA (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore (Mr. ALEXANDER). Is there objection to the request of the gentleman from Texas?

There was no objection.

□ 1410

Mr. DE LA GARZA. Mr. Chairman, if I might, at this point let me take just a moment to commend the members of the subcommittee, the chairman and the ranking member, for the excellent manner in which they have handled the rice commodity in the bill. This is a very important commodity for us. We have problems with some of our trading partners.

Actually what we need is to get more people to eat rice. I hope everyone goes out and eats more rice. It is good for you, good for your heart, good for your cholesterol, good for everything that ails you.

But we have to intercede in behalf of our producers, and our colleagues have done an excellent job in this respect.

My amendment, Mr. Chairman, is the Sarpalius, which allows discretion to the Secretary, and it embraces the Thomas amendment which deals with the water owned by the Indians in Wyoming and the general technical amendments.

I might add to my colleagues that this amendment will have to be offered to all the titles. That is the extent of the amendment, and I would ask for a vote on it at this time.

Mr. STANGELAND. Mr. Chairman, I rise in support of the amendment offered by the chairman of the committee.

We have looked at the amendment. It is noncontroversial in nature. We support it and believe it ought to be made part of the package.

The CHAIRMAN pro tempore (Mr. ALEXANDER). The question is on the en bloc amendments, offered by the gentleman from Texas [Mr. DE LA GARZA].

The en bloc amendments was agreed to.

The CHAIRMAN pro tempore. Are there other amendments to title III?

If not, the Clerk will designate title IV.

The text of title IV is as follows:

TITLE IV—DAIRY

SEC. 401. FINDINGS.

Congress finds that—

(1) United States dairy policy should foster an economic environment in which milk producers have the opportunity to receive a satisfactory return for their labor and investment;

(2) the Federal support price should establish a minimum price which guarantees an adequate supply of wholesome milk;

(3) the Federal dairy program should foster the use of a component based price support system to more readily reflect market demands and better communicate the economic composition of milk and products derived from milk;

(4) market forces, together with appropriate adjustments in the government support price and standby milk production reduction programs, should balance supply and demand for milk and dairy products;

(5) Federal dairy support programs should embody the notion that the market for dairy products is national in scope;

(6) United States milk producers should be treated equally under Federal laws that compel the Secretary to purchase dairy products under the price support program;

(7) an alternative milk production reduction program should be used only when price changes alone will not balance supply with demand within a reasonable time period without greatly disrupting the market for dairy products; and

(8) factors such as the cost of the program, the program's effect on other agricultural segments, the economic conditions in agriculture and fiscal goals should be considered when an alternative inventory management program is considered.

SEC. 402. MILK PRICE SUPPORT AND INVENTORY MANAGEMENT PROGRAM FOR CALENDAR YEARS 1991 THROUGH 1995.

Section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446) is amended by amending subsection (e) to read as follows:

"(e) Notwithstanding any other provision of law—

"(1) During the period beginning on January 1, 1991 and ending on December 31, 1995, the price of milk shall be supported as provided in this subsection.

"(2)(A) During the period beginning on January 1, 1991 and ending on December 31, 1995, the price of milk shall be supported at a rate not less than $10.10 per hundredweight for milk containing 3.67 percent milkfat.

"(B)(i) The price of milk shall be supported through the purchase of milk and the products of milk.

"(ii) The Commodity Credit Corporation price support for each of the products butter, cheese and nonfat dry milk, respectively, announced by the Corporation shall be the same for all of that product sold by persons offering to sell such product to the Corpora-

tion. Such purchase prices shall be sufficient to enable plants of average efficiency receiving such prices for dairy products to pay producers, on average, a price not less than the rate of price support for milk in effect during such twelve-month period under this paragraph.

"(iii) In carrying out this section, the Secretary shall offer to purchase butter for not more than an amount per pound of $0.8150 in fiscal years 1991 through 1993, and $0.7875 in fiscal years 1994 and 1995, and shall offer to purchase nonfat dry milk at such a level that results in milk being supported at the level prescribed in subparagraph (A) as adjusted under paragraph (3), except that the Secretary may allocate the rate of price support between the purchase prices for nonfat dry milk and butter in such other manner as the Secretary determines will result in the lowest level of expenditures by the Commodity Credit Corporation and shall notify the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate of such determination.

"(3)(A)(i) If for any of the fiscal years 1992 through 1996, the level of purchases of milk and the products of milk by the Commodity Credit Corporation under this subsection (less sales under section 407 for unrestricted use), as estimated by the Secretary on August 1 of the preceding fiscal year, will exceed 5 billion pounds, milk equivalent, total milk solids basis, the Secretary shall decrease by an amount per hundredweight of at least $0.25 but not more than $0.50 the rate of price support for milk in effect for such fiscal year.

"(ii) The Secretary shall, by August 1 of the preceding fiscal year, notify the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate of any proposed decrease in price support under this subparagraph.

"(B)(i) If for any of the fiscal years 1992 through 1996, the level of purchases of milk and the products of milk by the Commodity Credit Corporation under this subsection (less sales under section 407 for unrestricted use), as estimated by the Secretary on August 1 of the preceding fiscal year, will not exceed 3.5 billion pounds, milk equivalent, total milk solids basis, the Secretary shall increase by an amount per hundredweight of at least $0.25 the rate of price support for milk in effect for such fiscal year.

"(ii) The Secretary shall, by August 1 of the preceding fiscal year, notify the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate of any proposed increase in price support under this subparagraph.

"(C) If for any of the fiscal years 1992 through 1996, the level of purchases of milk and the products of milk by the Commodity Credit Corporation under this subsection (less sales under section 407 for unrestricted use), as estimated by the Secretary on August 1 of the preceding fiscal year, will be less than 5 billion pounds, milk equivalent, total milk solids basis, but more than 3.5 billion pounds of milk equivalent, total milk solids basis, the Secretary shall not decrease the rate of price support for milk in effect for such fiscal year.

"(D) Notwithstanding any other provision of this subsection, in no event shall the price of milk be supported at less than $10.10 per hundredweight.

"(E)(i) As used in this subsection, the term 'milk equivalent, total milk solids basis', of milk and the products of milk purchased by the Commodity Credit Corporation shall be equal to the weighted-average of the milk equivalents, as computed on a milkfat basis, and on a milk solids not fat basis, of such products, with weighting factors equal to not more than 40 percent for the milk equivalent, milkfat basis, and not more than 70 percent for the milk equivalent, milk solids not fat basis. Such weighting factors shall total 100 percent.

"(ii) The Secretary shall issue a proposed rule defining 'total milk solids basis' no later than 30 days after enactment of this subsection, shall provide notice and reasonable opportunity for public comment, and shall issue a final rule defining 'total milk solids basis' no later than 90 days after enactment of this subsection.

"(iii) In estimating the level of purchases of milk and the products of milk under this subsection, the Secretary shall deduct the amount, if any, by which the level of imports into the United States of milk and the products of milk during the most recent calendar year exceeds the annual average level of imports into the United States of milk and the products of milk during the period January 1, 1986, through December 31, 1990, milk equivalent, total milk solids basis.

"(4)(A) Within 180 days of enactment of this subsection, the Secretary shall submit to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate, a report that—

"(i) recommends an inventory management program to be implemented when Commodity Credit Corporation purchases of milk and the products of milk are projected to exceed 7 billion pounds of milk equivalent, total milk solids basis, in any fiscal year;

"(ii) evaluates two-tier pricing systems, or a plan to achieve equivalent results;

"(iii) does not evaluate any termination or diversion program;

"(iv) does not evaluate the use of assessments as a mechanism to decrease price support levels; and

"(v) seeks, among other things, methods to reduce any excessive surplus of milk, lower costs to the Commodity Credit Corporation, and to provide for the orderly marketing of surplus milk.

"(B) The report submitted under subparagraph (A) shall include, but is not limited to, the following topics:

"(i) the difficulties and possible resolutions associated with the disposition and orderly marketing of milk priced at a price lower than the world market price through various marketing channels including export markets and domestic donation feeding programs;

"(ii) the establishment of a Class IV price for milk;

"(iii) the impact of a Class IV system on the Federal milk marketing order system;

"(iv) the impact of a system similar to the Class IV system on non-Federal milk marketing order milk; and

"(v) plans to achieve desired results other than through a two-tiered pricing system.

"(C)(i) If for any of the fiscal years 1992 through 1995, the level of purchases of milk and the products of milk by the Commodity Credit Corporation under this subsection (less sales under section 407 for unrestricted use), as estimated by the Secretary on August 1 of the preceding fiscal year, will exceed 7 billion pounds of milk equivalent, total milk solids basis, the Secretary shall, except as provided in clause (ii), implement for such fiscal year the inventory management program recommended in subparagraph (A).

"(ii) The Secretary shall not implement the inventory management program recommended in subparagraph (A) before the later of January 1, 1992, or the date 6 months after the submission of the report required under subparagraph (A).

"(iii) If the Secretary is required to implement during a fiscal year an inventory management program, the Secretary shall, by August 1 of the preceding fiscal year, notify the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate of the type of inventory management program to be implemented.

"(iv) Not later than January 1 of any fiscal year that an inventory management program is in effect, the Secretary shall submit to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate a certification, including a statement of facts in support of such certification, that such inventory management program will achieve a reduction in the production or marketing of milk for commercial purposes by program participants such that purchases of milk and the products of milk by the Commodity Credit Corporation, as estimated by the Secretary, for the fiscal year will not be greater than 7 billion pounds, milk equivalent, total milk solids basis.

"(D) If the Secretary is required to establish and carry out an inventory management program for milk, the Secretary shall not offer to enter into a contract with any producer of milk in the United States for the purpose of selling for slaughter any dairy cattle in which such producer owns an interest.".

SEC. 403. MILK MANUFACTURING MARGIN STUDY.

(a) STUDY.—The Secretary of Agriculture shall direct the Agricultural Marketing Service of the United States Department of Agriculture to conduct a study of state milk pricing programs for submission to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate, not later than one year after enactment of this Act.

(b) EVALUATION.—The study submitted under subsection (a) shall evaluate—

(1) the objectives, rational, and operation of State milk pricing programs;

(2) the impacts on Federal Government programs, the dairy industry, and consumers, of State manufacturing allowances in States currently operating under State milk pricing programs, including a comparative analysis under the alternative allowance levels of farm and retail level prices, production levels, the supply-demand balance, and the cost of the Federal dairy price support program;

(3) the extent to which over-order premiums under federal milk marketing orders compensate for the low federal manufacturing allowances; and

(4) comparative plant operating cost data, including labor, utilities and product yields and other specialized factors in any State that has a manufacturing allowance different from the Federal manufacturing allowance.

(c) PROHIBITION.—If the Secretary finds, as a result of the study conducted pursuant to subsection (a), and after considering all the factors enumerated in subsection (b), that a

State's use of a manufacturing allowance that is different from the Federal manufacturing allowance used for purposes of price support purchases under section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446) has an adverse effect on the operation of the Federal dairy program, and that manufacturing cost and yield data from that same State, audited by that State and presented at public hearings in that State do not justify different manufacturing allowances in that State, then the Secretary may, after conducting public hearings and providing for a public comment period not less than 90 days from the conclusion of such hearings, prohibit that State from using an allowance which is different from the Federal manufacturing allowance to establish a price for Grade A milk for manufacturing butter, non-fat dry milk, or cheese.

(d) APPEAL.—Any State that is prohibited from establishing a manufacturing allowance different from the Federal manufacturing allowance may file an appeal with the Secretary under procedures provided for under title 5 of the United States Code 556 et seq.

SEC. 404. MINNESOTA-WISCONSIN PRICE SERIES REFORM.

(a) INITIATE REFORM.—Within 60 days of enactment of this Act, the Secretary of Agriculture shall commence to accept alternative pricing formula recommendations, as they may relate to the Minnesota-Wisconsin price series used to determine the minimum prices paid under milk marketing orders, in order to amend such milk marketing orders authorized under section 8c of the Agricultural Adjustment Act, reenacted with amendments by the Agricultural Marketing Agreement Act of 1937. Among the alternative pricing formulas to be considered by the Secretary shall be a price series based on prices paid by milk processors for Grade A milk and manufacturing grade milk that is used in the manufacture of dairy products.

(b) AVAILABILITY OF DATA.—The Secretary shall compile and make available to the public the historical and current data used to compare the alternative pricing formulas submitted and recommended as provided in subsection (a) with the existing Minnesota-Wisconsin price series.

(c) DEADLINE.—(1) Not later than October 1, 1991, the Secretary shall publish in the Federal Register a proposed replacement price series and shall give notice and 30 days for public comment on such proposal. At the end of the comment period the Secretary shall publish a final rule and report such rule to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate. Not less than 30 legislative days after publication of the final rule, the Secretary shall implement the new Minnesota-Wisconsin price series in the federal milk marketing orders as provided under section 8c of the Agricultural Adjustment Act, reenacted with amendments by the Agricultural Marketing Agreement Act of 1937.

(2) For purposes of this section "legislative day" shall mean a day on which either House of Congress is in session.

SEC. 405. HEARINGS ON FEDERAL MILK MARKETING ORDERS.

The Secretary of Agriculture shall conclude the national hearings announced by the Secretary on March 29, 1990, regarding possible changes in the pricing provisions of federal milk marketing orders in order to effect any changes in the federal orders setting minimum prices that milk processors must pay for Grade A milk received from producers, by January 1, 1992.

SEC. 406. REPORT OF DAIRY PRODUCT PURCHASES.

The Secretary of Agriculture shall make available to the public quarterly evaluations of the acquisition and disposal of Commodity Credit Corporation purchases of dairy products.

SEC. 407. APPLICATION OF SUPPORT PRICE FOR MILK.

For purposes of supporting the price of milk under section 201(e) of the Agricultural Act of 1949 (7 U.S.C. 1446(e)), the Secretary of Agriculture may not take into consideration any market value of whey.

SEC. 408. APPLICATION OF AMENDMENTS.

The amendments made by this title shall not affect any liability of any person under section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446) as in effect before the date of the enactment of this Act.

SEC. 409. ADJUSTMENTS FOR SEASONAL PRODUCTION; HEARINGS ON AMENDMENTS; DETERMINATION OF MILK PRICES.

Section 101(b) of the Agriculture and Food Act of 1981 (7 U.S.C. 608c note) is amended by striking "1990"and inserting "1995".

SEC. 410. TRANSFER OF DAIRY PRODUCTS TO THE MILITARY AND VETERANS HOSPITALS.

Subsections (a) and (b) of section 202 of the Agricultural Act of 1949 (7 U.S.C. 1446a) are each amended by striking "1990" and inserting "1995".

SEC. 411. EXTENSION OF THE DAIRY INDEMNITY PROGRAM.

Section 3 of the Act entitled "An Act to provide indemnity payments to dairy farmers" (7 U.S.C. 450l), approved August 13, 1968, is amended by striking "1990" and inserting "1995".

SEC. 412. EXPORT SALES OF DAIRY PRODUCTS.

(a) IN GENERAL.—In each of the fiscal years 1991 through 1995, the Secretary of Agriculture shall sell for export, at such prices as the Secretary determines appropriate, not less than 150,000 metric tons of dairy products owned by the Commodity Credit Corporation, of which not less than 100,000 metric tons shall be butter and not less than 20,000 metric tons shall be cheese, if that disposition of such commodities will not interfere with the usual marketings of the United States nor disrupt world prices of agricultural commodities and normal patterns of commercial trade.

(b) SALES.—Such sales shall be made through the Commodity Credit Corporation.

(c) REPORT.—Through September 30, 1995, the Secretary shall report semiannually to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate on the volume of sales made under this section.

SEC. 413. COMPONENT PRICING OF MILK.

Section 8c(5)(B) of the Agricultural Adjustment Act (7 U.S.C. 608c(5)(B)), reenacted with amendments by the Agricultural Marketing Agreement Act of 1937, is amended by striking out "and" at the end of clause (ii)(d) and adding before the final period at the end of the clause, the following: "and, (f) a further adjustment, equitably to apportion the total value of milk purchased by any handler or by all handlers among producers on the basis of the milk components contained in their marketings of milk.".

SEC. 414. ADJUSTMENTS IN PAYMENTS BY HANDLERS.

Section 8c(5) of the Agricultural Adjustment Act (7 U.S.C. 608c(5)), reenacted with amendments by the Agricultural Marketing Agreement Act of 1937, is amended by adding at the end the following:

"(L) Providing that adjustments in payments by handlers under paragraph (A) need not be the same as adjustments to producers under paragraph (B) with regard to adjustments authorized by subparagraph (A) (2) and (3) and clauses (B)(ii) (b), (c), and (d).".

SEC. 415. DAIRY EXPORT INCENTIVE PROGRAM.

Section 153 of the Food Security Act of 1985 (15 U.S.C. 713a-14) is amended by striking "September 30, 1990" and inserting "December 31, 1995".

SEC. 416. AMENDMENT TO THE PACKERS AND STOCKYARDS ACT, 1921, TO PROVIDE FOR THE ESTABLISHMENT OF TRUSTS FOR THE BENEFIT OF MILK PRODUCERS.

(a) DEFINITIONS.—Section 2(a) of the Packers and Stockyards Act, 1921 (7 U.S.C. 182) is amended—

(1) in paragraph (10) by striking 'and' at the end;

(2) by redesignating paragraph (11) as paragraph (15), and

(3) by inserting after paragraph (10) the following:

"(11) The term 'milk' means cow's milk;

"(12) The term 'milk product' means any product or by product from processing milk;

"(13) The term 'milk producer' means any person who produces milk;

"(14) The term 'handler' means any person who, in commerce, receives or otherwise acquires milk, processes, prepares or arranges for marketing, or markets the milk; and".

(b) STATUTORY TRUST ESTABLISHED.—The Packers and Stockyards Act, 1921 (7 U.S.C. 181 et seq.) is amended by inserting after section 207 the following:

"SEC. 208. STATUTORY TRUST ESTABLISHED; MILK.

"(a) PROTECTION OF PUBLIC INTEREST FROM INADEQUATE FINANCING ARRANGEMENTS.—(1) It is hereby found that a burden on commerce in milk, and an obstruction to commerce in milk is caused by financing arrangements under which handlers encumber, give lenders security interest in, or have liens placed on milk purchased or received by a handler, on inventories of milk, on receivables or proceeds from milk, or on products derived from milk when payment is not made for the milk. Such arrangements are contrary to the public interest.

"(2) This section is intended to remedy such burden on commerce in milk and obstruction to commerce in milk and to protect the public interest.

"(b) TRUSTS.—All milk purchased or received by a handler, all inventories of milk or milk products, and all receivables or proceeds from milk or milk products, shall be held by such handler in trust for the benefit of all unpaid milk producers of such milk or milk products or unpaid handlers until full payment has been received by such unpaid milk producer or handler.

"(c) EFFECT OF DISHONORED INSTRUMENTS.—Payment shall not be considered to have been made if the milk producer or handler receives a payment instrument which is dishonored.

"(d) PRESERVATION OF TRUST BENEFITS BY MILK PRODUCER OR HANDLER.—The unpaid milk producer or unpaid handler shall lose the benefit of such trust if such milk producer or handler has not preserved his trust under this section by giving written notice to the debtor handler and by filing such notice with the Secretary—

"(1) within thirty days of the final date for making a payment for milk when a payment instrument has not been received, or

"(2) within fifteen business days after the milk producer or handler has received notice if the payment instrument promptly presented for payment has been dishonored.

"(e) DISTRICT COURTS.—The several district courts of the United States are vested with jurisdiction specifically to entertain—

"(1) actions by trust beneficiaries to enforce payment from the trust; and

"(2) actions by the Secretary to prevent and restrain dissipation of the trust.".

(c) RECORDS AND RESPONSIBILITY.—(1) Section 401 of the Packers and Stockyards Act, 1921 (7 U.S.C. 221), is amended by inserting ", milk handler" after "any live poultry dealer".

(2) Section 403 of the Packers and Stockyards Act, 1921 (7 U.S.C. 223), is amended by inserting ", milk handler" after "any live poultry dealer".

(d) EFFECTIVE DATE.—The amendments made by this section shall take effect 90 days after the date of the enactment of this Act.

(e) AUTHORIZATION.—Such sums are authorized to be appropriated as may be necessary for the administration of this section.

SEC. 417. STATUS OF PRODUCER HANDLERS.

The legal status of producer handlers of milk under the Agricultural Adjustment Act (7 U.S.C. 601 et seq.), reenacted with amendments by the Agricultural Marketing Agreement Act of 1937, shall be the same after the amendments made by this title take effect as it was before the effective date of such amendments.

Mr. PENNY. Mr. Chairman, as we debate dairy policy, I would urge Members to consider the following:

This farm bill calls for no price cuts in dairy over the next 5 years. That is a victory for dairy farmers who have been subjected to price cut after price cut over the past several years.

We allow no herd buy out in this farm bill. The herd buy out under the 1985 Farm Act was a disaster in many respects. We do not repeat that mistake in this bill. That is a victory for dairy farmers.

We establish in this bill a study of our Federal pricing and marketing structure. In my judgment fair review based on current economic conditions can only stand to benefit dairy producers in the upper midwest. This objection, non-political review of dairy policy is also a victory for Minnesota dairy farmers.

Having said all that, I must admit this bill is not perfect.

It does not restore the recent price cuts. Price cuts which I felt were unwarranted. But then again no commodity in this farm bill is allowed a price increase. Wheat, corn, feed grain and sugar prices are all frozen at present levels. In that regard, dairy is treated no better and no worse than other commodities.

It does not establish a temporary two tier price structure to deal with surpluses. Unfortunately, the Volkmer substitute would have essentially created a permament production quota for every dairy producer. That goes farther than I could support. I believe a temporary price differential should be utilized to reduce surplus production, I am hopeful. That the Secretary of Agriculture will implement this type of supply management authority and will use my influence as a member of the Agriculture Committee to that affect.

Clearly this dairy program is not everything we wanted. But it does stabilize price supports and offers us on opportunity to review and revise the milk marketing order system. Those are positive developments and deserving of support.

AMENDMENT OFFERED BY MR. VOLKMER

Mr. VOLKMER. Mr. Chairman, I offer an amendment. This is an amendment that was printed in the RECORD.

The Clerk read as follows:

Amendment offered by VOLKMER:

On page 117, after line 19, insert the following:

"(4)(A)(i) Nowtwithstanding any other provision of this subsection, if for any of the fiscal years 1991, 1992, 1993, 1994, and 1995 the level of purchases under this subsection of milk and the products of milk, less sales under section 407 for unrestricted use, as estimated by the Secretary on August 1 of each year, will exceed 6 billion pounds, milk equivalent total solids basis, during such year, beginning October 1 of such year the Secretary shall provide for a reduction to be made in the price received by any producer for milk produced in the United States and marketed for commercial use by such producer in excess of such producer's individual base for milk marketing during such year. In estimating the level of purchases of milk and the products of milk under this subsection, the Secretary shall deduct an amount equal to the difference between the milk equivalent of total milk solids of all dairy products imported into the United States during the most recent year, and the annual average of the milk equivalent of total milk solids of all dairy products imported into the United States during the period January 1, 1986, through December 31, 1990.

"(ii) The reduction made under this paragraph shall be assessed and collected by the purchaser of milk from the producer. The purchaser shall remit within 30 days all amounts so collected from producers to the Commodity Credit Corporation.

"(B) If the Secretary provides for a reduction to be made in the price received by producers for milk under this paragraph, the price received by any producer may not be reduced under this subsection for milk marketed for commercial use in total quantity not in excess of such producer's base for milk for effect during such year.

"(C) The amount of the reduction under subparagraph (A) shall be 65 percent of the support price.

"(D)(i) Each producer's marketing history shall, at the option of the producer, consist of the marketings of milk by such producer for commercial use during the most recent year, or the average marketings of milk by the producer for commercial use during the two most recent years.

"(ii) A producer's marketing history established under this paragraph shall not be transferable to any other person, unless the producer's entire dairy herd is transferred.

"(E)(i) The Secretary shall establish a national milk marketing base for each year from October 1, 1991 through September 30, 1995. The national marketing base shall consist of the total quantity of milk producer's marketing histories of milk for commercial use, less the purchases of milk and the products of milk made by the Commodity Credit Corporation under this section, less sales under section 407 for unrestricted use, that exceed 6 billion pounds of milk, plus an additional amount determined by the Secretary each year to reflect increased milk use based on historical data. The Secretary shall announce the national milk marketing base not later than October 1 each year.

"(ii) If the Secretary is required to provide for a reduction in price under this paragraph for any year, the Secretary shall establish a national milk production factor by dividing the national milk marketing base for such year by the total milk production for the previous year.

"(iii) The Secretary shall establish each individual producer's base by multiplying the producer's marketing history by the national milk marketing base.

"(iv) In the case of individual producers that have no marketing history, the Secretary shall establish such producer's base at 75 percent of the annualized total milk marketed for commercial use by the producer in the month immediately prior to implementation of the reduction in price provided under this paragraph.

"(F) If the Secretary is required to provide for the reduction in price under this paragraph, the Secretary shall so advise the Committee on agriculture of the House of Representatives and the Committee on Agriculture, Nutrition and Forestry of the Senate by August 1 of the previous year.

"(G) Any money remitted to the Commodity Credit Corporation by purchasers of milk under this paragraph shall be utilized to purchase dairy products for use in the domestic food programs to the extent that net outlays under paragraphs (2) and (3) of this subsection do not exceed $725 million annually. Net outlays shall consist of the total amount expended by the Commodity Credit Corporation for the price support program under this section less remittances received from purchasers of milk under this paragraph."

Page 117, line 20, strike "(4)" and insert in lieu thereof "(5)".

Page 119, beginning on line 12, strike all that follows through p. 120, line 24.

Mr. VOLKMER (during the reading). Mr. Chairman I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore (Mr. ALEXANDER). Is there objection to the request of the gentleman from Missouri?

There was no objection.

MODIFIED AMENDMENT OFFERED BY MR. VOLKMER

Mr. VOLKMER. Mr. Chairman, I ask unanimous consent to offer a substitute for the amendment that was printed in the RECORD.

The CHAIRMAN pro tempore. The Clerk will report the modification.

The Clerk read as follows:

Modified amendment offered by Mr. VOLKMER: Strike section 402 and insert in lieu thereof the following new section:

SEC. 402. MILK PRICE SUPPORT AND INVENTORY MANAGEMENT PROGRAM FOR CALENDAR YEARS 1991 THROUGH 1995.

Notwithstanding any other provision of law—

(a) During the period beginning on January 1, 1991 and ending on December 31, 1995, the price of milk shall be supported as provided in this section.

(b)(1) Except as provided in subsections (c) and (d), during the period beginning on January 1, 1991 and ending on December 31, 1995, the price of milk shall be supported at a rate not less than $10.60 per hundredweight for milk containing 3.67 percent milkfat.

(2) The price of milk shall be supported through the purchase of milk and the products of milk.

(c)(1) No later than January 1, 1991, the Secretary shall establish by regulation a Milk Component Production Reduction Program providing, by means of a producer checkoff, for reductions in price support for milk marketed by a producer as provided in this subsection. If the level of purchases of milk and the products of milk by the Commodity Credit Corporation under this section, less sales under section 407 of the Agricultural Act of 1949 (hereafter in this section referred to as "the Act") for unrestricted use, are estimated by the Secretary on December 1, 1990, to exceed 5 billion pounds of milk equivalent on a milkfat basis for the next succeeding twelve-month period commencing January 1, 1991, the Secretary shall implement the Milk Component Production Reduction Program for the nine-month period beginning on January 1, 1991. The Secretary shall first determine the milkfat in the milk equivalent of such estimated purchases in excess of 5 billion pounds of milk equivalent. The Secretary shall then establish the national percentage that the milkfat in the milk equivalent of such estimated purchases that exceeds 5 billion pounds represents of total domestic milkfat production. Finally, the Secretary shall impose a checkoff for marketings of milkfat in excess of a producer's production base, as provided in paragraph (3), reduced by such national percentage. The amount of the checkoff under this paragraph shall not exceed the Commodity Credit Corporation purchases price for butter in effect during the nine-month period beginning on January 1, 1991, per pound of milkfat marketed in excess of a producer's production base. The checkoff under this paragraph shall be assessed and collected by the purchaser of milk from the producer. The purchaser shall remit within 30 days all amounts so collected from producers to the Commodity Credit Corporation.

(2) Effective for the period October 1, 1991 through December 31, 1995, under the Milk Component Production Reduction Program, the Secretary shall require a producer checkoff for reductions in price support for milk marketed by a producer, effective on October 1 of each such calendar year, if the level of purchases of milk and the products of milk by the Commodity Credit Corporation under this section, less sales under section 407 of the Act for unrestricted use, are estimated by the Secretary to exceed 5 billion pounds of milk equivalent on a milkfat basis for the next succeeding twelve-month period. The Secretary shall first determine the milkfat in the milk equivalent of such estimated purchases in excess of 5 billion pounds of milk equivalent. The Secretary shall then establish the national percentage that the milkfat in the milk equivalent of such estimated purchases that exceeds 5 billion pounds represents of total domestic milkfat production. Finally, the Secretary shall impose a checkoff for marketings of milkfat in excess of a producer's production base, as determined in paragraph (3), reduced by such national percentage. The amount of the checkoff under this paragraph shall not exceed the Commodity Credit Corporation purchase price for butter in effect during the twelve-month period, per pound of milkfat marketed in excess of a producer's production base. The checkoff under this paragraph shall be assessed and collected by the purchaser of milk from the producer. The purchaser shall remit within 30 days all amounts so collected from producers to the Commodity Credit Corporation.

(3) Under the Milk Component Production Reduction Program in effect during a twelve-month period commencing October 1 of any calendar year as provided in this subsection, each producer of milkfat in the United States shall be assigned a milkfat production base for milkfat marketed during such twelve-month period. The producer's milkfat production base shall be equal to the average total pounds of milkfat contained in milk marketed by the producer during the previous twelve-month period. The producer's milkfat production base for the period January 1, 1991 through September 30, 1991 shall be assigned on the same basis except that such base will cover a nine-month period.

(4) Under the Milk Component Production Reduction Program in effect as provided in this subsection, each producer of milk in the United States shall provide the Secretary with such evidence as the Secretary may require relating to the producer's marketing history of milk (milkfat basis).

(d)(1)(A) Notwithstanding any other provision of this section, if for any of the fiscal years 1991, 1992, 1993, 1994, and 1995 the level of purchases under this section of milk and the products of milk, less sales under section 407 of the Act for unrestricted use, as estimated by the Secretary on August 1 of each year, will exceed 3.5 billion pounds of milk equivalent on a total solid basis, during such year, beginning October 1 of such year the Secretary shall provide for a reduction to be made in the price received by any producer for milk produced in the United States and marketed for commercial use by such producer in excess of such producer's individual base for milk marketing during such year. In estimating the level of purchases of milk and the products of milk under this subsection, the Secretary shall deduct an amount equal to the difference between the milk equivalent of total milk solids of all dairy products imported into the United States during the most recent year, and the annual average of the milk equivalent of total milk solids of all dairy products imported into the United States during the period January 1, 1986, through December 31, 1990.

(B) The reduction made under this paragraph shall be assessed and collected by the purchaser of milk from the producer. The purchaser shall remit within 30 days all amounts so collected from producers to the Commodity Credit Corporation.

(2) If the Secretary provides for a reduction to be made in the price received by producers for milk under paragraph (1), the price received by any producer may not be reduced under this subsection for milk marketed for commercial use in total quantity not in excess of such producer's base for milk in effect during such year.

(3) The amount of the reduction under paragraph (1) shall be 65 percent of the support price.

(4) (A) Each producer's marketing history shall, at the option of the producer, consist of the marketings of milk by such producer for commercial use during the most recent year, or the average marketings of milk by the producer for commercial use during the two most recent year.

(B) A producer's marketing history established under this paragraph shall not be transferable to any other person, unless the producer's entire dairy herd is transferred.

(5) (A) The Secretary shall establish a national milk marketing base for each year from October 1, 1991 through September 30, 1995. The national marketing base shall consist of the total quantity of milk producers' marketing histories of milk for commercial use, less the purchases of milk and the products of milk made by the Commodity Credit Corporation under this section, less sales under section 407 of the Act for unrestricted use, that exceed 3.5 billion pounds of milk, plus an additional amount determined by the Secretary each year to reflect increased milk use based on historical data. The Secretary shall announce the national milk marketing base not later than October 1 each year.

(B) If the Secretary is required to provide for a reduction in price under paragraph (1) for any year, the Secretary shall establish a national milk production factor by dividing the national milk marketing base for such year by the total milk production for the previous year.

(C) The Secretary shall establish each individual producer's base by multiplying the producer's marketing history by the national milk marketing base.

(D) In the case of individual producers that have no marketing history, the Secretary shall establish such producer's base at 75% of the annualized total milk marketed for commercial use by the producer in the month immediately prior to implementation of the reduction in price provided under paragraph (1).

(6) If the Secretary is required to provide for the reduction in price under paragraph (1), the Secretary shall so advise the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition and Forestry of the Senate by August 1 of the previous year.

(e) As used in this section, milk equivalent on the total solids basis shall be equal to the weighted average of the milk equivalents, as computed on a milkfat basis, and on a milk solids not fat basis, of such products, with weighting factors equal to not more than 40 percent for the milk equivalent, milkfat basis, and not more than 70 percent for the milk equivalent, milk solids not fat basis. Such weighting factors shall total 100 percent.

(f) Any money remitted to the Commodity Credit Corporation by purchasers of milk under this section shall be utilized to purchase dairy products for use in the domestic food programs to the extent that net outlays under subsections (a) and (b) of this section do not exceed $725 million annually. Net outlays shall consist of the total amount expended by the Commodity Credit Corporation for the price support program under this section less remittances received from purchasers of milk under this section.

Mr. VOLKMER (during the reading). Mr. Chairman, I ask unanimous consent that the modification be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Missouri that the amendment be modified?

Mr. MADIGAN. Mr. Chairman, reserving the right to object, under my reservation I will yield to the gentle-

man from Missouri [Mr. VOLKMER] to tell me what the modification is.

Mr. VOLKMER. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, the modification basically is what I had proposed to introduce into the RECORD last Friday. I thought that I had an agreement with the gentleman from Texas, the gentleman from Wisconsin, and the gentleman from Virginia on a compromise, which I had agreed to, to reduce the price support to $10.10, along with other things. Then I put that amendment into the RECORD which I considered to be a compromise.

Mr. MADIGAN. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Missouri that the amendment be modified?

There was no objection.

The CHAIRMAN pro tempore. The amendment is modified.

(By unanimous consent, Mr. VOLKMER was allowed to proceed for 5 additional minutes.)

The CHAIRMAN pro tempore. The gentleman from Missouri [Mr. VOLKMER] is recognized for 10 minutes in support of his amendment.

Mr. VOLKMER. Mr. Chairman, I ask unanimous consent that all debate on my amendment and all amendments thereto expire at 3:30 p.m.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Missouri?

Mr. GUNDERSON. Mr. Chairman, I object.

The CHAIRMAN pro tempore. Objection is heard.

Mr. VOLKMER. Mr. Chairman, this amendment that we now have before us is not just my amendment. It is a product of other Members, not only of the Agriculture Committee but Members outside the Agriculture Committee who are concerned about our dairy program.

I am joined in offering this amendment by the gentleman from Wisconsin [Mr. KASTENMEIER], the other gentleman from Wisconsin [Mr. OBEY], the gentleman from Iowa [Mr. NAGLE], the gentleman from South Dakota [Mr. JOHNSON], and the gentleman from Minnesota [Mr. OBERSTAR]. They, as well as I, are concerned about the direction that dairy is taking in the bill before us that came from the Agriculture Committee.

Before going into my amendment, I would like to explain what I see as the current situation as it involves dairy. The latest price support cut that was made in January of this year, the one that reduced the price support from $10.60 to $10.10, was not made because we had excess milk. It was because we had excess butter, and because we had a trigger that was geared to butterfat content. The trigger triggered in the reduction of the price support level. We have not had excess cheese or excess nonfat dry milk for over a year. All we have is excess butter. There is no excess, as I said before, of nonfat dry milk and cheese. As we know, there has been a problem in even getting excess dairy products for our nutrition and feeding programs.

However, at the present time what we are seeing, because of the decline in the price support, and now an increase—in June there was an increase of 3 percent in milk and dairy products in this country, and as projected, we will also have an increase this month—is that the price of nonfat dry is declining. It is getting very near the trigger level that will require CCC purchases.

Mr. Chairman, the bill that we have before us, because of the price cut and the component pricing of butter, is in an effective price support range of only $8.60 for our producers. That is not my figure. That is the figure that I was given by the National Milk Producers Association representatives. So we have in this bill an effective price support of $8.60, not $10.10.

So the question is, what can we do about this? How can we effectively reduce the oversupply of butter, and how can we effectively retain the price level of whole milk as it is, because the dairy farmer receives the whole milk price? The dairy farmer does not necessarily receive just the price support price. At the present time, since last year that whole milk price was around $13.50, and in one place it was up to $14. That is what the farmer is getting, not the $10.10 and the $10.60, but under the CBO estimates for the current bill we are going to see that whole milk price decline because of the $10.10 figure and because of what we have seen with the butter problem. How do I propose to handle it? I and others who join me say that we need a supply management program, just the same type of supply management program that we have in the peanut program. It is a no-cost-to-the-Government program. We have other supply management programs in agriculture. We have a wheat program. We have supply management in that. We have a grain program, a feed grain program.

We have supply management programs all through this agriculture bill, but there are some people who say that a two-tier supply management or inventory control program for dairy is not good, that it will not work.

Well, we were able to put one together that puts an assessment on excess production.

Mr. Chairman, every dairy farmer out there today has an historical production base. Every dairy farmer sells his milk, and we all know how much milk he sold. For last month, the month before, 2 years ago, 5 years ago, we have that information. It is an historical base. We will assign him that historical base. We will then have the Secretary determine whether we are going to have excess production. If we are going to have excess production, he then determines how much, and we make a percentage reduction in that base. Then if that dairy farmer produces in excess of that base, he only gets 35 percent of the price for that milk. There is a 65-percent assessment that is collected by the handler or is collected by the processor who buys it. That money goes to the CCC. That money then reduces the cost of the program to the Government.

In fact, under this proposal as against the proposal from the committee, ours costs less. We have a decrease in Government payments, less cost to the taxpayer, and more money to the producer and more money to the dairy farmer.

□ 1420

Mr. Chairman, I can give my colleagues some estimates that have been made. Five-year total farm income, including all assessments that are in our bill, we have 75-percent higher income. The annual average under their bill of the total, including all assessments, theirs is $17.969 billion. Ours is $19.318 billion. That is a $1.349 billion; that is, over the period of the bill, over the period of the bill, we have an increase in dairy producers income. The old milk price is the reason why. The total old milk price is higher on the average of 5 years by 92 cents a hundredweight over their proposal. That is the amount that the dairy farmer gets. That is the price that the dairy farmer gets.

Mr. Chairman, I will admit that under the committee bill the price that the dairy farmer gets is going to go down and continue to go down around $11, and perhaps even less during the term of that 5-year bill. And that may be passed on to consumers.

My colleagues have heard that argument before on sugar. I heard the gentleman from that side argue against a reduction in the sugar price support, that it will not be passed on. Mr. Chairman, it is not passed on to sugar. Surely it is not going to be passed on in dairy either.

Mr. Chairman, if it is not passed on, who is getting the money? The processors, the manufacturers, those who make things and sell things out of dairy, whether it is milk, ice cream, cheese, butter, whatever. They are the ones that are going to get the money, not the consumer.

However, who does not get the money? The producer.

What does it mean? It also means that the Government costs, like I said is estimated. I have an estimate here of $3 billion 4 million for the commit-

tee bill, $2.738 billion for my program. So, we are saving taxpayers' money.

Mr. Chairman, one other thing that we have come up with that we propose to do with that money that is left over between our cost and what the budget allowance is, any money that is left over in there we say should go to help with the nutrition programs that have not been helped in the past because of a lack of dairy supplies. So, we take that money, and we require CCC to use that money to buy dairy products and use them for the nutrition and feeding program. The committee bill has no such proposal.

Mr. Chairman, we feel that this bill is not only better for the consumer because it does give him, the consumer, that stability in getting whole milk, good milk, the best in the world, as far as I am concerned. It also helps with the producers because it means we are going to have more dairy farmers out there continuing in dairying, and we are going to have more producers' income, and under the bill also under our amendment we are going to have less cost to the taxpayer.

Mr. Chairman, the committee has also made a provision in there where they want to study the whole aspect. However, if my colleagues read the language very clearly, that language for the study includes that there be no assessments within any study. That means we cannot have a two-tier based on assessments made by a study, and that means that we could not have under their proposal a two-tier program such as we are proposing, that the only two-tier programs we could have would be basically one that is based on plants and plant allowances, which means that some dairy farmers would be able to sell all of their milk at the full price while other dairy farmers would have to sell part of their milk at a full price and part of it at a lower price. Even though there are some people who support that, I do not think there is any actual; maybe one, but most of the dairy organizations do not support any type of two-tier plant operation at all. They do support a two-tier assessment type of a proposal.

Mr. Chairman, National Milk Producers supports a two-tier assessment, the AMP does. MidAm supports a two-tier assessment type of program. The major organizations within dairy do because they know that it means better and more prosperous dairy farmers out there and the more prosperous dairy farmers get, they do buy the pickup trucks, and they get to buy the new equipment. They are the ones that help keep this economy going.

Mr. STENHOLM. Mr. Chairman, I rise in full support of the dairy title as established in H.R. 3950.

Before I proceed further, let me express my sincere gratitude to the chairman of the full committee, Mr. DE LA GARZA, and the ranking member of the full committee, Mr. MADIGAN, for their tremendous cooperation and assistance in developing the dairy, honey, wool, and mohair title of the Food and Agricultural Resources Act of 1990. I would also like to commend the ranking member of the subcommittee, Mr. GUNDERSON, along with other committee members on both sides of the aisle, and the staff, for working diligently over the last several months in developing a very responsible bill.

The dairy title contained in H.R. 3950 represents a bipartisan effort to ensure that those dairy producers who are efficient, innovative, and industrious will prosper in the years to come. In developing the dairy policy contained in the bill before us today, the Subcommittee on Livestock, Dairy, and Poultry received testimony from over 150 individuals during 6 regional field hearings and 2 additional hearings held here in Washington, DC. The subcommittee heard testimony from economists, producers, cooperatives, allied industry representatives, and consumer advocate groups, among others. Furthermore, the findings of the National Commission on Dairy Policy served as a valuable resource and guided the legislation found in H.R. 3950. This commission, which represented all regions of the Nation, was established by the Food Security Act of 1985 to examine every facet of U.S. dairy policy.

The 1985 farm bill was watershed legislation for dairy policy. After years of consistent overproduction, the Congress passed a farm bill that contained a dairy title that implemented a market-oriented approach to cutting burgeoning Government purchase. The result was a decrease in Commodity Credit Corporation [CCC] costs—$2.3 billion in fiscal year 1986 down to an expected $650 million in fiscal year 1990. At the same time, the support price for milk during this period dropped from $12.60 to $10.10 per hundredweight, a drop of about 20 percent. As a result, the Nation's milk supply is in the closest relative supply and demand balance we have had since the late 1970's. The dairy provisions of H.R. 3950 are budget responsible, reasonable, continue market orientation features responsible for a needed supply and demand balance, and strive toward a national dairy policy program.

Although the committee passed, in my judgment, a fair and reasonable dairy title, we have continued to discuss and evaluate modifications to the committee print in an effort to accommodate the interests of Members on both sides of the aisle. The chairman of the full committee has introduced a bipartisan amendment which provides for mandated dairy product export sales and several technical and conforming changes. These changes are the result of many hours of analysis and discussion and result in a title that received the support of the full committee and much of the dairy industry. Unfortunately, the House Agriculture Committee was unable to pursue mandated support price increases due to budget constraints that applied across the board to all commodity programs.

The dairy title of H.R. 3950 contains five key provisions. First, in order to more accurately measure CCC purchases of dairy products, milk equivalent will be based on total solids rather than on a milkfat basis. This provision will allow for a more accurate assessment of CCC dairy product purchases. Under current law, CCC purchases of nonfat dry milk are not included in the milk equivalent figures used in the supply and demand adjuster calculation. Second, the current price support level of $10.10 per hunderdweight will be the support price floor beginning on January 1, 1991. As I stated earlier, dairy producers have experienced a decrease of about 20 percent in their price support since 1985. A support price floor of $10.10 will permit efficient producers to receive a satisfactory return on their investment. Third, the support price may increase or decrease above $10.10 per hundredweight based on the levels of CCC purchases. This provision continues the market orientation of the 1985 farm bill. Fourth, the Secretary is directed to design and implement an inventory management program if overproduction is projected to be above 7 billion pounds, milk equivalent. Fifth, a replacement for the Minnesota-Wisconsin [M-W] price series and any changes in Federal milk marketing orders that are a result of the national milk marketing order hearing must be implemented by the Secretary by given dates. I want to commend the Secretary of Agriculture for announcing this national hearing process and for providing an opportunity for input regarding the effectiveness and possible improvement in the current M-W price series which is the basis for all prices established under Federal milk marketing orders.

As mentioned earlier, this dairy program strives to continue the current relative dairy product supply and demand balance by being futuristic, flexible, and by adopting many of the recommendations of the National Commission on Dairy Policy. The committee believes the combination of a market-oriented program coupled with an effective standby inventory management scheme will result in a viable, low-cost national dairy program which makes sense for consumers, taxpayers, the needy, and the dairy industry.

I urge my colleagues to support the dairy title as established in H.R. 3950.

Mr. Chairman, I rise in opposition to the amendment of the gentleman from Missouri [Mr. VOLKMER] today.

Mr. Chairman, I would say that a lot of what he has said I would find personal agreement with. We have been over this though. There were hearings that were held around the Nation. Our subcommittee held six regional hearings, to additional hearings here in Washington, DC, and there is substantial agreement for an inventory management program in the dairy industry. Let there be no doubt about that. What there is not agreement on is the gentleman's specific proposal of how to bring it about and to do it immediately.

Mr. Chairman, what we have done in the committee bill is to attempt to recognize that we can have a potential problem with oversupply of dairy products in the future and, if we do, then we do need an inventory management program. What we provide in the committee bill is that we first study it,

that we find the answer to the questions that have eluded our subcommittee of which the gentleman from Missouri [Mr. VOLKMER] is a valuable member thereof.

Mr. Chairman, the gentleman from Missouri [Mr. VOLKMER] has come to a conclusion that he has the perfect answer. I do not for a moment agree that he has the perfect answer. As we have traveled around this country, I have not found a unanimous agreement that we immediately go to a quota system and set up individual quotas for individual dairy producers and do it in 1990. That is not the feeling of dairy producers in the United States, and yet the amendment of the gentleman from Missouri [Mr. VOLKMER] today would say, "Let's do it now with a 3½ billion trigger."

Mr. Chairman, there is still room for debate. What we do in the committee bill, and why I asked opposition to the gentleman's amendment today is we say, "Let's find out what kind of a two-tier system will work best. Can there be another system?"

I personally believe a class four system might be the answer. I do not know that. I have as yet found no economist anywhere in this country that says uneqivocally the amendment of the gentleman from Missouri [Mr. VOLKMER] is the way to go.

Let me also point out that right now the 1985 farm bill and the dairy title, in which we made a dramatic change in the direction of dairy policy in this country, to most dairy men they would say that today it is working. We have a very decent dairy price today. The concern is what is going to happen tomorrow.

Mr. Chairman, that is what bothers all of us and why in the committee bill we provide for a study, and also we encouraged, and I am the first to say I am very appreciative of the fact that the Department, under Secretary Yeutter, has now undertaken a study of the Federal milk market order system because many of the questions that we would have to ask and answer rather emphatically and factually here today cannot be answered until we have, in fact, gone through the hearing process on the Federal market order system so that we know what other changes that are not in the legislation before us, either in the gentleman's amendment or in the committee bill, must be put in place in order that we can truly develop a dairy policy for the 1990's that we all on our subcommittee, and our full committee, and I judge to be the will of the House, what we would want to see done.

Mr. Chairman, the big problem that I have with the amendment of the gentleman from Missouri [Mr. VOLKMER] is that he is trying to do it today, and in the subcommittee that I am privileged to chair we have debated this, and the gentleman is totally correct. We have been split, and we have had this argument in the subcommittee, full committee, and now here we are again today on the floor of the House. We do have differences.

I do not have a difference with the gentleman from Missouri [Mr. VOLKMER] that we need an inventory management program. We have had other differences expressed that we do not. I happen to believe we do need to have one. We will argue that it needs to be first studied before it is put into place.

So, Mr. Chairman, I would ask at this time to my colleagues, "Oppose the gentleman's amendment today. It has not been as well thought out and as well crafted as it needs to be in order to put in place in legislation something as important to our dairy policy as this particular point of inventory management is concerned."

I would also make this point and plead to my colleagues from dairy country, and that includes myself.

□ 1430

We have had a terrific problem with the baseline as we have attempted to legislate the dairy title this year because of a CBO quirk in the manner in which dairy was scored. The dairy title thereof in 1986 cost $2.3 billion. Today it costs $650 million, and yet we get no credit in the dairy title for that significant reduction in taxpayer expense.

In working through the full Agriculture Committee, we have worked in a bipartisan and multicommodity basis in order to recognize that the CBO numbers would have caused the dairy title cost to go from $650 million to $211 million in 5 years, and a $211 million cost for the dairy title would be extremely difficult for us to manage a program as important to all consumers in America as the dairy title; so we have worked within the committee in saying, "Let's level the baseline. Let's keep a fair baseline for dairy," and we have been able to achieve that.

I think the gentleman's amendment breaches that agreement in a very egregious manner, and one which is not helpful to the future of our dairy policy.

So I urge all my colleagues to defeat the amendment today. Stay with the committee approach in this particular areas as best you can. In the long run I think it will certainly be in the best interests of dairy producers and consumers all over the country.

Mr. OLIN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, it has been difficult, as the gentleman from Texas has said, to come to the floor with this issue. I have all the respect in the world for the integrity and sincerity of the gentlemen from Missouri and the two gentlemen from Wisconsin. I think they have made these suggestions entirely in good spirit, but in my view if these were enacted into law, first of all we would be making a rather radical change in dairy policy, not fully defined, not analyzed, not recommended by the USDA, and not needed at this time.

This program would mandate for the first time strict production controls with an individual dairy farm base of production assigned by the Federal Government.

The program would trigger at 3.5 billion pounds of milk, which is quite a low trigger. It would essentially be in effect all the time.

It provides for two assessments on dairy farmers. It results or could result in strong incentives to increase production.

The price support is raised to $10.60. It would establish annually adjusted milk bases based on the prior year's production, and that is a pretty dangerous and tricky thing to work with.

It could very well lead to an escalation of the milk base which really would scuttle the program.

I think more than anything, a base program of this type would lock each individual farm up to essentially its present level of production more or less. It would eliminate the possibility of making reasonable adjustments which we make all the time. It comes at a very bad time, as the gentleman from Texas says, because we are just about to get the Department of Agriculture finally to review the milk marketing program nationwide, and to indicate whether adjustments in that program are needed.

What we would like to have in this country is the optimum economic production of milk in each one of the areas with milk flowing based on economics from one area to another or not flowing.

In the case of the Southeast, this bill would lock us in the shortest position. We would continue to shrink. Other parts of the country would take up the difference and it would cost us more to get our milk.

The gentleman from Missouri also eliminates the study that was going to evaluate this.

I fully expect that in the next 6 months we are going to have lots of reasons to revisit this subject. Congress could at any time enact an assessment type of two-tier program easily.

We would expect the Department of Agriculture 6 months after this bill passes will give us its recommendation. I could be very sure that this Congress is going to act on that legislation using its own judgment after plenty of debate and consideration, but the timing will be better.

Mr. Chairman, let me give a little bit of background to this. The chairman of the subcommittee has done that already, but back in 1985, 5 years ago, when we were in this same position we

were coming out of a period where we had price supports that were allowed to get too high. CCC purchases got up to 16 billion pounds of milk. The program was coasting at its peak $2.6 billion.

We authorized a whole herd buyout, specified annual reductions in the support price until supply and demand were brought into relative balance. That program in that respect was an eminent success. Surpluses went down each year. Now supply and demand are almost in balance. The CCC has not purchased any cheese or dry milk in almost 2 years. We may even be in a short position.

The program cost is down 70 percent to under $700 million a year from $2.6 billion. Farm income has been stable. Milk prices to the farmers are now appreciating what happens when you get supply and demand pretty close. The manufacturing price is $2 over the support level and the fluid milk price is $3 over the support level. Dairy farmers are having one of the best years they have ever had.

The market works when you run your supply program the way it should be run.

The CHAIRMAN. The time of the gentleman from Virginia has expired.

(By unanimous consent, Mr. OLIN was allowed to proceed for 3 additional minutes.)

Mr. OLIN. The only problem, Mr. Chairman, that we have that is very much recognized, as the gentleman from Missouri says, is that the CCC right now is buying all butter. That comes from the fact that the market has shifted away from butter fat. Cheese is flourishing. Nonfat dry milk is flourishing.

We also made some sales to the European market, which might have been ill-advised, but we have too much butter fat.

The gentleman has suggestion for getting rid of that, except that the Department of Agriculture believes that by a simple adjustment of the component price level between butter and nonfat dry milk and the CCC, and not a devastating adjustment, that over a reasonable period of time, basically 1 year, with that adjustment you can get the butter and the nonfat dry milk and the cheese back in balance. I believe that can be done. It will be very effective.

When the balance is struck, we may very well be short of milk.

The bill that we have adopted is designed to maintain a supply and demand balance. It will correct the fat unbalance.

We do not need to change the price support mechanism much at all. It has served us well for 40 years.

Some are saying, what if the growth hormone takes off and we get into a surplus condition? Well, we recognize that. As the gentleman from Texas has said, we have requested a study. We intend to be a part of that study and involved in it. We intend to make the decision with regard to the study.

Certainly we should be ready in case production goes out of control, but it is not something that we have any crying need at this time to put into effect. The proper way is to study it and not go off half cocked and mandate a program which represents as big a change as this does. We may eventually agree with the gentleman's program. That could very well be, but over the next year we are going to be revisiting this subject because of the study and because of budgetary requirements.

I think the committee has made a very wise decision to hold off the final decision on this item.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield?

Mr. OLIN. Certainly, I yield to the gentleman from Missouri.

Mr. VOLKMER. Mr. Chairman, I would just like to ask the gentleman whether he agrees with the National Milk Producers Association that the effective price support level that you have in the bill as it came out of the committee with the reduction in the price of butter, that the effective price support level in that bill is $8.60, and not $10.10?

□ 1440

Mr. OLIN. Mr. Chairman, I do not agree with the gentleman.

Mr. VOLKMER. The gentleman does not agree with the national milk producers then?

Mr. OLIN. If that is what they said, I do not agree, because where the butter price was lower, the nonfat dry milk was raised, and as soon as you start buying some nonfat dry milk, we will be back in balance.

Mr. VOLKMER. We are not buying any nonfat dry milk. We are not buying any. We have got the butter price way down in this bill. We have got the butter price way down in this bill. You have reduced the price support level, the effective price support level to $8.60.

Mr. OLIN. Reclaiming my time, I appreciate what the gentleman is saying.

Mr. WALSH. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, we have discussed this issue very, very thoroughly throughout our hearings for the past 2 years.

At the time we came to subcommittee, this same proposal was on the table, and I supported it. However, I think in the intervening time some things have changed. I think the thing that changed the most is the financial situation and the revenue estimates for our budget considerations for this year.

There has been an agreement on the committee among committee members that we would freeze target support prices. This is an effort to achieve the budget targets for the agricultural budget in conjunction with the entire 1991 budget considerations. I think it is very important that we maintain that discipline throughout the committee bill. Therefore, I would have to oppose the $10.60 support floor although in many ways I agree with the gentleman from Missouri in his efforts to keep a strong pay price to the producer.

I would also state my opposition at least to mandating of a two-tier quota system. I think this is an alternative that certainly will be considered by the Secretary in his deliberations, but none of us, I do not believe, feel 100 percent sure that the two-tier option is the only option that we have. The Secretary will consider that among others, and we will have the results of that study within 6 months of passage of the bill.

For that reason, along with the support price, I am going to vote in opposition, and I would urge others to vote in opposition.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield?

Mr. WALSH. I am happy to yield to the gentleman from Missouri.

Mr. VOLKMER. Mr. Chairman, I would like to ask the gentleman the same question that I asked the gentleman from Virginia, and that is that it has been estimated by the National Milk Producers Association, I have been informed by their representative, that the provisions in the bill that came out of full committee are an effective support rate, not of $10.10 but of $8.60.

Now, does the gentleman agree with that or disagree with that? Or does it make any difference to the gentleman?

Mr. WALSH. I would have to respectfully disagree with the gentleman.

Mr. VOLKMER. The gentleman disagrees with the National Milk Producers?

Mr. WALSH. I have seen so many statistics and analysis of this proposed cost of this program that I am satisfied that we have all the facts in.

Mr. VOLKMER. All the gentleman has to do is look at the butter costs that we have got in the bill and figure that into the component pricing, and that is all one has to do, and it comes right out to that figure, so that is what appears to me as the alternative that the gentleman wishes to support. Now, I admit the gentleman supported me in subcommittee and we adopted this basic version in the subcommittee. I continue to believe that we can use a two-tier assessment program and maintain producers' income at the

present level, bulk milk price at the present level.

The gentleman has to admit that CBO says, if the gentleman looked at the CBO figures on the committee print on the committee bill that milk, whole milk price to your producers, is going to go down in the next 5 years.

Mr. WALSH. Reclaiming my time, I thank the gentleman for his thoughts. However, no one is precluding a two-tier for the life of this 5-year bill. This is a consideration that will be studied, and the economics of it may sound good, but the administration of a quota system is something that we have never experienced in the dairy industry, and I am not sure that we are prepared at this time to go into that.

Mr. KASTENMEIER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I am the author of H.R. 1137, a piece of legislation which would create a two-tier pricing program for milk. This legislation and similar programs have been the product of years of refinement with the direct participation of dairy farmers from around the country.

Mr. Chairman, I should also state that the gentleman from Wisconsin [Mr. OBEY] and myself have noticed in the RECORD two amendments for consideration today that are close to that particular bill. One has a support price of $13.10 and represents a program alternative that would be aimed at farmers and our rural economy. The other is a support price of $10.60 and would be aimed at meeting budgetary realities. The gentleman from Wisconsin [Mr. OBEY] and I do not intend to offer either of those amendments today, because the Volkmer amendment does reflect compromises that have been made in good faith to assure a broader area of support and represents good dairy policy.

I do want to commend the chairman of the subcommittee and other members of the committee. Certainly the chairman of the subcommittee has been as conscientious, as hard working, and as far as I am concerned as effective a Member as we have in this body. However, he does claim that we are trying to do it today, to quote him. Indeed, Mr. Chairman, we are trying to do it today. This is a long-term agricultural bill. If we do not try to do it today, then the horse is gone, and there is no point locking the barn door.

It is true that it is not supported, as the gentleman from Virginia said, by the USDA. Indeed, if we relied on support of the USDA, many of the programs in this bill, and historically, would never have been adopted.

The attraction of the amendment under consideration is twofold. First of all, I want to remind Members that this amendment, the Volkmer amendment, was adopted by the subcommittee, so it is not unthinkable that the dairy subcommittee adopted this amendment with one minor change, or one change, and that is the trigger, so-called in the bill. Otherwise, we are now considering what the subcommittee reported out to the full Committee on Agriculture only a month and a half ago.

The attraction of the amendment under consideration is twofold. It is desirable for budgetary purposes, with lower program costs, by ensuring that excess dairy products were never produced rather than requiring the CCC to purchase them. It is desirable for dairy farmers, because by balancing supply with demand, a two-tier program would increase milk prices and farm income, but that income would come from the market, not the Government.

Dairy product prices are not expected to be any higher than we have seen in this past year. In fact, we are dealing with an ideal year, one which I think dairy farmers recognize may not long be characteristic of the market.

A two-tier program only works, however, if it includes assessments against an over-quota production that are strong enough to ensure that surplus products are never produced. The dairy bill before us carries no promise that such assessments would go into effect. We need to pass this amendment to ensure that the two-tier will in fact work.

This amendment is necessary because budgetary pressures on the dairy program are only going to increase as we move to deal with our deficit budget crisis. Whether we face a negotiated budget agreement or an eventual sequestration, the dairy program included in this farm bill is never going to be allowed to function as it is designed, because the real budget baseline will not accommodate that program's costs.

Figures that had been earlier provided to me by the Congressional Budget Office indicate if a two-tier program such as is advocated is triggered, the costs will fall well below the $500 million level for each of the next 5 years.

Mr. Chairman, I urge support for the Volkmer amendment.

□ 1450

Mr. OBEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I am going to be a little impolite, because I think the situation requires it. One hears a lot of talk about what happens to the consumers under farm programs. Well, every time the price of milk fluctuates wildly, it is not just the farmer who is stuck with confusion, it is also the consumer, and he usually winds up also being stuck with higher prices.

If you take a look at milk prices from March to December, they rose very rapidly, about 36 percent. Then in December they dropped by 18 percent. Since then they have been going up again.

What happens with the consumer, however, is that when the prices to farmers go up, the prices to consumers go up just as quickly. When the prices to farmers go down, the prices for consumers do not go down quite as quickly. The guy in the middle gets to rake off a whole lot before those prices start to react to what is happening on the farm.

The purpose of the Volkmer amendment is to try, without cost to the taxpayers, to reduce the cost that accrues to this economy from unstable milk prices by establishing a two-tier pricing system for 5 years which will essentially be self-financing, because farmers will take the lead in solving their own problems.

That is what everybody says they want, and yet they will not support the Volkmer amendment.

Now, I am going to speak very plainly here. What this amendment is trying to do is to correct a sweetheart deal which was wrapped into the farm bill some 5 years ago. Five years ago a deal was struck under which the milk marketing orders were adjusted legislatively rather than administratively, and the adjustments in the milk marketing orders favored the Southeastern part of the country.

The dairy section of the farm bill which passed at that time also wound up, overall, encouraging new production in the South and in the West. As a result, in California you have had a 15-percent increase in the milk supply the last 2 years, Florida 20 percent, Texas 30 percent.

Average herds, herd size in California is about 230 cows. You have some herds well over 1,000. In contrast, in the upper Midwest you have a herd size of around 50 cows, and you have had declining milk production.

What urban Members have to understand is that the deal that was cut 5 years ago favors the very same States who are now taking so much money away from us under the S&L crisis. California and Texas, the two biggest money gobblers on S&L's, are the same States that are going to be benefiting if you do not change this process and move to the Volkmer amendment. Because under the committee legislation, if it is not refined by the Volkmer amendment, you are going to continue to encourage new production, overproduction, in those growth areas, at the expense of the old production areas. It is in the old production areas where you find the small family farms.

Mr. Chairman, I simply want to say, if you want to encourage new milk production, you do not vote for the

Volkmer amendment. If you think it is a good idea to discourage new milk surpluses, then you vote for the Volkmer amendment. If you want to encourage the retention of the small farms as opposed to large farms, then you vote for the Volkmer amendment. If you are in favor of creating more biases for the big boys, then you vote for the committee language.

Mr. Chairman, I ask Members to remember, there is a higher percentage of poverty today in rural America than there is in urban America. I think that requires urban Members and rural Members alike to recognize that in the name of justice to the smallest farmers in this country, you need to adopt the language of the Volkmer amendment, you need to say we are going to establish regional equity, and you need to say we are going to give farmers an opportunity to do what has not happened in a long time, to deal with classic problems of overproduction. The way you do that is by passing the Volkmer amendment. It is the best thing for the taxpayers, it is the best thing for regional equity, it is the best thing to attack rural poverty, it is the best approach to preserve small family farmers, rather than encouraging the growth of the big boys.

Mr. Chairman, I urge Members to support the Volkmer-Kastenmeier amendment.

Mr. BOEHLERT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, ordinarily in a proceeding on an important bill like this that impacts so heavily on so many of the people I am privileged to represent, I would stand in support or stand in opposition of an amendment.

Quite frankly, I stand up here with some questions, more questions than answers. I point out we are dealing with a bill of 1,006 pages. It is a chore in itself to go through it all, but we are doing our best to do it.

But as a matter of fact, this amendment has only been made available to Members on a short-term basis. Originally last week I was led to believe that the gentleman from Missouri [Mr. VOLKMER], who has been working very diligently on this measure, and I think the interests of dairy farmers, had reached a compromise with both the majority and the minority. But apparently that compromise fell apart, and now we find ourselves with a new version of the Volkmer amendment.

Mr. Chairman, what I would like to do is ask a few questions of the author, if he would consent to answer them.

Mr. Chairman, first of all, I would like the gentleman from Missouri [Mr. VOLKMER] to compare what he has in terms of support price in his amendment with what the committee bill has.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield?

Mr. BOEHLERT. I yield to the gentleman from Missouri.

Mr. VOLKMER. Mr. Chairman, my amendment provides for a $10.60 support price, which means that the whole milk price for the period of 5 years would be an average of around $12.50.

Mr. BOEHLERT. So that is a floor, an absolute floor.

Mr. VOLKMER. Yes, that is a floor. But the farmer is going to get an average of $12.50. It is a floor, $10.60.

Mr. BOEHLERT. And the committee floor is what?

Mr. VOLKMER. Mr. Chairman, the committee floor is $10.10. However, they have a butterfat price cut in there, and I estimated that that is going to be a lot less support price. But it is a $10.10. That means in a whole milk price you are going to have an average of a little over $11 whole milk price to the dairy farmer under the committee bill. So you are going to have an average of around 92 cents to $1 less going to the farmer for each one hundredweight of milk that he sells during the 5 years under the committee than you are under my amendment.

Mr. BOEHLERT. Mr. Chairman, second, because we are dealing with a relatively new concept, we have talked about it a lot of times, the two-tier pricing concept. When would your two-tier pricing concept trigger in?

Mr. VOLKMER. If the gentleman will yield further, it would trigger in at a 3.5 billion purchase, amount of purchase by the CCC, as estimated by the Secretary. The reason that I went to 3.5 billion total milk is that before we used to do it on a butterfat content basically, and the butterfat content has triggered in the present price support. The committee decided in its wisdom, and I agree with the committee, through the leadership of the gentleman from Texas, that we should go to a total solids basis, and the committee has a total solids basis.

I followed along with that. Using a total solid basis, we come to a 3.5 billion trigger, rather than a 5 billion trigger; 3.5 total solids is equivalent to about a 5 billion total butterfat trigger.

Mr. BOEHLERT. Mr. Chairman, I was listening very attentively to the previous speaker, and if I may use his words, he said the committee bill, and this is his characterization, not necessarily mine, "is a bias for the big boys."

Quite frankly, I am not too excited about the big boys. I am interested in the typical family farm in upstate New York. I will be a little bit parochial, but that is what I was sent to Congress for.

Mr. VOLKMER. Mr. Chairman, I am concerned about mine in Missouri also.

Mr. BOEHLERT. Mr. Chairman, would the gentleman from Missouri [Mr. VOLKMER] tell me what the impact would be on the typical family farm of his amendment?

Mr. VOLKMER. Mr. Chairman, you would have the producer receiving approximately the same amount of income that he is presently receiving.

Mr. BOEHLERT. How would that compare with the committee bill?

Mr. VOLKMER. Under the committee bill you would have decline in income to that same producer over the period of years. The only way that he could try and make up is continue to produce more. If he could get more cows into his system and produce more milk, or if he uses BST or anything else to produce more milk, then if he can produce more milk at the same operating costs, then will the lower price he is receiving he may be able to equal the income. But when he does that, if they start doing that, that means we are going to have overproduction. Then you are going to see further decline in that price.

Mr. BOEHLERT. Mr. Chairman, finally, if I may, let me ask the gentleman from Missouri [Mr. VOLKMER] this: I have been around this institution long enough to know that those of us who advocate a particular point of view are usually biased in our testimony. Who else besides the gentleman from Missouri [Mr. VOLKMER], outside this Chamber, has taken a look at this amendment and says it is a pretty good deal for the dairy farmers of America?

□ 1500

Mr. VOLKMER. The Associated Milk Producers I know support it, the NFO, the NFU, the Coalition for Farm Alliance, others. Parts of it I would say are supported by Midam, parts of it are not. Midam would support $10.10, National Milk would support $10.10. However, both of them also support two-tier, and a two-tier by assessment, so there are parts of mine that those latters support and there are parts of the committee that they also support.

Mr. BOEHLERT. Mr. Chairman, I thank the gentleman for his response.

Mr. OBERSTAR. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, other speakers have addressed various issues, the question of surplus, the question of budgetary impact. The gentleman from Wisconsin [Mr. OBEY] has very eloquently and pointedly discussed the regional disparity issues. The gentleman from New York [Mr. BOEHLERT] asked a moment ago what would be the impact on the average dairy farmer.

Let me address that issue from the standpoint of just one of the six or seven dairy counties in my congressional district. Shoppers in Chisago County in my district are paying more for milk at the current level, and the co-ops are paying farmers $13.50, paying more for milk at $13.50 than when milk in the late 1970's and early 1980's was selling at $15.

One of my very best dairy farmers, one of those who survived the Reagan years of the herd buyout said, "You don't see any new machinery on the Ecklund farm. But the day is coming," Harold said, "when we are going to have to replace the corn planter, and I shudder to think of where I get the money to do it."

He and his son are operating an average Minnesota dairy farm. They produced 1,250,000 pounds of milk and they got $14.25 a hundredweight because they are producing high-quality milk. At roughly 13 gallons to 100, that works out to $1.09 to the farmer.

After the co-op buys the milk and puts it on the shelf in the local supermarkets, the shoppers are paying $2.45 per gallon. That is $32.50 a hundredweight. What happened between $14.25 a hundredweight and $32.50 a hundredweight? It did not go into the Ecklund farm, it is not going into the pockets of other farmers in that country because let me tell Members, 20 years ago there were 2,500 dairy farmers in Chisago County, and there are 100 of them left today. They are survivors. They work hard. They practice the best dairy practices. They are all tied into the University of Minnesota extension program and the main university computer system, and they are watching every penny. But they are not getting rich.

When farmers make a few bucks they do not spend it on highfalutin' vacations. They spend it on more machinery on the farm. They spend it on more buildings. They spend it on more productivity to try to produce better at a lower cost.

When we think about shoppers paying more for milk today than they did 10 years ago at higher prices to the farmer, there is something wrong with the system.

To ask for, as the Volkmer amendment does, a modest $10.60 floor, that is only a hedge against when times get bad, and they are not really booming right now on the farm. But when they get a little bit worse, and it does not take much, just a little rumble in the marketplace and that price goes down, and the farmer has bills to pay, and when he cannot meet them they go out of business. This happened in Chisago County and the rest of the east central part of Minnesota and all throughout farm country. We have lost over 3,000 dairy farmers in the State of Minnesota just since the dairy herd buyout program got underway.

And we are not going to get any young farmers started in agriculture with a $10.10 floor; $10.60 maybe; $13, yes. Even at $13 we are still below the supposed today market practice.

I guess what we are asking for is basic fairness to the dairy farmer, 7 days a week, 52 weeks a year on that farm, hard work, tough work.

They love it though, and they produce. And they are doing their best to keep America's most wholesome agricultural product at a reasonable, reachable price for consumers.

Mr. BOEHLERT. Mr. Chairman, will the gentleman yield?

Mr. OBERSTAR. I yield to the gentleman from New York.

Mr. BOEHLERT. Mr. Chairman, I am so very glad that the gentleman in the well pointed out the vast disparity between what the farmer gets and what the consumer pays.

Many people following the debate in Congress on the dairy title say, "There they go again, they want to raise the price of milk for the consumer." We do not want to raise the price of milk to the consumer. What we are trying to guarantee is a more equitable return for the hardworking dairy farmers. There is a big margin in between.

Mr. OBERSTAR. I think the fairest thing we can do to help the dairy farmer, the rock bed of American agriculture, is to support the Volkmer amendment.

Mr. SMITH of Vermont. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of this amendment because in my estimation, as a Representative from the State of Vermont where dairying is not only a way of life but a critical part of our economic structure, this amendment takes an agriculture bill with a bad dairy provision for the Northeast and for Vermont in particular and makes it a little bit better. With provision for a $10.60 base, cutting the surplus to $5 billion, and the two-tiered structure for butter fat, as well as other surpluses, and giving the Secretary of Agriculture the authority to implement that supply and management device should he feel a need to, I think are all extraordinarily important for farmers in this country, for consumers in this country, let alone people in my State.

There are two ways we can manage supply in dairying. One is to raise the base, and the other is to drive up demand. This amendment attempts to do the latter with the trigger at $5 billion and the two-tiered structure.

If we do not take this step at least, I would tell Members that there are several critical parts of American dairy policy that will be on the auction block along with hundreds of farms in the Northeast, and I dare say across the country.

First of all is our cheap food policy. Maybe we need another Dust Bowl, maybe we need another Great Depression to remind us that one of the most successful public policies in the history of this country, and certainly in this century is to protect the consumers, the families of this country against no food or against food that they cannot afford. Still today, with all of the other things that we know we can do better in this country, and our desire for cheaper food in this country, we still have the cheapest food in the world. And that I would say, Mr. Chairman, is a good thing, not a bad thing, and it is at risk along with protected regional supplies.

What is to happen when the corporate farms of the Southwest get control of the market and hold the rest of us hostage, and we have lost our capacity, our farmland has grown up, been bought by people out of State and used to look at instead of to support families and a local economy and a way of life? That it not a New England, and that is not a Vermont, and that is not an America I look forward to.

A lot of people think in my State, Norman Rockwell image that it has, dairying is just an attractive way of life. It is one of the only, other than the International Business Machines Corp., it is one of the only, and certainly the oldest area where we produce the raw material and we finish the product too.

□ 1510

It is a start-to-finish industry. It is one of the things that allows my State and many other rural States to compete in a modern economy.

I am not saying it is anyone's intention to do this, but the effect of this bill without this amendment is to rob us of the potential to continue to have that kind of an economy.

Dairying is a way of life in Vermont. It is an essential form of land management. Vermont is not unique, as much as we like to think we are; there are many, many rural States in the same boat.

As important as those two things are, dairying is the most essential local economic unit.

We have farmers who farm 15, 25, 35, 50, 75 cows; those are big operations in my State. If we lose them, we lose jobs, we lose our culture, we lose what it is, not just in Vermont but in this country, what makes rural America distinctive, a place to be admired and a place to be loved.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Vermont. I yield to the gentleman from Missouri.

Mr. VOLKMER. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I take this short time of the House to thank the gentleman from Vermont [Mr. SMITH] for his remarks because they are well thought out and I think they are very pronouncing as far as where the dairy industry is today and where it possibly could go tomorrow, especially for those what I call, medium-size and small dairymen. We have them in my State as well as yours.

I am afraid that under the provisions in the committee print plus what we see going down the pike on the budget, that if we do not do something different than what is there, we could well see the demise of those people.

I also like to tell my city people that if that demise happens, then my people, being a little bit further from California and Florida, could very well be taking their children nonfat dry milk and mixing it with water and that is what they get to drink. That is the kind of road I see going down with these big corporation farmers, et cetera.

Mr. SMITH of Vermont. Again, I thank the gentleman. I thank the gentleman for offering this amendment. I know it is a difficult issue. It is a difficult issue for his committee. I respect his courage in bringing the amendment and am happy to support it.

Mr. STENHOLM. Mr. Chairman, I move to strike the requisite number of words.

The CHAIRMAN. The Chair would advise the gentleman from Texas [Mr. STENHOLM] has already spoken once on the amendment. He may process without objection, by unanimous consent.

For what reason does the gentleman from Illinois rise?

Mr. MADIGAN. Mr. Chairman, I move to strike the requisite number of words and I yield to the gentleman from Texas [Mr. STENHOLM].

Mr. STENHOLM. I thank the gentleman for yielding.

Mr. Chairman, I just want to take a couple of minutes to interject the results of the last colloquy that occurred. I too have much sympathy for the small dairy producer. But I think I must take a look at the European situation.

The Europeans established a quota, like we are talking about establishing, 6 years ago. The results in Europe have not been as conclusive on behalf of the small dairy farmer as the arguments are being made today.

There has been a loss of dairy farms in Holland, for example, from 60,000 to 49,000, an 18-percent loss during this period of time. I think the reason why I oppose Volkmer today and why I do not want to restate again, because in the committee print what we are suggesting is a study of this before we implement it. Not that we do not take responsibility of making the adjustments today that we want an inventory management program if production goes to a high level, but how in fact we implement the two-tier system when that occurs, is the question.

I really worry about us creating arbitrarily a system that establishes a value for a quota that can be sold, because that does one thing and one thing only; it enriches the current dairy producer, whoever he or she may be, and it increases the cost of producing milk arbitrarily.

Now, I do not believe that is what we want to do in the dairy industry. I do not. I think we can devise a program that does not estabish value to quota. We are not prepared to do that today. The gentleman from Missouri suggests that we are. I do not think we are ready to do that.

To suggest this is a simple amendment and one of the reasons why I say in all of the hearings that we held and all of the hearings in which the gentlemen are here today testifying on behalf of this program, your dairy producers have not told this committee that this is what they in fact want.

Some question: Would each dairy farmer have to supply daily milk receipts to prove production history? There is one thing the farmers around the country have been telling me, that we have made things too complicated already. Now, maybe we want to do that. Maybe we do at some point in time. But there are a lot of questions that need to be answered.

For example, the suggestion was made that California was unduly enriched from the 1985 farm bill. The gentleman does not understand. California has the lowest price-support milk to their farmers than any other State in the country. It begs the point.

Now, a lot of the questions that we want to have answered and why we think the committee bill is the best way to go and why we do believe a study is in order today, is we need to take a look at—it is kind of like the little dog that chased the bus and caught it one day. Then what do we do?

That is what we are talking about here. This is a very serious question, one in which I do not oppose the concept of inventory management. I do not oppose the concept of two tiers. But I do sincerely oppose the gentleman doing it in the manner in which he proposes to do it today and the manner in which I opposed in subcommittee, as I opposed him in full committee and as I oppose him here.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield?

Mr. MADIGAN. I yield to the gentleman from Missouri [Mr. VOLKMER].

Mr. VOLKMER. I thank the gentleman for yielding.

Mr. Chairman, I understood earlier the gentleman from Texas used the word quota, he opposes the use of quotas.

Mr. STENHOLM. If the gentleman will yield, the manner in which the gentleman is proposing it in his amendment today, yes, I do.

Mr. VOLKMER. Mr. Chairman, the gentleman supports the peanut program.

Mr. STENHOLM. The one part of the peanut program that I wish we could change is that part of the quota system that has established a value that is, in turn, put into the cost of producing the peanut. If we could change that today without eliminating the peanut program, I would in fact support that. We cannot do that. I do not want to see us make the same mistake in dairy.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield further?

The CHAIRMAN. The gentleman from Illinois [Mr. MADIGAN] controls the time.

(By unanimous consent, Mr. MADIGAN was allowed to proceed for 2 additional minutes.)

Mr. MADIGAN. Mr. Chairman, I yield to the gentleman from Missouri.

Mr. VOLKMER. I thank the gentleman for yielding.

Mr. Chairman, under the provisions of the amendment, I would like to point out, I believe perhaps the gentleman has not had sufficient time to review it in total, there is a provision that you cannot sell the quota. There is a provision that the only way that the quota could be transferred is if you transfer your whole herd. Therefore, it does not change the amount of milk production, because it is the herd that is being transferred. It is the same herd whether you own it or I own it or John Doe owns it.

Mr. STENHOLM. Mr. Chairman, will the gentleman yield further?

Mr. MADIGAN. I will yield briefly to the gentleman. I have a brief statement.

Mr. STENHOLM. I thank the gentleman for yielding further briefly.

Mr. Chairman, that is precisely the point: Whole herds will be sold because that is what is happening all over Europe. They do take on a value, estimated up to $2,000 per cow.

Whoever buys that quota is usually another dairy farmer. It is awfully tough for a young dairy farmer to buy that quota and to go into business under the gentleman's amendment.

Mr. MADIGAN. Mr. Chairman, if I may briefly conclude my time: I am reluctant to get into this debate, because I am not an expert on the dairy program. I have very few dairy producers in my district. They are, those that I know, all good and honest people.

But I know that the subcommittee and the full committee worked very hard on this. I think they should be supported.

Mr. Chairman, I was told by a person in the Office of Mangement

and Budget and yersterday morning I was told by the Secretary of Agriculture, both people telling me that if the Volkmer provision was adopted, the bill would be vetoed.

I have just been called out by a representative of the White House to reconfirm that if Volkmer is adopted, this bill will be vetoed. I think we ought to support the committee.

Mr. GUNDERSON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, let me begin by complimenting the gentleman from Missouri and everybody who has offered this amendment, and I mean that sincerely because I know your hearts are in the right place and you are doing this because you believe this will bring more income to America's dairy farmers, something I think everybody, at least most of us in this room who have been involved in the dairy debate, support.

But once in a while we have to legislate, we cannot just deal with the ideal world we would like to have exist. That is why I have asked that this chart be brought here.

Those of us on the Agriculture Committee tried to deal with the concept of an increase in the support price, and we came out of the subcommittee with that kind of a proposal. But something hit us over the head that not one of us chose for ourselves, and that is the Congressional Budget Office baseline for dairy.

□ 1520

That CBO baseline starts here at approximately $625 million, and through the life of the 1990 farm bill goes down to someplace around $200, $220 million. That is the current services baseline that we have to deal with.

Now, every other commodity in agriculture made the decision between the subcommittee and full committee, or we made the decision for them in full committee that we would have to freeze their price support program. Wheat, seed grains, cotton, rice, sugar, every other commodity had to freeze their support price, deficiency payment, as a part of that agreement to say to all of American agriculture that because of the budget we did not have any more money, and that we were going to move forward with a freeze. Frankly, some money was made available in the total budget whereby dairy also could go with the freeze.

This committee bill, unlike any other farm bill brought before Members in recent times, not the 1982 bill, not the 1985 bill, this bill allows no price cuts in dairy. We could not say that in 1985. We could not say that in 1981. We could not say that in 1977. This is the first time we brought a bill that allows no price cuts during the life of this bill. Let Members understand, we pulled that off in the midst of a freeze on every commodity.

Now, the second thing everyone needs to understand, and why I must oppose this particular amendment is because I, too, come from Wisconsin. I come from the largest dairy district in the country. Most of those are small farmers, 45 cows, and do Members know what? Many are young farmers that are either trying to get into the business or they are trying to develop an operation, modernizing the operation that dad had so that they can succeed for the rest of their working years in dairy agiculture. The problem with the amendment in front of Members is, it is a permanent, two-tier program. Under this bill, under this amendment now before Members, not one farmer in the country can expand his production because he will be at a permanent two-tier program.

Second, not one young man or young woman anywhere in the country can enter dairy agriculture because there is no provision in this amendment for a new base.0

Mr. OBEY. Mr. Chairman, will the gentleman yield for a correction?

Mr. GUNDERSON. I am happy to yield to the gentleman from Wisconsin.

Mr. OBEY. Mr. Chairman, the gentleman indicated this would establish a permanent two-tier system. I make the point that the bill is only for 5 years. The two-tier system would only be for 5 years.

Mr. GUNDERSON. Mr. Chairman, I stand corrected. It is permanent for the life of this farm bill.

Now, moving on, we talk about starting and getting new entry into agriculture. We cannot do it in dairy under this particular amendment, with one exception. That is, if we can buy a total farm base. There is nothing in this amendment that keeps bases from being salable or keeps bases from having a value.

One of my colleagues, I think it is the gentleman from Minnesota who stood up and said we do not want to give any more incentive to corporate agriculture in the Southwest to get any bigger. I do not either. That is why I have been fighting the whole market sharing thing. But do Members know what? Under the substitute amendment being offered right now, the only way we can get the base is to buy the whole thing. Who will have the money for that? A young 22-year-old farmer from Wisconsin? No. It will be that 2,000-cow, that 8,000-cow operation in California that will buy up those bases in Wisconsin, transfer them to California. Do Members know what the impact of that is going to be?

Now, the third thing that is absolutely essential for every member of this Committee of the Whole to understand is that we are dealing with a budget summit, and we are dealing with limited resources.

(By unanimous consent, Mr. GUNDERSON was allowed to proceed for 5 additional minutes.)

Mr. GUNDERSON. Mr. Chairman, there is a report put out recently called "Citizens Against Government Waste, How to Avoid Increased Taxation." Obviously, this is how we meet Gramm-Rudman, without increased spending. I want to read to Members one of their recommendations on page 26 of their report. It says, "Dairy farmers should pay half the cost of the Federal programs that stabilize and increase their incomes." I hope every dairy farmer and every dairy processor heard what I just read.

Under this amendment we begin a process that in a matter of couple of years will guarantee we have a no net cost dairy program equal to the tobacco program here today. Under this amendment, once we increase production at all, we have an automatic $6.89 assessment per hundredweight under the two-tier program. Once we read the 5-billion pound butter fat trigger, any given year we have an automatic assessment of $4.50 per hundredweight, for $11.39 assessment. Before we get to the Gramm-Rudman assessment, which is projected to be 14 cents per hundredweight based on the present projections which will tell people they will have $11.52 assessment on an amendment that guarantees a $10.60 price.

Now, if Members will look at the gentleman from Missouri's proposal in the CBO, he will say that the reason this proposal is so good is because it will get people an all-milk price next year of $13.27. Do Members know that this year, last Friday, we had an MW, the Minnesota/Wisconsin price, which was $13.28. That is without any of the assessments that are included in this particular bill. Pity the farmer who does not increase production, because under this bill, once we reach that 5 billion butter fat assessment trigger, he has $4.50, plus Gramm-Rudman, he has another 13 cents. So, a farmer who does not increase production next year one iota will have $4.63 assessment per hundredweight simply for trying to keep his production in line, but because the Congress of the United States imposed this plan on him.

Members, we have tried for a long time to put together a national and a modern dairy policy to meet what we believe is going to be a growing national industry in the 1990's. This amendment says no to that. This amendment says no to every young farmer in the country who wants to get started. This amendment says to every farmer who simply tries to hold his production in line, they get to pay $4.63 per hundredweight.

I understand that every Member's heart is in the right place. I commend the Members for the direction that they want to lead Members, but this amendment does not do it.

Mr. VOLKMER. Mr. Chairman, I move to strike the requisite number of words.

The CHAIRMAN. Without objection, the gentleman from Missouri [Mr. VOLKMER] is recognized for 5 minutes.

There was no objection.

Mr. VOLKMER. Mr. Chairman, the gentleman that just spoke in the well would lead Members to believe that the provision before Members is going to cost more than the House farm bill that is there before Members, and we can look at those figures and we will not find anything there on that green line that is below $600 million. However, if we look at the estimates made by myself and CBO at our total, it is well below those figures. The total is 536, 538, 538, 553, 373, which are below those figures on my amendment. That is CBO. They are below his figures. Therefore, less cost to taxpayer under my amendment than under his amendment.

The gentleman also proposed that no new farmers will be able to get in the dairy industry. I would appreciate if the gentleman would read page 7 of the amendment and he will find provisions where new farmers can come in at 75 percent. There is provision for new farmers in this amendment. We are not going to try and keep any person out of dairy farming.

The last thing that I would like to clear up, I heard a gentleman say $4.63, $3 and some cents, per hundredweight that they will pay on milk that they are now getting a full price on. No, it is only the excess milk that there is assessments. On your total milk marketing history, we get the full price, which is a good price, and that holds up the price.

□ 1530

Mr. Chairman, the gentleman cannot disagree. If the gentleman will look at the CBO figures for our amendment and for the committee print, he will find a whole milk price that is higher under ours than under his. He will also find that when we figure in the assessment, we will still net out more under ours than under his. In Wisconsin alone it is equal to about $300 million. Over the 5 years it is equal over 1,000 jobs on the jobs market. That is how much it is worth in the economy in Wisconsin alone. That is how much this amendment would mean in additional income to the producers.

Mr. KASTENMEIER. Mr. Chairman, will the gentleman yield?

Mr. VOLKMER. I am glad to yield to the gentleman from Wisconsin.

Mr. KASTENMEIER. Mr. Chairman, my friend, the gentleman from Wisconsin, had suggested that the amendment was defective because it did not allow for additional and new producers.

Mr. VOLKMER. It sure does allow for it.

Mr. KASTENMEIER. But the problem we have in Wisconsin, in the first district, the second district, and the seventh district is the number of farmers we have lost in the last 10 years. That is the problem.

Mr. VOLKMER. We have had the same problem, and it is because of lower farm income.

Mr. GUNDERSON. Mr. Chairman, will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from Wisconsin.

Mr. GUNDERSON. Mr. Chairman, I appreciate the gentleman's yielding because I want to clear up this point. I do not want to misinform any of my colleagues.

The CHAIRMAN. The time of the gentleman from Missouri [Mr. VOLKMER] has expired.

(On request of Mr. GUNDERSON, and by unanimous consent, Mr. VOLKMER was allowed to proceed for 2 additional minutes.)

Mr. GUNDERSON. Mr. Chairman, if the gentleman will yield further, as I read on page 7, paragraph (D) it says:

> In the case of individual producers that have no marketing history, the Secretary shall establish such producers' base at 75 percent of the total milk marketed for commercial use by the producer in the month immediately prior to implementation.

Now, what if I am not in business the month prior to implementation? How do I get a base?

Mr. VOLKMER. You go into business, you produce for a month, and you have a base. That is all it is. It is simple. You just have to read it right. It is 75 percent of that on an annualized basis. That is it. It is very simple.

Mr. GUNDERSON. But this does not say, before you begin farming. It says, prior to implementation of the reduction in price provided under paragraph 1. It says, prior to the implementation of the program. It does not say that 1 month after you begin the commercial marketing of milk you shall receive a base.

Mr. VOLKMER. You can receive a base as soon as you go in. You produce, and after a month you come in and you get 75 percent on an annualized basis.

Mr. GUNDERSON. Well, I guess we read the language differently.

Mr. Chairman, I appreciate the gentleman's yielding.

Mr. JOHNSON of South Dakota. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Volkmer amendment.

First of all, I want to thank the gentleman from Missouri [Mr. VOLKMER], as well as the other gentlemen, for their work on this two-tiered amendment.

As a member of the Agriculture Committee and a member of the Subcommittee on Livestock, Dairy, and Poultry, I appreciate as well the hard work that the subcommittee chairman, the gentleman from Texas [Mr. STENHOLM], and the ranking member, the gentleman from Wisconsin [Mr. GUNDERSON], have put into an attempt to formulate a dairy policy that does in fact protect the interests of ordinary dairy producers. It has been a difficult project to undertake, given the budget constraints the committee has faced.

Nonetheless, it seems to me that the direction to move is in the direction of a two-tiered dairy price support. I supported and sponsored an amendment in committee which would have created a $13.10 price support on a two-tiered level which would in fact have saved the Treasury a couple of hundred million dollars at the same time. We were not successful, but I do believe that the $10.60 amendment offered by the gentleman from Missouri [Mr. VOLKMER], as presented to the House, is in fact a very responsible and moderate amendment, particularly given the fact that the Department of Agriculture itself in its most recent estimates has indicated that the national average cost of production is $13.14, which is significantly higher than the $10.64 we are talking about here today.

Our dairy producers do not have the benefit of collective bargaining, of wage and hour laws, or of minimum wage and other benefits that our urban brothers have. What we do need is an opportunity, in a common sense sort of way, to determine what is the level of dairy production that is needed in this nation and to provide a reasonable level of compensation on the level alone for those who overproduce, to allow them to bear the brunt of the penalties for that overproduction rather than an across-the-board impact on all our dairy producers.

So I do support the Volkmer amendment at a time when the administration has suggested we could be losing up to a half million farmers and when there are contentions about whether that is an accurate figure or not, but even if it is a figure that is substantially off base, that is still a substantial number of farmers that would be lost from the land, even if all we do is freeze our target price on grains and dairy products in the dairy industry.

So it seems that we need to take some bold steps. We need to be more innovative than ever in order to get a better level of income support, with a

frozen or even reduced level of funding available to us in the dairy sector.

So, Mr. Chairman, I do support this amendment. I hope that the full House will support it.

Mr. DE LA GARZA. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, in an attempt to conclude the debate on this issue, first let me say that this is not the type of situation the committee chairman relishes, due to the fact that within the committee there is a difference of opinion, whether we call it ideological, philosophical, or whatever else we wish to call it. I might stipulate the fact, though, that not this amendment but a similar one was offered by the gentleman from Missouri [Mr. VOLKMER] in the committee. It was defeated by a vote of 24 to 14. That is how the committee voted.

We now find ourselves in a situation that is very serious and sad, because my dear friend and colleague, the gentleman from Minnesota, described the farm for us, and I have been to that farm in Minnesota; I have been to the same farm in east Texas; I have been to the same farm in south Texas; I have been to the same farm in Wisconsin; I have been to the same farm in Arizona; and I have been to the same farm in California. You just change the names.

The gentleman articulated, I think, in an exemplary manner what we are speaking about. The problem we find ourselves in now is that the gentleman from Wisconsin disagrees with another gentleman from Wisconsin on the philosophical or on the practical aspect about the implication of administering this amendment. I would hope that this could be resolved down the line, but at this point I have no other alternative but to ask my colleagues to support the committee and vote no on the Volkmer amendment. The committee defeated that amendment or a similar version by a vote of 24 to 14.

The argument has not been convincing to the nth degree that we would better the life of that little farmer in Minnesota or that little farmer in Wisconsin or east Texas. If we mention the facts about what is happening in Europe today, we find that dairy farmers in Holland are selling their land and their cattle and they are moving to Indiana, to east Texas, and to many other parts of the United States because they could no longer work under the system that has been spoken of in some degree as being favorable to the European Community. So that has not worked.

I have been to that same farm outside Munich, Germany, where the fellow told me: "The only thing that is going to save me is when they build that airport through here and I sell my land to the government." We do not want that to happen to these little dairy farmers.

We talk about this ogre, the corporation. I say to my colleagues that a corporation has to make a profit every quarter or else they fire the CEO. You do not make a profit every quarter farming. Why do they hang on? Because they love the land and because they want to keep doing what they have been doing.

So, Mr. Chairman, in view of everything I have before me, I would ask my colleagues to support the committee, and hopefully we can continue to provide that better life for that little farmer down the line.

Mr. OBERSTAR. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I am happy to yield to the gentleman from Minnesota.

Mr. OBERSTAR. Mr. Chairman, I picked up on the comment of the chairman of the committee about the dairy farmer outside Munich. That is what the dairy farmers in east central Minnesota are saying. There is a new airport being planned in Minnesota, and at a meeting one of the dairy farmers stood up and said, "Jim, I have finally figured out there is more money in runways than there is in furrows and dairy cows."

Mr. DE LA GARZA. I cannot disagree with the gentleman. I have heard it.

Mr. OBERSTAR. So the same thing is happening in our area.

□ 1540

Mr. BROWN of California. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise to reinforce the statement that the gentleman from Texas [Mr. DE LA GARZA] just made. I hope he will forgive me for taking the time, but California has not been heard from in this debate, and I want to say that the farmers of California in all of their expressions to me have expressed their very strong opposition to this amendment offered by the gentleman from Missouri [Mr. VOLKMER].

Mr. Chairman, I think we have heard some very statesmanlike expressions from the chairman of the full committee, the gentleman from Texas [Mr. DE LA GARZA], the chairman of the subcommittee and the ranking minority member of the subcommittee with regard to the situation in the dairy industry. I do not know whether Texas, Florida, and California should apologize for the fact that so many people from Missouri, Minnesota, and Wisconsin have moved out of their States to ours, but I can assure my colleagues that the increase in dairy production roughly matches the increase in the number of people in these States, and there is nothing sinful about this.

If we think for any one moment that we can preserve the nostalgic image of the small dairy farm that has existed in so many parts of this country on into the future, we are wrong. That is not happening, and it will not be affected by the passage of this bill. The number of dairy farms has been going down for the last 50 years and will continue to go down.

Mr. Chairman, let me just for a moment talk about the huge corporate farm, whether it is in Florida, Texas, or California. We have those huge farmers in my district. Most of them are people from Holland, from Switzerland, from Portugal, from the Basque country of Spain. Their families have been in the dairy business for not 2, or 3 or 4 generations, but many times for 8, 10, or 12 generations. In many cases they are corporations. The corporations are controlled by the families. They still live on the farm in many cases, and they are efficient, and they want to continue to grow to keep up with the market in the most rapidly growing areas of the United States.

Mr. Chairman, the amendment of the gentleman from Missouri [Mr. VOLKMER] would prevent that in their opinion, and I have no reason to question that opinion. I believe in all sincerity, as the gentleman from Texas [Mr. DE LA GARZA], the chairman has said, that the committee has resolved these problems in the best way that we can at the present time, and I urge support for it.

Mr. GEPHARDT. Mr. Chairman, the farm bill touches the lives of Americans every day. It affects the prices we pay for food and the stewardship of our soils. Through the Food Stamps Program and our other efforts to address the problem of hunger, it determines the availability of food for those who cannot afford it. And for the Nation's hardworking family farmers, the farm bill determines whether they will be able to make a decent living and pass their farms on to their children—or face foreclosure and liquidation.

So while the debate about loan rates and target prices may seem arcane in Washington, it is of vital importance to us all and particularly to the rural heartland of this country.

As my colleague and friend from South Dakota, Senator DASCHLE, has eloquently pointed out, the 1980's saw some of the worst times we have ever seen in agriculture. When you adjust for the effects of inflation, farm income is down and falling.

Among our farmers, particularly those without the time and money to travel to Washington, there is a growing apprehension about what the future holds. Livestock markets are strong now, but what will happen when the cycle starts down, as it invariably will? I see a great worry about the future of our rural communities and of the very existence of family farm control of the Nation's food production.

In my view, the critical question facing us in this farm bill must be how to preserve a family farm system of agriculture and an adequate level of farm income at a time when the Federal Government must reduce its budget deficit. Many of our farmers are in their sixties.

Who will own and farm their lands when they retire? Another generation of family farmers? Or large corporations?

I admire and commend the work of the chairman and his committee. The chairman has worked very hard to make many improvements: To improve in many ways our Nation's programs to combat hunger, to foster good land stewardship, and to improve our export programs.

In particular, the committee has worked extremely hard and made some very painful decisions in order to stay within the constraints imposed by the House budget resolution. At the same time the committee has stopped a 5-year slide in target price reductions and reversed a policy of ever-lower loan rates. I commend and thank the chairman for these provisions.

I personally believe that we can do still better in providing opportunity in rural America. The budget constraints we face do not mean that we can't have a farm program that preserves family farm agriculture. During the floor consideration of this bill, we will consider amendments to boost the incomes of our family farmers without busting the budget. We will also consider an amendment offered by my colleague from Missouri, Congressman VOLKMER, which can raise the income of dairy farmers at no additional cost to taxpayers. I urge my colleagues to support these amendments.

Federal farm programs exist to ensure a stable, secure and diversified food supply, and to provide economic opportunity for our family farmers. John F. Kennedy once put it: "The American farmer is the only person in our economy who buys everything he buys at retail, sells everything he sells at wholesale and pays the freight both ways." Today, this rationale for the Federal farm program is as true as ever. I urge by colleagues to adopt these amendments and stand up for fairness for our family farmers.

Mr. STANGELAND. Mr. Chairman, I rise in support of the amendment by the gentleman from Missouri [Mr. VOLKMER].

This amendment establishes a dairy price support of $10.60 per hundredweight, which would be supported by Government purchases of dairy products.

This amendment would also establish a two-tier support price system if projected government purchases exceed 5 billion pounds based on a total solids basis. The producer receives full market price for milk produced within producer's base, which would be based on proportionate share of national marketing base calculated on basis of producer's marketing history.

On excess production, producers price is reduced by 65 percent of the support price which would discourage excess production and would not be subject to the $10.60 minimum.

Producers who do not exceed their base receive full market price without any reduction. Any second-tier price reduction is collected by purchaser of milk from producer and remitted to the Commodity Credit Corporation [CCC].

In regards to the food programs, the CCC is to use available funds, when two-tier price and fat checkoff programs are in effect, to purchase dairy products for use in domestic food assistance programs.

Farm prices will be reduced for excess fat marketings if projected Government purchases exceed 5 billion pounds on a milk fat basis which would combat the most likely problem area—excess production and Government purchases of milk fat.

The checkoff is not to exceed government purchase price for butter.

Mr. Chairman, I feel that this amendment is in the best interest of family dairy farmers who make a depend on the their dairy for their income. This amendment will protect their income and will put more money in the pockets of these farmers. I urge adoption of the amendment.

The CHAIRMAN. The question is on the amendment, as modified, offered by the gentleman from Missouri [Mr. VOLKMER].

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. GUNDERSON. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 70, noes 353, not voting 9, as follows:

NOT VOTING—9

Crockett	Hansen	Nelson
Ford (TN)	Leath (TX)	Washington
Hall (OH)	Morrison (CT)	Watkins

□ 1604

Messrs. MOORHEAD, OWENS of Utah, ROSTENKOWSKI, Mrs. UNSOELD, and Mr. NOWAK changed their vote from "aye" to "no."

Messrs. WILSON, COLEMAN of Texas, and GEREN of Texas changed their vote from "no" to "aye."

So the amendment, as modified, was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. OBEY

Mr. OBEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. OBEY: Strike section 403 and insert the following:

SEC. 403. MILK MANUFACTURING MARGIN ADJUSTMENT.

No state may use a greater allowance than that provided for in Federal programs to establish a Grade A price for milk for manufacturing butter, nonfat dry milk, or cheese.

Mr. OBEY. Mr. Chairman, the issue we are addressing now is an issue quite different from the previous vote. This amendment simply eliminates what is known as the California make-allowance.

For the uninitiated, farmers simply receive a price for their product which is defined nationally as the support price, and in addition, an extra allowance is provided to a processor.

□ 1610

The farmers are paid at least the support price for their product, and then processors are paid what is called a make-allowance in order to reimburse for the costs of manufacturing the product into something which is storable if it cannot be used immediately.

Now, a lot of people can ask what is a Member from Wisconsin doing messing with something in California? The answer is very simple. The fact is that California is a very large delegation. I have nothing against anyone from California. In fact, as the old saying goes, some of my best friends are Californians. But the fact is that the California make-allowance costs each and every farmer nationwide, and it costs the consumer, and it cost the taxpayer. Because very simply, California has a special deal under which the State of California is allowed to pay their processors a larger fee than any other processors can be paid in any other State in the Union.

The net result of that special arrangement is that you create an artificial incentive to add to productive capacity, to add to physical plant for processing purposes, and you thereby increase the costs to the Government of purchases from California because of that artificial stimulation.

Last year dairy production in California went up 8 percent. Now, there is no problem with regard to cheese for the moment because with cheese we have a tight market, you can sell almost everything that you make. But there is a tremendous surplus of butter in this country.

One of the reasons we have that tremendous butter surplus is because of the California make-allowance. That California make-allowance creates an artificial incentive for farmers to simply produce dairy products in California, which are then processed into buter and sold directly to the Government, not to the marketplace, because there is a glut on the marketplace for butter. That is why California produced 13 percent of the Nation's milk in 1988, but they produced 26 percent of the product purchased by the Commodity Credit Corporation.

Mr. Chairman, what that means is that for anyone living outside of California there is no benefit. We get no benefit from the added production, but we do get stuck with having to finance the added cost. If we are to have a national dairy program, then we ought not to have this special deal for California just because it is the best connected and the largest State in the Union. It seems to me that we want a national program which treats every farmer equitably.

Mr. Chairman, let me remind Members under existing law, for instance, if you have commodity credit purchases above a certain level you trigger price cuts for farmers nationally. To the extent we artificially encourage additional production of butter in California, that adds unnecessarily and artificially to Government purchases. That in fact triggers price cuts for other farmers across the country.

Mr. Chairman, as I said earlier, this also means that the taxpayer is shelling out more for the cost of the dairy program than he would otherwise have to shell out.
